

**Australian Government**

# **MSF Furnishing Training Package**

**Release: 7.0**

## CONTENTS

<b>MSF Furnishing Training Package.....</b>	<b>28</b>
<b>MSF10122 Certificate I in Furnishing .....</b>	<b>29</b>
<b>MSF20122 Certificate II in Furnishing.....</b>	<b>31</b>
<b>MSF20322 Certificate II in Cabinet Making and Timber Technology .....</b>	<b>37</b>
<b>MSF20413 Certificate II in Glass and Glazing.....</b>	<b>40</b>
<b>MSF20522 Certificate II in Furniture Making Pathways.....</b>	<b>44</b>
<b>MSF30122 Certificate III in Furniture Finishing.....</b>	<b>47</b>
<b>MSF30322 Certificate III in Cabinet Making and Timber Technology.....</b>	<b>51</b>
<b>MSF30422 Certificate III in Glass and Glazing .....</b>	<b>58</b>
<b>MSF30518 Certificate III in Picture Framing.....</b>	<b>64</b>
<b>MSF30722 Certificate III in Upholstery .....</b>	<b>67</b>
<b>MSF30818 Certificate III in Flooring Technology .....</b>	<b>70</b>
<b>MSF30919 Certificate III in Blinds, Awnings, Security Screens and Grilles .....</b>	<b>76</b>
<b>MSF31018 Certificate III in Interior Decoration Retail Services .....</b>	<b>83</b>
<b>MSF40122 Certificate IV in Interior Decoration .....</b>	<b>87</b>
<b>MSF40222 Certificate IV in Furniture Design and Manufacturing .....</b>	<b>90</b>
<b>MSF40318 Certificate IV in Kitchen and Bathroom Design .....</b>	<b>95</b>
<b>MSF40418 Certificate IV in Glass and Glazing .....</b>	<b>99</b>
<b>MSF40522 Certificate IV in Piano Technology.....</b>	<b>103</b>
<b>MSF50222 Diploma of Interior Design .....</b>	<b>106</b>
<b>MSF50322 Diploma of Furniture Design and Manufacturing.....</b>	<b>110</b>
<b>MSF60122 Advanced Diploma of Interior Design.....</b>	<b>114</b>
<b>MSFSS00014 Kitchen and Bathroom Installer Licence .....</b>	<b>119</b>
<b>MSFSS00015 Fitted Furniture Installation.....</b>	<b>121</b>
<b>MSFSS00016 Piano Tuning .....</b>	<b>123</b>
<b>MSFSS00017 Fitted Furniture Estimating.....</b>	<b>125</b>
<b>MSFSS00018 Piano Repair and Maintenance.....</b>	<b>127</b>
<b>MSFAH4003 Advise on security technology, hardware and services .....</b>	<b>129</b>
<b>Assessment Requirements for MSFAH4003 Advise on security technology, hardware and services .....</b>	<b>132</b>
<b>MSFAH4004 Prepare architectural door hardware schedules.....</b>	<b>134</b>
<b>Assessment Requirements for MSFAH4004 Prepare architectural door hardware schedules.....</b>	<b>137</b>
<b>MSFBA2011 Select and apply hardware and fixings for blinds, awnings, screens and grilles.....</b>	<b>139</b>
<b>Assessment Requirements for MSFBA2011 Select and apply hardware and fixings for blinds, awnings, screens and grilles.....</b>	<b>142</b>
<b>MSFBA2012 Use blinds, awnings, security screens and grilles hand and power tools .....</b>	<b>146</b>
<b>Assessment Requirements for MSFBA2012 Use blinds, awnings, security screens and grilles hand and power tools .....</b>	<b>148</b>
<b>MSFBA2013 Set up, operate and maintain blinds and awnings static machines .....</b>	<b>151</b>
<b>Assessment Requirements for MSFBA2013 Set up, operate and maintain blinds and awnings static machines .....</b>	<b>154</b>
<b>MSFBA2014 Construct metal louvre and canopy-hooded style awnings.....</b>	<b>157</b>
<b>Assessment Requirements for MSFBA2014 Construct metal louvre and canopy-hooded style awnings.....</b>	<b>159</b>
<b>MSFBA3011 Assemble awnings.....</b>	<b>161</b>
<b>Assessment Requirements for MSFBA3011 Assemble awnings .....</b>	<b>164</b>
<b>MSFBA3012 Assemble interior blinds.....</b>	<b>167</b>

**Assessment Requirements for MSFBA3012 Assemble interior blinds.....170**  
**MSFBA3014 Assemble pelmets .....173**  
**Assessment Requirements for MSFBA3014 Assemble pelmets .....176**  
**MSFBA3015 Install louvre shutters.....180**  
**Assessment Requirements for MSFBA3015 Install louvre shutters .....184**  
**MSFBA3016 Install awnings.....188**  
**Assessment Requirements for MSFBA3016 Install awnings .....192**  
**MSFBA3017 Install interior blinds.....196**  
**Assessment Requirements for MSFBA3017 Install interior blinds .....199**  
**MSFBA3018 Assess suitability of blinds and awnings.....202**  
**Assessment Requirements for MSFBA3018 Assess suitability of blinds and awnings .....205**  
**MSFBA3019 Assemble roller shutters .....208**  
**Assessment Requirements for MSFBA3019 Assemble roller shutters.....211**  
**MSFBA3020 Install roller shutters.....214**  
**Assessment Requirements for MSFBA3020 Install roller shutters.....218**  
**MSFBA3021 Assemble louvre shutters.....222**  
**Assessment Requirements for MSFBA3021 Assemble louvre shutters.....225**  
**MSFCP2005 Use coopering sector hand and power tools .....228**  
**Assessment Requirements for MSFCP2005 Use coopering sector hand and power tools 230**  
**MSFCP3001 Produce barrels using non-fired processes.....233**  
**Assessment Requirements for MSFCP3001 Produce barrels using non-fired processes .236**  
**MSFCP3002 Produce barrels using fired processes.....238**  
**Assessment Requirements for MSFCP3002 Produce barrels using fired processes.....241**  
**MSFCP3003 Maintain and repair barrels .....243**  
**Assessment Requirements for MSFCP3003 Maintain and repair barrels.....246**  
**MSFDG3001 Protect leadlight and stained glass .....248**  
**Assessment Requirements for MSFDG3001 Protect leadlight and stained glass .....250**  
**MSFDG3002 Prepare and install architectural engineered leadlight and stained glass...252**  
**Assessment Requirements for MSFDG3002 Prepare and install architectural engineered leadlight and stained glass.....255**  
**MSFDG3004 Assemble copper foil glass components .....257**  
**Assessment Requirements for MSFDG3004 Assemble copper foil glass components.....260**  
**MSFDG3005 Fuse glass .....262**  
**Assessment Requirements for MSFDG3005 Fuse glass.....265**  
**MSFDG3006 Process coloured and textured glass by hand .....267**  
**Assessment Requirements for MSFDG3006 Process coloured and textured glass by hand270**  
**MSFDN4003 Produce patterns and templates .....272**  
**Assessment Requirements for MSFDN4003 Produce patterns and templates .....276**  
**MSFDN5001 Generate and transfer complex computer-aided drawings and specifications278**  
**Assessment Requirements for MSFDN5001 Generate and transfer complex computer-aided drawings and specifications.....282**  
**MSFFDM4001 Assemble custom furniture .....284**  
**Assessment Requirements for MSFFDM4001 Assemble custom furniture .....287**  
**MSFFDM4002 Collect and interpret information to support production processes.....290**  
**Assessment Requirements for MSFFDM4002 Collect and interpret information to support production processes.....294**  
**MSFFDM4003 Construct and evaluate prototypes and samples.....296**  
**Assessment Requirements for MSFFDM4003 Construct and evaluate prototypes and samples .....299**  
**MSFFDM4004 Construct joints for custom furniture.....302**  
**Assessment Requirements for MSFFDM4004 Construct joints for custom furniture .....305**  
**MSFFDM4005 Design, construct and test jigs .....307**  
**Assessment Requirements for MSFFDM4005 Design, construct and test jigs .....310**

MSFFDM4006 Hand carve wood to custom design.....	312
Assessment Requirements for MSFFDM4006 Hand carve wood to custom design.....	315
MSFFDM4007 Identify and calculate production costs .....	318
Assessment Requirements for MSFFDM4007 Identify and calculate production costs ...	321
MSFFDM4008 Investigate materials and technologies for design projects .....	323
Assessment Requirements for MSFFDM4008 Investigate materials and technologies for design projects .....	326
MSFFDM4009 Match furnishing style and materials to customer requirements .....	328
Assessment Requirements for MSFFDM4009 Match furnishing style and materials to customer requirements .....	331
MSFFDM4010 Prepare and present design and manufacturing information .....	334
Assessment Requirements for MSFFDM4010 Prepare and present design and manufacturing information.....	336
MSFFDM4011 Prepare tender submissions.....	338
Assessment Requirements for MSFFDM4011 Prepare tender submissions .....	341
MSFFDM4012 Produce computer-aided line and component production drawings.....	343
Assessment Requirements for MSFFDM4012 Produce computer-aided line and component production drawings.....	345
MSFFDM4013 Produce curved and shaped components for custom furniture .....	347
Assessment Requirements for MSFFDM4013 Produce curved and shaped components for custom furniture .....	350
MSFFDM4014 Produce manual and computer-aided drawings from design concepts ...	353
Assessment Requirements for MSFFDM4014 Produce manual and computer-aided drawings from design concepts .....	356
MSFFDM4015 Produce patterns and templates .....	358
Assessment Requirements for MSFFDM4015 Produce patterns and templates.....	360
MSFFDM4016 Produce timber veneered components for custom furniture .....	362
Assessment Requirements for MSFFDM4016 Produce timber veneered components for custom furniture .....	365
MSFFDM4017 Purchase materials and consumables .....	368
Assessment Requirements for MSFFDM4017 Purchase materials and consumables .....	371
MSFFDM4018 Research and organise product inspection and testing .....	373
Assessment Requirements for MSFFDM4018 Research and organise product inspection and testing .....	376
MSFFDM4019 Research and select manufacturing technologies.....	378
Assessment Requirements for MSFFDM4019 Research and select manufacturing technologies .....	381
MSFFDM4020 Research and select product finishes .....	383
Assessment Requirements for MSFFDM4020 Research and select product finishes.....	385
MSFFDM4021 Research furniture styles and movements .....	387
Assessment Requirements for MSFFDM4021 Research furniture styles and movements	390
MSFFDM4022 Select, use and maintain hand tools for the creation of custom products	392
Assessment Requirements for MSFFDM4022 Select, use and maintain hand tools for the creation of custom products .....	395
MSFFDM4023 Set up, operate and maintain basic static woodworking machines for furniture designs .....	397
Assessment Requirements for MSFFDM4023 Set up, operate and maintain basic static woodworking machines for furniture designs .....	400
MSFFDM5001 Construct custom furniture using advanced techniques .....	402
Assessment Requirements for MSFFDM5001 Construct custom furniture using advanced techniques.....	407
MSFFDM5002 Coordinate and optimise workplace maintenance programs.....	409

**Assessment Requirements for MSFFDM5002 Coordinate and optimise workplace maintenance programs .....412**

**MSFFDM5003 Design product suitable for batched or limited production .....414**

**Assessment Requirements for MSFFDM5003 Design product suitable for batched or limited production .....418**

**MSFFDM5004 Design product suitable for high-volume technology services in production 421**

**Assessment Requirements for MSFFDM5004 Design product suitable for high-volume technology services in production .....425**

**MSFFDM5005 Design product suitable for mass production .....428**

**Assessment Requirements for MSFFDM5005 Design product suitable for mass production 431**

**MSFFDM5006 Develop and document technical workplace information .....433**

**Assessment Requirements for MSFFDM5006 Develop and document technical workplace information .....435**

**MSFFDM5007 Develop, trial and evaluate prototypes .....437**

**Assessment Requirements for MSFFDM5007 Develop, trial and evaluate prototypes ...440**

**MSFFDM5008 Evaluate design proposals and concepts .....443**

**Assessment Requirements for MSFFDM5008 Evaluate design proposals and concepts..446**

**MSFFDM5009 Generate and transfer complex computer-aided drawings and specifications.....448**

**Assessment Requirements for MSFFDM5009 Generate and transfer complex computer-aided drawings and specifications.....451**

**MSFFDM5010 Investigate ergonomic, anthropometric and proxemic considerations for design.....453**

**Assessment Requirements for MSFFDM5010 Investigate ergonomic, anthropometric and proxemic considerations for design.....455**

**MSFFDM5011 Plan production.....457**

**Assessment Requirements for MSFFDM5011 Plan production .....460**

**MSFFDM5012 Research, test and apply materials and technologies for design projects 462**

**Assessment Requirements for MSFFDM5012 Research, test and apply materials and technologies for design projects .....465**

**MSFFDM5013 Work collaboratively on design projects .....467**

**Assessment Requirements for MSFFDM5013 Work collaboratively on design projects .469**

**MSFFDT3001 Install low-voltage technology, automation, and intelligent management systems in furnishing .....471**

**Assessment Requirements for MSFFDT3001 Install low-voltage technology, automation, and intelligent management systems in furnishing.....474**

**MSFFFF2009 Use furniture finishing hand and power tools.....477**

**Assessment Requirements for MSFFFF2009 Use furniture finishing hand and power tools 479**

**MSFFFF2010 Dismantle and reassemble furniture for finishing .....481**

**Assessment Requirements for MSFFFF2010 Dismantle and reassemble furniture for finishing .....484**

**MSFFFF2011 Remove surface coatings .....486**

**Assessment Requirements for MSFFFF2011 Remove surface coatings.....488**

**MSFFFF2012 Prepare surfaces for finishing .....491**

**Assessment Requirements for MSFFFF2012 Prepare surfaces for finishing.....493**

**MSFFFF2013 Maintain spray equipment and booth .....495**

**Assessment Requirements for MSFFFF2013 Maintain spray equipment and booth.....498**

**MSFFFF2014 Apply surface coatings by spray gun.....501**

**Assessment Requirements for MSFFFF2014 Apply surface coatings by spray gun.....504**

**MSFFFF2015 Apply stains, fillers and bleach.....506**

**Assessment Requirements for MSFFFF2015 Apply stains, fillers and bleach .....509**

**MSFFFF2016 Apply surface coatings by hand.....512**

**Assessment Requirements for MSFFFF2016 Apply surface coatings by hand .....515**

MSFFF3010 Match and make up colours .....	517
Assessment Requirements for MSFFF3010 Match and make up colours.....	520
MSFFF3011 Set up, operate and maintain mechanical coating systems.....	523
Assessment Requirements for MSFFF3011 Set up, operate and maintain mechanical coating systems .....	526
MSFFF3012 Apply plural component coatings.....	529
Assessment Requirements for MSFFF3012 Apply plural component coatings .....	532
MSFFF3013 Apply soft rubber techniques .....	534
Assessment Requirements for MSFFF3013 Apply soft rubber techniques.....	537
MSFFF3014 Enhance finishes .....	539
Assessment Requirements for MSFFF3014 Enhance finishes .....	542
MSFFF3015 Repair and touch up surfaces.....	544
Assessment Requirements for MSFFF3015 Repair and touch up surfaces .....	547
MSFFF3016 Apply graining and decorative finishes .....	550
Assessment Requirements for MSFFF3016 Apply graining and decorative finishes .....	553
MSFFF3017 Apply traditional French polishing techniques.....	556
Assessment Requirements for MSFFF3017 Apply traditional French polishing techniques.....	560
MSFFF3018 Set up, operate and maintain computer numerically controlled (CNC) coating systems .....	563
Assessment Requirements for MSFFF3018 Set up, operate and maintain computer numerically controlled (CNC) coating systems .....	566
MSFFM2013 Use furniture making hand and power tools .....	569
Assessment Requirements for MSFFM2013 Use furniture making hand and power tools.....	571
MSFFM2014 Select and apply hardware .....	573
Assessment Requirements for MSFFM2014 Select and apply hardware .....	575
MSFFM2015 Apply sheet laminates by hand.....	577
Assessment Requirements for MSFFM2015 Apply sheet laminates by hand .....	580
MSFFM2016 Join solid timber .....	582
Assessment Requirements for MSFFM2016 Join solid timber.....	585
MSFFM2017 Hand make timber joints .....	587
Assessment Requirements for MSFFM2017 Hand make timber joints.....	590
MSFFM2018 Operate basic static machines safely .....	593
Assessment Requirements for MSFFM2018 Operate basic static machines safely.....	596
MSFFM2019 Assemble furnishing products.....	598
Assessment Requirements for MSFFM2019 Assemble furnishing products .....	600
MSFFM3009 Produce manual and computer-aided production drawings.....	602
Assessment Requirements for MSFFM3009 Produce manual and computer-aided production drawings .....	605
MSFFM3024 Construct jigs and fixtures.....	607
Assessment Requirements for MSFFM3024 Construct jigs and fixtures .....	612
MSFFM3025 Construct furniture using leg and rail method.....	614
Assessment Requirements for MSFFM3025 Construct furniture using leg and rail method.....	617
MSFFM3026 Produce angled and curved components using manufactured board .....	619
Assessment Requirements for MSFFM3026 Produce angled and curved components using manufactured board .....	622
MSFFM3027 Produce angled and curved components using solid timber.....	624
Assessment Requirements for MSFFM3027 Produce angled and curved components using solid timber.....	627
MSFFM3028 Prepare and apply decorative surfaces for furnishing products .....	629
Assessment Requirements for MSFFM3028 Prepare and apply decorative surfaces for furnishing products.....	632
MSFFM3029 Select timbers for furniture production .....	634
Assessment Requirements for MSFFM3029 Select timbers for furniture production .....	636

MSFFM3030 Produce manual and computer-aided production drawings.....	638
Assessment Requirements for MSFFM3030 Produce manual and computer-aided production drawings.....	640
MSFFM3031 Prepare cutting lists from design and production documentation.....	642
Assessment Requirements for MSFFM3031 Prepare cutting lists from design and production documentation.....	644
MSFFM3032 Set up, operate and maintain sawing machines.....	645
Assessment Requirements for MSFFM3032 Set up, operate and maintain sawing machines	648
MSFFM3033 Set up, operate and maintain drilling machines.....	651
Assessment Requirements for MSFFM3033 Set up, operate and maintain drilling machines.....	654
MSFFM3034 Set up, operate and maintain joining machines.....	656
Assessment Requirements for MSFFM3034 Set up, operate and maintain joining machines.....	659
MSFFM3035 Set up, operate and maintain planing and finishing machines.....	661
Assessment Requirements for MSFFM3035 Set up, operate and maintain planing and finishing machines.....	664
MSFFM3036 Set up, operate and maintain multi-head planing and moulding machines	666
Assessment Requirements for MSFFM3036 Set up, operate and maintain multi-head planing and moulding machines.....	669
MSFFM3037 Set up, operate and maintain routing and shaping machines.....	671
Assessment Requirements for MSFFM3037 Set up, operate and maintain routing and shaping machines.....	674
MSFFM3038 Set up, operate and maintain automated edge banding machines.....	676
Assessment Requirements for MSFFM3038 Set up, operate and maintain automated edge banding machines.....	679
MSFFM3039 Fabricate synthetic solid surface products.....	681
Assessment Requirements for MSFFM3039 Fabricate synthetic solid surface products	684
MSFFM3040 Produce and maintain cutting tools.....	686
Assessment Requirements for MSFFM3040 Produce and maintain cutting tools.....	689
MSFFM3041 Determine and document requirements for cabinetry installation.....	691
Assessment Requirements for MSFFM3041 Determine and document requirements for cabinetry installation.....	694
MSFFM3042 Fabricate cabinetry.....	697
Assessment Requirements for MSFFM3042 Fabricate cabinetry.....	700
MSFFM3043 Install cabinetry.....	702
Assessment Requirements for MSFFM3043 Install cabinetry.....	705
MSFFM3044 Set up, operate and maintain computer numerically controlled (CNC) sizing machines.....	707
Assessment Requirements for MSFFM3044 Set up, operate and maintain computer numerically controlled (CNC) sizing machines.....	710
MSFFM3045 Set up, operate and maintain computer numerically controlled (CNC) machining and processing centres.....	712
Assessment Requirements for MSFFM3045 Set up, operate and maintain computer numerically controlled (CNC) machining and processing centres.....	715
MSFFP2011 Use timber furnishing construction techniques.....	717
Assessment Requirements for MSFFP2011 Use timber furnishing construction techniques	720
MSFFP2012 Join furnishing materials.....	722
Assessment Requirements for MSFFP2012 Join furnishing materials.....	724
MSFFP2013 Use basic artwork framing techniques.....	726
Assessment Requirements for MSFFP2013 Use basic artwork framing techniques.....	729
MSFFP2014 Use basic finishing techniques on timber surfaces.....	731

**Assessment Requirements for MSFFP2014 Use basic finishing techniques on timber surfaces.....734**

**MSFFP2015 Use basic upholstery techniques .....737**

**Assessment Re quirements for MSFFP2015 Use basic upholstery techniques.....739**

**MSFFP2016 Construct a basic roll-up blind.....741**

**Assessment Re quirements for MSFFP2016 Construct a basic roll-up blind .....744**

**MSFFP2017 Develop a career plan for the furnishing industry .....746**

**Assessment Re quirements for MSFFP2017 Develop a career plan for the furnishing industry .....748**

**MSFFP2018 Source and review information about furnishing product materials .....750**

**Assessment Re quirements for MSFFP2018 Source and re view information about furnishing product materials .....752**

**MSFFP2019 Source and review information about kitchen, bathroom and laundry design755**

**Assessment Re quirements for MSFFP2019 Source and review information about kitchen, bathroom and laundry design.....757**

**MSFFP2020 Undertake a basic furniture making project .....760**

**Assessment Re quirements for MSFFP2020 Undertake a basic furniture making project763**

**MSFFT4007 Sample, inspect and test products to specifications .....766**

**Assessment Re quirements for MSFFT4007 Sample, inspect and test products to specifications.....770**

**MSFFT4010 Identify and calculate production costs .....772**

**Assessment Re quirements for MSFFT4010 Identify and calculate production costs.....776**

**MSFFT4011 Purchase materials and consumables .....778**

**Assessment Re quirements for MSFFT4011 Purchase materials and consumables.....782**

**MSFFT4012 Prepare a tender submission.....784**

**Assessment Re quirements for MSFFT4012 Prepare a tender submission.....788**

**MSFFT4013 Coordinate onsite installation of cabinetry.....790**

**Assessment Re quirements for MSFFT4013 Coordinate onsite installation of cabinetry .793**

**MSFGG2017 Fabricate and install insect and security screens .....795**

**Assessment Re quirements for MSFGG2017 Fabricate and install insect and security screens .....798**

**MSFGG3032 Mirror glass .....800**

**Assessment Re quirements for MSFGG3032 Mirror glass.....803**

**MSFGG4009 Apply standards and codes of practice for the glass industry .....805**

**Assessment Re quirements for MSFGG4009 Apply standards and codes of practice for the glass industry .....808**

**MSFGG4010 Use glass industry data systems.....811**

**Assessment Re quirements for MSFGG4010 Use glass industry data systems .....813**

**MSFGG4012 Perform laser measurement and levelling for glass windows and doors in buildings .....815**

**Assessment Re quirements for MSFGG4012 Perform laser measurement and levelling for glass windows and doors in buildings.....818**

**MSFGG4014 Operate complex glass processing plant control systems .....820**

**Assessment Re quirements for MSFGG4014 Operate complex glass processing plant control systems .....824**

**MSFGG4015 Manage glass processing plant shutdown and restart.....826**

**Assessment Re quirements for MSFGG4015 Manage glass processing plant shutdown and restart.....828**

**MSFGG4016 Plan and coordinate commercial glazing installations.....830**

**Assessment Re quirements for MSFGG4016 Plan and coordinate commercial glazing installations.....833**

**MSFGN2004 Produce simple scale drawings by hand .....835**

**Assessment Re quirements for MSFGN2004 Produce simple scale drawings by hand ....837**

**MSFGN3003 Advise customers on products and services.....839**  
**Assessment Requirements for MSFGN3003 Advise customers on products and services842**  
**MSFGN3004 Resolve quality and compliance issues.....844**  
**Assessment Requirements for MSFGN3004 Resolve quality and compliance issues .....848**  
**MSFGN3005 Read and interpret work documents .....850**  
**Assessment Requirements for MSFGN3005 Read and interpret work documents.....852**  
**MSFGN3006 Estimate and cost job.....854**  
**Assessment Requirements for MSFGN3006 Estimate and cost job.....857**  
**MSFKB2003 Prepare for cabinetry installation.....859**  
**Assessment Requirements for MSFKB2003 Prepare for cabinetry installation .....862**  
**MSFKB2004 Provide assistance in cabinetry installation .....864**  
**Assessment Requirements for MSFKB2004 Provide assistance in cabinetry installation867**  
**MSFKB3012 Plan kitchen and bathroom projects.....869**  
**Assessment Requirements for MSFKB3012 Plan kitchen and bathroom projects .....871**  
**MSFPF3010 De-frame artwork .....873**  
**Assessment Requirements for MSFPF3010 De-frame artwork .....875**  
**MSFPT4000 Select and use materials for piano repair and manufacture .....877**  
**Assessment Requirements for MSFPT4000 Select and use materials for piano repair and**  
**manufacture .....880**  
**MSFPT4001 Provide advice to customers on piano tuning and repair.....884**  
**Assessment Requirements for MSFPT4001 Provide advice to customers on piano tuning**  
**and repair.....887**  
**MSFPT4002 Research and apply information about piano technology.....889**  
**Assessment Requirements for MSFPT4002 Research and apply information about piano**  
**technology.....891**  
**MSFPT4003 Repair piano actions, keys and pedals .....894**  
**Assessment Requirements for MSFPT4003 Repair piano actions, keys and pedals .....897**  
**MSFPT4004 Regulate actions, keys and pedals of upright pianos.....900**  
**Assessment Requirements for MSFPT4004 Regulate actions, keys and pedals of upright**  
**pianos .....903**  
**MSFPT4005 Regulate actions, keys and pedals of grand pianos .....905**  
**Assessment Requirements for MSFPT4005 Regulate actions, keys and pedals of grand**  
**pianos .....908**  
**MSFPT4006 Apply piano tuning theory and basic acoustics.....910**  
**Assessment Requirements for MSFPT4006 Apply piano tuning theory and basic acoustics912**  
**MSFPT4007 Control tuning hammers .....914**  
**Assessment Requirements for MSFPT4007 Control tuning hammers .....916**  
**MSFPT4008 Pitch raise a piano.....918**  
**Assessment Requirements for MSFPT4008 Pitch raise a piano .....921**  
**MSFPT4009 Tune unisons aurally to a beatless condition.....923**  
**Assessment Requirements for MSFPT4009 Tune unisons aurally to a beatless condition925**  
**MSFPT4010 Tune octaves aurally to appropriate stretch.....927**  
**Assessment Requirements for MSFPT4010 Tune octaves aurally to appropriate stretch930**  
**MSFPT4011 Tune a temperament octave to produce an equally tempered scale .....932**  
**Assessment Requirements for MSFPT4011 Tune a temperament octave to produce an**  
**equally tempered scale .....934**  
**MSFPT4012 Tune a piano aurally and electronically .....936**  
**Assessment Requirements for MSFPT4012 Tune a piano aurally and electronically .....939**  
**MSFPT4013 Voice a piano .....942**  
**Assessment Requirements for MSFPT4013 Voice a piano .....945**  
**MSFSF2015 Cut single layer fabrics .....947**  
**Assessment Requirements for MSFSF2015 Cut single layer fabrics .....950**  
**MSFSF2016 Operate a steam press .....953**

Assessment Requirements for MSFSF2016 Operate a steam press .....956

MSFSF2017 Construct unlined curtains and drapes.....958

Assessment Requirements for MSFSF2017 Construct unlined curtains and drapes .....961

MSFSF2018 Construct lined curtains and drapes.....963

Assessment Requirements for MSFSF2018 Construct lined curtains and drapes .....966

MSFSF2019 Construct padded pelmets.....968

Assessment Requirements for MSFSF2019 Construct padded pelmets.....971

MSFSF2020 Make up tracks for window coverings.....973

Assessment Requirements for MSFSF2020 Make up tracks for window coverings.....976

MSFSF2021 Fit and adjust curtain hardware.....978

Assessment Requirements for MSFSF2021 Fit and adjust curtain hardware .....980

MSFSF2022 Cut single layer fabrics.....982

Assessment Requirements for MSFSF2022 Cut single layer fabrics .....984

MSFSF3014 Construct Roman-style blinds .....986

Assessment Requirements for MSFSF3014 Construct Roman-style blinds.....989

MSFSF3015 Construct Roman-style blinds .....993

Assessment Requirements for MSFSF3015 Construct Roman-style blinds.....996

MSFSF3016 Lay out patterns and cut fabrics.....999

Assessment Requirements for MSFSF3016 Lay out patterns and cut fabrics .....1002

MSFSF3017 Measure up and calculate fabric quantities for window coverings.....1004

Assessment Requirements for MSFSF3017 Measure up and calculate fabric quantities for window coverings.....1007

MSFSF3018 Advise customers on interior decoration products.....1009

Assessment Requirements for MSFSF3018 Advise customers on interior decoration products.....1012

MSFSS2003 Undertake surface preparation.....1014

Assessment Requirements for MSFSS2003 Undertake surface preparation .....1018

MSFSS2004 Rectify faults in product.....1020

Assessment Requirements for MSFSS2004 Rectify faults in product.....1023

MSFSS3004 Install non-security and security screens and grilles.....1025

Assessment Requirements for MSFSS3004 Install non-security and security screens and grilles.....1028

MSFSS3005 Assemble non-security and security screens and grilles .....1032

Assessment Requirements for MSFSS3005 Assemble non-security and security screens and grilles .....1035

MSFUP2007 Use upholstery hand and power tools .....1039

Assessment Requirements for MSFUP2007 Use upholstery hand and power tools .....1041

MSFUP2008 Fit upholstery components.....1043

Assessment Requirements for MSFUP2008 Fit upholstery components .....1046

MSFUP2009 Apply contemporary foundations to upholstered furniture .....1049

Assessment Requirements for MSFUP2009 Apply contemporary foundations to upholstered furniture .....1052

MSFUP2010 Machine sew basic upholstery final cover materials.....1054

Assessment Requirements for MSFUP2010 Machine sew basic upholstery final cover materials.....1057

MSFUP2011 Develop cutting plan and cut single layer upholstery fabric .....1059

Assessment Requirements for MSFUP2011 Develop cutting plan and cut single layer upholstery fabric .....1062

MSFUP2012 Dismantle and reassemble furniture for upholstering.....1064

Assessment Requirements for MSFUP2012 Dismantle and reassemble furniture for upholstering.....1067

MSFUP3015 Apply traditional foundations to upholstered furniture .....1069

**Assessment Requirements for MSFUP3015 Apply traditional foundations to upholstered furniture .....1072**

**MSFUP3016 Fit and apply final cover materials to furniture using basic techniques ...1074**

**Assessment Requirements for MSFUP3016 Fit and apply final cover materials to furniture using basic techniques.....1077**

**MSFUP3017 Fit and apply final cover materials to furniture using decorative techniques 1079**

**Assessment Requirements for MSFUP3017 Fit and apply final cover materials to furniture using decorative techniques .....1082**

**MSFUP3018 Lay out patterns and cut leather.....1084**

**Assessment Requirements for MSFUP3018 Lay out patterns and cut leather .....1087**

**MSFUP3019 Machine sew complex upholstery final cover materials.....1089**

**Assessment Requirements for MSFUP3019 Machine sew complex upholstery final cover materials.....1092**

**MSFUP3020 Fit and apply leather to furniture .....1094**

**Assessment Requirements for MSFUP3020 Fit and apply leather to furniture .....1097**

**MSFUP3021 Manufacture and fit loose covers .....1099**

**Assessment Requirements for MSFUP3021 Manufacture and fit loose covers.....1102**

**MSFUP3022 Apply finishing techniques to upholstered furniture.....1104**

**Assessment Requirements for MSFUP3022 Apply finishing techniques to upholstered furniture .....1107**

**MSFUP3023 Develop cutting plan and cut multiple layer upholstery fabric .....1109**

**Assessment Requirements for MSFUP3023 Develop cutting plan and cut multiple layer upholstery fabric .....1112**

**MSFUP3024 Cut, sew and fit skirts to upholstered furniture .....1114**

**Assessment Requirements for MSFUP3024 Cut, sew and fit skirts to upholstered furniture 1117**

**MSFUP3025 Cut, sew, fit or fill cushions .....1119**

**Assessment Requirements for MSFUP3025 Cut, sew, fit or fill cushions .....1122**

**MSFUP3026 Apply marine sewing and installation techniques .....1124**

**Assessment Requirements for MSFUP3026 Apply marine sewing and installation techniques .....1127**

**MSFUP3027 Cut and sew canvas and acrylics .....1129**

**Assessment Requirements for MSFUP3027 Cut and sew canvas and acrylics .....1132**

**AHCLSC308 Install metal structures and features.....1134**

**Assessment Requirements for AHCLSC308 Install metal structures and features .....1137**

**AURVTT121 Select and apply adhesives in automotive and marine service and repair work .....1139**

**Assessment Requirements for AURVTT121 Select and apply adhesives in automotive and marine service and repair work .....1142**

**BSBADM311 Maintain business resources .....1145**

**Assessment Requirements for BSBADM311 Maintain business resources.....1148**

**BSBCRT311 Apply critical thinking skills in a team environment .....1150**

**Assessment Requirements for BSB CRT311 Apply critical thinking skills in a team environment.....1153**

**BSBCRT412 Articulate, present and debate ideas .....1155**

**Assessment Requirements for BSB CRT412 Articulate, present and debate ideas.....1158**

**BSBCRT413 Collaborate in creative processes.....1160**

**Assessment Requirements for BSB CRT413 Collaborate in creative processes .....1163**

**BSBCRT512 Originate and develop concepts .....1165**

**Assessment Requirements for BSB CRT512 Originate and develop concepts.....1168**

**BSBCUS301 Deliver and monitor a service to customers.....1170**

**Assessment Requirements for BSB CUS301 Deliver and monitor a service to customers 1174**

**BSBCUS402 Address customer needs.....1176**

**Assessment Requirements for BSB CUS402 Address customer needs .....1179**

**BSBOPS304 Deliver and monitor a service to customers .....1292**

Assessment Requirements for BSBOPS304 Deliver and monitor a service to customers	1295
BSBOPS305 Process customer complaints	1297
Assessment Requirements for BSBOPS305 Process customer complaints	1300
BSBOPS402 Coordinate business operational plans	1302
Assessment Requirements for BSBOPS402 Coordinate business operational plans	1305
BSBOPS403 Apply business risk management processes	1307
Assessment Requirements for BSBOPS403 Apply business risk management processes	1310
BSBOPS404 Implement customer service strategies	1312
Assessment Requirements for BSBOPS404 Implement customer service strategies	1315
BSBOPS505 Manage organisational customer service	1317
Assessment Requirements for BSBOPS505 Manage organisational customer service	1320
BSBPEF301 Organise personal work priorities	1322
Assessment Requirements for BSBPEF301 Organise personal work priorities	1325
BSBPEF501 Manage personal and professional development	1327
Assessment Requirements for BSBPEF501 Manage personal and professional development	1330
BSBPMG420 Apply project scope management techniques	1332
Assessment Requirements for BSBPMG420 Apply project scope management techniques	1335
BSBPMG430 Undertake project work	1337
Assessment Requirements for BSBPMG430 Undertake project work	1340
BSBPRO301 Recommend products and services	1342
Assessment Requirements for BSBPRO301 Recommend products and services	1345
BSBPRO401 Develop product knowledge	1347
Assessment Requirements for BSBPRO401 Develop product knowledge	1350
BSBSLS408 Present, secure and support sales solutions	1352
Assessment Requirements for BSBSLS408 Present, secure and support sales solutions	1356
BSBSTR501 Establish innovative work environments	1358
Assessment Requirements for BSBSTR501 Establish innovative work environments	1361
BSBTEC201 Use business software applications	1363
Assessment Requirements for BSBTEC201 Use business software applications	1365
BSBTEC301 Design and produce business documents	1367
Assessment Requirements for BSBTEC301 Design and produce business documents	1370
BSBTWK401 Build and maintain business relationships	1372
Assessment Requirements for BSBTWK401 Build and maintain business relationships	1375
BSBWHS311 Assist with maintaining workplace safety	1377
Assessment Requirements for BSBWHS311 Assist with maintaining workplace safety	1380
BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements	1382
Assessment Requirements for BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements	1386
BSBWHS411 Implement and monitor WHS policies, procedures and programs	1388
Assessment Requirements for BSBWHS411 Implement and monitor WHS policies, procedures and programs	1392
BSBWRT411 Write complex documents	1394
Assessment Requirements for BSBWRT411 Write complex documents	1397
BSBXCM301 Engage in workplace communication	1399
Assessment Requirements for BSBXCM301 Engage in workplace communication	1402
CPCBC4001A Apply building codes and standards to the construction process for low rise building projects	1404
CPCBC4002 Manage work health and safety in the building and construction workplace	1412
Assessment Requirements for CPCBC4002 Manage work health and safety in the building and construction workplace	1415
CPCBC4003 Select, prepare and administer a construction contract	1418

Assessment Requirements for CPCCBC4003 Select, prepare and administer a construction contract.....	1422
CPCCBC4004 Identify and produce estimated costs for building and construction projects	1424
Assessment Requirements for CPCCBC4004 Identify and produce estimated costs for building and construction projects.....	1427
CPCCBC4005 Produce labour and material schedules for ordering.....	1429
Assessment Requirements for CPCCBC4005 Produce labour and material schedules for ordering.....	1432
CPCCBC4008 Supervise site communication and administration processes for building and construction projects.....	1434
Assessment Requirements for CPCCBC4008 Supervise site communication and administration processes for building and construction projects .....	1438
CPCCBC4009 Apply legal requirements to building and construction projects .....	1441
Assessment Requirements for CPCCBC4009 Apply legal requirements to building and construction projects.....	1445
CPCCBC4012 Read and interpret plans and specifications .....	1447
Assessment Requirements for CPCCBC4012 Read and interpret plans and specifications	1450
CPCCBC4013 Prepare and evaluate tender documentation.....	1452
Assessment Requirements for CPCCBC4013 Prepare and evaluate tender documentation	1455
CPCCCA3010 Install windows and doors.....	1457
Assessment Requirements for CPCCCA3010 Install windows and doors .....	1461
CPCCCA3014 Construct and install bulkheads.....	1463
Assessment Requirements for CPCCCA3014 Construct and install bulkheads .....	1466
CPCCCM2002 Carry out hand excavation.....	1468
Assessment Requirements for CPCCCM2002 Carry out hand excavation .....	1471
CPCCCM2006 Apply basic levelling procedures .....	1473
Assessment Requirements for CPCCCM2006 Apply basic levelling procedures.....	1478
CPCCCM2010 Work safely on scaffolding higher than two metres.....	1480
Assessment Requirements for CPCCCM2010 Work safely on scaffolding higher than two metres.....	1485
CPCCCM2012 Work safely at heights.....	1488
Assessment Requirements for CPCCCM2012 Work safely at heights .....	1492
CPCCCM3001 Operate elevated work platforms up to 11 metres .....	1495
Assessment Requirements for CPCCCM3001 Operate elevated work platforms up to 11 metres.....	1501
CPCCCO2013 Carry out concreting to simple forms .....	1505
Assessment Requirements for CPCCCO2013 Carry out concreting to simple forms ....	1508
CPCCJN3003 Manufacture components for doors, windows and frames .....	1511
Assessment Requirements for CPCCJN3003 Manufacture components for doors, windows and frames .....	1514
CPCCPB3004 Fix wet area sheets.....	1517
Assessment Requirements for CPCCPB3004 Fix wet area sheets .....	1520
CPCCSH2003A Apply and install sealant and sealant devices.....	1522
CPCCWC3004 Install suspended ceilings .....	1532
Assessment Requirements for CPCCWC3004 Install suspended ceilings .....	1535
CPCCWHS1001 Prepare to work safely in the construction industry .....	1538
Assessment Requirements for CPCCWHS1001 Prepare to work safely in the construction industry .....	1542
CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry .....	1546
Assessment Requirements for CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.....	1549
CPCCWP3002 Apply waterproofing process to internal wet areas.....	1551

Assessment Requirements for CPCWP3002 Apply waterproofing process to internal wet areas .....	1555
CPCSHP3005 Apply and trim decorative additions to shopfittings and components ....	1558
Assessment Requirements for CPCSHP3005 Apply and trim decorative additions to shopfittings and components.....	1561
CPCWHS1001 Prepare to work safely in the construction industry .....	1564
Assessment Requirements for CPCWHS1001 Prepare to work safely in the construction industry .....	1568
CPPBDN4107 Investigate construction methods for Class 1 and 10 buildings .....	1572
Assessment Requirements for CPPBDN4107 Investigate construction methods for Class 1 and 10 buildings.....	1576
CPPSEC2022 Install electronic locks and locking systems.....	1578
Assessment Requirements for CPPSEC2022 Install electronic locks and locking systems	1581
CUAACD101 Use basic drawing techniques .....	1583
Assessment Requirements for CUAACD101 Use basic drawing techniques.....	1585
CUAACD311 Produce drawings to communicate ideas .....	1587

MSFFL2036 Install soft carpet underlays and gripper accessories .....	1934
Assessment Requirements for MSFFL2036 Install soft carpet underlays and gripper accessories.....	1937

**MSFFL2037 Install unpatterned tufted carpet.....1939**  
**Assessment Requirements for MSFFL2037 Install unpatterned tufted carpet.....1942**  
**MSFFL2038 Install lay flat vinyl floor coverings.....1944**  
**Assessment Requirements for MSFFL2038 Install lay flat vinyl floor coverings.....1947**  
**MSFFL2039 Install laminate flooring.....1949**  
**Assessment Requirements for MSFFL2039 Install laminate flooring .....1952**  
**MSFFL2040 Install engineered timber flooring.....1954**  
**Assessment Requirements for MSFFL2040 Install engineered timber flooring .....1957**  
**MSFFL2041 Install impact and sound absorption underlay .....1959**  
**Assessment Requirements for MSFFL2041 Install impact and sound absorption underlay1962**  
**MSFFL2042 Nail strip timber flooring.....1964**  
**Assessment Requirements for MSFFL2042 Nail strip timber flooring.....1967**  
**MSFFL2043 Install expansion joints .....1969**  
**Assessment Requirements for MSFFL2043 Install expansion joints .....1972**  
**MSFFL2044 Install mouldings and edge trims to timber flooring .....1974**  
**Assessment Requirements for MSFFL2044 Install mouldings and edge trims to timber flooring .....1977**  
**MSFFL2045 Coarse sand timber flooring.....1979**  
**Assessment Requirements for MSFFL2045 Coarse sand timber flooring.....1982**  
**MSFFL3052 Plan and cost flooring technology work .....1984**  
**Assessment Requirements for MSFFL3052 Plan and cost flooring technology work ....1987**  
**MSFFL3053 Establish and maintain a safe flooring technology work environment .....1990**  
**Assessment Requirements for MSFFL3053 Establish and maintain a safe flooring technology work environment.....1993**  
**MSFFL3054 Assess flooring installation sites .....1995**  
**Assessment Requirements for MSFFL3054 Assess flooring installation sites.....1998**  
**MSFFL3055 Respond to complaints about flooring installations .....2001**  
**Assessment Requirements for MSFFL3055 Respond to complaints about flooring installations.....2003**  
**MSFFL3056 Polish concrete floors .....2005**  
**Assessment Requirements for MSFFL3056 Polish concrete floors.....2008**  
**MSFFL3057 Select and fit diamond tools for concrete surface preparation and polishing2010**  
**Assessment Requirements for MSFFL3057 Select and fit diamond tools for concrete surface preparation and polishing.....2013**  
**MSFFL3058 Provide advice to customers on floor coverings.....2016**  
**Assessment Requirements for MSFFL3058 Provide advice to customers on floor coverings2018**  
**MSFFL3059 Install carpet tiles.....2020**  
**Assessment Requirements for MSFFL3059 Install carpet tiles .....2023**  
**MSFFL3060 Install adhesive fixed carpet.....2025**  
**Assessment Requirements for MSFFL3060 Install adhesive fixed carpet .....2028**  
**MSFFL3061 Install commercial carpet.....2030**  
**Assessment Requirements for MSFFL3061 Install commercial carpet.....2033**  
**MSFFL3062 Install patterned and custom designed carpet.....2035**  
**Assessment Requirements for MSFFL3062 Install patterned and custom designed carpet2038**  
**MSFFL3063 Install synthetic textile floor coverings to sports facilities and outdoor spaces2040**  
**Assessment Requirements for MSFFL3063 Install synthetic textile floor coverings to sports facilities and outdoor spaces.....2043**  
**MSFFL3064 Install carpet to custom design stairs .....2045**  
**Assessment Requirements for MSFFL3064 Install carpet to custom design stairs .....2048**  
**MSFFL3065 Install resilient tiles.....2050**  
**Assessment Requirements for MSFFL3065 Install resilient tiles.....2053**  
**MSFFL3066 Install linoleum floor coverings.....2055**  
**Assessment Requirements for MSFFL3066 Install linoleum floor coverings.....2058**

**MSFFL3067 Complete large scale and complex vinyl flooring installations.....2060**  
**Assessment Requirements for MSFFL3067 Complete large scale and complex vinyl flooring installations .....2063**  
**MSFFL3068 Install resilient floor coverings using custom designs and decorative finishes2066**  
**Assessment Requirements for MSFFL3068 Install resilient floor coverings using custom designs and decorative finishes .....2069**  
**MSFFL3069 Install rubber floor coverings.....2071**  
**Assessment Requirements for MSFFL3069 Install rubber floor coverings .....2074**  
**MSFFL3070 Install resilient sheet to walls .....2076**  
**Assessment Requirements for MSFFL3070 Install resilient sheet to walls .....2079**  
**MSFFL3071 Install anti-static and conductive resilient floor coverings.....2082**  
**Assessment Requirements for MSFFL3071 Install anti-static and conductive resilient floor coverings.....2085**  
**MSFFL3072 Mix and apply thin-film rollcoat resin flooring systems .....2087**  
**Assessment Requirements for MSFFL3072 Mix and apply thin-film rollcoat resin flooring systems.....2090**  
**MSFFL3073 Mix and apply thin-film broadcast resin flooring systems.....2092**  
**Assessment Requirements for MSFFL3073 Mix and apply thin-film broadcast resin flooring systems .....2095**  
**MSFFL3074 Mix and apply self-levelling resin flooring systems .....2097**  
**Assessment Requirements for MSFFL3074 Mix and apply self-levelling resin flooring systems.....2100**  
**MSFFL3075 Mix and apply trowel-applied resin flooring systems .....2102**  
**Assessment Requirements for MSFFL3075 Mix and apply trowel-applied resin flooring systems.....2105**  
**MSFFL3076 Mix and apply high-build decorative resin flooring systems .....2107**  
**Assessment Requirements for MSFFL3076 Mix and apply high-build decorative resin flooring systems .....2110**  
**MSFFL3077 Prepare subfloors for resin flooring systems .....2112**  
**Assessment Requirements for MSFFL3077 Prepare subfloors for resin flooring systems2115**  
**MSFFL3078 Install direct stick timber flooring.....2117**  
**Assessment Requirements for MSFFL3078 Install direct stick timber flooring .....2120**  
**MSFFL3079 Adapt and apply custom designs to timber flooring .....2122**  
**Assessment Requirements for MSFFL3079 Adapt and apply custom designs to timber flooring .....2124**  
**MSFFL3080 Install timber flooring materials to stairs .....2126**  
**Assessment Requirements for MSFFL3080 Install timber flooring materials to stairs .2129**  
**MSFFL3081 Install block parquetry flooring .....2131**  
**Assessment Requirements for MSFFL3081 Install block parquetry flooring.....2134**  
**MSFFL3082 Install cork tiles .....2136**  
**Assessment Requirements for MSFFL3082 Install cork tiles .....2139**  
**MSFFL3083 Install patterned and mosaic parquetry flooring.....2141**  
**Assessment Requirements for MSFFL3083 Install patterned and mosaic parquetry flooring .....2144**  
**MSFFL3085 Install battens or plywood in preparation for strip timber.....2146**  
**Assessment Requirements for MSFFL3085 Install battens or plywood in preparation for strip timber.....2149**  
**MSFFL3087 Plan and implement maintenance systems for timber, laminate and engineered flooring .....2151**  
**Assessment Requirements for MSFFL3087 Plan and implement maintenance systems for timber, laminate and engineered flooring .....2154**  
**MSFFL3089 Apply solvent-based coatings to timber flooring .....2156**

**Assessment Requirements for MSFFL3089 Apply solvent-based coatings to timber flooring .....2159**

**MSFFL3090 Apply water-based coatings to timber flooring .....2161**

**Assessment Requirements for MSFFL3090 Apply water-based coatings to timber flooring 2164**

**MSFFL3091 Apply oil-based coatings to timber flooring.....2166**

**Assessment Requirements for MSFFL3091 Apply oil-based coatings to timber flooring 2169**

**MSFFL3092 Apply composite-based coatings to timber flooring.....2171**

**Assessment Requirements for MSFFL3092 Apply composite-based coatings to timber flooring .....2174**

**MSFFL3094 Apply stains and fillers to timber flooring.....2176**

**Assessment Requirements for MSFFL3094 Apply stains and fillers to timber flooring 2179**

**MSFFL3095 Fine sand timber flooring.....2181**

**Assessment Requirements for MSFFL3095 Fine sand timber flooring .....2184**

**MSFFL3096 Edge sand timber flooring.....2186**

**Assessment Requirements for MSFFL3096 Edge sand timber flooring .....2189**

**MSFFL3098 Sand and fill parquetry flooring.....2191**

**Assessment Requirements for MSFFL3098 Sand and fill parquetry flooring .....2194**

**MSFFL3099 Apply finishes to cork flooring.....2196**

**Assessment Requirements for MSFFL3099 Apply finishes to cork flooring.....2199**

**MSFFL3100 Apply densifiers and sealers to concrete surfaces .....2201**

**Assessment Requirements for MSFFL3100 Apply densifiers and sealers to concrete surfaces.....2204**

**MSFFL3101 Install bamboo flooring.....2206**

**Assessment Requirements for MSFFL3101 Install bamboo flooring .....2209**

**MSFFM2010 Set up and operate basic static machines .....2211**

**Assessment Requirements for MSFFM2010 Set up and operate basic static machines .2216**

**MSFFM3010 Prepare cutting list from plans and job specifications .....2218**

**Assessment Requirements for MSFFM3010 Prepare cutting list from plans and job specifications.....2221**

**MSFFM3011 Measure and draw site layout for manufactured furniture products .....2223**

**Assessment Requirements for MSFFM3011 Measure and draw site layout for manufactured furniture products .....2227**

**MSFFM3021 Set up, operate and maintain computer numerically controlled (CNC) sizing machines.....2229**

**Assessment Requirements for MSFFM3021 Set up, operate and maintain computer numerically controlled (CNC) sizing machines .....2233**

**MSFFM3022 Set up, operate and maintain computer numerically controlled (CNC) machining and processing centres.....2235**

**Assessment Requirements for MSFFM3022 Set up, operate and maintain computer numerically controlled (CNC) machining and processing centres .....2239**

**MSFGG2011 Glaze and reglaze residential windows and doors .....2241**

**Assessment Requirements for MSFGG2011 Glaze and reglaze residential windows and doors.....2244**

**MSFGG2012 Operate glass freefall rack and table.....2247**

**Assessment Requirements for MSFGG2012 Operate glass freefall rack and table .....2249**

**MSFGG2013 Move single glass sheets by mechanical means .....2251**

**Assessment Requirements for MSFGG2013 Move single glass sheets by mechanical means 2254**

**MSFGG2014 Cut thin glass by hand .....2256**

**Assessment Requirements for MSFGG2014 Cut thin glass by hand .....2259**

**MSFGG2015 Process glass by basic machines .....2261**

**Assessment Requirements for MSFGG2015 Process glass by basic machines.....2264**

**MSFGG2016 Assemble glazing products .....2266**

**Assessment Requirements for MSFGG2016 Assemble glazing products.....2268**

**MSFGG3022 Construct and repair leadlight panels .....2271**  
**Assessment Requirements for MSFGG3022 Construct and repair leadlight panels .....2274**  
**MSFGG3023 Apply and handle films .....2276**  
**Assessment Requirements for MSFGG3023 Apply and handle films.....2279**  
**MSFGG3024 Form glass .....2281**  
**Assessment Requirements for MSFGG3024 Form glass .....2283**  
**MSFGG3025 Apply patterns and designs to glass.....2285**  
**Assessment Requirements for MSFGG3025 Apply patterns and designs to glass .....2287**  
**MSFGG3026 Laminate glass .....2289**  
**Assessment Requirements for MSFGG3026 Laminate glass.....2292**  
**MSFGG3027 Toughen glass .....2294**  
**Assessment Requirements for MSFGG3027 Toughen glass .....2297**  
**MSFGG3028 Select, cut and process materials for glazing products .....2299**  
**Assessment Requirements for MSFGG3028 Select, cut and process materials for glazing products .....2302**  
**MSFGG3029 Assess glass and glazing requirements .....2305**  
**Assessment Requirements for MSFGG3029 Assess glass and glazing requirements .....2307**  
**MSFGG3030 Process glass by automatic machines .....2309**  
**Assessment Requirements for MSFGG3030 Process glass by automatic machines .....2311**  
**MSFGG3031 Cut thick glass .....2313**  
**Assessment Requirements for MSFGG3031 Cut thick glass .....2316**  
**MSFGG3033 Install shower screens .....2318**  
**Assessment Requirements for MSFGG3033 Install shower screens .....2321**  
**MSFGG3034 Install residential windows and doors .....2323**  
**Assessment Requirements for MSFGG3034 Install residential windows and doors .....2326**  
**MSFGG3035 Install mirrors and glass splashbacks.....2328**  
**Assessment Requirements for MSFGG3035 Install mirrors and glass splashbacks .....2331**  
**MSFGG3036 Install commercial glazing products.....2333**  
**Assessment Requirements for MSFGG3036 Install commercial glazing products .....2336**  
**MSFGG3037 Install structural glazing products .....2338**  
**Assessment Requirements for MSFGG3037 Install structural glazing products.....2341**  
**MSFGG3038 Conduct commercial and structural reglazing .....2344**  
**Assessment Requirements for MSFGG3038 Conduct commercial and structural reglazing 2347**  
**MSFGG3039 Manually move glass.....2349**  
**Assessment Requirements for MSFGG3039 Manually move glass .....2352**  
**MSFGG3040 Move block and bulk glass sheet by mechanical means .....2354**  
**Assessment Requirements for MSFGG3040 Move block and bulk glass sheet by mechanical means .....2357**  
**MSFGG3041 Manufacture insulated glass units .....2359**  
**Assessment Requirements for MSFGG3041 Manufacture insulated glass units .....2362**  
**MSFGG3042 Process glass by semi-automatic machines.....2364**  
**Assessment Requirements for MSFGG3042 Process glass by semi-automatic machines 2367**  
**MSFGG4011 Manage glass industry production scheduling.....2369**  
**Assessment Requirements for MSFGG4011 Manage glass industry production scheduling 2372**  
**MSFGN2001 Make measurements and calculations .....2374**  
**Assessment Requirements for MSFGN2001 Make measurements and calculations .....2377**  
**MSFGN2002 Move and store materials and products .....2379**  
**Assessment Requirements for MSFGN2002 Move and store materials and products ...2383**  
**MSFGN3001 Read and interpret work documents .....2386**  
**Assessment Requirements for MSFGN3001 Read and interpret work documents.....2389**  
**MSFGN3002 Estimate and cost job.....2391**  
**Assessment Requirements for MSFGN3002 Estimate and cost job.....2394**  
**MSFGN4001 Research and meet ethical and compliance requirements .....2397**

**Assessment Requirements for MSFGN4001 Research and meet ethical and compliance requirements.....2400**

**MSFID4012 Decorate residential interiors .....2402**

**Assessment Requirements for MSFID4012 Decorate residential interiors .....2405**

**MSFID4013 Design residential interior lighting .....2407**

**Assessment Requirements for MSFID4013 Design residential interior lighting .....2410**

**MSFID4014 Produce digital models and documentation for interior design projects ...2413**

**Assessment Requirements for MSFID4014 Produce digital models and documentation for interior design projects .....2416**

**MSFID4015 Prepare materials and finishes boards for client presentation .....2418**

**Assessment Requirements for MSFID4015 Prepare materials and finishes boards for client presentation.....2420**

**MSFID4016 Design colour schemes for interior and exterior spaces .....2422**

**Assessment Requirements for MSFID4016 Design colour schemes for interior and exterior spaces.....2425**

**MSFID4017 Research and recommend furniture and accessories .....2427**

**Assessment Requirements for MSFID4017 Research and recommend furniture and accessories.....2430**

**MSFID4018 Research and recommend hard materials and finishes for interiors .....2433**

**Assessment Requirements for MSFID4018 Research and recommend hard materials and finishes for interiors .....2436**

**MSFID4019 Research interior decoration and design influences.....2439**

**Assessment Requirements for MSFID4019 Research interior decoration and design influences .....2441**

**MSFID4020 Research and integrate embedded technologies in interior designs.....2443**

**Assessment Requirements for MSFID4020 Research and integrate embedded technologies in interior designs .....2446**

**MSFID4021 Design soft furnishing solutions for interior spaces.....2448**

**Assessment Requirements for MSFID4021 Design soft furnishing solutions for interior spaces.....2451**

**MSFID4022 Prepare quotation and contract documentation for design projects .....2454**

**Assessment Requirements for MSFID4022 Prepare quotation and contract documentation for design projects .....2456**

**MSFID5016 Develop decoration proposals for complex sites.....2458**

**Assessment Requirements for MSFID5016 Develop decoration proposals for complex sites 2461**

**MSFID5017 Develop event decoration proposals.....2464**

**Assessment Requirements for MSFID5017 Develop event decoration proposals .....2467**

**MSFID5018 Provide interior styling service .....2469**

**Assessment Requirements for MSFID5018 Provide interior styling service .....2472**

**MSFID5019 Decorate interiors for restoration projects.....2474**

**Assessment Requirements for MSFID5019 Decorate interiors for restoration projects 2477**

**MSFID5020 Design residential interiors .....2479**

**Assessment Requirements for MSFID5020 Design residential interiors.....2482**

**MSFID5021 Evaluate site structure and services for interior design briefs.....2485**

**Assessment Requirements for MSFID5021 Evaluate site structure and services for interior design briefs .....2488**

**MSFID5022 Explore and apply creative design methodology to interior space.....2490**

**Assessment Requirements for MSFID5022 Explore and apply creative design methodology to interior space .....2492**

**MSFID5023 Design for all ages and abilities.....2494**

**Assessment Requirements for MSFID5023 Design for all ages and abilities .....2497**

**MSFID5024 Design workplace interiors .....2499**

**Assessment Requirements for MSFID5024 Design workplace interiors.....2502**

## MSF10122 Certificate I in Furnishing

### Modification History

Release 1. Overall number of units and number of core units remains unchanged. Changes to elective units. Supersedes and is equivalent to MSF10113 Certificate I in Furnishing.

### Qualification Description

Learners with this qualification have knowledge and skills that prepare them for further learning, community involvement, and entry-level work in the furnishing industry. They have basic technical and communication skills, undertake routine activities, and identify and report simple issues and problems.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

### Packaging Rules

Total number of units = 8

- 5 core units
- 3 elective units, consisting of:
  - at least 1 MSF-coded unit from the list below
  - up to 2 additional units from the list below or any endorsed training package or accredited course. These units must be relevant to the work role as outlined in the qualification description above and must not duplicate the outcome of other units used to achieve this qualification.

#### CORE UNITS

Unit Code	Unit Title
MSMENV272	Participate in environmentally sustainable work practices
MSMOPS101	Make measurements
MSMSUP102	Communicate in the workplace
MSMSUP106	Work in a team
MSMWHS100	Follow WHS procedures

**ELECTIVE UNITS**

<b>Unit Code</b>	<b>Unit Title</b>
CUADES201	Follow a design process
CUADES301	Explore the use of colour
MSFFP2011	Use timber furnishing construction techniques
MSFFP2013	Use basic artwork framing techniques
MSFFP2014	Use basic finishing techniques on timber furniture
MSFFP2015	Use basic upholstery techniques
MSFFP2016	Construct a basic roll-up blind
MSFSS3005	Assemble non-security and security screens and grilles

**Qualification Mapping Information**

Release 1. Supersedes and is equivalent to MSF10113 Certificate I in Furnishing.

## MSF20122 Certificate II in Furnishing

### Modification History

Release 1. Revised to include content from furniture finishing qualifications (MSF20213). Some electives deleted due to zero or low use. Wide choice of workplace safety units for different industry needs. Supersedes and not equivalent to MSF20113 Certificate II in Furnishing and MSF20213 Certificate II in Furniture Finishing.

### Qualification Description

Workers with this qualification perform basic and defined entry-level work involving known routines and procedures under supervision in the furnishing industry. This qualification is typically used to develop basic employment related skills and knowledge.

It includes specialised collections of skills for those working at an entry or assistant level in a variety of industries: upholstery, interior and exterior window coverings, flooring, picture framing, furniture finishing.

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of publication.

### Entry Requirements

Nil

### Packaging Rules

Total number of units = 12

- 2 core units
- 10 elective units, consisting of:
  - 1 or 2 units from Group A
  - 1 unit from Group B (only 1 unit from this group)
  - 5 to 8 units from Group C
  - Up to 3 units not listed below from any endorsed training package or accredited course. These units must be relevant to the work role as outlined in the qualification description above and must not duplicate the outcome of other units used to achieve this qualification.

#### CORE UNITS

Unit code	Unit title
MSFGN2001	Make measurements and calculations

MSMSUP102	Communicate in the workplace
-----------	------------------------------

## ELECTIVE UNITS

### Group A

Unit code	Unit title
MSMPCI101	Adapt to work in industry
MSMSUP106	Work in a team

### Group B

Unit code	Unit title
CPCWHS1001	Prepare to work safely in the construction industry
CPCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
MSMPCI103	Demonstrate care and apply safe practices at work
MSMWHS100	Follow WHS procedures
MSMWHS200	Work safely

### Group C

Unit code	Unit title
<b>Blinds, Awnings, Security Screens and Grilles</b>	
MSFBA2011	Select and apply hardware and fixings for blinds, awnings, screens and grilles
MSFBA2012	Use blinds, awnings, security screens and grilles hand and power tools
MSFBA2013	Set up, operate and maintain blinds and awnings static machines
MSFBA2014	Construct metal louvre and canopy-hooded style awnings
MSFBA3012	Assemble interior blinds
MSFSS2003	Undertake surface preparation

MSFSS2004	Rectify faults in product
MSFSS3005	Assemble non-security and security screens and grilles
<b>Flooring Technology</b>	
MSFFL2030	Receive and prepare flooring materials
MSFFL2031	Remove existing floor coverings
MSFFL2032	Select, prepare and apply moisture barriers to concrete sub-floors
MSFFL2033	Install hard underlays
MSFFL2034	Prepare subfloors with cementitious coating applications
MSFFL2035	Mechanically prepare surfaces for installation of flooring materials
MSFFL2036	Install carpet cushion underlays and gripper accessories
MSFFL2037	Install unpatterned tufted carpet
MSFFL2038	Install lay flat vinyl floor coverings
MSFFL2039	Install laminate flooring
MSFFL2041	Install impact and sound absorption underlay
MSFFL2042	Nail strip timber flooring
MSFFL2043	Install expansion joints
MSFFL2044	Install mouldings and edge trims to timber flooring
MSFFL2045	Coarse sand timber flooring
<b>Furniture Finishing</b>	
MSFFF2010	Dismantle and reassemble furniture for finishing
MSFFF2012	Prepare surfaces for finishing
MSFFF2013	Maintain spray equipment and booth
MSFFF2014	Apply surface coatings by spray gun
MSFFF2015	Apply stains, fillers and bleach
MSFFF2016	Apply surface coatings by hand

<b>Picture Framing</b>	
MSFPPF2009	Cut mouldings to length
MSFPPF2010	Join mouldings
MSFPPF2011	Mount artwork
MSFPPF2012	Cut mat boards
MSFPPF2013	Cut and handle glazing
MSFPPF2014	Assemble basic artwork packages
<b>Soft Furnishing</b>	
MSFSF2016	Operate a steam press
MSFSF2017	Construct unlined curtains and drapes
MSFSF2018	Construct lined curtains and drapes
MSFSF2019	Construct padded pelmets
MSFSF2020	Make up tracks for window coverings
MSFSF2021	Fit and adjust curtain hardware
MSFSF2022	Cut single layer fabrics
<b>Upholstery</b>	
MSFUP2007	Use upholstery hand and power tools
MSFUP2008	Fit upholstery components
MSFUP2009	Apply contemporary foundations to upholstered furniture
MSFUP2010	Machine sew basic upholstery final cover materials
MSFUP2011	Develop cutting plan and cut single layer upholstery fabric
MSFUP2012	Dismantle and re-assemble furniture for upholstering
MSFUP3016	Fit and apply final cover materials to furniture using basic techniques
<b>General</b>	
CPCCCM200	Carry out excavation (prerequisite: CPCCWHS2001)

2	
CPCCCO2013	Carry out concreting to simple forms (prerequisite: CPCCWHS2001)
CUADES201	Follow a design process
CUADES202	Evaluate the nature of design in a specific industry context
CUADES301	Explore the use of colour
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information (prerequisite: MEM13015)
MEM16008	Interact with computing technology (prerequisites: MEM13015 & MEM16006)
MSFFM2018	Operate basic static machines safely
MSFGN2004	Produce simple scale drawings by hand
MSFSF3015	Construct Roman-style blinds
MSFSF3016	Lay out patterns and cut fabrics
MSMENV272	Participate in environmentally sustainable work practices
MSTGN2005	Perform minor maintenance
MSTTF2009	Identify and select canvas and sail materials
MSTTF2015	Install products on and off site
MSTTX2014	Perform industrial sewing on textile products
TLIA0020	Package goods
TLIA0023	Receive goods
TLID0021	Store and handle dangerous goods and hazardous substances

## Qualification Mapping Information

Supersedes and not equivalent to MSF20113 Certificate II in Furnishing and MSF20213 Certificate II in Furniture Finishing.

# MSF20322 Certificate II in Cabinet Making and Timber Technology

## Modification History

Release 1. Revised with name change and amendments to packaging rules. Supersedes and is not equivalent to MSF20313 Certificate II in Furniture Making.

## Qualification Description

Workers with this qualification work at a production operation or assistant level in the construction, manufacture and installation of timber and composite products, including furniture and cabinetry. Job roles may be factory or site based. Individuals may be multi-skilled or work in a single area such as furniture making or kitchen and bathroom construction and installation. Work involves known routines and procedures and some accountability for the quality of own work outcomes while working as a member of a team and under general supervision.

This qualification is suitable for individuals who are formally engaged in a traineeship in accordance with the Australian Apprenticeships policy. It is not appropriate for vocational education and training delivered to secondary students. This qualification does not cover shopfitting.

There are no specific licences that relate to this qualification, but induction training is required for work on construction sites.

## Entry Requirements

None

## Packaging Rules

Total number of units = 12

- 7 core units
- 5 elective units, consisting of:
  - at least 3 units coded MSFFM or MSFKB from the list of electives
  - up to 2 additional units from the elective list or from any endorsed Training Package or accredited course. These units must be relevant to the work outcome as outlined in the qualification description above and must not duplicate the outcome of other units used to achieve this qualification.

### CORE UNITS

Unit code	Unit title
-----------	------------

MSMENV272	Participate in environmentally sustainable work practices
MSMSUP102	Communicate in the workplace

## MSF20413 Certificate II in Glass and Glazing

### Modification History

Release 8. Two elective units deleted. Supersedes and is equivalent to MSF20413 Certificate II in Glass and Glazing (Release 7)

Release 7. Metadata and first aid elective unit updated. Supersedes and is equivalent to MSF20413 Certificate II in Glass and Glazing (Release 6).

Release 6. Minor upgrades. Supersedes and is equivalent to MSF20413 Certificate II in Glass and Glazing (Release 5).

Release 5. Imported units updated. Supersedes and is equivalent to MSF20413 Certificate II in Glass and Glazing (Release 4).

Release 4. Imported units updated. Supersedes and is equivalent to MSF20413 Certificate II in Glass and Glazing (Release 3).

Release 3. Imported units updated. Supersedes and is equivalent to MSF20413 Certificate II in Glass and Glazing (Release 2).

Release 2. Unit title corrected for MSF20413. Supersedes and is equivalent to MSF20413 Certificate II in Glass and Glazing (Release 1).

Release 1. New qualification. Supersedes and is equivalent to LMF20411 Certificate II in Glass and Glazing.

### Qualification Description

This qualification describes the skills and knowledge required to perform basic glass and glazing job roles, such as safely processing and moving thin glass. It may include assembly/repair of leadlight and stained glass involving known routines and procedures and some accountability for the quality of outcomes.

This qualification is typically used to develop skills and knowledge in basic glass and glazing techniques that include employment-related skills, including preparatory access and participation skills, broad-based induction skills and/or specific workplace skills. It involves collaboration with others through members of a group or team.

Meaningful involvement of industry is essential to achieving this qualification outcome and workplace visits and placement to ensure exposure of learners to realistic workplace conditions and employer expectations is required.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

To be awarded the MSF20413 Certificate II in Glass and Glazing, competency must be achieved in **thirteen (13)** units of competency.

- **five (5)** core units of competency
- **eight (8)** elective units of competency.

Note: Units marked with an asterisk have one or more prerequisites and must be considered in the total number of units. Please refer to individual units for details.

### CORE UNITS

Complete all **five (5)** units from this list.

Unit code	Unit title
MSMENV272	Participate in environmentally sustainable work practices
MSMWHS100	Follow WHS procedures
MSMSUP102	Communicate in the workplace
MSMSUP106	Work in a team
MSFGN2001	Make measurements and calculations

### ELECTIVE UNITS

Complete **eight (8)** elective units of competency from Groups A, B and C as specified below.

#### Group A

Select a minimum of **five (5)** units from this Group.

Unit code	Unit title
HLTAID011	Provide first aid
MSFDG2001	Assemble leadlight and stained glass components

MSFGG2011	Glaze and reglaze residential windows and doors
MSFGG2012	Operate glass freefall rack and table
MSFGG2013	Move single glass sheets by mechanical means
MSFGG2014	Cut thin glass by hand
MSFGG2015	Process glass by basic machines
MSFGG3039	Manually move glass

### Group B

Select a maximum of **three (3)** units from this Group.

Unit code	Unit title
CUAACD101	Use basic drawing techniques
CUADRA201	Develop drawing skills
MSFDG2001	Assemble leadlight and stained glass components
MSFGG2016	Assemble glazing products
MSFGG3022	Construct and repair leadlight panels
MSFGG3028	Select, cut and process materials for glazing products
MSFSS3005	Assemble non-security and security screens and grilles

### Group C

Up to **three (3)** relevant units may be chosen from this Training Package, other endorsed Training Packages and accredited courses, where those units are aligned at Certificate II level (maximum 3 units) or Certificate III level (maximum 2 units).

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available within this qualification.

## Qualification Mapping Information

Release 8. Two elective units deleted. Supersedes and is equivalent to MSF20413 Certificate II in Glass and Glazing (Release 7)

Release 7. Metadata and first aid elective unit updated. Supersedes and is equivalent to MSF20413 Certificate II in Glass and Glazing (Release 6).

Release 6. Minor upgrades. Supersedes and is equivalent to MSF20413 Certificate II in Glass and Glazing (Release 5).

Release 5. Imported units updated. Supersedes and is equivalent to MSF20413 Certificate II in Glass and Glazing (Release 4).

Release 4. Imported units updated. Supersedes and is equivalent to MSF20413 Certificate II in Glass and Glazing (Release 3).

Release 3. Imported units updated. Supersedes and is equivalent to MSF20413 Certificate II in Glass and Glazing (Release 2).

Release 2. Unit title corrected for MSF20413. Supersedes and is equivalent to MSF20413 Certificate II in Glass and Glazing (Release 1).

Release 1. New qualification. Supersedes and is equivalent to LMF20411 Certificate II in Glass and Glazing.

# MSF20522 Certificate II in Furniture Making Pathways

## Modification History

Release 1: Supersedes and equivalent to MSF20516 Certificate II in Furniture Making Pathways. Some elective units merged or deleted.

## Qualification Description

This qualification is intended for a learning and assessment environment, such as a school-based pre-employment training program, where access to structured on-the-job learning in a workplace may not be available.

It delivers broad skills and knowledge in furniture making tasks which will enhance the graduates' entry-level employment prospects for apprenticeships, traineeships or general employment in a furniture manufacturing environment or related workplace.

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of publication.

## Entry Requirements

Nil

## Packaging Rules

Total number of units = 12

- 5 core units
- 7 elective units, consisting of:
  - 6 units from Group A
  - 1 unit from Group B

### CORE UNITS

Unit code	Unit title
MSFFP2020	Undertake a basic furniture making project
MSFFP2017	Develop a career plan for the furnishing industry
MSFGN2001	Make measurements and calculations
MSMENV272	Participate in environmentally sustainable work practices
MSMPCI103	Demonstrate care and apply safe practices at work

## MSF30122 Certificate III in Furniture Finishing

### Modification History

Release 1. MSMENV272 Participate in environmentally sustainable work practices removed from the core. Overall number of units reduced by one to reflect this change. Specialisation in polyurethane coating added. Supersedes and is not equivalent to MSF30113 Certificate III in Furniture Finishing.

### Qualification Description

Furniture finishing workers with this qualification prepare surfaces and apply stains, coatings and finishes to furniture in manufacture or repair and perform other tasks associated with this work. They use discretion and judgement, take responsibility for their own outputs and may have limited responsibility for others in a team environment. People in this role can adapt and transfer skills and knowledge within known routines, methods, procedures and time constraints.

No licensing, legislative or certification requirements apply to this qualification at the time of publication. However, depending on the jurisdiction, licensing or regulatory requirements may apply to some units in this qualification. Local regulations should be checked.

### Entry Requirements

Nil

### Packaging Rules

Total number of units = 22

- 8 core units
- 14 elective units, consisting of:
  - 10 to 14 units from the electives listed below
  - up to 4 units from any endorsed Training Package or accredited course. These units must be relevant to the work role outlined in the qualification description above, must not duplicate the outcome of other units used to achieve this qualification and must not include more than 1 unit aligned at a level lower than Australian Qualifications Framework Level 3.

The Certificate III in Furniture Finishing allows for a general qualification or may be packaged to provide a single or double specialisation.

For the Certificate III in Furniture Finishing (French Polishing), all 7 units in Group A must be selected.

For the Certificate III in Furniture Finishing (Polyurethane Coating), all 6 units in Group B must be selected.

For the Certificate III in Furniture Finishing (French Polishing) (Polyurethane Coating), all 10 units in Group A and B must be selected.

Note: Some units are listed in both Group A and Group B.

### CORE UNITS

Unit code	Unit title
MSFFF2009	Use furniture finishing hand and power tools
MSFFF2010	Dismantle and reassemble furniture for finishing
MSFGN2001	Make measurements and calculations
MSFGN3005	Read and interpret work documents
MSFGN3006	Estimate and cost job
MSMSUP102	Communicate in the workplace
MSMSUP106	Work in a team
MSMWHS200	Work safely

### Group A: French polishing

Unit code	Unit title
MSFFF2011	Remove surface coatings
MSFFF2012	Prepare surfaces for finishing
MSFFF2015	Apply stains, fillers and bleach
MSFFF2016	Apply surface coatings by hand
MSFFF3010	Match and make up colours
MSFFF3016	Apply graining and decorative finishes
MSFFF3017	Apply traditional French polishing techniques

### Group B: Polyurethane coating

Unit code	Unit title
MSFFF2011	Remove surface coatings

MSFFF2012	Prepare surfaces for finishing
MSFFF2013	Maintain spray equipment and booth
MSFFF2014	Apply surface coatings by spray gun
MSFFF3010	Match and make up colours
MSFFF3012	Apply plural component coatings

### Group C: General

Unit code	Unit title
BSBESB401	Research and develop business plans
BSBESB403	Plan finances for new business ventures
BSBESB405	Manage compliance for small businesses
BSBESB407	Manage finances for new business ventures
BSBOPS304	Deliver and monitor a service to customers
MSFFF3011	Set up, operate and maintain mechanical coating systems
MSFFF3013	Apply soft rubber techniques
MSFFF3014	Enhance finishes
MSFFF3015	Repair and touch up surfaces
MSFFF3018	Set up, operate and maintain computer numerically controlled (CNC) coating systems
MSMENV272	Participate in environmentally sustainable work practices
TLID0021	Store and handle dangerous goods and hazardous substances

## Qualification Mapping Information

Supersedes and is not equivalent to MSF30113 Certificate III in Furniture Finishing.

## Links

Companion Volume implementation guides are found in VETNet -

# MSF30322 Certificate III in Cabinet Making and Timber Technology

## Modification History

Release 1. Merges MSF31113 Certificate III in Cabinet Making, MSF30313 Certificate III in Timber and Composites Machining, and MSF30213 Certificate III in Furniture Making.

## Qualification Description

Workers with this qualification have tradesperson-level skills in the manufacture and/or installation of products, including furniture and cabinetry, made from timber and other materials.

They have core skills in tool use, measuring, drawing (including computer-aided design), interpreting work documentation, preparing cutting lists, communication, teamwork, and safe and environmentally sustainable work practices. They may have specialised skills in wood machining, cabinet and furniture making, kitchen and bathroom construction and installation, marine cabinetry, coopering or drafting.

Work is in a defined range of skilled operations, usually within a range of broader activities involving established routines, methods and procedures, where some discretion and judgement is required in the selection of equipment, services or contingency measures. Individuals collaborate with others to achieve quality outcomes and take responsibility for their own work. They may have some limited responsibility for the work of others.

Kitchen and bathroom installers must be licensed in some states, and induction training is required for those working on construction sites.

## Entry Requirements

Nil

## Packaging Rules

Total number of units = 25

- 8 core units
- 17 elective units, consisting of:
  - 8 to 13 units from Groups A to F
  - 3 to 8 units from Group G
  - 1 or 2 units from Group H
  - up to 5 units not listed below from any endorsed Training Package or accredited course. These units:

- must be relevant to the work outcome as outlined in the qualification description above
- must not duplicate the outcome of other units used to achieve this qualification
- must not include any unit coded MSFFP
- must not include more than 1 unit aligned at a level lower than Australian Qualifications Framework Level 3.

All electives chosen must contribute to a valid, industry-supported vocational outcome.

Electives from Groups A to F can be packaged to provide a qualification with a specialisation.

Certificate III in Cabinet Making and Timber Technology (Furniture): 5 units from Group A

Certificate III in Cabinet Making and Timber Technology (Kitchens and Bathrooms): 5 units from Group B

Certificate III in Cabinet Making and Timber Technology (Marine Cabinetry): 5 units from Group C

Certificate III in Cabinet Making and Timber Technology (Wood Machining): 7 units from Group D

Certificate III in Cabinet Making and Timber Technology (Coopering): 4 units from Group E

Certificate III in Cabinet Making and Timber Technology (Drafting): 4 units from Group F

Where units are included to meet more than one specialisation, a multiple specialisation can be achieved, with each specialisation bracketed separately, e.g., Certificate III in Cabinet Making and Timber Technology (Marine Cabinetry) (Drafting). Multiple specialisations must meet industry-recognised occupational needs.

## CORE UNITS

Unit code	Unit title
MSFFM2013	Use furniture making hand and power tools
MSFFM3030	Produce manual and computer-aided production drawings
MSFFM3031	Prepare cutting lists from design and production documentation
MSFGN2001	Make measurements and calculations
MSFGN3005	Read and interpret work documents
MSMENV272	Participate in environmentally sustainable work practices
MSMSUP102	Communicate in the workplace
MSMSUP106	Work in a team

**ELECTIVE UNITS**

Some units are listed under more than one heading. A unit may only be selected once.

**Group A: Furniture**

Unit code	Unit title
MSFFF2012	Prepare surfaces for finishing
MSFFM2016	Join solid timber
MSFFM2017	Hand make timber joints
MSFFM2018	Operate basic static machines safely
MSFFM3025	Construct furniture using leg and rail method
MSFFM3026	Produce angled and curved components using manufactured board
MSFFM3027	Produce angled and curved components using solid timber
MSFFM3028	Prepare and apply decorative surfaces for furnishing products
MSFFM3029	Select timbers for furniture production

**Group B: Kitchens and bathrooms**

Unit code	Unit title
MSFFM3038	Set up, operate and maintain automated edge banding machines
MSFFM3041	Determine and document requirements for cabinetry installation
MSFFM3042	Fabricate cabinetry
MSFFM3043	Install cabinetry
MSFFM3045	Set up, operate and maintain computer numerically controlled (CNC) machining and processing centres
MSFKB2003	Prepare for cabinetry installation
MSFKB3012	Plan kitchen and bathroom projects

**Group C: Marine cabinetry**

Unit code	Unit title
AURVTT121	Select and apply adhesives in automotive and marine service and repair work
CPCCCA3014	Construct and install bulkheads (prerequisite: CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry)
CPCCPB3004	Fix wet area sheets (prerequisite: CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry)
CPCCWC3004	Install suspended ceilings (prerequisite: CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry)
CPCSH3005	Apply and trim decorative additions to shopfittings and components
MSFFL2038	Install lay flat vinyl floor coverings

#### Group D: Wood Machining

Unit code	Unit title
MSFFM3032	Set up, operate and maintain sawing machines
MSFFM3033	Set up, operate and maintain drilling machines
MSFFM3034	Set up, operate and maintain joining machines
MSFFM3035	Set up, operate and maintain planing and finishing machines
MSFFM3036	Set up, operate and maintain multi-head planing and moulding machines
MSFFM3037	Set up, operate and maintain routing and shaping machines
MSFFM3044	Set up, operate and maintain computer numerically controlled (CNC) sizing machines
MSFFM3045	Set up, operate and maintain computer numerically controlled (CNC) machining and processing centres

#### Group E: Coopering

Unit code	Unit title
MSFCP2005	Use coopering sector hand and power tools
MSFCP3001	Produce barrels using non-fired processes

MSFCP3002	Produce barrels using fired processes
MSFCP3003	Maintain and repair barrels

### Group F: Drafting

Unit code	Unit title
CUAACD312	Produce computer-aided drawings
MSFFDM400 2	Collect and interpret information to support production processes
MSFFDM401 2	Produce computer-aided line and component production drawings
MSFFDM401 4	Produce manual and computer-aided drawings from design concepts

### Group G: General electives

Unit code	Unit title
BSBOPS304	Deliver and monitor a service to customers
CPCCJN3003	Manufacture components for doors, windows and frames
MSFFDM400 5	Design, construct and test jigs
MSFFDM400 9	Match furnishing style and materials to customer requirements
MSFFDM401 8	Research and organise product inspection and testing
MSFFF2009	Use furniture finishing sector hand and power tools
MSFFF2012	Prepare surfaces for finishing
MSFFF2013	Maintain spray equipment and booth
MSFFF2014	Apply surface coatings by spray gun
MSFFF3010	Match and make up colours

MSFFF3012	Apply plural component coatings
MSFFF3016	Apply graining and decorative finishes
MSFFM2014	Select and apply hardware
MSFFM2015	Apply sheet laminates by hand
MSFFM2019	Assemble furnishing products
MSFFM3043	Install cabinetry
MSFFM3038	Set up, operate and maintain automated edge banding machines
MSFFM3039	Fabricate synthetic solid surface products
MSFFM3040	Produce and maintain cutting tools
MSFFT4013	Coordinate onsite installation of cabinetry
MSFGN3006	Estimate and cost job
MSMOPS363	Organise on-site work
MSMPER200	Work in accordance with an issued permit
MSMSUP390	Use structured problem-solving tools
MSS402001	Apply competitive systems and practice
MSS402052	Implement continuous improvements based on standardised work practices
TLID2021	Handle dangerous goods/hazardous substances

### Group H: Safe work

Unit code	Unit title
MSMWHS200	Work safely
CPCWHS1001	Prepare to work safely in the construction industry
CPCWHS2001	Apply WHS requirements, policies and procedures in the construction industry

## Qualification Mapping Information

Supersedes and not equivalent to MSF31113 Certificate III in Cabinet Making, MSF30313 Certificate III in Timber and Composites Machining, and MSF30213 Certificate III in Furniture Making.

## Links

Companion Volume implementation guides are found in VETNet -

## MSF30422 Certificate III in Glass and Glazing

### Modification History

Release 2. Three elective units updated. Supersedes and is equivalent to MSF30422 Certificate III in Glass and Glazing (Release 1).

Release 1. Addition of MSF30418 to Group D electives. Supersedes and is equivalent to MSF30418 Certificate III in Glass and Glazing (Release 2).

### Qualification Description

This qualification reflects the role of individuals involved in manufacturing, processing, moving or installing various types of glass products. Job roles may be in glass processing, glazing or designed glazing in both residential and commercial operations.

Workers use a range of technical knowledge to perform skilled work involving known routines, methods and procedures. They use discretion and judgement to adapt and transfer their skills and knowledge to different job needs and take responsibility for their own work within organisational parameters.

In some states and territories there may be licensing requirements that link to this qualification, and other licensing requirements where the individual is required to work onsite. Depending on the jurisdiction, licensing or regulatory requirements may also apply to the use of some units in this qualification. Licensing of glazing work applies in Queensland, NSW and South Australia. Local regulations should be checked for details.

### Entry Requirements

Nil

### Packaging Rules

Total number of units = 23 including:

- 8 core units
- 15 elective units consisting of:
  - 1 unit only from Group A
  - at least 8 units in any combination from Groups B, C, D or E
  - up to 6 additional units from Group B, C, D, E, F, or any endorsed Training Package or accredited course. These units must be relevant to the work outcome as outlined in the qualification description above, must not duplicate the outcome of other units available within this qualification, and if imported from other Training Packages, at least 4 must be units reflecting outcomes at AQF level 3 or higher.

Electives may be packaged to provide a qualification with a specialisation. General packaging rules must still be met when packaging units for a specialisation.

All Group B electives and at least 6 Group C electives, including those marked with '#', must be selected for the award of *MSF30422 Certificate III in Glass and Glazing (Glass Processing)*.

All Group B electives and at least 6 Group D electives, including those marked with '#', plus at least 1 installation unit (MSFGG3033 – MSFGG3037), must be selected for the award of *MSF30422 Certificate III in Glass and Glazing (Glazing)*.

At least 3 Group E electives, including those marked with '#', must be selected for the award of *MSF30422 Certificate III in Glass and Glazing (Designed Glazing)*.

### CORE UNITS

Unit code	Unit title	Prerequisite
HLTAID011	Provide first aid	
MSFGG2014	Cut thin glass by hand	
MSFGG2015	Process glass by basic machines	
MSFGG3039	Manually move glass	
MSFGN2001	Make measurements and calculations	
MSMENV272	Participate in environmentally sustainable work practices	
MSMSUP102	Communicate in the workplace	
MSMSUP106	Work in a team	

### ELECTIVE UNITS

#### Group A

Unit code	Unit title	Prerequisite
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry	
MSMWHS200	Work safely	

#### Group B

Unit code	Unit title	Prerequisite
-----------	------------	--------------

MSFGG2013	Move single glass sheets by mechanical means	
-----------	--	--

### Group C - Glass Processing

Unit code	Unit title	Prerequisite
MEM30031A	Operate computer-aided design (CAD) system to produce basic drawing elements	
MSFFM3024	Construct jigs and fixtures	
MSFGG2012	Operate glass freefall rack and table #	
MSFGG3023	Apply and handle films	
MSFGG3024	Form glass	
MSFGG3025	Apply patterns and designs to glass	
MSFGG3026	Laminate glass	
MSFGG3027	Toughen glass	
MSFGG3030	Process glass by automatic machines	
MSFGG3031	Cut thick glass #	
MSFGG3032	Mirror glass	
MSFGG3040	Move block and bulk glass sheet by mechanical means #	
MSFGG3041	Manufacture insulated glass units	
MSFGG3042	Process glass by semi-automatic machines	

### Group D - Glazing

Unit code	Unit title	Prerequisite
MSFSS3005	Assemble non-security and security screens and grilles	
MSFGG2011	Glaze and reglaze residential windows and doors #	

MSFGG2016	Assemble glazing products	
MSFGG2017	Fabricate and install insect and security screens	
MSFGG3028	Select, cut and process materials for glazing products	
MSFGG3029	Assess glass and glazing requirements #	
MSFGG3033	Install shower screens	
MSFGG3034	Install residential windows and doors	
MSFGG3035	Install mirrors and glass splashbacks	
MSFGG3036	Install commercial glazing products	
MSFGG3037	Install structural glazing products	
MSFGG3038	Conduct commercial and structural reglazing	
MSFGN3001	Read and interpret work documents	

### Group E - Designed Glazing

Unit code	Unit title	Prerequisite
MSFDG2001	Assemble leadlight and stained glass components #	
MSFDG3001	Protect leadlight and stained glass	
MSFDG3002	Prepare and install architectural engineered leadlight and stained glass	
MSFDG3003	Paint and fire glass	
MSFDG3004	Assemble copper foil glass components	
MSFDG3005	Fuse glass	
MSFDG3006	Process coloured and textured glass by hand	
MSFGG3022	Construct and repair leadlight panels	
MSFGG3024	Form glass	

**Group F**

<b>Unit code</b>	<b>Unit title</b>	<b>Prerequisite</b>
BSBWHS411	Implement and monitor WHS policies, procedures and programs to meet legislative requirements	
CPCCCM2006	Apply basic levelling procedures	
CPCCCM2010	Work safely on scaffolding higher than two metres	
CPCCCM2012	Work safely at heights	CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry
CPCWHS1001	Prepare to work safely in the construction industry	
CUAACD311	Produce drawings to communicate ideas	
CUACAL311	Produce calligraphy	
MSAPMSUP201A	Receive or despatch goods	
MSFBA2014	Construct metal louvre and canopy-hooded style awnings	
MSFFM3030	Produce manual and computer-aided production drawings	
MSFGG4011	Manage glass industry production scheduling	
MSFGN3006	Estimate and cost job	
TAEDEL301	Provide work skill instruction	
TAEDEL404	Mentor in the workplace	
TLID0021	Store and handle dangerous goods and hazardous substances	
TLILIC0003	Licence to operate a forklift truck	

## Qualification Mapping Information

Release 2. Supersedes and is equivalent to MSF30422 Certificate III in Glass and Glazing (Release 1).

Release 1. Supersedes and is equivalent to MSF30418 Certificate III in Glass and Glazing.

## Links

Companion Volume implementation guides are found in VETNet -

## MSF30518 Certificate III in Picture Framing

### Modification History

Release 3. One elective unit updated. Supersedes and equivalent to MSF30518 Certificate III in Picture Framing (Release 2).

Release 2. One elective unit updated. Supersedes and equivalent to MSF30518 Certificate III in Picture Framing (Release 1).

Release 1. Supersedes and is equivalent to MSF30513 Certificate III in Picture Framing.

### Qualification Description

This qualification reflects the role of a picture framer. Picture framers usually work in small retail outlets, which provide framing services to the general public. However, they may also undertake framing for businesses and specialise in particular types of framing.

Picture framers assess framing design requirements and use a range of technical skills to create artwork packages of varying complexity. In the first instance, they assess framing requirements from both a technical and design perspectives. Picture framers then use discretion and judgment and specialised knowledge and skills to select and use equipment and materials to achieve the desired framing effects.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

### Entry Requirements

N/A

### Packaging Rules

Total number of units = 21

- **14** core units
- **7** elective units, consisting of:
  - **5 additional units from the list below**
  - **up to 2 additional units from** any endorsed Training Package or accredited course - these units must be relevant to the work outcome

#### CORE UNITS

MSFGN2001	Make measurements and calculations
-----------	------------------------------------

MSFPPF2009	Cut mouldings to length
MSFPPF2010	Join mouldings
MSFPPF2011	Mount artwork
MSFPPF2012	Cut mat boards
MSFPPF2013	Cut and handle glazing materials for framing
MSFPPF2014	Assemble basic artwork packages
MSFPPF3010	De-frame artwork
MSFPPF3016	Assemble complex artwork packages
MSFPPF3014	Assess and prepare framing design requirements
MSMENV272	Participate in environmentally sustainable work practices
MSMSUP102	Communicate in the workplace
MSMSUP106	Work in a team
MSMWHS200	Work safely

## ELECTIVE UNITS

BSBOPS305	Process customer complaints
BSBOPS304	Deliver and monitor a service to customers
BSBTEC301	Design and produce business documents
BSBESB303	Organise finances for new business ventures
BSBESB305	Address compliance requirements for new business ventures
BSBPEF301	Organise personal work priorities
ICPPRN3840	Set up and produce basic digital print
MSAPMSUP201A	Receive or despatch goods
MSFGN3006	Estimate and cost job
MSFPPF2015	Repair framing material finishes

MSFPPF3011	Decorate mat boards
MSFPPF3013	Prepare textiles for framing
MSFPPF3015	Apply frame finishes
MSFPPF3017	Install artwork

## Qualification Mapping Information

Release 3. One elective unit updated. Supersedes and equivalent to MSF30518 Certificate III in Picture Framing (Release 2).

Release 2. One elective unit updated. Supersedes and equivalent to MSF30518 Certificate III in Picture Framing (Release 1).

Release 1. Supersedes and is equivalent to MSF30513 Certificate III in Picture Framing.

## Links

Companion Volume implementation guides are found in VETNet -

## MSF30722 Certificate III in Upholstery

### Modification History

Release 1. MSMENV272 Participate in environmentally sustainable work practices removed from the core. Balance of core and electives adjusted to reflect this change, but overall number of units remains the same. Supersedes and is equivalent to MSF30713 Certificate III in Upholstery.

### Qualification Description

Workers with this qualification have trade-level skills in upholstery, including skills in dismantling and reassembling furniture, in selecting, cutting, sewing and fitting fabric and leather upholstery material, and in producing loose covers. They have core skills in tool use, measurement, interpretation of work documentation, preparation of cutting lists, communication, teamwork, and safe and environmentally sustainable work practices. Electives allow them to achieve specialised skills in, among others, marine and automotive upholstery, computer-aided drawing, and small business management. Workers in this role use discretion, judgement and problem solving, take responsibility for their own outputs, and may have limited responsibility for others in a team environment.

Depending on the jurisdiction, licensing or regulatory requirements may apply to some units in this qualification. Local regulations should be checked for details.

### Entry Requirements

Nil

### Packaging Rules

Total number of units = 25

- 12 core units
- 13 elective units, consisting of:
  - 2 to 4 units from Group A
  - 4 to 11 units from Group B
  - up to 7 units not listed below from any endorsed Training Package or accredited course. These units must be relevant to the work role as outlined in the qualification description above, must not duplicate the outcome of other units used to achieve this qualification, and must not include more than 1 unit aligned at a level lower than Australian Qualifications Framework Level 3.

Electives may be packaged to provide a qualification with a specialisation.

For the award of Certificate III in Upholstery (Production), MSFUP2009 and MSFUP3022 must be selected.

**CORE UNITS**

<b>Unit code</b>	<b>Unit title</b>
MSFGN2001	Make measurements and calculations
MSFGN3005	Read and interpret work documents
MSFGN3006	Estimate and cost job
MSFUP2007	Use upholstery hand and power tools
MSFUP2008	Fit upholstery components
MSFUP2010	Machine sew basic upholstery final cover materials
MSFUP2011	Develop cutting plan and cut single-layer upholstery fabric
MSFUP2012	Dismantle and reassemble furniture for upholstering
MSFUP3016	Fit and apply final cover materials to furniture using basic techniques
MSMSUP102	Communicate in the workplace
MSMSUP106	Work in a team
MSMWHS200	Work safely

**ELECTIVE UNITS****Group A**

<b>Unit code</b>	<b>Unit title</b>
MSFUP2009	Apply contemporary foundations to upholstered furniture
MSFUP3022	Apply finishing techniques to upholstered furniture
MSFUP3024	Cut, sew and fit skirts to upholstered furniture
MSFUP3025	Cut, sew and fit or fill cushions

**Group B**

<b>Unit code</b>	<b>Unit title</b>
BSBESB401	Research and develop business plans

BSBESB403	Plan finances for new business ventures
BSBESB405	Manage compliance for small businesses
BSBESB407	Manage finances for new business ventures
CUAACD312	Produce computer-aided drawings
MSFUP3015	Apply traditional foundations to upholstered furniture
MSFUP3017	Fit and apply final cover materials to furniture using decorative techniques
MSFUP3018	Lay out patterns and cut leather
MSFUP3019	Machine sew complex upholstery final cover materials
MSFUP3020	Fit and apply leather to furniture
MSFUP3021	Manufacture and fit loose covers
MSFUP3023	Develop cutting plan and cut multiple layer upholstery fabric
MSFUP3026	Apply marine sewing and installation techniques
MSFUP3027	Cut and sew canvas and acrylics
MSMENV272	Participate in environmentally sustainable work practices
TLID0021	Store and handle dangerous goods and hazardous substances

## Qualification Mapping Information

Release 1. Supersedes and is equivalent to MSF30713 Certificate III in Upholstery.

## MSF30818 Certificate III in Flooring Technology

### Modification History

Release 3. Four low use units removed from elective bank as determined at December 2020 AISC meeting in response to Skills Ministers' objectives. Supersedes and is equivalent to MSF30818 Certificate III in Flooring Technology (Release 2).

Release 2. Minor upgrades. Supersedes and is equivalent to MSF30818 Certificate III in Flooring Technology (Release 1).

Release 1. Supersedes but is not equivalent to MSF30813 Certificate III in Flooring Technology.

### Qualification Description

This qualification reflects the role of flooring technicians who install floors or flooring materials in residential or commercial premises. Floors and flooring materials may be carpet, timber, vinyl, resilient, resin or concrete. Flooring technicians use a range of technical knowledge to perform skilled work involving known routines, methods and procedures. They use discretion and judgement to adapt and transfer their skills and knowledge to different job needs and take responsibility for their own work.

In some states and territories, this qualification is linked to licensing requirements for the installation of timber floors. In addition, licensing or regulatory requirements may apply to the use of some units in this qualification in some jurisdictions. Local regulations should be checked for details.

### Entry Requirements

There are no entry requirements for this qualification.

### Packaging Rules

**Total number of units = 24**

- 12 core units
- 12 elective units, consisting of:
  - at least 8 units in any combination from A, B, C or D
  - up to 4 units from Groups A, B, C, D, E or, any endorsed Training Package or accredited course – these units must be relevant to the work outcome, and if imported from other Training Packages, must be units first packaged in a Certificate III level qualification or higher.

Units selected from other Training Packages and accredited courses must not duplicate units available within this qualification.

Any combination of electives that meets the rules above can be selected for the award of the Certificate III in Flooring Technology. Where appropriate, electives may be packaged to provide a qualification with a specialisation.

### Packaging for each specialisation

**At least 7** Group A electives must be selected for the award of MSF30818 Certificate III in Flooring Technology (Carpet).

**All 8** Group B electives must be selected for the award of MSF30818 Certificate III in Flooring Technology (Resilient).

**All 7** Group C electives must be selected for the award of MSF30818 Certificate III in Flooring Technology (Resin).

**At least 8** Group D electives must be selected for the award of MSF30818 Certificate III in Flooring Technology (Timber).

### CORE UNITS

Unit Code	Unit Title
CPCCWHS1001	Prepare to work safely in the construction industry
MSFFL2030	Receive and prepare flooring materials
MSFFL2032	Select, prepare and apply moisture barriers to concrete subfloors
MSFFL2034	Prepare subfloors with cementitious coating applications
MSFFL3052	Plan and cost flooring technology work
MSFFL3053	Establish and maintain a safe flooring technology work environment
MSFFL3054	Assess flooring installation sites
MSFGN2001	Make measurements and calculations
MSFGN3001	Read and interpret work documents
MSMSUP102	Communicate in the workplace
MSMSUP106	Work in a team
TLID2003	Handle dangerous goods/hazardous substances

### ELECTIVE UNITS

**Group A: Carpet**

Unit Code	Unit Title
MSFFL2036	Install soft carpet underlays and gripper accessories
MSFFL2037	Install unpatterned tufted carpet
MSFFL3059	Install carpet tiles
MSFFL3060	Install adhesive fixed carpet
MSFFL3061	Install commercial carpet
MSFFL3062	Install patterned and custom designed carpet
MSFFL3063	Install synthetic floor coverings to sports facilities and outdoor spaces
MSFFL3064	Install carpet to custom design stairs

**Group B: Resilient**

Unit Code	Unit Title
MSFFL2038	Install lay flat vinyl floor coverings
MSFFL3065	Install resilient tiles
MSFFL3066	Install linoleum floor coverings
MSFFL3067	Complete large scale and complex vinyl flooring installations
MSFFL3068	Install resilient floor coverings using custom designs and decorative finishes
MSFFL3069	Install rubber floor coverings
MSFFL3070	Install resilient sheet to walls
MSFFL3071	Install anti-static and conductive resilient floor coverings

**Group C: Resin**

Unit Code	Unit Title
-----------	------------

MSFFL2035	Mechanically prepare surfaces for installation of flooring materials
MSFFL3072	Mix and apply thin-film rollcoat resin flooring systems
MSFFL3073	Mix and apply thin-film broadcast resin flooring systems
MSFFL3074	Mix and apply self-levelling resin flooring systems
MSFFL3075	Mix and apply trowel-applied resin flooring systems
MSFFL3076	Mix and apply high-build decorative resin flooring systems
MSFFL3077	Prepare subfloors for resin flooring systems

### Group D: Timber

Unit Code	Unit Title
MSFFF3001	Match and make up colours
MSFFL2039	Install laminate flooring
MSFFL2040	Install engineered timber flooring
MSFFL2042	Nail strip timber flooring
MSFFL2043	Install expansion joints
MSFFL2044	Install mouldings and edge trims to timber floors
MSFFL2045	Coarse sand timber flooring
MSFFL3078	Install direct stick timber flooring
MSFFL3079	Adapt and apply custom designs to timber flooring
MSFFL3080	Install timber flooring materials to stairs
MSFFL3081	Install block parquetry flooring
MSFFL3082	Install cork tiles
MSFFL3083	Install patterned and mosaic parquetry flooring
MSFFL3085	Install battens or plywood in preparation for strip timber
MSFFL3087	Plan and implement maintenance of timber, laminate and engineered

	flooring
MSFFL3089	Apply solvent-based coatings to timber floors
MSFFL3090	Apply water-based coatings to timber floors
MSFFL3091	Apply oil-based coatings to timber floors
MSFFL3092	Apply composite-based coatings to timber flooring
MSFFL3094	Apply stains and fillers to timber flooring
MSFFL3095	Fine sand timber flooring
MSFFL3096	Edge sand timber flooring
MSFFL3098	Sand and fill parquetry flooring
MSFFL3099	Apply finishes to cork flooring
MSFFL3101	Install bamboo flooring

### Group E

Unit Code	Unit Title
BSBOPS304	Deliver and monitor a service to customers
BSBESB402	Establish legal and risk management requirements of new business ventures
BSBESB401	Research and develop business plans
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry
CPCCW3002	Apply waterproofing process to internal wet areas
MEM30031A	Operate computer-aided design (CAD) system to produce basic design elements
MSFFL2031	Remove existing floor coverings
MSFFL2033	Install hard underlays
MSFFL2041	Install impact and sound absorption underlay
MSFFL3055	Respond to complaints about flooring installations

MSFFL3056	Polish concrete floors
MSFFL3057	Select and fit diamond polishing tools for concrete surface preparation and polishing
MSFFL3058	Provide advice to customers on flooring products
MSFFL3100	Apply densifiers and sealers to concrete surfaces
MSFFDM4009	Match furnishing styles and materials to customer requirements
MSS402051	Apply quality standards
TAEDEL301	Provide work skill instruction
TAEDEL404	Mentor in the workplace

## Qualification Mapping Information

Release 3. Four low use units removed from elective bank as determined at December 2020 AISC meeting in response to Skills Ministers' objectives. Supersedes and is equivalent to MSF30818 Certificate III in Flooring Technology (Release 2).

Release 2. Minor upgrades. Supersedes and is equivalent to MSF30818 Certificate III in Flooring Technology (Release 1).

Release 1. Supersedes but is not equivalent to MSF30813 Certificate III in Flooring Technology.

## Links

# MSF30919 Certificate III in Blinds, Awnings, Security Screens and Grilles

## Modification History

Release 2. One low use unit removed from elective bank as determined at December 2020 AISC meeting in response to Skills Ministers' objectives. Supersedes and is equivalent to MSF30919 Certificate III in Blinds, Awnings, Security Screens and Grilles.

Release 1. Supersedes but is not equivalent to MSF30913 Certificate III in Blinds, Awnings, Security Screens and Grilles.

## Qualification Description

This qualification describes the skills and knowledge required to estimate, fabricate, assemble and install blinds, awnings, shade sails, shutters, and screens and grilles using a range of materials, fixtures and fittings.

Work is usually performed in a defined range of skilled operations, where a range of methods, tools, materials and information are used to complete routine activities. Discretion and judgement are required in selecting equipment, services and contingency measures and resolving mostly predictable problems within known time constraints.

Licensing applies in some jurisdictions for the installation of blinds, awnings, shade sails, shutters, security screens and grilles. Local regulations should be checked for details.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

Total number of units = **18**

- **5 core** units
- **13 elective** units, consisting of:
  - at least 8 units from Group A, Group B and Group C
  - up to 5 units from Group D and remaining Group A\*, Group B and Group C units
  - up to three units from any endorsed Training Package or accredited course provided these units are relevant to the work outcome and were first packaged in a Certificate II level qualification or higher.

Units selected from other Training Packages and accredited courses must be relevant to the qualification outcome and not duplicate units available in this qualification.

If units of competency selected have prerequisite units, these prerequisite units must also be selected as part of completion of this qualification.

### Packaging for specialisations

Electives may be packaged to provide a qualification with a specialisation.

At least 5 Group A electives must be selected for award of MSF30919 Certificate III in Blinds, Awnings, Security Screens and Grilles (Fabrication and Assembly)

At least 5 Group B electives must be selected for award of MSF30919 Certificate III in Blinds, Awnings, Security Screens and Grilles (Installation)

At least 5 Group C electives must be selected for award of MSF30919 Certificate III in Blinds, Awnings, Security Screens and Grilles (Estimating Detailing)

### CORE UNITS

Unit code	Unit title
BSBFLM303	Contribute to effective workplace relationships
BSBPRO401	Develop product knowledge
MSFGN2001	Make measurements and calculations
MSFGN3001	Read and interpret work documents
MSMWHS200	Work safely

### ELECTIVE UNITS

#### Group A: Fabrication and Assembly

Unit code	Unit title	Prerequisite unit
MEM18001C	Use hand tools	
MEM18002B	Use power tools/hand held operations	
MEM20003A	Install and upgrade locks and hardware	MEM18001C Use hand tools MEM18002B Use power tools/hand held operations
MEM20005A	Install and maintain door control devices/systems	MEM18001C Use hand tools

Unit code	Unit title	Prerequisite unit
		MEM18002B Use power tools/hand held operations
MSFBA2011	Select and apply hardware and fixings for blinds, awnings, screens and grilles	
MSFBA3011	Assemble awnings	
MSFBA3012	Assemble interior blinds	
MSFBA3014	Assemble pelmets	
MSFBA3019	Assemble roller shutters	
MSFBA3021	Assemble louvre shutters	
MSFDN4003	Produce patterns and templates	
MSFFM2010	Set up and operate basic static machines	
MSFFM3010	Prepare cutting list from plans and job specifications	
MSFFM3021	Set up, operate and maintain computer numerically controlled (CNC) sizing machines	
MSFFM3022	Set up, operate and maintain computer numerically controlled (CNC) machining and processing centres	
MSFGG2016	Assemble glazing products	
MSFGG3028	Select, cut and process materials for glazing products	
MSFSF3014	Construct Roman-style blinds	
MSFSS3005	Assemble non-security and security screens and grilles	
MSS402081	Contribute to the application of a proactive maintenance strategy	
MSS403087	Mistake proof an operational process	
MSTGN3016	Plan tasks to assist production operations	

**Group B: Installation**

Unit code	Unit title	Prerequisite unit
AHCLSC308	Install metal structures and features	
CPCCWHS2001	Apply WHS requirements, policies and procedures in the construction industry	
CPCCSH2003A	Apply and install sealant and sealant devices	CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry
CPCCWHS1001	Prepare to work safely in the construction industry	
CPPSEC2022	Install electronic locks and locking systems	
MSFBA3015	Install louvre shutters	
MSFBA3016	Install awnings	
MSFBA3017	Install interior blinds	
MSFBA3020	Install roller shutters	
MSFFDT3001	Install low-voltage technology, automation, and intelligent management systems in furnishing	
MSFGG3034	Install residential windows and doors	
MSFSS3004	Install non-security and security screens and grilles	
MSTGN2005	Perform minor maintenance	
MSTTF3001	Identify client and site requirements for installation of fabricated textile products	

**Group C: Estimating Detailing**

Unit code	Unit title	Prerequisite unit
-----------	------------	-------------------

Unit code	Unit title	Prerequisite unit
BSBADM311	Maintain business resources	
BSBCUS301	Deliver and monitor a service to customers	
BSBITU306	Design and produce business documents	
BSBPRO301	Recommend products and services	
MSFBA3018	Assess suitability of blinds and awnings	
MSFGN3002	Estimate and cost job	
MSFGN3003	Advise customers on products and services	
MSFGN3004	Resolve quality and compliance issues	
MSTTF3002	Gain customer acceptance of service proposal	

#### Group D: General

Unit code	Unit title	Prerequisite unit
BSBFLM309	Support continuous improvement systems and processes	
BSBINN201	Contribute to workplace innovation	
CPCCCA3010	Install windows and doors	CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry
CPCCCM2002	Carry out excavation	CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry
CPCCCO2013	Carry out concreting to simple forms	CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry
CPCCCM3001	Operate elevated work platforms up to 11 metres	

Unit code	Unit title	Prerequisite unit
MSFGN2002	Move and store materials and products	
MSFGN4001	Research and meet ethical and compliance requirements	
MSFSF2015	Cut single layer fabrics	
MSTTF2002	Cut, bend and shape metal	
MSTTF2005	Translate information into measurements or diagrams	
MSTTF2014	Weld plastic materials	
MSTTF2015	Install products on and off site	
MSTTF3004	Perform advanced welding of plastic materials	MSTTF2014 Weld plastic materials
MSTTX2014	Perform industrial sewing on textile products	
TLIA0020	Package goods	
TLIA0023	Receive goods	
TLIA0019	Despatch stock	
TLIA3016	Use inventory systems to organise stock control	
TLID0021	Store and handle dangerous goods and hazardous substances	

## Qualification Mapping Information

Release 2. One low use unit removed from elective bank as determined at December 2020 AISC meeting in response to Skills Ministers' objectives. Supersedes and is equivalent to MSF30919 Certificate III in Blinds, Awnings, Security Screens and Grilles.

Release 1. Supersedes but is not equivalent to MSF30913 Certificate III in Blinds, Awnings, Security Screens and Grilles.

## MSF31018 Certificate III in Interior Decoration Retail Services

### Modification History

Release 4. Eight elective units updated and one deleted. Supersedes and is equivalent to MSF31018 Certificate III in Interior Decoration Retail Services (Release 3).

Release 3. Imported units updates. Supersedes and is equivalent to MSF31018 Certificate III in Interior Decoration Retail Services (Release 2).

Release 2. Minor updates. Supersedes and is equivalent to MSF31018 Certificate III in Interior Decoration Retail Services (Release 1).

Release 1. Supersedes and is equivalent to MSF31013 Certificate III in Interior Decoration Retail Services.

### Qualification Description

This qualification reflects the role of individuals who provide practical assistance and advice to customers on furnishing products in a retail, showroom or domestic environment.

They use discretion and judgment in their work roles and adapt and transfer skills and knowledge to different customer situations and needs. Furnishing products may include soft furnishings, furniture, flooring, window coverings or kitchen and bathroom items

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of publication.

### Entry Requirements

There are no entry requirements for this qualification.

### Packaging Rules

**Total number of units = 13**

- 5 core units
- 8 elective units, consisting of:
  - at least 1 unit from Group A
  - at least 5 units from Group B
  - up to 2 units from Group A, Group B, any endorsed Training Package or accredited course – these units must be relevant to the work outcome.

Units selected from other Training Packages and accredited courses must not duplicate units available within this qualification.

**CORE UNITS**

<b>Unit code</b>	<b>Unit title</b>
MSMENV272	Participate in environmentally sustainable work practices
MSMSUP102	Communicate in the workplace
MSMSUP106	Work in a team
MSMWHS200	Work safely
SIRXCEG001	Engage the customer

**ELECTIVE UNITS****Group A**

<b>Unit code</b>	<b>Unit title</b>
MSFFDM4009	Match furnishing styles and materials to customer requirements
MSFFL3052	Plan and cost flooring technology work
MSFFL3058	Provide advice to customers on floor coverings
MSFFP2019	Source and review information about kitchen, bathroom and laundry design
MSFGN2001	Make measurements and calculations
MSFGN3003	Advise customers on products and services
MSFKB3009	Provide advice on modular kitchens
MSFKB3012	Plan kitchen and bathroom projects
MSFSF3017	Measure up and calculate fabric quantities for window coverings
MSFSF3018	Advise customers on interior decoration

**Group B**

<b>Unit code</b>	<b>Unit title</b>
------------------	-------------------

BSBFIN302	Maintain financial records
BSBOPS304	Deliver and monitor a service to customers
BSBOPS305	Process customer complaints
CUAACD311	Produce drawings to communicate ideas
CUAACD312	Produce computer-aided drawings
CUADES202	Evaluate the nature of design in a specific industry context
CUADES301	Explore the use of colour
CUADES305	Source and apply information on the history and theory of design
CUADIG304	Create visual design components
MSFGN3005	Read and interpret work documents
MSFGN3006	Estimate and cost job
MSS402051	Apply quality standards
SIRRINV002	Control stock
SIRXSL001	Sell to the retail customer
SITXMPR011	Plan and implement sales activities

## MSF40122 Certificate IV in Interior Decoration

### Modification History

Release 1. Updated core and elective units. Supersedes and is equivalent to MSF40118 Certificate IV in Interior Decoration.

### Qualification Description

This qualification reflects the role of individuals who provide advice and practical assistance on the finishing and furnishing of existing interior spaces. They may work in retail, consulting and building businesses as interior decorators or colour consultants. Individuals in this role are typically involved in:

- working with clients and other building and design professionals and suppliers
- research and analysis of the client's goals and requirements
- planning, designing and arranging space
- interior styling
- specifying finishes and furnishings
- selection of colours
- specifications and purchasing.

Decorators use a broad range of specialised and technical knowledge and skills, and they research and compare information from diverse sources to develop decoration solutions. They also use well-developed communication skills, and may provide some leadership and guidance to others.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Work may require access to construction sites and require construction induction training and certification covered by the unit CPCWHS1001 Prepare to work safely in the construction industry. Local regulations should also be checked for requirements.

### Entry Requirements

There are no entry requirements for this qualification.

### Packaging Rules

Total number of units = 17

- 7 core units
- 10 elective units, consisting of:
  - at least 7 units from the electives listed below

- up to 3 units from the electives listed below, any endorsed Training Package or accredited course – these units must be relevant to the work outcome.

Units selected from other Training Packages and accredited courses must not duplicate units available within this qualification.

### CORE UNITS

Unit code	Unit title
CUADES302	Explore and apply the creative design process to 2D forms
CUADES303	Explore and apply the creative design process to 3D forms
CUAACD311	Produce drawings to communicate ideas
CUAACD313	Produce technical drawings
MSFGN4001	Research and meet ethical and compliance requirements
MSFID4012	Decorate residential interiors
MSFID4016	Design colour schemes for interior and exterior spaces

### ELECTIVE UNITS

Unit code	Unit title
BSBCRT412	Articulate, present and debate ideas
BSBCRT413	Collaborate in a creative process
BSBESB406	Establish operational strategies and procedures for new business ventures
BSBOPS402	Coordinate business operational plans
BSBTEC201	Use business software applications
CPPBDN4107	Investigate construction methods for Class 1 and 10 buildings
CUAACD312	Produce computer-aided drawings
CUADES301	Explore the use of colour
CUADES305	Source and apply information on the history and theory of design
CUADES411	Generate design solutions
CUADES413	Develop and extend design skills and practice

CUADES423	Research and apply techniques in spatial design
CUADIG303	Produce and prepare photo images
CUADIG304	Create visual design components
CUAILL401	Develop and refine illustrative work
MSFID4013	Design residential interior lighting
MSFID4015	Prepare materials and finishes boards for client presentation
MSFID4017	Research and recommend furniture and accessories
MSFID4019	Research interior decoration and design influences
MSFID4021	Design soft furnishing solutions for interior spaces
MSFSF3017	Measure up and calculate fabric quantities for window coverings
MSFSF3018	Advise customers on interior decoration
MSMENV472	Implement and monitor environmentally sustainable work practices
MSMWHS200	Work safely
SIRRMER004	Develop visual merchandising creative concepts
SIRRMER005	Implement visual merchandising concepts
SIRRMER007	Design and install visual merchandising displays
SIRRMER009	Plan and organise display lighting
SIRRMER011	Design and install merchandise signage

## Qualification Mapping Information

Release 1. Supersedes and is equivalent to MSF40118 Certificate IV in Interior Decoration.

## Links

Companion Volume implementation guides are found in VETNet -

# MSF40222 Certificate IV in Furniture Design and Manufacturing

## Modification History

Release 2. Equivalency error in metadata updated. MSF40222 Certificate IV in Furniture Design and Manufacture (Release 1) is not equivalent to MSF40213 Certificate IV in Furniture Design and Manufacture.

Release 1. Packaging rules changed, description revised, core and elective units changed. Supersedes and is not equivalent to MSF40213 Certificate IV in Furniture Design and Technology.

## Qualification Description

This qualification reflects the role of individuals who work in product design-related and manufacturing or custom-made furniture roles in furniture or similar organisations where a combination of technical, creative, practical, research and project coordination skills is required. At this level, these individuals use knowledge of design principles and concepts in a practical way to drive design process, materials capability and production processes to develop and create product and process solutions in response to varied design briefs. Depending on the context, an individual may also use other product-specific technical production skills.

There are no specific licenses that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

Total number of units = 18

- 5 core units
- 13 elective units selected from those listed below, or from any endorsed training package or accredited course (these units must be relevant to the work outcome), and comprising:
  - a minimum of 8 MSF-coded units
  - a minimum of 1 unit from each of Groups A to F.

The remaining 4 electives may be chosen from any endorsed training package or accredited course (these units must be relevant to the work outcome). Units selected from other training packages and accredited courses must not duplicate units available within this qualification.

<b>Core Units</b>	
CUADES411	Generate design solutions
CUADES412	Interpret and respond to a design brief
MSFFDM4008	Investigate materials and technologies for design projects
MSFFDM4010	Prepare and present design and manufacturing information
MSFFDM4014	Produce manual and computer-aided drawings from design concepts

### **Group A Electives: History of design**

<b>Code</b>	<b>Title</b>
CUARES301	Apply knowledge of history and theory to own arts practice
CUADES305	Source and apply information on the history and theory of design
MSFFDM4021	Research furniture styles and movements

### **Group B Electives: Design communication**

<b>Code</b>	<b>Title</b>
BSBCRT311	Apply critical thinking skills in a team environment
BSBCRT412	Articulate, present and debate ideas
BSBCRT413	Collaborate in a creative process
BSBOPS404	Implement customer service strategies
CUAACD311	Produce drawings to communicate ideas
CUADIG303	Produce and prepare photo images

### **Group C Electives: Design practice**

<b>Code</b>	<b>Title</b>
CUADES301	Explore the use of colour
CUADES303	Explore and apply the creative design process to 3D forms

CUADES304	Source and apply design industry knowledge
BSBPMG430	Undertake project work
MSFFDM4009	Match furnishing style and materials to customer requirements
MSFFDM4020	Research and select product finishes
MSFFM3029	Select timbers for furniture production
MSFKB4011	Design ancillary residential cabinetry

### Group D Electives: Workshop practice

Code	Title
BSBWHS311	Assist with maintaining workplace safety
CUAACD314	Make scale models
CUAACD412	Experiment with moulding and casting techniques
CUADES422	Research and apply techniques in product design
CUASCU411	Experiment with techniques to produce sculpture
CUAWOO401	Experiment with techniques to produce wood objects
MSFFDM4001	Assemble custom furniture
MSFFDM4003	Construct and evaluate prototypes and samples
MSFFDM4004	Construct joints for custom furniture
MSFFDM4005	Design, construct and test jigs
MSFFDM4006	Hand carve wood to custom design
MSFFDM4013	Produce curved and shaped components for custom furniture
MSFFDM4016	Produce timber veneered components for custom furniture
MSFFDM4022	Select, use and maintain hand tools for the creation of custom products
MSFFDM4023	Set up, operate and maintain basic static woodworking machines for furniture designs
MSMWHS200	Work safely

**Group E Electives: Design documentation and machine interface**

<b>Code</b>	<b>Title</b>
CUAACD312	Produce computer-aided drawings
CUAACD313	Produce technical drawings
CUAANM313	Create 3D digital models
CUADIG519	Investigate technologies for the creation of digital art
MSFFDM4012	Produce computer-aided line and component production drawings
MSFFDM4015	Produce patterns and templates
MSFFDM4019	Research and select manufacturing technologies
MSFFDM5002	Coordinate and optimise workplace maintenance programs

**Group F Electives: Project management and professional development**

<b>Unit code</b>	<b>Unit title</b>
BSBESB401	Research and develop business plans
BSBESB402	Establish legal and risk management requirements of new business ventures
BSBESB404	Market new business ventures
BSBESB407	Manage finances for new business ventures
BSBLDR413	Lead effective workplace relationships
BSBTWK401	Build and maintain business relationships
MSFFDM400 2	Collect and interpret information to support production processes
MSFFDM400 7	Identify and calculate production costs
MSFFDM401 1	Prepare tender submissions
MSFFDM401 7	Purchase materials and consumables

MSFFDM4018	Research and organise product inspection and testing
MSFGN4001	Research and meet ethical and compliance requirements
MSS402082	Apply cost factors to work practices

## Qualification Mapping Information

Release 2. Supersedes and equivalent to MSF40222 Certificate IV in Furniture Design and Manufacture (Release 1).

Release 1. Supersedes and is not equivalent to MSF40213 Certificate IV in Furniture Design and Technology.

# MSF40318 Certificate IV in Kitchen and Bathroom Design

## Modification History

Release 3. One elective unit updated. One elective unit deleted. Supersedes and is equivalent to MSF40318 Certificate IV in Design of Kitchens, Bathrooms and Interior Spaces (Release 2).

Release 2. Imported units updated. Supersedes and is equivalent to MSF40313 Certificate IV in Design of Kitchens, Bathrooms and Interior Spaces (Release 1).

Release 1. Supersedes and is equivalent to MSF40313 Certificate IV in Design of Kitchens, Bathrooms and Interior Spaces.

## Qualification Description

This qualification reflects the role of individuals who design kitchens and bathrooms that typically feature built-in cabinetry and furniture. They may work in larger organisations or as independent designers.

Designers work directly with the client and/or with professionals, such as architects, builders, retailers, interior designers and suppliers. They possess a broad range of specialised and technical knowledge and skills, and they research and compare information from diverse sources to develop design solutions. They also use well-developed communication skills and may provide some leadership and guidance to others.

There are no specific licences that relate to this qualification. Work may require access to construction sites and require White Card construction induction training and certification covered by the unit CPCWHS1001 Prepare to work safely in the construction industry. Local regulations should also be checked for requirements.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

Total number of units = 16

- **11** core units
- **5** elective units, consisting of:
  - **at least 3** units from the electives listed below
  - **up to 2** units from the list below, any endorsed Training Package or accredited course – these units must be relevant to the work outcome.

Units selected from other Training Packages and accredited courses must not duplicate units available within this qualification.

## CORE UNITS

MSFFM3011	Measure and draw site layout for manufactured furniture products
MSFID4014	Produce digital models and documentation for interior design projects
MSFID4022	Prepare quotation and contract documentation for design projects
MSFKB3010	Detail cabinet construction requirements
MSFKB3011	Plan kitchen and bathroom projects
MSFKB4009	Determine spatial planning considerations for kitchen designs
MSFKB4010	Determine spatial planning considerations for bathroom design
MSFKB4011	Design ancillary residential cabinetry
MSFKB4013	Document residential building services
MSFKB4015	Research and recommend materials, components and finishes for kitchen designs
MSFKB4016	Research and recommend materials, components and finishes for bathroom designs

## ELECTIVE UNITS

BSBCRT412	Articulate, present and debate ideas
BSBOPS404	Implement customer service strategies
CPCCB4002	Manage work health and safety in the building and construction workplace
CPCCB4003	Select, prepare and administer a construction contract
CPCCB4004	Identify and produce estimated costs for building and construction projects
CPCCB4008	Supervise site communication and administration processes for building and construction projects

CPCBC4009	Apply legal requirements to building and construction projects
CPCWHS1001	Prepare to work safely in the construction industry
CUADES302	Explore and apply the creative design process to 2D forms
CUADES303	Explore and apply the creative design process to 3D forms
CUADES305	Source and apply information on the history and theory of design
CUADES411	Generate design solutions
CUADES413	Develop and extend design skills and practice
CUADES423	Research and apply techniques in spatial design
MSFFT4013	Coordinate on-site installation of furnishing products
MSFFDM4009	Match furnishing style and materials to customer requirements
MSFGN4001	Research and meet ethical and compliance requirements
MSFID4012	Decorate residential interiors
MSFID4013	Design residential interior lighting
MSFID4015	Prepare materials and finishes boards for client presentation
MSFID4016	Design colour schemes for interior and exterior spaces
MSFID4019	Research interior decoration and design influences
MSFID4020	Research and integrate embedded technologies in interior designs
MSFID5020	Design residential interiors
MSFID5023	Design for all ages and abilities
MSFKB3009	Provide advice on modular kitchens
MSFKB4012	Determine layout for laundry components
MSMENV472	Implement and monitor environmentally sustainable work practices
MSMSUP390	Use structured problem-solving tools

## Qualification Mapping Information

Release 3. One elective unit updated. One elective unit deleted. Supersedes and is equivalent to MSF40318 Certificate IV in Design of Kitchens, Bathrooms and Interior Spaces (Release 2).

Release 2. Imported units updated. Supersedes and is equivalent to MSF40313 Certificate IV in Design of Kitchens, Bathrooms and Interior Spaces (Release 1).

Release 1. Supersedes and is equivalent to MSF40313 Certificate IV in Design of Kitchens, Bathrooms and Interior Spaces.

# MSF40418 Certificate IV in Glass and Glazing

## Modification History

Release 3. Imported units and metadata updated.

Release 2. Minor upgrades to imported units. Supersedes and is equivalent to MSF40418 Certificate IV in Glass and Glazing (Release 1).

Release 1. Supersedes and is equivalent to MSF40413 Certificate IV in Glass and Glazing.

## Qualification Description

This qualification reflects the role of individuals in glass and glazing enterprises who perform a range of specialist and/or leadership functions, including sales, estimating scheduling, design, production control and quality assurance. Leadership job roles include higher tradesperson (post-trade), factory-based leading hands/supervisors or site supervisors in glass processing, glazing or architectural glass functions in residential and commercial operations.

Roles at this level may include requirements to evaluate and analyse current practices, develop new criteria and procedures for performing current practices, and provision of leadership and guidance to others in the application and planning of glass and glazing skills.

Entry to the qualification may be from trade and non-trade backgrounds. Industry expectation is that it will be undertaken primarily by those who have completed a Certificate III in Glass and Glazing or achieved equivalent industry experience.

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of publication. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

**Total number of units = 11**

- 2 core units
- 9 elective units, consisting of:
  - 4 units from Group A or Group B, with at least 2 from Group A
  - up to 5 additional units from Group A, Group B, Group C, any endorsed Training Package or accredited course - these units must be relevant to the work outcome, and if imported from other Training Packages, at least 3 must be units first packaged in a Certificate IV level qualification or higher.

**CORE UNITS**

<b>Unit Code</b>	<b>Unit Title</b>
BSBMGT401	Show leadership in the workplace
BSBWHS401	Implement and monitor WHS policies, procedures and programs to meet legislative requirements

**ELECTIVE UNITS****Group A**

<b>Unit Code</b>	<b>Unit Title</b>
MSFGG4009	Apply standards and codes of practice for the glass industry
MSFGG4010	Use glass industry data systems
MSFGG4011	Manage glass industry production scheduling
MSFGG4012	Perform laser measurement and levelling for glass windows and doors in buildings
MSFGG4014	Operate complex glass processing plant control systems
MSFGG4015	Manage glass processing plant shutdown and restart
MSFGG4016	Plan and coordinate commercial glazing installations

**Group B**

<b>Unit Code</b>	<b>Unit Title</b>
BSBOPS505	Manage organisational customer service
BSBLDR414	Lead team effectiveness
BSBPMG420	Apply project scope management techniques
BSBPRO401	Develop product knowledge
CPCCB4012	Read and interpret plans and specifications

CPCCBBC4013	Prepare and evaluate tender documentation
ICPSUP455	Supervise and schedule work of others
MSFFT4012	Prepare a tender submission
MSMENV472	Implement and monitor environmentally sustainable work practices
MSS403021	Facilitate a Just in Time system
MSS404084	Undertake process capability improvements

### Group C

Unit Code	Unit Title
BSBCUS402	Address customer needs
BSBOPS403	Apply business risk management processes
BSBSLS408	Present, secure and support sales solutions
BSBWRT411	Write complex documents
CPCCBBC4001A	Apply building codes and standards to the construction process for low rise building projects
CPCCBBC4004	Identify and produce estimated costs for building and construction projects
CPCCBBC4005	Produce labour and material schedules for ordering
MEM30031A	Operate computer-aided design (CAD) system to produce basic design elements
MSFAH4003	Advise on security technology, hardware and services
MSFAH4004	Prepare architectural door hardware schedules
MSFDN4003	Produce patterns and templates
MSFDN5001	Generate and transfer complex computer-aided drawings and specifications
MSFFM3009	Produce manual and computer-aided production drawings
MSFFT4007	Sample, inspect and test products to specifications

MSFFT4010	Identify and calculate production costs
MSFFT4011	Purchase materials and consumables
MSS402031	Interpret product costs in terms of customer requirements
MSS404054	Apply statistics to operational processes
TAEDEL301	Provide work skill instruction
TAEDEL402	Plan, organise and facilitate learning in the workplace
TAEDEL404	Mentor in the workplace
TLIA0025	Assess and monitor optimum stock levels
TLIA0031	Organise transport of freight or goods

## Qualification Mapping Information

Release 3. Imported units and metadata updated

Release 2. Minor upgrades to imported units. Supersedes and is equivalent to MSF40418 Certificate IV in Glass and Glazing (Release 1).

Release 1. Supersedes and is equivalent to MSF40413 Certificate IV in Glass and Glazing.

## MSF40522 Certificate IV in Piano Technology

### Modification History

Release 1. Supersedes and is not equivalent to MSF31213 Certificate III in Piano Technology.

### Qualification Description

This qualification is for those who tune, maintain and make basic repairs on acoustic upright and grand pianos.

There are no formal entry requirements for this qualification; however, people commencing this qualification must have a good understanding of sound frequencies, the harmonic relationship between pitches, and the use of dynamics in music. In most cases this is achieved through instrumental and music theory learning.

Workers with this qualification service home, studio and performance pianos. They understand factors such as movement, temperature, humidity and patterns of use that affect piano condition and provide solutions and advice to clients for routine and non-routine problems. Many operate as sole traders.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

### Entry Requirements

Nil

### Packaging Rules

Total number of units = 15

- 6 core units
- 9 elective units, consisting of:
  - 5 to 9 units from Group A
  - zero to 4 units from Group B
  - zero to 3 units not listed below from any endorsed training package or accredited course. These units:
    - must be relevant to the work role as outlined in the qualification description above
    - must not duplicate the outcome of other units used to achieve this qualification
    - must not include more than 1 unit aligned at a level lower than Australian Qualifications Framework Level 3.

#### CORE UNITS

Unit code	Unit title
-----------	------------

MSMWHS200	Work safely
MSFPT4004	Regulate actions, keys and pedals of upright pianos
MSFPT4006	Apply piano tuning theory and basic acoustics
MSFPT4007	Control tuning hammers
MSFPT4008	Pitch raise a piano
MSFPT4012	Tune a piano aurally and electronically

## ELECTIVE UNITS

### Group A

Unit code	Unit title
MSFPT4000	Select and use materials for piano repair and manufacture
MSFPT4001	Provide advice to customers on piano tuning and repairs
MSFPT4002	Research and apply information about piano technology
MSFPT4003	Repair piano actions, keys and pedals
MSFPT4005	Regulate actions, keys and pedals of grand pianos
MSFPT4009	Tune unisons aurally to a beatless condition
MSFPT4010	Tune octaves aurally to appropriate stretch
MSFPT4011	Tune a temperament octave to produce an equally tempered scale
MSFPT4013	Voice a piano

### Group B

Unit code	Unit title
BSBESB303	Organise finances for new business ventures
BSBESB305	Address compliance requirements for new business ventures
BSBESB404	Market new business ventures
BSBFIN302	Maintain financial records

BSBINS410	Implement records systems for small business
BSBMKG434	Promote products and services
BSBTWK401	Build and maintain business relationships
BSBXCM301	Engage in workplace communication
MSFFF3015	Repair and touch up surfaces
MSFFF3017	Apply traditional French polishing techniques
MSFFM2017	Hand make timber joints
MSFFM2018	Operate basic static machines safely
MSFGN2001	Make measurements and calculations
SIRXOSM005	Develop a basic website for customer engagement

## Qualification Mapping Information

Supersedes and is not equivalent to MSF31213 Certificate III in Piano Technology.

# MSF50222 Diploma of Interior Design

## Modification History

Release 1. Updated core and elective units. Supersedes and is equivalent to MSF50218 Diploma of Interior Design.

## Qualification Description

This qualification reflects the role of interior designers who provide advice mainly for residential building interiors. They may also be involved in the provision of advice about interior decoration. Individuals may be self-employed or employed in businesses such as design studios.

Designers provide a broad range of design advice and services, and are involved in:

- researching and analysing the client's goals and requirements
- planning, arranging and styling the space, and preparing detailed client presentations
- selecting and specifying colour schemes, furniture, fabrics, fixtures and lighting
- working in collaboration with builders, architects and service contractors
- preparing detailed design documentation.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Work may require access to construction sites and require induction training and certification covered by the unit CPCWHS1001 Prepare to work safely in the construction industry. Local regulations should also be checked for requirements.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

Total number of units = 27

- 10 core units
- 17 elective units, consisting of:
  - at least 11 units from Groups A and B, with at least 5 from Group A
  - up to 6 additional units from Group A, Group B, any endorsed Training Package or accredited course – these units must be relevant to the work outcome.

Units selected from other Training Packages and accredited courses must not duplicate units available within this qualification.

**CORE UNITS**

<b>Unit code</b>	<b>Unit title</b>
CUADES302	Explore and apply the creative design process to 2D forms
CUADES303	Explore and apply the creative design process to 3D forms
CUADES512	Establish, negotiate and refine a design brief
MSFID4013	Design residential interior lighting
MSFID4014	Produce digital models and documentation for interior design projects
MSFID4016	Design colour schemes for interior and exterior spaces
MSFID5020	Design residential interiors
MSFID5021	Evaluate site structure and services for interior design briefs
MSFID5022	Explore and apply creative design methodology to interior space
MSFID5025	Develop residential interior design project documentation

**ELECTIVE UNITS****Group A**

<b>Unit code</b>	<b>Unit title</b>
BSBCRT512	Originate and develop concepts
BSBPMG430	Undertake project work
CUAANM313	Create 3D digital models
CUADIG517	Design digital simulations
CUAPPR513	Present a body of own creative work
MSFGN4001	Research and meet ethical and compliance requirements
MSFID4020	Research and integrate embedded technologies in interior designs
MSFID4021	Design soft furnishing solutions for interior spaces
MSFID4022	Prepare quotation and contract documentation for design projects
MSFID5016	Develop decoration proposals for complex sites

MSFID5017	Develop event decoration proposals
MSFID5018	Provide interior styling service
MSFID5019	Decorate interiors for restoration projects
MSFID5023	Design for all ages and abilities
MSFID5024	Design workplace interiors
MSFID5027	Research and recommend colour applications and finishes
MSFID5028	Research and recommend artwork
MSS015022	Develop strategies for more sustainable use of resources

### Group B

Unit code	Unit title
BSBCRT412	Articulate, present and debate ideas
BSBCRT413	Collaborate in creative processes
BSBESB406	Establish operational strategies and procedures for new business ventures
BSBOPS402	Coordinate business operational plans
CPCWHS1001	Prepare to work safely in the construction industry
CPPBDN4107	Investigate construction methods for Class 1 and 10 buildings
CUADES304	Source and apply design industry knowledge
CUADES305	Source and apply information on the history and theory of design
CUADES411	Generate design solutions
CUADES413	Develop and extend design skills and practice
CUADES423	Research and apply techniques in spatial design
CUADIG303	Produce and prepare photo images
CUADIG304	Create visual design components
CUAILL401	Develop and refine illustrative work

CUAPPR514	Establish and maintain environmentally sustainable creative practice
MSFFDM4021	Research furniture styles and movements
MSFID4012	Decorate residential interiors
MSFID4015	Prepare materials and finishes boards for client presentation
MSFID4017	Research and recommend furniture and accessories
MSFID4018	Research and recommend hard materials and finishes for interiors
MSFID4019	Research interior decoration and design influences

## Qualification Mapping Information

Release 1. Supersedes and is equivalent to MSF50218 Diploma of Interior Design.

# MSF50322 Diploma of Furniture Design and Manufacturing

## Modification History

Release 2. Imported elective units updated. Supersedes and equivalent to MSF50322 Diploma of Furniture Design and Manufacturing (Release 1).

Release 1. Supersedes and is non-equivalent to MSF50313 Diploma of Furniture Design and Technology.

## Qualification Description

This qualification reflects the role of individuals who work in paraprofessional design and manufacturing roles in furniture or similar organisations using a combination of technical, creative, practical, research and project management skills in small-scale design projects. At this level these individuals are able to work collaboratively to establish and refine the design brief and to develop and implement design solutions for application in a commercial context. They use detailed knowledge of the design process, current technologies, materials capability and production processes. Depending on the context, an individual may also use other product-specific technical production skills.

There are no specific licenses that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

**Total number of units = 18**

7 core units

11 elective units consisting of:

at least 6 units from the electives listed below

up to 5 units from the electives listed below, any endorsed Training Package or accredited course – these units must be relevant to the work outcome

Units selected from other Training Packages and accredited courses must not duplicate units available within this qualification.

Core Units	Prerequisite units
------------	--------------------

<b>Core Units</b>		<b>Prerequisite units</b>
BSBCRT512	Originate and develop concepts	
CUADES511	Implement design solutions	
CUADES512	Establish, negotiate and refine a design brief	
MSFFDM5008	Evaluate design proposals and concepts	
MSFFDM5009	Generate and transfer complex computer-aided drawings and specifications	
MSFFDM5012	Research, test and apply materials and technologies for design projects	
MSFFDM5013	Work collaboratively on design projects	

<b>Elective Units</b>		<b>Prerequisite units</b>
BSBESB406	Establish operational strategies and procedures for new business ventures	
BSBLEG525	Apply legal principles in intellectual property law matters	
BSBLDR523	Lead and manage effective workplace relationships	
BSBMKG541	Identify and evaluate marketing opportunities	
BSBPEF501	Manage personal and professional development	
BSBPMG430	Undertake project work	
BSBSTR501	Establish innovative work environments	
BSBTWK401	Build and maintain business relationships	
CUAACD314	Make scale models	
CUAACD537	Refine 3-D design ideas and processes	
CUAACD508	Refine model making skills	
CUAACD511	Make moulds and casts	
CUAANM313	Create 3D digital models	

<b>Elective Units</b>		<b>Prerequisite units</b>
CUADES413	Develop & extend design skills and practice	
CUADES611	Manage design realisation	
CUADIG519	Investigate technologies for the creation of digital art	
CUAPPR512	Develop sustainability of own professional practice	
CUAPPR513	Present a body of own creative work	
CUAPPR515	Establish and maintain safe creative practice	
CUAPPR613	Engage in the business of creative practice	
MSFFDM4002	Collect and interpret information to support production processes	
MSFFDM4005	Design, construct and test jigs	
MSFFDM4007	Identify and calculate production costs	
MSFFDM4010	Prepare and present design and manufacturing information	
MSFFDM4012	Produce computer-aided line and component production drawings	
MSFFDM4018	Research and organise product inspection and testing	
MSFFDM4021	Research furniture styles and movements	
MSFFDM5001	Construct custom furniture using advanced techniques	
MSFFDM5002	Coordinate and optimise workplace maintenance programs	
MSFFDM5003	Design product suitable for batched or limited production	
MSFFDM5004	Design product suitable for high-volume technology services in production	
MSFFDM5005	Design product suitable for mass production	
MSFFDM5006	Develop and document technical workplace information	

Elective Units		Prerequisite units
MSFFDM5007	Develop, trial and evaluate prototypes	
MSFFDM5010	Investigate ergonomic, anthropometric and proxemic considerations for design	
MSFFDM5011	Plan production	
MSFGN4001	Research and meet ethical and compliance requirements	
MSS015022	Develop strategies for more sustainable use of resources	
MSS015023	Design sustainable product or process	
MSS404054	Apply statistics to operational processes	
MSS405022	Design a process layout	
MSS405075	Facilitate the development of a new product	MSS404054 Apply statistics to operational processes

## Qualification Mapping Information

Release 2. Supersedes and equivalent to MSF50322 Diploma of Furniture Design and Manufacturing (Release 1).

# MSF60122 Advanced Diploma of Interior Design

## Modification History

Release 1. Updated core and elective units. Supersedes and is equivalent to MSF60118 Advanced Diploma of Interior Design.

## Qualification Description

This qualification reflects the role of interior designers who develop creative and technical solutions for built interior environments. Interior design at this level covers the planning and detailing of complex residential, commercial and institutional design projects with an emphasis on space creation, space planning and the factors that affect peoples' responses to living and working environments.

Designers may be self-employed or employed in businesses as design consultants, design project administrators and design managers. Work involves the use of systematic and coordinated methodologies, including research, analysis and integration of knowledge into the creative process, and knowledge of the principles of interior design and building technologies. Contexts are diverse and often unpredictable. Accountability and responsibility for self and others in achieving outcomes is involved.

There are no specific licences that relate to this qualification. However, depending on the jurisdiction, licensing or regulatory requirements may apply to the use of some units in this qualification. Local regulations should be checked for details.

Work may require access to construction sites and require construction induction training and certification covered by the unit CPCWHS1001 Prepare to work safely in the construction industry. Local regulations should also be checked for requirements.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

Total number of units = 39

- 16 core units
- 23 elective units, consisting of:
  - at least 11 units from Group A and B, with at least 5 from Group A
  - at least 6 units from Group C
  - up to 6 additional units from Group A, Group B, Group C, any endorsed Training Package or accredited course – these units must be relevant to the work outcome.

Units selected from other Training Packages and accredited courses must not duplicate units available within this qualification.

## CORE UNITS

Unit code	Unit title
CUADES302	Explore and apply the creative design process to 2D forms
CUADES303	Explore and apply the creative design process to 3D forms
CUADES512	Establish, negotiate and refine a design brief
CUADES611	Manage design realisation
MSFID4013	Design residential interior lighting
MSFID4014	Produce digital models and documentation for interior design projects
MSFID4016	Design colour schemes for interior and exterior spaces
MSFID5020	Design residential interiors
MSFID5021	Evaluate site structure and services for interior design briefs
MSFID5022	Explore and apply creative design methodology to interior space
MSFID5024	Design workplace interiors
MSFID5025	Develop residential interior design project documentation
MSFID6010	Design commercial interior lighting
MSFID6011	Resolve complex spatial design problems through modelling
MSFID6018	Apply 3D visualisation techniques to represent interior designs
MSFID6020	Develop commercial interior design project documentation

## ELECTIVE UNITS

### Group A

Unit code	Unit title
CUAANM512	Create 3D digital environments

CUADES413	Develop and extend design skills and practice
CUADES612	Research global design trends
CUAPPR612	Collaborate in professional creative projects
MSFID5016	Develop decoration proposals for complex sites
MSFID6012	Design for large scale commercial or institutional interiors
MSFID6013	Design interiors for hospitality environments
MSFID6014	Design for retail interiors
MSFID6015	Design for conservation and restoration projects
MSFID6016	Select and monitor contractors
MSFID6017	Evaluate design project outcomes
MSFID6019	Produce digital presentations for commercial projects

### Group B

Unit code	Unit title
BSBCRT512	Originate and develop concepts
BSBPMG430	Undertake project work
CUAANM302	Create 3D digital animations
CUAANM313	Create 3D digital models
CUADES304	Source and apply design industry knowledge
CUADIG517	Design digital simulations
MSFGN4001	Research and meet ethical and compliance requirements
MSFID4020	Research and integrate embedded technologies in interior designs
MSFID4021	Design soft furnishing solutions for interior spaces
MSFID4022	Prepare quotation and contract documentation for design projects

MSFID5017	Develop event decoration proposals
MSFID5018	Provide interior styling service
MSFID5019	Decorate interiors for restoration projects
MSFID5023	Design for all ages and abilities
MSFID5027	Research and recommend colour applications and finishes
MSFID5028	Research and recommend artwork
MSS015022	Develop strategies for more sustainable use of resources

### Group C

Unit code	Unit title
BSBCRT412	Articulate, present and debate ideas
BSBESB406	Establish operational strategies and procedures for new business ventures
BSBOPS402	Coordinate business operational plans
CPCWHS1001	Prepare to work safely in the construction industry
CUADES411	Generate design solutions
CUADES423	Research and apply techniques in spatial design
CUADIG303	Produce and prepare photo images
CUADIG304	Create visual design components
CUAILL401	Develop and refine illustrative work
CUAPPR514	Establish and maintain environmentally sustainable creative practice
MSFID4015	Prepare materials and finishes boards for client presentation
MSFID4017	Research and recommend furniture and accessories
MSFID4019	Research interior decoration and design influences
MSMENV672	Develop workplace policy and procedures for sustainability

## Qualification Mapping Information

Release 1. Supersedes and is equivalent to MSF60118 Advanced Diploma of Interior Design.

## MSFSS00014 Kitchen and Bathroom Installer Licence

### Modification History

Release 1. Supersedes and is not equivalent to MSFSS00011 Kitchen and Bathroom Installer License.

### Description

This skill set addresses licensing requirements in some jurisdictions for the installation of kitchen and bathroom cabinetry.

### Pathways Information

Most of these units provide credit towards the Certificate III in Cabinet Making and Technology and other Certificate III and IV qualifications in the MSF Furnishing Training Package.

### Licensing/Regulatory Information

This skill set meets the licensing requirements in some jurisdictions for the installation of kitchen and bathroom cabinetry.

### Skill Set Requirements

MSFFT4013	Coordinate onsite installation of cabinetry
MSFKB4013	Document residential building services
MSFGN3006	Estimate and cost job
MSFFM3041	Determine and document requirements for cabinetry installation
MSFFM3043	Install cabinetry
MSFFM3042	Fabricate cabinetry

### Target Group

This skill set is suitable for tradespeople with Certificate III level skills who require a licence to undertake kitchen and bathroom installations.

## **Suggested words for Statement of Attainment**

These competencies from the MSF Furnishing Training Package meet industry requirements to obtain a licence for the installation of kitchen and bathrooms.

## MSFSS00015 Fitted Furniture Installation

### Modification History

Release 1. Supersedes and is not equivalent to MSFSS00005 Fitted Furniture Installer.

### Description

This skill set reflects the skills required to install fitted furniture, including the coordination of the installation process where other tradespeople are involved.

### Pathways Information

These units provide credit towards relevant Certificate III and Certificate IV qualifications in the MSF Furnishing Training Package.

### Licensing/Regulatory Information

No licensing, legislative or certification requirements apply directly to this Skill Set at the time of publication.

### Skill Set Requirements

BSBOPS304	Deliver and monitor a service to customers
MSFFM3041	Determine and document requirements for cabinetry installation
MSFFM3043	Install cabinetry
MSFFT4013	Coordinate onsite installation of furnishing products

### Target Group

This skill set is suitable for individuals who have relevant industry experience at a Certificate III level and who seek to upgrade skills in customer service, the technical aspects of fitted furniture installation and the coordination of the installation process.

## **Suggested words for Statement of Attainment**

These competencies from the MSF Furnishing Training Package meet industry requirements for the installation of fitted furniture.

## MSFSS00016 Piano Tuning

### Modification History

Release 1. Supersedes and is not equivalent to MSFSS00001 Piano Tuning Skill Set.

### Description

This skill set addresses the skills and knowledge required to tune upright acoustic pianos.

### Pathways Information

These units provide credit towards the Certificate IV in Piano Tuning in the MSF Furnishing Training Package.

### Licensing/Regulatory Information

No licensing, legislative or certification requirements apply directly to this Skill Set at the time of publication.

### Skill Set Requirements

MSFPT4004	Regulate actions, keys and pedals of upright pianos
MSFPT4006	Apply piano tuning theory and basic acoustics
MSFPT4007	Control tuning hammers
MSFPT4008	Pitch raise a piano
MSFPT4012	Tune a piano aurally and electronically

### Target Group

This skill set is suitable for people requiring professional skills in tuning home, studio or performance pianos. It is suitable for learners who understand the harmonic relationship between sound frequencies in Western music, usually achieved through instrumental and music theory learning.

## **Suggested words for Statement of Attainment**

These competencies from the MSF Furnishing Training Package meet industry requirements for basic piano tuning skills.

## MSFSS00017 Fitted Furniture Estimating

### Modification History

Release 1. Supersedes and is equivalent to MSFSS00012 Fitted Furniture Estimator.

### Description

This skill set reflects the skills required to cost work and prepare tender submissions for the installation of fitted furniture in response to customer requirements.

### Pathways Information

These units provide credit towards relevant Certificate III and Certificate IV qualifications in the MSF Furnishing Training Package.

### Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

### Skill Set Requirements

BSBOPS304	Deliver and monitor a service to customers
MSFFDM4011	Prepare tender submissions
MSFFM3041	Determine and document requirements for cabinetry installation
MSS402051	Apply quality standards
MSS404054	Apply statistics to operational processes

### Target Group

This skill set is suitable for individuals who have relevant industry experience at a Certificate III level and who seek to upgrade skills in customer service, costing and quoting of work and preparation of professional tender documents to improve business performance.

## **Suggested words for Statement of Attainment**

These competencies from the MSF Furnishing Training Package meet industry requirements for the estimating associated with the manufacture and installation of fitted furniture.

# MSFSS00018 Piano Repair and Maintenance

## Modification History

Release 1. New skill set.

## Description

This skill set addresses the skills and knowledge required to undertake basic repairs and maintenance on acoustic pianos.

## Pathways Information

These units provide credit towards the Certificate IV in Piano Tuning in the MSF Furnishing Training Package.

## Licensing/Regulatory Information

No licensing, legislative or certification requirements apply directly to this Skill Set at the time of publication.

## Skill Set Requirements

MSFPT4000	Select and use materials for piano repair and manufacture
MSFPT4001	Provide advice to customers on piano tuning and repair
MSFPT4002	Research and apply information about piano technology
MSFPT4003	Repair piano actions, keys and pedals
MSFPT4004	Regulate actions, keys and pedals of upright pianos

## Target Group

This skill set is suitable for people requiring professional skills in undertaking basic repairs and maintenance on home, studio or performance pianos. It is suitable for learners who understand the role of harmony and dynamics in music, usually achieved through instrumental and music theory learning.

## **Suggested words for Statement of Attainment**

These competencies from the MSF Furnishing Training Package meet industry requirements for basic piano tuning skills.

# MSFAH4003 Advise on security technology, hardware and services

## Modification History

Release 1. Supersedes and is equivalent to MSFAH4001 Advise on security technology, hardware and services.

## Application

This unit describes the skills and knowledge required to apply architectural hardware product and service knowledge to provide advice to customers and other sales staff on the design, technical features and uses of architectural hardware and security products, ancillary items, prices and warranties.

This unit applies to architectural hardware specifiers who analyse and compare information from a range of sources to respond to customer needs. Customers include those requiring architectural hardware schedules and products for construction and renovation projects.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Architectural hardware

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Research architectural hardware product range	1.1 Identify job requirements from plans and specifications 1.2 Identify potentially suitable architectural hardware products by accessing relevant sources of information 1.3 Identify hardware components that suit customer specifications and meet applicable legislation, codes and national standards
2. Recommend door and	2.1 Provide and explain detailed manufacturer product specifications to

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
window hardware products	customer to assist buying decisions 2.2 Demonstrate features and benefits of products to customer using appropriate interpersonal techniques
3. Identify hardware quantities	3.1 Accurately determine quantities of required architectural hardware products from customer specifications 3.2 Determine measuring tools and systems to be used based on job requirements 3.3 Provide customer with accurate quotation for estimated quantities
4. Advise on hardware product quantities	4.1 Clearly explain to customer comparisons between architectural hardware manufacturer's warranty terms 4.2 Confirm individual product warranty terms and conditions from relevant sources of information and accurately convey to customer 4.3 Provide customer with accurate written information regarding individual product warranty terms and conditions
5. Negotiate price and payment options	5.1 Accurately convey store recommended retail pricing to customer according to applicable legislation, codes and national standards 5.2 Negotiate individual product prices in accordance with organisational requirements to achieve sales 5.3 Accurately convey store payment options to customer and negotiate preferred option following organisational requirements

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFAH4001 Advise on security technology, hardware and services.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFAH4003 Advise on security technology, hardware and services

## Modification History

Release 1. Supersedes and is equivalent to MSFAH4001 Advise on security technology, hardware and services.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- matched compliant architectural hardware products to 2 different customer briefs or specifications
- undertaken both imperial and metric measurements and matching to hardware measuring systems
- read and interpreted:
  - plans
  - designs
  - specifications.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legislation, codes and standards that apply to architectural hardware, including key features of Regulation 90
- architectural hardware:
  - types of jobs
  - typical customers
- sources of information on architectural hardware products and services
- available architectural hardware and/or keying system options and basic requirements for installation
- types and functions of architectural hardware and/or keying system
- organisational policies and procedures, in relation to:
  - client confidentiality
  - sales and/or customer service
  - methods of dealing with special requirements of customers
  - customer complaints
  - price negotiation
- building construction methods and types that impact on architectural hardware

- type of problems associated with architectural hardware systems and how to avoid and respond
- principles of effective communication
- documentation requirements and processes.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - architectural hardware products
  - job specifications and/or requirements
  - legislation, codes and standards

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

## MSFAH4004 Prepare architectural door hardware schedules

### Modification History

Release 1. Supersedes and is equivalent to MSFAH4002 Prepare architectural door hardware schedules.

### Application

This unit describes the skills and knowledge required to assess door hardware and keying requirements across commercial, industrial and residential applications. It requires the ability to source relevant information, determine customer requirements and use appropriate assessment methods to make an accurate determination of architectural hardware equipment and/or system options. The unit also includes development of keying schedules.

This unit applies to architectural hardware specifiers who analyse and compare information from a range of sources to respond to customer needs. Customers include those requiring architectural hardware schedules and products for construction and renovation projects.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Architectural hardware

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Obtain brief from clients	1.1 Review and clarify job requirements with appropriate persons in accordance with organisational requirements 1.2 Conduct discussions with customer to establish and clarify scope of work 1.3 Apply effective interpersonal techniques when interacting with clients

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Assess and identify specific site requirements and correctly document details</p> <p>1.5 Discuss architectural hardware requirements and clarify and agree on applicable legislation, codes and national standards</p> <p>1.6 Organise job documents and architectural plans in accordance with organisational requirements or company policies</p>
2. Gather, interpret and review information for preparation of hardware schedules	<p>2.1 Identify and follow site restrictions and regulations</p> <p>2.2 Gather relevant information from identified sources</p> <p>2.3 Assess door and frame types and locations to facilitate accurate determination of requirements</p> <p>2.4 Review customer activities and existing architectural hardware arrangements to ensure uniformity throughout project</p> <p>2.5 Identify and assess inconsistency and environmental factors affecting the architectural hardware of the site in accordance with organisational policies and procedures</p>
3. Produce architectural door hardware schedules	<p>3.1 Record and document information in accordance with computer program and/or organisational template requirements</p> <p>3.2 Integrate architectural hardware to reflect building security and electronic requirements</p> <p>3.3 Prepare an accurate architectural hardware schedule in accordance with industry and organisational style and format standards</p> <p>3.4 Make recommendations for architectural hardware and alternative options in accordance with organisational requirements</p> <p>3.5 Process documentation in accordance with applicable legislation, codes and national standards, assignment and organisational requirements</p> <p>3.6 Complete work within designated timeframes and present for review to appropriate person</p>
4. Prepare and review keying schedules	<p>4.1 Apply principles of master keying in accordance with industry practice and organisational requirements</p> <p>4.2 Develop a keying matrix to client requirements, allowing for future system expansion and mechanical capabilities of system</p> <p>4.3 Confirm and clarify customer keying requirements according to organisational procedures</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.4 Review appropriate levels of security and/or access with respect to clients assets, activities and existing security arrangements</p> <p>4.5 Record and document information in accordance with computer program and/or organisational template requirements</p> <p>4.6 Match client requirements to the mechanical possibilities and limitations of master key systems</p> <p>4.7 Identify options and advise client on options and alternatives</p> <p>4.8 Identify sources of assistance in assessing requirements for key systems and master key systems and seek assistance from appropriate person in accordance with organisational procedures</p>
5. Finalise documentation for submission to client	<p>5.1 Review and confirm final architectural hardware and/or keying requirements with customer in accordance with organisational requirements</p> <p>5.2 Accurately prepare, process and store documentation in accordance with customer, legislative and organisational requirements</p> <p>5.3 Prepare architectural hardware and keying schedules and other documentation in accordance with organisational procedures</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFAH4002 Prepare architectural door hardware schedules

## Links

# Assessment Requirements for MSFAH4004 Prepare architectural door hardware schedules

## Modification History

Release 1. Supersedes and is equivalent to MSFAH4002 Prepare architectural door hardware schedules.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- matched architectural hardware products and systems to 2 different client briefs or specifications – must include keying schedules.
- 

## Knowledge Evidence

- legislation, codes and standards that apply to architectural hardware
- risk assessment methods and procedures in the context of architectural hardware
- features and formats of plans, designs and specifications for architectural hardware
- available architectural hardware and/or keying system options and basic requirements for installation
- types and functions of architectural hardware and/or keying system
- environmental factors that impact product selection
- building construction methods and types that impact on architectural hardware
- types and characteristics of different door and frame types
- organisational and client confidentiality requirements
- type of problems associated with architectural hardware systems and how to avoid and respond
- principles of effective communication
- documentation requirements and processes.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - architectural hardware products
  - job specifications and/or requirements

- legislation, codes and standards.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFBA2011 Select and apply hardware and fixings for blinds, awnings, screens and grilles

## Modification History

Release 1. Supersedes and is equivalent to MSFBA2003 Select and apply blinds and awnings hardware and fixings.

## Application

This unit of competency describes the skills and knowledge required to select and use hardware and other fixings in the manufacture and installation of blinds, awnings, and non-security and security screens and grilles.

The unit applies to those working in the blinds, awnings, non-security and security screens and grilles industry, in both residential and commercial environments and small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Unit Sector

Blinds and awnings

## Elements and Performance Criteria

<b>Elements</b>	<b>Performance Criteria</b>	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Plan and prepare work	1.1	Identify hardware and fixing requirements from work order
	1.2	Identify and select types of hardware and fixings required for the work
	1.3	Identify work health and safety (WHS) requirements and personal protection requirements of job according to workplace procedures
	1.4	Identify and select required tools and equipment based on

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
		work order, and check their safe and effective operation
2. Use hardware and fittings	2.1	Lay out hardware items ready for application according to workplace procedures
	2.2	Apply hardware and fixings according to work order instructions and workplace procedures
	2.3	Check work as it progresses against quality standards and work order requirements, and rectify identified deficiencies within scope of own role
3. Finalise selection and use of hardware and fixings	3.1	Clean work area and surfaces, and dispose of waste and scrap materials safely and sustainably according to workplace procedures
	3.2	Collect and store unused hardware and fixings for re-use and disposal according to workplace procedures
	3.3	Check tools and equipment, and tag and report faulty items according to established workplace procedures
	3.4	Clean, maintain and store tools and equipment according to workplace procedures
	3.5	Legibly complete and process required workplace documentation

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.	
Numeracy skills to:	<ul style="list-style-type: none"> <li>• make familiar estimations</li> <li>• measure familiar and predictable quantities and units</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• communicate with site supervisor to:                             <ul style="list-style-type: none"> <li>• confirm work orders and instructions</li> <li>• identify and discuss problems</li> </ul> </li> <li>• communicate with others in work area</li> </ul>

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

Reading skills to:	<ul style="list-style-type: none"><li>interpret routine workplace documentation, including work orders, WHS requirements, and workplace procedures</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>use workplace technology to select and apply hardware and fixings, including specified tools, equipment, calculators, and measuring devices</li></ul>

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFBA2003 Select and apply blinds and awnings hardware and fixings.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFBA2011 Select and apply hardware and fixings for blinds, awnings, screens and grilles

## Modification History

Release 1. Supersedes and is equivalent to MSFBA2003 Select and apply blinds and awnings hardware and fixings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly identify, select and apply hardware and fixings to at least four different styles of blinds, awnings, or non-security and security screens and grilles.

In the course of each of the above, the person must:

- interpret work order and use information to select and apply hardware and fixings
- plan and organise own work activities, including the preparation and layout of work site, and obtaining equipment and materials to avoid backtracking
- select, set up, and maintain tools and equipment according to manufacturer instructions and workplace procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to materials, tools, equipment, hardware, fixings and products
  - maintain required production output and quality
  - use tools, equipment, products and material safely
  - use personal protective equipment (PPE)
  - apply safe lifting and handling procedures
- work with others and in a team when selecting and applying hardware and fixings

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- organisational and site standards, requirements, policies and procedures for applying the hardware and fixings described in the performance evidence
- types, characteristics, uses, maintenance and limitations of the hardware, fixings, tools and equipment used to apply hardware and fixings required in the performance evidence, and procedures for their safe use, operation and maintenance
- features of work orders relating to the work in the performance evidence, and how to identify and interpret key information
- work health and safety (WHS) policies, procedures and regulations specific to work described in performance evidence:

- controlling hazards and risks
- eliminating hazardous materials and substances
- using firefighting equipment and first aid equipment
- using personal protective equipment
- workplace procedures relating to:
  - communicating with site supervisor and others in work area
  - emergency and evacuation
  - manual handling, including lifting and carrying
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines
  - setting up, using, maintaining and storing tools and equipment used when applying hardware and fixings
  - pre-checking and inspection techniques that assist in anticipating production problems, and avoiding rework and wastage
  - quality and continuous improvement processes and standards
  - cleaning and storing tools and equipment
  - storing and labelling surplus unused items
  - tagging and reporting faulty tools and equipment
  - recording and reporting work information
- mathematical methods for estimating and measuring materials and spaces, including factoring in required tolerances
- techniques for using hardware and fixings required for performance evidence that include processes that:
  - conform to quality requirements
  - comply with supplier instructions and manufacturer specifications
  - maximise the appearance of the finished work
  - provide for the most economical use of materials and labour
- key features of documentation relating to work described in performance evidence:
  - work orders
  - work instructions
  - operator instructions and manuals
- key features, uses and techniques for using hardware:
  - cord locks
  - Dyna Bolts
  - head boxes
  - head rails
  - Loxons
  - nails
  - nuts and bolts
  - plugs

- pop rivets
- screws
- split pins
- Tek screws
- wands
- key features, uses, and techniques for using fixings:
  - chemical anchors
  - hollow wall anchors
  - masking tape
  - mungo plugs
  - silicone spray and silastic
  - spring brackets
- key features, uses, and techniques for using tools and equipment:
  - caulking guns
  - drills, including hand, powered and cordless
  - hammers
  - hollow wall anchor guns
  - pop rivet guns
  - screwdrivers, including hand, power and cordless

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to:

- PPE applicable to job requirements, including:
  - hearing protection
  - protective clothing
  - respiratory protection
  - safety footwear
  - safety glasses or goggles
- WHS documentation specific to the performance evidence
- hardware and fixings specified in the knowledge evidence
- workplace documentation, including:
  - work orders
  - customer care cards
  - workplace procedures specified in the knowledge evidence
  - manufacturer specifications
  - time sheets.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# MSFBA2012 Use blinds, awnings, security screens and grilles hand and power tools

## Modification History

Release 1. Changes to code, application, elements, performance criteria. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to select and use hand and power tools to manufacture and install blinds, awnings, security screens and grilles. Workers with this competency use tools to complete routine tasks.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Blinds and awnings

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for tool use	1.1 Identify task requirement from work instructions 1.2 Select the appropriate tool based on task requirements and identify work health and safety requirements for its use 1.3 Confirm serviceability and safety of tool and report any faults to supervisor 1.4 Select equipment to hold or support material based on the tool selected and the nature of the task 1.5 Prepare material and hold in position to ensure safe operation
2. Use tools	2.1 Use tools safely and in accordance with workplace procedures and manufacturer specifications 2.2 Use techniques that optimise the effective use of the tool for the

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	nominated task 2.3 Ensure safe state, position and location of tools in the work area when not in immediate use 2.4 Follow safety procedures for the use of power and the handling of power tools
3. Clean up work area and tools	3.1 Clean tools and equipment using cleaning materials and agents suited to the item 3.2 Complete routine operator maintenance on tools in accordance with workplace procedures and manufacturer instructions 3.3 Store tools and equipment based on specific storage needs and workplace requirements

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures
- Numeracy skills to interpret work instructions associated with number or measurement.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Supersedes and is equivalent to MSFBA2001 Use blinds, awnings security screens and grilles sector hand and power tools

## Links

# Assessment Requirements for MSFBA2012 Use blinds, awnings, security screens and grilles hand and power tools

## Modification History

Release 1. Changes to code, application, elements, performance criteria. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit and demonstrated the ability to:

- choose appropriate hand tools for the manufacture or fitting of blinds, awnings, security screens or grilles and safely use them to workplace quality standards on at least 2 separate occasions, including at least 6 of the following tools:
  - caulking gun
  - clamp
  - eyelet punch
  - file
  - hammer
  - hand grinder
  - hex key
  - laser level or levelling device
  - metal press
  - pipe bender
  - pop rivet gun
  - rollers
  - combination saw or hacksaw,
  - scissors
  - screwdriver
  - spanner or socket set
  - square, measuring device or markers
  - stud finder
  - tap and die sets
  - tape measure
  - tensioning device
  - knives, shears or tin snips
- choose appropriate power tools for the manufacture or fitting of blinds, awnings, security screens or grilles and safely use them to workplace quality standards on at least 2 separate occasions, including at least 2 of the following tools:

- grinder
- drill
- circular, jig, drop, or docking saw
- press-stud machine
- hot knife
- staple gun or hollow wall anchor gun
- planer
- complete operator maintenance on hand and power tools, including sharpening one blade or drill bit or changing the blade on a power saw or planer
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace health and safety procedures
- general use, maintenance and safety requirements, including personal protective equipment (PPE) for hand and power tools used to manufacture and install blinds, awnings, security screens and grilles
- workplace procedures for reporting and recording faulty hand and power tools
- appropriate tools and safety considerations for working with materials commonly encountered in this sector, including at least 2 of the following:
  - textiles (canvas, acrylic, PVC, clear PVC, mesh and binding)
  - metals (aluminium and steel in extruded or sheet form)
  - timber
  - synthetic, aluminium or steel screen material.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - hand and power tools required for performance evidence
  - PPE
  - materials on which tools are used
  - ancillary holding equipment
  - power sources
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFBA2013 Set up, operate and maintain blinds and awnings static machines

## Modification History

Release 1. Changes to code, application, elements, performance criteria. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to safely use static machines, machines that are fixed to a set location for their operation, to produce blinds and awnings. The unit has a focus on the safe use and basic capabilities of a range of static machines commonly used. Workers with this competency follow standard procedures to complete routine tasks.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Blinds and awnings

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements, including time frames, from work documentation and instructions from supervisory staff 1.2 Identify and follow work health and safety requirements, including use of personal protective equipment (PPE) 1.3 Check that cutting tools, templates and other required tools and equipment are available, safe and functional 1.4 Select material for machining and check it meets task quality requirements 1.5 Identify procedures for waste minimisation and energy efficiency while completing task 1.6 Plan work process and work area and prepare and lay out equipment

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	and materials to ensure efficient processes and timely completion of work
2. Set up machines	<p>2.1 Check that emergency stops, gauges, guards, controls and safety equipment are functional prior to machine start-up</p> <p>2.2 Complete machine settings and adjust to meet task requirements in compliance with manufacturer instructions</p> <p>2.3 Complete trial runs to check that machine is fully functional and that finished work meets task accuracy and quality requirements</p> <p>2.4 Make adjustments to machine settings to meet task quality and efficiency requirements</p>
3. Operate machine	<p>3.1 Carry out pre-start checks on equipment in accordance with workplace practices</p> <p>3.2 Feed material into machine in accordance with manufacturer instructions, safe handling procedures and workplace practices</p> <p>3.3 Operate machine in accordance with its designed capacity and purpose and manufacturer specifications using required safety equipment and PPE</p> <p>3.4 Monitor machine operation to ensure product quality and efficient output</p> <p>3.5 Check waste quantities and make adjustments to minimise waste</p> <p>3.6 Identify items that do not meet quality requirements and recycle or discard in accordance with workplace procedure</p> <p>3.7 Record and report machining process and equipment faults to appropriate personnel</p>
4. Complete operator maintenance	<p>4.1 Follow equipment lock-out procedures in accordance with work health and safety legislation and workplace practices</p> <p>4.2 Check cutting tools and remove and replace if blunt or damaged following workplace practices and manufacturer specifications</p> <p>4.3 Keep machining area clear of dust, off-cuts and debris in accordance with work health and safety requirements</p>
5. Clean up work area and maintain equipment	<p>5.1 Clean work area, safely dispose of rubbish and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>5.2 Maintain and store equipment in accordance with manufacturer</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	specifications and workplace practices 5.3 Identify, tag and report faulty equipment in accordance with workplace procedures 5.4 Complete job documentation in accordance with workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation involving drawings and product specifications
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to take accurate measurements, calculate area and estimate material requirements

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFBA2002 Set up, operate and maintain blinds and awnings sector static machines.

## Links

# Assessment Requirements for MSFBA2013 Set up, operate and maintain blinds and awnings static machines

## Modification History

Release 1. Changes to code, application, elements, performance criteria. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- safely set up, operate and complete operator maintenance on at least 3 of the following static machines:
  - computerised fabric cutters
  - computerised Venetian machines
  - docking saw
  - drill press
  - drop cutting machine
  - eyelet machine
  - fabric carousel
  - fabric slitters
  - hoist
  - lathe cutter
  - pelmet blender
  - press stud machine
  - RF welder
  - roller guillotines
  - special crimping pliers
  - tube bender
  - venetian punches
  - vertical blind cutters.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace safety policies and procedures for the use of static machines, including:
  - risk control measures for hazards, including
    - cutting and crushing hazard
    - objects and particles thrown by machine

- noise
- airborne contaminants
- slips, trips and falls
- manual handling injuries, including lifting and carrying
- the use of personal protective equipment (PPE):
  - safety glasses/goggles
  - hearing protection
  - safety footwear
  - protective clothing
  - respiratory protection
- firefighting equipment
- first aid equipment
- how materials respond to machining, including:
  - textiles
  - metal
  - timber
- characteristics of at least 3 of the machine types listed in Performance Evidence, including industry expectations for quality and speed of output, methods for improving energy efficiency, and machine-specific safety requirements
- workplace procedures for:
  - maintaining workplace records and information
  - reporting machinery faults and material defects
  - quality checking
  - acceptable tolerance levels.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - static machines required for performance evidence
  - PPE
  - unprocessed materials to be machined
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFBA2014 Construct metal louvre and canopy-hooded style awnings

## Modification History

Release 1. Changes to code, application, elements, performance criteria. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to cut materials and prepare and assemble metal louvre and canopy-hooded style awnings. Workers with this competency interpret work documents and follow established procedures to complete work and check that it meets quality requirements prior to installation.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Blinds and awnings

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare task	1.1 Identify task requirements from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Select tools and equipment and check that they are safe and functional 1.4 Select materials and hardware and check that they meet task quality requirements.
2. Cut stock and assemble awning	2.1 Cut metal to manufacturer recommendations 2.2 Bend metal to form shape of awning using appropriate equipment 2.3 Assemble awning to specifications
3. Make quality checks	3.1 Check finished awning against work documentation and test within

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	limits of normal operation for correct operation 3.2 Identify, repair or rework parts of the work that do not comply with work order
4. Complete work	4.1 Clean and package completed work with required installation hardware and store in accordance with workplace procedures 4.2 Clean, maintain and store tools and equipment in accordance with procedures and report any faulty tools and equipment to supervisor 4.3 Clean work area and dispose of waste in accordance with workplace procedures 4.4 Complete documentation in accordance with workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate simple information on familiar workplace documents
- Numeracy skills to interpret work instructions associated with number or measurement, take accurate measurements and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Supersedes and is equivalent to MSFBA2009 Construct metal louvre and canopy hooded style awnings.

## Links

Companion Volume implementation guides are found in VETNet - -

# Assessment Requirements for MSFBA2014 Construct metal louvre and canopy-hooded style awnings

## Modification History

Release 1. Changes to code, application, elements, performance criteria. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- construct the following to workplace standards
  - 1 metal louvred awning
  - 1 metal canopy-hooded awning.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- metal louvre and canopy-hooded awnings construction:
  - terms used to describe components
  - metals commonly used
  - steps in the construction process
  - types of tools and static equipment used and procedures for their safe use and maintenance, including at least 4 of the following:
    - drills
    - pop rivet guns
    - screw guns
    - guillotine
    - panel saws
    - benders
    - shears
  - types of hardware components and how they are fitted
  - personal protective equipment requirements
- workplace practices and procedures for:
  - work health and safety
  - environmental protection requirements, including waste minimisation and disposal
  - labelling and storing work
  - records and information.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - tools, equipment and materials required for performance evidence
  - personal protective equipment (PPE)
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFBA3011 Assemble awnings

### Modification History

Release 1. New unit of competency.

### Application

This unit of competency describes the skills and knowledge required to prepare and assemble a range of awnings according to job requirements. The unit involves planning job requirements, identifying required products and components to be assembled and their measurements, and applying workplace procedures to ensure safe and correct assembly.

The unit applies to those assembling any awning for residential and commercial environments. The styles of awning to be assembled include folding-arm and canopy style. The awnings include light-weight domestic, heavy-weight commercial, and fire-rated and cyclone-rated. They may be intended for installation in a range of openings, including windows, doors and building entrances.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Unit Sector

Blinds and awnings

### Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare to assemble awnings	1.1	Identify and confirm job requirements and style of awning to be assembled from work order and supplier instructions
	1.2	Identify work health and safety (WHS) and personal protection requirements of assembly
	1.3	Select tools and equipment, and check their safe and effective operation

Elements	Performance Criteria	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
	1.4	Select materials from stock and check against job requirements
	1.5	Plan logical, safe and efficient work sequence that reflects work order and quality requirements, and economically uses materials
2. Assemble awnings	2.1	Source required materials, equipment, and awning mechanisms in line with work instructions and manufacturer specifications
	2.2	Lay out, measure, mark and cut materials for awning
	2.3	Assemble component parts according to job requirements and manufacturer specifications
	2.4	Finish awning assembly according to work instructions
3. Finalise assembly	3.1	Check that assembled awning complies with quality and work order requirements, and rectify identified deficiencies within scope of own role or report to designated personnel
	3.2	Clean assembled awning according to workplace procedures
	3.3	Check tools and equipment, and tag and report faulty items according to workplace procedures
	3.4	Clean, maintain and store remaining tools and equipment according to workplace procedures
	3.5	Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures
	3.6	Legibly complete and process required workplace documentation according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

Numeracy skills to:	<ul style="list-style-type: none"> <li>interpret, discuss and use mathematical information in work orders, work instructions and awning specifications</li> </ul>
---------------------	---

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.	
	<ul style="list-style-type: none"> <li>• use mathematical information to estimate and measure assembly requirements, including required tolerances</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• communicate ideas and information to confirm work requirements and specifications and report work outcomes and problems:</li> <li>• speaking clearly</li> <li>• asking questions to gain information</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret routine workplace documentation, including:</li> <li>• WHS requirements and procedures</li> <li>• workplace assembly requirements and operator instructions</li> <li>• work orders and instructions</li> <li>• awning specifications, including design, size and quantity</li> </ul>

## Unit Mapping Information

Release 1. New unit of competency. No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFBA3011 Assemble awnings

## Modification History

Release 1. New unit of competency.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly assemble each of the following styles of awnings:
  - roll-up style
  - canopy style
  - folding-arm style, including preparing skin
  - metal louvre style.

In the course of each of the above assemblies, the person must:

- interpret work order, and locate required materials, tools and equipment
- select and set up required product and components according to manufacturer specifications and workplace procedures and quality requirements
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to tools, equipment and products
  - maintain required production output and quality
  - use hand and power tools safely
  - use personal protective equipment (PPE)
- report material faults, damaged products and equipment
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of assembly work orders and supplier instructions relating to the awnings in the performance evidence, and how to identify and interpret key information
- work order requirements, and industry-accepted quality indicators and requirements, relating to assembly work described in performance evidence:
  - key requirements of Australian standards and codes of practice for assembly
  - safety considerations and potential dangers associated with incorrect assembly

- cutting patterns and sequences
- identifying work process problems and resolving within scope of own role
- work health and safety (WHS) legislation, regulations, standards, codes of practice, and procedures specific to assembly work described in performance evidence:
  - legislation and codes of practice relating to child safety mechanisms
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - using firefighting equipment and first aid equipment
  - using personal protective equipment:
    - hearing protection
    - protective clothing and head wear
    - respiratory protection
    - safety footwear
    - safety glasses and goggles
- workplace procedures relating to:
  - communication channels and protocols
  - manual handling, including lifting and carrying
  - safely cutting and assembling awnings
  - following manufacturer instructions and procedures
  - cleaning and storing assembled awnings
  - storing surplus unused items
  - assessing condition of cutting tools
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines
  - using, cleaning, maintaining and storing tools and equipment
  - recording and reporting assembly information
- techniques for measuring, cutting, setting up and assembling awnings described in performance evidence that:
  - conform to quality requirements
  - comply with supplier instructions and manufacturer specifications
  - maximise the appearance of the finished work
  - provide for the most economical use of materials and labour
- mathematical methods for estimating and measuring assembly materials and openings, including factoring in required tolerances
- types of common problems that occur during assembly, and how to avoid and respond
- systems for storing and labelling materials required for assembly work
- types, characteristics, terminology, uses, maintenance and limitations of the following items required for the assembly described in performance evidence:
  - awning components and materials
  - operating mechanisms required for type of awning being assembled

- fittings and attachments, including threads
- tools and equipment used to assemble awnings, and procedures for their safe use, operation and maintenance:
  - cutting tools
  - cutting bench
  - saws
- documentation requirements for assembly work described in performance evidence.

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the assembly described in the performance evidence above, including:

- awnings requiring assembly as specified in the performance evidence
- PPE applicable to job requirements
- WHS documentation specific to the assembly
- tools and equipment specified in the knowledge evidence
- workplace documentation required for assembly work, including:
  - work orders
  - workplace procedures specified in the knowledge evidence
  - supplier instructions and manufacturer specifications.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## MSFBA3012 Assemble interior blinds

### Modification History

Release 1. New unit of competency.

### Application

This unit of competency describes the skills and knowledge required to prepare and assemble a range of interior blinds according to job requirements. The unit involves planning job requirements, identifying required products and components to be assembled and their measurements and applying workplace procedures to ensure safe and correct assembly. The unit does not involve installing the blinds.

The unit applies to those assembling any blind for interior residential and commercial environments. The style of blinds to be assembled include aluminium, plastic or timber Venetian blinds; Roman blinds; roll-up and pull-down blinds; and vertical-style blinds. The blinds may be intended for installation in a range of openings, including windows, fixed and sliding doors, and building entrances. The unit does not apply to assembling wood-weave style blinds.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Unit Sector

Blinds and awnings.

### Elements and Performance Criteria

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare to assemble interior blinds	1.1	Identify and confirm job requirements and style of blind to be assembled from work order and supplier instructions
	1.2	Identify work health and safety (WHS) and personal protection requirements of assembly

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
	1.3	Select tools and equipment, and check their safe and effective operation
	1.4	Select materials from stock and check against job requirements
	1.5	Plan logical, safe and efficient work sequence that reflects work order and quality requirements, and economically uses materials
2. Assemble blinds	2.1	Source required materials, equipment and blind mechanisms in line with work instructions and manufacturer specifications
	2.2	Lay out, measure, mark and cut materials for blind
	2.3	Assemble component parts according to job requirements and manufacturer specifications
	2.4	Finish blind assembly according to work instructions
3. Finalise assembly	3.1	Check that assembled blind complies with quality and work order requirements, and rectify identified deficiencies within scope of own role or report to designated personnel
	3.2	Clean assembled blind according to workplace procedures
	3.3	Check tools and equipment, and tag and report faulty items according to workplace procedures
	3.4	Clean, maintain and store remaining tools and equipment according to workplace procedures
	3.5	Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures
	3.6	Legibly complete and process required workplace documentation according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.	
Numeracy skills to:	<ul style="list-style-type: none"> <li>interpret, discuss and use mathematical information embedded in blind specifications, work orders and instructions</li> <li>use mathematical information to estimate and measure assembly requirements, including required tolerances</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>communicate ideas and information to confirm work requirements and specifications and report work outcomes and problems:</li> <li>speaking clearly</li> <li>asking questions to gain information</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>interpret routine workplace documentation, including:</li> <li>WHS requirements and procedures</li> <li>workplace assembly requirements and operator instructions</li> <li>work orders and instructions</li> <li>blind specifications, including design, size and quantity</li> </ul>

## Unit Mapping Information

Release 1. New unit of competency. No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFBA3012 Assemble interior blinds

## Modification History

Release 1. New unit of competency.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly assemble three of the following interior blinds:
  - aluminium, plastic or timber Venetian
  - pleated style
  - roll-up or pull-down
  - roller
  - wood-weave Roman
  - vertical.

In the course of each of the above assemblies, the person must:

- interpret work order, and locate required materials, tools and equipment
- select and set up required product and components according to manufacturer specifications and workplace procedures and quality requirements
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to tools, equipment and products
  - maintain required production output and quality
  - use hand and power tools safely
  - use personal protective equipment (PPE)
- report material faults, damaged products and equipment
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of assembly work orders and supplier instructions relating to the blinds in the performance evidence, and how to identify and interpret key information

- work order requirements, and industry-accepted quality indicators and requirements, relating to assembly work described in performance evidence:
  - key requirements of Australian standards and codes of practice for assembly
  - safety considerations and potential dangers associated with incorrect assembly
  - cutting patterns and sequences
  - identifying work process problems and resolving within scope of own role
- work health and safety (WHS) legislation, regulations, standards, codes of practice and procedures specific to assembly work described in performance evidence:
  - legislation and codes of practice relating to child safety mechanisms
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - using firefighting equipment and first aid equipment
  - using personal protective equipment:
    - hearing protection
    - protective clothing and head wear
    - respiratory protection
    - safety footwear
    - safety glasses and goggles
- workplace procedures relating to:
  - communication channels and protocols
  - manual handling, including lifting and carrying
  - safely cutting and assembling blinds
  - following manufacturer instructions and procedures
  - responding to emergencies and evacuations
  - cleaning and storing completed assembled blinds
  - storing surplus unused items
  - assessing condition of cutting tools
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines
  - using, cleaning, maintaining and storing tools and equipment
  - recording and reporting assembly information
- techniques for measuring, cutting, setting up and assembling blinds described in performance evidence that:
  - conform to quality requirements
  - comply with supplier instructions and manufacturer specifications
  - maximise the appearance of the finished work
  - provide for the most economical use of materials and labour
- mathematical methods for estimating and measuring assembly materials and openings, including factoring in required tolerances

- types of common problems that occur during assembly, and how to avoid and respond
- systems for storing and labelling materials required for assembly work
- types, characteristics, terminology, uses, maintenance and limitations of the following items required for the assembly described in performance evidence:
  - blind components and materials
  - operating mechanisms required for type of blind being assembled
  - fittings and attachments, including threads
  - tools and equipment used to assemble blinds, and procedures for their safe use, operation and maintenance:
    - cutting tools
    - cutting bench
    - saws
- documentation requirements for assembly work described in performance evidence.

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the assembly described in the performance evidence above, including:

- blinds specified in the performance evidence
- PPE applicable to job requirements
- WHS documentation specific to the assembly
- tools and equipment specified in the knowledge evidence
- workplace documentation required for each assembly process, including:
  - work orders
  - workplace procedures
  - supplier instructions and manufacturer specifications.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## MSFBA3014 Assemble pelmets

### Modification History

Release 1. Supersedes and is equivalent to MSFBA3008 Construct pelmets.

### Application

This unit of competency describes the skills and knowledge required to cut, prepare and assemble pelmet components for interior blind installations according to job requirements. The unit involves planning job requirements, identifying required pelmets and components to be used, and applying workplace procedures to ensure safe and correct assembly. The unit does not involve installing pelmets.

The unit applies to those assembling pelmets for any interior residential or commercial environment. The pelmets may be for a range of interior blinds, including aluminium, plastic or timber Venetian blinds; and Roman, roller or vertical blinds.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Unit Sector

Blinds and awnings.

### Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare for pelmet assembly	1.1	Identify job and pelmet requirements from work order and supplier instructions
	1.2	Identify work health and safety (WHS) and personal protection requirements of assembly according to workplace procedures
	1.3	Identify and select required materials, hardware, components, tools and equipment based on work order, and check their safe and effective operation

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
	1.4	Plan logical, safe and efficient work sequence that reflects work order and quality requirements, and economically uses materials
2. Prepare and assemble pelmet components	2.1	Set up required materials and equipment in line with work instructions and manufacturer specifications
	2.2	Measure and cut components to specification and lay out ready for assembly according to workplace procedures
	2.3	Assemble components according to work instructions
	2.4	Monitor work operations to identify problems and resolve within scope of own role or report to designated personnel in line with workplace procedures
3. Finalise assembly	3.1	Check that completed assembled pelmet complies with quality and work order requirements, and rectify identified deficiencies within scope of own role
	3.2	Clean, package and store completed pelmet according to workplace procedures
	3.3	Check tools and equipment, and tag and report faulty items according to workplace procedures
	3.4	Clean, maintain and store remaining tools and equipment according to workplace procedures
	3.5	Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures
	3.6	Legibly complete and process required workplace documentation according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret, discuss and use mathematical information in pelmet specifications, work orders and instructions</li> <li>• use mathematical information to estimate and measure assembly requirements, including required tolerances</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• communicate ideas and information to confirm work requirements and specifications and report work outcomes and problems:             <ul style="list-style-type: none"> <li>• speaking clearly</li> <li>• asking questions to gain information</li> </ul> </li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret routine workplace documentation, including:             <ul style="list-style-type: none"> <li>• WHS requirements and procedures</li> <li>• assembly requirements</li> <li>• work orders and pelmet specifications, including design, size, colour and quantity</li> </ul> </li> </ul>

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFBA3008 Construct pelmets.

# Assessment Requirements for MSFBA3014 Assemble pelmets

## Modification History

Release 1. Supersedes and is equivalent to MSFBA3008 Construct pelmets.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- cut pelmet component materials according to work orders to within +/- 1 mm and safely and correctly assemble pelmets for at least four of the following different styles of internal blinds:
- aluminium Venetian blinds
- plastic or timber Venetian blinds
- roller blinds
- Roman blinds
- vertical blinds.

One of the above four assemblies must be for a bay window, box bay window or corner window.

In the course of the four assemblies, the following pelmets must be assembled:

- metal
- timber
- wood weave.

In the course of each of the above assemblies, the person must:

- interpret work order and locate required materials, tools and equipment
- select and set up required product and components according to manufacturer specifications, workplace procedures and quality requirements
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to tools, equipment and products
  - maintain required production output and quality
  - use hand and power tools safely
  - use personal protective equipment (PPE)
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage
- identify and resolve routine problems and faults encountered.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of assembly work orders and supplier instructions relating to the pelmets in the performance evidence, and how to identify and interpret key information
- work order requirements, and industry-accepted quality indicators and requirements, relating to assembly work described in performance evidence:
  - key requirements of Australian standards and codes of practice for assembly
  - safety considerations and potential dangers associated with incorrect assembly
  - cutting patterns and sequences
  - typical work process problems and ways of resolving within scope of own role
- work health and safety (WHS) regulations, standards, procedures and practices specific to assembly work described in performance evidence:
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - using firefighting equipment and first aid equipment
  - using personal protective equipment:
    - hearing protection
    - protective clothing and head wear
    - respiratory protection
    - safety footwear
    - safety glasses and goggles
- workplace procedures relating to:
  - communication channels and protocols
  - manual handling, including lifting and carrying
  - safely cutting and assembling pelmets
  - following manufacturer instructions and procedures
  - responding to emergencies and evacuations
  - cleaning, packaging and storing completed assembled pelmets
  - storing surplus unused items
  - assessing condition of cutting tools
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines
  - using, cleaning, maintaining and storing tools and equipment
  - recording and reporting assembly information
- techniques for measuring, cutting, setting up and assembling blinds described in performance evidence that:
  - conform to quality requirements
  - comply with supplier instructions and manufacturer specifications
  - maximise the appearance of finished work

- provide for economical use of materials and labour
- mathematical methods for estimating and measuring assembly materials and openings, including factoring in required tolerances
- types of common problems that occur during assembly, and how to avoid and respond
- systems for storing and labelling materials required for assembly work and assembled pelmets
- types, characteristics, terminology, uses, maintenance and limitations of the following items required for the assembly described in performance evidence:
  - pelmet components and materials
  - operating mechanisms
  - fittings and attachments
  - tools and equipment:
    - cutting tools
    - drills
    - glue guns
    - hammers
    - pop rivet guns
    - saws
    - screwdrivers
  - hardware:
    - screws
    - nails
    - pop rivets
- documentation requirements for assembly work described in performance evidence.

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the assembly described in the performance evidence above, including:

- pelmets for blinds specified in the performance evidence
- PPE applicable to job requirements:
  - hearing protection
  - protective clothing and head wear
  - respiratory protection
  - safety footwear
  - safety glasses or goggles
- WHS documentation specific to the assembly
- tools and equipment specified in the knowledge evidence
- workplace documentation required for each assembly process, including:

- work orders
- workplace procedures
- supplier instructions and manufacturer specifications.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## MSFBA3015 Install louvre shutters

### Modification History

Release 1. Supersedes but is not equivalent to MSFBA3003 Install timber shutters.

### Application

This unit of competency describes the skills and knowledge required to identify work requirements and then install louvre shutters according to job requirements. The unit involves planning job requirements, identifying required shutter products to be used and their measurements and fasteners, and applying workplace procedures to ensure their safe and correct installation.

The unit applies to those installing interior and exterior louvre shutters in residential and commercial environments. The shutters may be installed on a range of surfaces, including aluminium, ceramic tiles, porcelain tiles, concrete, masonry, plasterboard and timber.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Unit Sector

Blinds and awnings.

### Elements and Performance Criteria

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare for installation of louvre shutters	1.1	Identify job and shutter requirements from work order and supplier instructions
	1.2	Complete a check measure on site and document required product specifications and specific access and installation requirements
	1.3	Identify work health and safety (WHS) and personal protection requirements of installation according to workplace procedures

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
	1.4	Identify and select required materials, tools, equipment and accessories based on work order, and check their safe and effective operation
	1.5	Schedule installation and agree access arrangements to site
	1.6	Plan logical, safe and efficient work sequence that reflects work order and quality requirements
2. Install louvre shutters	2.1	Inspect installation site in consultation with customer, confirm type of shutter to be installed, and address job, site and customer-specific technical and safety requirements
	2.2	Set up required materials, equipment and shutter mechanisms in line with work instructions and manufacturer specifications
	2.3	Fit shutter to opening according to work order and manufacturer specifications
	2.4	Fasten shutter according to shutter type, work order and opening surface; and using fastening tools in line with supplier instructions and workplace procedures
	2.5	Test installed shutter for correct operation within limits of normal operation, and adjust and repair performance problems in line with own level of responsibility
3. Finalise installation	3.1	Check that completed work complies with quality and work order requirements, and rectify identified deficiencies within scope of own role
	3.2	Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures
	3.3	Identify and store surplus unused items for re-use and recycling according to workplace procedures
	3.4	Check tools and equipment, and tag and report faulty items according to workplace procedures
	3.5	Clean and store remaining tools and equipment according to workplace procedures

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
	3.6	Advise customer on correct operation and maintenance of louvre shutters
	3.7	Legibly complete and process required workplace and customer documentation according to workplace requirements

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.	
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret, discuss and use mathematical information in routine workplace documentation</li> <li>• process customer documentation, including required invoicing and receipting</li> <li>• keep records of hours worked, quantity of items used and additional routine costs</li> <li>• estimate and measure materials and installation spaces, including factoring in required tolerances</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• discuss and negotiate site access, installation requirements, and correct operation of louvre shutters with a range of customers, including real estate agents, body corporate representatives, builders, home owners, and tenants:               <ul style="list-style-type: none"> <li>• speaking clearly</li> <li>• applying effective listening techniques</li> <li>• asking questions to gain information</li> </ul> </li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret routine workplace documentation, including work orders, WHS requirements and workplace installation procedures</li> </ul>

## Unit Mapping Information

Release 1. Supersedes but is not equivalent to MSFBA3003 Install timber shutters.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFBA3015 Install louvre shutters

## Modification History

Release 1. Supersedes but is not equivalent to MSFBA3003 Install timber shutters.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly install one of each of the following types of louvre shutters:
  - one interior louvre shutter for a residential building
  - one interior louvre bi-fold shutter for either a residential or commercial building
  - one interior louvre bi-pass shutter for either a residential or commercial building
  - one special-shaped interior louvre shutter for either a residential or commercial building, based on the template created by candidate for that purpose
  - one exterior louvre shutter for a residential building
  - one exterior louvre shutter for a commercial building.

One of the above interior installations must be in a bay window, box bay window, or corner window.

One of the above exterior installations must be above ground level and demonstrate the safe and correct use of lifting equipment.

In the course of each of the above installations, the person must:

- interpret work order and locate and use materials, tools and equipment required for the installation
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to site, tools, equipment and products
  - maintain required production output and quality
  - use hand and power tools safely
  - use personal protective equipment (PPE)
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage
- identify and resolve routine problems and faults encountered
- work with others, recognising dependencies and using cooperative approaches to optimise work flow and productivity.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of installation work orders and supplier instructions relating to the types of louvre shutters in the performance evidence, and how to identify and interpret key information
- work order requirements, and industry-accepted quality indicators and requirements, relating to installations described in performance evidence:
  - key requirements of Australian standards and codes of practice for individual installers
  - building code requirements specific to installation described in performance evidence
  - safety considerations and potential dangers associated with incorrect installation
  - wind zoning requirements relating to exterior louvre shutters
- operation and maintenance requirements of louvre shutters in performance evidence
- emerging trends in installing louvre shutters, including new materials used and their associated energy ratings and fire retardant attributes
- work health and safety (WHS) procedures, practices and regulations specific to installations described in performance evidence:
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - managing rain and wind resistance during installation
  - using firefighting equipment and first aid equipment
  - operating lifting equipment
  - using personal protective equipment
- workplace procedures relating to:
  - communicating work requirements with customers
  - scheduling installation
  - accessing and inspecting installation sites
  - manual handling, including lifting and carrying
  - safely installing and fastening louvre shutters
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines
  - cleaning and storing tools and equipment
  - storing surplus unused items
  - recording and reporting installation information
  - presenting invoices, and collecting and receipting payments
- techniques for installing electric and manual shutter control devices:
  - electric, including radio-controlled remote devices and photocell sensor devices using 240V mains power, and 12V rechargeable solar and battery-operated control
  - manual, including winders and straps
- effect of site characteristics and access restrictions on installation equipment selection and use

- techniques for installing and fastening louvre shutters described in performance evidence, including:
  - on surfaces made of:
    - aluminium
    - ceramic and porcelain tiles
    - concrete
    - masonry
    - plasterboard
    - timber
  - fastening agents:
    - adhesive tape
    - nails
    - screws
  - installing and fastening that:
    - conform to quality requirements
    - comply with supplier instructions and manufacturer specifications
    - maximise appearance of the finished work
    - provide for the most economical use of materials and labour
- mathematical methods for estimating and measuring materials and installation spaces, including factoring in required tolerances
- types of common problems that occur during installation, and how to avoid and respond
- types, characteristics, uses, maintenance and limitations of the following items required for the installations described in performance evidence:
  - products and materials specific to louvre shutter installation:
    - fastening products, including adhesive tape, Dyna Bolts, masonry anchors, nails, nuts and bolts and screws
    - fillers, including caulking, cover strips and filler strips
    - shutter hardware, including hinges and mounting brackets
    - track systems
  - tools and equipment:
    - hand tools, including caulking gun, scissors, screwdrivers and tape measure
    - power tools, including coping saw, docking saw, jigsaw and power drill
    - equipment, including ladders, drop sheets, barriers, cones, signs and lifting equipment
- documentation requirements for installation work described in performance evidence.

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the installation described in the performance evidence above, including:

- louvre shutters requiring installation as specified in the performance evidence
- PPE applicable to job requirements
- WHS documentation specific to the installation
- tools and equipment specified in the knowledge evidence
- workplace documentation required for each installation, including:
  - work quotations and work orders
  - workplace procedures specified in the knowledge evidence
  - supplier instructions and manufacturer specifications
  - customer care cards
  - customer invoices and receipts
  - time sheets.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## MSFBA3016 Install awnings

### Modification History

Release 1. Supersedes but is not equivalent to MSFBA3002 Install exterior blinds and awnings.

### Application

This unit of competency describes the skills and knowledge required to install awnings according to job requirements. The unit involves planning job requirements, identifying required products to be used and their measurements and fasteners, and applying workplace procedures to ensure safe and correct installation.

The unit applies to those installing awnings in residential and commercial environments. The style of awning to be installed may be aluminium roll-up, folding-arm, metal-hooded canopy, textile canopy or metal louvre. The material used in the awnings may be light-weight domestic, heavy-weight commercial, fire-rated or cyclone-rated. The awnings may be installed in a range of openings, including windows; fixed and sliding doors; and building entrances. They may be installed on a range of surfaces, including aluminium, concrete, masonry, plasterboard, steel and timber.

Where installed control devices involve wiring to be connected to mains power, electrical work must be completed by a qualified licensed electrician.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Unit Sector

Blinds and awnings.

### Elements and Performance Criteria

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare for installation of awning	1.1	Identify job and awning requirements from work order and supplier instructions

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
	1.2	Complete a check measure on site and document required product specifications and specific access and installation requirements
	1.3	Identify work health and safety (WHS) and personal protection requirements of installation according to workplace procedures
	1.4	Identify and select required materials, tools, equipment and accessories based on work order, and check their safe and effective operation
	1.5	Schedule installation and agree access arrangements to site
	1.6	Plan logical, safe and efficient work sequence that reflects work order
2. Install awning	2.1	Inspect installation site in consultation with customer, confirm type of awnings to be installed, and address job, site and customer-specific technical and safety requirements
	2.2	Set up required materials, equipment and awning mechanisms in line with work instructions and manufacturer specifications
	2.3	Fit awnings to openings according to work order, type of control system and manufacturer specifications
	2.4	Fix awnings according to type, work order and opening surface using fixing hardware in line with supplier instructions and workplace procedures
	2.5	Test installed awnings for correct operation within limits of normal operation, and adjust and repair performance problems in line with own level of responsibility
3. Finalise installation	3.1	Check that completed work complies with quality and work order requirements, and rectify identified deficiencies
	3.2	Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures
	3.3	Identify and store surplus unused items for re-use and recycling according to workplace procedures

<b>Elements</b>	<b>Performance Criteria</b>

# Assessment Requirements for MSFBA3016 Install awnings

## Modification History

Release 1. Supersedes but is not equivalent to MSFBA3002 Install exterior blinds and awnings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly install one of each of the following types of exterior awnings:
  - one manual pull-down awning for a residential building
  - one motorised roll-up awning for a commercial building
  - one awning for a residential building that is either a metal hooded canopy or a textile canopy
  - one folding-arm awning for a commercial building that is fitted with an electric wind sensor control device.

One of the above installations must be above ground level and demonstrate the safe and correct use of lifting equipment.

One of the above motorised control devices must be a 240V device connected to mains power; and one a 12V rechargeable solar or battery-operated device.

In the course of each of the above installations, the person must:

- interpret work order and locate components, materials, tools and equipment required for the installation
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to site, tools, equipment and products
  - maintain required production output and quality
  - use fixing hardware, hand and power tools safely
  - use personal protective equipment (PPE)
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions, and wastage
- identify and resolve routine problems and faults encountered
- work with others, recognising dependencies and using cooperative approaches to optimise work flow and productivity.

In installing the suite of awnings, the candidate must demonstrate the ability to:

- install in at least two of the following different openings:
  - door or window

- sliding door
- wide-span opening 3 metres or above
- fasten to at least two of the following different surfaces:
  - aluminium
  - concrete
  - masonry
  - plasterboard
  - steel
  - timber.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of installation work orders and supplier instructions relating to the types of awnings in the performance evidence, and how to identify and interpret key information
- work order requirements, and industry-accepted quality indicators and requirements, relating to installations described in performance evidence:
  - key requirements of Australian standards and codes of practice for individual installers
  - building code requirements specific to installation described in performance evidence
  - safety considerations and potential dangers associated with incorrect installation
  - wind zoning requirements
- operation and maintenance requirements of awnings in performance evidence
- emerging trends in installing awnings, including new materials used in face, reveal and packing and their associated energy ratings and fire retardant attributes
- work health and safety (WHS) procedures, practices and regulations specific to installations described in performance evidence:
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - managing rain and wind resistance during installation
  - using firefighting equipment and first aid equipment
  - operating lifting equipment
  - using personal protective equipment
- workplace procedures relating to:
  - communicating work requirements with customers
  - scheduling installation
  - accessing and inspecting installation sites
  - manual handling, including lifting and carrying
  - safely installing and fastening awnings
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines

- cleaning and storing tools and equipment
- storing surplus unused items
- recording and reporting installation information
- presenting invoices, and collecting and receipting payments
- techniques for installing electric and manual control devices:
  - electric, including radio-controlled remote devices and photocell sensor devices using 240V mains power, and 12V rechargeable solar and battery-operated control
  - manual, including wands and pull sticks
- effect of site characteristics and access restrictions on installation equipment selection and use
- techniques for installing and fastening awnings described in performance evidence, including:
  - in openings made of:
    - aluminium
    - concrete
    - masonry
    - plasterboard
    - steel
    - timber
  - installing and fixing that:
    - conform to quality requirements
    - comply with supplier instructions and manufacturer specifications
    - maximise the appearance of the finished work
    - provide for the most economical use of materials and labour
- mathematical methods for estimating and measuring installation openings, including factoring in required tolerances
- requirements and procedures for using qualified licensed electricians when installation and control devices involve mains power
- types of common problems that occur during installation, and how to avoid and respond
- types, characteristics, uses, maintenance and limitations of the following items required for the installations described in performance evidence:
  - awning products and materials
  - special application brackets
  - operating mechanisms required for type of awnings being installed, including radio-controlled remote devices and photocell sensor devices
  - specialised fixing hardware used for the different types of awnings:
    - Dyna Bolts
    - masonry anchors
    - mounting brackets
    - nuts and bolts
    - screws, including hex screws

- tools and equipment:
  - hand tools, including drills, screwdrivers, hex keys and snip cutters
  - power tools, including 240V mains connected and 12V rechargeable solar and battery-operated
  - equipment, including ladders, drop sheets, barriers, cones, signs and lifting equipment
- documentation requirements for installation work described in performance evidence.

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the installation described in the performance evidence above, including:

- awnings requiring installation as specified in the performance evidence
- PPE applicable to job requirements
- WHS documentation specific to the installation
- fixing hardware, tools and equipment specified in the knowledge evidence
- control devices for awnings being installed
- workplace documentation required for each installation, including:
  - work orders, customer orders, job cards and work quotations
  - workplace procedures specified in the knowledge evidence
  - supplier instructions and manufacturer specifications
  - customer care cards
  - customer invoices and receipts
  - time sheets.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## MSFBA3017 Install interior blinds

### Modification History

Release 1. Supersedes and is equivalent to MSFBA3001 Install interior blinds.

### Application

This unit of competency describes the skills and knowledge required to identify work requirements and then install interior blinds according to specifications. The unit involves planning job requirements, identifying required blind products, fittings, and attachments to be used, and applying workplace procedures to ensure their safe and correct installation.

The unit applies to those installing blinds in any interior space of residential and commercial environments. The style of blinds to be installed includes aluminium, plastic or timber Venetian, Roman, roller, and vertical blinds. The blinds may be installed on a range of surfaces, including concrete, masonry, plasterboard and timber.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Unit Sector

Blinds and awnings.

### Elements and Performance Criteria

Elements	Performance Criteria	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare for installation of interior blind	1.1	Identify job and blind requirements from work order and supplier instructions
	1.2	Identify work health and safety (WHS) and personal protection requirements of installation according to workplace procedures
	1.3	Identify and select required materials, tools, equipment and accessories based on work order, and check their safe and

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
		effective operation
	1.4	Schedule installation and agree access arrangements to site
	1.5	Plan logical, safe and efficient work sequence that reflects work order and quality requirements
2. Install interior blind	2.1	Inspect installation site in consultation with customer, confirm blind to be installed, and address job, site and customer-specific technical and safety requirements
	2.2	Set up required materials, equipment and blind mechanisms in line with work instructions and manufacturer specifications
	2.3	Fit pelmets and cord brackets using required hardware and adjust to suit blind operation according to workplace procedures
	2.4	Fit blind and pulley according to work order, design requirements and manufacturer specifications
	2.5	Test installed blind for correct operation within limits of normal operation, and adjust and repair performance problems in line with own level of responsibility
3. Finalise installation	3.1	Check that completed work complies with quality and work order requirements and rectify identified deficiencies
	3.2	Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures
	3.3	Identify and store surplus unused items for re-use and recycling according to workplace procedures
	3.4	Check tools and equipment, and tag and report faulty items according to workplace procedures
	3.5	Clean and store remaining tools and equipment according to workplace procedures
	3.6	Advise customer on correct operation and maintenance of blind
	3.7	Legibly complete and process required workplace and customer documentation according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.	
Numeracy skills to:	<ul style="list-style-type: none"> <li>interpret, discuss and use mathematical information in routine workplace documentation</li> <li>process customer documentation, including required invoicing and receipting</li> <li>keep records of hours worked, quantity of items used and additional routine costs</li> <li>estimate and measure installation materials and spaces, including factoring in required tolerances</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>discuss and negotiate site access, installation requirements and correct operation of blinds with a range of customers, including real estate agents, body corporate representatives, builders, home owners, and tenants:</li> <li>speaking clearly</li> <li>applying effective listening techniques</li> <li>asking questions to gain information</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>interpret routine workplace documentation, including work orders, WHS requirements and workplace installation procedures</li> </ul>

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFBA3001 Install interior blinds.

## Links

# Assessment Requirements for MSFBA3017 Install interior blinds

## Modification History

Release 1. Supersedes and is equivalent to MSFBA3001 Install interior blinds.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly install at least four of the following interior blinds:
  - aluminium Venetian blinds
  - plastic or timber Venetian blinds
  - roller blinds
  - Roman blinds
  - vertical blinds.

One of the above four installations must be in a bay window, box bay window, or corner window or door.

In the course of each of the above installations, the person must:

- interpret work order and locate materials, tools and equipment required for the installation
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to site, tools, equipment and products
  - maintain required production output and quality
  - use hand and power tools safely
  - use personal protective equipment (PPE)
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage
- identify and resolve routine problems and faults encountered
- work with others, recognising dependencies and using cooperative approaches to optimise work flow and productivity.

In installing the suite of blinds, the candidate must also demonstrate the ability to install on the following surfaces:

- concrete or masonry
- plasterboard or timber.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of installation work orders and supplier instructions relating to the styles of interior blinds in the performance evidence, and how to identify and interpret key information
- work order requirements, and industry-accepted quality indicators and requirements, relating to installations described in performance evidence:
  - key requirements of Australian standards and codes of practice for individual installers
  - consumer product safety standards and requirements associated with domestic corded internal window blinds
  - safety considerations and potential dangers associated with incorrect installation
- operation and maintenance requirements of blinds in performance evidence
- emerging trends in installing interior blinds, including new materials and their associated energy ratings and fire retardant attributes
- work health and safety (WHS) procedures, practices and regulations specific to installations described in performance evidence:
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - using firefighting equipment and first aid equipment
  - using personal protective equipment
- workplace procedures relating to:
  - communicating work requirements with customers
  - scheduling installation
  - accessing and inspecting installation sites
  - manual handling, including lifting and carrying
  - safely installing and securing blinds
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines
  - cleaning and storing tools and equipment
  - storing surplus unused items
  - recording and reporting installation information
  - presenting invoices, and collecting and receipting payments
- techniques for installing and securing blinds described in performance evidence that include attachment processes that:
  - conform to quality requirements
  - comply with supplier instructions and manufacturer specifications
  - maximise the appearance of the finished work
  - provide for economical use of materials and labour
- effect of site characteristics and access restrictions on equipment selection and use
- mathematical methods for estimating and measuring installation materials and spaces, including factoring in required tolerances
- types of common problems that occur during installation, and how to avoid and respond

- tools and equipment required for the installations described in performance evidence:
  - hand tools, including drills, hammers, ladders and screwdrivers
  - power tools required to install interior blinds described in performance evidence
  - equipment, including drop sheets and ladders
  - materials, including bolts, masonry anchors, nails and screws
  - fittings and attachments, including mounting brackets and operating mechanisms
- systems for storing and labelling materials required for the installation work
- types, characteristics, uses, maintenance, and limitations of the following items required for the installations described in performance evidence:
  - blind products and materials
  - operating mechanisms required for style of interior blind being installed
  - fittings and attachments
  - tools and equipment
- documentation requirements for installation work described in performance evidence.

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the installation described in the performance evidence above, including:

- blind styles requiring installation and installation locations specified in the performance evidence
- PPE applicable to job requirements
- WHS documentation specific to the installation
- tools and equipment specified in the knowledge evidence
- workplace documentation required for each installation, including:
  - work orders, customer orders, job cards and work quotations
  - workplace procedures specified in the knowledge evidence
  - supplier instructions and manufacturer specifications
  - customer invoices and receipts
  - time sheets.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## MSFBA3018 Assess suitability of blinds and awnings

### Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFBA3010 Assess suitability of blinds or awnings.

### Application

This unit of competency describes the skills and knowledge required to assess the suitability of blinds and awnings in a range of environments taking into account building structure, natural environmental constraints, regulations and legislation.

The unit applies in those assessing the suitability of blinds and awnings for both residential and commercial environments in small to large scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Unit Sector

Blinds and awnings

### Elements and Performance Criteria

Elements	Performance Criteria	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Develop and maintain knowledge of blind and awning products	1.1	Research and analyse information on characteristics of blind and awning product and component characteristics
	1.2	Collect and organise materials, product samples and visual aids for future retrieval and use
	1.3	Research and analyse information on building styles, building codes, regulations and legislation required for assessing suitability of blind and awning products
2. Assess suitability of	2.1	Review work instructions to establish customer requirements

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
blind and awning products for customer requirements, and building and location	2.2	Inspect location for product observing work health and safety (WHS) requirements
	2.3	Assess restrictions and limitations of building and natural environment
	2.4	Assess restrictions and limitations of blind and awning products
3. Provide advice to customer following assessment on suitability of blind and awning products	3.1	Explain characteristics of product to customer using sample materials, visual aids and product specifications
	3.2	Explain building covenant and other regulations and legislative requirements relevant to product, building and location to customer
	3.3	Select range of suggested product styles and materials, and present to customer for evaluation
	3.4	Discuss and respond to customer queries using examples to illustrate advice on finished products
4. Finalise assessment	4.1	Return sample products to storage
	4.2	Prepare report of recommended product costing and overall estimate
	4.3	Present assessment and costing information to customer

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret, use and discuss mathematical information in workplace documentation</li> <li>• use a blend of personal ‘in-the-head’ methods and formal methods to calculate routine and familiar costs</li> <li>• use a calculator to calculate and compare costs of blinds and awnings</li> </ul>
---------------------	---

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.	
	<ul style="list-style-type: none"> <li>estimate and measure blinds, awnings and their installation locations</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>greet and interact with customers in a professional manner</li> <li>use questioning and active listening techniques to identify and clarify customer requirements</li> <li>express own opinion clearly using sufficiently broad vocabulary</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>interpret at times complex workplace documentation, including building covenants and other regulations and legislative requirements specific to the assessment</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>use ICT-based tools to access blind and awning product information</li> <li>organise and maintain product information in an easily accessible manner</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>write simple notes of research findings</li> <li>legibly document assessment outcomes, including product costings</li> </ul>

## Unit Mapping Information

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFBA3010 Assess suitability of blinds or awnings

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFBA3018 Assess suitability of blinds and awnings

## Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFBA3010 Assess suitability of blinds or awnings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- assess each of the following requirements for blinds and awnings, and provide a suitable and practical assessment in line with customer requirements:
  - awning in a residential property
  - exterior blinds in a multi-story commercial property
  - awning on a ground level commercial property abutting a natural feature of cultural significance
  - exterior blinds in a bushfire-prone location
- work with others, recognising dependencies and using cooperative approaches to optimise work flow and productivity.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legislation, regulations, standards and codes of practice applicable to assessment of suitability of blinds and awnings described in the performance evidence:
  - codes relating to wind loads, fire attenuation and set backs
  - building covenants and heritage trust
  - body corporate requirements
  - environmental requirements and constraints
  - work health and safety (WHS) requirements
- standards and requirements specific to site, and policies and procedures for assessing suitability of blinds and awnings for situations
- sources of authoritative and current information on blinds and awnings specified in performance evidence
- types of tools and equipment used for assessing suitability of blinds and awnings for situations, and procedures for their safe use, operation and maintenance
- types and styles of buildings, and legislation that applies to their construction, modification and decoration
- terms used to describe components of blinds and awnings

- sources of authoritative and current information on products relating to assessment services described in performance evidence
- workplace procedures relating to:
  - assessing suitability of blinds and awnings
  - customer service standards
  - communicating product information to customers, including presentation methods
  - recording and reporting outcomes of customer discussion
  - storing and retrieving product information
  - documenting, communicating, reporting and retrieving assessment-related information
- products suitable to customer location
- emerging trends in blinds and awnings, including new materials and their associated energy ratings and fire-retardant attributes
- key features and characteristics of products and components used in the construction and installation of blinds and awnings, including features described in:
  - product instructions and specification sheets
  - service conditions
  - manufacturer specifications
  - special requirements
- restrictions and limitations on suitability of blinds and awnings:
  - building, including materials, height, architectural integrity, structure and access
  - natural environment, including overhang, space and height
  - weather, including wind rating and rainfall
  - directional perspective, including north, south, east and west facing
- impact of the following customer requirements on suitability of blind and awning product:
  - advertising and branding
  - darkening effects
  - decoration
  - insulation
  - light dispersal
  - noise reduction
  - presenting a professional image
  - privacy
  - sun protection
  - weather protection
- principles and techniques of customer service
- mathematical methods for estimating and measuring blinds, awnings and their installation locations.

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to:

- authoritative sources of information relating to range of products that apply to assessment in performance evidence
- computer with access to the internet
- product samples, materials and visual aids relating to products, including:
  - magazines
  - photographs
  - software presentations
  - sketches
  - trade brochures
- legislation, regulations, standards, codes of practice and workplace procedures specified in knowledge evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## MSFBA3019 Assemble roller shutters

### Modification History

Release 1. New unit of competency.

### Application

This unit of competency describes the skills and knowledge required to identify and assemble roller shutters according to job requirements. The unit involves planning job requirements, identifying required shutter products to be assembled and their measurements, and applying workplace procedures to ensure safe and correct assembly. The unit does not involve installing the roller shutters.

The unit applies to those assembling residential and commercial roller shutters, which can include light-weight domestic, heavy-weight commercial, and fire-rated and cyclone-rated shutters. The shutters may be required for a range of openings, including windows, fixed and sliding doors, building entrances, and inside and exterior to buildings.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Unit Sector

Blinds and awnings

### Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare to assemble roller shutters	1.1	Identify and confirm job requirements and style of shutter to be assembled from work order and supplier instructions
	1.2	Identify work health and safety (WHS) and personal protection requirements of assembly according to workplace procedures
	1.3	Select tools and equipment, and check their safe and effective operation

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
	1.4	Select materials from stock and check against job requirements
	1.5	Plan logical, safe and efficient work sequence that reflects work order and quality requirements, and economically uses materials
2. Assemble roller shutters	2.1	Source required materials, equipment and shutter mechanisms in line with work instructions and manufacturer specifications
	2.2	Lay out, measure, mark and cut materials for shutter according to workplace procedures
	2.3	Assemble component parts according to job requirements and manufacturer specifications
	2.4	Finish shutter assembly according to work instructions
3. Finalise assembly	3.1	Check that assembled shutter complies with quality and work order requirements, and rectify identified deficiencies within scope of own role or report to designated personnel
	3.2	Clean assembled shutter according to workplace procedures
	3.3	Check tools and equipment, and tag and report faulty items according to workplace procedures
	3.4	Clean, maintain and store remaining tools and equipment according to workplace procedures
	3.5	Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures
	3.6	Legibly complete and process required workplace documentation according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

Numeracy skills to:	<ul style="list-style-type: none"> <li>interpret and discuss mathematical information in shutter specifications, work orders and instructions</li> <li>use mathematical information to correctly estimate and measure assembly requirements, including required tolerances</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>communicate information to confirm work requirements and specifications and report work outcomes and problems:</li> <li>speaking clearly</li> <li>asking questions to gain information</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>interpret routine workplace documentation, including:</li> <li>WHS requirements and procedures</li> <li>workplace assembly requirements and operator instructions</li> <li>work orders and instructions</li> <li>shutter specifications, including design, size and quantity</li> </ul>

## Unit Mapping Information

Release 1. New unit of competency. No equivalent unit

# Assessment Requirements for MSFBA3019 Assemble roller shutters

## Modification History

Release 1. New unit of competency.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly assemble each of the following types of roller shutters:
  - light-weight exterior domestic roller shutter
  - heavy-weight exterior commercial roller shutter
  - fire-rated or cyclone-rated roller shutter
  - interior roller shutter.

In the course of the above four assembly processes, the person must demonstrate the ability to assemble shutters with the following shutter control devices:

- at least two electric systems involving a radio-controlled remote device or photocell sensor device
- at least one manual system involving winders or straps.

One of the above shutter control devices must be a 240V control device to be connected to mains power when installed; and one a 12V rechargeable solar or battery-operated control device.

In the course of each of the above assemblies, the person must:

- interpret work order, and locate required materials, tools and equipment
- select and set up required product and components according to manufacturer specifications and workplace procedures and quality requirements
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to site, tools, equipment and products
  - maintain required production output and quality
  - use hand and power tools safely
  - use personal protective equipment (PPE)
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage

- identify and resolve routine problems and faults encountered
- work with others, recognising dependencies and using cooperative approaches to optimise work flow and productivity.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of assembly work orders and supplier instructions relating to the types of roller shutters in the performance evidence, and how to identify and interpret key information
- work order requirements, and industry-accepted quality indicators and requirements, relating to assembly work described in performance evidence:
  - key requirements of Australian standards and codes of practice for assembly
  - building code requirements specific to roller shutter product described in performance evidence
  - safety considerations and potential dangers associated with incorrect assembly
  - impact of wind zoning requirements on assembly of exterior roller shutters
- operation of roller shutters in performance evidence
- emerging trends in roller shutters, including:
  - new materials used in face, reveal and packing
  - associated energy ratings and fire-retardant attributes
- work health and safety (WHS) procedures, practices and regulations specific to assembly work described in performance evidence:
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - using firefighting equipment and first aid equipment
  - operating lifting equipment
  - using personal protective equipment
- workplace procedures relating to:
  - communication channels and protocols
  - manual handling, including lifting and carrying
  - safely cutting and assembling roller shutters
  - following manufacturer instructions and procedures
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines
  - cleaning and storing tools and equipment
  - storing surplus unused items
  - recording and reporting assembly information
- techniques for assembling shutters with electric and manual shutter control devices:
  - electric, including radio-controlled remote devices and photocell sensor devices using 240V mains power, and 12V rechargeable solar and battery-operated control

- manual, including winders and straps
- mathematical methods for estimating and measuring assembly materials and openings, including factoring in required tolerances
- types of common problems that occur during assembly, and how to avoid and respond
- systems for storing and labelling materials required for assembly work
- types, characteristics, uses, maintenance and limitations of the following items required for the assembly described in performance evidence:
  - roller shutter products and materials
  - operating mechanisms required for type of roller shutter being assembled
  - tools and equipment used to assemble roller shutters and procedures for their safe use, operation and maintenance:
    - hand tools, including screwdrivers, hack saws and snip cutters
    - power tools, including 240V mains connected, and 12V rechargeable solar and battery-operated
- documentation requirements for assembly work described in performance evidence

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the assembly described in the performance evidence above, including:

- roller shutters requiring assembly as specified in the performance evidence
- PPE applicable to job requirements
- WHS documentation specific to the assembly
- tools and equipment specified in the knowledge evidence
- shutter control devices
- workplace documentation required for assembly process, including:
  - work orders
  - workplace procedures specified in the knowledge evidence
  - supplier instructions and manufacturer specifications

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## MSFBA3020 Install roller shutters

### Modification History

Release 1. New unit of competency.

### Application

This unit of competency describes the skills and knowledge required to identify and install roller shutters according to job requirements. The unit involves planning job requirements, identifying required shutter products to be used and their measurements and fasteners, and applying workplace procedures to ensure their safe and correct installation.

The unit applies to those installing roller shutters in residential and commercial environments. The shutters to be installed include light-weight domestic, heavy-weight commercial, and fire-rated and cyclone-rated shutters. The shutters may be installed in a range of openings, including windows, fixed and sliding doors, building entrances, and inside and exterior to buildings. They may be fastened to a range of surfaces, including aluminium, concrete, masonry, plasterboard and timber.

Licensing, legislative, or certification requirements may apply to this unit. Relevant state/territory and local government agencies should be consulted to determine necessary requirements for installing roller shutters

### Pre-requisite Unit

Not applicable.

### Unit Sector

Blinds and awnings

### Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare for installation of roller shutters	1.1	Identify job and shutter requirements from work order and supplier instructions
	1.2	Complete check measure on site and document required product specifications and specific access and installation requirements

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
	1.3	Identify work health and safety (WHS) and personal protection requirements of installation according to workplace procedures
	1.4	Identify and select required materials, tools, equipment and accessories based on work order, and check their safe and effective operation
	1.5	Schedule installation and agree access arrangements to site
	1.6	Plan logical, safe and efficient work sequence that reflects work order
2. Install roller shutters	2.1	Inspect installation site in consultation with customer, confirm type of shutter to be installed, and address job, site and customer-specific technical and safety requirements
	2.2	Set up required materials, equipment and shutter mechanisms in line with work instructions and manufacturer specifications
	2.3	Fit shutter to opening according to work order, type of control system and manufacturer specifications
	2.4	Fasten shutter according to shutter type, work order and opening surface using fastening tools in line with supplier instructions and workplace procedures
	2.5	Test installed shutter for correct operation within limits of normal operation, and adjust and repair performance problems in line with own level of responsibility
3. Finalise installation	3.1	Check that completed work complies with quality and work order requirements, and rectify identified deficiencies
	3.2	Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures
	3.3	Identify and store surplus unused items for re-use and recycling according to workplace procedures
	3.4	Check tools and equipment, and tag and report faulty items according to workplace procedures
	3.5	Clean and store remaining tools and equipment according to

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
		workplace procedures
	3.6	Advise customer on correct operation and maintenance of roller shutters
	3.7	Legibly complete and process required workplace and customer documentation

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

Numeracy skills to:	<ul style="list-style-type: none"> <li>interpret, discuss and use mathematical information in work orders and specifications</li> <li>estimate and measure installation openings, including factoring in required tolerances</li> <li>process customer documentation, including required invoicing and receipting</li> <li>record hours worked, quantity of items used and additional routine costs</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>discuss and negotiate site access, installation requirements, and correct operation of roller shutters with a range of customers, including real estate agents, body corporate representatives, builders, home owners, and tenants: <ul style="list-style-type: none"> <li>speaking clearly</li> <li>applying effective listening techniques</li> <li>asking questions to gain information</li> </ul> </li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>interpret routine workplace documentation, including work orders, WHS requirements and workplace installation procedures</li> </ul>

## Unit Mapping Information

Release 1. New unit of competency. No equivalent unit

# Assessment Requirements for MSFBA3020 Install roller shutters

## Modification History

Release 1. New unit of competency.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly install one of each of the following types of roller shutters:
  - light-weight exterior domestic roller shutter
  - heavy-weight exterior commercial roller shutter
  - fire-rated or cyclone-rated roller shutter
  - interior roller shutter.

One of the above installations must be in an above-ground level opening and demonstrate the safe and correct use of lifting equipment.

In the course of the above four installations, the person must demonstrate the ability to install shutters with the following shutter control devices:

- one electric system involving radio-controlled remote device or photocell sensor device
- one manual system involving winders or straps.

One of the above shutter control devices must be a 240V control device connected to mains power, and one a 12V rechargeable solar or battery-operated control device.

In the course of each of the above installations, the person must:

- interpret work order, and locate required materials, tools and equipment
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to site, tools, equipment and products
  - maintain required production output and quality
  - use hand and power tools safely
  - use personal protective equipment (PPE)
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage
- identify and resolve routine problems and faults encountered
- work with others, recognising dependencies and using cooperative approaches to optimise work flow and productivity.

In installing the suite of roller shutters, the candidate must demonstrate the ability to:

- install in at least two of the following different openings:
  - door or window
  - sliding door
  - wide-span opening of 3.2 metres or above requiring the help of an assistant
- fasten to at least two of the following different surfaces:
  - aluminium
  - concrete
  - masonry
  - plasterboard
  - timber.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of installation work orders and supplier instructions relating to the types of roller shutters in the performance evidence, and how to identify and interpret key information
- work order requirements, and industry-accepted quality indicators and requirements, relating to installations described in performance evidence:
  - key requirements of Australian standards and codes of practice for individual installers
  - building code requirements specific to installation described in performance evidence
  - safety considerations and potential dangers associated with incorrect installation
  - wind zoning requirements relating to exterior roller shutters
- operation and maintenance requirements of roller shutters in performance evidence
- emerging trends in installing roller shutters, including:
  - new materials used in face, reveal and packing
  - their associated energy ratings and fire-retardant attributes
- work health and safety (WHS) procedures, practices and regulations specific to installations described in performance evidence:
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - managing rain and wind resistance during installation
  - using firefighting equipment, first aid equipment
  - operating lifting equipment
  - using personal protective equipment
- workplace procedures relating to:
  - communication channels and protocols
  - scheduling installation
  - accessing and inspecting installation sites

- manual handling, including lifting and carrying
- following manufacturer instructions and procedures
- safely installing and fastening roller shutters
- tagging and reporting faulty tools and equipment
- disposing of waste safely and in an environmentally sustainable manner
- recycling and re-use guidelines
- cleaning and storing tools and equipment
- storing surplus unused items
- recording and reporting installation information
- presenting invoices, and collecting and receipting payments
- techniques for installing electric and manual shutter control devices:
  - electric, including radio-controlled remote devices and photocell sensor devices using 240V mains power, and 12V rechargeable solar and battery-operated control
  - manual, including winders or straps
- effect of site characteristics and access restrictions on installation equipment selection and use
- techniques for installing and fastening roller shutters described in performance evidence, including:
  - in openings made of a range of:
    - aluminium
    - concrete
    - masonry
    - plasterboard
    - timber
  - installing and fastening that:
    - conform to quality requirements
    - comply with supplier instructions and manufacturer specifications
    - maximise the appearance of the finished work
    - provide for the most economical use of materials and labour
- mathematical methods for estimating and measuring installation openings, including factoring in required tolerances
- requirements and procedures for using qualified licensed electricians when installation and control devices involve mains power
- types of common problems that occur during installation, and how to avoid and respond
- types, characteristics, uses, maintenance and limitations of the following items required for the installations described in performance evidence:
  - roller shutter products and materials
  - operating mechanisms required for type of roller shutter being installed, including radio-controlled remote devices and photocell sensor devices
  - specialised fasteners used for the different types of roller shutters
  - tools and equipment:

- hand tools, including screwdrivers, hack saws and snip cutters
- power tools, including 240V mains connected, and 12V rechargeable solar and battery-operated
- equipment, including ladders, drop sheets, barriers, cones, signs and lifting equipment
- documentation requirements for installation work described in performance evidence

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the installation described in the performance evidence above, including:

- roller shutters requiring installation as specified in the performance evidence
- PPE applicable to job requirements
- WHS documentation specific to the installation
- tools and equipment specified in the knowledge evidence
- control devices for shutters being installed
- workplace documentation required for each installation, including:
  - work orders, customer orders, job cards, and work quotations
  - workplace procedures specified in the knowledge evidence
  - supplier instructions and manufacturer specifications
  - customer care cards
  - customer invoices and receipts
  - time sheets.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## MSFBA3021 Assemble louvre shutters

### Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFBA3003 Install timber shutters.

### Application

This unit of competency describes the skills and knowledge required to prepare and assemble louvre shutters according to job requirements. The unit involves planning job requirements, identifying required products and components to be assembled and their measurements, and applying workplace procedures to ensure their safe and correct assembly.

The unit applies to those assembling interior and exterior louvre shutters used in residential and commercial environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Unit Sector

Blinds and awnings

### Elements and Performance Criteria

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare to assemble louvre shutters	1.1	Identify and confirm job requirements and style of shutter to be assembled from work order and supplier instructions
	1.2	Identify work health and safety (WHS) and personal protection requirements of assembly according to workplace procedures
	1.3	Select tools and equipment, and check their safe and effective operation according to workplace procedures

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
	1.4	Select materials from stock and check against job requirements
	1.5	Plan logical, safe and efficient work sequence that reflects work order and quality requirements, and economically uses materials
2. Assemble louvre shutters	2.1	Source required materials, equipment and shutter mechanisms in line with work instructions and manufacturer specifications
	2.2	Lay out, measure, mark and cut materials for shutter
	2.3	Assemble component parts according to job requirements and manufacturer specifications
	2.4	Finish shutter assembly according to work instructions
3. Finalise assembly	3.1	Check that assembled shutter complies with quality and work order requirements, and rectify identified deficiencies within scope of own role or report to designated personnel
	3.2	Clean assembled shutter according to workplace procedures
	3.3	Check tools and equipment, and tag and report faulty items according to workplace procedures
	3.4	Clean, maintain and store remaining tools and equipment according to workplace procedures
	3.5	Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures
	3.6	Legibly complete and process required workplace documentation according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.	
Numeracy skills to:	<ul style="list-style-type: none"> <li>interpret, discuss and use mathematical information in shutter specifications, work orders and instructions</li> <li>use mathematical information to estimate and measure assembly requirements, including required tolerances</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>communicate ideas and information to confirm work requirements and specifications and report work outcomes and problems: <ul style="list-style-type: none"> <li>speaking clearly</li> <li>asking questions to gain information</li> </ul> </li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>interpret routine workplace documentation, including: <ul style="list-style-type: none"> <li>WHS requirements and procedures</li> <li>workplace assembly requirements and operator instructions</li> <li>work orders and instructions</li> <li>shutter specifications, including design, size and quantity</li> </ul> </li> </ul>

# Assessment Requirements for MSFBA3021 Assemble louvre shutters

## Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFBA3003 Install timber shutters.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly assemble each of the following styles of shutters:
  - one fixed louvre shutter
  - one louvre bi-fold shutter
  - one sliding louvre shutter
  - one special-shaped louvre shutter for either a residential or commercial building, based on the template created by candidate for that purpose.

In the course of each of the above assemblies, the person must:

- interpret work order, and locate required materials, tools and equipment
- select and set up required product and components according to manufacturer specifications and workplace procedures and quality requirements
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to site, tools, equipment and products
  - maintain required production output and quality
  - use hand and power tools safely
  - use personal protective equipment (PPE)
- report material faults, damaged products and equipment
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of assembly work orders and supplier instructions relating to the types of louvre shutters in the performance evidence, and how to identify and interpret key information

- work order requirements, and industry-accepted quality indicators and requirements, relating to assembly work described in performance evidence:
  - key requirements of Australian standards and codes of practice for assembly
  - building code requirements specific to assembly described in performance evidence
  - safety considerations and potential dangers associated with incorrect assembly
  - cutting patterns and sequences
  - identifying work process problems and resolving within scope of own role
- operation requirements of louvre shutters in performance evidence
- emerging trends in louvre shutters, including new materials used and their associated energy ratings and fire-retardant attributes
- work health and safety (WHS) regulations, standards, procedures, and practices specific to assembly described in performance evidence:
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - using firefighting equipment, first aid equipment
  - operating lifting equipment
  - using personal protective equipment
- workplace procedures relating to:
  - communicating channels and protocols
  - manual handling, including lifting and carrying
  - safely cutting and assembling louvre shutters
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines
  - cleaning and storing tools and equipment
  - storing surplus unused items
  - recording and reporting assembly information
- techniques for measuring, setting up and assembling electric and manual shutter control devices:
  - electric, including radio-controlled remote devices and photocell sensor devices using 240V mains power, and 12V rechargeable solar and battery-operated control
  - manual, including winders and straps
- techniques for measuring, cutting, setting up and assembling louvre shutters described in performance evidence that:
  - conform to quality requirements
  - comply with supplier instructions and manufacturer specifications
  - maximise the appearance of the finished work
  - provide for the most economical use of materials and labour
- mathematical methods for estimating and measuring assembly materials and openings, including factoring in required tolerances
- types of common problems that occur during assembly, and how to avoid and respond

- types, characteristics, terminology, uses, maintenance and limitations of the following items required for the assembly described in performance evidence:
  - shutter components and materials
  - operating mechanisms required for type of shutter being assembled
  - tools and equipment required to assemble shutters, and procedures for their safe use, operation and maintenance:
    - cutting tools
    - cutting bench
    - saws
- documentation requirements for assembly work described in performance evidence

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the assembly work described in the performance evidence above, including:

- louvre shutters requiring assembly as specified in the performance evidence
- PPE applicable to job requirements
- WHS documentation specific to the assembly
- tools and equipment specified in the knowledge evidence
- workplace documentation required for assembly work, including:
  - work orders
  - workplace procedures specified in the knowledge evidence
  - supplier instructions and manufacturer specifications.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards

## MSFCP2005 Use coopering sector hand and power tools

### Modification History

Release 1. Changes to code, application, elements, performance criteria. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to select and safely use hand and power tools for coopering tasks. Workers with this competency complete routine tasks to create barrels and similar cooperage products.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Unit Sector

Coopering

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for tool use	1.1 Identify task requirement from work instructions 1.2 Select appropriate tools based on task requirements and identify work health and safety requirements for their use 1.3 Check tools are safe and functional and report any faults to supervisor 1.4 Select equipment to hold or support material based on the tools selected and the nature of the task 1.5 Prepare material and hold in position to ensure safe operation
2. Use tools	2.1 Use tools safely and in accordance with workplace procedures and manufacturer specifications 2.2 Use techniques that optimise the effective use of the tools for the nominated task 2.3 Ensure safe state, position and location of tools in the work area

	<p>when not in immediate use</p> <p>2.4 Follow safety procedures for the use of power and the handling of power tools</p>
3. Clean up work area and tools	<p>3.1 Clean tools and equipment using cleaning materials and agents suited to the item</p> <p>3.2 Complete routine operator maintenance on tools in accordance with workplace procedures and manufacturer instructions</p> <p>3.3 Store tools and equipment based on specific storage needs and workplace requirements</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and tool manuals
- Numeracy skills to measure lengths and angles

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Supersedes and is equivalent to MSFCP2001 Use coopering sector hand and power tools.

# Assessment Requirements for MSFCP2005 Use coopering sector hand and power tools

## Modification History

Release 1. Changes to code, application, elements, performance criteria. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- select appropriate hand tools and safely use them on at least 2 occasions for coopering tasks, including at least 6 of the following tools:
  - hand plane
  - chisel
  - hand saw
  - spokeshave
  - hammer
  - mallet
  - auger
  - croze
  - driver
  - knife (belly, crum, heading or hollow)
  - cooper's hammer
  - maul
  - bradawl
  - adze
  - shaves (hoop, inside or heading)
  - swift
  - marking-out tools
  - file or rasp
  - scraper
  - screwdriver
  - hand drill
- select appropriate power tools and safely use them on at least 2 occasions for coopering tasks, including at least 5 of the following tools:
  - bench grinder
  - presses (hoops)
  - head making machine

- drop saw
- circular saw
- planer
- double sided planer
- drill
- jig saw
- computer numeric controlled (CNC) router
- laser cutter
- trimmer
- biscuit machine
- brad/nail or staple gun
- sanders (long belt, disk or machine)
- conduct operator maintenance on hand and power tools, including:
  - grinding and sharpening 2 of the following:
    - shaves
    - specialised hand tools
    - drill bits
  - changing the blade on a power saw.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for work health and safety, including the use of personal protective equipment (PPE)
- basic barrel construction and repair terminology and techniques.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - hand and power tools required for performance evidence
  - materials on which tools are used
  - PPE
  - ancillary holding equipment
  - power sources
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFCP3001 Produce barrels using non-fired processes

### Modification History

Release 1. Changes to code, application, elements, performance criteria. Foundation skills added. Range of conditions removed. Assessment requirements changed. Previous unit was housed in an AQF2 qualification. This unit aligns with AQF3.

### Application

This unit describes the skills and knowledge required to produce barrels using non-fired processes. It includes both manual and automated production methods. Workers with this competency follow established procedures using discretion, judgement and problem solving.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Unit Sector

Coopering

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Choose appropriate materials	1.1 Analyse timber types and characteristics to identify appropriate timber for the barrel 1.2 Analyse metal types and characteristics to identify appropriate metal for the barrel
2. Determine the impact of barrel components and storage processes on contents	2.1 Identify effects of barrel fermentation, maturation and seasoning and controlled oxidisation on barrel and barrel contents. 2.2 Apply knowledge of barrel storage processes to barrel production
3. Prepare for production	3.1 Verify and comply with work health and safety (WHS) legislative and organisational requirements 3.2 Review, confirm and clarify work order with appropriate personnel 3.3 Plan barrel production sequence

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>3.4 Determine procedures for checking quality at each stage of the process</p> <p>3.5 Select suitable work area for the task</p> <p>3.6 Select tools and equipment suitable for the work and check they are safe and functional</p>
4. Select and prepare components	<p>4.1 Collect materials, hardware, fittings and attachments</p> <p>4.2 Select fixing and joining devices in accordance with work instructions and type of materials to be joined</p> <p>4.3 Select jigs, and check they are suitable for purpose</p> <p>4.4 Machine and prepare components, including staves and heads, to specification</p>
5. Assemble components	<p>5.1 Lay out and join components using jigs and appropriate fastenings and clamping devices</p> <p>5.2 Use hand and power tools and equipment as required</p> <p>5.3 Check assembled components for compliance with specifications</p>
6. Finish barrel	<p>6.1 Line barrel according to specification</p> <p>6.2 Test barrel for leakage and repair faults</p> <p>6.3 Fit and secure decorative features or fittings to specification</p> <p>6.4 Sand and prepare barrel for coating</p> <p>6.5 Coat barrel in accordance with specification and intended commercial application</p>
7. Clean work area and maintain equipment	<p>7.1 Tag and report faulty and defective equipment in accordance with workplace procedures</p> <p>7.2 Organise and store finished barrels in holding area</p> <p>7.3 Remove waste and scrap following workplace procedures</p> <p>7.4 Clean tools and equipment, check they are in serviceable condition, and store them in accordance with workplace procedures</p> <p>7.5 Clean equipment and work area in accordance with workplace procedures</p> <p>7.6 Complete records and reports to workplace requirements</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to comprehend work instructions
- Writing skills to complete work records
- Oral communication skills to clarify work instructions
- Numeracy skills to measure and calculate lengths, volumes and angles.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFCP2002 Produce barrels using non-fired processes.

# Assessment Requirements for MSFCP3001 Produce barrels using non-fired processes

## Modification History

Release 1. Changes to code, application, elements, performance criteria. Foundation skills added. Range of conditions removed. Assessment requirements changed. Previous unit was housed in an AQF2 qualification. This unit aligns with AQF3.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- make and test at least 1 non-fired and fully finished barrel.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- characteristics of wood commonly used for barrels, including at least 2 species of oak and one non-oak species
- function of hand and power tools commonly used in barrel production
- personal protective equipment (PPE) required for barrel production
- barrel production sequence, including
  - docking and grading staves
  - dressing staves
  - jointing staves
  - rising or assembling barrel
  - bending the barrel
  - crozing
  - making heads
  - cutting the head
  - fitting the head
  - finishing the barrel
  - fitting final hoops
  - testing
- leakage repair methods including plugging, caulking and re-machining
- types of metal used in barrels, including steel, stainless steel, copper and other alloys
- properties of oak, including medullary rays and tyloses
- impact of seasoning, including combination techniques, on cell structure and on the levels of oak lactones and other extractable oak constituents released into barrel contents

- effects of controlled oxidation, barrel maturation and in-barrel fermentation on barrel and contents.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - materials and tools required for performance evidence
  - PPE
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFCP3002 Produce barrels using fired processes

### Modification History

Release 1. Changes to code, application, elements, performance criteria. Foundation skills added. Range of conditions removed. Assessment requirements changed. Previous unit was housed in an AQF2 qualification. This unit aligns with AQF3.

### Application

This unit describes the skills and knowledge required to produce barrels using fired processes. It includes both manual and automated production methods. Workers with this competency follow established procedures using discretion, judgement and problem solving.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Unit Sector

Coopering

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Choose appropriate materials	1.1 Analyse timber types and characteristics to identify appropriate timber for the barrel 1.2 Analyse metal types and characteristics to identify appropriate metal for the barrel
2. Determine the impact of barrel components and storage processes on contents	2.1 Identify effects of barrel fermentation, maturation and seasoning and controlled oxidisation on barrel and barrel contents. 2.2 Apply knowledge of barrel storage processes to barrel production.
3. Prepare for production	3.1 Verify and comply with work health and safety (WHS) legislative and organisational requirements 3.2 Review, confirm and clarify work order with appropriate personnel

<b>Elements</b>	<b>Performance Criteria</b>
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>3.3 Plan barrel production sequence</p> <p>3.4 Determine procedures for checking quality at each stage of the process</p> <p>3.5 Select suitable work area for the task</p> <p>3.6 Select tools and equipment that are suitable for the work and check them for safe operation</p>
4. Select and prepare components	<p>4.1 Collect materials, hardware, fittings and attachments</p> <p>4.2 Select fixing and joining devices in accordance with work instructions and type of materials to be joined</p> <p>4.3 Select jigs and check suitability for purpose</p> <p>4.4 Machine and prepare components, including staves and heads, to specification</p>
5. Pre-assemble barrel components	<p>5.1 Lay out and join components using jigs</p> <p>5.2 Join and clamp heads</p> <p>5.3 Fit and hoop staves</p> <p>5.4 Use hand and power tools and equipment as required</p> <p>5.5 Check assembled components for compliance with specifications</p>
6. Fire the barrel	<p>6.1 Determine toasting technique and timing appropriate to barrel's intended use</p> <p>6.2 Toast and char barrel interior to specification</p> <p>6.3 Apply tensioning processes</p> <p>6.4 Fit hoops</p> <p>6.5 Complete crozing to specification</p> <p>6.6 Cut heads, bevel them to size and fit</p>
7. Finish the product	<p>7.1 Finish barrel using belt, disk or machine sander and hand tools</p> <p>7.2 Fit and secure final hoops and decorative features to specification</p> <p>7.3 Test barrel for leakage and repair faults</p>
8. Clean work area and maintain equipment	<p>8.1 Tag and report faulty and/or defective equipment in accordance with workplace procedures</p> <p>8.2 Organise and store finished barrels in holding area</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	8.3 Remove waste and scrap following workplace procedures 8.4 Clean tools and equipment, check they are in serviceable condition, and store them appropriately in accordance with workplace procedures 8.5 Clean equipment and work area in accordance with workplace procedures 8.6 Complete records and reports to workplace requirements

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to comprehend work instructions
- Writing skills to complete work records
- Oral communication skills to clarify work instructions
- Numeracy skills to calculate lengths, angles, volumes, and material quantities

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## MSFCP3003 Maintain and repair barrels

### Modification History

Release 1. Changes to code, application, elements, performance criteria. Foundation skills added. Range of conditions removed. Assessment requirements changed. Previous unit was listed in an AQF2 qualification. This unit aligns with AQF3 and higher qualifications.

### Application

This unit describes the skills and knowledge required to inspect, disassemble, clean, repair and restore barrels. Workers with this competency follow established procedures using discretion, judgement and problem solving.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Unit Sector

Coopering

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and confirm maintenance requirements	1.1 Verify and comply with work health and safety (WHS) legislative and organisational requirements 1.2 Review work order, and confirm and clarify with appropriate personnel 1.3 Disassemble barrel as necessary to allow inspection 1.4 Clean barrel of any materials which may inhibit inspection 1.5 Test, inspect and evaluate barrel for faults 1.6 Identify and confirm further maintenance and repair requirements for barrel
2. Prepare for maintenance and repair	2.1 Analyse maintenance and repair requirements, and determine procedures for checking quality at each stage of the process 2.2 Select tools, equipment, materials and components required for

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	maintenance and repair, and prepare them for use 2.3 Complete disassembly required for maintenance and repair 2.4 Clean barrel and components internally and externally
3. Complete maintenance and repair activities	3.1 Replace faulty parts and components 3.2 Repair leakage faults using appropriate techniques and materials 3.3 Re-assemble and re-fire barrel 3.4 Test and inspect barrel to confirm the effectiveness of repairs 3.5 Select and apply cleaning and sterilisation processes
4. Clean work area and maintain equipment	4.1 Tag and report faulty and defective equipment in accordance with workplace procedures 4.2 Remove waste and scrap following workplace procedures 4.3 Clean tools and equipment, check they are in serviceable condition, and store them appropriately in accordance with workplace procedures 4.4 Clean equipment and work area in accordance with workplace procedures 4.5 Complete records and reports to workplace requirements

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to comprehend work instructions
- Writing skills to complete work records
- Oral communication skills to clarify work instructions
- Numeracy skills to calculate lengths, volumes, angles and material quantities

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and equivalent to MSFCP2004 Maintain and repair barrels

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFCP3003 Maintain and repair barrels

## Modification History

Release 1. Changes to code, application, elements, performance criteria. Foundation skills added. Range of conditions removed. Assessment requirements changed. Previous unit was listed in an AQF2 qualification. This unit aligns with AQF3 and higher qualifications.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- clean by hand and machine methods, and repair at least 2 barrels (or equivalent cooperage product), including:
  - at least 1 leakage fault
  - at least 1 faulty stave
  - at least one faulty head or head joint.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- ways to address common material faults in barrels, including at least 5 of the following:
  - knots
  - sapwood
  - splits and shakes
  - rot and decay
  - insect infestation
  - mineral streak or brown stripe
  - broken chime
  - split staves
  - acetic or volatile barrel
  - mouldy barrel
  - water contamination
- ways to address common wear, tear and deterioration faults in barrels, including at least 2 of the following:
  - handling damage
  - discolouration
  - broken staves
  - buckled heads

- burst heads
- build-up of fermentation products
- contamination
- standard hot water leakage testing
- leakage repair methods:
  - plugging
  - caulking
  - re-machining
- function of hand and power tools commonly used for barrel maintenance and repair
- personal protective equipment (PPE) required for barrel maintenance and repair.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - all materials and tools required for performance evidence
  - PPE
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFDG3001 Protect leadlight and stained glass

### Modification History

Release 1. Supersedes and is equivalent to MSFSL3002 Protect stained glass and leadlighting.

### Application

This unit describes the skills and knowledge required to protect leadlight and stained glass for security, environmental and heritage purposes.

This unit applies to individuals working with designed glass.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Leadlight and Stained Glass

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify protection requirements	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Inspect and determine the process for achieving protection of the leadlight and stained glass 1.3 Identify types and quantities of materials required for the protection of leadlight and stained glass from plans or work instructions 1.4 Determine work sequence in a logical order to suit the job 1.5 Select and check tools, equipment and materials for suitability, serviceability and safety prior to use

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Install protection	2.1 Cut, shape and form protection materials to ensure correct size and application 2.2 Install or fit protection materials in accordance with protection requirements 2.3 Identify and rectify problems occurring during the operation.
3. Finalise the protection process	3.1 Inspect glass for quality of work and identify and repair deficiencies 3.2 Clean and store tools, equipment and materials in accordance with workplace procedures 3.3 Clean work area and leave in a safe condition and dispose of or recycle waste in accordance with workplace protocols 3.4 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFSL3002 Protect stained glass and leadlighting.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFDG3001 Protect leadlight and stained glass

## Modification History

Release 1. Supersedes and is equivalent to MSFSL3002 Protect stained glass and leadlighting.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- protected 2 different leadlight and stained glass components in-situ using at least 2 different methods and/or techniques.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- state or territory work health and safety legislation, regulations, standards and codes of practice relevant to the full range of processes for leadlight and stained glass operations
- leadlight and stained glass protection terminology and techniques
- organisational and site standards, requirements, policies and procedures for the protection of leadlight and stained glass
- types of glass and other materials used in the leadlight and stained glass industry, their characteristics, properties, uses and limitations
- protection methods, their properties, uses and limitations
- characteristics and properties of materials used in the protection of leadlight and stained glass
- environmental protection requirements relating to the disposal of waste material
- problem identification and resolution
- procedures for the recording, reporting and maintenance of workplace records and information
- mathematical procedures for estimation and measurement.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - stained glass and leadlight for protection

- tools and equipment to complete tasks in the Performance Evidence
- workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFDG3002 Prepare and install architectural engineered leadlight and stained glass

## Modification History

Release 1. Supersedes and is equivalent to MSFSL3004 Prepare and install architectural engineered leadlight and stained glass.

## Application

This unit describes the skills and knowledge required to prepare and install leadlight and stained glass in structural and other architecturally engineered applications.

This unit applies to individuals working with designed glass.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking glass and glazing work. Access to construction sites requires certification of general induction training specified by the *National Code of Practice for Induction for Construction Work (ASCC 2007)*.

## Pre-requisite Unit

N/A

## Unit Sector

Leadlight and Stained Glass

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify work requirements	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Identify, confirm and clarify work requirements with appropriate personnel 1.3 Identify the process for preparing and installing architecturally engineered leadlight and stained glass

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Prepare for installation	<p>2.1 Determine work sequence in a logical order to suit the job</p> <p>2.2 Select and check tools, equipment and materials for suitability, serviceability and safety prior to use</p> <p>2.3 Check components of the leadlight and stained glass against specifications or job order</p> <p>2.4 Select leadlight and stained glass fixing method</p> <p>2.5 Prepare frame or opening to receive leadlight and stained glass using appropriate techniques</p> <p>2.6 Accurately measure and prepare fixing and sealing materials following manufacturer recommendations</p>
3. Identify site conditions and constraints	<p>3.1 Recognise site safety hazards and take corrective action to reduce risk of injury to self and others</p> <p>3.2 Identify and address on-site difficulties in accordance with regulations and enterprise agreements</p> <p>3.3 Identify special characteristics of the leadlight and stained glass aperture in relation to the effect of the fitting process on the finished job</p> <p>3.4 Apply covering material to protect existing fixtures and fittings in accordance with workplace procedures</p>
4. Fit leadlight and stained glass	<p>4.1 Fix leadlight and stained glass to the frame or opening using the selected method</p> <p>4.2 Apply solvents and sealants in accordance with manufacturer instructions</p> <p>4.3 Clean leadlight and stained glass and/or frame after fixing using appropriate cleaning agents</p>
5. Finalise the installation	<p>5.1 Check completed installation to ensure compliance</p> <p>5.2 Check completed installation for compliance with customer requirements and specifications</p> <p>5.3 Clean and store tools, equipment and materials in accordance with workplace procedures</p> <p>5.4 Clean work area and leave in a safe condition and dispose of or recycle waste in accordance with workplace protocols</p> <p>5.5 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFSL3004 Prepare and install architectural engineered leadlight and stained glass.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFDG3002 Prepare and install architectural engineered leadlight and stained glass

## Modification History

Release 1. Supersedes and is equivalent to MSFSL3004 Prepare and install architectural engineered leadlight and stained glass.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- constructed 3 different leadlight panels which individually or cumulatively include geometric and organic shapes
- made repairs that individually or cumulatively include all of the following:
  - corner
  - edge
  - internal
  - complete re-lead
  - bench repair
  - in situ repair.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- state or territory work health and safety legislation, regulations, standards and codes of practice relevant to the full range of processes for leadlight and stained glass operations
- architectural leadlight and stained glass construction terminology and techniques
- organisational and site standards, requirements, policies and procedures for preparation and installation of architectural leadlight and stained glass
- types of glass and other materials used in the leadlight and stained glass industry, their characteristics, properties, uses and limitations
- structural leadlight and stained glass, their properties, uses and limitations
- types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
- environmental protection requirements relating to the disposal of waste material
- problem identification and resolution
- storage systems and labelling
- procedures for the recording, reporting and maintenance of workplace records and information
- mathematical procedures for estimation and measurement.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
- stained glass and leadlight for installation
  - tools and equipment to complete tasks in the Performance Evidence
  - customer and/or work requirements
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFDG3004 Assemble copper foil glass components

### Modification History

Release 1. Supersedes and is equivalent to MSFSL3006 Assemble copper foil glass components.

### Application

This unit describes the skills and knowledge required to assemble copper foil components using a range of fixing and joining components.

This unit applies to individuals working with designed glass.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Leadlight and Stained Glass

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine job requirements	1.1 Identify and follow work health and safety requirements and other workplace procedures. 1.2 Use personal protective equipment in accordance with workplace procedures 1.3 Identify job requirements from specifications, drawings, designs, job sheets or work instructions
2. Plan and prepare for work	2.1 Select and service tools and equipment, and identify rectify or report any faults prior to commencement 2.2 Identify and obtain materials appropriate to the work application

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>ensuring they are prepared, safely handled and located ready for use</p> <p>2.3 Identify and apply environmental workplace considerations and measures to reduce noise, dust and obstacles</p> <p>2.4 Plan assembly sequence based on job requirements</p> <p>2.5 Select fixing and joining devices in accordance with types of materials to be joined and job requirements</p> <p>2.6 Select and check jigs for suitability for the work</p>
3. Assemble components	<p>3.1 Lay out and assemble components using jigs and appropriate fastenings</p> <p>3.2 Use hand and power tools correctly in accordance with job requirements</p> <p>3.3 Check assembled work for compliance with specifications</p> <p>3.4 Prepare, assemble and fit components in accordance with specifications</p> <p>3.5 Repair or tag work which does not meet quality specifications for further processing, recycling, or disposal in accordance with workplace procedures</p> <p>3.6 Organise and store finished products in suitable holding area</p>
4. Check work area and maintain equipment	<p>4.1 Tag and report faulty and/or defective equipment in accordance with workplace procedures</p> <p>4.2 Identify and store items for recycling in accordance with workplace procedures</p> <p>4.3 Clean work area and safely dispose of rubbish</p> <p>4.4 Check, clean and store tools and equipment in accordance with workplace procedures</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFSL3006 Assemble copper foil glass components.

# Assessment Requirements for MSFDG3004 Assemble copper foil glass components

## Modification History

Release 1. Supersedes and is equivalent to MSFSL3006 Assemble copper foil glass components.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- assembled copper foil components for:
  - 1 panel or door insert
  - 1 three-dimensional object
- repaired and reinforced 1 copper foil component.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- state or territory work health and safety legislation, regulations, standards and codes of practice relevant to the full range of processes for assembling copper foil components
- organisational and site standards, requirements, policies and procedures for component assembly
- environmental protection requirements relating to the disposal of waste material
- problem identification and resolution relating to copper foil glass assembly
- types of tools and equipment and procedures for their safe use, operation and maintenance
- characteristics of copper foil components and materials used in assembly
- procedures for recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - copper foil and glass for assembly
  - tools and equipment to complete tasks in the Performance Evidence

- workplace procedures.

## MSFDG3005 Fuse glass

### Modification History

Release 1. Supersedes and is equivalent to MSFSL3007 Fuse glass.

### Application

This unit describes the skills and knowledge required to fuse glass. It includes operating and monitoring kilns to fuse glass for manufacture of customised formed glass products.

This unit applies to individuals working with designed glass.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Leadlight and Stained Glass

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine job requirements	1.1 Identify and follow work health and safety requirements and other workplace procedures 1.2 Identify job requirements from specifications, drawings, designs, job sheets or work instructions
2. Plan and prepare for work	2.1 Identify the process for obtaining materials and moving completed work to the next process 2.2 Identify the procedures for checking the quality of materials and items produced, working condition of kiln and any other equipment and/or attachments and quality requirements for each stage of the fusing process 2.3 Establish and maintain communication with others involved in the

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>work to ensure efficient work flow coordination, personnel cooperation and safety throughout the work</p> <p>2.4 Plan the work sequence in a logical order to suit the job</p> <p>2.5 Select and check kilns, tools, equipment and materials prior to use to ensure they are appropriate for the work and are in a safe and serviceable condition</p> <p>2.6 Identify and check kiln components and controls, including emergency stops and guards for correct operation</p>
3. Conduct glass fusing operations	<p>3.1 Operate, adjust and monitor kiln and fusing equipment to ensure correct product quality and output in accordance with workplace procedures</p> <p>3.2 Identify and use appropriate firing and annealing schedules</p> <p>3.3 Identify, manage and control root causes of problems making adjustments to ensure quality</p> <p>3.4 Identify and report problems that occurred during work operations to appropriate personnel in accordance with workplace procedures</p> <p>3.5 Follow authorised changes in working procedures or requirements</p>
4. Complete work	<p>4.1 Inspect product for quality against work instructions and re-work or discard items that do not meet requirements</p> <p>4.2 Identify and store items for recycling in accordance with workplace procedures</p> <p>4.3 Clean work area and safely dispose of rubbish</p> <p>4.4 Check, clean and store tools and equipment in accordance with workplace procedures</p> <p>4.5 Complete workplace documentation in accordance with SOPs</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFSL3007 Fuse glass.

# Assessment Requirements for MSFDG3005 Fuse glass

## Modification History

Supersedes and is equivalent to MSFSL3007 Fuse glass.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- used 3 different fusing techniques to the capacity of the kiln being used.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- state or territory work health and safety legislation, regulations, standards and codes of practice relevant to the full range of processes for assembling copper foil components
- qualities and characteristics of fusing glass, including hazards and handling requirements
- equipment, processes and procedures for fusing glass
- procedures for reporting materials, product or equipment faults
- correct operation of kilns and understanding of the development of kiln firing schedules
- problem identification and resolution relating to fusing glass
- work flow requirements related to fusing of glass
- environmental protection requirements relating to the disposal of waste material
- characteristics of materials used and uses of products produced.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - glass for fusing
  - kiln
  - tools and equipment to complete tasks in the Performance Evidence
  - workplace procedures.
  -

## MSFDG3006 Process coloured and textured glass by hand

### Modification History

Release 1. Supersedes and is equivalent to MSFSL3008 Process coloured and textured glass by hand.

### Application

This unit describes the skills and knowledge required to cut, shape and apply finishing techniques to annealed, coloured and textured glass of manufactured thickness.

This unit applies to individuals working with designed glass.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Leadlight and Stained Glass

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine job requirements	1.1 Read work documentation and identify job requirements 1.2 Identify and follow work health and safety requirements 1.3 Select and check tools, equipment and materials for suitability, serviceability and safety prior to use 1.4 Plan sequence of work to ensure processing is conducted in a logical order
2. Plan and prepare for work	2.1 Select glass cutting table and clear work surface of debris and dust 2.2 Clear work area of obstructions and potential hazards with cullet bins

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>2.3 Check glass for imperfections and damage prior to handling</p> <p>2.4 Safely place glass to be cut in the required work area using correct manual handling procedures</p> <p>2.5 Accurately measure glass within specified tolerances accurately to minimise waste</p> <p>2.6 Set and test equipment settings and safety controls in accordance with workplace procedures</p>
3. Process glass	<p>3.1 Achieve required quality and output through correct operating and monitoring of tools and equipment in accordance with manufacturer instructions</p> <p>3.2 Make routine lubrication and adjustments of tools and/or equipment in accordance with manufacturer recommendations</p> <p>3.3 Identify and report problems occurring during work operations to appropriate personnel in accordance with workplace procedures</p> <p>3.4 Inspect completed product for quality of work and repair, reprocess or discard in accordance with workplace procedures</p>
4. Complete work	<p>4.1 Label and store processed glass ensuring there are no projections in accordance with workplace procedures</p> <p>4.2 Remove scraps and off-cuts for disposal and/or recycling in accordance with environmental or workplace procedures</p> <p>4.3 Remove and store tools, equipment and unused materials in accordance with workplace procedures</p> <p>4.4 Clean work area, safely dispose of rubbish and identify items for recycling in accordance with workplace procedures</p> <p>4.5 Accurately complete workplace documentation in accordance with workplace procedures</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFSL3008 Process coloured and textured glass by hand.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFDG3006 Process coloured and textured glass by hand

## Modification History

Release 1. Supersedes and is equivalent to MSFSL3008 Process coloured and textured glass by hand.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed all of the following in annealed coloured, opaque and textured glass by hand:
  - straight cuts
  - simple shapes
  - truncated and radius corners
  - circles
  - complex shapes.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- qualities and characteristics of coloured and textured glass, including hazards and handling requirements
- correct identification and use of glass cutting equipment, their functions and procedures for use
- set-up and operation of glass cutting equipment, including procedures for reporting product defects or equipment faults
- work flow requirements related to glass cutting
- environmental protection requirements relating to the disposal of waste material
- established communication channels and protocols.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

- equipment, tools and materials required to complete tasks specified in the Performance Evidence
- glass product to be cut
- safety and personal protective equipment
- work orders
- workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFDN4003 Produce patterns and templates

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers developing patterns and/or templates for production processes by hand, by using appropriate tools and equipment, and by computer-assisted production.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furnishing design

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Prepare for and dimension the task	1.1	Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work
		1.2	Customer orders are interpreted to establish required sizes of finished products
		1.3	Size requirements are checked in relation to the production process and finishing capacity of the workplace
2	Plan process	2.1	Material for pattern or template is identified for approximate size and characteristics
		2.2	Required instruments and equipment are identified, located and assembled

- |   |                              |  |
|---|------------------------------|--|
|   | 2.3                          | Drawings and related specifications are interpreted  |
|   | 2.4                          | Procedures for using pattern development instruments and tools are checked and equipment is prepared for use   |
| 3 | Plot dimensions              |  |
|   | 3.1                          | Equipment and tools are used following normal workplace procedures   |
|   | 3.2                          | Each dimension is measured, exploded and plotted maintaining appropriate angles, arcs and curves   |
|   | 3.3                          | Visual inspection and measurements are used to compare pattern dimensions and shapes with drawings and specifications                                  |
| 4 | Complete pattern or template |  |
|   | 4.1                          | Pattern or template is completed ensuring that the pattern indicates completion date and original drawing details                                      |
|   | 4.2                          | Required workplace approval of pattern or template is obtained   |
|   | 4.3                          | Plans are marked with notations for workplace requirements, including authorship, process or customer requirements, authorisation and any review dates |
|   | 4.4                          | Plans are copied and filed, as required, according to workplace policies and procedures  |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the

work environment.

- Unit context includes:**
- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
  - work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
  - work requires individuals to demonstrate conceptual ability, discretion, judgement and problem-solving skills in the production of patterns or templates
  - work is performed with little external assistance and with minimal supervision or direction
  - development of patterns and/or templates is undertaken in accordance with established enterprise procedures and practices
  - customers may be internal or external
- Tools and equipment include:**
- computer numeric controlled (CNC) machines
  - static woodworking machines
  - relevant hand tools
- Materials include:**
- manufactured board
  - solid timbers
  - composite materials
- Personal protective equipment includes:**
- that prescribed under legislation, regulations and enterprise policies and practices
- Information and procedures include:**
- work organisation procedures and practices relating to the production of patterns and/or templates
  - designer/drawer specifications and instructions
  - legislation/regulations/codes relevant to the work undertaken
  - furniture production techniques and criteria, including ergonomic requirements
  - quality and Australian Standards and procedures

## Unit Mapping Information

Supersedes and is equivalent to LMFDN4003B Produce patterns and/or templates

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFDN4003 Produce patterns and templates

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Interpret drawings and extrapolate to physical dimensions
- Select appropriate mediums and materials and produce a minimum of three (3) patterns or templates making use of:
  - manufactured board
  - solid timber
  - composite material
- Suggest improvements to pattern and template production and, where authorised, negotiate changes
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Company operating procedures, including procedures for pattern and/or template production
- Types, characteristics uses and limitations of pattern/template materials
- Operation requirements of equipment and work systems in own work area
- Competency requirements of the work activities
- Relevant regulatory requirements, recognised standards and codes, and industry practices

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to drawings, job specifications, information on production/fabrication process, production materials and relevant computer equipment and software.

# MSFDN5001 Generate and transfer complex computer-aided drawings and specifications

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers preparing complex drawings using computer-aided techniques and capabilities, including three-dimensional modelling, exploded assembly drawings and conversion of drawings for computer numerically controlled (CNC) applications.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furnishing design

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |                                   |     |   |
|---|-----------------------------------|-----|---|
| 1 | Create exploded assembly drawings | 1.1 | Drawing preparations, including drawing name, labelling information, dimensions, specifications and information management requirements, are obtained/completed |
|   |                                   | 1.2 | Three-dimensional models are prepared for all components  |
|   |                                   | 1.3 | Perspective view of the model is created and confirmed  |
|   |                                   | 1.4 | Model is exploded so that all components are visible  |
|   |                                   | 1.5 | All individual components are labelled in accordance with enterprise requirements   |

- 1.6 Quality checks are completed to ensure accuracy of outcomes
- 1.7 Drawings are stored in accordance with enterprise requirements
- 2 Create job sheets
  - 2.1 Preparations, including file storage, product coding, inventory information and drawing management requirements, are identified and completed
  - 2.2 Job sheet template is set up in accordance with enterprise requirements and practices
  - 2.3 Necessary orthographic views are created and dimensioned
  - 2.4 Sequencing of machine operations and operator requirements, including work health and safety (WHS) are identified and listed
  - 2.5 Draft job sheets are prepared, reviewed, tested and amended to enterprise requirements
  - 2.6 Job sheets are stored in accordance with enterprise requirements
- 3 Convert drawings for CNC applications
  - 3.1 Conversion requirements are identified and confirmed from the CNC machine specifications
  - 3.2 Layers and additional information required for final conversion are created
  - 3.3 Drawing entities are assigned to the relevant layers
  - 3.4 Conversion to the required file type is completed
  - 3.5 Converted file is stored in accordance with enterprise requirements

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

### Unit context includes:

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate conceptual, analytical and organisational ability, judgement and problem-solving applied under broad guidance within routine and non-routine situations
- work involves enterprise and client-initiated ideas or requests

### Preparing complex drawings includes:

- identification, selection and use of computer-aided techniques and capabilities, including three-dimensional modelling, exploded assembly drawings and conversion of drawings for CNC applications
- researching software trends and developments
- generating and presenting ideas
- liaising with client and/or other functional areas
- compiling information

### Personal protective equipment includes:

- that prescribed under legislation, regulations and enterprise policies and practices

### Information and procedures include:

- customer requirements
- work specifications
- product catalogues and style manuals or equivalent
- inventory systems and records
- organisation work procedures and sequencing arrangements
- legislation/regulations/national and industry codes and practices relevant to the product
- quality and Australian Standards and procedures

## Unit Mapping Information

Supersedes and is equivalent to LMF DN5001B Generate and transfer complex computer-aided drawings and specifications

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFDN5001 Generate and transfer complex computer-aided drawings and specifications

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Create a minimum of two (2) exploded assembly drawings, including:
  - preparation of three-dimensional models
  - creation of perspective views
  - exploding the models to expose all components
  - labelling of all components
  - management and storage of drawings
- Create a minimum of two (2) confirmed job sheets which have the necessary orthographic views and all required management and inventory information
- Convert a minimum of two (2) drawings for CNC application, including the creation of layers, assignment of drawing entities and the protection and storage of converted files
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity
- 

## Knowledge Evidence

- Design core and professional practices
- Ergonomic principles for furniture design and manufacture
- Type, range, uses and limitations of contemporary computer-aided design (CAD) software

- Types, range, uses and limitations of contemporary CAD applications
- Industry product ranges and detailed knowledge of furniture construction processes
- Types of construction materials and their characteristics, uses and limitations
- Materials, trims, accessories and their properties and characteristics
- Enterprise information management systems and processes related to drawings
- Relevant WHS legislation, regulatory requirements and codes of practice

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to real or appropriately simulated situations involving the application of drawing and drafting techniques and to the related computing, operational and inventory support systems.

## MSFFDM4001 Assemble custom furniture

### Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFDT4002 Assemble custom furniture.

### Application

This unit describes the skills and knowledge required to assemble custom furniture to production specifications for design, manufacturing or similar operations.

This unit applies to individuals working in a manufacturing or design studio environment who participate in the assembly of custom furniture, either alone or as part of an internal or external team.

No licensing or legislative or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Workshop practice

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Verify and ensure compliance with relevant legislative, work health and safety and workplace requirements related to assembling custom furniture 1.2 Read and interpret job requirements to identify processes and materials 1.3 Plan assembly sequence and confirm materials and component layout from job specifications 1.4 Select and check tools, equipment and materials in accordance with workplace procedures 1.5 Select adhesives, trims and accessories and evaluate against job specifications

	1.6 Develop and document quality-checking procedures for each step of assembly process
2. Assemble custom furniture	<p>2.1 Lay out components, materials and tools in accordance with assembly plan</p> <p>2.2 Check components against specification prior to assembly and reject components that are out of specification in accordance with workplace procedures</p> <p>2.3 Assemble components and check against job specification for accuracy, fit, twist and distortion</p> <p>2.4 Assemble and fit other features to meet job specifications</p> <p>2.5 Apply hardware and decorative accessories in accordance with job specifications</p> <p>2.6 Prepare product for final finish, including checking for and removing bruises, scratches, dents and marks, to meet quality standards</p> <p>2.7 Check product quality at identified checkpoints in accordance with work plan and against job specifications</p>
3. Finalise operation and maintain equipment	<p>3.1 Store or recycle unused materials as required in accordance with workplace procedures</p> <p>3.2 Clean and store tools and equipment according to manufacturer specifications and workplace procedures</p> <p>3.3 Tag and report on faulty or defective equipment in accordance with workplace procedures</p> <p>3.4 Clean and clear work area in accordance with workplace procedures</p> <p>3.5 Complete required workplace documentation</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform basic calculations including measurements.
- Reading skills to interpret written instructions and specifications.
- Writing skills to document quality standards and report on the assembly process.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and equivalent to MSFFDT4002 Assemble custom furniture.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFDM4001 Assemble custom furniture

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFDT4002 Assemble custom furniture.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- assemble and finish three different and significant custom furnishing products using three different adhesive types to meet quality standards and job specifications.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- techniques for the assembly, fixing and finishing of custom furniture components including:
  - wall units
  - vanity units
  - kitchen cabinets
  - sideboards/buffets
  - drawer units
  - display cabinets
  - counters
  - tables
  - beds
  - shelving
  - doors
- characteristics and properties of materials used in furniture components and their assembly including:
  - timber (both native and imported)
  - adhesives
  - screws
  - nails
  - dowels
  - metal fasteners

- knockdown fittings
- glass
- decorative finishes
- abrasive paper
- types, characteristics, uses, limitations and safety requirements of tools and equipment used in assembly operations including:
  - clamps
  - winding sticks
  - measuring tapes or rules
  - hammers
  - mallets
  - squares
  - presses
- types, characteristics, uses, limitations and safety requirements of adhesives and fasteners used in custom furniture assembly
- locational characteristics that impact the approach to and outcomes of assembly of custom furniture
- potential workflows relating to the furniture items being assembled
- relevant problem identification and resolution relating to faults, out-of-specification components, tools, equipment and overall quality
- safe handling requirements for equipment, products and materials, including use of personal protective equipment
- applicable legislative, work health and safety and workplace requirements relevant to assembling custom furniture
- work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- workplace and site standards, requirements, policies and procedures for the assembly of custom furniture.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment, information and resources, including:
  - product specifications
  - assembly equipment and materials
  - location information for where custom furniture will be fitted, sufficient to inform assembly approach and methods.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## **Links**

Companion Volume implementation guides are found in VETNet -

## MSFFDM4002 Collect and interpret information to support production processes

### Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed, and relevant content moved to Assessment Requirements. Assessment Requirements changed to include volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFT4003 Organise production processes and MSFFT4008 Interpret and use workplace information.

### Application

This unit describes the skills and knowledge required to collect and apply statistical and other information to support the development and organisation of production processes in a furniture or similar operation.

This unit applies to individuals working in a manufacturing environment who use information to analyse production processes, either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Project management and professional development

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collect information	1.1 Identify existing and potential sources of statistical information in workplace, relevant to process being developed or managed 1.2 Establish statistical requirements of workplace, and any regulatory requirements, and set method of data collection to meet requirements 1.3 Apply mathematical and quality-checking processes to manage statistical information
2. Analyse job	2.1 Read and interpret job specifications and production processes to

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
requirements	<p>identify required steps and stages in process, and clarify specifications to confirm understanding</p> <p>2.2 Read and interpret job specifications and production processes to identify potential points of application of statistical data</p> <p>2.3 Assess equipment capabilities in terms of meeting job specifications</p> <p>2.4 Compare workplace production plans, including run time and quantities, with capabilities.</p> <p>2.5 Apply and report on statistical information to identify potential points of process improvement in production</p>
3. Complete preparatory activities	<p>3.1 Use collected information to inform proposed modifications or adaptations of equipment to ensure achievement of job requirements</p> <p>3.2 List requirements for tooling or dies as required in accordance with job specifications</p> <p>3.3 Communicate raw material requirements to appropriate personnel in accordance with workplace procedures</p>
4. Develop and implement operational plans	<p>4.1 Develop operational work plans, including timeframes and milestones, in accordance with workplace procedures</p> <p>4.2 Organise production operations based on understanding of requirements and information collected to ensure optimum use of resources</p> <p>4.3 Record and amend operational plans in accordance with workplace procedures and industry practice</p>
5. Conduct trials to monitor equipment operation and product quality	<p>5.1 Set up equipment to make appropriate use of guards, warning devices and safety features, and modify standard operating procedures to suit production process</p> <p>5.2 Monitor equipment operations to ensure variations or inconsistencies in output are identified, reported and rectified</p> <p>5.3 Adjust equipment controls and settings to ensure consistency and continuity of production</p> <p>5.4 Plan and document equipment maintenance, set-up and close-down procedures to support production process</p> <p>5.5 Inspect product quality and compare with requirements</p> <p>5.6 Modify the process where required to improve product quality</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	5.7 Record and report on any non-conformity in product output and investigate possible causes
6. Evaluate production process	<p>6.1 Gather, prepare and process productivity information and other data reports in accordance with workplace procedures</p> <p>6.2 Check and report on all procedures for process and conformity with trial outcomes</p> <p>6.3 Note reasons for both positive and negative outcomes as per requirements</p> <p>6.4 Analyse outcomes for trends or patterns that can be used to optimise workplace operations</p> <p>6.5 Gain authorisation for ongoing work procedures from appropriate personnel for implementation, and negotiate required changes</p> <p>6.6 Recommend variations to design specifications based on trial outcomes</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret job specifications.
- Numeracy skills to establish, document and interpret statistical information relating to production.
- Writing and oral communication skills to record and report on information and provide analysis.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and not equivalent to MSFFT4003 Organise production processes and MSFFT4008 Interpret and use workplace information.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFDM4002 Collect and interpret information to support production processes

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed, and relevant content moved to Assessment Requirements. Assessment Requirements changed to include volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFT4003 Organise production processes and MSFFT4008 Interpret and use workplace information.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- collect and interpret information to support production processes for one specified and significant production operation, including:
  - reading and interpreting workplace documents including job specifications, statistical reports and other data and process documents
  - conducting trials
  - coordinating and evaluating the production process
  - reporting on the success of the process
  - undertaking statistical gathering and analysis using appropriate methods for the audience.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- sources of workplace information including:
  - production plans and schedules
  - product drawings and specifications
  - equipment instructions and capacities
  - relevant standards, inspection requirements and design rules
  - customer-related information
  - inventory and stock levels
  - archives and records
  - supplier and market analysis
- workplace and workflow theory relating to production processes and manufacturing
- equipment safety features
- workplace procedures for setting up for production and reporting

- company products, market, work systems and equipment
- contemporary business information and statistical reporting, forecasting and presentation techniques
- softwares suitable for storage, manipulation, management and presentation of statistical information
- equipment and machine processes relevant to the production processes, including microprocessor or computer-controlled machines
- quality procedures, inspection and testing requirements
- legislative requirements of the work activities
- job specifications, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - production plans and procedures
  - past collections of data
  - data-collecting and analysis tools or software.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFDM4003 Construct and evaluate prototypes and samples

### Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to the Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFDT4005 Construct and evaluate furniture prototypes and samples, and MSFFT4006 Construct prototypes and samples.

### Application

This unit describes the skills and knowledge required to construct and evaluate, or oversee the construction and evaluation of, prototypes and samples based on established plans, drawings or specifications. Prototypes may be produced by hand, by using appropriate machines, tools and equipment, or by computer-assisted production, and may require the application of joinery, construction and finishing techniques.

The unit applies to individuals working in an industry operation of any size, or a design studio environment, who produce prototypes, either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Workshop practice

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish work requirements	1.1 Identify purpose of prototype or sample from prototype specifications 1.2 Identify materials specifications for item from prototype specifications and workplace documentation 1.3 Identify and verify ergonomic requirements from prototype specifications 1.4 Identify construction requirements and methods for materials

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	being used from prototype specifications
2. Plan for prototype construction	<p>2.1 Prepare work plan for item, including construction stages or steps, checkpoints for measurements and tests, and assembly methods, to ensure requirements will be met</p> <p>2.2 Ensure work health and safety requirements, including personal protection needs, are met throughout the work</p> <p>2.3 Verify design brief and work plan, including compatibility of materials, with appropriate personnel and in accordance with workplace procedures</p> <p>2.4 Locate suitable work area and ensure it is ready for work operation in accordance with workplace procedures</p>
3. Obtain materials and equipment	<p>3.1 Acquire correct type and quantity of material and other components to be used from specifications and ensure they are ready for use</p> <p>3.2 Select suitable equipment based on work requirements and selected materials, and check operational effectiveness in accordance with manufacturer specifications</p> <p>3.3 Identify and adjust jigs and other construction aids to suit work</p>
4. Construct the prototype or sample	<p>4.1 Follow work plan to construct item, referencing any sketches and other job specifications</p> <p>4.2 Conduct checks at identified points and in accordance with workplace procedures</p> <p>4.3 Identify, document and implement, within workplace procedures, any required modifications to design or plan</p> <p>4.4 Perform initial inspection of prototype or sample to ensure it is fit for purpose</p>
5. Finalise the work sequence	<p>5.1 Prepare product for finishing in accordance with design specification</p> <p>5.2 Clean, maintain and store tools and equipment in accordance with manufacturer specifications</p> <p>5.3 Clean and clear work area, including applying waste management strategies in accordance with workplace procedures</p> <p>5.4 Complete required workplace documentation</p>
6. Evaluate prototype	6.1 Evaluate prototype or sample for functionality and aesthetic

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
or sample	<p>appeal against design brief</p> <p>6.2 Assess elements and principles of design of prototype or sample against design brief</p> <p>6.3 Assess technical integrity of prototype or sample against design brief</p> <p>6.4 Verify that ergonomic requirements are met from design requirements</p> <p>6.5 Modify prototype or sample as needed to satisfy requirements of design brief and document any unresolvable variations</p> <p>6.6 Review prototype or sample with client to ensure it meets requirements</p> <p>6.7 Record process faults in prototype or sample and report to appropriate personnel in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform basic calculations relating to measurement and estimation.
- Reading skills to interpret specifications and work plans.
- Writing and oral communication skills to record and report on prototype work sequences and produce evaluations.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and not equivalent to MSFFDT4005 Construct and evaluate furniture prototypes and samples, and MSFFT4006 Construct prototypes and samples.

## Links

# Assessment Requirements for MSFFDM4003 Construct and evaluate prototypes and samples

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to the Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFDT4005 Construct and evaluate furniture prototypes and samples, and MSFFT4006 Construct prototypes and samples.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- construct two different prototypes or samples from concept sketches and freehand development drawings, and in doing so:
  - interpret a design brief to apply design elements and principles
  - identify compatibility or incompatibility of materials, adhesives, fittings and fasteners for the application
  - select and apply appropriate joinery, construction and finishing techniques
  - select and use appropriate materials, equipment and processes for the item being constructed
  - show how the design of the prototype components relates to the expected life of the item
  - ensure that the prototype satisfies the original or varied specification.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- the function and features of a design brief, including:
  - the aims, objectives, milestones for the design project
  - target audience
  - budget
  - timeline
  - consultation requirements
  - colour requirements
  - image requirements
  - function
- the characteristics and behaviours of a broad range of materials, including:

- scrap timber and manmade timber
- plastics
- metal and metal alloys
- stone
- glass
- fabrics and textiles
- fibreglass
- leather
- foam
- cardboard and paper products
- any other manipulable substance
- adhesives
- fillers and finishes
- assembly processes, including:
  - nailing
  - gluing
  - screwing
  - welding
  - pressing
  - sewing
  - bonding
  - jointing
  - connecting various materials
- work health and safety legislation, regulations, standards and codes of practice relevant to the full range of processes for the construction of prototypes and samples
- workplace and site standards, requirements, policies and procedures for constructing prototypes and samples
- environmental protection requirements in relation to the selection and use of materials
- established communication channels and protocols relevant to the prototyping process, including stakeholder or client communications
- relevant problem identification and resolution to meet job specifications in terms of function, aesthetics, elements and principles of design, technical integrity and ergonomics
- elements and principles of design, including:
  - line
  - shape
  - form (geometric or organic)
  - texture
  - colour
  - function
- principles of ergonomic design and aesthetic values
- types of tools and equipment and procedures for their safe use, operation and maintenance

- set-up and operation of equipment
- design and other relevant software and applications used in prototyping
- product assembly techniques
- sketching and drawing methods, including:
  - isometric
  - oblique
  - perspective
  - orthographic
  - elevation drawings that explode the parts of the concept sketches and include:
    - rough sizes
    - scale
    - tones
    - values
- storage systems and labelling
- procedures for the recording, reporting and maintenance of workplace records and information
- appropriate mathematical procedures for estimation and measurement
- work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -

## MSFFDM4004 Construct joints for custom furniture

### Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFM4002 Construct joints for custom furniture.

### Application

This unit describes the skills and knowledge to join timber by constructing joints using hand and portable power tools. It includes adapting or designing joints that are compatible with the product material, purpose and style of the product being made.

This unit applies to individuals working in a manufacturing or design studio environment who make and adapt joints to join timber, either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Workshop Practice

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Verify and comply with relevant legislative, work health and safety and workplace requirements related to constructing joints 1.2 Read and interpret product specifications and other relevant documentation to identify furniture joint requirements 1.3 Identify product purpose, furniture style and construction material required from supplied documentation 1.4 Identify joint requirements and select appropriate joint type for design, construction or adaption 1.5 Select tools, adhesives and fasteners to match joint type 1.6 Check tools, equipment and materials for serviceability and safety in accordance with workplace procedures

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.7 Develop and document quality-checking procedures for each step in joint construction process
2. Make joint	2.1 Mark out cutting and joining lines to suit joint type 2.2 Check measurements and calculations for accuracy and to ensure quality outcomes 2.3 Identify timber features and observe optimal usage criteria 2.4 Cut timber to specification, and inspect and prepare for joining 2.5 Join timber in accordance with job specifications 2.6 Use fasteners and adhesives to ensure that, based on specification, required joints are firm 2.7 Check finished joint against quality requirements
3. Finalise the work sequence	3.1 Prepare product for finishing in accordance with design specification 3.2 Clean, maintain and store carving tools in accordance with manufacturer specifications 3.3 Clean and clear work area in accordance with workplace procedures 3.4 Complete required workplace documentation

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform basic calculations including measurements.
- Reading skills to interpret job specifications.
- Writing and oral communication skills to document quality standards and procedures and record and report on joint construction.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and not equivalent to MSFFM4002 Construct joints for custom furniture.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFDM4004 Construct joints for custom furniture

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFM4002 Construct joints for custom furniture.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- produce a minimum of four different joint types that meet industry standards and tolerances, with at least two produced substantially by hand operations, and in doing so:
  - utilise at least three different adhesive types across the different joint types
  - match requirements of adhesives and fasteners to the timbers/materials used.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types of joints used, including:
  - dowel
  - mortise and tenon
  - dovetail
  - lap joint
  - biscuit joint
  - finger joint
  - housing joint
  - mitre or bridle joints
- types of tools and equipment used in joint construction and procedures for their safe use, operation and maintenance, including:
  - chisels
  - mallets
  - mortise gauges
  - vernier callipers
  - vices
  - dovetail, tenon and coping saws
  - planes
  - files

- hand and power drills
- dowel jigs
- portable biscuit machines
- power routers, planers, saws and sanders
- characteristics and properties of timber being used for joint
- characteristics, properties and selection criteria of adhesives used, including:
  - resorcinol formaldehyde
  - polyurethane
  - epoxy
  - cyanoacrylate
- moisture suppressants and barrier systems relevant to joint construction and finishes
- workflow in relation to the products being made or repaired
- equipment safety features and serviceability criteria
- applicable work health and safety, legislative and workplace requirements relevant to constructing joints for custom.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a selection of products requiring joints
  - a full suite of tools and adhesives for potential selection and use.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFDM4005 Design, construct and test jigs

### Modification History

Release 1. Unit code and Application changed. Element and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFDN4004 Design, construct and test jigs and MSFFDT4015 Produce templates and jigs for custom-made furniture.

### Application

This unit describes the skills and knowledge required to design, construct and test jigs required for manufacture, assembly, construction and testing of products. It covers all jigs, whether temporary or highly engineered, designed manually or through use of computer-aided design tools.

This unit applies to individuals required to design, construct and test jigs as part of their job role in design, manufacturing and similar workplaces, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Workshop practice

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine production requirements	<p>1.1 Identify and follow work health and safety requirements, including personal protection needs, throughout the work</p> <p>1.2 Gather information about item to be produced from work documentation and liaise with others involved in design and production process</p> <p>1.3 Identify and review constraints and opportunities for jig design from requirements and workplace procedures</p>
2. Design jig	2.1 Develop ideas for jig design based on knowledge of materials and production processes

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	2.2 Refine jig design through testing and experimentation to meet requirements 2.3 Make accurate calculations to support effective jig design 2.4 Plan a production process that works effectively with jig design 2.5 Produce jig design based on testing and production process investigation undertaken 2.6 Specify materials for jig construction from design process
3. Construct jig	3.1 Select tools and equipment suited to the jig design 3.2 Construct jig in accordance with design and within tolerances using techniques that match requirements
4. Test jig	4.1 Use jig to produce sample and determine its adherence to set tolerances 4.2 Adjust jig and design specifications to meet production requirements in response to testing

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but are not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform basic calculations including measurements=.
- Reading skills to interpret job requirements.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and not equivalent to MSFDN4004 Design, construct and test jigs and MSFDT4015 Produce templates and jigs for custom-made furniture.

## Links

# Assessment Requirements for MSFFDM4005 Design, construct and test jigs

## Modification History

Release 1. Unit code and Application changed. Element and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFDN4004 Design, construct and test jigs and MSFFDT4015 Produce templates and jigs for custom-made furniture.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- successfully design, construct and test jigs that operate within acceptable production tolerances for two projects, including one moving jig.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- how to interpret detailed product specifications and technical drawings
- characteristics, uses and limitations of materials used for jig construction
- construction techniques relevant to the chosen jig material
- processes for testing jig design
- machine technical specifications, including the acceptable criteria for related jigs
- mathematical procedures for taking measurements and making calculations for jig design.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - product specifications and drawings
  - drawing materials or equipment for jig design
  - jig construction materials
  - construction machinery, equipment and hand tools.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFDM4006 Hand carve wood to custom design

### Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and clarify requirements. Supersedes and is equivalent to MSFFM4001 Hand carve wood to custom design.

### Application

This unit describes the skills and knowledge required to confirm the design requirements, select the wood, hand carve a custom design and prepare the carving for finishing.

This unit applies to individuals working in a manufacturing or design studio environment who hand carve wood components, either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Workshop practice

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm the design requirements	1.1 Verify and comply with relevant legislative, work health and safety and workplace requirements related to hand carving wood 1.2 Read and interpret product design requirements and confirm feasibility of design 1.3 Elaborate on and document product design requirements in accordance with workplace requirements
2. Select and prepare the wood to be hand carved	2.1 Analyse and confirm design requirements in terms of product specification and product usage 2.2 Identify wood species that will satisfy product specifications 2.3 Select wood for carving from a detailed analysis and comparison of

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	product specification and characteristics, properties and costs of available wood species 2.4 Prepare wood for hand carving using suitable methods
3. Select carving tools	3.1 Select carving tools suitable to meet requirements 3.2 Check selected carving tools for serviceability, sharpness, maintenance compliance and safety in accordance with manufacturer instructions and workplace procedures 3.3 Rectify faults or pass to suitably qualified personnel for resolution 3.4 Select required equipment to hold or support material for hand tools application
4. Carve the wood	4.1 Select a style and method of wood carving suitable for selected wood and design requirements 4.2 Apply and enface carving patterns on wood to guide carving and optimise use of wood 4.3 Confirm wood grain selection and appropriateness of tools by applying to bulk clearance 4.4 Apply carving tools to precision requirements of product design
5. Finalise operation	5.1 Prepare product for finishing in accordance with design specification 5.2 Clean, maintain and store carving tools in accordance with manufacturer specifications 5.3 Clean and clear work area in accordance with workplace procedures 5.4 Complete required workplace documentation

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but are not explicit in the performance criteria.

- Numeracy skills to interpret technical drawings and designs that include measurements.
- Reading skills to interpret design information and timber specifications.
- Writing and oral communication skills to record and report on the hand carving operation.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and equivalent to MSFFM4001 Hand carve wood to custom design.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFDM4006 Hand carve wood to custom design

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and clarify requirements. Supersedes and is equivalent to MSFFM4001 Hand carve wood to custom design.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- hand carve two significant products, showing:
  - the interpretation and necessary adoption of the design specifications
  - the selection of suitable timber for the carving
  - the completion of the carving to specification or commercially acceptable standard
  - the preparation of the products for finishing
- carry out operator maintenance on hand tools used across the two significant products, including the grinding and sharpening of at least one knife and one chisel.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- terminology covering hand carving operations and materials
- techniques used in hand carving, including:
  - chip carving
  - relief carving
  - Scandinavian flat plane
  - caricature carving
  - love spoon
  - treen
  - whittling
- types, characteristics, uses and limitations of timber species for hand carving
- techniques for the design and documentation of specifications for hand carved products
- workplace and site standards, requirements, policies and procedures for hand carving of wood
- types, characteristics, uses, limitations and maintenance requirements of the range of tools used in wood carving, including:

- carving knives
- chisels (straight and curved)
- short bent front bent
- spoon bit
- back bent
- skew
- fishtail
- spade
- parting tool
- macaroni (fluterino and backeroni)
- palm tools
- rasps
- rifflers
- punches
- gouges
- venier
- router
- processes for evaluating the quality of carving tools in terms of specifications, safety, maintainability and commercial reputation
- preparation methods wood for carving, including:
  - confirming grain
  - identifying and responding to faults
  - dealing with knots and contaminants
  - cutting wood to workable size and shape
- applicable work health and safety, legislative and workplace requirements and instructions relevant to the hand carving of wood.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - product specifications and/or drawings
  - a range of hand carving tools.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

## MSFFDM4007 Identify and calculate production costs

### Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and clarify requirements. Supersedes and is not equivalent to MSFFT4010 Identify and calculate production costs.

### Application

This unit describes the skills and knowledge required to gather and analyse information needed for the costing process and then estimate, calculate and document production costs in a commercial production environment.

This unit applies to individuals working in a role requiring estimation of end-to-end production costs, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Project management and professional development

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Gather and analyse information	1.1 Identify and collect information required to calculate production costs 1.2 Analyse information and extract relevant details 1.3 Convert required information to an appropriate format or software and store ready for retrieval and application
2. Estimate production costs	2.1 Estimate and accurately record types and quantities of materials required for production based on specifications 2.2 Estimate time requirements for production activities and other lead times based on specifications 2.3 Estimate and record labour requirements for direct production and handling operations based on specifications

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	2.4 Estimate and record costs associated with wastage (labour, materials, consumables) based on specifications and previous project outcomes
3. Determine production costs	<p>3.1 Calculate and document total production costs using required software in accordance with workplace procedures</p> <p>3.2 Determine and document allowance for overheads and mark-up percentages in accordance with workplace procedures</p> <p>3.3 Determine costs associated with transportation and packaging of product</p> <p>3.4 Calculate and communicate final cost to customer through liaison with marketing/sales personnel and other personnel involved in financial decision-making</p>
4. Document costing	<p>4.1 Document details of costs in accordance with workplace procedures and formats</p> <p>4.2 Check and verify costing details in accordance with workplace procedures</p> <p>4.3 File and store costing information for future reference in accordance with workplace procedures</p> <p>4.4 Respond appropriately and in accordance with workplace procedures to changes in scope and other requirements</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to identify and interpret different data types, perform calculations including measurements and provide product and production estimates.
- Reading skills to interpret product and production costing information.
- Writing and oral communication skills to record and report on production costing processes and information accurately.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and not equivalent to MSFFT4010 Identify and calculate production costs.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFDM4007 Identify and calculate production costs

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and clarify requirements. Supersedes and is not equivalent to MSFFT4010 Identify and calculate production costs.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- identify and calculate production and product costs for two different products, and:
  - deliver documentation that identifies accurate costing information about all of the following:
    - materials
    - labour
    - overheads and percentage mark-ups
    - wastage
    - transport and packaging where relevant
  - produce reporting that shows the collection, organisation, and interpretation of information including procedures (in the context of cost), materials costings, payroll data, accounting records, costing matrices of other businesses and past production data
  - select suitable software or other means for documenting and communicating the production and product costs
  - adapt costings based on differences or changes in production scope, and report on the impact of those changes for one of the products.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- information required to establish production costs and what specific details are required:
  - product specifications
  - process specifications
  - production plan
  - labour unit costs
  - warehousing and distribution
  - logistic support contracts

- supply agreements
- overhead costs:
  - rental/lease costs
  - utilities
  - non-production resources
  - depreciation of plant and equipment
  - warehousing margins
  - physical distribution unit costs
  - insurance
- workplace financial and costing policies and procedures for calculating and communicating costings
- how changes in product/production scope impact on costings
- features of software applications for calculating production costs to inform appropriate selection
- methods of communication relating to documenting production costs for both internal workplace and stakeholder/client consumption
- mathematical procedures used to calculate production costs:
  - estimation
  - the four basic mathematical operations: addition, subtraction, multiplication, and division
  - calculation of percentage mark-ups.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - product specifications
  - production process information
  - workplace costing policies and procedures
  - current information technology used for calculating and communicating costings.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4008 Investigate materials and technologies for design projects

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and include volume/frequency of evidence. Supersedes and is not equivalent to MSFFDT4011 Research and select furniture materials and technology.

## Application

This unit describes the skills and knowledge required to research and recommend materials and technologies that meet the requirements of a design brief.

This unit applies to individuals working in a manufacturing or design studio environment who analyse and compare product and technology information from a wide range of sources to develop a design solution, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Furniture design and manufacturing – general

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine project requirements	1.1 Review and clarify project brief with client to confirm requirements 1.2 Confirm and evaluate parameters and constraints from requirements 1.3 Select work resources based on needs of project 1.4 Identify and assess aspects of brief that inform finish selection 1.5 Identify key project stakeholders and establish required communication protocols
2. Research materials	2.1 Assess aesthetic requirements of materials and identify potential options that meet requirements 2.2 Evaluate intended use against the functional features of different

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>materials</p> <p>2.3 Identify and consider new and emerging finish technologies for their application to project brief</p> <p>2.4 Identify application requirements in terms of available expertise</p> <p>2.5 Evaluate finish properties for their safety and sustainability</p> <p>2.6 Source and compare information about costs and availability against project brief</p>
3. Research technologies	<p>3.1 Assess product requirements and identify potential technology options for design and production</p> <p>3.2 Evaluate intended use against outputs of different technological approaches</p> <p>3.3 Identify and consider new and emerging production technologies for their application to brief</p> <p>3.4 Identify application requirements in terms of available expertise, equipment and other relevant resources</p> <p>3.5 Assess technological options against production output requirements including volume, quality and speed</p> <p>3.6 Source and compare information about costs and availability against project brief</p>
4. Refine ideas and recommend solution	<p>4.1 Explore and refine ideas about materials and technology through a process of reflection and testing</p> <p>4.2 Choose a materials and technology solution based on research findings that satisfies elements and principles of design and key objectives of project brief</p> <p>4.3 Provide clear and relevant research information highlighting findings and rationale for materials and technologies chosen</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform calculations relating to product and production costings.

- Reading skills to interpret information including design briefs, and materials and technology specifications.
- Writing and oral communication skills to record and present investigation findings.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## **Unit Mapping Information**

Release 1. Supersedes and is not equivalent to MSFFDT4011 Research and select furniture materials and technology.

## **Links**

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFDM4008 Investigate materials and technologies for design projects

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and include volume/frequency of evidence. Supersedes and is not equivalent to MSFFDT4011 Research and select furniture materials and technology.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- investigate materials and associated technologies that respond to three different design briefs and which individually or cumulatively involve at least two types of materials, and in doing so:
  - evaluate the variations in costs and quality outcomes associated with different materials and technologies for each of the three design briefs.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- elements and principles of design, their interrelationships and how they are used in materials selection
- how different technologies can be used to achieve design elements, and how materials and technologies interact
- emerging industry technologies and the potential for application to meet a design brief
- production methodologies of furniture (or similar) manufacturers, including suitability of different methods for a range of output volumes
- design techniques for products based on materials selection
- materials used to produce products, including:
  - their specifications, behaviours and limitations
  - wood, plastics, metals and other commonly used materials
- how to structure and present research information and recommendations.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors

# MSFFDM4009 Match furnishing style and materials to customer requirements

## Modification History

Release 1. Unit code and application changed. Elements and performance criteria changed. Range of conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFT4009 Match furnishing style and materials to customer requirements.

## Application

This unit describes the skills and knowledge required to determine and match customer style and materials requirements and create the related workplace documentation.

This unit applies to individuals providing furnishing product information to customers in any sector. Customers may be internal or external.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design practice

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine customer requirements	<p>1.1 Establish customer needs through review of documentation or consultation with customer and in-person inspection of product site if required</p> <p>1.2 Research and identify potential options and provide details or examples of potential furnishing or similar products that meet styles and materials requirements to customer</p> <p>1.3 Explain limitations and benefits of different styles and materials within context of product's intended location and use</p> <p>1.4 Identify and explain options for the use and modification of styles or materials to customer</p> <p>1.5 Confirm customer specifications and parameters for making final</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	selections
2. Match options to customer requirements	<p>2.1 Compare customer specifications and user requirements with furnishing styles and materials options, ensuring consistency of style and materials between existing and proposed new products or locations</p> <p>2.2 Present range of best-fit styles and materials to customer for evaluation</p> <p>2.3 Answer customer queries and use examples to illustrate answers</p>
3. Document customer requirements	<p>3.1 Establish and confirm specifications, delivery requirements and required quality standards in accordance with workplace procedures</p> <p>3.2 Calculate required product quantities and associated costs</p> <p>3.3 Document details in accordance with workplace procedures, including research results and confirmation of styles and materials matching, and special instructions required for production</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform calculations relating to product and production costings.
- Reading skills to interpret research information and specifications.
- Writing and oral communication skills to document research results and report to stakeholders.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFT4009 Match furnishing style and materials to customer requirements.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFDM4009 Match furnishing style and materials to customer requirements

## Modification History

Release 1. Unit code and application changed. Elements and performance criteria changed. Range of conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFT4009 Match furnishing style and materials to customer requirements.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- match furnishing style and/or materials to meet the needs of two different customers, providing information on all of the following:
  - product characteristics and origins
  - competitive features
  - how the product meets specific customer needs
  - costs.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legal and ethical considerations when providing information to customers, including individual responsibility under Australian consumer law
- parameters for making furnishing style and materials selections:
  - overall design parameters
  - colour
  - materials
  - practicality
  - cost
  - end user requirements
- historical and contemporary, including emerging art and design styles and movements, and their respective style characteristics and materials, and options relevant to the work context:
  - product characteristics and origins
  - competitive features
  - costs
- visual aesthetics

- current market segment products, and suitable online and offline sources of inspiration and possible design elements that will meet client needs:
  - brochures
  - magazines
  - websites such as online galleries and retail sites
  - design forums
  - reference books
  - other existing workplace design information
  - transferable technological ideas or concepts
  - natural or man-made structures and objects
- current ethical issues in society affecting makers and designers, including but not limited to:
  - social justice
  - environmental sustainability
  - ethical sourcing of material
  - biodiversity
  - cultural heritage and sensitivities
  - social responsibilities of makers and designers
- making techniques for products based on materials selection
- style, materials and finishes used to produce products, including their specifications, behaviours and limitations, and how currently available materials and finishes can be applied to achieve historical art and design styles
- workplace policies and procedures for:
  - costing of products
  - interactions with customers
  - documentation requirements
- mathematical procedures for calculation of costs.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - information about product options
  - information technology for documentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -

# MSFFDM4010 Prepare and present design and manufacturing information

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove content duplicated with Performance Criteria, and volume/frequency of evidence added. Supersedes and is not equivalent to MSFFDT4007 Prepare and present furniture design information.

## Application

This unit describes the skills and knowledge required to prepare and present information about design concepts and the associated manufacturing proposals in response to a design brief.

This unit applies to individuals who analyse and use information from a wide range of sources as part of the design process. They may work alone or as a member of a collaborative design/manufacturing team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Furniture design and manufacturing – general

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for presentation of information	1.1 Review, confirm and clarify design brief with appropriate personnel 1.2 Assess type and quantity of information to be presented based on design brief 1.3 Develop a presentation methodology suited to audience and select equipment and software appropriate to chosen methodology
2. Prepare information	2.1 Collate and prepare drawings for presentation that include both concept and construction information 2.2 Gather prototypes and samples from design process and prepare for

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>presentation to suit audience needs</p> <p>2.3 Source and prepare supporting written information about design, proposed manufacturing process and potential options</p> <p>2.4 Include information about all stages of manufacturing process</p>
3. Present information	<p>3.1 Present recommendations in a format and level of detail suited to client and scope of the project</p> <p>3.2 Articulate rationale for chosen solution and present to client</p> <p>3.3 Seek client feedback on proposed solution and use feedback in design process</p>

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information.
- Reading skills to interpret design briefs and other relevant information.
- Writing and oral communication skills to record and report on design and manufacturing information.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

Release 1. Supersedes and not equivalent to MSFFDT4007 Prepare and present furniture design information.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFDM4010 Prepare and present design and manufacturing information

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove content duplicated with Performance Criteria, and volume/frequency of evidence added. Supersedes and is not equivalent to MSFFDT4007 Prepare and present furniture design information.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- prepare and present design and manufacturing information for two different products that includes:
  - two types of drawings (sketches, working drawings, digital drawings or manual drawings)
  - information on materials, and construction techniques or manufacturing technologies, and finishing
  - one of maquettes, prototypes or samples
  - selection of workplace technology including communication and design software that shows consideration of audience
  - selection and implementation of one or more methods to review the effectiveness of the presentation.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- information collection methods that support presentation development and delivery
- communication protocols
- elements and principles of design
- application and use of ergonomic and anthropometric data (or factors) in design projects
- presentation methods for communicating elements and principles of design
- manufacturing methodologies being presented, including their advantages and disadvantages.
- digital and non-digital presentation methods options for presentation methodology, and the advantages and disadvantages and associated equipment requirements for presenter and audience:
  - presentation boards
  - portfolios

- photography
- video and remote delivery
- other forms of multimedia.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - current information technology including design software for preparation of information.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFDM4011 Prepare tender submissions

### Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria updated to active voice. Range of Conditions removed and relevant content added to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFT4012 Prepare a tender submission.

### Application

This unit describes the skills and knowledge required to analyse tender requirements and prepare and submit a formal tender for the supply of products and services.

This unit applies to individuals working in senior operational, supervisory or management roles in any industry sector, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Project management and professional development

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify opportunity to provide products or services	1.1 Identify opportunities that are within operational scope or work areas of business unit or workplace 1.2 Match available workplace resources expertise to potential opportunities 1.3 Assess feasibility of undertaking proposed project or work and seek approval in accordance with workplace policies and procedures
2. Analyse tender requirements	2.1 Correctly interpret tender specification documentation and seek clarification with originator if required 2.2 Develop proposed methodology that matches scope and nature of tender request 2.3 Identify required resources and confirm their availability with

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>provider in accordance with workplace procedures</p> <p>2.4 Adjust methodology to accommodate availability of resources and expertise available</p>
3. Prepare a tender estimate	<p>3.1 Prepare estimate taking all requirements into account and providing for contingencies as required by workplace policies, procedures and requirements</p> <p>3.2 Ensure costing of estimate conforms to workplace policies and procedures</p> <p>3.3 Create estimate that satisfies total requirement and, where this cannot be provided, provide substantiated explanations and options</p> <p>3.4 Check estimate for accuracy and detail in accordance with workplace procedures</p>
4. Submit a tender	<p>4.1 Prepare tender documentation in accordance with workplace policies and procedures</p> <p>4.2 Verify that tender addresses required details and meets originator's requirements</p> <p>4.3 Submit complete and accurate tender within required timeframe and in format required by request</p> <p>4.4 Record and store tender documentation in accordance with workplace requirements</p>
5. Review tender process	<p>5.1 Negotiate changes and variations to tender to meet needs of client and workplace, and in accordance with contractual arrangements, workplace policies, procedures and delegated authority</p> <p>5.2 Review and evaluate tender content and process using outcome and feedback provided by client and stakeholders</p> <p>5.3 Adjust procedures if required to improve subsequent bids</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform calculations related to product and production costings.
- Reading skills to interpret tender requirements.
- Writing and oral communication skills to consult with workplace and stakeholders and prepare tenders.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## **Unit Mapping Information**

Release 1. Supersedes and equivalent to MSFFT4012 Prepare a tender submission.

# Assessment Requirements for MSFFDM4011 Prepare tender submissions

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria updated to active voice. Range of Conditions removed and relevant content added to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFT4012 Prepare a tender submission.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- prepare two formal tenders for different and significant goods and services that address:
  - the full requirements of the tender brief
  - total resource requirements
  - total costing covering all components and scenarios
  - legislative requirements
  - options for the client.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work area for which tender is being prepared, including:
  - compliance requirements (internal and external)
  - quality requirements
- features and formats of complex information that includes:
  - multi-trade work instructions and work orders
  - building and structural plans and safety procedures – and how to interpret them
- report writing techniques
- factors that impact decision to submit tenders:
  - resources
  - capacities
  - capabilities
- tender processes:
  - management
  - preparation
  - submission

- review
- evaluation
- financial and legal requirements for tendering
- legislation relating to tendering and contracting for goods and/or services of the workplace.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - requests for tender
  - computer equipment and software.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4012 Produce computer-aided line and component production drawings

## Modification History

Release 1. Unit code and title changed. Application changed. Performance Criteria simplified and changed to active voice. Range of Conditions removed with relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and clarify volume/frequency of evidence. Supersedes and is equivalent to MSFDN4002 Produce line and component production drawings.

## Application

This unit describes the skills and knowledge required to use computing and software capabilities to produce line and component production drawings intended for use in a furnishing industry production, manufacturing or marketing environment.

This unit applies to individuals required to create line drawings as part of their job role in design, manufacturing and similar workplaces for production purposes.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design documentation and machine interface

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Produce line drawings	1.1 Identify and obtain essential information that informs drawing requirements 1.2 Select presentation style and appropriate software to achieve desired result 1.3 Create clear drawings that accurately reflect product specification and presentation requirements
2. Prepare component production drawings	2.1 Obtain essential information on component specifications, dimensions and drawing and labelling management 2.2 Identify drawing conventions and specifications to be noted on

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	drawing 2.3 Plot dimensions and connect to match appropriate drawing view or perspective 2.4 Identify and note required production information, special requirements and drawing information 2.5 Check drawing for accuracy, clarity and compliance with workplace documentation requirements 2.6 Label, store and process drawing in accordance with workplace requirements

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret and present technical information and calculate measurements.
- Reading skills to interpret requirements.
- Writing skills to communicate production information and requirements.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFDN4002 Produce line and component production drawings.

## Links

# Assessment Requirements for MSFFDM4012 Produce computer-aided line and component production drawings

## Modification History

Release 1. Unit code and title changed. Application changed. Performance Criteria simplified and changed to active voice. Range of Conditions removed with relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and clarify volume/frequency of evidence. Supersedes and is equivalent to MSFDN4002 Produce line and component production drawings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- produce three computer-aided line and production drawings, of which one must be 3D, and:
  - interpret specifications and measurements in two and three-dimensional (2D and 3D) forms across the three drawings.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- typical features and functions of computer-aided drawing programs and their application in producing detailed line and production drawings:
  - drawing tools
  - view displays
  - edit functioning
  - working layers
  - plotting
- basic elements of line and component production drawings:
  - size and shape of component or product
  - projection and production method
  - limits, fits and tolerances of size, form and position
  - surface treatments
  - materials specifications
- regulatory requirements, recognised standards and codes, and industry practices for drawing.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design concepts
  - specifications
  - computer-aided design equipment included current industry-standard software.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFDM4013 Produce curved and shaped components for custom furniture

### Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to include volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFM4003 Produce curved and shaped components for custom furniture.

### Application

This unit describes the skills and knowledge required to produce curved and shaped components for custom furniture or similar products in in furnishing or similar operations.

This unit applies to individuals working in a manufacturing or design studio environment who produce custom curved or shaped components, either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Workshop practice

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Verify and comply with relevant legislative, work health and safety and organisation requirements related to producing curved and shaped components 1.2 Read and interpret job specifications to identify processes and materials 1.3 Identify, evaluate and select production materials 1.4 Select and check tools and equipment in accordance with workplace procedures 1.5 Identify, evaluate and select techniques for bending, forming and

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	shaping components for particular applications 1.6 Plan sequence of work, including the starting point, to ensure efficiency and quality of construction 1.7 Develop and document quality-checking procedures for each step of production process
2. Produce components	2.1 Set out component specifications in accordance with work instructions and mark materials following industry best-practice 2.2 Operate tools, machines and equipment in accordance with safety requirements and manufacturer specifications 2.3 Bend, form and shape materials in accordance with production plan 2.4 Check components against specified tolerances, fit and accuracy in job specifications
3. Finalise operation and maintain equipment	3.1 Prepare product for finishing in accordance with design specifications 3.2 Clean, maintain and store carving tools and other equipment in accordance with manufacturer specifications 3.3 Clean and clear work area in accordance with workplace procedures 3.4 Complete required workplace documentation

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform calculations including measurements.
- Reading skills to interpret design information and specifications.
- Writing skills to record and report on production.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM4003 Produce curved and shaped components for custom furniture.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFDM4013 Produce curved and shaped components for custom furniture

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to include volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFM4003 Produce curved and shaped components for custom furniture.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- produce six significant timber curved components, five from solid timber and one using ply:
  - one involving shaping from solid timber using hand techniques
  - one involving shaping from solid timber using machine techniques
  - one involving laminating
  - one involving use of heat/steam
  - one involving other techniques
- items must demonstrate appropriate design, use of materials and strength for purpose
- perform checks on tools and equipment used across the six components, relating to appropriateness for use, service standards and safety.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- techniques for timber bending, forming and shaping, including:
  - laminating
  - coopering
  - steam bending
  - saw kerfing
  - hand shaping
  - machine shaping
  - timber shaped by hand or static machine tools
- types and characteristics of materials use in the curving or shaping of components, including:
  - solid timber and timber composites including plywood, medium density fibreboard (MDF) and veneer

- plastic laminate
- sheet metal
- adhesives
- screws
- nails
- dowels
- decorative finishes
- abrasive paper
- finishing materials
- types, characteristics, uses, limitations and maintenance requirements of solid timbers commonly used in furniture production
- types, characteristics, uses and limitations on hand and power tools used in timber bending, forming and shaping, including:
  - band, cross-cut, mitre, panel and rip saws
  - surface and panel planers
  - belt sanders
  - horizontal borers
  - vertical drill presses
  - dove-tailers
  - pedestal grinders
  - wood-turning lathes
  - veneer guillotines
  - presses
- interpretation of plan representations of furniture design
- techniques for the preparation of drawings/set-outs/rods and geometrical concepts
- workflow within the workplace
- applicable work health and safety, legislative and workplace requirements relevant to the production of curved and shaped components for custom furniture are verified and complied with
- workplace and site standards, requirements, policies and procedures for the production of curved and shaped components for custom furniture

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - hand and power tools
  - a wide range of timber and timber composite materials

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# MSFFDM4014 Produce manual and computer-aided drawings from design concepts

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria simplified and changed to active voice. Range of Conditions removed with relevant information moved to Assessment Requirements. Assessment Requirements changed to include volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFDN4001 Produce drawings from design concepts.

## Application

This unit describes the skills and knowledge required to produce manual and computer-aided drawings of furnishing or similar products from design concepts.

This unit applies to individuals required to create drawings as part of their job role in design, manufacturing and similar workplaces, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design documentation and machine interface

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for drawing work	1.1 Identify product purpose, characteristics and production materials and methods, and assess impact of these on drawing process 1.2 Confirm type of drawing to be developed from information and select appropriate medium and tools 1.3 Set up hardware and software as required in accordance with operating instructions and workplaces procedures 1.4 Identify drawing conventions and specifications for notation on drawing 1.5 Establish and document design concept requirements, identifying dimensions, angles, shapes and finished size

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Quantify and draft initial drawing	2.1 Accurately plot dimensions from prototype sketch and documented specifications 2.2 Connect dimensional points to match appropriate drawing view 2.3 Accurately note required production information or special requirements 2.4 Note drawing conventions and specifications on documentation
3. Complete drawing	3.1 Check angles, shapes and dimensions against specifications and concept prototype drawing 3.2 Identify and make required adjustments to designs based on review and consultation with relevant people 3.3 Check drawing for compliance with workplaces documentation requirements 3.4 Store data files in accordance with operating instructions and workplaces procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform calculations.
- Reading skills to interpret the product or design specifications.
- Writing skills to document production and other requirements.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFDN4001 Produce drawings from design concepts.

## Links

# Assessment Requirements for MSFFDM4014 Produce manual and computer-aided drawings from design concepts

## Modification History

.Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria simplified and changed to active voice. Range of Conditions removed with relevant information moved to Assessment Requirements. Assessment Requirements changed to include volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFDN4001 Produce drawings from design concepts.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- interpret specifications and measurements in two and three-dimensional (2D and 3D) form, and:
  - produce three drawings from design concepts, including:
    - one manual drawing
    - one computer-aided 2D drawing
    - one computer-aided 3D drawing
  - select appropriate equipment and software to achieve the drawing requirements
  - utilise the features and functions of equipment and software in a best-practice manner.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- manual and computer-aided drawing:
  - processes
  - techniques
  - expected features
  - presentation protocols
- principles for design and manufacture, especially relating to furniture and furnishings
- current industry-standard softwares used for CAD, including their features and functions:
  - drawing tools
  - view displays
  - edit functions
  - working with layers
  - plotting
  - printing

- regulatory requirements, recognised standards and codes, and industry practices for drawing.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design concepts
  - specifications
  - drawing equipment and current industry-standard software

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

## MSFFDM4015 Produce patterns and templates

### Modification History

Release 1. Unit code and Application changed. Performance Criteria simplified and changed to active voice. Range of Conditions removed with relevant information moved to assessment requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFDN4003 Produce patterns and templates.

### Application

This unit describes the skills and knowledge required to plan process and plot dimensions to develop patterns and/or templates for production processes using both hand tools and computer-assisted production.

This unit applies to individuals working in design and manufacturing roles who produce patterns and templates, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Design documentation and machine interface

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for and dimension the task	1.1 Identify and follow work health and safety requirements 1.2 Correctly interpret customer orders to establish required sizes of finished products 1.3 Check size requirements in relation to production process and finishing capacity of workplace
2. Plan process	2.1 Identify material for pattern or template for approximate size and characteristics 2.2 Identify, locate and assemble required instruments and equipment 2.3 Correctly interpret drawings and related specifications 2.4 Check procedures for using pattern development instruments and tools and prepare equipment for use

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
3. Plot dimensions	3.1 Use equipment and tools in accordance with procedures 3.2 Measure, explode and plot each dimension maintaining appropriate angles, arcs and curves 3.3 Use visual inspection and measurements to compare pattern dimensions and shapes with drawings and specifications
4. Complete pattern or template	4.1 Complete pattern or template ensuring that pattern indicates completion date and original drawing details 4.2 Obtain required approvals of pattern or template 4.3 Mark plans with notations for workplace requirements, including authorship, process or customer requirements, authorisation and any review dates 4.4 Copy and file plans in accordance with workplace policies and procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform calculations including measurements.
- Reading skills to interpret job requirements.
- Writing skills to document requirements.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFDN4003 Produce patterns and templates.

## Links

# Assessment Requirements for MSFFDM4015 Produce patterns and templates

## Modification History

Release 1. Unit code and Application changed. Performance Criteria simplified and changed to active voice. Range of Conditions removed with relevant information moved to assessment requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFDN4003 Produce patterns and templates.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- interpret drawings and select appropriate mediums and materials to produce a minimum of three patterns or templates which individually or cumulatively make use of three different types of materials, and
  - produce patterns and templates by hand and by computer.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types, characteristics, uses and limitations of pattern and template materials
- pattern and template production:
  - procedures and processes
  - techniques
- softwares suitable for production of patterns and templates, and their applications
- operating requirements of equipment and work systems in own work area
- regulatory requirements, recognised standards and codes, and industry practices.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - drawings
  - specifications
  - information on production/fabrication process
  - computer equipment and software.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4016 Produce timber veneered components for custom furniture

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFM4004 Produce timber veneered components for custom furniture.

## Application

This unit describes the skills and knowledge required to produce timber veneered components including laminates (two or more layers of veneer adhered to each other) for custom-made furniture and similar products in a wide variety of operations.

This unit applies to individuals working in a manufacturing or design studio environment who produce custom curved or shaped components, either alone or as part of an internal or external team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Competency Field

Workshop practice

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Verify and comply with relevant legislative, work health and safety and workplace requirements relating to producing timber veneered components 1.2 Read and interpret job specifications to identify processes and materials 1.3 Identify, evaluate and select suitable timber or timber veneer material, evaluated and selected 1.4 Check tools, equipment and materials in accordance with workplace procedures

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.5 Plan and document sequence of work, including starting point, to ensure efficiency and quality of finish</p> <p>1.6 Develop and document quality-checking procedures for each step in veneering process</p>
2. Prepare timber veneer	<p>2.1 Select timber and prepare the cutting face in accordance with procedures</p> <p>2.2 Cut timber veneer along grain at specified thickness</p> <p>2.3 Monitor veneer thickness and consistency in context of size and tolerances</p> <p>2.4 Dress veneer to the required tolerances for further use</p>
3. Lay out and prepare materials	<p>3.1 Lay out veneer design from job specifications</p> <p>3.2 Select veneers and check for flaws</p> <p>3.3 Match veneers and select and prepare for method of joining to adjacent veneers</p> <p>3.4 Prepare for application and lay out veneers</p> <p>3.5 Select and prepare suitable processes for joining to backing and adjacent veneers</p> <p>3.6 Select and prepare for style of edge finish</p>
4. Apply or fit and finish	<p>4.1 Measure, mark and cut veneers to size, and apply to base material</p> <p>4.2 Apply adhesives in accordance with workplace procedures and manufacturer instructions</p> <p>4.3 Apply selected joining process in accordance with workplace procedures, including use of protective equipment</p> <p>4.4 Complete final trim and finishing to job specifications</p> <p>4.5 Check work against required quality standards, and rectify any non-conformities</p>
5. Finalise the work sequence	<p>5.1 Prepare product for finishing in accordance with design specification</p> <p>5.2 Clean, maintain and store carving tools in accordance with manufacturer specification</p> <p>5.3 Clean and clear work area in accordance with workplace procedures</p> <p>5.4 Complete workplace documentation</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform calculations including measurements.
- Reading skills to interpret job requirements.
- Writing skills to complete workplace documentation.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM4004 Produce timber veneered components for custom furniture.

# Assessment Requirements for MSFFDM4016 Produce timber veneered components for custom furniture

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFM4004 Produce timber veneered components for custom furniture.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- prepare a minimum of one significant veneer, including:
  - the selection of materials
  - the preparation of the cutting face
  - the cutting and dressing of the veneer
- apply and finish veneers to at least three different surfaces, including:
  - one flat
  - one curved
  - one laminate
  - at least two requiring veneer edging
- perform checks on tools and equipment used in the above production items, relating to appropriateness for use, service standards and safety.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types, characteristics, uses and limitations of veneers including laminates
- techniques for the manufacture and application of veneers, including:
  - mechanical press
  - vacuum technique
  - hot glue hammering
  - butting two right angle edges together then ‘stitching’ the veneer using a hot melt glue or tape
  - using a scarf joint then gluing the surfaces together
- types, characteristics, uses and limitations of different veneering timbers:
  - wood
  - particleboard

- medium density fibreboard (MDF)
- techniques for style and edge finishes, both solid timber and veneer edging to cover exposed edges
- techniques for briefing and plan representations of furniture design
- the preparation of drawings or set-outs
- types, characteristics, uses and limitations of tools and equipment and procedures for their safe use, operation and maintenance, including:
  - knives
  - chisels
  - measuring tapes or rules
  - mallets
  - squares
  - levels
  - planes
  - band saws
  - rotary lathe
  - slicing machine
  - half round lathe
  - power saws
  - power drills/screwdrivers
  - hand drills
  - pneumatic tools, compressor and spray equipment
  - clamps
  - screwdrivers
  - rollers
  - laminate trimmers
  - cutters and hand routers
  - sandpaper
  - wire wool
  - sanding block
- materials used in the veneer manufacturing and application process, including:
  - timber
  - manufactured board
  - laminates
  - timber strips
  - adhesives
  - cleaning materials
  - tapes
- workflow in relation to furniture production and application of timber veneer

- applicable work health and safety, legislative and workplace requirements relevant to producing timber veneered components for custom-made products
- workplace and site standards, requirements, policies and procedures for the production of timber veneer components.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - veneer manufacturing and application equipment and materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFDM4017 Purchase materials and consumables

### Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFT4011 Purchase materials and consumables.

### Application

This unit describes the skills and knowledge required to purchase materials and consumables for production within a furnishing or similar enterprise, through existing contracts and other formal purchasing arrangements or through local purchase delegation.

This unit applies to individuals working in a manufacturing or design studio environment who are involved with production preparation, stock management and estimations, either working alone or as part of an internal or external team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Competency Field

Project management and professional development

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify purchasing requirements	1.1 Identify purchasing requirements from material specifications, orders and instructions, and in accordance with workplace procedures 1.2 Prioritise purchasing requirements in consultation with others in accordance with workplace procedures 1.3 Determine and confirm quantities, quality of goods, price limitations and delivery requirements in consultation with appropriate personnel and in accordance with workplace procedures
2. Source materials and consumables	2.1 Identify sources of materials and/or consumables from workplace preferred supplier lists or through networks and knowledge of local and/or overseas suppliers

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	2.2 Report difficulties in supply in accordance with workplace procedures 2.3 Confirm availability of supply
3. Compare costs	3.1 Contact alternative suppliers to check costing 3.2 Compare actual costs with predicted costs 3.3 Recommend alternative suppliers as relevant to appropriate personnel in accordance with workplace procedures 3.4 Delegate ordering of goods/materials/equipment in accordance with workplace procedures
4. Purchase materials and consumables	4.1 Ensure supplier has capacity to meet price, quality and delivery expectations 4.2 Develop purchase order or list in accordance with workplace procedures 4.3 Place order with supplier and confirm delivery schedules 4.4 Issue and respond to orders and invoices in accordance with workplace procedures
5. Maintain and monitor material and consumable supplies	5.1 Monitor stock regularly using inventory records and physical checks, where applicable, to ensure maintenance of supply 5.2 Maintain up-to-date records of materials and consumables 5.3 Document acquisition requirements in accordance with workplace procedures 5.4 Suggest improvements to purchasing operations and, where authorised, negotiate changes
6. Liaise with other departments	6.1 Establish communication channels with other departments in accordance with workplace procedures 6.2 Liaise with other departments to ensure customer requirements are achieved

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform calculations.
- Writing skills to complete ordering-relating documentation.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## **Unit Mapping Information**

Release 1. Supersedes and is equivalent to MSFFT4011 Purchase materials and consumables.

## **Links**

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFDM4017 Purchase materials and consumables

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFT4011 Purchase materials and consumables.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- purchase materials on a minimum of four occasions, including two different materials and at least one perishable consumable purchase, in accordance with workplace procedures.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- contemporary supply or purchasing systems theory
- inventory systems management
- production planning processes and theories
- company operating procedures, including procedures for purchasing materials and consumables
- material and consumable usage rates
- operation requirements of equipment and work systems in own work area
- work health and safety requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- access to workplace policies, procedures and stock documentation

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4018 Research and organise product inspection and testing

## Modification History

Release 1. Unit code and title changed. Application changed. Substantial changes to Elements and Performance Criteria. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and include volume/frequency of evidence. Supersedes and is not equivalent to MSFFT4007 Sample, inspect and test products to specifications.

## Application

This unit describes the skills and knowledge required to identify specifications and test procedures for products, identify and organise the application of authorised testing procedures, interpret test results and report findings within a furnishing or similar workplace.

This unit applies to individuals working in a manufacturing or design studio environment who engage with quality and other control measures relating to products, either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Project management and professional development

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify product specifications and test and inspection requirements	1.1 Read and interpret product quality specifications and drawings to inform test requirements 1.2 Identify test parameters from product quality specifications and drawings 1.3 Identify test methods for each required test parameter and select most effective and efficient method according to workplace procedures 1.4 Identify design features that may impact testing methods, results and inspection procedures

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Develop inspection and testing procedures	<p>2.1 Identify appropriate standards, reference materials, test methods or procedures that may be applicable</p> <p>2.2 Assess suitability of available standards, reference materials, test methods and/or procedures against testing requirements</p> <p>2.3 Identify workplace hazards associated with inspection and testing of product for inclusion in procedures</p> <p>2.4 Identify the need for specific equipment, specialised facilities, expert personnel or training needs</p> <p>2.5 Select appropriate test methodology consistent with testing requirements and resource availability</p> <p>2.6 Identify any changes required to workplace procedures to implement testing or inspection procedures</p> <p>2.7 Identify an appropriate sample size of conforming and potentially nonconforming products, materials for testing according to workplace requirements</p>
3. Document procedures	<p>3.1 Write procedures based on identified requirements for specific product and in accordance with workplace documentation standards</p> <p>3.2 Perform test of procedures to ensure suitability of method and accuracy of test procedures</p> <p>3.3 Ensure safety, sample preparation, testing, data handling or evidence gathering and reporting procedures are in place</p>
4. Organise testing or inspection of product	<p>4.1 Ensure all required personnel are available and approved for participation in work area in accordance with workplace procedures</p> <p>4.2 Ensure tests are conducted in accordance with documentation and workplace procedures</p> <p>4.3 Analyse results of testing to ensure validity of procedures</p> <p>4.4 Modify test or inspection procedures as required to ensure quality of results</p>
5. Report findings	<p>5.1 Document findings of tests in accordance with procedures</p> <p>5.2 Recommend resolutions for identified potential or existing problems with tested product in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information.
- Reading skills to interpret product specifications and drawings.
- Writing skills to record and report on product inspection and testing results.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFFT4007 Sample, inspect and test products to specifications.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFDM4018 Research and organise product inspection and testing

## Modification History

Release 1. Unit code and title changed. Application changed. Substantial changes to Elements and Performance Criteria. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and include volume/frequency of evidence. Supersedes and is not equivalent to MSFFT4007 Sample, inspect and test products to specifications.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- read and interpret job specifications, drawings, test/inspection and workplace procedures to develop and implement test/inspection procedures for a minimum of four different products or procedures.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- general quality systems theory
- sampling techniques for commonly encountered materials including:
  - timber
  - metal alloys
  - glass
  - fabrics and textiles
  - plastics
  - leather
  - adhesives
  - fillers; and
  - finishes
- inspection techniques and faults common within the sector products
- testing techniques (destructive and nondestructive) relevant to the sector and related equipment/aids
- requirements and processes of specialised inspection and test personnel
- testing requirements at all stages of product development and production, including of samples of raw materials, components, assemblies and end products
- workflow in relation to required times and stages where quality checking is required

- work health and safety requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- types of designer or drawer specifications and instructions, including the softwares through which these might be developed and communicated
- quality systems documentation or equivalent containing sampling, inspecting and testing frequency and criteria
- workplace specifications and requirements.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - product specifications and drawings
  - access to specialised facilities and personnel as required.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM4019 Research and select manufacturing technologies

## Modification History

Release 1. Supersedes and is not equivalent to MSFFDT5008 Research and recommend alternative manufacturing processes and MSFFDT5009 Research and recommend machine technology.

## Application

This unit describes the skills and knowledge required to determine production considerations and then to investigate and select a manufacturing technology that is suitable for the design concept.

This unit applies to individuals working in a manufacturing or design studio environment. They analyse and compare technical information from a wide range of sources to develop a design solution.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Furniture design and manufacturing – general

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine production considerations	1.1 Identify and collate information about project brief and initial design concepts 1.2 Review information and establish production parameters and constraints 1.3 Identify all those involved in the production process and seek input on key considerations for selecting manufacturing technology 1.4 Establish key technical parameters for selection of manufacturing technology
2. Investigate potential manufacturing technologies	2.1 Identify and assess information sources on potential technologies 2.2 Assess feasibility of technologies in context of design concept and overall design brief

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	2.3 Identify and interrogate how manufacturing process and its technical application may impact eventual outcome 2.4 Identify sustainability and safety aspects of technologies and assess implications for use 2.5 Source and compare information about costs and technology access against project brief
3. Refine ideas and select solution	3.1 Explore and refine ideas about technologies through process of reflection and testing 3.2 Test compatibility of manufacturing technologies with design concept and adapt approaches 3.3 Choose manufacturing technology solution that works with proposed design solution and make it integral to ongoing design process 3.4 Provide clear and relevant rationale for technology chosen

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in performance criteria.

- Numeracy skills to interpret technical information.
- Reading skills to interpret research information and design briefs.
- Writing skills to record and report on manufacturing technologies research and document solutions.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFFDT5008 Research and recommend alternative manufacturing processes and MSFFDT5009 Research and recommend machine technology.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFDM4019 Research and select manufacturing technologies

## Modification History

Release 1. Supersedes and is not equivalent to MSFFDT5008 Research and recommend alternative manufacturing processes and MSFFDT5009 Research and recommend machine technology.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- research and select manufacturing technologies and their application to three different design briefs, which individually or cumulatively involve at least two types of manufacturing technologies.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- how the selection of the manufacturing technology sits within the overall design and production process
- information needed to inform technology selection
- roles and responsibilities of those involved in decisions about selection of manufacturing technologies
- types of technical parameters that need to be considered and the nature of the relationship between the design concept and manufacturing technologies
- sources of information on manufacturing technologies
- key features, costs, efficiencies and technical application of current and emerging technologies, including:
  - CNC operations
  - 3D printing
  - foundries and casting
  - robotics
  - laser cutting
  - water-jet cutting
- how to structure and present information and recommendations.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs and associated concepts
  - information technology for research and presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors

## Links

Companion Volume implementation guides are found in VETNet -

## MSFFDM4020 Research and select product finishes

### Modification History

Release 1. Unit Code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant items moved to Assessment Requirements. Assessment Requirements changed to include volume/frequency of evidence and remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFDT4010 Research and select furniture product finishes.

### Application

This unit describes the skills and knowledge required to determine project requirements, and then to research and select finishes that meet the requirements of the brief.

This unit applies to individuals working in a manufacturing or design studio environment who analyse and compare product information from a wide range of sources to develop a design solution, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Design practice

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine project requirements	1.1 Review and clarify project brief with client 1.2 Confirm and evaluate parameters and constraints of project from specifications 1.3 Select work resources based on the needs of project 1.4 Identify and assess aspects of brief that inform finish selection 1.5 Identify key project stakeholders and establish required communication protocols
2. Research finish options	2.1 Assess aesthetic requirements of finish and identify potential options 2.2 Evaluate intended use against functional features of different products 2.3 Identify and consider new and emerging finish technologies for their

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	application to the brief 2.4 Identify application requirements in terms of available expertise 2.5 Evaluate finish properties for their safety and sustainability 2.6 Source and compare information about costs and availability against project brief
3. Refine ideas and select finishes	3.1 Explore and refine ideas about finishing options through a process of reflection and testing 3.2 Choose a preferred solution based on research findings that satisfies elements and principles of design and key objectives of project brief 3.3 Provide clear and relevant research information highlighting findings and rationale for finishes chosen

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information.
- Reading skills to interpret design briefs and research information.
- Writing skills to document research findings and solutions.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and not equivalent to MSFFDT4010 Research and select furniture finishes.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFDM4020 Research and select product finishes

## Modification History

Release 1. Unit Code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant items moved to Assessment Requirements. Assessment Requirements changed to include volume/frequency of evidence and remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFDT4010 Research and select furniture product finishes.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- research and select finishes that respond to three different design briefs and that individually or cumulatively involve at least:
  - two types of base material onto which the finish is applied
  - two types of finishing materials
  - two different application methods.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- elements and principles of design, their interrelationships, and how they are used in relation to finishes
- characteristics, properties and selection criteria for different finishing or coating materials, both aesthetic and functional, including:
  - lacquers
  - laminates
  - metal
  - oils
  - paints
  - paper
  - pigments
  - plastics
  - stainless steel
  - stains
  - synthetics
  - textiles
  - veneers

- vinyls
- waxes
- the interactions of different finishing materials with different base materials
- properties of finishes and how these inform recommendations:
  - aesthetics
  - application methods and technologies
  - construction, composition and materials, including tactile nature of finishes
  - maintenance requirements
  - quality
  - safety application, flammability, fixing requirements
  - sustainability sourcing, production, longevity, recycling or end of life disposal
- current and emerging finishing technologies
- how to structure and present research information and recommendations.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - product design briefs
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -

## MSFFDM4021 Research furniture styles and movements

### Modification History

Release 1. Unit Code and Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and include volume/frequency of evidence. Supersedes and is not equivalent to MSFFDT4012 Research furniture styles and movements.

### Application

This unit describes the skills and knowledge required to research furniture styles and movements and analyse how they influence design by accessing a range of information sources. It also covers identifying influences on the design of furniture and documenting information for use in future design projects.

This unit applies to individuals working in a manufacturing or design studio environment who analyse and compare product information from a wide range of sources to develop a design solution, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

History of design

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan research	1.1 Verify and ensure compliance with relevant legislative, work health and safety and workplace requirements related to researching furniture styles and movement 1.2 Clearly define research objectives and scope based on work needs from design brief 1.3 Evaluate and select formal and informal research methods based on their potential to meet research objective 1.4 Identify and locate relevant and credible sources of information on furniture styles and movements

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Gather and analyse information on furniture styles and movements	2.1 Gather information using a systematic approach 2.2 Establish relevance of information against research objectives 2.3 Compare and contrast different information sources and extract key information 2.4 Identify different influences on furniture styles, movements and features 2.5 Identify significant trends, designers and techniques and their influences on styles and movements 2.6 Apply research information to current furniture design trends, philosophy and surrounding buildings 2.7 Organise and compile research materials and results of research in a manner that facilitates future use and reference
3. Maintain currency with furniture styles and movements	3.1 Regularly check research sources and compiled information for usefulness in informing design projects 3.2 Analyse current and emerging cultural, economic and environmental influences on furniture styles and movements for impact and usefulness in future projects 3.3 Identify and pursue opportunities to update and expand knowledge of styles and movements 3.4 Incorporate findings from research into design outcomes based on project needs

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret research information.
- Writing skills to communicate research outcomes.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and not equivalent to MSFFDT4012 Research furniture styles and movements.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFDM4021 Research furniture styles and movements

## Modification History

Release 1. Unit Code and Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria and include volume/frequency of evidence. Supersedes and is not equivalent to MSFFDT4012 Research furniture styles and movements.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- research and collate or document key aspects of information on all of the following to inform one significant project:
  - significant influences on furniture styles
  - individual designers of note
  - changes in furniture styles, movements and philosophy over time
  - current and emerging furniture trends that impact design practice.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- credible sources of information on furniture styles and movements, and the type of information they can provide
- importance of accurate referencing of information sources
- types of research techniques, both formal and informal
- significant influences on furniture styles and movements, including:
  - cultural and social
  - economic
  - environmental
  - geographical
  - individual designers
- ways to collate and/or document research information to facilitate future use.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - information technology for research.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -

# MSFFDM4022 Select, use and maintain hand tools for the creation of custom products

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to clarify volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFDT4013 Select use and maintain hand tools for the creation of custom furniture.

## Application

This unit describes the skills and knowledge required to select and use hand tools in applications relating to custom furniture making. It includes manufacturing specialist hand tools that support unique functions.

This unit applies to individuals working in a manufacturing or design studio environment use hand tools in the creation of products, either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Workshop practice

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for hand-tools work	1.1 Verify and ensure compliance with work health and safety (WHS), legislative and workplace requirements relevant to selection and applicable to use of hand tools 1.2 Research and identify suitable type and range of hand tools based on their functions, manufacturing specifications and quality reputations 1.3 Select hand tools based on job requirements 1.4 Check hand tools for serviceability, precision settings, maintenance compliance and safety

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Ensure equipment for holding or supporting materials while using hand tools is available
2. Identify and manufacture specialist hand tools	<p>2.1 Identify need for manufacture of specialist hand tools from research undertaken of existing hand tool capabilities</p> <p>2.2 Complete and verify design of specialist tool based on tool requirements</p> <p>2.3 Select materials for the specialist tool from required functions and available materials options</p> <p>2.4 Manufacture specialist tool to specifications</p> <p>2.5 Test and modify specialist tool as required to satisfy specified function</p> <p>2.6 Document design specifications in accordance with workplace procedures</p>
3. Use hand tools	<p>3.1 Locate and hold materials in place for hand tool application</p> <p>3.2 Ensure hand tool safety requirements are complied with throughout operation</p> <p>3.3 Apply and adjust hand tools as required to achieve required specificity of outcome</p> <p>3.4 Maintain hand tools as needed during operation to ensure continuing achievement of specified outcomes</p> <p>3.5 Safely store hand tools during operation when not in immediate use in accordance with manufacturer specifications and workplace procedures</p>
4. Finalise operation and maintain tools	<p>4.1 Clean, maintain and store all tools and equipment in accordance with manufacturer specifications</p> <p>4.2 Clean and clear work area in accordance with workplace procedures</p> <p>4.3 Complete required workplace documentation</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information.

- Writing skills to complete workplace documentation.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## **Unit Mapping Information**

Release 1. Supersedes and equivalent to MSFFDT4013 Select, use and maintain hand tools for the creation of custom furniture.

## **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFDM4022 Select, use and maintain hand tools for the creation of custom products

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to clarify volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFDT4013 Select use and maintain hand tools for the creation of custom furniture.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- select, use and maintain six different hand tools for different specified production functions across three different products, utilising the full capabilities of the hand tools to achieve outcomes
- design and manufacture one specialist hand tool for a specified production function
- tune and sharpen two of the following:
  - chisels
  - hand planes
  - spokeshave.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types, characteristics, uses, limitations and maintenance requirements of the range of hand tools used in furniture production, including:
  - hand planes
  - chisels
  - hand saws
  - spokeshave
  - hammer
  - mallet
  - marking-out tools
  - files
  - rasps
  - scraper
  - screwdrivers

- hand drill
- straight edges
- knives
- clamps
- steel/bronze wool
- sandpaper
- brushes
- stones and whetstones
- grinder
- manufacturing specifications for hand tools
- processes for evaluating the quality of hand tools in terms of specifications, safety, maintainability and commercial reputation
- techniques for the design of specialised hand tools and the manufacturer of one-off tools
- workflow within the workplace
- relevant work health and safety regulations, legislation, regulations, standards and codes of practice relevant to use of hand tools
- workplace and site standards, requirements, policies and procedures for use of hand tools.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a wide range of industry-standard hand tools.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFDM4023 Set up, operate and maintain basic static woodworking machines for furniture designs

### Modification History

Release 1. Unit code, title and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to include volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFDT4009 Set up, operate and maintain basic static woodworking machines for furniture designs.

### Application

This unit describes the skills and knowledge to set up, operate and maintain basic static woodworking machines to achieve design requirements for furniture or similar products. It includes tuning and general problem-solving.

This unit applies to individuals working in a manufacturing or workshop environment who set up, operate and maintain basic static woodworking machines, either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Workshop practice

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine set-up and operating requirements of woodworking machines	1.1 Verify and ensure compliance with relevant legislative, work health and safety and workplace requirements related to selection and use of static woodworking machines 1.2 Identify set-up requirements for static woodworking machines in accordance with furniture design and safety requirements 1.3 Identify operating requirements to achieve design outcomes and determine safety requirements

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Set up and operate static woodworking machines	2.1 Check selected machines for serviceability, precision settings, maintenance compliance and safety in accordance with workplace procedures 2.2 Interpret work specifications and instructions and set up machines to perform operations 2.3 Operate machines in accordance with manufacturer operating procedures to achieve required work outcome 2.4 Monitor work to ensure quality standards are met 2.5 Follow safety procedures
3. Maintain static woodworking machines	3.1 Assess machines for performance compliance 3.2 Identify, rectify and report on faults or non-compliance issues, or replace as needed in accordance with workplace procedures 3.3 Apply problem-solving techniques to identify and address operational problems 3.4 Conduct routine maintenance to ensure optimal performance of machines 3.5 Clean and clear work area in accordance with workplace procedures 3.6 Clean, maintain and store all machines in accordance with manufacturer specifications

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit to the performance criteria.

- Numeracy skills to interpret technical information.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and equivalent to MSFFDT4009 Set up, operate and maintain basic static woodworking machines for furniture designs.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFDM4023 Set up, operate and maintain basic static woodworking machines for furniture designs

## Modification History

Release 1. Unit code, title and Application changed. Elements and Performance Criteria changed to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to include volume and frequency of evidence and remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFDT4009 Set up, operate and maintain basic static woodworking machines for furniture designs.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- set up, operate and maintain four different basic static woodworking machines for use on two different projects.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types, characteristics, uses, limitations and maintenance requirements of the range of static woodworking machines used in furniture production, including:
  - table saw
  - thicknesser
  - jointer
  - band saw
- interrelationship between basic static woodworking machines and design outcomes
- manufacturing specifications for static woodworking machines
- processes for evaluating the quality of static woodworking machines in terms of specifications, safety, maintainability and commercial reputation
- workflow within the furnishing workplace
- applicable work health and safety, legislative and workplace requirements relevant to the selection and use of static woodworking machines.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

- required range of basic static woodworking machines.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM5001 Construct custom furniture using advanced techniques

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice and reviewed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFDT5004 Construct custom furniture using advanced techniques.

## Application

This unit describes the skills and knowledge required to construct original and unique custom furniture using or adapting traditional and innovative construction techniques. It includes interpreting and adapting design specifications that are compatible with the product material, purpose and style of the furniture.

This unit applies to individuals working in a manufacturing or design studio environment who construct custom furniture, either alone or as part of an internal or external team.

No licensing or legislative or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Workshop practice

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	<p>1.1 Verify and ensure compliance with relevant legislative, work health and safety and workplace requirements related to constructing custom furniture</p> <p>1.2 Read and interpret job specifications and other relevant documentation to identify furniture construction and finishing requirements</p> <p>1.3 Select and check tools, equipment and materials prior to use to ensure that they are appropriate for work, serviceable and in safe condition</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Identify product purpose, context, furniture style and construction materials</p> <p>1.5 Plan and document work sequence covering each step in construction process, including sub-assemblies, in accordance with workplace requirements</p> <p>1.6 Develop and document quality-checking procedures for each step in construction process</p>
2. Curve and shape components	<p>2.1 Identify, evaluate and confirm techniques for bending, forming and shaping components as being appropriate for construction requirement</p> <p>2.2 Set out component specifications in accordance with work instructions and mark materials in accordance with industry practices</p> <p>2.3 Use tools, machines and equipment in accordance with safety requirements and manufacturer specifications</p> <p>2.4 Bend, form and shape materials in accordance with production plan and workplace procedures</p> <p>2.5 Check components against specified tolerances, fit and accuracy</p>
3. Veneer components	<p>3.1 Identify, evaluate and select suitable veneer material from design specifications</p> <p>3.2 Use tools, machines and equipment in accordance with safety requirements and manufacturer specifications</p> <p>3.3 Measure, mark and cut veneer components to size based on job specifications</p> <p>3.4 Prepare and lay out veneers for application</p> <p>3.5 Select and prepare suitable joining processes for backing and adjacent veneers</p> <p>3.6 Apply adhesives in accordance with workplace procedures or manufacturer instructions</p> <p>3.7 Produce rough veneering components in accordance with production plan and workplace procedures</p> <p>3.8 Complete final trim and finishing to specifications</p> <p>3.9 Check work against required quality standards, and rectify any non-conformance</p>
4. Make joints	<p>4.1 Identify joints requirements and select type of joint to be used and adapt/design as necessary</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.2 Select tools, adhesives and fasteners to match joint type</p> <p>4.3 Mark out cutting and joining lines to suit joint type</p> <p>4.4 Check measurements and calculations for accuracy to ensure quality outcomes</p> <p>4.5 Identify material features and observe optimal usage criteria</p> <p>4.6 Cut material to specification, and inspect and prepare for joining</p> <p>4.7 Join material in accordance with job specifications</p> <p>4.8 Use fasteners and adhesives to make joints firm where required and in accordance with workplace procedures</p> <p>4.9 Check finished joint against quality requirements</p>
5 Construct sub-assemblies	<p>5.1 Lay out components and materials, including adhesives, trims and accessories, and tools, in accordance with assembly plan</p> <p>5.2 Check components against specification prior to assembly and reject items out of specification</p> <p>5.3 Assemble sub-assemblies using appropriate tools, jigs and fixtures and check against specification for accuracy, fit, twist and distortion</p> <p>5.4 Check sub-assembly quality against plans at identified checkpoints</p>
6. Assemble custom furniture	<p>6.1 Lay out components, sub-assemblies and materials, including adhesives, trims and accessories, and tools, in accordance with assembly plan</p> <p>6.2 Check components and sub-assemblies against specification prior to assembly and reject items out of specification</p> <p>6.3 Assemble components, fit using appropriate tools, jigs and fixtures, and check against specification for accuracy, fit, twist and distortion</p> <p>6.4 Apply hardware and decorative accessories to specification</p> <p>6.5 Prepare product for final finish, including the removal of bruises, scratches, dents and marks</p> <p>6.6 Check product quality against plans at identified checkpoints</p>
7. Finish furniture surface	<p>7.1 Using samples of the type of material surface and specified finish, evaluate various finishing options and select the preferred option</p> <p>7.2 Test sample of material with selected finishing technique to ensure appropriateness</p> <p>7.3 Prepare furniture surface in accordance with finishing specification</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	7.4 Rectify imperfections, pores or nail or screw holes on surface 7.5 Apply finishing processes and materials in accordance with agreed specifications 7.6 Polish or buff surface depending on shine required from specification 7.7 Check work against required quality standards 7.8 Rectify any non-conformity with required quality standards
8. Complete housekeeping	8.1 Store or recycle unused materials as required 8.2 Clean and store tools and equipment in accordance with procedures 8.3 Tag and report faulty or defective equipment in accordance with workplace practices 8.4 Clean and clear work area in accordance with workplace procedures 8.5 Complete workplace documentation, including time log for operations for costing and business improvement activities.

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in performance criteria.

- Numeracy skills to interpret technical information and perform calculations including measurements
- Reading skills to interpret job specifications
- Writing skills to complete workplace documentation.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and equivalent MSFFDT5004 Construct custom furniture using advance techniques.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFDM5001 Construct custom furniture using advanced techniques

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed to active voice and reviewed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFDT5004 Construct custom furniture using advanced techniques.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- complete all aspects of the construction and finishing of two furniture items requiring advanced construction techniques and satisfying high-quality custom-made furniture standards and expectations in terms of innovation, complexity, tolerance and fit of components and quality.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types of tools and equipment used in construction and procedures for their safe use, operation and maintenance
- workflow techniques appropriate for the management of the construction work/project
- presentation and interpretation of plan representation of a furniture design
- techniques for timber bending, forming and shaping including:
  - steam/heat bending
  - curfing
  - pressure bending
  - shaping by hand or static machine
- techniques for the preparation of drawings or set-outs or rods and geometrical concepts
- types, characteristics, uses and limitations of materials
- techniques for the manufacture and application of veneers
- techniques for assembly, fixing and finishing of custom furniture components
- types, characteristics, uses, limitations and safety requirements of adhesives, fasteners and hardware used in custom furniture assembly
- matching requirements of adhesives and fasteners to timbers/materials used
- finishing techniques
- characteristics, properties and selection criteria of finishing materials
- finishing characteristics and properties of timber being used

- applicable work health and safety, legislative and workplace requirements relevant to constructing custom furniture are verified and complied with.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# MSFFDM5002 Coordinate and optimise workplace maintenance programs

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFT5005 Organise enterprise maintenance programs and MSFFT5007 Optimise computer numerically controlled operations.

## Application

This unit describes the skills and knowledge required to establish, organise and implement both preventative and reactive maintenance programs including software updates, capabilities and manipulations required to optimise operational and production performance. It includes computer numerically controlled (CNC) operations as well as other production and facility equipment involved in the production process.

This unit applies to individuals working in a technology- and maintenance-based role within a manufacturing workplace.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design documentation and machine interface

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Clarify maintenance requirements	1.1 Check equipment specifications, service requirements and workplace procedures for recommended maintenance intervals and processes 1.2 Separate special requirements for maintenance from normal lubrication, adjustment and maintenance schedules 1.3 Compare information with previous experience, future equipment use, production requirements and standard operating procedures 1.4 Identify and develop an outline plan for maintenance and a related

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	work schedule that meets workplace needs
2. Establish maintenance systems	<p>2.1 Identify costing for process based on maintenance requirements</p> <p>2.2 Identify workplace health and safety maintenance system requirements</p> <p>2.3 Document and record required production interruptions, processes and procedures</p> <p>2.4 Identify maintenance providers</p> <p>2.5 Analyse maintenance systems options and recommend process to management</p> <p>2.6 Obtain approvals for the maintenance systems concepts and resources</p>
3. Organise maintenance activities	<p>3.1 Identify suitable times for maintenance processes and shutdowns as needed from production schedules and staff rosters</p> <p>3.2 Obtain permission from management for timing of maintenance to optimise the maintenance process and production</p> <p>3.3 Develop detailed work plans based on production schedules, covering the availability of expertise and scheduling of resource availability</p> <p>3.4 Identify employees with the required competencies and, where necessary, facilitate appropriate training and assessment</p> <p>3.5 Obtain approvals for production schedule in accordance with organisational requirements</p> <p>3.6 Refine work plan to ensure the maintenance program will maintain workplace outputs in terms of workplace policy</p>
4. Resource maintenance requirements	<p>4.1 Establish maintenance and reliable supply of required consumables</p> <p>4.2 Confirm availability of externally sourced equipment</p>
5. Complete maintenance procedures	<p>5.1 Complete maintenance work schedule in accordance with the work plan</p> <p>5.2 Take readings, measurements and recordings and compare with equipment, product and other relevant specifications</p> <p>5.3 Identify areas requiring further testing and recommend appropriate procedures for testing to management</p> <p>5.4 Adjust work schedule plan based on experience and complete</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	documentation 5.5 Complete maintenance records and forward to appropriate personnel
6. Optimise operations	6.1 Note areas where changes to equipment operation or routine maintenance are required to maintain optimum work output and equipment life 6.2 Compare production potential of components and equipment with actual outputs using cost–benefit analysis techniques, and analyse reasons for differences 6.3 Identify and analyse opportunities for equipment and systems integration to ascertain the optimal integration model 6.4 Recommend improvements to maintenance operations to management, based on cost–benefit analysis and integration opportunities

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information.
- Writing skills to record and report on workplace maintenance programs.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFFT5005 Organise enterprise maintenance programs and MSFFT5007 Optimise computer numerically controlled operations.

## Links

# Assessment Requirements for MSFFDM5002 Coordinate and optimise workplace maintenance programs

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFT5005 Organise enterprise maintenance programs and MSFFT5007 Optimise computer numerically controlled operations.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- establish the maintenance program for one significant production operation that includes:
  - at least one computer numerically controlled operation
  - coordination of maintenance within the context of production schedules
  - identification of resource requirements for maintenance, including skills of employees involved
  - recording and reporting requirements to provide system visibility and accountability potential
  - identification of opportunities for optimisation across the operation, including for automated processes
- complete one cost–benefit analysis of an existing and significant maintenance program and suggest improvements to maintenance operations and, where authorised, negotiate changes.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- contemporary equipment maintenance theories covering benefits and costs
- the effects of production schedules, time and resource requirements when scheduling the maintenance process
- risk analysis processes
- workplace operating procedures, including procedures for maintenance
- operation requirements of equipment and work systems in the work area, including:
  - computer numerically controlled (CNC) operations
  - competency requirements of the maintenance work activities
  - workplace health and safety maintenance system requirements
- work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others

- prevent damage to goods, equipment and products
- maintain required production output and product quality.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - production schedules and other relevant workplace information
  - access to CNC equipment.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

# MSFFDM5003 Design product suitable for batched or limited production

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed and updated to active voice. Range of Conditions removed and relevant content moved to the Assessment Requirements. Assessment Requirements changed. Supersedes and is not equivalent to MSFFDT5005 Design batch or limited production item of furniture.

## Application

This unit describes the skills and knowledge required to design products suitable for batched or limited production (including one-off items) in a furniture-making or similar operation. It includes the considerations required to enable production of further batches, including details and fittings being produced with jigs and fixtures, and assessing the production methods required for particular materials.

This unit applies to individuals working in a manufacturing or design studio environment who design products with production methods as a consideration, working either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design practice

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Research product needs	1.1 Identify parameters affecting the design of product from client or end recipient and other information sources 1.2 Identify and record product functional needs from client or end recipient following industry best-practice methods 1.3 Investigate similar products in market and design elements from relevant sources 1.4 Assess materials for production-method limitations from materials

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	specifications and client requirements 1.5 Identify and record visual/aesthetic needs of product from client or end recipient following industry best-practice methods 1.6 Identify and record relevant ethical considerations from client or end recipient and other potential collaborators 1.7 Identify and record ergonomic and anthropometric needs from client or end recipient and following industry standards 1.8 Prioritise product needs following industry best-practice methods 1.9 Identify and document relevant batched and limited production-run methods, technologies and equipment that could be applied or used, and work health and safety considerations, based on identified parameters and needs
2. Prepare information for design brief	2.1 Review and clarify product needs, parameters and other factors with client or end recipient 2.2 Report on product needs, including design and production method opportunities, using suitable reporting methods and incorporating client or end recipient feedback 2.3 Identify and record needs that cannot be met and negotiate changes with client or end recipient following industry best-practice methods 2.4 Clarify and agree on outcomes of design process with client or end recipient following industry best-practice methods 2.5 Prepare initial brief following industry best-practice methods
3. Generate ideas in response to design brief	3.1 Analyse product and client needs and integrate into generation of ideas using suitable ideation methods 3.2 Present initial ideas based on design brief and in suitable format 3.3 Refine ideas through review and reworking, both individually and collaboratively, using industry best-practice methods 3.4 Present final ideas in a manner suitable for audience
4. Evaluate and develop design proposals	4.1 Evaluate each design idea in context of design brief and suitability for batched or limited production runs, and record results 4.2 Select design proposal/s for further development that best meet requirements 4.3 Seek feedback on design proposals using suitable methods 4.4 Complete design proposals in response to evaluation feedback

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
5. Present product proposals to client or end recipient	<p>5.1 Prepare product proposals for presentation to client or end recipient in accordance with industry best-practice methods</p> <p>5.2 Ensure presentation arrangements are made, checked and confirmed in accordance with industry best-practice methods</p> <p>5.3 Present design proposals to client or end recipient in accordance with industry best-practice methods</p> <p>5.4 Gather, analyse and confirm client feedback in accordance with industry best-practice methods</p> <p>5.5 Complete design proposals with client feedback and batched or limited production methods and limitations incorporated</p>
6. Produce final product proposal information	<p>6.1 Finalise and document product details including production methods, in accordance with industry best-practice methods</p> <p>6.2 Document visual aspects of product proposal in accordance with industry best-practice methods</p> <p>6.3 Document parts details relevant to batched or limited production of product and in accordance with industry best-practice methods</p> <p>6.4 Document batched or limited production run manufacturing methods in manner suited to place of manufacture and materials specifications</p> <p>6.5 Ensure all other relevant details are recorded in accordance with industry best-practice methods</p> <p>6.6 Ensure product proposal addresses work health and safety and other related requirements</p> <p>6.7 Review proposal process with team members to improve design quality and outcomes</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical and production information.
- Writing and oral communication skills to produce design briefs and document and present manufacturing information.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFFDT5005 Design batch or limited production item of furniture.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFDM5003 Design product suitable for batched or limited production

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed and updated to active voice. Range of Conditions removed and relevant content moved to the Assessment Requirements. Assessment Requirements changed. Supersedes and is not equivalent to MSFFDT5005 Design batch or limited production item of furniture.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- successfully design products suitable for batched or limited production runs (including one-off items) for one major and two minor projects, and in doing so:
  - analyse potentially suitable materials to use in the work process and ensure these are acceptable for both client needs and batched or limited production run manufacturing
  - follow industry best-practice in design briefing coverage, including budget, timelines, product measurements and other specifications, production needs and methods and potential external collaborators or partners
  - follow workplace best-practice in communicating with both internal and external clients and collaborators to ensure transparency of process and that clients' needs are met
  - develop and present final product proposals that balance the limitations and opportunities of batched and limited production for products with client functional and aesthetic needs, including cost-effective use of materials and tools or equipment
  - evaluate the variations in costs associated with different production methods and production runs of different sizes
  - lead others and work effectively in a team to improve design quality and outcomes
  - recognise dependencies in the workplace and across the wider production team (which may include external collaborators) and use cooperative approaches to optimise workflow and productivity.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- historical and contemporary art and design styles and movements
- design methodologies
- ergonomic and anthropometric standards
- visual aesthetics of products being designed
- ideas generation and conceptual development techniques, including:

- suspending belief
- looking for gaps of need alternatives
- daydreaming
- creative leaping
- filaments
- brainstorming
- six thinking hats
- asking questions of norms and beliefs
- current market segment products, and suitable online and offline sources of inspiration and possible design elements that will meet client needs
- current ethical issues in society affecting makers and designers
- all aspects of the product design, including:
  - shape and dimension
  - materials
  - colour
  - texture, patterns and relief
  - the site and positioning of the end product
  - ability to produce in batches or limited production runs
  - ability to adapt the design to different production methods or volumes
- production methodologies of furniture (or similar) manufacturers
- production techniques for products based on materials selection
- materials and finishes used to produce products
- costing techniques
- design-based softwares and other tools suitable for presenting design briefs
- established workplace communication channels and protocols including document control methods
- relevant work health and safety legislation, regulations, standards and codes of practice relevant to the design and manufacture of products
- work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design software that reflects current industry standards

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM5004 Design product suitable for high-volume technology services in production

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed and updated to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed. Supersedes and is not equivalent to MSFFDT5006 Design a furniture using high volume technology services (HVTS) in production.

## Application

This unit describes the skills and knowledge required to design products suitable for, or with components requiring, production using high-volume technology services in a furniture-making or similar operation. It includes the considerations required to enable the application of these services to produce details and components for the design.

This unit applies to individuals working in a manufacturing or design studio environment who design products with production methods as a consideration, working either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design practice

## Elements and Performance Criteria

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Research product needs	1.1 Identify parameters affecting design of product from client or end recipient and other information sources 1.2 Identify and record product functional needs from client or end recipient following industry best-practice methods 1.3 Investigate similar products in market and design elements from relevant sources 1.4 Assess materials for suitability or requirement for high-volume technology services from materials specifications and client

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	requirements 1.5 Identify and record visual or aesthetic needs of product from client or end recipient following industry best-practice methods 1.6 Identify and record ethical considerations from client or end recipient and other potential collaborators 1.7 Prioritise product needs following industry best-practice methods 1.8 Identify and document relevant high-volume technology services that could be applied or used, based on identified parameters and needs
2. Prepare information for the design brief	2.1 Review and clarify product needs, parameters and other factors with client or end recipient 2.2 Report on product needs, including design and high-volume technology service opportunities, using suitable reporting methods and incorporating client or end recipient feedback 2.3 Identify and record needs that cannot be met and negotiate changes with client or end recipient following industry best-practice methods 2.4 Clarify and agree on outcomes of design process with client or end recipient following industry best-practice methods 2.5 Prepare initial brief following industry best practice methods
3. Generate ideas in response to design brief	3.1 Analyse product and client needs and integrate into generation of ideas using suitable ideation methods 3.2 Visually present initial ideas based on design brief and in suitable format 3.3 Refine ideas through review and reworking, both individually and collaboratively, using industry best-practice methods 3.4 Visually present final ideas in a manner suitable for audience
4. Evaluate and develop design proposals	4.1 Evaluate each design idea in context of design brief and suitability for using high-volume technology services, and record results 4.2 Select design proposal/s for further development that best meet requirements 4.3 Seek feedback on design proposals using suitable methods 4.4 Assess availability and cost of, and access to, proposed high-volume technology services
5. Present product	5.1 Prepare product proposals for presentation to client or end recipient

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
proposals to client	<p>in accordance with industry best-practice methods</p> <p>5.2 Ensure presentation arrangements are made, checked and confirmed in accordance with industry best-practice methods</p> <p>5.3 Present design proposals to client or end recipient in accordance with industry best-practice methods</p> <p>5.4 Gather, analyse and confirm client feedback in accordance with industry best-practice methods</p> <p>5.5 Complete design proposals with client feedback and high-volume technology services and limitations incorporated</p>
6. Produce final product proposal information	<p>6.1 Finalise and document product details including production methods, in accordance with industry best-practice methods</p> <p>6.2 Document visual aspects of product proposal in accordance with industry best-practice methods</p> <p>6.3 Document parts details relevant to high-volume technology services production in manner suited to place of manufacture and materials specifications</p> <p>6.4 Ensure all other relevant details are recorded in accordance with industry best-practice methods</p> <p>6.5 Ensure product proposal addresses work health and safety and other related requirements</p> <p>6.6 Review proposal process to improve design quality and outcomes</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical and production information.
- Writing and oral communication skills to produce design briefs and document and present manufacturing information.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFFDT5006 Design a furniture using high volume technology services (HVTS) in production.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFDM5004 Design product suitable for high-volume technology services in production

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed and updated to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed. Supersedes and is not equivalent to MSFFDT5006 Design a furniture using high volume technology services (HVTS) in production.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- successfully produce design proposals using three different materials requiring different high-volume machinery for production, and in doing so:
  - collect, organise, read and interpret information including workplace procedures, manufacturer and materials specifications and client requirements
  - identify potentially suitable materials to use in the work process and ensure these are acceptable for both client needs and high-volume technology services that may be on- or offsite
  - follow industry best-practice in design briefing coverage, including budget, timelines, product measurements and other specifications, production needs and methods and potential external collaborators/partners
  - follow workplace best-practice in communicating with both internal and external clients and collaborators to ensure transparency of process and that clients' needs are met
  - develop and present final product proposals that balance the limitations and opportunities of batched and limited production for products with client functional and aesthetic needs, including cost-effective use of materials and tools or equipment
  - apply mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements and product/production costs as part of design proposal
  - evaluate the variations in costs and other benefits associated with different production methods and production runs of different sizes
  - lead others and work effectively in a team to improve design quality and outcomes
  - recognise dependencies in the workplace and across the wider production team (which may include external collaborators) and use cooperative approaches to optimise workflow and productivity.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- historical and contemporary art and design styles and movements
- design methodologies
- ergonomic and anthropometric standards
- visual aesthetics of products being designed
- ideas generation and conceptual development techniques, including:
  - suspending belief
  - looking for gaps of need alternatives
  - daydreaming
  - creative leaping
  - filaments
  - brainstorming
  - six thinking hats
  - asking questions of norms and beliefs
- current market segment products, and suitable online and offline sources of inspiration and possible design elements that will meet client needs:
  - brochures
  - magazines
  - websites such as online galleries and retail sites
  - design forums
  - reference books
  - other existing workplace design information
  - transferable technological ideas or concepts
  - natural or man-made structures and objects
- current ethical issues in society affecting makers and designers, including but not limited to:
  - social justice
  - environmental sustainability
  - ethical sourcing of material
  - biodiversity
  - cultural heritage and sensitivities
  - social responsibilities of makers and designers
- all aspects of the product design, including but not limited to:
  - shape and dimension
  - materials
  - colour
  - texture, patterns and relief
  - the site and positioning of the end product
  - ability to produce in batches or limited production runs

- ability to adapt the design to different production methods or volumes
- production methodologies of furniture (or similar) manufacturers, including suitability of different high-volume technology methods for a range of materials and output volumes
- production methods, processes and input requirements for high-volume technology services including:
  - laser cutting
  - machine point to point cutting
  - water jet cutting
  - plasma cutting
  - stereolithography (SLA) and computer numerically controlled (CNC) machining
- making techniques for products based on materials selection
- materials and finishes used to produce products, including their specifications, behaviours and limitations
- costing techniques including components overheads and wastage
- design-based softwares and other tools suitable for presenting design briefs, design ideas and product proposals for a range of clients, both internal and external, and both local and international
- established workplace communication channels and protocols including document control methods
- relevant work health and safety legislation, regulations, standards and codes of practice relevant to the design and manufacture of products
- work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design software that reflects current industry standards
  - access to workplaces that provide high-volume technology services

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

## MSFFDM5005 Design product suitable for mass production

### Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed and updated to active voice. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFDT5012 Design for mass production.

### Application

This unit describes the skills and knowledge required to design products suitable for mass production in a furniture-making or similar operation. It includes the considerations required to review and adapt a design brief, specify equipment requirements and personnel capabilities, identify cost-effective opportunities and plan for future production runs.

This unit applies to individuals working in a manufacturing or design studio environment who design products with production methods as a consideration, working either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Design practice

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan for design	1.1 Review, confirm and clarify elements of furniture design brief with appropriate personnel and client 1.2 Establish and maintain communication with relevant personnel in accordance with workplace processes 1.3 Address and verify any problems or underlying factors raised by design brief in terms of adaption to mass production 1.4 Identify featured elements of design from design brief 1.5 Identify featured principles of design from design brief

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.6 Set and cost volumes of mass production runs and evaluate these against identified intended market
2. Design for mass production	<p>2.1 Review concepts for proposed adaption of design brief in context of mass furniture production requirements</p> <p>2.2 Present and review different solutions to satisfy requirements of design brief</p> <p>2.3 Review sample maquette and prototypes against concept sketches</p> <p>2.4 Review and compile final working drawings and specifications in readiness for mass production</p> <p>2.5 Design concept for mass manufacture, considering available equipment and resources and other variables</p>
3. Evaluate production requirements for mass production	<p>3.1 Review and assess equipment capabilities and modify design brief based on available or obtainable equipment</p> <p>3.2 Review and assess personnel capabilities and modify design brief based on assessed and available skills</p> <p>3.3 Assess material or resource supply chain to workplace, set stock sizes and modify design brief based on availability of resources</p> <p>3.4 Assess and review outsourcing opportunities using cost–benefit analysis</p> <p>3.5 Review workflow methods, including consideration of work health and safety, and amend design brief or workflow methods to cater for mass production</p> <p>3.6 Research and implement opportunities for innovation in mass production procedures in accordance with workplace procedures</p>
4. Implement design	<p>4.1 Plan and organise manufacturing process, considering available equipment and resources and workplace procedures</p> <p>4.2 Process material in accordance with manufacturing plan and work health and safety regulations</p> <p>4.3 Produce jigs to assist with manufacturing components in accordance with work requirements</p> <p>4.4 Produce components and prepare for assembly in accordance with workplace procedures</p> <p>4.5 Assemble components based on working drawings</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
5. Finalise mass production	5.1 Finish final product in accordance with specifications 5.2 Evaluate final product for functionality and aesthetic appeal against design brief 5.3 Review mass production methodology in accordance with workplace procedures 5.4 Package and dispatch production run products in accordance with enterprise transport methods 5.5 Record and report on product anomalies resulting from mass production anomalies to appropriate personnel and in accordance with workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in performance criteria.

- Numeracy skills to interpret technical and production information.
- Reading skills to interpret design briefs.
- Writing and oral communication skills to produce or adapt design briefs and document and present manufacturing information.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFFDT5012 Design for mass production.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFDM5005 Design product suitable for mass production

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed and updated to active voice. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFDT5012 Design for mass production.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- successfully design, or redesign, products suitable for mass production for one major and two minor projects, and in doing so:
  - apply research, analytical and mathematical skills to the identification and selection of materials and the selection of appropriate production and construction techniques for products
  - create innovative designs that satisfy the agreed parameters and consider, but are not limited by, other historical or contemporary influences
  - prepare and work through a design brief taking into account the requirements of mass production to fulfil the design brief and oversee a mass production run
  - review information provided and creatively generate proposals for a furnishing or similar product
  - apply elements and principles of design to designing for mass production in accordance with a design brief
  - evaluate the variations in costs associated with different production methods and production runs of different sizes.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace and site standards, requirements, policies and procedures for designing for mass production
- environmental protection requirements
- established communication channels and protocols
- relevant problem identification and resolution
- elements and principles of design and their relationship with mass production practices, including:
  - ergonomics and aesthetic values

- supply chain management
- approaches to outsourcing arrangements
- cost–benefit analysis methods
- workplace resource audit techniques
- types of tools and equipment and procedures for their safe use, operation and maintenance
- characteristics of materials, products and defects and their relevance in a mass production environment
- set-up and operation of furniture-making and related equipment
- relevant computer programs, software and digital communication tools
- product machining, assembly and finishing techniques
- sketching and drawing techniques
- storage systems and labelling relating to the packaging and dispatch of mass-produced items
- procedures for the recording, reporting and maintenance of workplace records and information
- appropriate mathematical procedures for estimation and measurement.
- work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - access to mass production operations facilities and/or personnel
  - design software that reflects current industry standards

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM5006 Develop and document technical workplace information

## Modification History

Release 2. Metadata updated. Supersedes and is equivalent to MSFFDM5006 Develop and document technical workplace information (Release 1).

## Application

This unit describes the skills and knowledge required to establish documentation requirements and draft information that provides concise and unambiguous direction and guidance for workplace activities. Documentation may be procedures, specifications or technical manuals.

This unit applies to individuals responsible for the creation of potentially complex documentation, either working alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design documentation and machine interface

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify documentation requirements	1.1 Determine purpose of documentation through consultation and review of work information 1.2 Establish documentation functionality and format based on its purpose, level of formality and compliance requirements 1.3 Determine requirements and protocols for document creation and quality of production based on workplace requirements 1.4 Create design that allows for efficient entry of information and maximises effective presentation
2. Prepare documentation	2.1 Identify, obtain and collate information for documentation 2.2 Plan information sequence for logical and clear flow 2.3 Draft text using language appropriate to audience and purpose of

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	document
3. Review documentation	3.1 Check text for accuracy and rectify errors 3.2 Confirm adherence to compliance requirements through analysis of documentation 3.3 Prepare final documentation in agreed format and seek and obtain approvals from relevant personnel 3.4 Assign or designate responsibility for all updates and changes to documentation in accordance with workplace requirements

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret and communicate technical information.
- Reading skills to interpret a range of technical information.
- Writing and oral communication skills to develop and document technical information.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 2. Supersedes and is equivalent to MSFFDM5006 Develop and document technical workplace information (Release 1).

Release 1. Supersedes and not equivalent to MSFFT5004 Develop and document procedures and specifications.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFDM5006 Develop and document technical workplace information

## Modification History

Release 2. Meta data updated. Supersedes and is equivalent to MSFFDM5006 - Develop and document technical workplace information (Release 1).

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- develop one of the following documentation types:
  - a complete operational procedure that identifies and provides clear instruction of key steps in the process
  - a formal product specification comprising:
    - project and document scope
    - product name and model numbers as relevant
    - product dimensions
    - product features
    - technical drawings or photographs
    - quality standards
    - other product-specific information
  - and in doing so meeting all internal and external quality and compliance requirements.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work area for which documentation is being prepared, including:
  - compliance requirements (internal and external)
  - quality requirements
- common requirements for development of operational procedures and specifications, including:
  - format
  - presentation
  - required inclusions
  - document management, including version control
- technical writing techniques
- range of people potentially involved in development of procedures and specifications
- communication protocols for the approval and dissemination of procedures and specifications.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - information technology
  - workplace requirements/formats for documentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

## MSFFDM5007 Develop, trial and evaluate prototypes

### Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFT5008 Develop, trial and evaluate prototypes.

### Application

This unit covers the skills and knowledge required to develop specifications, identify and select materials and processes, perform a production trial of prototypes and complete evaluation tasks and documentation. Prototypes may be produced by hand, by using appropriate machines, tools and equipment or by computer-assisted production, and may require the application of joinery, construction and finishing techniques.

This unit applies to individuals working alone in an industry operation of any size, or a design studio environment, where they play a lead role in the design and prototyping of products, either alone or as part of an internal or external team.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Design practice, workshop practice

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop prototype or sample specifications	1.1 Identify and analyse purpose and outline requirements for prototype or sample from design concepts or customer requirements 1.2 Research and identify materials suitable to match design concepts or customer requirements 1.3 Research and identify appropriate construction requirements and methods for materials to be used 1.4 Research and identify ergonomic requirements from design concepts or customer requirements and in accordance with principles of

	<p>ergonomic design</p> <p>1.5 Prepare and document detailed prototype or sample design specifications, including drawings as required, following industry best-practice methods</p>
2. Plan for prototype construction	<p>2.1 Verify that purpose of prototype or sample is reflected in plans and drawings</p> <p>2.2 Verify materials specifications and compatibility for item from prototype or sample documentation</p> <p>2.3 Verify construction requirements and methods including equipment for materials being used</p> <p>2.4 Prepare work plan for item, including construction stages or steps, checkpoints for measurements and tests, assembly methods, and work health and safety considerations, in accordance with workplace procedures</p> <p>2.5 Clean and clear a suitable work area for prototype or sample production</p> <p>2.6 Ensure required materials and other items are available and ready for use</p> <p>2.7 Ensure jigs and other construction aids are identified and where required adjusted to suit work</p>
3. Produce the prototype	<p>3.1 Follow work plan to construct the prototype or sample, referencing any sketches and other job specifications</p> <p>3.2 Conduct checks at the identified points and in accordance with workplace procedures</p> <p>3.3 Identify, document and implement any required modifications to design and plan within workplace procedures</p> <p>3.4 Perform initial inspection of prototype or sample to ensure it is fit for purpose</p> <p>3.5 Ensure learnings from prototype construction are referred back to development personnel</p>
4. Finalise the work sequence	<p>4.1 Prepare prototype or sample for finishing in accordance with design specification</p> <p>4.2 Clean, maintain and store tools and equipment in accordance with manufacturer specifications</p> <p>4.3 Clean and clear work area, including applying waste management strategies in accordance with workplace procedures</p> <p>4.4 Complete workplace documentation, including recommendations for optimisation of prototype or sample brief or work plan</p>

5. Trial and evaluate the prototype	<p>5.1 Develop, specify and document trial objectives and processes in accordance with industry best-practice methods</p> <p>5.2 Ensure personnel involved in trial and evaluation are prepared for their responsibilities and functions</p> <p>5.3 Prepare and certify trial equipment, tools and materials prior to use in accordance with relevant specifications and workplace procedures</p> <p>5.4 Conduct prototype or sample trials and capture or record results in accordance with trial specifications</p> <p>5.5 Evaluate results of trial including longevity of product and make recommendations for production in accordance with procedures</p>
-------------------------------------	---

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform calculations.
- Reading skills to interpret design concepts.
- Writing and oral communication skills to develop and document prototype processes and results and work collaboratively with other personnel.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFFT5008 Develop, trial and evaluate prototypes.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFDM5007 Develop, trial and evaluate prototypes

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is not equivalent to MSFFT5008 Develop, trial and evaluate prototypes.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- develop and evaluate two different prototypes, and in doing so:
  - identify compatibility/incompatibility of materials, adhesives, fittings and fasteners for the application
  - demonstrate how the design of the prototype or sample components will influence the working lifetime of the item.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- the function and features of a strong design brief, including:
  - the aims, objectives, milestones for the design project
  - workplace or personal profiles
  - target audience
  - budget
  - timeline
  - consultation requirements
  - colour requirements
  - image requirements
  - function
- range, characteristics and behaviours of a broad range of materials, including:
  - scrap timber and manmade timber
  - plastics
  - metal and metal alloys
  - stone
  - glass
  - fabrics and textiles
  - fibreglass

- leather
- foam
- cardboard and paper products
- any other manipulable substance
- adhesives
- fillers and finishes
- assembly processes, including:
  - nailing
  - gluing
  - screwing
  - welding
  - pressing
  - sewing
  - bonding
  - jointing
  - connecting various materials
- state or territory WHS legislation, regulations, standards and codes of practice relevant to the full range of processes for the construction of prototypes and samples
- organisational and site standards, requirements, policies and procedures for constructing prototypes and samples
- environmental protection requirements
- established communication channels and protocols
- relevant problem identification and resolution
- elements and principles of design, including:
  - line
  - shape
  - form (geometric or organic)
  - texture
  - colour
  - function
- trends and detailed knowledge of furniture construction
- principles of ergonomics design and aesthetic values
- types of tools and equipment and procedures for their safe use, operation and maintenance
- set-up and operation of equipment
- design and other relevant software and applications
- product assembly techniques
- sketching and drawing methods, including:
  - isometric
  - oblique
  - perspective
  - orthographic

- elevation drawings that explode the parts of the concept sketches and include:
  - rough sizes
  - scale
  - tones
  - values
- storage systems and labelling
- procedures for the recording, reporting and maintenance of workplace records and information
- destructive and non-destructive testing techniques and processes
- appropriate mathematical procedures for estimation and measurement
- work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -

## MSFFDM5008 Evaluate design proposals and concepts

### Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Assessment Requirements changed. Supersedes and is not equivalent to:

- MSFFDT4004 Assess environmental impact of a design
- MSFFDT4006 Determine work health and safety (WHS) implications of designs
- MSFFDT5002 Assess and resolve technical integrity of a design
- MSFFDT5010 Evaluate furniture design proposals and concepts
- MSFFDT5011 Assess economic impact of a design
- MSFFDT5009 Determine production feasibility of designs.

### Application

This unit describes the skills and knowledge required to establish design evaluation criteria, apply those criteria and determine the feasibility of designs for commercially viable production, usually as part of a collaborative process. It may involve original design or adaptations developed by self or others.

This unit applies to individuals working in a manufacturing or design studio environment who use specialised knowledge and critical thinking to evaluate and use diverse and potentially complex information.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture design and manufacturing – general

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish design evaluation criteria and process	1.1 Analyse original design brief as basis for developing evaluation criteria 1.2 Identify and analyse business objectives and capacity in determining evaluation criteria 1.3 Establish scope of creative and operational criteria required for design evaluation and gather all relevant information

	<p>1.4 Identify and select products which are competitors or potential competitors in marketplace for comparative purposes</p> <p>1.5 Identify all those involved in evaluation process and establish communication</p> <p>1.6 Determine evaluation criteria and process through collaboration and review of information</p> <p>1.7 Document criteria and process in accordance with workplace requirements</p>
2. Apply evaluation criteria	<p>2.1 Evaluate competitive products and proposed design against all criteria in accordance with agreed process</p> <p>2.2 Use collaboration and critical thinking in evaluation process</p> <p>2.3 Document outcomes in accordance with agreed process</p>
3. Determine feasibility and options	<p>3.1 Analyse evaluation outcomes of proposed design and competitive products using critical analysis skills</p> <p>3.2 Identify potential design improvements as part of evaluation process</p> <p>3.3 Make determination about potential for designs to be progressed based on agreed process</p> <p>3.4 Complete and process evaluation records in accordance with workplace requirements</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in performance criteria.

- Numeracy skills to understand technical information product and production costings.
- Reading skills to interpret design proposals and business information.
- Writing and oral communication skills to document evaluation records

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to:

- MSFFDT4004 Assess environmental impact of a design
- MSFFDT4006 Determine work health and safety (WHS) implications of designs
- MSFFDT5002 Assess and resolve technical integrity of a design
- MSFFDT5010 Evaluate furniture design proposals and concepts
- MSFFDT5011 Assess economic impact of a design

- MSFFT5009 Determine production feasibility of designs.

# Assessment Requirements for MSFFDM5008 Evaluate design proposals and concepts

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Assessment Requirements changed. Supersedes and is not equivalent to:

- MSFFDT4004 Assess environmental impact of a design
- MSFFDT4006 Determine work health and safety (WHS) implications of designs
- MSFFDT5002 Assess and resolve technical integrity of a design
- MSFFDT5010 Evaluate furniture design proposals and concepts
- MSFFDT5011 Assess economic impact of a design
- MSFFT5009 Determine production feasibility of designs.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- evaluate three different design proposals and concepts, that each consider all of the following:
  - adherence to brief
  - design process and its application
  - functionality
  - the application and use of design to meet the elements and principles of design and ergonomics
  - marketability
  - production considerations:
    - materials
    - production process and impacts on overall business operations
    - safety
    - costs
  - profitability
  - sustainability
  - technical integrity.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- nature and scope of the design evaluation process:
  - who is involved – roles, responsibilities and interrelationships
  - process and key stages

- documentation requirements
- role of collaboration
- elements and principles of design, their interrelationships and how they can be used to create good design
- how to establish evaluation criteria against which a design needs to be evaluated and key considerations:
  - adherence to brief
  - compliance
  - design process and its application
  - functionality
  - profitability
  - application of elements and principles of design
  - production considerations
  - marketability
  - sustainability
  - technical integrity
- manufacturing technologies in the relevant industry sector
- processes that support critical analysis and how to use them, including:
  - comparing
  - contrasting
  - reflecting
  - distinguishing relevant from irrelevant.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - proposed designs.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDM5009 Generate and transfer complex computer-aided drawings and specifications

## Modification History

Release 1. Unit Code and Application changed. Elements and Performance Criteria simplified and changed to active voice. Range of Conditions removed with relevant information moved to assessment requirements. Assessment Requirements changed. Supersedes and is equivalent to MSFDN5001 Generate and transfer complex computer-aided drawings and specifications.

## Application

This unit describes the skills and knowledge required to prepare complex drawings using computer-aided techniques and capabilities, including three-dimensional (3D) modelling, exploded assembly drawings and conversion of drawings for computer numerically controlled (CNC) applications.

This unit applies to individuals working in design and manufacturing roles who produce and manage complex computer-aided drawings and specifications, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Furniture design and manufacturing – general

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Create exploded assembly drawings	1.1 Obtain and complete drawing preparations, including applying expected features of drawing 1.2 Prepare accurate 3D models for all components 1.3 Create and confirm perspective view of model 1.4 Explode model so that all components are visible 1.5 Label all individual components in accordance with workplace requirements 1.6 Complete quality checks to ensure accuracy of outcomes

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.7 Store drawings in accordance with workplace requirements
2. Create job sheets	2.1 Identify and complete preparations in accordance with workplace requirements 2.2 Set up job sheet template in accordance with workplace requirements and practices 2.3 Create and accurately dimension necessary orthographic views 2.4 Identify and accurately list sequencing of machine operations, safety and operator requirements 2.5 Prepare, review and test draft job sheets and amend to workplace requirements 2.6 Store job sheets in accordance with workplace requirements
3. Convert drawings for CNC applications	3.1 Identify and confirm conversion requirements from CNC machine specifications 3.2 Create layers and additional information required for final conversion 3.3 Assign drawing entities to relevant layers 3.4 Complete conversion to required file type 3.5 Store converted file in accordance with workplace requirements

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to interpret technical information and perform calculations and measurements.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFDN5001 Generate and transfer complex computer-aided drawings and specifications.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFDM5009 Generate and transfer complex computer-aided drawings and specifications

## Modification History

Release 1. Unit Code and Application changed. Elements and Performance Criteria simplified and changed to active voice. Range of Conditions removed with relevant information moved to assessment requirements. Assessment Requirements changed. Supersedes and is equivalent to MSFDN5001 Generate and transfer complex computer-aided drawings and specifications.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- create two exploded assembly drawings that include:
  - preparation of 3D models
  - creation of perspective views
  - exploding the models to expose all components
  - industry-standard features: drawing name, labelling of all components, dimensions and/or scale bar and specifications
- create two confirmed job sheets that have the necessary orthographic views and all required management and inventory information including file storage, product coding, inventory information and drawing management requirements
- convert two drawings for CNC application, including the creation of layers, assignment of drawing entities and the protection and storage of converted files
- apply information management strategies to manage and store the drawings and job sheets produced (both hardcopy and digital), including version control.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- key aspects of professional design practice
- type, range, uses and limitations of contemporary computer-aided design (CAD) software and applications
- construction processes in the relevant context
- types of construction materials and their characteristics, uses and limitations in the relevant context
- workplace information management systems and processes related to drawings.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - product specifications
  - computer-aided drawing equipment and current industry-standard software.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

# MSFFDM5010 Investigate ergonomic, anthropometric and proxemic considerations for design

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed and volume/frequency of evidence clarified. Supersedes and is not equivalent to MSFFDT5001 Apply ergonomics, anthropometrics and proxemic considerations to a product.

## Application

This unit describes the skills and knowledge required to confirm design requirements, research potential ergonomic, anthropometric and proxemic considerations for a design and apply findings to the design process.

This unit applies to individuals working in a manufacturing or design studio environment who use specialised knowledge and critical thinking to evaluate and use diverse and potentially complex information.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Design practice

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm design requirements	1.1 Review, confirm and clarify design brief with product owner or briefer 1.2 Identify potential issues relating to ergonomic, anthropometric and proxemic factors
2. Research ergonomic, anthropometric and proxemic considerations	2.1 Identify credible sources of information about ergonomics, anthropometrics and proxemics 2.2 Source and analyse information for its application to design solution 2.3 Assess how ergonomic, anthropometric and proxemic factors impact

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	functionality of design for different types of people 2.4 Determine potential impacts of ergonomic, anthropometric and proxemic issues on how solution meets elements and principles of design 2.5 Identify, distil and document key information that applies to design
3. Use information in the design process	3.1 Explore different solutions based on research outcomes to satisfy the requirements of the design brief through testing and experimentation 3.2 Make accurate calculations for product adjustments that arise from ergonomic, anthropometric and proxemic considerations 3.3 Integrate outcomes into work on overall design solution and associated documentation, drawings and models

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret research information.
- Writing skills to document ergonomic, anthropometric and proxemic consideration outcomes.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFFDT5001 Apply ergonomics, anthropometrics and proxemic considerations to a product.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFDM5010 Investigate ergonomic, anthropometric and proxemic considerations for design

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed and volume/frequency of evidence clarified. Supersedes and is not equivalent to MSFFDT5001 Apply ergonomics, anthropometrics and proxemic considerations to a product.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- research and use information about ergonomics, anthropometrics and proxemics in the design of three different products, drawn from any of one major and two minor design projects), and in doing so:
  - balance ergonomic, anthropometric and proxemic considerations with aesthetic and functional requirements
  - follow industry best-practice in understanding and application of ergonomics, anthropometrics and proxemics
  - seek subject-matter expertise to guide design, solutioning and assessment of results.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- elements and principles of design, and their interrelationship with ergonomic, anthropometric and proxemic values
- current market segment products, and suitable online and offline sources of inspiration and possible design elements that will meet client needs and demonstrate ergonomic, anthropometric and proxemic values:
  - brochures
  - magazines
  - websites such as online galleries and retail sites
  - design forums
  - reference books
  - other existing enterprise design information
  - transferable technological ideas or concepts
  - natural or man-made structures and objects
- key aspects of the following and how they may impact the design of different products:

- ergonomics:
  - safety
  - comfort
  - ease of use
  - productivity and performance
  - aesthetics
- anthropometrics:
  - physical requirements and attributes of product end user
- proxemics:
  - spacing requirements of product end user and location of product
- all aspects of the product design, including but not limited to:
  - shape and dimension
  - materials
  - colour
  - texture, patterns and relief
  - the site and positioning of the end product
  - ability to produce in batches or limited production runs
  - ability to adapt the design to different production methods or volumes
- Australian Standards and government recommendations for product design concerning ergonomics, anthropometrics and proxemics
- materials, finishes and production methods, and how these interact with achievement of ergonomic, anthropometric and proxemic requirements.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - information technology for research

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -

## MSFFDM5011 Plan production

### Modification History

Release 2. Metadata section updated. Supersedes and equivalent to MSFFDM5011 Plan production (Release 1).

Release 1. Unit code and Application changed. Elements and Performance Criteria updated to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFT5006 Plan production.

### Application

This unit describes the skills and knowledge required to plan and document the overall requirements of production in a furnishing or similar workplace.

This unit applies to an individual working alone or as part of a team but with limited guidance, in a furnishing or similar workplace or any size, who has responsibility for managing production processes.

No licensing or certification requirements apply to this unit at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Project management and professional development

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish production requirements	1.1 Interpret data from sales or market forecast for inclusion in production plan 1.2 Analyse specifications and supporting data 1.3 Establish projected requirements regarding product quantity, quality, raw materials and performance characteristics 1.4 Determine and confirm production capacity of machines and personnel 1.5 Identify resources required, including raw materials supply requirements for production line

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Prepare production plan	2.1 Assemble and confirm information and details to include in production plan 2.2 Consider inefficiencies and constraints and potential improvements or variations to plan 2.3 Prepare production plan in accordance with workplace procedures
3. Monitor and coordinate variations to plan	3.1 Monitor production plan to ensure efficient and effective production performance and identify any variations required 3.2 Modify plans where necessary to reflect out-of-stock and overstock situations, machine and human resource requirements or variations 3.3 Coordinate implementation of plan variations to ensure compliance with instructions/or specifications
4. Maintain records	4.1 Maintain production planning records in accordance with workplace requirements 4.2 Prepare reports where necessary and in accordance with workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit to the performance criteria.

- Numeracy skills to interpret and analyse technical information and record and report on production data.
- Writing skills to prepare production plans and report on production.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 2. Supersedes and equivalent to MSFFDM5011 Plan production (Release 1).

Release 1. Supersedes and is equivalent to MSFFT5006 Plan production.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFDM5011 Plan production

## Modification History

Release 1. Unit code and Application changed. Elements and Performance Criteria updated to active voice. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed to remove duplication with Performance Criteria. Supersedes and is equivalent to MSFFT5006 Plan production.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- establish and confirm the production requirements for one significant production requirement, and in doing so:
  - prepare the production plan
  - monitor and coordinate variations to the plan
  - maintain records
  - engage with appropriate workplace software and systems.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- production processes, products, machines, planning and forecasting software
- the range of production operations, including:
  - repetitive production runs
  - short runs
  - quick changes
  - indent orders
  - stock replenishment
- work and workplace organisation systems including:
  - just in time (JIT)
  - quick response
  - quality systems
  - team processes
  - benchmarking systems
- suppliers, their capabilities and customer requirements
- safety and environmental aspects of relevant workplace activities
- workplace procedures and reporting/recording processes, including:
  - the workplace business plan
  - previous production plans

- planning and production policies
- machine/equipment specifications
- work orders
- job procedures
- work health and safety requirements, including:
  - legislation
  - building codes
  - material safety management systems
  - hazardous and dangerous goods codes
  - local safe operating procedures or equivalent.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- access to workplace procedures, equipment, stock systems and other relevant workplace information.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# MSFFDM5012 Research, test and apply materials and technologies for design projects

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed. Supersedes and is not equivalent to MSFFDT5008 Research and recommend alternative manufacturing processes and MSFFDT5009 Research and recommend machine technology.

## Application

This unit describes the skills and knowledge required to research different complex materials and technologies and their applications. It also covers how to use this information to inform design briefs, select materials and technologies that interact harmoniously together, and establish testing requirements for final selection.

This unit applies to individuals working in a manufacturing or design studio environment who analyse and compare information and test results to develop a combined materials and technologies production solution, either alone or as part of an internal or external team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Furniture design and manufacturing – general

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine project requirements	1.1 Review and clarify project brief with client 1.2 Confirm and evaluate parameters and constraints from project brief 1.3 Identify and assess aspects of brief that are impacted by materials and technologies selection 1.4 Identify key project stakeholders and establish required communication protocols
2. Research materials and technologies for	2.1 Evaluate features of briefed product and research how materials and

<p>testing</p>	<p>technologies have been used to achieve these in other projects</p> <p>2.2 Investigate physical properties, capabilities, limitations or constraints of different materials and how these could be utilised in projects</p> <p>2.3 Research aesthetic properties of different materials in terms of suitability for testing</p> <p>2.4 Identify production methods, including safety issues and specialised equipment and personnel, required to work with different materials, and assess suitability of those methods against project brief</p> <p>2.5 Identify and consider new and emerging technologies against project brief and proposed production methods</p> <p>2.6 Evaluate materials and technologies in context of sustainability, cost and availability for testing and production</p> <p>2.7 Select materials and technologies to be tested based on outcomes of research</p>
<p>3. Test materials and technologies</p>	<p>3.1 Develop test program and reporting methods for materials and technologies that addresses all facets identified, including interaction of materials and technologies</p> <p>3.2 Ensure test program addresses safety considerations, both specific to use of selected materials and technologies, and generally for workplace</p> <p>3.3 Validate test program with relevant personnel or key stakeholders</p> <p>3.4 Organise physical, financial and human resources based on scope and nature of testing program</p> <p>3.5 Follow test program to test materials and technologies</p> <p>3.6 Report on test program results in accordance with agreed reporting methods</p>
<p>4. Analyse and report on test results</p>	<p>4.1 Interpret test program results and their implications from report</p> <p>4.2 Evaluate advantages and disadvantages of tested materials and technologies based on test results and against project requirements</p> <p>4.3 Assess production methods and expertise requirements from test results</p> <p>4.4 Recommend and validate materials, production methods including equipment and technologies, and expertise with key stakeholders</p> <p>4.5 Complete workplace documentation to finalise project brief, highlighting research and test results, and rationale for materials chosen</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit to performance criteria.

- Numeracy skills to interpret technical information and understand technology operations.
- Reading skills to interpret project brief and research information.
- Writing and oral communication skills to document and communicate research results.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFFDT5008 Research and recommend alternative manufacturing processes and MSFFDT5009 Research and select manufacturing technologies.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFDM5012 Research, test and apply materials and technologies for design projects

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant information moved to Assessment Requirements. Assessment Requirements changed. Supersedes and is not equivalent to MSFFDT5008 Research and recommend alternative manufacturing processes and MSFFDT5009 Research and recommend machine technology.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- research, test and apply materials and associated technologies for three different design briefs, and in doing so:
  - research five different types of materials and three different design- or production-related technologies
  - develop, implement and report on a test program for two different types of materials and two different design- or production-related technologies
- prepare and present three reports in appropriate formats to convey information to key stakeholders.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- elements and principles of design, their interrelationships and how they are used in materials selection
- characteristics, properties and selection criteria for different materials, both aesthetic and functional, including:
  - manmade and natural timbers (native and imported) including composites and finishes
  - plastics
  - metals
  - alloys
  - stone-based products
  - glass
  - textiles
  - fibreglass
  - foam
  - synthetics
  - cardboard and paper products

- any other manipulable substance
- particular features and behaviours of materials and the impact of these on production methods and technologies
- types and methods of testing specific to different materials, including strength and performance under different conditions
- design- and production-related technologies applicable to all stages of a project, and their impact on materials selection and output variables
- key features, costs, efficiencies and technical application of current and emerging technologies, including:
  - CNC operations
  - 3D printing
  - foundries and casting
  - robotics
  - laser cutting
  - water-jet cutting
- how to structure and present testing program results and recommendations
- the expertise and specialised equipment or technologies required for different materials, and the impact of these on project constraints including timeframes and budgets
- non-traditional materials that complement or enhance the overall design.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - range of complex materials for testing
  - industry-standard technologies suitable for design and production
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors

## Links

## MSFFDM5013 Work collaboratively on design projects

### Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed. Supersedes and is not equivalent to MSFFDT5015 Work collaboratively on a design project.

### Application

This unit describes the skills and knowledge required to establish, implement and maintain collaboration on a complete design project.

This unit applies to individuals working in a manufacturing or design studio environment who participate in the management of a design project as part of a collaborative team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture design and manufacturing – general

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan for project collaboration	1.1 Agree, confirm and clarify project requirements with client 1.2 Identify and pursue opportunities for collaboration in project, establishing communication with all those involved in design process
2. Establish and implement collaborative approaches	2.1 Establish shared understandings of objectives and parameters through discussion and ongoing communication 2.2 Agree on ways of working that acknowledge different contributions of those involved and need for a holistic approach 2.3 Acknowledge and follow ethical approaches to information sharing, privacy and need to take responsibility for outcomes 2.4 Share, challenge and test ideas and approaches to design and manufacturing challenges in a supportive way 2.5 Organise, allocate and document tasks and activities in

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	cost-effective and equitable manner with clear, agreed outcomes
3. Maintain and evaluate design collaboration	3.1 Engage in an open process of review and evaluation with others 3.2 Measure client satisfaction with project outcome based on feedback 3.3 Collect observations from others about possible improvements for future projects 3.4 Identify and use outcomes of evaluation for own development

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency but not explicit in the performance criteria.

- Writing and oral communication skills to collaborate with design partners.

*Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.*

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFFDT5015 Work collaboratively on a design project.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFDM5013 Work collaboratively on design projects

## Modification History

Release 1. Unit code and title changed. Application changed. Elements and Performance Criteria changed. Range of Conditions removed and relevant content moved to Assessment Requirements. Assessment Requirements changed. Supersedes and is not equivalent to MSFFDT5015 Work collaboratively on a design project.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- work as a member of a collaborative team on two design projects that involve:
  - establishment of requirements with collaborator and client
  - design ideation
  - development and refinement of all aspects of design proposals and briefs
  - coordination of implementation of design brief in production
  - delivery of end result to client
  - recognition of dependencies and cooperative approaches that optimise workflow and productivity
  - industry best-practice communication methods and collaboration tools that enhance collaboration.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- potential collaborators in a design project and the different roles people play
- legal and ethical considerations for collaborative practice, including:
  - copyright and intellectual property
  - privacy, confidentiality and disclosure
- benefits of collaboration for individuals and organisations, including the value of collaboration as a problem-solving tool
- types of behaviours that support effective collaborative relationships
- types of tools and documents to support the establishment, implementation and maintenance of collaborative practice
- inclusions for design project management planning:
  - budget
  - communication, consultation and reporting
  - objectives and milestones

- resources - human, financial and physical
- quality assurance process
- responsibilities of different people
- risk management and contingency plans
- timeframes
- typical problems encountered in a collaborative process and how they may be avoided or resolved
- ways of evaluating projects in terms of their success as collaborative undertakings.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design brief
  - people for collaboration.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFDT3001 Install low-voltage technology, automation, and intelligent management systems in furnishing

## Modification History

Release 1. New unit of competency.

## Application

This unit of competency describes the skills and knowledge required to identify job requirements and then select, fit and install low-voltage technology, automation and intelligent management systems in furnishing products. The unit involves taking measurements to support the accurate fit of the items; and correctly using and applying adhesives and concealment methods suited to the installation design, product being installed, and furnishing product material. It also involves understanding quality and compliance indicators and requirements so that the installation complies with industry-accepted standards.

This unit applies to unlicensed installers working in all sectors of the furnishing industry using low voltage (24 volts or less) technology, automation, or intelligent management systems. The furnishing products involved are diverse, and may include kitchen and bathroom cabinetry, fitted furniture and window furnishings. The items installed are also diverse and may include docking stations, and sound and visual devices.

No licensing, legislative or certification requirements apply to this unit at the time of publication. Where installation involves wiring to be connected to mains power, electrical work must be completed by a qualified licensed electrician

## Pre-requisite Unit

Not applicable.

## Unit Sector

Furniture design and technology

## Elements and Performance Criteria

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare for installation of low-voltage technology,	1.1	Identify job and product requirements from work order and visual representations of installation design

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
automation, and intelligent management system item into furnishing	1.2	Identify work health and safety (WHS) and personal protection requirements of installation according to workplace procedures
	1.3	Identify and select required installation items based on the work order
	1.4	Identify and select tools, equipment and accessories to be used during installation and check their safe and effective operation
	1.5	Clean and prepare furnishing product surfaces to enable accurate fitting
2. Install low-voltage technology, automation and intelligent management system item into furnishing	2.1	Take accurate measurements and fit item according to design requirements
	2.2	Secure item using fitting tools according to supplier instructions and workplace procedures
	2.3	Apply adhesives according to supplier instructions and workplace procedures
	2.4	Test installed item against expected performance and troubleshoot performance problems in line with own level of responsibility
	2.5	Place cabling concealments according to installation design
3. Finalise installation	3.1	Check that completed work complies with quality and work order requirements, and rectify identified deficiencies
	3.2	Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures
	3.3	Check tools and equipment, and tag and report faulty items according to workplace procedures
	3.4	Clean and store remaining tools and equipment according to workplace procedures
	3.5	Identify and store surplus unused items for re-use and recycling according to workplace procedures

<b>Elements</b>	<b>Performance Criteria</b>	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
	3.6	Complete required workplace documentation according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret, discuss and use mathematical information in work orders and design specifications</li> <li>• use a blend of ‘in the head’ and formal methods and tools to correctly complete measurements</li> <li>• estimate and measure installation items</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret routine workplace documentation, including work orders, WHS requirements, and workplace installation procedures</li> </ul>

## Unit Mapping Information

Release 1. New unit of competency. No equivalent unit

## Links

# Assessment Requirements for MSFFDT3001 Install low-voltage technology, automation, and intelligent management systems in furnishing

## Modification History

Release 1. New unit of competency.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly install in furnishing a minimum of the following items in line with job requirements and workplace procedures:
  - one low-voltage hardware item
  - one item requiring automation
  - one item from an intelligent management system.

In the course of each of the above installations, the person must:

- interpret work order and design specifications relating to the installation
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to surface, tools, equipment and materials
  - maintain required production output and quality
  - use hand and power tools safely
  - use personal protective equipment (PPE)
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage
- identify and resolve routine problems and faults encountered

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of installation work orders and visual representations of designs, and how to identify and interpret key information
- emerging trends in installing low-voltage technology, automation and intelligent management systems in furnishing products
- work health and safety (WHS) procedures, practices and regulations specific to installations described in performance evidence

- workplace procedures relating to:
  - manual handling, including lifting and carrying
  - safely installing, securing and concealing installation items
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - cleaning and storing tools and equipment
  - storing surplus unused items
  - recording and reporting fitting and installation information
- work order requirements, and industry-accepted quality indicators and requirements, relating to installations described in performance evidence:
  - boundaries of work for unlicensed personnel
  - key requirements of Australian standards for individual installers
  - safety considerations and potential dangers associated with incorrect installation
- techniques for installing, securing, and concealing items described in performance evidence
- mathematical methods for estimating and measuring installation items
- types of common problems that occur during installation, and how to avoid and respond
- types, characteristics, uses, expected performance benchmarks, and limitations of low-voltage technology, automation, intelligent management system items and after-market serviceability:
  - cabinet hardware
  - charging devices
  - docking stations
  - lighting
  - sound
  - visual devices
- types, characteristics, uses, maintenance and limitations of the following items required for the installations described in performance evidence:
  - adhesives and their suitability for different material types
  - hand tools
  - power tools
- documentation requirements for installation work described in performance evidence

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the installation described in the performance evidence above, including:

- work orders and design specifications
- workplace and WHS procedures specified in knowledge evidence

- supplier instructions and manufacturer specifications
- furnishing items requiring installation of low-voltage technology, automation, and intelligent management systems
- low-voltage technology, automation and intelligent management system items, and associated required hand and power tools, equipment, materials and accessories
- PPE applicable to job requirements.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## MSFFF2009 Use furniture finishing hand and power tools

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to select and use hand and power tools for furniture finishing. Workers with this competency use tools to complete routine tasks.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture finishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for tool use	1.1 Identify task requirement from work instructions 1.2 Select appropriate tool for task and identify work health and safety requirements for its use 1.3 Confirm serviceability and safety of tool and report any faults to supervisor 1.4 Select equipment to hold or support material based on the tool selected and the nature of the task 1.5 Prepare material and hold in position to ensure safe operation
2. Use tools	2.1 Use tools safely and in accordance with workplace procedures and manufacturer specifications 2.2 Use techniques that optimise the effective use of the tool for the nominated task 2.3 Ensure safe state, position and location of tools in the work area

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	when not in immediate use 2.4 Follow safety procedures for the use of power and the handling of power tools
3. Clean up work area and tools	3.1 Clean tools and equipment using suitable cleaning materials and agents 3.2 Complete routine operator maintenance on tools in accordance with workplace procedures and manufacturer instructions 3.3 Store tools and equipment based on workplace requirements and their specific storage needs

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and tool manuals.
- Numeracy skills to interpret work instructions associated with number or measurement.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFF2001 Use furniture finishing sector hand and power tools

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFF2009 Use furniture finishing hand and power tools

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- choose appropriate hand tools and use them safely on at least 2 separate occasions for furniture finishing tasks, including at least 10 of the following tools:
  - blender
  - cabinet scraper
  - chisel
  - clamps
  - cork sanding block
  - file
  - hammer
  - mop brush
  - nail punch
  - oil stone
  - paint brush
  - paint scraper
  - pencil brush
  - pincers
  - pliers
  - polish rubbers
  - putty knife
  - rubber mallet
  - screwdrivers
  - spanners
  - swooge
- choose appropriate power tools and use them safely on at least 2 separate occasions for furniture finishing tasks, including at least 3 of the following tools:
  - belt/stroke sander
  - compressor

- orbital sander
- spray gun
- steam iron.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for work health and safety
- general use, maintenance and safety requirements for hand and power tools used in furniture finishing
- personal protective equipment (PPE) used in furniture finishing.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - hand and power tools required for performance evidence
  - PPE
  - materials on which tools are used
  - ancillary holding equipment
  - power sources
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFF2010 Dismantle and reassemble furniture for finishing

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to dismantle and reassemble furniture and fittings for the purposes of performing furniture finishing tasks. Workers with this competency complete routine tasks in the furniture finishing industry.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture finishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements, including process for dismantling, from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Select tools and equipment to meet task requirements and check they are safe and functional 1.4 Select materials to meet task requirements and check they meet task quality requirements
2. Dismantle furniture or fitting	2.1 Identify items to be dismantled from task requirements 2.2 Dismantle components to meet task requirements 2.3 Remove, tag and store fasteners and attachments in accordance with workplace procedures 2.4 Separate, tag and store components in accordance with workplace

Elements	Performance Criteria
	procedures 2.5 Dispatch component to the next process in accordance with workplace procedures
3. Re-assemble furniture or fitting	3.1 Identify components for reassembly from task requirements 3.2 Reassemble to meet task requirements 3.3 Select and use fasteners and attachments in accordance with workplace procedures 3.4 Dispatch assembled item to the next process in accordance with workplace procedures
4. Finalise task	4.1 Check, clean and store equipment and unused materials in accordance with workplace procedures 4.2 Identify and tag equipment faults and inform appropriate personnel in accordance with workplace procedures 4.3 Clean work area, safely dispose of rubbish and identify items for recycling in accordance with workplace procedures and environmental standards 4.4 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate simple information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Supersedes and is equivalent to MSFFF2002 Dismantle and re-assemble furniture for finishing.

## Links

Companion Volume implementation guides are found in VETNet --

# Assessment Requirements for MSFFF2010 Dismantle and reassemble furniture for finishing

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- dismantle and re-assemble at least 3 different items, including one assembled with knockdown fittings.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- process for dismantling and reassembling materials used in furniture and fittings, including at least 5 of the following:
  - timber
  - manufactured board
  - veneer
  - brass
  - metal
  - adhesive
  - laminate
  - Perspex
- furniture and fitting assembly processes, including the use of fasteners, adhesives and joints
- workflow for dismantling and reassembling furniture and fittings
- structural design of common furniture items, including at least 3 of the following:
  - chairs
  - tables
  - desks
  - wall units
  - buffets
  - side tables
  - drawers

- the function of tools and equipment commonly used to dismantle and reassemble furniture, including at least 5 of the following:
  - measuring tapes or rulers
  - hammers
  - rubber mallets
  - pincers
  - screwdrivers
  - shifting spanners
  - spanners
  - socket sets
  - hacksaw and blades
  - clamps
  - timber wedges
  - long nose pliers
  - power drill/screwdriver
  - air compressor and hoses
- work health and safety requirements, including manual handling procedures
- personal protective equipment (PPE) required for dismantling and assembling furniture.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - furniture or fittings for dismantling and reassembly
  - tools and equipment required for performance evidence
  - PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFF2011 Remove surface coatings

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to safely remove surface coatings by hand or by chemical means, in preparation for new surface coatings to be applied.

Workers with this competency complete routine tasks in the furniture finishing industry.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture finishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for surface coating removal	1.1 Determine task requirements from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Test and identify surface coating 1.4 Select tools, equipment, materials, accessories and consumables to meet task requirements and check they are safe and functional
2. Remove surface coatings	2.1 Identify sequence for coating removal operation 2.2 Use equipment, chemicals and abrasives within manufacturer specifications and workplace procedures 2.3 Remove surface coating according to workplace procedures 2.4 Inspect surfaces to ensure removal of surface coating meets workplace standards

	<p>2.5 Report on defects found after removal of surface coating in accordance with workplace procedures</p> <p>2.6 Store and label item ready for next process</p>
<p>3. Clean work area and maintain equipment</p>	<p>3.1 Check, clean and store equipment and unused materials in accordance with workplace procedures</p> <p>3.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures</p> <p>3.3 Clean work area, correctly store or dispose of chemicals and other materials and rubbish, and identify items for recycling in accordance with workplace procedures, regulations and environmental standards</p> <p>3.4 Complete required workplace records</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate simple information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFF2003 Remove surface coatings.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFFF2011 Remove surface coatings

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- remove surface coatings on at least 4 occasions, collectively including:
  - solid timber, manufactured board, and metal surfaces
  - flat, vertical, carved and curved surfaces
  - each of the following:
    - sanding and scrubbing
    - chemical stripping and dipping
    - heat application and hand scraping
    - high pressure water application.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workflow for the removal of surface coatings
- types, properties and characteristics of coatings
- removal materials and the types of coatings they are suited to, including at least 5 of the following:
  - caustic soda
  - thinners
  - turpentine
  - methylated spirits
  - gun wash
  - gel stripper
  - putties
  - hot water
  - glues
  - abrasive paper
- coating removal techniques, including:

- sanding and scrubbing
- chemical stripping and dipping
- heat application and hand scraping
- high pressure water application
- material safety management systems
- the function of tools and equipment commonly used to remove surface coatings, including at least 6 of the following:
  - liquid containers
  - brushes
  - scrapers
  - scrubbing brush
  - steel wool
  - sanding blocks
  - heat guns
  - high-pressure water cleaners
  - dipping tanks
  - stainless steel stripping bench
  - iron
  - plane
  - chisels
  - power sanders
  - air compressor
- sources of workplace information and procedures, including:
  - workplace procedures for the use of tools and equipment
  - work instructions, including job sheets, cutting lists, plans, drawings and designs
  - workplace procedures for reporting and record keeping
  - manufacturer specifications and operational procedures
  - safety data sheets, product application and safety information
- work health and safety requirements, including personal protective equipment (PPE) required for removing surface coatings.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - Items with surfaces to be removed
  - tools, equipment and consumables required for performance evidence
  - PPE

- workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFF2012 Prepare surfaces for finishing

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to prepare a range of furniture surfaces for the application of surface coatings by hand or machine. Workers with this competency complete routine tasks in the furniture finishing industry

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture finishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for surface preparation	<p>1.1 Determine task requirements, including identifying characteristics of surface, required surface coating materials and efficient work methods, from work documentation</p> <p>1.2 Identify and follow work health and safety (WHS) requirements</p> <p>1.3 Identify and set up required materials, tools and equipment and related engineering controls</p> <p>1.4 Identify and exclude sources of contamination in work area</p> <p>1.5 Identify and follow workplace procedures for surface preparation in accordance with the surface and surface coating materials being used</p>
2. Prepare surfaces	2.1 Prepare surfaces of furniture item in accordance with workplace procedures and specifications

	<p>2.2 Rectify surface faults</p> <p>2.3 Inspect surfaces and approve for suitability for further processing</p> <p>2.4 Rectify or report item defects in accordance with workplace procedures</p> <p>2.5 Store item ready for next process</p>
<p>3. Clean work area and maintain equipment</p>	<p>3.1 Check, clean and store equipment and unused materials in accordance with equipment instructions and workplace procedures</p> <p>3.2 Tag unserviceable equipment, identify faults and inform appropriate personnel</p> <p>3.3 Clean work area, safely store or dispose of chemicals and waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>3.4 Complete required workplace records</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation.
- Writing skills to communicate simple information in familiar workplace documents.
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

# Assessment Requirements for MSFFF2012 Prepare surfaces for finishing

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- prepare surfaces on at least 3 occasions, collectively including internal and curved surfaces and at least 2 of the following materials:
  - solid hardwood
  - solid softwood
  - MDF
  - veneered board
  - metal.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types of coatings commonly used in furniture finishing and their characteristics
- surface preparation techniques, equipment and materials
- hazardous substances and materials used in surface preparation
- workflow in relation to the application and removal of surface coatings
- function of tools and equipment commonly used for surface preparation, including at least 6 of the following:
  - squares
  - hammers
  - nail punches
  - liquid containers
  - brushes
  - cabinet scrapers
  - files
  - steel wool/scourers
  - sanding blocks
  - steam irons
  - chisels

- power sanders
- air compressors and hoses
- fixed belt/stroke sanders
- screwdrivers
- clamps
- drills
- mallets
- vices
- saws
- personal protective equipment (PPE) required for surface preparation
- sources of workplace information and procedures, including:
  - workplace procedures for the use of tools and equipment
  - work instructions, including job sheets, cutting lists, plans, drawings and designs
  - workplace procedures for reporting and record keeping
  - manufacturer specifications and operational procedures
  - work health and safety requirements, including personal protective equipment.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - surfaces to be prepared
  - tools, equipment and consumables required for performance evidence
  - PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFF2013 Maintain spray equipment and booth

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to strip, clean, restore and service spray equipment and booths.

Workers with this competency undertake entry-level work under supervision in the furnishing industry.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture finishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements, including timings, equipment to be maintained, materials and efficient work methods, from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Identify materials, tools, equipment and accessories and check for safe and effective operation 1.4 Clear work area of unwanted stock, products and materials in accordance with workplace procedures 1.5 Isolate equipment from power sources and make safe in accordance with workplace procedures
2 Maintain the	2.1 Dismantle equipment in accordance with manufacturer

Elements	Performance Criteria
equipment	specifications and workplace procedures 2.2 Lay out components in a logical re-assembly sequence 2.3 Clean and service components using authorised materials, tools and equipment 2.4 Inspect components and repair or replace faulty items or refer them for further maintenance action 2.5 Re-assemble equipment and perform operational tests 2.6 Record and report on equipment maintenance in accordance with workplace procedures
3. Maintain booths	3.1 Neutralise sources of combustion and ignition throughout the work sequence 3.2 Inspect and clean out ventilation and other services and replenish, replace or refer for required further maintenance action 3.3 Clean and restore surfaces and floors in accordance with workplace procedures and standards 3.4 Clean and restore materials and consumable stores in accordance with workplace procedures and standards

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate simple information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFF2005 Maintain spray equipment and booth.

## Links

Companion Volume implementation guides are found in VETNet --

# Assessment Requirements for MSFFF2013 Maintain spray equipment and booth

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- disassemble, maintain and re-assemble at least 2 of the following spray systems:
  - computerised spray system
  - electrostatic spray gun
  - powder-coating spray gun
  - air compressor, including its hoses and dryers
  - conventional suction-fed spray gun
  - conventional gravity-fed spray gun
  - pressure pot system
  - airless spray system
- maintain a booth and booth services on at least 2 occasions, from either of the following types of booth:
  - dry filter bath
  - purpose-designed, positive-pressure, down-draft water booth.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- spray system equipment and procedures
- maintenance requirements for spray booth services, including:
  - ventilation
  - lighting
  - water
  - electrical reticulation
  - paint lines
  - consumables storage areas
- types of cleaning solvents and agents and their characteristics
- material safety management systems

- sources of work information, including:
  - workplace procedures relating to the use of tools and equipment
  - work instructions
  - workplace procedures relating to reporting and communication
  - manufacturer specifications and operational procedures
- common types of materials used in maintaining spray equipment and booths, including:
  - water
  - solvents and other cleaning compounds and chemicals
  - rags
  - steel wool
  - brushes
  - hoses
  - brooms
  - squeegees
- common types of tools used in maintaining spray equipment and booths, including:
  - liquid containers
  - feeding systems
  - spray guns
  - scrapers (non-ferrous) screwdrivers
  - shifting spanners
  - spanners
  - work health and safety requirements, including personal protective equipment (PPE).

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - spray systems and equipment, spray booth, cleaning and maintenance materials required for performance evidence
  - PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFF2014 Apply surface coatings by spray gun

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to apply surface coatings using a handheld spray gun. Workers with this competency complete routine tasks in the furniture finishing industry.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture finishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare for task	1.1 Determine task requirements, including characteristics of surface and required surface coating, from work documentation 1.2 Plan task by identifying processing and application techniques, time and safety requirements and efficient work methods 1.3 Identify and follow work health and safety requirements 1.4 Identify tools, equipment and accessories to meet task requirements and check they are safe and operational 1.5 Identify and prepare required surface coatings and other materials and check they meet task quality requirements
2. Check and prepare for spraying	2.1 Identify surface or other faults in products to be coated and report or repair faults in accordance with workplace procedures 2.2 Protect other products and equipment in the workplace from

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>overspray</p> <p>2.3 Perform trial applications of surface materials to check condition of spray system, spray patterns, equipment operation, materials viscosity and conformity with specified surface finish</p> <p>2.4 Clean or replace unserviceable components and reassemble spray system</p> <p>2.5 Identify and rectify spray pattern faults in accordance with workplace procedures.</p> <p>2.6 Identify and rectify material faults in accordance with workplace procedures</p>
3. Apply surface coating	<p>3.1 Ensure surfaces are kept free of contamination</p> <p>3.2 Apply surface coatings in accordance with workplace procedures</p> <p>3.3 Check surface build and coverage against workplace requirements for even spread and thickness</p> <p>3.4 Rectify surface faults in accordance with workplace procedures</p> <p>3.5 Inspect products and approve for suitability for further processing</p>
4. Clean work area	<p>4.1 Check, clean and store equipment and unused materials in accordance with equipment instructions and workplace procedures</p> <p>4.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures</p> <p>4.3 Clean work area, including spray booth, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>4.4 Complete required workplace records</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate simple information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFF2006 Apply surface coatings by spray gun.

## Links

# Assessment Requirements for MSFFF2014 Apply surface coatings by spray gun

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- select and apply surface coatings, including the adjustment of spray equipment to achieve required spray pattern, on at least 3 occasions so that the coatings are free of faults, with a consistent sheen, and meet workplace quality standards. At least 2 of the following surface types must be included:
  - solid timber
  - manufactured board
  - veneer board
  - metal.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types of spray equipment, including:
  - conventional air spray guns and airless spray guns
  - high volume/low pressure (HVLP) air-assisted and airless spray guns
- spray processes
- types of coating, including:
  - pre-catalysed lacquer
  - acid catalysed lacquer and nitro-cellulose lacquer
  - one-pot polyurethane and water-based coatings
  - stains, lacquers, polish, enamels and acrylics
- methods to prevent contamination of surfaces during and after surface coating
- workflow for spraying operations
- the function of tools and equipment commonly used in applying spray coatings, including at least 6 of the following:
  - pressure feed systems
  - spray booth

- liquid containers
- air compressor and hoses
- air regulator
- positive pressure air-wash masks
- canister-type face masks
- screwdrivers
- shifting spanner and spanners
- sources of workplace information, including:
  - workplace procedures relating to the use of tools and equipment
  - work instructions
  - workplace procedures relating to reporting and communication
  - manufacturer specifications and operational procedures
- work health and safety requirements, including manual handling procedures and the use of personal protective equipment (PPE).
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - items requiring spray coatings
  - spray equipment, spray booth, coatings and cleaning products required for performance evidence
  - PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFF2015 Apply stains, fillers and bleach

### Modification History

Release 1. Changes to code, application, elements, performance criteria. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to apply stains, fillers and bleach to solid timber and manufactured board surfaces. Workers with this competency complete routine tasks in the furniture finishing industry.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture finishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	<p>1.1 Determine task requirements, including characteristics of the surface and required surface treatment, from work documentation</p> <p>1.2 Select suitable stain, filler and bleach materials to meet job requirements</p> <p>1.3 Plan work by identifying processing and application techniques, time and safety requirements and efficient work methods in accordance with workplace procedures</p> <p>1.4 Identify and follow work health and safety requirements</p> <p>1.5 Identify tools, equipment and accessories and check for safe and effective operation for staining, filling or bleaching task</p>
2. Prepare for application	2.1 Check surfaces for contamination and correct preparation

Elements	Performance Criteria
of materials	<p>according to workplace procedures and standards</p> <p>2.2 Identify products with surface or other faults and perform required repairs on faults</p> <p>2.3 Identify and prepare materials requiring staining and filling</p> <p>2.4 Perform trial applications of stains or fillers to check equipment operation, materials consistency, viscosity and specified colour</p> <p>2.5 Identify and rectify or adjust for faults or inconsistencies in colour in accordance with workplace procedures</p> <p>2.6 Identify and label materials required for bleaching to prevent cross-contamination of bulk material during application</p>
3. Apply finishing materials	<p>3.1 Identify techniques for applying stain, filler or bleach from work orders</p> <p>3.2 Apply materials according to task instructions, manufacturer specifications and workplace procedures</p> <p>3.3 Store bleached items appropriately for drying and monitor in accordance with workplace procedures</p> <p>3.4 Inspect and approve finished products for suitability for further processing</p> <p>3.5 Re-stain, fill, or bleach products that do not meet quality requirements or tag for further investigation</p>
4. Clean work area and maintain equipment	<p>4.1 Check, clean and store equipment and unused materials in accordance with equipment instructions and workplace procedures</p> <p>4.2 Tag unserviceable equipment, identify faults and inform appropriate personnel</p> <p>4.3 Clean work area and safely dispose of bleaching materials and rubbish identifying items for recycling in accordance with workplace procedures and environmental standards</p> <p>4.4 Complete required workplace records</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate simple information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFF2007 Apply stains, fillers and bleach.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFF2015 Apply stains, fillers and bleach

## Modification History

Release 1. Changes to code, application, elements, performance criteria. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- apply stains, fillers and bleach to at least 3 different surfaces, including at least 2 of the following:
  - solid softwood
  - solid hardwood
  - manufactured board.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- application techniques
- characteristics of stains, fillers and bleaches, including:
  - toxicity
  - reactivity
  - flammability
  - viscosity
- methods to prevent contamination of surfaces during and after processing
- workflow in relation to the application of stains, fillers and bleach
- sources of workplace information, including:
  - workplace procedures relating to the use of tools and equipment
  - work instructions
  - workplace procedures relating to reporting and communication
  - manufacturer specifications and operational procedures
  - materials application and safety information, and material safety data sheets (SDS)
- typical materials required for applying stains, fillers and bleach, including:
  - water
  - abrasive papers
  - cotton rags and hessian

- typical tools and equipment, including personal protective equipment (PPE), required for applying stains, fillers and bleach, including:
  - liquid containers
  - rubber gloves
  - face masks
  - spray booths
  - spray guns
  - compressor
  - air lines
  - brushes
  - sanding block
- types of stain, including:
  - lacquer-based wiping stain
  - spirit-based
  - water and oil-based
- types of bleach, including:
  - two-solution bleach
  - oxalic acid bleach
- types of filler, including:
  - oil-based
  - water-based and plastic (one-pot) filler
  - work health and safety requirements, including personal protective equipment.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - application tools and equipment required for performance evidence
  - PPE
  - stains, fillers, bleach
  - surfaces to be processed
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFF2016 Apply surface coatings by hand

### Modification History

Release 1. Changes to code, application, elements, performance criteria. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to apply coatings to solid timber, manufactured board and metal surfaces by hand.

Workers with this competency complete routine tasks in the furniture finishing industry.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture finishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements, including characteristics of surface and required surface finish, from work documentation 1.2 Plan task by identifying processing and application techniques, time and safety requirements and efficient working methods in accordance with workplace procedures 1.3 Identify and follow work health and safety requirements 1.4 Identify and check materials, tools, equipment and accessories for safe and effective operation for the surface coating task
2. Prepare for application of materials	2.1 Check surfaces for contamination and correct preparation according to workplace procedures and standards

Elements	Performance Criteria
	2.2 Identify and perform required repairs on products with surface or other faults 2.3 Identify and prepare required finishing materials 2.4 Perform trial applications of surface materials to check equipment operation, materials consistency and specified surface finish 2.5 Identify and rectify faults in accordance with workplace procedures
3. Apply finishing materials	3.1 Identify techniques for hand-applying materials 3.2 Apply finishing materials according to job instructions, material manufacturer specifications and workplace procedures 3.3 Inspect finished products and approve for suitability for further processing 3.4 Refinish products that do not meet quality specifications or tag for further investigation
4. Clean work area and maintain equipment	4.1 Check, clean and store equipment and unused materials in accordance with equipment instructions and workplace procedures 4.2 Tag unserviceable equipment, identify faults and inform appropriate personnel 4.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 4.4 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate simple information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFF2008 Apply surface coatings by hand.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFFF2016 Apply surface coatings by hand

## Modification History

Release 1. Changes to code, application, elements, performance criteria. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- prepare for and apply coatings by hand on a minimum of 5 occasions, covering:
  - one solid timber surface
  - one manufactured board surface
  - one metal surface.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- hand application techniques, including use of brush and swooge
- characteristics of coatings, waxes and oils in terms of toxicity, reactivity, flammability and required viscosity
- methods to prevent contamination of surfaces during and after finishing
- workflow in relation to the application of finishing material
- common materials used in applying surface coatings by hand, including:
  - water
  - detergent
  - wax
  - oil
  - enamel
  - acrylic
  - one-pot polyurethane
  - polish
  - methylated spirits
  - turpentine
  - terebine
  - abrasive papers
  - cotton rags

- steel wool
- typical tools and equipment required for applying surface coatings by hand, including:
  - sanders
  - pneumatic or low-voltage electric buff
  - rubber sanding block
  - brushes and swooges
- personal protective equipment (PPE) required for applying surface coatings by hand
- sources of workplace information, including:
  - workplace procedures relating to the use of tools and equipment
  - work instructions
  - workplace procedures for reporting and communication
  - manufacturer specifications and operational procedures
  - materials application and safety information, including material safety data sheets (SDS)
  - work health and safety requirements, including PPE.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - tools and equipment required for performance evidence
  - PPE
  - surfaces to be coated
  - coating materials
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFF3010 Match and make up colours

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to match and make up colours for surfaces that have previously been coated or polished, or for new work that must match existing work or a specified sample.

Furniture finishing workers with this competency follow established procedures, using some discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture finishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare task	1.1 Determine task requirements, including design, colour, finish process and quality, from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Access colour matching aids and colouring materials and ready for use 1.4 Identify and prepare types of colouring materials for colouring task

Elements	Performance Criteria
	1.5 Identify and check tools, equipment and accessories for safe and effective operation
2. Match colours	2.1 Clean and prepare surfaces to enable accurate colour matching 2.2 Consider characteristics of surface and the impact of these on colouring in work plan 2.3 Identify and select required techniques for colour application in accordance with workplace procedures 2.4 Assess properties of colouring agents in relation to the specific circumstances 2.5 Apply colour matching techniques to identify most likely fit in terms of product, colour and application techniques 2.6 Trial proposed products, colours and application techniques to confirm colour-matching outcomes 2.7 Record colour-matching formulae in accordance with workplace procedures or industry standards
3. Make up colours	3.1 Identify product quantities from client demand or accurate assessment of coating or colouring requirement 3.2 Calculate colouring additives from manufacturer specifications 3.3 Accurately measure colouring additives and blend with the base product
4. Apply colours	4.1 Apply colour solution in accordance with selected application techniques and workplace procedures 4.2 Repeatedly verify colour application against sample colour 4.3 Inspect surface for faults in applied colour film and rectify defects 4.4 Seal coloured or matched-up surface with finishing material in accordance with task requirements and workplace procedures
5. Clean up work area	5.1 Check, clean, and store equipment and seal, store and label unused colouring and other materials in accordance with equipment instructions, regulations and workplace procedures 5.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures 5.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and

Elements	Performance Criteria
	environmental standards 5.4 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFF3001 Match and make up colours.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFFF3010 Match and make up colours

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- accurately match:
  - pigments on 3 occasions
  - stains on 2 occasions.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types, characteristics and degradation patterns of coatings and stains
- properties of coated and stained surface materials and the impact of these on colouring
- characteristics of colouring agents, including:
  - pigments
  - dyes
  - stains
  - universal tinters and toning lacquer
- properties of colouring agents, including:
  - colour
  - staining power
  - texture
  - durability
  - opacity
  - spreading power
  - toxicity and oil absorptive power
- types of matching aids
- product catalogues and other information systems
- material safety management systems and related safety requirements
- common materials used for matching and making up colours, including:
  - spirit-based stains

- pigments
- lacquers
- oil varnish
- two-part polyurethane
- methylated spirits
- lacquer thinners
- mineral turpentine and polish
- typical tools and equipment used for matching and making up colours, including:
  - mixing pots
  - brushes
  - spray equipment and mechanical mixer/vibrator
  - colour rubber
  - colour wad
- personal protective equipment (PPE) used for matching and making up colours
- sources of workplace information, including:
  - workplace procedures relating to the use of tools and equipment
  - work instructions
  - workplace procedures relating to reporting and communication
  - manufacturer specifications and operational procedures
- work health and safety requirements, including personal protective equipment.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - mixing and testing equipment required for performance evidence
  - PPE
  - work orders, sample colouring requirements, colouring agents and base coating products
  - cleaning equipment and materials
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFF3011 Set up, operate and maintain mechanical coating systems

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to set up, operate and maintain mechanical coating systems in order to apply coatings to specifications.

Furniture finishing workers with this competency follow established procedures, using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Furniture finishing

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1.Prepare for task	1.1 Determine task requirements, including characteristics of surface and required surface coating, from work documentation 1.2 Plan work by identifying processing and application techniques, time and safety requirements and efficient work methods 1.3 Identify and follow work health and safety requirements 1.4 Identify tools, equipment and accessories to meet task

Elements	Performance Criteria
	requirements and check they are safe and functional 1.5 Identify and prepare coating materials required for the task
2. Check and prepare for spraying	2.1 Identify products with surface or other faults and report or repair faults in accordance with workplace procedures 2.2 Protect other products and equipment in workplace from overspray in accordance with workplace procedures and safety standards 2.3 Perform trial applications of surface materials to check equipment operation, materials consistency and specified surface finish 2.4 Identify and rectify or report machine faults in accordance with workplace procedures 2.5 Identify material faults and rectify in accordance with workplace procedures
3. Apply surface coating	3.1 Ensure surfaces are kept free of contamination 3.2 Apply required surface coatings in accordance with job requirements and workplace procedures 3.3 Monitor surface coating viscosity and coverage and check against workplace requirements for even spread and thickness 3.4 Perform required rectification of surface faults in accordance with workplace procedures 3.5 Inspect products to assess suitability for further processing 3.6 Rectify or report defects in accordance with workplace procedures
4 Clean work area and maintain equipment	4.1 Check, clean and store equipment and unused materials in accordance with equipment instructions and workplace procedures 4.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures 4.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 4.4 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to take accurate measurements, calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFF3002 Set up, operate and maintain mechanical coatings systems.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFFF3011 Set up, operate and maintain mechanical coating systems

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- select and apply surface coatings, including the adjustment of spray equipment, to achieve required coating using a minimum of 2 of the following mechanical systems:
  - curtain coating
  - UV coating
  - tumbling
  - dipping
  - electrostatic powder coating
  - automatic (robotic) spray equipment.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mechanical spray system equipment and processes
- characteristics of coatings and base materials, including:
  - toxicity
  - reactivity
  - flammability
  - required viscosity
  - recoatability
- effects of fumes and heat and other radiation on surface coatings
- methods to prevent contamination of surfaces during and after surface coating
- workflow for spraying operations
- typical tools and equipment required when setting up, operating and maintaining mechanical coating systems, including:
  - computerised spray system
  - electrostatic spray gun

- baking oven
- barrel tumbler
- spray booth
- liquid containers
- air compressor and hoses
- screwdrivers
- shifting spanner and spanners
- ford cup
- typical materials used when setting up, operating and maintaining mechanical coating systems, including:
  - stains
  - lacquers
  - wax
  - oil
  - two-pack polyurethane
  - three-pack polyester
  - enamels
  - acrylics
- sources of workplace documentation, including:
  - workplace procedures relating to the use of tools and equipment
  - work instructions
  - workplace procedures relating to reporting and communication
  - manufacturer specifications and operational procedures
- work health and safety requirements, including personal protective equipment (PPE).
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - mechanical spray systems and equipment, spray booth, coatings and cleaning products required for performance evidence
  - PPE
  - items to be sprayed
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFF3012 Apply plural component coatings

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to apply plural component coatings, including polyurethane, polyester and acid catalysed coatings, to surfaces including solid timber, manufactured board and metal. Work may be performed individually or in a team.

Furniture finishing workers with this competency follow established procedures, using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture finishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements, including surface characteristics and required surface treatment, from work documentation 1.2 Plan for work by identifying processing and application techniques, time and safety requirements and efficient work methods 1.3 Identify and follow work health and safety requirements 1.4 Identify tools, equipment and accessories to meet task

Elements	Performance Criteria
	requirements and check for safety and functionality
2. Prepare for application of materials	<p>2.1 Check surfaces for contamination and correct preparation in accordance with workplace procedures and standards</p> <p>2.2 Identify products with surface or other faults and perform required repairs</p> <p>2.3 Identify and prepare required materials</p> <p>2.4 Inspect and clean spray booths to ensure nitro-cellulose lacquer remnants are not present in booth prior to application of plural component coatings, referring to work documentation to establish booth use</p> <p>2.5 Perform trial application of plural component coatings to check equipment operation, materials consistency and viscosity meets job requirements</p> <p>2.6 Identify and rectify or adjust faults or inconsistencies in applied coating in accordance with workplace procedures</p>
3. Apply finishing materials	<p>3.1 Identify and select techniques for applying plural component coatings</p> <p>3.2 Apply materials in accordance with job instructions, material manufacturer specifications and workplace procedures</p> <p>3.3 Inspect finished products and approve for suitability for further processing</p> <p>3.4 Rectify products that do not meet quality specifications or tag for further investigation in accordance with workplace procedures</p>
4. Clean work area and maintain equipment	<p>4.1 Check, clean and store equipment and unused materials in accordance with workplace procedures</p> <p>4.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures</p> <p>4.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>4.4 Complete required workplace records</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to take accurate measurements, calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFF3003 Apply plural component coatings.

## Links

Companion Volume implementation guides are found in VETNet – -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFF3012 Apply plural component coatings

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- apply plural component coatings on at least 3 occasions, including all of the following:
  - acid catalysed
  - two-part polyurethane
  - polyester.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- application techniques including brushing and spraying
- characteristics of acid catalysed, polyurethane and polyester coatings
- materials used to apply plural component coatings, including:
  - two-part polyurethane
  - two/three-part polyester
  - acid catalysed lacquer
  - solvents
- methods to prevent contamination of surfaces during and after coating
- workflow in relation to the application of polyurethane and polyester
- tools and equipment commonly used to apply plural component coatings, including:
  - liquid containers
  - rubber gloves
  - positive pressure air-wash face masks
  - positive pressure water-wash spray booths
  - protective clothing
  - spray guns
  - compressor
  - air lines

- brushes
- sanding block
- orbital sanders
- sources of workplace information, including:
  - workplace procedures relating to the use of tools and equipment
  - work instructions
  - workplace procedures relating to reporting and communication
  - manufacturer specifications and operational procedures
- work health and safety requirements, including personal protective equipment (PPE).
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - spray application equipment required for performance evidence
  - PPE
  - items to be coated
  - acid catalysed, polyurethane and polyester coatings
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFF3013 Apply soft rubber techniques

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to use soft rubber techniques to apply polish or spirit varnish to solid timber and manufactured board surfaces.

Furniture finishing workers with this competency follow established procedures, using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture finishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements including surface characteristics and required surface finish from work documentation 1.2 Plan for task by identifying processing and application techniques, time and safety requirements and efficient work methods 1.3 Identify and follow work health and safety requirements 1.4 Identify tools, equipment and accessories to meet task

Elements	Performance Criteria
	requirements and check for safety and functionality.
2. Prepare for application of materials	2.1 Check surfaces for contamination and correct preparation in accordance with workplace procedures and standards 2.2 Identify products with surface or other faults and perform required repairs 2.3 Identify and prepare required finishing materials 2.4 Perform trial application of polish or varnish to check rubber operation, materials consistency and conformity with specified surface finish 2.5 Identify and rectify faults in accordance with workplace procedures
3. Apply soft rubber	3.1 Lightly sand surface and check for and rectify defects in accordance with workplace procedures 3.2 Charge rubber in accordance with job requirements 3.3 Apply soft rubber finish using correct pressure and suitable rubber movements 3.4 Inspect surface and repair or rectify any defects in accordance with workplace procedures
4. Clean work area and maintain equipment	4.1 Check, clean and store equipment and unused materials in accordance with workplace procedures 4.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures 4.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 4.4 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

# Assessment Requirements for MSFFF3013 Apply soft rubber techniques

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- apply soft rubber techniques on 3 separate occasions, including both of the following types of surfaces:
  - a flat surface of at least 2 square metres
  - an item with smaller and more detailed surface areas including curved and carved surfaces.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- soft rubber applications and techniques
- characteristics of coatings, including:
  - toxicity
  - reactivity
  - flammability
  - required viscosity
- methods to prevent contamination of surfaces during and after finishing
- workflow for applying finishing material
- typical tools and equipment required to apply soft rubber techniques, including:
  - brushes
  - swooges
  - soft rubbers of cotton-wool or wadding body wrapped in cotton cloth
  - sanding blocks
- typical materials required to apply soft rubber techniques, including:
  - polish
  - methylated spirits
  - spirit varnish

- scourers
- abrasive papers
- cotton rags
- steel wool
- sources of workplace information, including:
  - workplace procedures relating to the use of tools and equipment
  - work instructions
  - workplace procedures relating to reporting and communication
  - manufacturer specifications and operational procedures
- work health and safety requirements, including personal protective equipment (PPE).
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - soft rubber materials, coating materials and other consumables required for performance evidence
  - PPE
  - surfaces to be coated
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFF3014 Enhance finishes

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to cut and buff and apply materials to coated solid wood, manufactured board and metal surfaces by hand to enhance the finish.

Furniture finishing workers with this competency follow established procedures, using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture finishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements, including surface characteristics and required surface finish, from work documentation 1.2 Plan for task by identifying processing and application techniques, time and safety requirements and efficient work methods 1.3 Identify and follow work health and safety requirements 1.4 Identify tools, equipment and accessories to meet task

Elements	Performance Criteria
	requirements and check for safety and functionality
2. Prepare for application of materials	2.1 Check surfaces for contamination and correct preparation in accordance with workplace procedures and standards 2.2 Identify products with surface or other faults and perform required repairs 2.3 Perform required cutting and buffing surfaces to prepare for finishing 2.4 Identify and prepare required finishing materials 2.5 Perform trial applications of surface materials to check equipment operation, materials consistency and conformity with specified surface finish 2.6 Identify and rectify faults in accordance with workplace procedures
3. Apply finishing materials	3.1 Identify required techniques for applying materials by hand 3.2 Apply finishing materials in accordance with job instructions, manufacturer specifications and workplace procedures 3.3 Inspect finished products and approve for suitability for further processing 3.4 Refinish products that do not meet quality specifications or tag for further investigation
4. Clean work area and maintain equipment	4.1 Check, clean and store equipment and unused materials in accordance with workplace procedures 4.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures 4.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 4.4 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation

- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFF3005 Enhance finishes.

## Links

# Assessment Requirements for MSFFF3014 Enhance finishes

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- on at least 3 occasions, including 1 occasion involving a curved surface, enhance existing finishes by:
  - cutting down
  - pulling in
  - compounding and buffing
  - waxing and oiling to achieve a satin finish.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- hand application techniques
- functions and safety requirements of hand and power tools, particularly in wet working environments
- characteristics of compounds, waxes and oils in terms of toxicity, reactivity, flammability and required viscosity
- methods to prevent contamination of surfaces during and after finishing
- typical materials used to enhance finishes, including:
  - water
  - detergent
  - cutting compound
  - wax
  - oil
  - buffing creams
- typical tools and equipment used to enhance finishes, including:
  - abrasive papers
  - pulling/pullover rubber
  - cotton rags

- steel wool
- orbital sander pneumatic or low voltage
- electric or pneumatic buff
- rubber sanding block
- workflow for applying finishing material
- sources of workplace information, including:
  - workplace procedures relating to the use of tools and equipment
  - work instructions
  - workplace procedures relating to reporting and communication
  - manufacturer specifications and operational procedures
- work health and safety requirements including personal protective equipment (PPE).
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - items with finishes requiring enhancement required for performance evidence
  - hand finishing equipment
  - compounds, waxes and oils
  - PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFF3015 Repair and touch up surfaces

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to repair and touch up damaged solid timber, manufactured board and metal surfaces by hand.

Furniture finishing workers with this competency follow established procedures, using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture finishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	<p>1.1 Determine task requirements including surface characteristics and required surface finish from work documentation</p> <p>1.2 Plan for work by identifying processing and application techniques, time and safety requirements and efficient work methods</p> <p>1.3 Identify and follow work health and safety requirements</p> <p>1.4 Identify tools, equipment and accessories to meet task</p>

Elements	Performance Criteria
	requirements and check for safety and functionality
2. Repair surfaces	<p>2.1 Check surfaces for contamination and correct preparation in accordance with workplace procedures and standards</p> <p>2.2 Identify and assess products with surface or other faults</p> <p>2.3 Select and prepare required materials required for repairs</p> <p>2.4 Complete repairs to required manufacturer standards and industry practices</p>
3. Prepare for application of materials	<p>3.1 Identify and select techniques for hand application of materials to meet job requirements</p> <p>3.2 Identify and prepare required coating materials</p> <p>3.3 Perform trial applications of surface materials to check equipment operation, materials consistency and specified surface finish</p> <p>3.4 Identify and rectify faults in accordance with workplace procedures</p>
4. Apply surface coating	<p>4.1 Apply surface coatings in accordance with job instructions, manufacturer specifications and workplace procedures</p> <p>4.2 Inspect coated products and approve for suitability for further processing</p> <p>4.3 Recoat products that do not meet quality specifications or tag for further investigation in accordance with workplace procedures</p>
5. Clean work area and maintain equipment	<p>5.1 Check, clean and store equipment and unused materials in accordance with workplace procedures</p> <p>5.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures</p> <p>5.3 Clean work area, including painting locations, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>5.4 Complete required workplace records</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFF3006 Repair and touch up surfaces.

# Assessment Requirements for MSFFF3015 Repair and touch up surfaces

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- repair and finish a minimum of 4 damaged surfaces, collectively including the following:
  - a strip-off and re-finish
  - 2 touch-ups involving different repair techniques
  - repair or touch up of a metal surface.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- repair and touch up techniques, including:
  - decontamination and repair
  - stripping
  - wash off
  - stoppings
  - epoxy
  - button lac
  - water putty
  - wax
  - plugs and refinishing
- decontamination materials, techniques and safety requirements
- application techniques
- characteristics of coatings and base materials in terms of:
  - toxicity
  - reactivity
  - flammability
  - required viscosity
  - recoatability

- methods to prevent contamination of surfaces during and after surface coating
- workflow for applying surface coatings
- typical surface faults and remediation, including at least 4 of the following:
  - machine marks
  - bruising
  - pencil marks
  - grease
  - cross-sanding marks
  - scratches
  - glue marks
  - dirt marks
  - insect and termite holes
  - holes
  - knots
  - blisters
  - rubber marks
  - burns or tears
  - ropiness and foreign matter in the polish
- function of tools and equipment commonly used to repair and touch up surfaces, including at least 6 of the following:
  - brushes
  - rollers
  - soup rubbers
  - paint trays
  - power agitators
  - sanders
  - liquid containers
  - scrapers
  - quirk sticks
  - sandpapers
  - cotton rags
  - hessian
  - steel wool
  - sandpaper
  - abrasive papers
- typical materials used for repairing and touching up surfaces, including at least 4 of the following:
  - lacquers
  - paints
  - acrylics

- enamels
- one-pot polyurethane
- methylated spirits
- pigments
- spirit colours
- sources of workplace information, including:
  - workplace procedures relating to the use of tools and equipment
  - work instructions
  - workplace procedures relating to reporting and communication
- manufacturer specifications and operational procedures
- work health and safety requirements, including use of personal protective equipment (PPE).
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - tools and equipment required for performance evidence
  - coatings and other consumables
  - PPE
  - items to be enhanced
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet – -

# MSFFF3016 Apply graining and decorative finishes

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to apply timber grain imitation and decorative (faux) finishes to solid timber, manufactured board and metal surfaces during finishing tasks.

Furniture finishing workers with this competency follow established procedures, using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Furniture finishing

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	<p>1.1 Determine task requirements, including surface characteristics and required surface finish, from workplace documentation</p> <p>1.2 Plan for work by identifying processing and application techniques, time and safety requirements and efficient work methods</p> <p>1.3 Identify and follow work health and safety requirements</p>

Elements	Performance Criteria
	1.4 Identify tools, equipment and accessories to meet task requirements and check for safety and functionality
2. Prepare for application of materials	2.1 Check surfaces for contamination and correct preparation in accordance with workplace procedures and standards 2.2 Identify products with surface or other faults and perform required repairs 2.3 Identify and prepare required materials to complete the task 2.4 Perform trial applications of material to check equipment operation, materials consistency, viscosity and sample match 2.5 Identify and rectify or adjust faults and inconsistencies in colour and surface appearance in accordance with workplace procedures
3. Apply finishing materials	3.1 Identify techniques for applying graining solution and other finishes to meet task requirements 3.2 Apply materials in accordance with task requirements, manufacturer specifications and workplace procedures 3.3 Inspect finished products for suitability for further processing 3.4 Rectify products that do not meet quality specifications or tag for further investigation
4. Clean work area and maintain equipment	4.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures 4.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures 4.3 Clean work area, including washing down all areas used for bleaching, safely dispose of waste and identify items for recycling in accordance with workplace and environmental standards 4.4 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation

- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFF3007 Apply graining and decorative finishes.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFFF3016 Apply graining and decorative finishes

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- apply graining solution to imitate a minimum of 2 different timber species
- apply material to imitate a marble finish and one other finish type.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- techniques for applying colouring agents or glazes
- decontamination materials, techniques and safety requirements
- identification of application techniques
- methods to prevent contamination of surfaces during and after surface coating
- common graining and decorative finishes, including:
  - ragging
  - stippling
  - ageing
  - distressing
- materials typically used to apply graining and decorative finishes, including at least 6 of the following:
  - water
  - abrasive papers
  - cotton rags
  - hessian
  - lacquer-based wiping stain
  - polyurethane wiping stain
  - spirit stain
  - pigment oil stain
  - proprietary brand stains

- pigments
- acrylic paint
- enamel
- tools and equipment typically used in applying graining and decorative finishes, including at least 6 of the following:
  - liquid containers
  - rubber gloves
  - face masks
  - spray booths
  - spray guns
  - compressor
  - air lines
  - brushes
  - sanding block
  - brushes
  - graining tools
- workflow for applying surface coatings
- sources of workplace information, including:
  - workplace procedures relating to the use of tools and equipment
  - work instructions
  - workplace procedures for reporting and communication
  - manufacturer specifications and operational procedures
- work health and safety requirements, including personal protective equipment (PPE).
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - tools and equipment required for performance evidence
  - coatings and other consumables
  - PPE
  - items to be finished
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFF3017 Apply traditional French polishing techniques

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to use traditional French polishing techniques to apply shellac polish to solid timber or veneered manufactured board surfaces by hand.

Furniture finishing workers with this competency follow established procedures, using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture finishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Plan and prepare for task	<p>1.1 Determine task requirements from work documentation, including drawings, specifications and instructions</p> <p>1.2 Recognise and adhere to quality assurance requirements in accordance with workplace procedures</p> <p>1.3 Identify and follow work health and safety requirements</p> <p>1.4 Select tools and equipment consistent with job requirements and work instructions, check for safety and serviceability, and report any faults to supervisor</p> <p>1.5 Prepare skinning in, bodying up and spiriting out/stiffening up rubbers to meet work requirements</p>
2. Prepare for application of polish	<p>2.1 Check surfaces for contamination and correct preparation in accordance with workplace procedures and standards</p> <p>2.2 Identify and report or repair products with surface or other faults in accordance with workplace procedures</p> <p>2.3 Identify and apply techniques for applying polish by hand using traditional methods in accordance with workplace procedures</p> <p>2.4 Prepare materials and equipment suitable for skinning in, bodying up and spiriting out/stiffening up operations to meet requirements</p> <p>2.5 Stain, fill in and seal surfaces with polish using a mop brush, blender or swooge to meet requirements</p>
3. Skin in job surface	<p>3.1 Lightly sand surface and check for and rectify defects in accordance with workplace procedures</p> <p>3.2 Charge skinning-in rubber with polish, showing consideration for job colour and clarity in accordance with quality standards</p> <p>3.3 Skin in surface, covering small areas at a time, using correct amount of pressure and suitable rubber movements</p> <p>3.4 Apply required pumice powder in accordance with workplace procedures</p> <p>3.5 Inspect skinned-in surface and repair any defects using suitable materials</p>

4. Body up a skinned in surface	<p>4.1 Use polish, lubricating oil and pumice powder to body up the skinned-in surface, using correct amount of pressure and suitable rubber movements</p> <p>4.2 Continuously monitor rubber and job surface to evaluate their condition</p> <p>4.3 Recharge body-up rubber and apply required lubricating oil and pumice to ensure surface faults and blemishes do not develop</p> <p>4.4 Ensure bodied-up surface is full and flat with an even sheen and shows no blemishes in accordance with quality requirements</p>
5. Spirit off/stiffen up surface	<p>5.1 Use correctly charged rubber, correct amount of pressure and suitable rubber movements to stiffen up/spirit off surface in accordance with requirements</p> <p>5.2 Ensure stiffened up/spirited off surface is free of oil, full, flat with an even sheen and shows no blemishes or rubber marks</p>
6. Clean up work area	<p>6.1 Check, clean and store tools and equipment and any unused materials in accordance with workplace procedures</p> <p>6.2 Store rubbers separately in airtight glass or plastic containers in accordance with workplace procedures</p> <p>6.3 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures</p> <p>6.4 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>6.5 Complete required workplace records</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFF3008 Apply traditional French polishing techniques.

## Links

Companion Volume implementation guides are found in VETNet –  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFF3017 Apply traditional French polishing techniques

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- apply traditional French polishing to 3 surfaces, including:
  - a flat surface
  - a curved surface
  - an enclosed panel.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace and equipment safety requirements
- construction techniques of rubbers
- safe handling of materials associated with traditional French polishing, including:
  - lac
  - polishes
  - paraffin and linseed oils
  - methylated spirits
- shellac mixing procedures
- repair techniques for defects in timber surfaces and polish film
- appropriate rubber charging and movements for each stage of French polishing
- storage requirements for lac products and rubbers
- common types of polish, including:
  - shellac
  - button lac
  - de-waxed lac
  - de-waxed/de-coloured lac
  - white or bleached lac
- common types of lubricating oil, including:

- paraffin
- linseed
- typical surface faults and remediation, including at least 4 of the following:
  - machine marks
  - bruising
  - pencil marks
  - grease
  - cross-sanding marks
  - scratches
  - glue marks
  - dirt marks
  - insect and termite holes
  - holes
  - knots
  - blisters
  - rubber marks
  - burns or tears
  - ropiness and foreign matter in the polish
- typical tools and methods used in French polishing, including at least 4 of the following:
  - filler blades
  - brushes
  - abrasive papers
  - skinning in
  - bodying up and spiriting out rubbers
  - mop brush
  - blender
  - swooge and scrapers
- personal protective equipment (PPE) used in French polishing
- sources of workplace information, including:
  - work instructions
  - workplace procedures relating to reporting and communication
  - manufacturer specifications and operational procedures.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders

- French polishing tools and equipment and cleaning materials required for performance evidence
- PPE
- timber components/furnishings requiring polish
- workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFF3018 Set up, operate and maintain computer numerically controlled (CNC) coating systems

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to set up, operate and maintain CNC coating systems in order to apply coatings to specifications.

Furniture finishing workers with this competency follow established procedures, using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Furniture finishing

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements, including characteristics of the surface and the required surface coating, from work documentation 1.2 Plan work by identifying processing and application techniques, time and safety requirements and efficient work methods in accordance with workplace procedures 1.3 Identify and follow work health and safety requirements

Elements	Performance Criteria
	<p>1.4 Identify tools, equipment and accessories to meet task requirements and check they are safe and functional</p> <p>1.5 Identify and prepare coating materials for the task</p>
<p>2. Check and prepare for spraying</p>	<p>2.1 Identify products with surface or other faults and report or repair faults in accordance with workplace procedures</p> <p>2.2 Protect other products and equipment in workplace from overspray in accordance with workplace procedures and safety standards</p> <p>2.3 Perform trial applications of surface materials to check equipment operation, materials consistency and specified surface finish</p> <p>2.4 Identify and rectify or report machine faults in accordance with workplace procedures</p> <p>2.5 Identify material faults and rectify in accordance with workplace procedures</p>
<p>3. Apply surface coating</p>	<p>3.1 Ensure surfaces are kept free of contamination</p> <p>3.2 Apply surface coatings in accordance with workplace procedures</p> <p>3.3 Monitor surface coating viscosity and coverage and check against workplace requirements for even spread and thickness</p> <p>3.4 Perform required rectification of surface faults in accordance with workplace procedures</p> <p>3.5 Inspect products and assess for suitability for further processing</p> <p>3.6 Rectify or report defects in accordance with workplace procedures</p>
<p>4. Clean work area and maintain equipment</p>	<p>4.1 Check, clean and store equipment and unused materials in accordance with equipment instructions and workplace procedures</p> <p>4.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures</p> <p>4.3 Clean work area, including spray booth, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>4.4 Complete required workplace records</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFF3009 Set up, operate and maintain computer numerically controlled (CNC) coating systems.

## Links

Companion Volume implementation guides are found in VETNet – -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFF3018 Set up, operate and maintain computer numerically controlled (CNC) coating systems

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- select and apply surface coatings, including the adjustment of system controls, to achieve required coating using at least 2 of the following types of computer numerically controlled (CNC) systems:
  - curtain coating
  - UV coating
  - tumbling
  - dipping
  - electrostatic powder coating tasks.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- CNC coating system equipment, processes and procedures
- characteristics of coatings and base materials in terms of toxicity, reactivity, flammability, required viscosity and recoatability
- effects of fumes, heat and other radiations on surface coatings
- methods to prevent contamination of surfaces during and after surface coating
- workflow in relation to spraying operations
- function of tools and equipment used in setting up, operating and maintaining computer numerically controlled (CNC) systems, including at least 6 of the following:
  - computerised spray system
  - electrostatic spray guns
  - baking ovens
  - barrel tumblers
  - spray booths
  - liquid containers
  - compressor and hoses

- screwdrivers
- shifting spanner and spanners
- ford cup
- typical materials used in setting up, operating and maintaining computer numerically controlled (CNC) coating systems, including:
  - stains
  - lacquers
  - wax
  - oil
  - two-pack polyurethane
  - three-pack polyester
  - enamels
  - acrylics
  - powder coating
- sources of workplace documentation, including:
  - work instructions
  - workplace procedures relating to reporting and communication
  - manufacturer specifications and operational procedures
- work health and safety requirements, including the use of personal protective equipment (PPE).
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - items to be coated
  - CNC coating systems and equipment, including spray booth, required for performance evidence
  - coatings and cleaning products
  - PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFM2013 Use furniture making hand and power tools

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to select and use hand and power tools to perform common furniture making tasks such as cutting, joining, planning and sanding wood and other materials. It includes tool safety and basic tool sharpening. Workers with this competency complete routine tasks in industries such as cabinet and furniture making and wood machining.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Cabinetry and furniture

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for tool use	1.1 Identify task requirements from work instructions 1.2 Select tool to meet task requirements and identify work health and safety requirements for its use 1.3 Check that tool is safe and functional and report any faults to supervisor 1.4 Select equipment to hold or support material being worked on 1.5 Prepare material and hold in position for safe and efficient work

2 Use tools	<p>2.1 Use tools safely and in accordance with workplace procedures and manufacturer specifications</p> <p>2.2 Use tools to workplace efficiency standards</p> <p>2.3 Ensure tools are in a safe state, position and location when not in immediate use</p> <p>2.4 Follow safety procedures for the use of power</p>
3 Clean up work area and tools	<p>3.1 Clean tools and equipment using appropriate cleaning materials and agents</p> <p>3.2 Complete routine operator maintenance on tools in accordance with workplace procedures and manufacturer instructions</p> <p>3.3 Store tools and equipment according to their specific storage needs and workplace requirements</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures
- Numeracy skills to interpret work instructions associated with number or measurement.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM2001 Use furniture making sector hand and power tools.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFFM2013 Use furniture making hand and power tools

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- choose appropriate hand tools and safely and efficiently use them to industry standards on at least 2 separate occasions for furniture making tasks, including at least 9 of the following tools:
  - chisel
  - file or rasp
  - claw, Warrington or tack hammer
  - plane
  - saw
  - holding tool
  - levelling equipment
  - mallet
  - marking-out and measuring tools
  - scraper
  - screwdriver
- choose appropriate power tools and use safely to industry standards on at least 2 separate occasions for furniture making tasks, including at least 5 of the following tools:
  - brad, nail or staple gun
  - drill and impact driver
  - biscuit or domino joining machine
  - multi-tool
  - planer
  - router
  - trimmer
  - belt or orbital sander
  - circular, drop or jig saw
- conduct operator maintenance on hand and power tools, including:
  - grinding and sharpening 2 of the following:

- chisel
- drill bit
- hard plane blade
- changing and setting up cutters in a planer or router
- changing the blade on a power saw.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace health and safety procedures
- general use, maintenance and safety requirements for hand and power tools used in furniture production
- personal protective equipment (PPE) requirements for hand and power tools used in furniture production.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - hand and power tools required for performance evidence
  - materials on which tools are used
  - ancillary holding equipment
  - PPE
  - power sources
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFM2014 Select and apply hardware

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to select and apply hardware to new or refurbished furniture or cabinetry. Furniture may be made from any material and may be freestanding or fitted, including kitchen and bathroom cabinetry. Workers with this competency follow established procedures in timber technology industries such as cabinet and furniture making.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Cabinetry and furniture

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan and prepare for task	1.1 Identify task requirements from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Select hardware to meet design specifications 1.4 Select tools to meet task requirements and check for safety and functionality
2 Attach hardware	2.1 Lay out hardware items in accordance with design 2.2 Take measurements to determine precise location and correct alignment for hardware 2.3 Use machinery in accordance with workplace procedures 2.4 Secure hardware using tools suited to hardware and material to which it is being attached 2.5 Inspect completed work for compliance with quality requirements and rectify any deficiencies

3 Finalise task and maintain equipment	<p>3.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>3.2 Clean equipment and complete routine maintenance in accordance with workplace procedures</p> <p>3.3 Identify, tag and report faulty equipment in accordance with workplace procedures</p> <p>3.4 Complete task documentation in accordance with workplace procedures</p>
--	--

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret work instructions and furniture design documentation
- Writing skills to communicate simple information in familiar workplace forms
- Numeracy skills to take accurate measurements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Supersedes and is equivalent to MSFFM2003 Select and apply hardware.

## Links

Companion Volume implementation guides are found in VETNet – -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFM2014 Select and apply hardware

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- select and apply 6 different items of hardware to cabinetry or other furniture items, including at least 3 of the following:
  - basket and lift systems
  - hinges
  - handles
  - drawer-runners
  - metal drawer systems
  - sliding rail systems
  - rotating or slide-out storage systems.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
  - work health and safety
  - quality assurance and tolerance levels
  - reporting of equipment faults and material defects
- furniture production workflow
- how to interpret basic aspects of furniture design documentation
- furniture materials and suitable hardware types and attachment methods:
  - manufactured board
  - solid timber
  - metal
- hand and power tools and personal protective equipment (PPE) typically required for hardware application.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - furniture items requiring hardware
  - furniture design documentation
  - tools and equipment required for performance evidence
  - PPE
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFM2015 Apply sheet laminates by hand

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to prepare, lay out and apply sheet laminates by hand to base materials in furniture and cabinetry production. Workers with this competency follow established procedures using discretion, judgement and some problem solving.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Cabinetry and Furniture

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements from work documentation 1.2 Plan task sequence and identify procedures for checking quality at each stage 1.3 Identify and follow work health and safety procedures 1.4 Select suitable work area for task 1.5 Select tools and equipment and check that they are safe and functional. 1.6 Select laminate and adhesives and check that they meet quality requirements

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Lay out and prepare materials	2.1 Prepare surfaces to be laminated using techniques suited to base material 2.2 Prepare and lay out laminates 2.3 Position joining tools, equipment and materials ready for task
3. Apply fit and finish	3.1 Use tools and equipment safely and in accordance with workplace procedures 3.2 Measure laminates within required tolerances and mark and cut to size 3.3 Apply adhesives suited to base material in accordance with workplace procedures and manufacturer instructions 3.4 Roll and hammer laminates to secure in accordance with workplace procedures 3.5 Complete final trim and finishing to specifications 3.6 Inspect completed work for compliance with quality requirements and rectify any deficiencies
4. Finalise task	4.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 4.2 Clean tools and equipment, complete routine maintenance and leave in safe mode in accordance with workplace procedures 4.3 Tag and report faulty equipment in accordance with workplace procedures 4.4 Complete task documentation in accordance with workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar work documentation
- Writing skills to communicate simple information in familiar workplace documents and make clear and legible markings on materials

- Numeracy skills to measure and calculate lengths, areas and angles, estimate material requirements and interpret technical information on documentation

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM2004 Apply sheet laminates by hand.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFFM2015 Apply sheet laminates by hand

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- apply and finish laminates on at least 3 occasions, including:
  - laminate edging on at least 2 occasions
  - laminate joints on at least 1 occasion
  - applying adhesive using 2 of the following methods:
    - spray
    - brush
    - scraper
    - roller.
    -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
  - work health and safety
  - quality assurance and tolerance levels
  - reporting of faults and material defects
- workflow for furniture production
- types of laminates and their characteristics
- how to interpret furniture and cabinetry design documentation
- tools and equipment commonly used to apply laminates
- personal protective equipment (PPE) used when applying laminates.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - laminating tools and equipment required for performance evidence
  - PPE
  - substrate materials to be laminated
  - sheet laminate
  - adhesives
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFM2016 Join solid timber

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to join timber to manufacture solid timber flat surfaces.

Workers with this competency follow established procedures in timber technology industries such as cabinet and furniture making using discretion, judgement and some problem solving.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Cabinetry and furniture

### Elements and Performance Criteria

<b>Elements describe the essential outcomes.</b>	<b>Performance criteria describe the performance needed to demonstrate achievement of the element.</b>
1 Prepare for task	1.1 Identify task requirements from work documentation 1.2 Plan work sequence and identify procedures for checking quality at each stage 1.3 Identify and follow work health and safety procedures 1.4 Select suitable work area for task 1.5 Select tools and equipment to meet task requirements and check that they are safe and functional

2 Lay out and prepare materials	2.1 Obtain timbers and check they meet task quality requirements 2.2 Identify joining process to meet task requirements 2.3 Prepare and lay out timbers to facilitate efficient joining process
3 Join timber	3.1 Accurately measure, mark and cut timbers to size 3.2 Use tools and equipment safely and in accordance with manufacturer specifications 3.3 Apply adhesives in accordance with workplace procedures and manufacturer instructions 3.4 Complete final trim and finishing to meet task specifications 3.5 Check that joint meets required quality standards and rectify any deficiencies
4 Finalise task	4.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 4.2 Clean machinery, complete routine maintenance and leave in a safe mode in accordance with workplace procedures 4.3 Identify, tag and report faulty equipment in accordance with workplace procedures 4.4 Complete task documentation in accordance with workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate simple factual information in familiar workplace documents
- Numeracy skills to measure and calculate lengths and areas and material requirements

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM2005 Join solid timber.

## Links

Companion Volume implementation guides are found in VETNet --

# Assessment Requirements for MSFFM2016 Join solid timber

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- join at least 4 solid timber tops, shelves or panels, each with a minimum of 3 sections
- use each of the following edge joining methods at least once to achieve workplace quality standards:
  - butt and dowel
  - moulded edge joint (finger-joint, tongue in groove, or zigzag)
  - biscuit joint or domino
  - slip-tongue (aka tongue-in-groove) joint.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
  - work health and safety
  - quality assurance
  - reporting of machinery faults and material defects
- the following wood characteristics and defects:
  - bowing
  - cupping
  - expansion
  - grain direction
  - spring
  - twisting
- characteristics of different types of adhesives used to join solid timber and their application methods
- types of sawing methods, including back sawn and quarter sawn, and the impact of these on joining
- tools, materials, equipment, personal protective equipment (PPE) and processes used in timber joining.

- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work documentation
  - tools, equipment and machinery required for performance evidence
  - PPE
  - timber materials for joining
  - workplace procedures.
  -

## MSFFM2017 Hand make timber joints

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to make timber joints using hand and portable power tools. Workers with this competency complete routine tasks in industries such as furniture and cabinet making.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Cabinetry and furniture

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Identify task requirements, including joint type, and purpose and style of finished product from work instructions 1.2 Identify and follow work health and safety requirements 1.3 Select tools and equipment to meet task requirements and check they are safe and functional 1.4 Select materials, adhesives and fasteners to meet task quality requirements
2. Make joint	2.1 Mark out cutting and joining lines to suit joint type 2.2 Check measurements are within tolerances to ensure quality outcomes

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	2.3 Join timber in accordance with workplace requirements 2.4 Use fasteners and adhesives to make joints firm based on task requirements 2.5 Confirm finished joint meets task quality requirements and rectify any deficiencies
3. Finalise task	3.1 Clean work area, safely dispose of rubbish and identify items for recycling in accordance with workplace procedures and environmental standards 3.2 Clean tools and complete routine maintenance in accordance with workplace procedures 3.3 Identify, tag and report faulty tools and equipment in accordance with workplace procedures 3.4 Complete task documentation in accordance with workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures
- Writing skills to communicate simple information in familiar workplace documents and make clear and legible markings on timbers
- Numeracy skills to measure lengths and angles and make basic calculations.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM2006 Hand make timber joints.

## Links

Companion Volume implementation guides are found in VETNet --  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFM2017 Hand make timber joints

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- choose and make appropriate joints, including 4 different joint types and 2 types of adhesive, using only handheld tools while undertaking:
  - box construction
  - carcass construction
  - drawer construction
  - frame construction.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
  - work health and safety
  - quality assurance:
    - visual appearance – alignment, neatness
    - tolerance
    - gaps or play in joints and strength
    - reporting of faults
- workflow for furniture production
- joint types and their suitability for different purposes, including at least four of the following:
  - dowel
  - mortice and tenon
  - dovetail
  - lap joint
  - biscuit joint
  - finger joint

- housing joint
- mitre joint
- bridle joint
- characteristics of different timber types commonly used in joint construction
- characteristics of different adhesive types commonly used in joint construction
- function of tools commonly used for hand construction of joints, including at least 5 of the following:
  - chisel
  - mallet
  - mortise gauges
  - vernier calipers
  - vice
  - dovetail saw
  - tenon saw
  - coping saw
  - plane
  - file
  - hand drill
  - power drill
  - dowel jig
  - power router
  - portable biscuit machines
  - power planers
  - power saw
- personal protective equipment (PPE) required for hand construction of joints.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - joining tools and equipment **required for performance evidence**
  - PPE
  - timber materials to be joined
  - adhesives
  - workplace procedures.
  -

## MSFFM2018 Operate basic static machines safely

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to safely operate basic stationary machinery used in industries such as wood machining and cabinet and furniture making. Workers with this competency undertake basic operations. More advanced skills in setting up, maintaining and using machines to their full capacity are covered in units dedicated to specific machine types.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Wood machining

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for task	1.1 Identify task requirements from work instructions 1.2 Identify and follow work health and safety requirements 1.3 Select material for machining based on job requirements and check that it meets task quality requirements 1.4 Check that emergency stops, gauges, guards, controls and safety equipment are functional prior to machine start-up 1.5 Complete machine settings and adjust to meet task requirements in compliance with manufacturer instructions 1.6 Follow workplace procedures for machine start-up 1.7 Complete trial run to check machine is operating correctly and

	report any problems to supervisor
2 Operate machines	<p>2.1 Feed material into machine in accordance with manufacturer instructions, safety requirements and workplace procedures</p> <p>2.2 Operate machine in accordance with its designed capacity and purpose, and to manufacturer recommendations</p> <p>2.3 Identify items that do not meet quality requirements and recycle or discard in accordance with workplace procedures</p> <p>2.4 Recognise problems with product or machine operation and report to appropriate persons in accordance with workplace procedures</p>
3 Finalise task	<p>3.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>3.2 Clean machinery, complete routine maintenance and leave in a safe mode in accordance with workplace procedures</p> <p>3.3 Identify, tag and report faulty equipment in accordance with workplace procedures</p> <p>3.4 Complete task documentation in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures.
- Writing skills to communicate simple information in familiar workplace documents.
- Numeracy skills to interpret work instructions associated with number or measurement.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFFM2010 Set up and operate basic static machines.

## Links

Companion Volume implementation guides are found in VETNet --  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFM2018 Operate basic static machines safely

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- safely operate at least 5 of the following static machines on at least 2 occasions each to complete specified tasks to workplace quality standards:
  - band saw
  - crosscut saw
  - panel saw
  - rip saw
  - edge bander
  - hinge borer
  - thicknesser
  - jointer
  - wide belt sander.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- safety requirements and considerations for operation of static machines:
  - correct positioning of hands and body in relation to the machine
  - importance of grain direction in solid timber for the safe positioning of the work piece in the machine
  - correct use of machine guards and safety devices, including Australian Standards requirements
  - how to prevent kick back of work piece in the machine
  - required dust extraction for the materials being used
- characteristics of static machines used in machining materials, including at least 5 of the following:
  - band saw

- compound mitre saw/crosscut saw
- panel saw
- rip saw
- edge bander
- hinge borer
- thicknesser
- jointer
- personal protective equipment (PPE) required for operation of static machines
- characteristic of manufactured board and solid timber in response to machining
- edge treatments
- selecting the correct face on double sided flat panels for the finished situation
- importance of using correct tooling for the machine and operation being performed
- workplace procedures for:
  - quality assurance and tolerance levels
  - reporting of machinery faults and material defects.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - static machines required for performance evidence
  - PPE
  - unprocessed materials for machining
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet – -

## MSFFM2019 Assemble furnishing products

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to use basic construction skills to assemble furnishing products. Products may be fitted or freestanding pieces of furniture or components made of timber, manufactured board or other material.

Workers with this competency complete routine tasks in industries such as cabinet and furniture making.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Wood machining

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for assembly	1.1 Determine task requirements from work documentation 1.2 Plan assembly sequence and identify procedures for checking quality at each stage 1.3 Identify and follow work health and safety procedures 1.4 Select suitable work area for task 1.5 Select tools and equipment and check that they are safe and functional 1.6 Select components, joining devices, hardware and fittings in accordance with specifications
2 Assemble items	2.1 Lay out and join components using jigs and appropriate fastenings 2.2 Use tools, equipment and machinery safely and in accordance with manufacturer specifications

	<p>2.3 Attach hardware and fittings in accordance with specifications</p> <p>2.4 Check product quality against specifications at each stage of assembly</p> <p>2.5 Identify components which do not meet quality requirements and rectify deficiencies or process in accordance with workplace procedures</p> <p>2.6 Process finished products in accordance with workplace procedures</p>
3 Clean work area and maintain equipment	<p>3.1 Clean work area, safely dispose of rubbish and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>3.2 Clean tools and equipment, complete routine maintenance and leave in a safe mode in accordance with workplace procedures</p> <p>3.3 Identify, tag and report faulty equipment in accordance with workplace procedures</p> <p>3.4 Complete job documentation in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and estimate material requirements and interpret numerical data in production plans.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFFM2002 Assemble furnishing components and MSFFM2007 Follow plans to assemble production furniture.

## Links

Companion Volume implementation guides are found in VETNet – -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFM2019 Assemble furnishing products

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- assemble at least 2 cabinets (freestanding or fitted) or 1 cabinet and 1 full piece of furniture. Collectively, these must include at least 3 of the following:
  - door
  - drawer
  - frame
  - shelve
- attach at least 3 types of hardware, including at least 2 of the following:
  - hinges
  - handles
  - drawer-runners
  - metal drawer systems
  - sliding rail systems.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
  - work health and safety
  - quality assurance:
    - squareness, alignment and wind
    - hardware, fittings and attachments
    - functionality and tolerances
    - conformity to specifications
  - reporting of machinery faults and material defects
- how to interpret production drawings
- components of common furnishing products, including:
  - cabinets

- tables
- doors
- drawers
- frames
- shelves
- how characteristics of timber and manufactured board affect the assembly process
- tools, materials and equipment, including personal protective equipment (PPE), commonly used to assemble furniture and cabinets
- types and characteristics of hardware used in furniture and cabinets
- storage considerations for assembled items:
  - avoidance of damage
  - compatibility of items for storage
  - environmental conditions.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - furniture products or component parts for assembly
  - tools, equipment and materials required for performance evidence
  - PPE
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFM3009 Produce manual and computer-aided production drawings

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers producing manual and computer-aided production drawings.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furniture Making

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |  |     |   |
|---|--|-----|---|
| 1 | Identify object to be drawn                | 1.1 | The purposes and any operational characteristics of object to be drawn are identified                         |
|   |  | 1.2 | Production materials and method are identified  |
| 2 | Establish drawing criteria and limitations | 2.1 | Type of drawing to be completed is identified   |
|   |  | 2.2 | Drawing requirements are established and documented identifying dimensions, angles, shapes and finished sizes |
|   |  | 2.3 | Drawing conventions and specifications to be noted on the drawing are identified                              |
|   |  | 2.4 | Appropriate medium for drawings is identified and   |

- selected
- |   |                                    |     |   |
|---|------------------------------------|-----|---|
| 3 | Quantify and draft initial drawing | 3.1 | Dimensions are plotted from criteria and documented specifications          |
|   |                                    | 3.2 | Dimensional points are connected to match appropriate drawing views         |
|   |                                    | 3.3 | Any production notes or special requirements are noted                      |
|   |                                    | 3.4 | Drawing conventions and specifications are noted on the documentation       |
| 4 | Complete drawing                   | 4.1 | Angles, shapes and dimensions are checked against specifications and sample |
|   |                                    | 4.2 | Adjustments are made to the drawing within scope of authority               |
|   |                                    | 4.3 | Drawing is checked for compliance with workplace documentation requirements |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

### Scope of drawing:

- is to be limited to that used for manufacture/production purposes and is not to encompass original design concepts
- drawing is to be completed using both manual and computer-aided design (CAD) techniques and processes

### Unit scope includes:

- drawings in metric scale and covering all dimensions of the furniture and furnishings

### Calculations include:

- manual and with the aid of a calculator

- Unit context includes:**
- work health and safety (WHS) requirements, including legislation, building codes, material safety management systems, hazardous substances and dangerous goods codes, and local safe operating procedures
  - work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- Personal protective equipment includes:**
- that prescribed under legislation, regulations and enterprise policies and practices
- Information and procedures include:**
- workplace procedures relating to the use of tools and equipment
  - work instructions, including job sheets, cutting lists, plans, drawings and designs
  - workplace procedures relating to reporting and communication
  - manufacturer specifications and operational procedures

## Unit Mapping Information

Supersedes and is equivalent to LMFFM3011B Produce manual and computer-aided production drawings.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFM3009 Produce manual and computer-aided production drawings

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Identify the factors and criteria relevant to the drawings
- Apply safety requirements throughout the work sequence, including the use of personal protective clothing and equipment
- Prepare production drawings of furniture/furnishings:
  - covering a scope of at least three (3) products
  - applying both manual and computer-aided techniques and processes
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Minimise wastage of resources, including materials, time and money
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Furniture design and planning criteria
- Structural geometry
- Measurement techniques and equipment/tools
- Theory and practice of calculations (addition, subtraction, multiplication and division)
- Types, techniques and processes of manual production drawing
- Types of computer-aided drawing equipment, software, techniques and processes
- Conventional signs and markings for drawings

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.

- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to information on the subjects for drawing, computer-aided drawing systems, measuring, calculating and recording devices.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# MSFFM3024 Construct jigs and fixtures

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers preparing and constructing jigs and fixtures to produce furniture components.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furniture Making

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |  |     |   |
|---|--|-----|---|
| 1 | Identify the purpose of the jig or fixture | 1.1 | Purpose of the jig or fixture, and the equipment it is to be used on is established |
|   |  | 1.2 | Proposed service life of jig or fixture is established                              |
|   |  | 1.3 | Tolerances allowed are identified   |
|   |  | 1.4 | Materials for jig construction are established                                      |
|   |  | 1.5 | Quality requirements for each stage of the construction process are identified      |
| 2 | Plan jig or fixture construction           | 2.1 | Plan of proposed jig or fixture is produced   |
|   |  | 2.2 | Approval of design is gained through workplace                                      |

- procedures
- 2.3 Steps or stages in production are planned, noting check points for measurements and tests
- 3 Collect materials and equipment
- 3.1 Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work
- 3.2 Sufficient materials to complete the project are assembled ready for use
- 3.3 Suitable work area is selected
- 3.4 Hand and/or power tools are identified and checked for serviceability and assembled in work area
- 3.5 Appropriate equipment required is identified and checked for serviceability
- 4 Construct the jig or fixture
- 4.1 Production plan is followed to construct the jig or fixture
- 4.2 Tools and equipment are used in accordance with workplace procedures
- 4.3 Quality checks are conducted at the identified points
- 4.4 Modifications are identified and recommended within workplace procedures
- 4.5 Modifications to the plan are documented and followed
- 4.6 Jig or fixture is checked for fitness for purpose
- 5 Finalise operation and maintain equipment
- 5.1 Work area is cleaned, hand and/or power tools and equipment are cleaned, maintained and stored in accordance with workplace procedures
- 5.2 Machinery is cleaned and left in a safe mode
- 5.3 Faulty and/or defective equipment is tagged and reported in accordance with workplace practices
- 5.4 Unused hardware is collected and stored for re-use or disposal following workplace procedures
- 5.5 Waste and scrap materials are dealt with following workplace procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

### **Machines for which jigs and fixtures are made include:**

- band saws
- cross-cut saws
- jig saws
- mitre saws
- panel and rip saws
- belt sanders
- panel planers
- surface planers
- horizontal borers
- vertical drill presses
- mortisers
- tenoners
- spindle moulders
- overhead and inverted pin routing machines

### **Uses for jigs and fixtures include:**

- holding
- shaping
- drilling
- cutting
- routing

### **Production of components requiring jigs and fixtures include:**

- chair legs
- shaping curved components
- end panels
- trenching
- grooving

### **Tools and equipment include:**

- measuring tapes or rulers
- hammers

- mallets
  - squares
  - bevels
  - chisels
  - planes
  - hand saws
  - power saws
  - power drills/screwdrivers
  - pneumatic tools, compressor and spray equipment
  - clamps
  - screwdrivers
  - pincers
- Unit context includes:**
- WHS requirements, including legislation, building codes, material safety management systems, hazardous substances and dangerous goods code, and local safe operating procedures
  - work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
  - work requires individuals to demonstrate some discretion, judgement and problem solving in the set up and operation of machines
  - competency may be demonstrated in workplaces involved in the manufacture of solid timber furniture, domestic furniture, commercial furniture, kitchen and bathroom cabinets and/or furniture components
- Materials used in the construction of jigs and fixtures include:**
- solid timber
  - manufactured board
  - metal
  - plastics
  - synthetic solids
  - laminates and non-ferrous materials
- Personal protective equipment includes:**
- that prescribed under legislation, regulations and enterprise policies and practices
- Information and procedures include:**
- workplace procedures relating to the use of tools and equipment
  - work instructions, including job sheets, cutting lists, plans, drawings and designs
  - workplace procedures relating to reporting and communication
  - manufacturer specifications and operational procedures

## Unit Mapping Information

Supersedes and is equivalent to LMFFM3033B Construct jigs and fixtures.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFM3024 Construct jigs and fixtures

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection practices to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, tools, equipment or products
  - maintain required production output and product quality
- Select materials and construct a minimum of three (3) different types of jigs/fixtures, including one (1) for a shaping machine and one (1) which is adjustable
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Minimise wastage of resources, including materials, time and money
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Types, characteristics, uses and limitations of jigs and fixtures
- Criteria for selecting material for use in jigs and fixtures
- Requirements for cutting, shaping and joining materials
- Identification of equipment, processes and procedures
- Work flow in relation to the use of jigs and fixtures

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

- have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
- be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to a job context, materials and equipment for jig or fixture construction.

# MSFFM3025 Construct furniture using leg and rail method

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to construct and assemble furniture using traditional leg and rail construction methods.

Workers with this competency follow established procedures and designs to make furniture using discretion, judgement and some problem solving.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Cabinetry and furniture

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for task	1.1 Determine task requirements from design and other work documentation 1.2 Plan construction and assembly sequence and identify procedures for checking quality at each stage 1.3 Identify and follow work health and safety procedures 1.4 Select suitable work area for the task 1.5 Complete preparatory drawings and set-outs in accordance with design and other work documentation 1.6 Develop cutting list for components in accordance with design and other work documentation 1.7 Select tools and equipment and check that they are safe and

	<p>functional</p> <p>1.8 Check that materials meet task quality requirements</p>
2 Complete construction	<p>2.1 Set out and prepare materials and mark components in accordance with task requirements</p> <p>2.2 Use tools, equipment and machinery safely and in accordance with manufacturer specifications</p> <p>2.3 Check product meets quality requirements at each stage of construction and assembly.</p> <p>2.4 Make components in accordance with specified shapes, angles or curves, and confirm against set-outs and task requirements</p> <p>2.5 Assemble components using jigs and/or clamps and fastenings according to task requirements</p> <p>2.6 Apply adhesives according to workplace procedures and/or manufacturer instructions</p> <p>2.7 Complete the joining process in accordance with workplace procedures</p> <p>2.8 Confirm that assembled furniture complies with specifications and rectify any deficiencies</p> <p>2.9 Prepare product for final finish in accordance with task requirements</p>
3 Finalise task	<p>3.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>3.2 Clean machinery, complete routine maintenance and leave in a safe mode in accordance with workplace procedures</p> <p>3.3 Identify, tag and report faulty equipment in accordance with workplace procedures</p> <p>3.4 Complete job documentation in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents and make clear and legible markings on materials

- Numeracy skills to measure and calculate lengths and angles and estimate material requirements

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM3002 Construct furniture using leg and rail method.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFFM3025 Construct furniture using leg and rail method

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- construct at least 1 table and 1 chair collectively using 4 different leg and rail joints.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
  - work health and safety
  - reporting machinery faults and material defects
  - quality assurance, including checking:
    - squareness, alignment and wind
    - hardware, fittings and attachments
    - functionality and tolerances
    - compliance with design specifications
    - distortion and product faults
- how to:
  - interpret furniture design documentation
  - prepare drawings and set-outs
- different leg and rail joints and their applications
- basic characteristics of timber types used in furniture construction
- relationship between furniture material selection and structural standards
- basic ergonomic principles and guidelines for furniture construction
- tools and machinery and personal protective equipment (PPE) commonly used in leg and rail construction
- properties of different types of adhesives used in furniture construction.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design documentation
  - unprocessed materials for construction
  - tools, equipment and machinery required for performance evidence
  - PPE
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFM3026 Produce angled and curved components using manufactured board

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to produce and assemble manufactured board components using angled and curved construction methods. Products may be custom-made or mass-manufactured and could include curved counters, desks, seating, cabinetry and end panels.

Workers with this competency follow established procedures using discretion, judgement and problem solving to determine construction methods based on design documentation provided to them.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Cabinetry and furniture

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for task	1.1 Determine task requirements from design and other work documentation 1.2 Plan construction and assembly sequence and identify procedures for checking quality at each stage 1.3 Identify and follow work health and safety procedures 1.4 Select suitable work area for the task 1.5 Complete preparatory drawings and set-outs in accordance

	<p>with work documentation</p> <p>1.6 Develop cutting list for components in accordance with work documentation</p> <p>1.7 Select tools and equipment and check they are safe and functional</p> <p>1.8 Check that materials meet task quality requirements</p>
2 Complete construction	<p>2.1 Set out and prepare materials and mark components in accordance with design requirements</p> <p>2.2 Use tools and equipment safely and in accordance with manufacturer specifications</p> <p>2.3 Check product quality against specifications at each stage of construction and assembly.</p> <p>2.4 Bend and form materials</p> <p>2.5 Make components and confirm against set-out for tolerances, fit and accuracy</p> <p>2.6 Assemble components and confirm against set-out for accuracy, fit, twist and distortion</p> <p>2.7 Prepare product for final finish in accordance with task requirements</p>
3 Finalise task	<p>3.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>3.2 Clean machinery, complete routine maintenance and leave in safe mode in accordance with workplace procedures</p> <p>3.3 Identify, tag and report faulty equipment in accordance with workplace procedures</p> <p>3.4 Complete task documentation in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents and make clear and legible markings on materials
- Numeracy skills to measure lengths, angles and areas and estimate material requirements

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

# Assessment Requirements for MSFFM3026 Produce angled and curved components using manufactured board

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- produce at least 4 curved components using manufactured board, collectively including:
  - one kerfing method
  - one machine curved method
  - one laminated curve method
  - skinning a curved sub-frame
- produce at least 2 angled components using manufactured board, collectively including:
  - one bevel join
  - one flat panel angled component.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
  - work health and safety
  - quality assurance
  - reporting of machinery faults and material defects
- workflow for the construction process
- how to:
  - interpret design documentation
  - prepare drawings and set-outs
- techniques for producing curved and angled components using manufactured board, including machine and laminated curve methods and bevel joins
- techniques for skinning a curved sub-frame
- techniques for producing flat panel angled components
- types and characteristics of manufactured board used for angled and curved components

- tools and machinery used to create angle and curved components using manufactured board, including those used for bending and forming
- personal protective equipment (PPE) required when creating angle and curved components using manufactured board
- types and characteristics of adhesives used in cabinetry and furniture construction.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design documentation
  - unprocessed materials for construction
  - tools, equipment and machinery required for performance evidence
  - PPE
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFM3027 Produce angled and curved components using solid timber

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to produce and assemble solid timber components using angled and curved construction methods. Products may be custom-made or mass-manufactured and could include curved counters, desks, seating, cabinetry and end panels.

Workers with this competency follow established procedures using discretion, judgement and problem solving to determine construction methods based on design documentation provided to them.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Cabinetry and furniture

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for task	1.1 Determine task requirements from design and other work documentation 1.2 Plan construction and assembly sequence and identify procedures for checking quality at each stage 1.3 Identify and follow work health and safety procedures 1.4 Select suitable work area for task 1.5 Complete preparatory drawings and set-outs in accordance

	<p>with work documentation</p> <p>1.6 Develop cutting list for components in accordance with work documentation</p> <p>1.7 Select tools and equipment and check they are safe and functional</p> <p>1.8 Check that materials meet task quality requirements</p>
2 Complete construction	<p>2.1 Set out and prepare materials and mark components in accordance with design requirements</p> <p>2.2 Use tools and equipment safely and in accordance with manufacturer specifications</p> <p>2.3 Check product quality against specifications at each stage of construction and assembly.</p> <p>2.4 Bend and form materials</p> <p>2.5 Make components and confirm against set-out for tolerances, fit and accuracy</p> <p>2.6 Assemble components and confirm against set-out for accuracy, fit, twist and distortion</p> <p>2.7 Prepare product for final finish in accordance with task requirements</p>
3 Finalise task	<p>3.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>3.2 Clean machinery, complete routine maintenance and leave in safe mode in accordance with workplace procedures</p> <p>3.3 Identify, tag and report faulty equipment in accordance with workplace procedures</p> <p>3.4 Complete task documentation in accordance with workplace procedures</p>

## Foundation Skills

# MSFFM3028 Prepare and apply decorative surfaces for furnishing products

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to prepare, construct and apply veneers and inlays to furnishing product.

Workers with this competency follow established procedures using some discretion, judgement and problem solving.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Cabinetry and furniture

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for task	1.1 Determine task requirements from design and other work documentation 1.2 Plan construction sequence and identify procedures for checking quality at each stage 1.3 Identify and follow work health and safety procedures 1.4 Select suitable work area for task 1.5 Select tools and equipment to meet task requirements and check that they are safe and functional 1.6 Check that materials meet task quality requirements.

2 Lay out and prepare materials	<p>2.1 Confirm quality of materials against job requirements and lay out to required design</p> <p>2.2 Select suitable joining points based on job requirements</p> <p>2.3 Prepare and cut material to required size and thickness</p>
3 Construct and apply decorative surfaces	<p>3.1 Use machinery safely and in accordance with workplace procedures</p> <p>3.2 Cut and join items to specifications and in accordance with workplace procedures</p> <p>3.3 Use adhesives in accordance with workplace procedures and manufacturer instructions</p> <p>3.4 Check product quality against specifications at each stage of construction and assembly and rectify any non-conformity</p>
4 Finalise task	<p>4.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>4.2 Clean machinery, complete routine maintenance and leave in safe mode in accordance with workplace procedures</p> <p>4.3 Identify, tag and report faulty equipment in accordance with workplace procedures</p> <p>4.4 Complete task documentation in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to factual information in familiar workplace documents
- Numeracy skills to take accurate measurements, calculate area, estimate materials and interpret technical information on design documentation.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM3007 Prepare and apply decorative surfaces for furniture.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFFM3028 Prepare and apply decorative surfaces for furnishing products

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- prepare and apply the following decorative surfaces to workplace standards:
  - 2 veneer layups
  - 1 inlay.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
  - work health and safety
  - quality assurance
  - reporting of machinery faults and material defects
- types of surfaces and materials used in decorative surface application:
  - adhesives, cleaning materials and solvents
  - laminates
  - manufactured board and other suitable substrate material
  - textiles
  - sheet metal
  - timber
  - timber strips
- features of veneer:
  - different cuts – quarter, crown, rotary, peeled
  - different figures found in veneer
  - veneer matching patterns
- how to:
  - interpret furniture design documentation
  - prepare drawings and set-outs
- tools and machinery commonly used to apply decorative surfaces to furnishing products

- personal protective equipment (PPE) required while applying decorative surfaces to furnishing products.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design documentation
  - tools, equipment and machinery required for performance evidence
  - PPE
  - furnishing items requiring application of decorative surfaces
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFM3029 Select timbers for furniture production

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to determine timber requirements and evaluate the suitability of different timbers against those requirements.

Workers with this competency select timbers to meet specified client or production requirements. They use discretion, judgement and specialised knowledge of timbers.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Cabinetry and furniture

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Determine timber requirements	1.1 Identify aesthetic and practical requirements for timbers from workplace information 1.2 Develop selection criteria to guide timber evaluation based on task requirements
2 Evaluate timbers against requirements	2.1 Select potential timbers for consideration based on task requirements and production limitations 2.2 Assess the properties of selected timbers against selection criteria 2.3 Identify and consider the need for compatibility with other materials 2.4 Consider moisture content of timber being used to ensure compliance with production requirements 2.5 Develop and document recommendations for timber to be used based on evaluation and in accordance with workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret unfamiliar technical information about timbers
- Writing skills to communicate reasons for timber recommendations.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM3008 Select timbers for furniture production.

## Links

Companion Volume implementation guides are found in VETNet – -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFM3029 Select timbers for furniture production

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- evaluate and select timbers to meet 3 different design or production briefs.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- native and non-native hardwoods and softwoods commonly used for furnishing production, including their:
  - density and hardness
  - elasticity
  - strength
  - brittleness
  - main uses and production limitations
- timber characteristics, including:
  - cupping, bowing, springing and twisting
  - basic chemical composition
  - compatibility with other materials
- impact on timber of climate and workshop conditions
- how to maintain performance and visual quality
- wood pests and protection
- how to identify natural and seasoning faults
- seasoning methods
- how timber is graded
- measuring moisture content in timber
- sawn timber and types of defects
- solid timber conversion techniques
- emerging wood technologies, including heat treatments and wood preservatives
- personal protective equipment (PPE) required.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design or production briefs
  - specialised information about different types of timbers
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFM3030 Produce manual and computer-aided production drawings

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to make manual and computer-aided drawings to support manufacture and assembly in cabinet and furniture making, wood machining and other industries. Workers with this competency use discretion, judgement and problem solving to apply their knowledge of manufacture and assembly to the drawing process.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Cabinetry and furniture

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify drawing task requirements	1.1 Identify function and characteristics of object to be drawn 1.2 Identify purpose of drawings in production process
2. Establish drawing criteria and limitations	2.1 Establish dimensions, tolerance, angles, shapes, finished sizes and other specifications to be recorded in drawings 2.2 Identify appropriate drawing types, views and scales to meet task requirements 2.3 Select appropriate drawing conventions and symbols to meet task requirements 2.4 Select appropriate medium for drawings

<b>Elements</b>	<b>Performance Criteria</b>
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
3. Draft initial drawing	<p>3.1 Include spatial information in drawings, including angles, shapes and dimensions</p> <p>3.2 Include non-spatial information in drawings, including production notes and list of materials required for production</p> <p>3.3 Note drawing conventions and specifications on documentation</p>
4. Complete drawing	<p>4.1 Check angles, shapes and dimensions and other spatial and non-spatial information against specifications and sample, and correct errors</p> <p>4.2 Check drawing for compliance with workplace documentation requirements</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret production documentation
- Writing skills to add production notes and other information to drawings
- Numeracy skills to calculate lengths, areas, volumes and angles, to make calculations related to scale, and to work with geometric concepts.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM3009 Produce manual and computer-aided production drawings.

## Links

Companion Volume implementation guides are found in VETNet – <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFM3030 Produce manual and computer-aided production drawings

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- prepare production drawings of 3 furniture or furnishings products or components, collectively including:
  - both manual and computer-aided methods
  - orthographic projection
  - section view.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- orthographic views
- section views
- isometric projection
- 2-D and 3-D shapes
- drawing conventions according to Australian Standard AS1100
  - centre lines
  - visible lines
  - hidden lines
  - dimension lines
  - hatching
  - breaks
  - end sections
  - symbols for indicating construction materials
  - title block
- appropriate drawing scales for different purposes
- the use of drawings in cutting lists
- how CAD is used by industry, including the links between CAD and CNC production machinery
- CAD software and file types commonly used in furniture and furnishings industry

- CAD drawing and editing commands
- creating and using layers in CAD
- CAD file management.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - production documentation on which to base drawings
  - computer and CAD software
  - hand drawing tools and materials required for performance evidence.

## Links

Companion Volume implementation guides are found in VETNet – -

# MSFFM3031 Prepare cutting lists from design and production documentation

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to interpret various types of design and production documentation to prepare cutting lists and other information for subsequent processing operations in industries such as cabinet and furniture making and wood machining. Workers with this competency follow established procedures using discretion, judgement and problem solving.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Cabinetry and furniture

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Interpret design and production documentation	1.1 Identify documentation required for preparation of cutting list 1.2 Identify components to be produced and their processing requirements from documentation 1.3 Establish quantity, size and shape of components from documentation
2 Prepare cutting lists	2.1 Format cutting list and processing information in accordance with workplace procedures 2.2 Clearly identify and describe all required components using established workplace terminology 2.3 Accurately document component sizes and tolerances in accordance with workplace procedures

	<p>2.4 Take account of required quality standards and waste minimisation in preparation of cutting list</p> <p>2.5 Document subsequent processing requirements and their dimensional allowances</p>
--	---

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and diverse types of design and production documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to interpret numerical information in design and production documentation, to calculate area and to estimate material usage.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM3010 Prepare cutting list from plans and job specifications.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFFM3031 Prepare cutting lists from design and production documentation

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- interpret design and production documentation to prepare cutting lists for at least 4 different production tasks, collectively using 3 different types of material, with each task to involve at least 10 different components.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for the presentation of cutting list information
- purpose and characteristics of different types of design and production documentation and how to interpret the information they contain
- characteristics of production equipment, materials and tooling commonly used and their impact on development of cutting lists
- pattern techniques for optimising use of materials.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design and production documentation
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFM3032 Set up, operate and maintain sawing machines

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to safely and efficiently set up, operate and maintain sawing machines using their full technical potential and capacities to complete tasks such as cutting freehand curves and simple and compound angles and undertaking deep, freehand and off-fence ripping. Workers with this competency follow established procedures in timber technology industries using discretion, judgement and problem solving to identify and troubleshoot product and machinery issues.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Wood machining

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for task	1.1 Determine task requirements and cutting specifications from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Select material for machining and check it meets task quality requirements 1.4 Check that cutting tools, jigs and other required tools and equipment are available, safe and functional 1.5 Identify procedures for waste minimisation and energy efficiency while completing task

2 Set up machines	<p>2.1 Check that emergency stops, gauges, guards, controls and safety equipment are functional prior to machine start-up</p> <p>2.2 Complete saw settings and adjust to meet task requirements in compliance with manufacturer instructions</p> <p>2.3 Complete trial runs to check that saw is fully functional and that finished work meets task accuracy and quality requirements</p> <p>2.4 Identify and make necessary adjustments to saw settings to meet task quality and efficiency requirements</p>
3 Operate machines	<p>3.1 Follow saw start-up procedures in accordance with manufacturer instructions</p> <p>3.2 Position material to be sawn in accordance with manufacturer instructions, tooling requirements, and safe handling and workplace procedures</p> <p>3.3 Operate saw in accordance with its designed capacity and purpose, and to manufacturer recommendations</p> <p>3.4 Monitor saw operation to ensure product quality and output</p> <p>3.5 Check waste quantities and make adjustments to minimise waste</p> <p>3.6 Identify items that do not meet quality requirements and recycle or discard in accordance with workplace procedures</p> <p>3.7 Recognise problems with product or saw operation and resolve or report to appropriate persons in accordance with workplace procedures</p>
4 Finalise task	<p>4.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>4.2 Clean machinery, complete routine maintenance and leave in safe mode in accordance with workplace procedures</p> <p>4.3 Identify, tag and report faulty equipment in accordance with workplace procedures</p> <p>4.4 Complete task documentation in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation involving drawings and product specifications
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate lengths, degrees and areas and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM3012 Set up, operate and maintain sawing machines.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFFM3032 Set up, operate and maintain sawing machines

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- set up and operate at least 4 of the following types of saw to complete tasks in accordance with workplace procedures and specifications:
  - cross-cut saws
  - circular rip saws
  - sliding table panel saws and scroll-band saws
  - numerically controlled (NC) beam saws
  - wall saws
  - band re-saws and straight line edgers
- complete operator maintenance on each of the 4 machines at least once, including:
  - checking that guards, safety switches, and machine jigs and attachments are functioning correctly
  - servicing machine lubrication points
  - identifying tooling needing sharpening and repair
  - checking that drive belts are undamaged and correctly tensioned
  - cleaning machine at the end of a production run
  - checking that electrical systems are functioning, and identifying issues for referral to qualified electrician
  - completing maintenance documentation
- meet workplace standards for efficiency, including:
  - identifying and resolving routine problems
  - working with others, recognising dependencies and using cooperative approaches to optimise workflow and productivity.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
  - work health and safety

- quality assurance and tolerance levels
- reporting of machinery faults and material defects
- risk control measures, including personal protective equipment (PPE), for the following hazards
  - cutting and crushing hazard
  - objects and particles thrown by machine
  - noise
  - airborne contaminants
  - slips, trips and falls
  - manual handling injuries
- functions of different types of sawing machines, including at least 4 of the following:
  - cross-cut saws
  - circular rip saws
  - sliding table panel saws and scroll-band saws
  - numerically controlled (NC) beam saws
  - wall saws
  - band re-saws and straight line edgers
- sawing processes and techniques including those for cutting simple and compound angles and freehand curves and undertaking deep, freehand and off-fence ripping
- characteristics and response to the machine sawing process of materials commonly used, including at least 4 of the following:
  - solid timber
  - manufactured board
  - laminates
  - plastics
  - acrylics
  - synthetic solids
- function of other tools and materials typically used in the sawing process
  - machine-specific tools
  - jigs and fixtures
  - machine consumables
  - oils and lubricants and trial materials.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work documentation
  - unprocessed materials for sawing

- sawing machines (4 different types) and other tools and equipment required for performance evidence
- PPE
- workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFM3033 Set up, operate and maintain drilling machines

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to set up, operate and maintain drilling machines (including multi boring machines) using their full technical potential and capacities. It includes fitting cutters, selecting appropriate drilling pattern and drilling holes both vertically and horizontally.

Workers with this competency follow established procedures in timber technology industries using discretion, judgement and problem solving to identify and troubleshoot product and machine issues.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Wood machining

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for task	1.1 Determine task requirements and drilling specifications from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Select material for machining and check it meets task quality requirements 1.4 Check that cutting tools, jigs and other required tools and equipment are available, safe and functional 1.5 Identify procedures for waste minimisation and energy

	efficiency while completing task
2 Set up machines	<p>2.1 Check that emergency stops, gauges, guards, controls and safety equipment are functional prior to machine start-up</p> <p>2.2 Complete drill settings and adjust to meet task requirements in compliance with manufacturer instructions</p> <p>2.3 Complete trial runs to check that drill is fully functional and that finished work meets task accuracy and quality requirements</p> <p>2.4 Make adjustments to drill settings to meet task quality and efficiency requirements</p>
3 Operate machines	<p>3.1 Follow drill start-up procedures in accordance with manufacturer instructions</p> <p>3.2 Position material to be drilled in accordance with manufacturer instructions, tooling requirements, and safe handling and workplace procedures</p> <p>3.3 Operate drill in accordance with its designed capacity and purpose, and to manufacturer recommendations</p> <p>3.4 Monitor drill operation to ensure product quality and output</p> <p>3.5 Check waste quantities and make adjustments to minimise waste</p> <p>3.6 Identify items that do not meet quality requirements and recycle or discard in accordance with workplace procedures</p> <p>3.7 Recognise problems with product or drill operation and resolve or report to appropriate persons in accordance with workplace procedures</p>
4 Finalise task	<p>4.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>4.2 Clean machinery, complete routine maintenance and leave in safe mode in accordance with workplace procedures</p> <p>4.3 Identify, tag and report faulty equipment in accordance with workplace procedures</p> <p>4.4 Complete task documentation in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures, work documentation including drawings, and product specifications
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate lengths, degrees and areas and estimate material requirements

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM3013 Set up, operate and maintain drilling machines.

# Assessment Requirements for MSFFM3033 Set up, operate and maintain drilling machines

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- set up and operate at least 2 of the following types of drilling machines to complete task requirements in accordance with workplace procedures
  - single-head multi-spindle machine
  - single-spindle vertical and horizontal machine
  - multi-head multi-spindle machine
- complete operator maintenance on each of the 2 machines at least once, including:
  - checking that guards, safety switches, and machine jigs and attachments are functioning correctly
  - servicing machine lubrication points
  - identifying tooling needing sharpening and repair
  - checking that drive belts are undamaged and correctly tensioned
  - cleaning machine at the end of a production run
  - checking that electrical systems are functioning correctly, and identifying issues for referral to qualified electrician
  - completing maintenance documentation.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
  - work health and safety
  - quality assurance and tolerance levels
  - reporting of machinery faults and material defects
- functions and characteristics of types of drilling machine:
  - single-head multi-spindle machines
  - single-spindle vertical and horizontal machines

- multi-head multi-spindle machines
- drilling processes and techniques
- characteristics and response to the drilling process of materials commonly used:
  - solid timber
  - manufactured board
  - metal
  - glass
- the function of other tools and materials typically used in the drilling process:
  - machine-specific tools
  - jigs and fixtures
  - machine consumables
  - oils and lubricants and trial materials
- personal protective equipment (PPE) required when operating drilling machines.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work documentation
  - unprocessed materials for drilling
  - drilling machines (2 different types) **required for performance evidence**
  - PPE
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFM3034 Set up, operate and maintain joining machines

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to safely and efficiently set up, operate and maintain joining machines using their full technical potential and capacities to complete varied joints such as angle, compound angle, mortise and tenon and scribed

Workers with this competency follow established procedures in timber technology industries, using discretion, judgment and problem solving to identify and troubleshoot product and machine issues.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Wood machining

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for task	1.1 Determine task requirements and joining specifications from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Select material for machining and check it meets task quality requirements 1.4 Check that cutting tools, jigs and other required tools and equipment are available, safe and functional 1.5 Identify procedures for waste minimisation and energy efficiency while completing task

2 Set up machines	<p>2.1 Check that emergency stops, gauges, guards, controls and safety equipment are functional prior to machine start-up</p> <p>2.2 Complete machine settings and adjust to meet task requirements in compliance with manufacturer instructions</p> <p>2.3 Complete trial runs to check that machine is fully functional and that finished work meets task accuracy and quality requirements</p> <p>2.4 Identify and make necessary adjustments to machine settings to meet task quality and efficiency requirements</p>
3 Operate machines	<p>3.1 Follow machine start-up procedures in accordance with manufacturer instructions</p> <p>3.2 Position material to be joined in accordance with manufacturer instructions, tooling requirements, and safe handling and workplace procedures</p> <p>3.3 Operate machine in accordance with its designed capacity and purpose, and to manufacturer recommendations</p> <p>3.4 Monitor machine operation to ensure product quality and output</p> <p>3.5 Check waste quantities and make adjustments to minimise it</p> <p>3.6 Identify items that do not meet quality requirements and recycle or discard in accordance with workplace procedures</p> <p>3.7 Recognise problems with product or machine operation and resolve or report to appropriate persons in accordance with workplace procedures</p>
4 Finalise task	<p>4.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>4.2 Clean machinery, complete routine maintenance and leave in safe mode in accordance with workplace procedures</p> <p>4.3 Identify, tag and report faulty equipment in accordance with workplace procedures</p> <p>4.4 Complete task documentation in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures, work documentation including drawings, and product specifications
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate lengths, degrees and areas and estimate material requirements

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM3014 Set up, operate and maintain joining machines.

# Assessment Requirements for MSFFM3034 Set up, operate and maintain joining machines

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- set up and operate two of the following machines and use with at least 2 different types of material in accordance with workplace procedures
  - mortice machine
  - tenon machine
  - dovetail machine
- complete operator maintenance on each of the 2 machines at least once, including:
  - checking that guards, safety switches, and machine jigs and attachments are functioning correctly
  - servicing machine lubrication points
  - identifying tooling needing sharpening and repair
  - checking that drive belts are undamaged and correctly tensioned
  - cleaning machine at the end of a production run
  - checking that electrical systems are functioning, and identifying issues for referral to qualified electrician
  - completing maintenance documentation.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
  - work health and safety
  - quality assurance and tolerance levels
  - reporting of machinery faults and material defects
- risk control measures, including personal protective equipment (PPE), for the following hazards
  - cutting and crushing hazard

- objects and particles thrown by machine
- noise
- airborne contaminants
- slips, trips and falls
- manual handling injuries
- joining processes and techniques
- characteristics and response to the joining process of these materials:
  - solid timber
  - manufactured board
- the function of other tools and materials typically used in the joining process:
  - machine-specific tools
  - jigs and fixtures
  - machine consumables
  - oils and lubricants and trial materials.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work documentation
  - joining machines (2 different types) required for performance evidence
  - PPE
  - unprocessed materials for joining
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFM3035 Set up, operate and maintain planing and finishing machines

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to safely and efficiently set up, operate and maintain planing and finishing machines using their full potential and capacities to complete tasks such as sanding faces, edges, end grain and straight, concave or convex surfaces.

Workers with this competency follow established procedures in timber technology industries, using discretion, judgment and problem solving to identify and troubleshoot routine product and machine issues.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Wood machining

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for task	1.1 Determine task requirements and planning and finishing specifications from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Select material for machining and check it meets task quality requirements 1.4 Check that jigs and other required tools and equipment are available, safe and functional 1.5 Identify procedures for waste minimisation and energy

	efficiency while completing task
2 Set up machines	<p>2.1 Check that emergency stops, gauges, guards, controls and safety equipment are functional prior to machine start-up</p> <p>2.2 Complete machine settings and adjust to meet task requirements in compliance with manufacturer instructions</p> <p>2.3 Complete trial runs to check that machine is fully functional and that finished work meets task accuracy and quality requirements</p> <p>2.4 Identify and make necessary adjustments to machine settings to meet task quality and efficiency requirements</p>
3 Operate machines	<p>3.1 Follow machine start-up procedures in accordance with manufacturer instructions</p> <p>3.2 Position material to be planed and finished in accordance with manufacturer instructions, tooling requirements, and safe handling and workplace procedures</p> <p>3.3 Operate machine in accordance with its designed capacity and purpose, and to manufacturer recommendations</p> <p>3.4 Monitor machine operation to ensure product quality and output</p> <p>3.5 Check waste quantities and make adjustments to minimise waste</p> <p>3.6 Identify items that do not meet quality requirements and recycle or discard in accordance with workplace procedures</p> <p>3.7 Recognise problems with product or machine operation and resolve or report to appropriate persons in accordance with workplace procedures</p>
4 Finalise task	<p>4.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>4.2 Clean machinery, complete routine maintenance and leave in safe mode in accordance with workplace procedures</p> <p>4.3 Identify, tag and report faulty equipment in accordance with workplace procedures</p> <p>4.4 Complete task documentation in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures, work documentation involving drawings and product specifications
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate lengths, degrees and areas and estimate material requirements

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM3015 Set up, operate and maintain planning and finishing machines.

# Assessment Requirements for MSFFM3035 Set up, operate and maintain planing and finishing machines

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- set up and operate each of the following types of planing and finishing machines to meet task requirements and in accordance with workplace procedures:
  - surface planer
  - a panel planer
  - a wide belt sander
- complete operator maintenance on at least 2 machines at least once, to include:
  - checking that guards, safety switches, and machine jigs and attachments are functioning correctly
  - servicing machine lubrication points
  - identifying tooling needing sharpening and repair
  - checking that drive belts are undamaged and correctly tensioned
  - cleaning machine at the end of a production run
  - checking that electrical systems are functioning, and identifying issues for referral to qualified electrician
  - completing maintenance documentation.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
  - work health and safety
  - quality assurance and tolerance levels
  - reporting of machinery faults and material defects
- risk control measures, including personal protective equipment (PPE), for the following hazards
  - cutting and crushing hazard

- objects and particles thrown by machine
- noise
- airborne contaminants
- slips, trips and falls
- manual handling injuries
- planing and finishing processes and techniques
- characteristics and response to the planing process of these materials:
  - solid timber
  - manufactured board
- the function of other tools and materials typically used in the planing and finishing process:
  - machine-specific tools
  - jigs and fixtures
  - machine consumables
  - oils and lubricants and trial materials.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work documentation
  - planing and finishing machines – surface planer, panel planer, wide belt sander – required for performance evidence
  - PPE
  - unprocessed materials for planing and finishing
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFM3036 Set up, operate and maintain multi-head planing and moulding machines

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to safely and efficiently set up, operate and maintain through- and push-feed multi-head planing and moulding machines using their full potential and capacities to machine solid timber and manufactured board and complete tasks such as square dressing timber and producing detailed mouldings.

Workers with this competency follow established procedures in timber technology industries using discretion, judgement and problem solving to identify and troubleshoot product and machine issues.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Wood machining

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements and planning and moulding specifications from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Select material for machining and check it meets task quality requirements 1.4 Check that cutting tools, jigs and other required tools and equipment

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>are available, safe and functional</p> <p>1.5 Identify procedures for waste minimisation and energy efficiency while completing task</p>
2. Set up machines	<p>2.1 Check that emergency stops, gauges, guards, controls and safety equipment are functional prior to machine start-up</p> <p>2.2 Complete machine settings and adjust to meet task requirements in compliance with manufacturer instructions</p> <p>2.3 Complete trial runs to check that machine is fully functional and that finished work meets task accuracy and quality requirements</p> <p>2.4 Identify and make necessary adjustments to machine settings to meet task quality and efficiency requirements</p>
3. Operate machines	<p>3.1 Follow machine start-up procedures in accordance with manufacturer instructions</p> <p>3.2 Position material to be machined in accordance with manufacturer instructions, tooling requirements, and safe handling and workplace procedures</p> <p>3.3 Operate machine in accordance with its designed capacity and purpose, and to manufacturer recommendations</p> <p>3.4 Monitor machine operation to ensure product quality and output</p> <p>3.5 Identify items that do not meet quality requirements and recycle or discard in accordance with workplace procedures</p> <p>3.6 Recognise problems with product or machine operation and resolve or report to appropriate persons in accordance with workplace procedures</p>
4. Finalise task	<p>4.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>4.2 Clean machinery, complete routine maintenance and leave in safe mode in accordance with workplace procedures</p> <p>4.3 Identify, tag and report faulty equipment in accordance with workplace procedures</p> <p>4.4 Complete task documentation in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures, work documentation involving drawings and product specifications
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate lengths, degrees and areas and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM3016 Set up, operate and maintain multi-head planing and moulding machines.

# Assessment Requirements for MSFFM3036 Set up, operate and maintain multi-head planing and moulding machines

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- set up and operate a multi-headed planing and moulding machine to meet task requirements in accordance with workplace procedures to complete the following:
  - square dress timber
  - produce at least 3 detailed mouldings profiled on at least one edge and one face to meet Australian Standards criteria
- complete operator maintenance on a machine at least once, to include:
  - checking and confirming correct functioning of:
    - guards
    - safety switches
    - machine jigs and attachments
  - servicing of machine lubrication points
  - identifying tooling needing sharpening and repair, including changing and maintaining straight and profile knives
  - checking that drive belts are undamaged and correctly tensioned
  - cleaning of machine at the end of a production run
  - checking correct electrical function and identifying issues for referral to qualified electrician
  - completing maintenance documentation.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
  - work health and safety
  - quality assurance and tolerance levels
  - reporting of machinery faults and material defects

- functions and characteristics of planing and moulding machines
- planing and moulding processes and techniques
- risk control measures, including personal protective equipment (PPE), for the following hazards
  - cutting and crushing hazard
  - objects and particles thrown by machine
  - noise
  - airborne contaminants
  - slips, trips and falls
  - manual handling injuries
- the function of tools and materials typically used in the planing and moulding process:
  - machine-specific tools
  - tension wrenches
  - screwdrivers
  - hammers and spanners
  - planing and moulding machine consumables
  - oils and lubricants and trial materials.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work documentation
  - multi-head planing and moulding machines required for performance evidence
  - PPE
  - unprocessed materials for planing and moulding
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to safely and efficiently set up, operate and maintain routing and shaping machines using their full potential and capacities to complete tasks such as moulding, grooving, shaping and rebating materials. Workers with this competency follow established procedures in wood technology industries, using discretion, judgement and problem solving to identify and troubleshoot product and machine issues.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Wood machining

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for task	1.1 Determine task requirements and routing and shaping specifications from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Select material for machining and check it meets task quality requirements 1.4 Check that cutting tools, jigs and other required tools and equipment are available, safe and functional 1.5 Identify procedures for waste minimisation and energy efficiency while completing task

2 Set up machines	<p>2.1 Check that emergency stops, gauges, guards, controls and safety equipment are functional prior to machine start-up</p> <p>2.2 Complete machine settings and adjust to meet task requirements in compliance with manufacturer instructions</p> <p>2.3 Complete trial runs to check that machine is fully functional and that finished work meets task accuracy and quality requirements</p> <p>2.4 Identify and make necessary adjustments to machine settings to meet task quality and efficiency requirements</p>
3 Operate machines	<p>3.1 Follow machine start-up procedures in accordance with manufacturer instructions</p> <p>3.2 Position material to be machined in accordance with manufacturer instructions, tooling requirements, and safe handling and workplace procedures</p> <p>3.3 Operate machine in accordance with its designed capacity and purpose, and to manufacturer recommendations</p> <p>3.4 Monitor machine operation to ensure product quality and output</p> <p>3.5 Identify items that do not meet quality requirements and recycle or discard in accordance with workplace procedures</p> <p>3.6 Recognise problems with product or machine operation and resolve or report to appropriate persons in accordance with workplace procedures</p>
4 Finalise task	<p>4.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>4.2 Clean machinery, complete routine maintenance and leave in safe mode in accordance with workplace procedures</p> <p>4.3 Identify, tag and report faulty equipment in accordance with workplace procedures</p> <p>4.4 Complete task documentation in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures, work documentation involving drawings and product specifications
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate lengths, degrees and areas and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM3017 Set up, operate and maintain routing and shaping machines.

## Links

Companion Volume implementation guides are found in VETNet --  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFM3037 Set up, operate and maintain routing and shaping machines

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- set up and operate a spindle moulding machine and an overhead or inverted pin routing machine to complete task requirements in accordance with workplace procedures
- complete operator maintenance on each of the 2 machines at least once, to include:
  - checking that guards, safety switches, and machine jigs and attachments are functioning correctly
  - servicing machine lubrication points
  - identifying tooling needing sharpening and repair
  - checking that drive belts are undamaged and correctly tensioned
  - cleaning machine at the end of a production run
  - checking that electrical systems are functioning, and identifying issues for referral to qualified electrician
  - completing maintenance documentation.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
  - work health and safety
  - quality assurance and tolerance levels
  - reporting of machinery faults and material defects
- function and characteristics of routing and shaping machines:
  - spindle moulding machine
  - overhead or inverted pin routing machine
- routing and shaping processes and techniques
- characteristics and response to routing and shaping of materials commonly used:
  - solid timber

- manufactured board
- plastics
- laminates
- risk control measures, including personal protective equipment (PPE), for the following hazards
  - cutting and crushing hazard
  - objects and particles thrown by machine
  - noise
  - airborne contaminants
  - slips, trips and falls
  - manual handling injuries
- function of tools and materials typically used in the routing and shaping process:
  - machine-specific tools
  - jigs and fixtures
  - machine consumables
  - oils and lubricants and trial materials.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work documentation
  - routing and shaping machines required for performance evidence
  - PPE
  - unprocessed materials for routing and shaping
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFM3038 Set up, operate and maintain automated edge banding machines

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to set up, operate and maintain edge banding machines which use automated processes to apply and process an edge trim to solid timber or manufactured board.

Workers with this competency follow established procedures in timber technology industries, using discretion, judgement and problem solving to identify and resolve routine product and machine issues.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Wood machining

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements and edging specifications from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Select material for machining and check it meets task quality requirements 1.4 Check that cutting tools and other required tools and equipment are available, safe and functional

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.5 Identify procedures for waste minimisation and energy efficiency while completing task
2. Set up machines	2.1 Check that emergency stops, gauges, guards, controls and safety equipment are functional prior to machine start-up 2.2 Complete machine settings and adjust to meet task requirements in compliance with manufacturer instructions 2.3 Complete trial runs to check that machine is fully functional and that finished work meets task accuracy and quality requirements 2.4 Identify and make necessary adjustments to machine settings to meet task quality and efficiency requirements
3. Operate machines	3.1 Follow machine start-up procedures in accordance with manufacturer instructions 3.2 Position material to be machined in accordance with manufacturer instructions, tooling requirements, and safe handling and workplace procedures 3.3 Operate machine in accordance with its designed capacity and purpose, and to manufacturer recommendations 3.4 Monitor machine operation to ensure product quality and output 3.5 Check waste quantities and make adjustments to minimise waste 3.6 Identify items that do not meet quality requirements and recycle or discard in accordance with workplace procedures 3.7 Recognise problems with product or machine operation and resolve or report to appropriate persons in accordance with workplace procedures
4. Finalise task	4.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 4.2 Clean machinery, complete routine maintenance and leave in safe mode in accordance with workplace procedures 4.3 Identify, tag and report faulty equipment in accordance with workplace procedures 4.4 Complete task documentation in accordance with workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures, work documentation involving drawings and product specifications
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM3019 Set up, operate and maintain automated edge banding machines.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFFM3038 Set up, operate and maintain automated edge banding machines

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- set up and operate an automated (not fully automatic) edging machine to apply at least 3 different edge treatment materials
- complete operator maintenance at least once, including:
  - checking that guards, safety switches, and machine jigs and attachments are functioning correctly
  - servicing machine lubrication points
  - identifying tooling needing sharpening and repair
  - checking that drive belts are undamaged and correctly tensioned
  - cleaning machine at the end of a production run
  - checking that electrical systems are functioning, and identifying issues for referral to qualified electrician
  - completing maintenance documentation.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
  - work health and safety
  - quality assurance and tolerance levels
  - reporting of machinery faults and material defects
- functions and characteristics of edge banding machines:
  - pre-milling technology
  - standard automated edgers (not fully automatic)
  - soft forming machines
- risk control measures, including personal protective equipment (PPE), for the following hazards

- cutting and crushing hazard
- objects and particles thrown by machine
- noise
- airborne contaminants
- slips, trips and falls
- manual handling injuries
- characteristics of timber and board products and adhesives commonly used with edge banding machines, and of these edging products:
  - solid timber
  - laminates
  - plastics
  - non-ferrous materials and foils.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work documentation
  - automated edge banding machines required for performance evidence
  - PPE
  - unprocessed materials for edge banding
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet – -

## MSFFM3039 Fabricate synthetic solid surface products

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to fabricate products containing synthetic solid surfaces such as acrylic or polyester. Products may include benchtops, edges, sinks, bowls and waterproof wall treatments. Workers with this competency follow established procedures in industries such as cabinet making and kitchen and bathroom installation using discretion, judgement and some problem solving.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Cabinetry and furniture

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements from design and other work documentation 1.2 Plan fabrication sequence and identify procedures for checking quality at each stage 1.3 Identify and follow work health and safety procedures 1.4 Select suitable work area for the task 1.5 Complete preparatory drawings and set-outs in accordance with job specifications 1.6 Develop cutting list for components in accordance with job

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	specifications 1.7 Select tools and equipment and check that they are safe and functional 1.8 Check that materials meet task quality requirements
2 Complete fabrication	2.1 Set out and prepare materials and mark components in accordance with work instructions 2.2 Use tools, equipment and machinery safely and in accordance with manufacturer specifications 2.3 Check product quality against specifications at each stage of fabrication 2.4 Confirm against set-outs for accuracy tolerances, fit and distortion 2.5 Fit components, accessories and decorative components in accordance with task specifications 2.6 Prepare product for final finish by removing bruises, scratches, dents and marks
3 Finalise operation	3.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 3.2 Clean machinery, complete routine maintenance and leave in safe mode in accordance with workplace procedures 3.3 Identify, tag and report faulty equipment in accordance with workplace procedures 3.4 Complete job documentation in accordance with workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills measure and calculate area, estimate materials and interpret technical information on design documentation.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## **Unit Mapping Information**

Release 1. Supersedes and is equivalent to MSFFM3020 Fabricate synthetic solid surface products.

# Assessment Requirements for MSFFM3039 Fabricate synthetic solid surface products

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- fabricate at least 3 synthetic solid surface products, including at least 1 full benchtop.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
  - work health and safety
  - quality assurance
  - reporting of machinery faults and material defects
- how to:
  - interpret furniture design documentation
  - prepare drawings and set-outs for synthetic solid surface products
- types and characteristics of synthetic solid surface materials
- tools and machinery commonly used in the fabrication of solid surface products
- personal protective equipment (PPE) required for fabrication of solid surface products.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design documentation
  - unprocessed materials for fabrication
  - tools, equipment and machinery required for performance evidence
  - PPE

- workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFM3040 Produce and maintain cutting tools

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to produce and maintain cutting tools used in woodworking machinery.

Workers with this competency follow established procedures in industries such as wood machining and cabinet making, using some discretion, judgment and problem solving to keep cutting tools safe and efficient.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Cabinetry and furniture

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine cutting tool requirements from task documentation and inspection of machine 1.2 Identify and follow work health and safety procedures 1.3 Assess whether cutting tool is suitable for machining 1.4 Check that machines, grinding tools and accessories are safe and functional
2. Set up machines	2.1 Complete machine settings and adjust to meet task requirements and in compliance with manufacturer instructions

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	2.2 Confirm that grinding is achieving required quality in cutting tool 2.3 Identify and make necessary adjustments to machine settings
3. Operate machines	3.1 Follow machine start-up procedure in accordance with manufacturer instructions 3.2 Machine tooling in accordance with manufacturer instructions and safe handling and workplace procedures 3.3 Operate machine in accordance with its designed capacity and purpose, and to manufacturer recommendations 3.4 Monitor machine operation to ensure quality of output 3.5 Recognise problems and resolve or report to appropriate persons in accordance with workplace procedures
4. Finalise task	4.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 4.2 Clean machinery, complete routine lubrication and adjustments and leave in a safe mode in accordance with workplace procedures 4.3 Identify, tag and report faulty equipment in accordance with workplace procedures 4.4 Complete job documentation in accordance with workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to take accurate measurements and estimate materials requirements

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM3023 Produce and maintain cutting tools.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFFM3040 Produce and maintain cutting tools

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- produce a set of 2 matching profile cutters
- maintain a router cutter and solid profile cutter head.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- type and characteristics of cutting tools:
  - profile knives
  - router cutters
  - straight knives
  - profile cutter heads
- types and characteristics of grinding machines
- cutter development geometry and principles
- characteristics of cutter steels
- grinding practices and techniques
- personal protective equipment (PPE) required for producing and maintaining cutting tools
- type and characteristics of grinding adhesives and processes
- workplace procedures for:
  - acceptable tolerance levels
  - work health and safety
  - reporting machinery faults and material defects.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - raw materials or cutting tools in woodworking machines required for performance evidence
  - grinding machine
  - PPE
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet – -

# MSFFM3041 Determine and document requirements for cabinetry installation

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to conduct onsite assessment of spatial and other requirements for the installation of fitted cabinetry. This includes assessment of overall site, walls, floors, appliances, services and other structural components in addition to taking detailed and precise measurements. Cabinetry may be custom-made or mass manufactured.

Cabinet installers with this competency follow procedures, using discretion, judgement and problem solving to identify and resolve potential installation issues. Installers may or may not be involved in the actual construction of cabinetry.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking kitchen and bathroom work. Access to construction sites requires certification of general induction training specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007).

## Competency Field

Cabinetry and furniture

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess overall installation site	1.1 Review project brief and design documentation and identify site aspects to be assessed 1.2 Arrange site access with client in accordance with workplace procedures 1.3 Identify and follow site work health and safety procedures when making onsite inspections 1.4 Determine access requirements for materials and equipment based

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	on site features 1.5 Identify and review other work being undertaken at site for impact on installation work
2. Assess site construction features for impact on cabinetry installation	2.1 Examine wall and floor construction and features and determine implications for cabinet installation 2.2 Identify and inspect other structural features and determine implications for cabinet installation
3. Assess appliances and services for impact on cabinetry installation	3.1 Review appliance installation requirements from manuals or physical inspection and determine impact on cabinet installation 3.2 Identify compliance issues and their impact on design and layout and determine appropriate action
4 Obtain measurements	4.1 Select measuring devices and processes suited to situation 4.2 Take, reconfirm and record accurate measurements of all required site aspects 4.3 Select and use appropriate calculations to obtain required cabinetry dimensions and other relevant information 4.4 Follow workplace requirements for quality assurance requirements and allowable tolerances
5. Document installation requirements	5.1 Review findings from assessments and determine individual and interrelated implications for cabinetry construction and installation 5.2 Prepare site plan that shows all features and measurements that will affect cabinetry manufacture or installation using established drawing protocols 5.3 Prepare supporting documentation that details other required information to support manufacture and installation process

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret unfamiliar design documentation
- Writing skills to communicate information in familiar workplace documents

- Oral communication skills to liaise with clients and work colleagues on familiar operational matters
- Numeracy skills to measure and calculate area, mass, perimeter, volume, scales and ratios.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Redesigned unit – merges, supersedes and is not equivalent to MSFKB3002 Determine requirements for installation of cabinets, MSFFM3011 Measure and draw site layout for manufactured furniture products and MSFKB3003 Check and measure fit of cabinets.

## Links

Companion Volume implementation guides are found in VETNet – -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFM3041 Determine and document requirements for cabinetry installation

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- conduct 2 site assessments and identify issues impacting installation arising from:
  - overall site condition and access
  - structure
  - appliances
  - services
- for each of the above 2 site assessments, produce accurate documentation that includes:
  - scaled plan and elevation identifying:
    - all site dimensions
    - placement and dimensions of all features impacting manufacture and installation
  - supporting site information to inform manufacture and installation
- recognise and respond to 2 different challenges posed by site conditions:
  - 1 structural
  - 1 appliance or services related.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace and site procedures for:
  - work health and safety
  - quality assurance
  - tolerance levels
- for fitted cabinetry projects:
  - planning processes
  - roles of different trades and when different trade skills are required
  - typical communication channels and protocols for those involved
  - processes and technologies used for the construction of fitted cabinetry
  - characteristics and features of cabinetry products and components

- National Construction Code requirements for installation of fitted cabinetry
- statutory local and state or territory planning regulations affecting cabinetry installations
- basic building and architectural terminology
- structural and non-structural components of buildings and their different construction methods that can affect cabinet installation, and how to adapt installation to address common issues with:
  - floors
  - walls
  - beams
  - ceilings
  - doors and windows
  - skirtings
- installation requirements and how to address common issues with:
  - appliances
  - services:
    - communications
    - electricity
    - gas
    - ventilation
    - water
- features and use of measuring devices:
  - tape measures
  - laser beams
  - angle readers
  - rulers
- critical dimensions that may affect manufacture and installation:
  - square of the structure
  - angles of floor to walls
  - walls to ceiling
  - vertical walls
  - horizontal floor and ceiling
  - service locations and critical structural criteria
- methods to calculate:
  - area
  - perimeter
  - volume
  - mass
  - scales and ratios (ingredients/elements and triangulation)
- drawing techniques, technologies and processes:

- scope of information to be included on site drawings
- industry symbols and protocols for the documentation of site features and expression of dimensions
- purpose and key provisions of Australian Standard AS1100 and its impact on documentation requirements.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - installation site with walls, floors and services
  - design documentation
  - service and appliance information
  - site and workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFM3042 Fabricate cabinetry

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to fabricate components from manufactured board or timber and assemble them into cabinets.

Workers with this competency follow established procedures in timber technology industries using discretion, judgement and problem solving to identify and resolve routine product and machine issues.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Cabinetry and furniture

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan fabrication process	1.1 Determine task requirements and cutting list specifications from work documentation 1.2 Prepare working drawings and set outs to meet task requirements 1.3 Identify and follow work health and safety requirements 1.4 Check that materials meet task quality requirements. 1.5 Identify procedures for waste minimisation and energy efficiency while completing task

2 Set up machines	<p>2.1 Check that emergency stops, gauges, guards, controls and safety equipment are functional prior to machine start-up</p> <p>2.2 Complete machine settings and adjust to meet task requirements in compliance with manufacturer instructions</p> <p>2.3 Check that cutting tools, jigs and other required tools and equipment are available, safe and functional</p> <p>2.4 Complete trial runs to check that machine is fully functional and that finished work meets task accuracy and quality requirements</p> <p>2.5 Identify and make necessary adjustments to machine settings to meet task quality and efficiency requirements</p>
3 Convert board to product components	<p>3.1 Follow machine start-up procedures in accordance with manufacturer instructions</p> <p>3.2 Position material in accordance with manufacturer instructions, tooling requirements, safe handling and workplace procedures</p> <p>3.3 Operate machine in accordance with its designed capacity and purpose, and to manufacturer recommendations</p> <p>3.4 Monitor machine operation to ensure product quality and output</p> <p>3.5 Check waste quantities and make adjustments to minimise it</p> <p>3.6 Confirm components against set-outs for required tolerances, fit and accuracy and recycle or discard non-compliant components in accordance with workplace procedures</p> <p>3.7 Recognise problems with product or machine operation and resolve or report to appropriate persons in accordance with workplace procedures</p>
4 Assemble cabinet	<p>4.1 Assemble components and check against plans or set-out for accuracy, including dimensions, square and tolerances</p> <p>4.2 Prepare product for final finish in accordance with task requirements</p>
5 Finalise operation	<p>5.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>5.2 Clean machinery, complete routine maintenance and leave in a safe mode in accordance with workplace procedures</p> <p>5.3 Identify, tag and report faulty equipment in accordance with workplace procedures</p> <p>5.4 Complete job documentation in accordance with workplace</p>

	procedures
--	------------

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures, work documentation involving drawings and product specifications
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Supersedes and not equivalent to MSFFM2011 Apply manufactured board conversion techniques

Supersedes and not equivalent to MSFKB3005 Fabricate cabinets for the built-in environment

# Assessment Requirements for MSFFM3042 Fabricate cabinetry

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- fabricate cabinetry products from cutting lists or cut plans to workplace standards, including at least 2 of the following:
  - floor cabinet
  - wall cabinet
  - tall cabinet
- as part of the above, at least 5 of the following must be fabricated:
  - end panels
  - shelving
  - bench tops
  - backs
  - bottoms
  - doors and fixing rails
- meet workplace standards for efficiency, including:
  - identifying and resolving routine problems
  - working with others, recognising dependencies and using cooperative approaches to optimise workflow and productivity.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
  - quality standards and procedures
  - guidelines regarding acceptable tolerance levels
  - safety policies and procedures
  - reporting machinery faults and material defects
- workflow process for cabinetry construction
- types and characteristics of manufactured board for cabinetry construction:

- raw board
- melamine surfaces
- veneered board
- plywood and hard board
- different types of timber
- types and features of cabinetry product components:
  - end panels
  - shelving
  - bench tops
  - backs
  - bottoms
  - doors and fixing rails
- tools and machinery commonly used in cabinetry construction
- personal protective equipment (PPE) required for cabinetry construction.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work documentation
  - tools and machinery required for performance evidence
  - PPE
  - unprocessed manufactured board or timber
  - workplace procedures.
-

## MSFFM3043 Install cabinetry

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to install custom-made or mass manufactured cabinetry and all associated fixtures and fittings. It requires the ability to complete pre-installation checks, identify site constraints, install products and complete quality checking of finished work.

Cabinet installers with this competency follow established procedures using discretion, judgement and problem solving to install cabinetry and resolve installation issues, often in consultation with others. Installers may or may not have been involved in the actual construction of cabinetry.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Cabinetry and furniture

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for installation	1.1 Determine installation requirements and sequencing from design and other work documentation 1.2 Select and prepare required tools, equipment and materials based on task requirements 1.3 Complete pre-checks on cabinetry in accordance with workplace procedures 1.4 Identify customer and others involved in installation process and establish communication based on task requirements

2 Identify site conditions and constraints	<p>2.1 Obtain access to site in accordance with project guidelines and work health and safety requirements</p> <p>2.2 Identify site safety hazards and take action to reduce risk to self and others</p> <p>2.3 Identify other on-site characteristics for their impact on the installation process</p> <p>2.4 Protect site features, fixtures and fittings using suitable coverings prior to start of installation</p>
3 Install products	<p>3.1 Prepare products and materials to site requirements</p> <p>3.2 Install products and associated hardware using hand and power tools safely and according to manufacturer instructions</p> <p>3.3 Take and confirm measurements and levels during process to achieve correct fit and overall installation quality</p> <p>3.4 Use fixing methods and products according to site conditions and product requirements</p> <p>3.5 Identify and accommodate services and appliance installation requirements</p>
4 Complete quality checks	<p>4.1 Inspect edges and lines and confirm fit is level, straight and flush</p> <p>4.2 Inspect all installed cabinet components and confirm correct alignment</p> <p>4.3 Confirm that required tolerances have been achieved</p> <p>4.4 Measure installed cabinet components and check that they comply with spatial and other specifications from design and other work documentation</p> <p>4.5 Identify installation deficiencies and use problem solving skills to achieve required outcome</p>
5 Finalise installation process	<p>5.1 Clean work area and dispose of waste safely and in accordance with environmental standards</p> <p>5.2 Check, clean and store tools and equipment in accordance with workplace procedures</p> <p>5.3 Seek and document customer approval of completed installation in accordance with workplace procedures</p> <p>5.4 Complete installation documentation in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret design documentation
- Writing skills to communicate information in familiar workplace documents
- Oral communication skills to liaise with others on practical matters as part of the installation process
- Numeracy skills to measure and calculate lengths and areas.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Redesigned unit – merges, supersedes and is not equivalent to MSFFM3006 Install furnishing products, MSFKB3004 Conduct on-site adjustments to cabinets and components and MSFKB3006 Install fitted cabinets and components.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFFM3043 Install cabinetry

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- install each of the follow types of cabinetry on at least 2 occasions, to include at least one 'run' involving 3 different cabinetry types:
  - floor mounted
  - wall mounted
  - full height
  - overhead.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- how to interpret design documentation
- mathematical procedures for estimation and measurement
- types of cabinetry that require professional installation
- factors that impact cabinetry installation:
  - design objectives
  - needs of other trades
  - requirements of services
  - appliance installation requirements
  - wall and floor construction
  - specific areas constraints:
    - wet areas
    - outdoor areas
  - statutory local and state or territory planning regulations
- tools, equipment and materials for cabinetry installation
- processes and techniques that support quality installations:
  - how to scribe to a wall
  - how to ensure hardware works effectively

- common types of installation adjustments for different product components
- use of fillers
- making cut-ins for services
- types of quality checks for cabinetry installations:
  - level
  - plumb
  - twist / racking
  - alignment of doors and/or drawers
  - smooth opening and closing
- problem solving processes for resolving installation problems:
  - re-examining plans and drawings
  - comparing measurements
  - determining root cause
  - applying product knowledge to situation
  - discussing issue with colleagues
  - assessing pros and cons of options and techniques
  - using resources on site to solve issue where possible
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - installation site with walls and floors
  - cabinetry and associated hardware for installation
  - installation documentation
  - service and appliance information
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFM3044 Set up, operate and maintain computer numerically controlled (CNC) sizing machines

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to set up, operate and maintain CNC sizing machines for the manufacture of products.

Workers with this competency follow established procedures, using discretion, judgement and problem solving to identify and resolve routine product and machine issues.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Wood machining

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Select material for machining and confirm it meets task and workplace quality requirements 1.4 Identify and confirm procedures for waste minimisation and energy efficiency

<p>2. Set up machines</p>	<p>2.1 Set CNC program to meet task requirements</p> <p>2.2 Confirm operational readiness of safety equipment and emergency stops, gauges, guards and controls prior to machine start-up</p> <p>2.3 Complete machine settings and adjustments in accordance with job requirements and machine and tool manufacturer instructions</p> <p>2.4 Check and confirm safe and effective operation of machines, cutting tools and jigs</p> <p>2.5 Complete trial runs to check machine operation, accuracy and quality of finished work</p> <p>2.6 Make final adjustments to CNC programs and equipment in accordance with task requirements and workplace procedures</p>
<p>3. Operate machines</p>	<p>3.1 Operate machine in accordance with its designed capacity and purpose, and to manufacturer recommendations</p> <p>3.2 Monitor machine operation to ensure product quality and output</p> <p>3.3 Check waste quantities and make adjustments to minimise waste</p> <p>3.4 Identify items that do not meet quality requirements and recycle or discard in accordance with workplace procedures</p> <p>3.5 Recognise problems with product or machine operation and resolve or report to appropriate persons in accordance with workplace procedures</p> <p>3.6 Follow authorised changes in working procedures</p>
<p>4. Finalise task</p>	<p>4.1 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>4.2 Clean machinery, complete routine maintenance and leave in safe mode in accordance with workplace procedures</p> <p>4.3 Identify, tag and report faulty equipment in accordance with workplace procedures</p> <p>4.4 Complete task documentation in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures, work documentation involving drawings and product specifications
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements
- Technology skills to use software features of CNC machinery.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFM3021 Set up, operate and maintain CNC sizing machines.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFM3044 Set up, operate and maintain computer numerically controlled (CNC) sizing machines

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- set up, operate and complete operator maintenance on CNC sizing equipment to produce at least 3 different cutting patterns.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedure for:
  - quality assurance and tolerance levels
  - reporting of machinery faults and material defects
- uses of CNC sizing machines:
  - CNC beam saws
  - double end profiling machines
- CNC practices and techniques, including workflow process
- characteristics of materials to be sized:
  - solid timber
  - manufactured board
  - laminate
  - solid synthetic materials and plastics.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:

- work documentation
- unprocessed materials for cutting
- CNC sizing machine
- workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# Assessment Requirements for MSFFM3045 Set up, operate and maintain computer numerically controlled (CNC) machining and processing centres

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- set up, operate and complete operator maintenance on at least 1 CNC machining and processing centre to complete detailed profiling. This must include at least 3 different shapes and, for each of these shapes, using each of the following methods:
  - development and application of sub-program
  - development and application of parametric program
  - application of CAD/CAM functions.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for
  - work health and safety
  - quality assurance and tolerance levels
  - reporting of machinery faults and material defects
- uses of CNC machining and processing centres:
  - three axis machining centres
  - multi-tasking machining centres
  - flat-bed routers and mortice
- tools and equipment associated with CNC centres:
  - stand-alone or integral computing systems
  - machine-specific tools
- personal protective equipment (PPE) required for CNC machining and processing
- CNC practices and techniques, including workflow process
- characteristics of materials to be machined and processed and uses of products produced:
  - materials

- solid timber
- manufactured board
- products:
  - vacuum formed doors
  - widening joints
  - framed construction
  - drawers and laminating veneers.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - work documentation
  - unprocessed materials for processing
  - CNC controlled equipment
  - PPE
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFP2011 Use timber furnishing construction techniques

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to follow basic processes for the construction and assembly of a timber product. It includes the use of a limited range of tools, equipment and construction techniques. Learners with this competency have basic skills to support further study or entry-level work in furnishing and furniture making industries. This unit is usually delivered within a pre-employment training program.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture making pathways

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify construction and assembly requirements	1.1 Review drawings and identify tools and equipment required to create item 1.2 Estimate quantities of materials required based on drawings 1.3 Identify key steps in construction and assembly process for individual components and complete item 1.4 Identify quality standards to be achieved 1.5 Identify and follow work health and safety requirements
2 Follow construction and	2.1 Confirm that tools and equipment are safe for use prior to

Elements	Performance Criteria
assembly processes	starting work  2.2 Operate tools and equipment in accordance with safety requirements and manufacturer specifications  2.3 Lay out and accurately mark and cut materials to meet item specifications  2.4 Join materials in accordance with specifications  2.5 Assemble components using jigs or clamps and fastenings based on item requirements  2.6 Apply adhesives in accordance with workplace procedures and manufacturer instructions  2.7 Confirm item meets quality standards and seek guidance from supervisor to address any deficiencies
3 Clean work area	3.1 Clean and store tools in accordance with procedures  3.2 Safely dispose of waste in accordance with procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret scale drawings and follow basic safety procedures
- Oral communication skills to seek feedback and guidance from supervisor
- Numeracy skills to take accurate measurements, calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFFM1001 Construct a basic timber furnishing product and MSFFM1002 Operate basic woodworking machines.

## Links

Companion Volume implementation guides are found in VETNet --

## Assessment Requirements for MSFFP2011 Use timber furnishing construction techniques

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- safely use basic construction and assembly techniques to create a complete timber furnishing item to required quality standard with work processes to include at least:
  - 5 different hand-held tools
  - 1 static machine
  - 2 timber joints
  - 1 adhesive type
  - 1 jig or fastening device.
  -

### Knowledge Evidence

There must be evidence the candidate has knowledge of:

- for timber furnishing items:
  - how to interpret scale drawings
  - workflow process for construction and assembly
  - safety requirements, including personal protective equipment (PPE)
  - tools, equipment and machinery typically used
  - materials typically required
  - types of quality checks.
  -

### Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - scale drawings

- tools, equipment and materials required for performance evidence
- PPE
- procedures for work health and safety.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFP2012 Join furnishing materials

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to join timber and other furnishing materials, including the construction of simple timber joints.

Learners with this competency have basic skills to support further study or entry-level work in furnishing and furniture making industries. This unit is usually delivered within a pre-employment training program. Work is carried out under supervision.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture making pathways

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Identify task requirements, including type of joining and quality requirements, from supervisor instructions 1.2 Identify and follow work health and safety procedures 1.3 Select tools and equipment to meet task requirements and check that they are safe and functional 1.4 Check that materials meet task quality requirements
2. Join materials	2.1 Lay out materials for joining to maximise efficiency of joining process 2.2 Measure and mark out of cutting and joining lines in accordance with task requirements

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	2.4 Join materials using hand and power tools 2.5 Select and use fasteners, adhesives and appropriate clamping systems to meet task requirements 2.6 Check finished joint against quality requirements
3. Clean work area	3.1 Clean and store tools in accordance with procedures 3.2 Safely dispose of waste in accordance with procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Oral communication skills to participate in simple spoken exchanges with supervisor
- Numeracy skills to measure and make simple calculations.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Redesigned unit – merges, supersedes and is not equivalent to MSFFP2005 Join furnishing materials and MSFFP2006 Make simple timber joints.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFFP2012 Join furnishing materials

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- make 2 different timber joints:
  - 1 using hardwood
  - 1 using softwood.
- join 1 composite or plastic product.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- safe work practices and procedures for joining furnishing materials
- types of simple timber joints and typical uses, including at least 3 of the following:
  - butt joint
  - dowel
  - domino
  - biscuit joint
  - mitre
  - matched
  - rebate
- hand tools and equipment commonly used for joining furnishing materials
- personal protective equipment (PPE) required when joining furnishing materials
- furnishing materials and their response to common joining methods:
  - composite and plastic materials
  - hardwood
  - softwood
- quality requirements for joints:
  - visual appearance
  - tolerance
  - gaps or play in joints and strength

- standard applications for adhesive types, including:
  - dispersion
  - reaction
  - hot melt
  - contact
- fastening methods.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - timber and composite or plastic materials for joining required for performance evidence
  - hand tools
  - PPE
  - adhesives and fastening devices
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFP2013 Use basic artwork framing techniques

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to use basic artwork framing techniques. It includes the use of a limited range of tools, equipment and framing techniques. Learners with this competency have basic skills to support further study or entry-level work. This unit is usually delivered within a pre-employment training program.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture making pathways

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify framing requirements	1.1 Identify framing requirements from spoken or written work instructions 1.2 Identify key steps in framing process 1.3 Identify and follow work health safety requirements
2 Cut and join mouldings	2.1 Select tools and equipment to cut and join mouldings and check that they are safe and functional. 2.2. Check that moulding materials meet task quality requirements. 2.3 Set out material for cutting to length in accordance with task requirements and workplace procedures 2.4 Use tools and equipment in accordance with safety

	<p>requirements and manufacturer specifications</p> <p>2.5 Cut mouldings to length and check for quality and fit in accordance with workplace practices</p> <p>2.6 Lay out components and fix in preparation for joining according to work instructions and workplace procedures</p> <p>2.7 Join components and check for quality, alignment and finish in accordance with workplace practices</p>
3 Cut mat board	<p>3.1 Select tools and equipment required for cutting mat board and check they are safe and functional</p> <p>3.2 Check that mat board material meets task quality requirements</p> <p>3.3 Set out mat board material for cutting in accordance with task requirements and workplace procedures</p> <p>3.4 Use tools and equipment in accordance with safety requirements and manufacturer specifications</p> <p>3.5 Cut mat boards check for quality in accordance with workplace practices</p>
4 Cut glass for framing	<p>4.1 Select tools and equipment for cutting glass and check that they are safe and functional</p> <p>4.2 Check that glass meets task requirements</p> <p>4.3 Set out glass for cutting in accordance with task requirements and workplace procedures</p> <p>4.4 Use tools and equipment in accordance with safety requirements and manufacturer specifications</p> <p>4.5 Cut glass and check for quality in accordance with workplace practices</p>
5 Mount artwork	<p>5.1 Determine method of mounting to meet task requirements</p> <p>5.2 Set up mounting equipment in accordance with equipment instructions and workplace procedures</p> <p>5.3 Position artwork on substrate and place in mounting equipment in accordance with task requirements</p> <p>5.4 Operate mounting equipment in accordance with manufacturer instructions and workplace procedures</p> <p>5.5 Remove assembled artwork from equipment and inspect for quality in accordance with workplace procedures</p>
6 Assemble artwork package	<p>6.1 Clean fabricated components and lay out for assembly in accordance with workplace procedures</p> <p>6.2 Attach artwork to backing material using selected method</p>

	<p>6.3 Assemble and adjust frame components to fit and fix in place</p> <p>6.4 Fit frame over package and fix backing securely</p> <p>6.5 Attach fittings, attachments and hanging aids appropriate for artwork</p> <p>6.6 Inspect package for quality and process in accordance with workplace procedures</p>
7 Complete task	<p>7.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures</p> <p>7.2 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>7.3 Complete required workplace records</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar documentation and follow basic safety procedures
- Oral communication skills to seek feedback and guidance from supervisor
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFPP1001 Frame a simple artwork.

# Assessment Requirements for MSFFP2013 Use basic artwork framing techniques

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- design and complete the framing for one flat paper-based piece of art.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workflow process for framing artwork
- tools and equipment typically used in framing artwork
- materials typically used to frame simple artwork, including:
  - timber
  - touch-up materials
  - glues
  - sandpaper
  - standard mat board material
  - appropriate mounting materials
  - glass
- safety requirements, including personal protective equipment (PPE) and manual handling procedures.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - artwork framing tools, equipment and materials required for performance evidence
  - PPE
  - procedures for work health and safety.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFP2014 Use basic finishing techniques on timber surfaces

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to perform basic furniture finishing tasks on timber furniture items such as tables, chairs and stools. It includes preparation and hand or spray coating of surfaces using a limited range of tools, equipment and finishing techniques. Learners with this competency have basic skills to support further study or entry-level work in furnishing and furniture making industries. This unit is usually delivered within a pre-employment training program.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture making pathways

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare for task	1.1 Identify task requirements from work documentation and instructions 1.2 Identify quality requirements in accordance with workplace practices 1.3 Observe work health and safety requirements, including personal protection and safe handling requirements 1.4 Select tools and equipment to meet task requirements, check they are safe and functional, and report any faults to supervisor 1.5 Check that furniture item and materials meet task requirements, including quality requirements
2. Prepare surface and materials for finishing	2.1 Check that surfaces are free of contamination and are ready for finishing process according to workplace procedures and industry

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
process	standards 2.2 Identify products with surface or other faults and report and repair according to workplace procedures and industry standards 2.3 Prepare materials for surface finishing in readiness for application
3. Prepare surface	3.1 Apply stain to timber surfaces in accordance with manufacturer specifications and workplace procedures and standards 3.2 Seal stained surface with polish using mop brush, blender or swooge 3.3 Lightly sand sealed surface to make smooth 3.4 Apply wood filler or sanding sealer in accordance with manufacturer specifications and workplace procedures 3.5 Seal filled-in surface with oil varnish in accordance with manufacturer specifications and workplace procedures and standards 3.6 Lightly sand sealed surface to make smooth
4. Apply finishing material	4.1 Apply finishing material in accordance with manufacturer specifications until required build is achieved 4.2 Cut back finishing material to remove surface defects or foreign material in accordance with workplace procedures and standards 4.3 Burnish surface with fine steel wool and lubricating oil to achieve even sheen
5. Clean up work area	5.1 Check, clear and store equipment and any unused materials in accordance with workplace procedures 5.2 Clean work area and safely dispose of waste including wood filler and lubricating oil rags, showing regard for spontaneous combustion risks, in accordance with workplace procedures and environmental standards 5.3 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar documentation and follow basic safety procedures
- Oral communication skills to seek feedback and guidance from supervisor

- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## **Unit Mapping Information**

Release 1. Supersedes and is equivalent to MSFFF1001 Complete a basic furniture finishing project.

## **Links**

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFP2014 Use basic finishing techniques on timber surfaces

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- for one timber furnishing item, complete the following to required quality standard:
  - prepare surface for finishing
  - apply colour to surface
  - apply finishing material.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- characteristics and safe handling of coating materials commonly used in furniture finishing
- common types of stains, including:
  - water stain
  - pigment oil stain
  - lacquer-based wiping stain
- common types of wood grain fillers, including:
  - oil-based filler
  - polyurethane (plastic) filler
  - water-based filler
- common types of finishing materials, including:
  - oil varnish
  - marine varnish
  - lacquer and sanding sealer
- common types of lubricating oils, including:
  - linseed oil
  - paraffin oil
  - teak oil

- common surface faults and their required repair techniques, including at least 5 of the following:
  - machine marks
  - bruising
  - pencil marks
  - grease
  - cross-sanding marks
  - scratches
  - glue marks
  - dirt marks
  - insect and termite holes
  - holes
  - knots
  - blisters
- coating application tools and techniques, including at least 6 of the following:
  - filler blades
  - brushes
  - spray equipment
  - sandpapers
  - skinning in
  - bodying up and spiriting out rubbers
  - mop brush
  - blender
  - swooge and scrapers
- personal protective equipment (PPE) required for timber surface finishing
- work health and safety requirements.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - job documentation
  - coating materials, timber components or furnishings requiring finishing, and cleaning materials required for performance evidence
  - PPE
  - procedures for work health and safety.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFP2015 Use basic upholstery techniques

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to follow basic processes for the creation of an upholstered furniture item. It includes the use of a limited range of tools, equipment and upholstery techniques. Learners with this competency have basic skills to support further study or entry-level work in furnishing and furniture making industries. This unit is usually delivered within a pre-employment training program.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture making pathways

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify task requirements	1.1 Identify upholstery requirements, including quality requirements, from design drawings and spoken or written work instructions 1.2 Identify key steps in work process 1.3 Identify and follow work health and safety requirements, including use of personal protective equipment (PPE)
2. Fit and finish product	2.1 Confirm that tools and equipment are safe and functional and that material meets task requirements 2.2 Prepare material and set out in accordance with task requirements and mark components in accordance with workplace procedures

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>2.3 Use tools and equipment in accordance with safety requirements and manufacturer specifications</p> <p>2.4 Prepare components, including any specified shapes, angles or curves, and check against set-out and task requirements</p> <p>2.5 Fit components in accordance with task requirements</p> <p>2.6 Undertake assembly process in accordance with workplace procedures</p> <p>2.7 Check that item meets quality requirements and seek guidance from supervisor to address any deficiencies</p>
3. Clean work area	<p>3.1 Clean and store tools in accordance with workplace procedures</p> <p>3.2 Safely dispose of waste in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret drawings or templates and follow basic safety procedures
- Oral communication skills to seek feedback and guidance from supervisor
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Supersedes and is not equivalent to MSFUP1001 Complete a basic upholstery project

Supersedes and is equivalent to MSFFP2008 Make a simple upholstery product.

# Assessment Requirements for MSFFP2015 Use basic upholstery techniques

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- use basic upholstery techniques to prepare, fit and finish at least one of the following products, with work to include fitting of fabric or leather cover to a base and the assembly and attachment of trim or fittings:
  - foot stool
  - headboard
  - seat top for chairs
  - padded blanket box
  - pin cushion top box
  - pin board.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- how to interpret drawings of product designs
- workflow for upholstery projects
- work health and safety requirements for upholstery projects
- tools and equipment commonly used in upholstery, including personal protective equipment (PPE)
- function of materials commonly used in upholstery, including at least 4 of the following:
  - timber
  - metal
  - plastics
  - fabric
  - webbing
  - plastic edging
  - foam
  - calico

- hessian
- glues
- screws
- nails and staples
- quality checking for upholstery work.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - product drawings
  - tools, equipment and materials, including PPE, required for performance evidence
  - procedures for work health and safety.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFP2016 Construct a basic roll-up blind

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSFBA1001 Construct a basic roll up blind.

### Application

This unit describes the skills and knowledge required to follow basic processes for the construction of a roll-up blind. It includes the use of a limited range of tools, equipment and construction techniques. Learners with this competency have basic skills to support further study or entry-level work in furnishing and furniture making industries. This unit is usually delivered within a pre-employment training program.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture making pathways

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify construction requirements	1.1 Identify task requirements from work documentation or spoken instructions from supervisor 1.2 Identify key steps in construction process 1.3 Check, under supervisor guidance, that tools and equipment are suitable, safe and functional 1.4 Check that materials and hardware meet task requirements 1.5 Identify and follow workplace health and safety requirements
2. Follow blind construction process	2.1 Calculate allowances for hardware, joins and hems 2.2 Lay out material flat and square on cutting table large enough to take

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	full width of material and mark to indicate cut lines 2.3 Safely use tools to cut fabric and finish bottom and side hems to meet task requirements 2.4 Select cut and attach splines and rollers to meet task requirements 2.5 Attach control mechanism, pin, lath and ring pull and/or bottom rail to meet task requirements 2.6 Attach child safety mechanisms
3. Apply quality checks	3.1 Check that finished blind performs within normal operational limits and meets task requirements 3.2 Identify and repair or rework parts of blind that do not meet requirements
4. Finalise operation and maintain equipment	4.1 Clean, package and store completed work in accordance with procedures 4.2 Clean, maintain and store tools and equipment in accordance with procedures and report any faulty tools and equipment to supervisor 4.3 Clean work area and dispose of waste in accordance with procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Oral communication skills to seek feedback and guidance from supervisor
- Numeracy skills to interpret numerical information in specifications and take accurate measurements to support work tasks

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFBA1001 Construct a basic roll up blind.

# Assessment Requirements for MSFFP2016 Construct a basic roll-up blind

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSFBA1001 Construct a basic roll up blind.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- construct at least 1 basic roll-up blind to required quality standards.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types and characteristics of roll-up blind materials
- components of a roll-up blind
- workflow for construction of a basic roll-up blind
- equipment, materials and hardware required for blind construction, including personal protective equipment (PPE)
- requirements for child safety mechanisms
- procedures for:
  - work health and safety, including personal protective equipment
  - record keeping and reporting in the workplace
  - storage and labelling
  - waste management.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work specifications
  - materials and equipment for blind construction, including PPE, required for performance evidence
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFP2017 Develop a career plan for the furnishing industry

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to research sectors, occupations, training and career paths in the furnishing industry and to develop a personal career plan. Learners with this competency use it to support further study or entry-level work in furnishing and furniture making industries. This unit is usually delivered within a pre-employment training program.

Workers with this competency guide their career development using industry knowledge and an understanding of their own interests and aptitudes.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture making pathways

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Explore furnishing occupations	1.1 Identify and use multiple reliable sources of information about furnishing industry. 1.2 Identify occupations and employing organisations in furnishing industry and associated sectors
2. Plan for career	2.1 Identify potential career plan that matches personal interests and aptitudes 2.2 Identify skill, education and training requirements for career. 2.3 Compare own current skills, knowledge and aptitudes to requirements of career

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	2.4 Create a plan for entry into and progression through the career, including ongoing work and education
3. Review plan	3.1 Seek feedback on plan from people with industry knowledge 3.2 Amend plan based on feedback and further research

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret unfamiliar information about industry sectors and occupations
- Writing skills to use and organise simple sentences in a documented career plan
- Oral communication skills to use questioning and active listening to obtain feedback
- Technology skills to create text documents, use simple formatting and research information using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFP2002 Develop a career plan for the furnishing industry.

## Links

Companion Volume implementation guides are found in VETNet --

# Assessment Requirements for MSFFP2017 Develop a career plan for the furnishing industry

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- identify and use 3 reliable sources of information about the furnishing industry to identify occupations in different sectors and types of employing organisations
- develop and document a plan for entry into and progression through a career, including ongoing work and education.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- basic online research techniques
- the types of jobs in different furnishing industry sectors, including at least 5 of the following:
  - blinds, awnings and security screens
  - cabinet making (kitchens, bathrooms and built-in fitments)
  - design
  - furniture making
  - furniture finishing
  - flooring technology
  - glass and glazing
  - picture framing
  - soft furnishings
  - wood machining
  - upholstery
- other industries that employ people with furnishing related skills
- changing and emerging job roles in the furnishing industry
- their own skills, knowledge and aptitudes
- types of learning and learning institutions that support skills development in furnishing and allied industries.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including information technology for research and plan documentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFP2018 Source and review information about furnishing product materials

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to research materials used in furnishing products and apply this knowledge to production needs. Materials for kitchens and bathroom construction are covered in a separate unit. Learners with this competency have basic skills to support further study or entry-level work in furnishing and furniture making industries. This unit is usually delivered within a pre-employment training program.

Workers with this competency undertake research to guide materials choice in furnishing production.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture making pathways

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Source information about furnishing product materials	1.1 Identify material requirements for furnishing production 1.2 Identify and use multiple reliable sources of information to identify materials that meet furnishing production needs
2. Apply knowledge of material characteristics to guide production	2.1 Identify strength, durability and other physical characteristics of material relevant to production needs 2.2 Identify material cost, handling requirements, workplace safety and

<b>Elements</b>	<b>Performance Criteria</b>
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
choices	environmental impact considerations relevant to production needs 2.3 Identify common problems and faults in materials 2.4 Identify finishing requirements, including surface finishing, for materials 2.5. Compare benefits and limitations of different materials to guide choice of material for production

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret unfamiliar information about materials from diverse sources.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFP2007 Identify materials used in furnishing production.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFFP2018 Source and review information about furnishing product materials

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- gather and interpret information from at least 3 different sources about 4 materials suitable for specific furnishing production tasks and, for each material, report on its:
  - physical properties
  - cost
  - handling, safety and sustainability considerations
  - benefits and limitations in comparison to alternatives.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- sources of information about materials
- typical material requirements in different furnishing industry sectors, including at least 2 of the following:
  - blinds, awnings and security screens
  - cabinet making (kitchens, bathrooms and built-in fitments)
  - design
  - furniture making
  - furniture finishing
  - flooring technology
  - glass and glazing
  - picture framing
  - soft furnishings
  - wood machining
  - upholstery
- commonly used materials in furnishing production, their generic and common trade names, and the types of products in which they are used:

- timber:
  - hardwood
  - softwood
  - engineered wood product
- composite materials:
  - different types of board
  - plywood
  - plastics
- metals:
  - aluminium
  - brass
  - lead
  - steel
- fabrics
- emerging material trends and technologies
- for commonly-used materials:
  - handling requirements
  - safety considerations and requirements for personal protective equipment during manufacture and installation
  - sustainability considerations
  - types of commercial production processes
  - performance characteristics:
    - stretch
    - abrasion
    - durability
    - elasticity
    - insulation
    - noise absorption
    - strength
    - fire resistance
  - common faults, problems and defects and their causes.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including information technology for research.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFP2019 Source and review information about kitchen, bathroom and laundry design

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to undertake research to guide material and design choices in kitchen, bathroom and laundry manufacture and installation. Learners with his competency have basic skills to support further study or entry-level work in furnishing and furniture making industries. This unit is usually delivered within a pre-employment training program.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture making pathways

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1.Source information to meet kitchen, bathroom and laundry design needs	1.1 Identify kitchen, bathroom and laundry project requirements, including user needs, usage patterns, and spatial and budgetary limitations 1.2 Source and use multiple reliable sources of information about kitchen, bathroom and laundry design, materials and products to meet requirements
2. Apply knowledge of materials and products	2.1 Identify strength, durability and other physical characteristics of potential material to meet project requirements

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
to kitchen, bathroom and laundry design	2.2 Identify cost, handling requirements, workplace safety and environmental impact considerations of potential material 2.3 Identify common problems and faults in potential materials 2.4 Compare benefits and limitations of different materials to guide choice for project
3. Match designs, materials and products to requirements	3.1 Compare benefits and limitations of different designs and products to guide choice for project 3.2 Create a design, including a basic drawing, and document chosen materials and products for project

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret information about materials and products from diverse sources.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Redesigned unit – includes content from, supersedes and is not equivalent to MSFFP2009 Identify materials suitable for kitchen or bathroom construction and MSFFP2010 Research and draw a basic kitchen or bathroom design.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFFP2019 Source and review information about kitchen, bathroom and laundry design

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- identify, for 1 kitchen, bathroom or laundry project:
  - customer needs
  - usage patterns
  - spatial limitations.
  - general financial limitations
- create a design, including a basic drawing, that addresses these needs and limitations, including location and characteristics of cabinetry and at least 3 of the following:
  - appliances
  - benchtops
  - sinks, basins and tubs
  - cabinetry finishes
  - hardware and accessories
  - fixtures and fittings
  - splashbacks
- gather and interpret information from at least 3 different sources about 4 materials suitable for the project and, for each material, report on its:
  - physical properties
  - cost
  - handling, safety and sustainability considerations
  - benefits and limitations in comparison to alternatives.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- sources of information about kitchen, bathroom and laundry design and associated materials and products

- key aspects of kitchen, bathroom and laundry design and components included:
  - basic design concepts
  - appliances
  - benchtops
  - cabinetry
  - fixtures and fittings
  - hardware and accessories
  - splashbacks
- commonly used materials in the construction of different components of kitchens, bathrooms and laundries, including at least 3 of the following:
  - benchtops
  - cabinetry – carcasses, bases and finishes
  - hardware and accessories
  - kickboards
  - splashbacks
- emerging material trends and technologies in kitchens and bathrooms
- for commonly used materials and products:
  - handling requirements
  - safety considerations and requirements for personal protective equipment during manufacture and installation
  - types of commercial production processes
  - performance characteristics:
    - aesthetic qualities
    - durability
    - restorability
  - benefits and constraints of different materials and products, including cost
  - reasons for selection in different situations.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including information technology for research.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFP2020 Undertake a basic furniture making project

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to plan and undertake a project to make a basic item of furniture. Learners with this competency have basic skills to support further study or entry-level work in furnishing and furniture making industries. This unit is usually delivered within a pre-employment training program.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Furniture Making Pathways

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Research furnishing materials and components	1.1 Determine materials that are appropriate for furnishing projects 1.2 Describe advantages and disadvantages of different furnishing materials 1.3 Identify and source commonly available hardware 1.4 Identify and research different methods used to join timber and engineered board 1.5 Describe advantages and disadvantages of different joining methods
2. Develop a furnishing-based project	2.1 Select a project that can be completed within time and resource constraints 2.2 Determine types of material required for project 2.3 Calculate amount of material and components required 2.4 Develop project scope and gain approval for project

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
3. Determine drawing requirements	3.1 Research different methods of producing drawings 3.2 Decide whether drawings will be produced using computer-aided design (CAD) or manual methods 3.3 Decide on appropriate dimensioning methods for drawings produced 3.4 Decide on methods and conventions for naming and saving new or modified drawings
4. Create project drawings	4.1 Produce project drawings 4.2 Review drawings with trainer/instructor and peers 4.3 Modify drawings as required in response to feedback provided 4.4 Produce items and materials list using CAD software or other means
5. Plan the manufacture of the product	5.1 Determine machines, tools and equipment required for product manufacture and work health and safety (WHS) and personal protective equipment (PPE) requirements 5.2 Determine sequence of component manufacture and measures needed to protect manufactured components from damage 5.3 Develop sequence for assembly of project 5.4 Get advice and approval for project and plan
6. Manufacture the product	6.1 Follow safe work practices and procedures 6.2 Comply with WHS requirements at all times 6.3 Use appropriate PPE in accordance with procedures 6.4 Manufacture and store components and acquire stock components according to developed plan 6.5 Assemble product according to developed and approved plan using appropriate hand and power tools and equipment 6.6 Check for conformance to requirements throughout manufacture and assembly process
7. Complete work requirements	7.1 Clear work area of waste and clean according to requirements 7.2 Maintain and/or store machines, tools and equipment according to instructions

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to undertake research on furnishing materials
- Writing skills to record project sequences, create lists of project requirements, and label drawings
- Oral communication skills to use questioning and active listening to obtain feedback
- Numeracy skills to assess material quantity requirements
- Technology skills to undertake online research and to understand principles of CAD software.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFP2001 Undertake a basic furniture making project.

# Assessment Requirements for MSFFP2020 Undertake a basic furniture making project

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- research, plan and complete a furniture making project, including
  - estimating the material, skill and time requirements for at least 1 of the following projects
    - lamp table
    - hall table
    - bedside table
    - occasional table
    - hat stand
    - dining chair
    - writing desk
    - blanket box
    - ottoman
  - choosing a project (not required to be one of the above) that is achievable given material, skill and time constraints
  - selecting furnishing materials and calculating quantities needed, including at least 1 of the following:
    - timber
    - engineered board
    - composite materials
    - upholstery foams
    - glass
    - textiles
    - metal
    - pre-machined components
  - selecting hardware and calculating quantities needed, including at least 1 of the following:
    - hinges
    - knockdown fittings

- handles
- screws
- staples
- nails/upholstery tacks
- drawer runners and fixtures
- lock
- determining appropriate joining methods, including at least 1 of the following:
  - knock down fittings
  - nails
  - screws
  - gluing
  - biscuits
  - timber joints
  - dowels
  - dominoes
- producing drawings of the project product and its components
- planning sequence of manufacture
- producing components
- assembling project, including using tools and equipment in a safe and effective manner
- inspecting finished project against quality requirements
- tidying/cleaning work area as appropriate
- returning tools, equipment and project items to designated storage areas and/or conditions.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- basic online research techniques and sources of information on furnishing projects, materials and components
- furnishing drawing practices
- tools and equipment, including personal protective equipment (PPE), commonly used in furniture making
- safe work practices and procedures in a furniture making environment, including use of PPE
- methods of joining timber and engineered board.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - tools, equipment and materials, including PPE, required for performance evidence

- procedures for work health and safety.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFT4007 Sample, inspect and test products to specifications

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers taking product samples, identifying and applying authorised testing procedures, interpreting test results and reporting findings within a furnishing enterprise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furnishing Technology

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |   |     |   |
|---|---|-----|---|
| 1 | Identify specifications and test procedures | 1.1 | Product quality specifications are read, drawings interpreted and test parameters are identified                        |
|   |   | 1.2 | Test methods for each required test parameter are identified and the most efficient test method is noted                |
|   |   | 1.3 | Any requirement for testing by personnel external to the work area is identified and appropriate permission is obtained |
|   |   | 1.4 | Design features that impact on testing and inspection are identified  |
| 2 | Select evidence                             | 2.1 | Appropriate conforming and/or non-conforming products,  |

- materials and/or waste are selected for testing in accordance with enterprise requirements
- 2.2 Observations of operators and copies of procedures are collected
- 3 Conduct and interpret tests
- 3.1 Tests are conducted following workplace procedures and results are documented
- 3.2 Comparisons of all data collected are made
- 3.3 Any recommendations are noted and considered for feasibility
- 4 Report findings
- 4.1 Findings of tests are documented
- 4.2 Any potential or existing problems and appropriate recommendations are identified and reported in accordance with enterprise procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

### Unit context includes:

- work health and safety (WHS) requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate organisational and analytical ability, discretion, judgement and problem

- solving
  - work is performed with little external assistance and with minimal supervision or direction
  - customers or suppliers of material to be sampled may be internal or external
- Sampling, inspection and testing include:**
- undertaking processes in accordance with industry standards and practices that reflect the type of product, the materials and processes used in its manufacture and its end use, and includes:
    - samples of raw materials
    - components
    - assemblies
    - end products
- Materials to be sampled include:**
- timber
  - metal alloys
  - glass, fabrics and textiles
  - plastics
  - leather
  - adhesives
  - fillers
  - finishes, as appropriate
- Personal protective equipment includes:**
- that prescribed under legislation, regulations and enterprise policies and practices
- Information and procedures include:**
- work procedures/instructions
  - designer/drawer specifications and instructions
  - quality systems documentation or equivalent containing sampling, inspecting and testing frequency and criteria
  - organisation work specifications and requirements
  - legislation/regulation/national and industry codes and practices relevant to the products
  - quality and Australian Standards and procedures

## Unit Mapping Information

Supersedes and is equivalent to LMFFT4007B Sample, inspect and test products to specifications.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFT4007 Sample, inspect and test products to specifications

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Collect, organise and understand information related to multi-trade work instructions and work orders, building and structural plans and safety procedures
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Arrange and conduct a minimum of four (4) different processes covering sampling, inspection and testing
- Analyse test results and interpret outcomes against requirements
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Use workplace technology related to the coordination, including communication equipment, time and management aids and other measuring devices
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- General quality systems theory
- Sampling techniques for commonly encountered materials
- Inspection techniques and faults common within the sector products
- Testing techniques (destructive and non-destructive) relevant to the sector and related equipment/aids
- Work flow in relation to required times and stages where quality checking is required

---

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to production or product finishing facility, testing equipment and procedures.

# MSFFT4010 Identify and calculate production costs

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers estimating materials, labour and time requirements, and establishing costs for the provision of products, including all overheads in a significant mass production environment. It may involve referral of matters to other enterprise personnel.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furnishing Technology

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |                    |     |   |
|---|--------------------|-----|---|
| 1 | Gather information | 1.1 | Details of the particular product and competition products are obtained                                 |
|   |                    | 1.2 | Details of the proposed production operation are obtained and analysed                                  |
|   |                    | 1.3 | Labour unit cost projections are obtained and agreed  |
|   |                    | 1.4 | Logistic support contracts, supply agreements or equivalent are obtained and analysed                   |
|   |                    | 1.5 | Details of proposed warehousing and physical distribution systems and related cost factors are obtained |
|   |                    | 1.6 | Information is converted to usable form and stored ready  |

			for retrieval and application
2	Estimate materials and labour	2.1	Types and quantities of materials required for production are estimated and recorded
		2.2	Time requirements for production activities and other lead times are estimated
		2.3	Labour requirements for direct production and handling operations are estimated and recorded
3	Determine and calculate overheads	3.1	Components contributing to overhead costs are identified
		3.2	Overhead costs to be attributed to work in accordance with commercial and enterprise procedures are identified
4	Calculate production costs	4.1	Total materials costs and labour costs are calculated in accordance with enterprise procedures
		4.2	Total production cost is calculated, including overheads and mark-up percentages
		4.3	Final cost to customer is calculated in conjunction with marketing/sales personnel
5	Document details and verify, where necessary	5.1	Details of costs and charges are documented in accordance with enterprise practice
		5.2	Costs, calculations or other details are verified by other enterprise personnel, as required
		5.3	Details are documented for future reference in accordance with enterprise practices

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**Unit context includes:**

- work health and safety (WHS) requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate organisational and administrative ability, discretion, judgement and problem solving
- work is undertaken in accordance with established procedures involving a range of products, equipment and installation sites
- interaction with customers and other personnel from the operator's workplace

**Tools, equipment and resources include:**

- measuring equipment
- product sales literature
- product samples

**Overhead costs include:**

- rental/lease costs
- utilities
- non-production resources
- depreciation of plant and equipment
- warehousing margins
- physical distribution unit costs
- insurance
- other costs incurred by doing business

**Personal protective equipment includes:**

- that prescribed under legislation, regulations and enterprise policies and practices

**Information and procedures include:**

- enterprise production plan and schedule
- enterprise financial management policy and procedures
- enterprise policy and procedures for cost and apportioning overheads
- labour employment costs (awards, enterprise bargaining agreements and contracts)
- material/supply costs (contracts, standing agreements,

- market rates and warehousing margins)
- physical distribution contracts or arrangements
  - Australian, international and enterprise quality standards and procedures

## Unit Mapping Information

Supersedes and is equivalent to LMFFT4010B Identify and calculate production costs.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFT4010 Identify and calculate production costs

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Collect, organise and understand information related to multi-trade work instructions and work orders, building and structural plans and safety procedures
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- For a significant mass production operation, determine the production and product costs using the following or equivalent steps:
  - obtain all information relevant to the determination of costs
  - interpret plans, specifications and instructions for production and materials to be used
  - estimate quantities of materials required
  - determine the types and amount of labour required to complete the work
  - estimate time required to complete the work
  - determine/calculate overheads
  - document the process and outcomes
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Use workplace technology related to the coordination, including communication equipment, time and management aids and other measuring devices
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Production systems documentation processes
- Enterprise costing procedures

- Mathematical formulae and processes relevant to costing
- Components of labour costs
- Enterprise/commercial approach to overhead costs
- Enterprise/commercial approaches to warehousing and physical distribution costs
- Enterprise information management processes, including storage requirements

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to all necessary facilities and associated equipment, including calculators, computers and relevant software.

# MSFFT4011 Purchase materials and consumables

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers purchasing materials and consumables required for production within a furnishing enterprise, through existing contracts and other formal purchasing arrangements or through local purchase delegation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furnishing Technology

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |                                  |     |   |
|---|----------------------------------|-----|---|
| 1 | Identify purchasing requirements | 1.1 | Purchasing requirements are identified from material specifications, orders and instructions in accordance with workplace procedures                                |
|   |                                  | 1.2 | Purchasing requirements are prioritised, where required, in consultation with others  |
|   |                                  | 1.3 | Quantities, quality of goods, price limitations and delivery requirements are determined or confirmed in consultation with appropriate personnel                    |
| 2 | Source materials and consumables | 2.1 | Sources of materials and/or consumables are identified from workplace preferred supplier lists or through networks and knowledge of local and/or overseas suppliers |

- 2.2 Difficulties in supply are reported in accordance with workplace procedures
    - 2.3 Availability of supply is confirmed
  - 3 Compare costs
    - 3.1 Alternative suppliers are contacted to check costing
    - 3.2 Actual costs are compared to predicted costs
    - 3.3 Any recommendations regarding alternative suppliers are communicated to appropriate personnel following workplace procedures
    - 3.4 Delegation to order goods/materials/equipment is exercised
  - 4 Purchase materials and consumables
    - 4.1 Capacity of supplier to meet price, quality and delivery expectations is checked
    - 4.2 Purchase order/list is developed in accordance with workplace procedures
    - 4.3 Order is placed with supplier and delivery schedules are confirmed
    - 4.4 Appropriate orders and invoices are exchanged according to workplace procedures
  - 5 Maintain and monitor material and consumable supplies
    - 5.1 Stock is regularly monitored using inventory records and physical checks, where applicable, to ensure maintenance of supply
    - 5.2 Up-to-date records of materials and consumables are maintained
    - 5.3 Acquisition requirements are documented in accordance with workplace procedures
  - 6 Liaise with other departments
    - 6.1 Communication channels with other departments are established in accordance with workplace procedures
    - 6.2 Liaison with other departments is conducted to ensure customer requirements are achieved

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

### Unit context includes:

- work health and safety (WHS) requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate administrative ability, discretion, judgement and problem solving
- work is performed with little external assistance and with minimal supervision or direction
- customers may be internal or external

### Personal protective equipment includes:

- that prescribed under legislation, regulations and enterprise policies and practices

### Information and procedures include:

- work procedures/instructions
- existing contracts or formal purchasing arrangements
- supply system directories, indexes and catalogues
- machinery/equipment/system technical manuals
- legislation/regulations/national and industry codes and practices related to the materials and consumables
- quality and Australian Standards and procedures

## Unit Mapping Information

Supersedes and is equivalent to LMFFT4011B Purchase materials and consumables.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFT4011 Purchase materials and consumables

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Collect, organise and understand information related to multi-trade work instructions and work orders, building and structural plans and safety procedures
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Purchase materials on a minimum of four(4) occasions, including two (2) different materials and at least one (1) perishable consumable
- Suggest improvements to purchasing operations and, where authorised, negotiate changes
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Use workplace technology related to the coordination, including communication equipment, time and management aids, and other measuring devices
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Contemporary supply/purchasing systems theory
- Company operating procedures, including procedures for purchasing materials and consumables
- Material and consumable usage rates
- Operation requirements of equipment and work systems in own work area

## Assessment Conditions

- Assessors must:

- hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
- have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
- be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to production operation with consumable and material requirements, preferred supplier lists and workplace procedures.

# MSFFT4012 Prepare a tender submission

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers preparing and submitting a tender for supply of products and services in the furnishing industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furnishing Technology

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |   |
|---|---|
| 1 Identify opportunity to provide goods and/or services | 1.1 Opportunities that are within the operational scope of the business unit or organisation are identified   |
|   | 1.2 Organisational resources which are available, or expertise which may be accessed, is identified and matched to opportunities                    |
|   | 1.3 The feasibility of undertaking the proposed project/work is assessed and approval is sought according to organisational policies and procedures |
| 2 Analyse tender requirements                           | 2.1 Tender specifications and scope of tender requirement are identified and clarified with the originator if required                              |
|   | 2.2 Proposed methodology for satisfying the request is  |

- developed
- 2.3 Required resources are identified and their availability confirmed with the provider in accordance with organisational procedures
  - 2.4 Methodology is adjusted to accommodate the availability of resources and expertise available
- 3 Prepare a tender estimate
- 3.1 Estimate is prepared taking all requirements into account and providing for contingencies as required by organisational policies, procedures and requirements
  - 3.2 Costing of estimate conforms to organisational policies and procedures
  - 3.3 The estimate satisfies the total requirement and where this cannot be provided, an explanation/compromise/option is identified
  - 3.4 Estimate is checked for accuracy and detail in accordance with organisational procedures
- 4 Submit a tender
- 4.1 Tender is prepared in accordance with organisational policies and procedures
  - 4.2 Tender addresses required details and meets originator's requirements
  - 4.3 Tender is submitted within the required timeframe in the form required by the request
  - 4.4 Organisational requirements for record keeping and documentation of tenders are completed
- 5 Review tender process
- 5.1 Changes and variations to the tender are negotiated to meet the needs of the client and the organisation in accordance with contractual arrangements, organisational policies, procedures and delegated authority
  - 5.2 The tender content and process is reviewed and evaluated using the outcome and the feedback provided by client and stakeholders
  - 5.3 Procedures are adjusted if required to improve subsequent bids

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

### Unit context includes:

- work health and safety (WHS) requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate analytical ability, discretion, judgement and problem solving
- work requires the analysis of, at times, complex requirements, the preparation and presentation of the tender and the follow-up action for both successful and unsuccessful tenders
- work is performed with little external assistance and with minimal supervision or direction
- that prescribed under legislation, regulations and enterprise policies and practices

### Personal protective equipment includes:

### Information and procedures include:

- work procedures/instructions
- tender brief/specifications issued by the requesting agency
- organisation work specifications and requirements
- legislation/regulations/national and industry codes and practices relevant to the product
- quality and Australian Standards and procedures

## Unit Mapping Information

Supersedes and is equivalent to LMFFT4012B Prepare a tender submission.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFT4012 Prepare a tender submission

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Collect, organise and understand information related to multi-trade work instructions and work orders, building and structural plans and safety procedures
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- On a minimum of two (2) occasions and for different/significant goods or services, prepare and submit formal tenders that are framed to serve marketing purposes and which address or are supported by:
  - the full requirements of the tender brief
  - total resource requirements
  - total costing covering all components and scenarios
  - appropriate legislative requirements
  - options for the client
- Negotiate changes/variations to tender and conduct review of outcome
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Use workplace technology related to the coordination, including communication equipment, time and management aids and other measuring devices
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Enterprise operating procedures and requirements
- Organisation resources, capacities and capabilities

- Tender management, preparation, submission and review processes
- Tender evaluation processes
- Financial and legal requirements for tendering
- Relevant legislation relating to tendering and contracting for goods and/or services of the organisation

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to requests for tender, previous tenders and outcomes, information relating to relevant resources, appropriate staff/advisers and supporting technology.

## MSFFT4013 Coordinate onsite installation of cabinetry

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to coordinate the work of tradespeople who provide services involved in the installation, refurbishment, restoration or repair of furnishing products, including kitchen, bathroom or laundry settings where installations require multiple types of trade work.

Workers with this competency use communication, discretion, judgement and problem solving to coordinate and guide the work of others.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking kitchen and bathroom work. Access to construction sites requires certification of general induction training specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007).

### Competency Field

Furnishing Technology

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan coordination of trade services	1.1 Review work documentation and establish scope of work and type of trade services required to complete installation 1.2 Inspect worksite for compliance with contract documentation, and confirm proposed work falls within allowable scope 1.3 Identify need for additional or revised information and drawings from worksite inspection and source in accordance with job requirements and workplace procedures 1.4 Develop logical plan for completion of all required trade work that

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	includes clear actions, timeframes and communication requirements between those involved
2 Organise and monitor trade work	2.1 Organise required trade services in accordance with job requirements, relevant timeframes and workplace procedures 2.2 Provide clear and accurate information about scope of work requirements to tradespeople 2.3 Monitor progress of trade works and identify variations that may impact installation process 2.4 Assess impact of any variations, adjust timeframes accordingly and communicate changes to all relevant people 2.5 Monitor quality of trade services being provided, identify any issues and resolve in consultation with relevant tradesperson
3. Finalise and verify trade work compliance	3.1 Inspect and assess finalised trade work against quality and contract requirements 3.2 Identify deficiencies and resolve to ensure compliance with job requirements 3.3 Inspect site and confirm that site is restored to required state prior to confirmation of work completion 3.4 Follow workplace procedures for documenting completion of work and approving tradesperson payments

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to provide information to tradespeople in diverse formats and complete familiar workplace documentation
- Oral communication skills to liaise with others on practical matters, to provide feedback on work and use conflict resolution skills when issues arise
- Numeracy skills to interpret numerical aspects of technical drawings and to take accurate measurements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFFT4001 Coordinate on-site installation of furnishing products.

## Links

Companion Volume implementation guides are found in VETNet --

# Assessment Requirements for MSFFT4013 Coordinate onsite installation of cabinetry

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- coordinate 3 onsite installations of furnishing products, with each installation to involve at least 3 different tradespeople.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for:
  - allocating and contracting trade work
  - site safety
- task done by, and licensing requirements for, tradespeople working on:
  - ceiling and wall linings
  - electrical services
  - flooring
  - gas services
  - glass and glazing
  - painting
  - stonemasons
  - tiling
  - waterproofing
  - water supply and drainage
- for each of the above trades:
  - requirements of buildings codes, regulations and codes of practice
  - work quality indicators
- how to interpret technical design documentation
- key stages of the work process for the design, fabrication and installation of cabinetry and the specific planning and sequencing requirements for trade work involving multiple people to facilitate efficient installation

- types of problems that occur during installations involving multiple trades and how to respond
- personal protective equipment (PPE) required on construction sites
- communication and coordination techniques for:
  - providing clear information to others about work requirements
  - using questioning and active listening
  - providing feedback
  - resolving conflict.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - design documentation
  - installation sites
  - other tradespeople for communication and liaison
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGG2017 Fabricate and install insect and security screens

### Modification History

Release 1 New unit of competency.

Note: MSFGG2010 Fabricate and install insect and security screens was superseded by MSFSS3005 Assemble non-security and security screens and grilles in 2020, but a subsequent review found that the content of MSFGG2010 should be restored to the qualification. This unit, MSFGG2017, has the same title and content (with minor updates) as MSFGG2010. MSFGG2017 is a new unit and does not supersede any other unit.

### Application

This unit describes the skills and knowledge required to measure, fabricate and install insect or security screens for doors or windows using aluminium.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

### Unit Sector

Glass and Glazing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan for work	<p>1.1 Determine specifications of insect or security screen from work instructions, including the identification of its pattern or plan</p> <p>1.2 Identify and apply work health and safety requirements relevant to fabrication and installation of aluminium screens, including personal protective equipment</p> <p>1.3 Identify fabrication and installation processes to meet specifications</p> <p>1.4 Calculate quantities of materials required from plans, work instructions and measurement of screen opening in accordance with Australian Standards and industry practice</p> <p>1.5 Prepare cutting lists from plans, work instructions and measurements</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>of opening to meet specifications and minimise waste</p> <p>1.6 Select fittings, fixings and joining devices or materials in accordance with specifications or type of materials to be joined or fixed</p>
2 Prepare for work	<p>2.1 Determine logical work sequence to suit the work and workplace procedures</p> <p>2.2 Assemble tools, equipment and materials and check they are appropriate for the work, serviceable and in a safe condition</p> <p>2.3 Check size, quantity, finish and profile of components against specifications</p>
3 Fabricate and install insect or security screen	<p>3.1 Measure and mark materials to cutting list requirements and to achieve most economical use of materials</p> <p>3.2 Cut and stamp materials to cutting list requirements and in accordance with workplace procedures or industry practice</p> <p>3.3 Assemble components of insect or security screen in accordance with workplace procedures or industry practice</p> <p>3.4 Attach fittings to screen in accordance with workplace procedures or industry practice</p> <p>3.5 Install insect or security screen in opening in accordance with recognised industry standards</p>
4 Complete work	<p>4.1 Inspect installed insect or security screen to identify any quality defects</p> <p>4.2 Repair, refabricate or reinstall insect or security screen to rectify defects</p> <p>4.3 Collect and store any material which can be reused</p> <p>4.4 Remove waste and scrap materials and process for disposal or recycling in accordance with workplace procedures</p> <p>4.5 Clean work area and dispose of rubbish</p> <p>4.6 Clean and store tools, equipment and unused material in accordance with workplace procedures</p> <p>4.7 Complete workplace documentation in accordance with workplace procedures</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFGG2017 Fabricate and install insect and security screens

## Modification History

Release 1 New unit of competency.

Note: MSFGG2010 Fabricate and install insect and security screens was superseded by MSFSS3005 Assemble non-security and security screens and grilles in 2020, but a subsequent review found that the content of MSFGG2010 should be restored to the qualification. This unit, MSFGG2017, has the same title and content (with minor updates) as MSFGG2010. MSFGG2017 is a new unit and does not supersede any other unit.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- measure, fabricate and install one hinged aluminium screen door, one sliding aluminium screen door and one aluminium window screen
- safely use at least three of the following:
  - drop saw
  - up-cut saw
  - stamping and notching tools
  - copy routers
  - end millers
  - crimpers
  - electric or pneumatic powered drills and screwdrivers
  - pop rivet guns
  - welding machine.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workflow requirements in relation to the fabrication and installation of insect and security screens
- characteristics and application of materials and fittings used in fabrication and installation of screens including:
  - extruded door framing
  - corner stakes
  - interlocks
  - fly mesh
  - heavy-duty security mesh

- emergency escape security screen
- fittings and fixing/fasteners (screws and pop rivets)
- anti-jemmy protection hardware
- hinges
- wheels
- lock mechanisms that comply with Australian Standards
- door closures
- lock guards
- workplace safety system requirements related to fabricating and installing aluminium insect and security screens
- relevant Australian Standards relating to security screen doors and security window grilles.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including those specified in the performance evidence
- modelling of industry operating conditions.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGG3032 Mirror glass

### Modification History

Release 1. Supersedes and is equivalent to MSFGG3012 Set up and operate glass mirroring equipment.

### Application

This unit describes the skills and knowledge required to set up, operate, monitor and maintain glass mirroring equipment.

This unit applies to glass processing workers mirroring glass in accordance with pre-determined work orders.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Read work instructions and identify job and quality requirements 1.2 Identify and follow work health and safety requirements, using all required personal protective equipment 1.3 Identify quality procedures for each stage of the process 1.4 Plan work sequence in a logical order to suit the job and workplace procedures 1.5 Establish and maintain communication with others involved with the work to ensure efficient work flow coordination, personnel cooperation and safety

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Prepare glass for mirroring	<p>2.1 Remove existing mirror by acid washing, cleaning and polishing in accordance with work instructions</p> <p>2.2 Wash glass to be mirrored with detergent in accordance with workplace procedures</p> <p>2.3 Rinse glass to be mirrored with demineralised water in accordance with workplace procedures</p>
3. Conduct glass mirroring operations	<p>3.1 Apply tinning solution in accordance with workplace procedures</p> <p>3.2 Rinse glass with demineralised water in accordance with workplace procedures</p> <p>3.3 Apply mirror solution to glass in accordance with workplace procedures</p> <p>3.4 Wash and blow dry glass in accordance with workplace procedures</p> <p>3.5 Apply backing paint in accordance with workplace procedures</p>
4. Complete work	<p>4.1 Inspect product for quality of work and discard or return items which do not meet quality requirements for reprocessing in accordance with workplace procedures</p> <p>4.2 Place completed work in holding area in accordance with workplace procedures</p> <p>4.3 Clean work area and safely dispose of rubbish in accordance with workplace procedures</p> <p>4.4 Inspect, maintain and tag equipment in accordance with workplace procedures</p> <p>4.5 Remove and store tools, equipment and unused materials in accordance with workplace procedures</p> <p>4.6 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG3012 Set up and operate glass mirroring equipment.

## Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFGG3032 Mirror glass

## Modification History

Release 1. Supersedes and is equivalent to MSFGG3012 Set up and operate glass mirroring equipment.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed the mirroring process on 3 different types of glass.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- purpose and key provisions of relevant Australian Standards
- workplace safety system requirements related to the operation of glass mirroring equipment
- work flow requirements in relation to the operation of glass mirroring equipment, including how the process fits into the overall glass processing system
- the role and importance of communication with others in relation to quality and safety
- characteristics of materials used and uses of products produced by glass mirroring operations
- mathematical procedures
- common items found in work instructions for glass laminating, including:
  - material to be used
  - number of sheets to be mirrored and holding area for completed items
  - process required to complete work tasks
- qualities, characteristics and uses of different types of glass for mirroring, including:
  - annealed
  - laminated
  - sheet
  - toughened
- types, characteristics, safe use, maintenance and limitations of glass mirroring equipment:
  - backing paint
  - buffing and cleaning tables
  - compressors
  - copper plating electrodes

- dual nozzle spray guns
- extractor fans
- heated drying racks
- mirroring formulas
- semi-automatic and computer-navigated mirroring equipment
- solution containers
- spray booths
- stripping acid tanks for re-mirroring
- tinning solution
- water distiller
- identification, handling and storage requirements for hazardous chemicals
- procedures for the preparation of glass and the mirroring process, the types of problems that may occur and how to avoid and respond
- quality indicators for mirrored glass
- handling and storage requirements for completed mirrored glass
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - equipment, tools and materials to complete tasks in Performance Evidence
  - glass product to be mirrored
  - safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -

# MSFGG4009 Apply standards and codes of practice for the glass industry

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4001 Apply standards and codes of practice for the glass industry.

## Application

This unit describes the skills and knowledge required to evaluate potentially complex glass and glazing requirements, determine codes and standards that must be applied and integrate those requirements into work processes.

This unit applies to experienced workers who interpret and use potentially complex technical information to develop glass and glazing work solutions. They may work in the manufacture, processing and/or installation of glass components. Job roles often involve leadership responsibilities.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

Nil.

## Competency Field

## Unit Sector

Glass and Glazing.

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Evaluate glass and glazing work requirements	1.1 Identify and correctly interpret glass and glazing job requirements from workplace documentation and consultation 1.2 Accurately record requirements to inform analysis 1.3 Conduct technical evaluation and correctly determine compliance

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	requirements and job feasibility
2. Determine application of glass and glazing standards	2.1 Identify products and/or types of glass for the job and determine current product specifications from investigation of supply sources 2.2 Assess relevant glazing standards against job requirements 2.3 Identify influencing factors and determine their significance and impact on the end product 2.4 Identify the need for any specialist assistance and seek advice in accordance with workplace procedures 2.5 Maintain communication with clients, building professionals and other workers to ensure all work is carried out to comply with glass and glazing standards 2.6 Develop optimal solution for completion of the work and confirm against all applicable standards
3. Develop documentation	3.1 Convert solution into accurate and detailed documentation in accordance with workplace procedures 3.2 Identify and develop documentation required by external personnel based on the scope of the project 3.3 Distribute documentation to internal and external personnel within required timeframes

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG4001 Apply standards and codes of practice for the glass industry.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFGG4009 Apply standards and codes of practice for the glass industry

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4001 Apply standards and codes of practice for the glass industry.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- assessed requirements and developed documentation that complies with Australian Standards (AS) for jobs that individually or cumulatively involve glass and glazing for:
  - stairways
  - balustrading
  - sloped or overhead glass
  - 5-star rated buildings
  - fire-rate applications
  - curtain walls and/or facades
  - partitions.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- scope and nature of workplace documentation that informs evaluation of work requirements:
  - specialist technical specifications
  - client brief
  - location of work
- key aspects of:
  - AS 1288: sections 6, 7 and 9
  - AS/NZS 2208: all sections
  - AS/NZS 1170: all sections
  - AS/NZS 4667: all sections
  - AS/NZS 4668: all sections
  - National Construction Code (NCC) references to windows and doors in buildings
- workplace safety system requirements related to the handling and installation of glass and glazing products that impact specification development
- types, characteristics uses and limitations of different glass, including issues related to:

- aspect ratios
- energy efficiency
- installation methods
- thermals
- tolerances
- wind loadings
- current and emerging trends and developments in glass and glazing, including:
  - products
  - techniques and/or applications
- sources of specialist glass and glazing technical advice
- workplace procedures for development of specifications, including:
  - format
  - required inclusions
  - technical drawings
  - document control
- range of people or parties potentially involved in glass and glazing work and typical interactions required:
  - architects
  - builders
  - customer
  - engineers
  - internal staff
  - product developers and/or suppliers
  - logistics personnel
- communication protocols for the approval and dissemination of work specifications and other information to external parties.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - details of glass and glazing work requirements as specified in the Performance Evidence
  - AS/NZS documentation as detailed in the Knowledge Evidence
  - product information
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

## MSFGG4010 Use glass industry data systems

### Modification History

Release 1. Supersedes and is equivalent to MSFGG4002 Use glass industry data systems.

### Application

This unit describes the skills and knowledge required to use a specialised glass industry software system. Software systems are diverse in nature and may be those used for estimating, design, inventory or sales.

This unit applies to individuals in glass and glazing enterprises who perform specialist or leadership functions.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing.

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select data system and information for work role	1.1 Identify specialist software for data and workplace information needs and determine its application to work role 1.2 Assess and confirm data entered in the system is accurate 1.3 Open data system and log on operator for the work
2. Enter and manipulate data	2.1 Enter data into the system and navigate the system to meet work requirements 2.2 Check entered or edited data for accuracy 2.3 Effectively use features of the system in the manipulation, processing and presentation of data

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	2.4 Transfer data between applications, linking and embedding related data files, in accordance with work requirements
3. Generate reports	3.1 Generate processed data in the correct format 3.2 Check generated reports and other documentation for accuracy and completeness of information 3.3 Identify and correct any data or processing errors before completion
4. Save data and exit system	4.1 Save and store data in appropriate directory or folder in accordance with workplace procedures 4.2 Close file and exit application without loss of data 4.3 Back up reports and other data in accordance with workplace procedures
5. Respond to problems with the system	5.1 Recognise faults that occur during data entry, processing and outputting 5.2 Identify causes of data processing faults and take appropriate action 5.3 Log and report problems in accordance with workplace procedures

## Foundation Skills

## Unit Mapping Information

Supersedes and is equivalent to MSFGG4002 Use glass industry data systems.

## Links

# Assessment Requirements for MSFGG4010 Use glass industry data systems

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4002 Use glass industry data systems.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- used a specialised glass and glazing software application to generate documentation and/or reports for 3 three different jobs or work situations.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- glass industry standards and codes of practice
- types, features and capabilities of glass industry software applications available for different purposes
- detailed operating procedures and capabilities of one specialised software application
- processes for identifying and responding to faults related to:
  - incorrect or misleading data
  - system software
  - system equipment.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - computers and software applications used in the glass and glazing industry
  - data for management within the system
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -

# MSFGG4012 Perform laser measurement and levelling for glass windows and doors in buildings

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4004 Perform laser measurement and levelling for glass windows and doors in buildings.

## Application

This unit describes the skills and knowledge required to plan for work, take accurate measurements, make alignment calculations and complete the levelling and alignment of glass windows and doors prior to installation.

This unit applies to individuals in glass and glazing enterprises who perform specialist or leadership functions.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Glass and Glazing.

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for glass laser measurement and levelling	1.1 Determine task requirements through review of documentation and inspection of windows and doors to be installed 1.2 Select laser levelling equipment suitable for the installation and set up to manufacturer recommendations 1.3 Plan levelling in detail including sequencing, and prioritise tasks and system requirements 1.4 Identify and mitigate potential site hazards for personnel and property and/or select control measures in accordance with the work

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	plan
2. Use laser devices to make measurements	<p>2.1 Take accurate measurements using laser levelling devices, and correctly interpret and record in accordance with standard operating procedures</p> <p>2.2 Locate or set up datum point from measurements</p> <p>2.3 Take readings to datum and at nominated or selected stations, to project specifications</p>
3. Perform levelling	<p>3.1 Make levelling realignment calculations using correct and appropriate methods for the installation levelling and/or alignment application</p> <p>3.2 Level and align glass window and door components to specifications using correct and appropriate techniques, and make adjustments to ensure compliance with manufacturer specifications and the work plan</p> <p>3.3 Temporarily fix glass components in the assigned installation positions prior to final measurement</p> <p>3.4 Undertake final level and alignment inspections, make any adjustments and fix glass components to the building using appropriate fasteners</p>
4. Complete work	<p>4.1 Close down levelling equipment and notify appropriate personnel of completed installation in accordance with workplace requirements</p> <p>4.2 Clear, clean, restore and secure work area of waste, in accordance with site and/or workplace procedures</p> <p>4.3 Maintain plant, tools and equipment and store in accordance with site and/or workplace procedures</p> <p>4.4 Finalise and document completion details in accordance with workplace procedures</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG4004 Perform laser measurement and levelling for glass windows and doors in buildings.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFGG4012 Perform laser measurement and levelling for glass windows and doors in buildings

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4004 Perform laser measurement and levelling for glass windows and doors in buildings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- levelled and aligned the following, either sub-frame or sub-channel, for installation in buildings:
  - door
  - shopfront
  - balustrade
- confirmed accuracy of the readings taken, including set up and movement of laser levelling device in two locations.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- key aspects of state or territory work health and safety legislation and regulations, including individual rights and obligations
- role of a laser safety officer
- key aspects of the following Australian Standards:
  - AS 2047-2014 Windows in buildings - Selection and Installation
- hazards and control measures associated with levelling and alignment
- workplace safety system for laser measurement and levelling, including personal protective equipment
- documentation that informs planning for laser measurement and levelling and how to interpret technical drawings
- effects on installed glass window and door components if not correctly levelled and aligned
- principles of levelling and alignment and numerical operations, geometry and calculations and/or formulae for levelling, including Reduced Level (RL)
- levelling device types, characteristics, technical capabilities and limitations, including:
  - rotating laser level
  - line and dot level

- dual beam level
- laser square level
- glass product specifications and tolerances plus or minus 1mm and size over a distance
- hierarchy of control and basis of control for glass plant/s
- communication protocols for radio, phone, computer and paper, including permissions and/or authorities
- role and use of manufacturer manuals
- types, characteristics, uses and limitations of shimming and packing materials
- settings and the correct scale for each setting on laser levelling devices and procedures for obtaining accurate measurements
- techniques, tools, equipment and procedures to carry out levelling and installation of glass components in buildings, including:
  - use of jacking bolts and shimming material
  - use of levelling equipment
- maintenance and storage requirements for laser levelling devices
- procedures for the recording, reporting and maintenance of workplace records and information.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - laser levelling equipment
  - glass window and door components
  - manufacturer documentation
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# MSFGG4014 Operate complex glass processing plant control systems

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4006 Operate complex glass processing plant control systems.

## Application

This unit describes the skills and knowledge required to operate a complex glass processing plant control panel using control loops and a broad range of control algorithms to control plant areas and multiple products and /or process streams.

This unit applies to technicians and/or central control room operators who manage multiple complex tasks and take overall responsibility for the operation of all equipment and processes within the plant area. This may include optimisation of the area using the control system.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Glass and Glazing.

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Use operator interface	1.1 Correctly use system equipment and features to access control system 1.2 Monitor glass processing task using the operator interfaces selecting appropriate controller modes 1.3 Access required historical data and information from system 1.4 Monitor and acknowledge messages and alarms and take appropriate action in accordance with workplace procedures

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Access and manage advanced control features to meet work requirements
2. Access control information	2.1 Access relevant data and information from the control system and drawings by applying systems knowledge 2.2 Determine status of individual pieces of equipment from control panel readings and use information to identify potential faults 2.3 Minimise fluctuations and variations in process through the interpretation of existing trends and control schematics 2.4 Determine and relate overall operating effectiveness of the plant area to the required targets for the area
3. Control process variations and monitor operations	3.1 Use historical data on plant operations to assist the identification of problems and process all available information to identify potential faults 3.2 Make required set point or output changes to meet plant area and process requirements 3.3 Adjust production in response to test results and control panel information 3.4 Monitor key process and environmental variables and take appropriate action according to workplace procedures 3.5 Adjust controller settings in accordance with procedures 3.6 Optimise plant area in accordance with guidelines 3.7 Undertake coordination with stakeholder's external to the plant area based on work requirements 3.8 Accurately record adjustments and variations to specifications and/or schedules and communicate to appropriate personnel within required timeframes
4. Facilitate planned and unplanned process startups and shutdowns	4.1 Select and apply procedures for planned startup and shutdown processes 4.2 Select and apply procedures to unplanned shutdown processes 4.3 Implement emergency responses in accordance with workplace procedures 4.4 Identify and communicate necessary information to all personnel affected by events 4.5 Log required information accurately and regularly

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
5. Respond to alarms or out of specification conditions and control hazards	<p>5.1 Identify and prioritise system(s) affected by the alarm or condition and take appropriate action in accordance with workplace procedures</p> <p>5.2 Respond promptly to alarm or incidents in accordance with workplace procedures</p> <p>5.3 Deal with any out of specification material in accordance with procedures and communicate the problem and/or solution to appropriate personnel</p> <p>5.4 Record incident information as required by workplace procedures and communicate details of the alarm and action taken to the next shift at change over</p> <p>5.5 Follow up incidents to confirm that appropriate action has been taken</p> <p>5.6 Identify hazards in the production and/or processing work area and assess the risks arising from those hazards</p> <p>5.7 Implement measures to control risks in line with workplace procedures and duty of care</p>
6. Resolve other problems within scope of responsibility	<p>6.1 Identify possible problems in equipment, control systems or process to determine problems needing action</p> <p>6.2 Establish possible fault causes and rectify problem using appropriate solution within area of responsibility</p> <p>6.3 Follow initiated control actions until resolution and report problems outside area of responsibility to designated person</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG4006 Operate complex glass processing plant control systems.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFGG4014 Operate complex glass processing plant control systems

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4006 Operate complex glass processing plant control systems.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- determined, analysed and acted on all of the following causes of problems, alarms and/or fault indications at least once, including:
  - instrument failure or malfunction
  - electrical failure or malfunction
  - mechanical failure or malfunction
  - equipment design deficiencies
  - product parameters (temperature, flows, pressure and levels)
  - process control system malfunction
  - power or utility failures
  - software problems.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- basic science of upstream and downstream glass processes
- glass product specifications and tolerances
- general operating principles and features of glass processing plants, including:
  - process control philosophies, strategies and systems, including multiple control systems
  - systems operating parameters and integrity limits
  - architecture and location of the glass process and/or production equipment
  - interactions between glass plant items and/or processes and between plant units within entire plant
  - communication systems and techniques for effective communication
  - fire and gas detection and protection systems
  - emergency shutdown procedures
- organisational procedures for the operation of a specific plant control system
- features and functions of control loops, including:

- interactions between multiple control loops
- cascade control
- piping and instrumentation (P&ID) control
- set points
- controlled variable and indicated variable
- features and functions of instrumentation and control systems and components, including:
  - feed forward, feedback and open control
  - sensing devices
  - final control elements
  - transducers and/or transmitters
- impacts of changing controller settings and the limits within which changes can be made
- features of typical problems encountered in a glass processing plant, and the process of how to respond, including for:
  - operating without advanced control features
  - loss of power or utilities
  - analysing failure modes
  - variation and/or loss of feed
  - unstable control of pressure, temperature level and flows
  - control equipment failure
  - process plant trips
  - change in atmospheric conditions (rain, temperature, wind and lightning)
  - emergency situations
  - how to interpret complex process drawings, including P&ID diagrams, probability of failure on demand (PFD) and cause and effect.

## Assessment Conditions

Skills must have been demonstrated in a glass processing workplace.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# MSFGG4015 Manage glass processing plant shutdown and restart

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4007 Manage glass processing plant shutdown and restart.

## Application

This unit describes the skills and knowledge required to coordinate and document the shutdown and restart of a glass production or processing plant in a safe and efficient manner. The shutdown may be a planned or an unplanned shutdown or emergency situation.

This unit typically applies to the leading plant technician on a shift, who uses discretion and judgment to respond to the cause of the shutdown and coordinate all personnel involved in the shutdown to ensure it happens in an orderly a fashion and that the plant is left in the best condition possible for a quick restart. It does not apply to individual plant operators shutting down individual production units.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Glass and Glazing.

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Manage shutdown sequence	1.1 Check and verify glass plant safety systems and ensure that plant has been made safe 1.2 Identify the reason for, or cause of, the plant shutdown by troubleshooting the system using all available data and information systems 1.3 Obtain confirmation of the identified shutdown from operators to verify both the nature and the reliability of the shutdown

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Initiate procedures to rectify the fault or shutdown cause through repair or readjustment before returning the system to startup status
2. Conduct startup process	2.1 Satisfy all start-up permissions prior to startup process being commenced 2.2 Safely and efficiently conduct startup and return to normal operation in accordance with workplace procedures
3. Document shutdown and startup process	3.1 Accurately complete logs and workplace documentation with required details, actions and responses 3.2 Record and report any ongoing production problems to appropriate persons or authority

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG4007 Manage glass processing plant shutdown and restart.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFGG4015 Manage glass processing plant shutdown and restart

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4007 Manage glass processing plant shutdown and restart.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- shutdown and restarted a glass processing plant safety and efficiently on at least 1 occasion.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace safety system and its relationship to plant shutdown and restart
- basic physics, chemistry and mathematics relevant to the process
- glass product specifications and tolerances
- general operating principles and features of glass processing plants, including:
  - process control philosophies, strategies and systems, including multiple control systems
  - basis of control for glass processing plant/s
  - systems operating parameters and integrity limits
  - architecture and location of the glass process and/or production equipment
  - interactions between glass plant items and/or processes and between plant units within entire plant
  - communication systems and protocols
  - fire and gas detection and/or protection systems
  - emergency shutdown procedures
- organisational procedures for the operation of a specific glass plant
- planned, unplanned and emergency reasons for processing plant shutdown, and different types of shutdown:
  - shutdown 'to cold'
  - short shutdown to allow minor work
  - 'warm shutdown'
  - plant trip and restart 'hot shutdown'
- the actions involved in facilitating a shutdown and who is involved

- typical routine and major glass processing plant idiosyncrasies and problems, faults and the process of how to respond
- personnel involved in a shutdown and their respective roles
- complex process drawings, including piping and instrumentation diagrams (P&ID), probability of failure on demand (PFD)
- correct methods of starting, stopping, operating and controlling glass processing plants.

## Assessment Conditions

Skills must have been demonstrated in a glass processing workplace.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

# MSFGG4016 Plan and coordinate commercial glazing installations

## Modification History

Release1. Supersedes and is equivalent to MSFGG4008 Undertake planning and coordination for commercial glazing installation operations.

## Application

This unit describes the skills and knowledge required to interpret contract documentation, develop a project schedule and coordinate all resources required for the complete glass and glazing installation process in accordance with quality requirements. It includes the requirement for establishing and maintaining communication with a diverse range of site personnel.

This unit applies to individuals in glass and glazing enterprises who perform specialist or leadership functions.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking glass and glazing work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Glass and Glazing.

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine installation requirements	1.1 Identify key components and conditions of work from analysis of contract documentation 1.2 Confirm glass installation specifications and timing through consultation with principal contractors and architects and/or engineers

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>for the construction</p> <p>1.3 Determine and document internal and external human, physical and financial resources through review of documentation</p> <p>1.4 Identify and accurately document site requirements and limitations</p>
2. Plan installation	<p>2.1 Sequence installation operations and allocate responsibilities within a project schedule</p> <p>2.2 Define critical path of the installation from project schedule</p> <p>2.3 Organise resources and schedule from internal or external supply sources and confirm details in writing</p> <p>2.4 Develop installation site and safety plans for coordinating with other building trades and contractors</p> <p>2.5 Obtain permits within the required timeframe</p> <p>2.6 Monitor project timeframes and adjust to account for other construction activity scheduling</p>
3. Coordinate delivery and startup	<p>3.1 Check and supervise on-site plant delivery and placement against work plan, safety and site requirements</p> <p>3.2 Schedule and monitor on-site human resource requirements in accordance with agreed scope of role and workplace procedures</p> <p>3.3 Support effective coordination of installation activity through engagement with construction work supervisor and other tradespeople</p>
4. Coordinate on-site installation	<p>4.1 Monitor quality and safety of work through ongoing communication with key site stakeholders and physical site inspections</p> <p>4.2 Monitor the work and performance of subcontracted plant operators and staff against agreed requirements</p> <p>4.3 Prepare site reports of supervisory inspections with any variation requests or requirements and communicate to the appropriate person</p> <p>4.4 Complete administrative processes with reference to relevant regulatory and organisational requirements</p>
5. Manage quality compliance	<p>5.1 Inspect and monitor site checklists, detailing specific items at appropriate stages</p> <p>5.2 Use industry and organisational quality manuals and procedures in managing the quality process with all quality requirements communicated to on-site personnel</p> <p>5.3 Check work against contractual quality standards and organise and</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>check any required rectifications for completion</p> <p>5.4 Arrange and accurately document regulatory inspections of the completed installation</p> <p>5.5 Accurately complete final contract documentation in accordance with job requirements and communicate to relevant personnel</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG4008 Undertake planning and coordination for commercial glazing installation operations.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFGG4016 Plan and coordinate commercial glazing installations

## Modification History

Release1. Supersedes and is equivalent to MSFGG4008 Undertake planning and coordination for commercial glazing installation operations.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- planned and coordinated 2 commercial glazing installations in accordance with contract requirements.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- state or territory building and construction codes, standards and government regulations relevant to the glass installation being undertaken
- glass industry standards, codes of practice and commercial glass handling and installation techniques
- certification requirements for glass installation work performed under regulations or local authority requirements and processes and timeframes for regulatory approvals
- features, formats and inclusions in contract documentation and how to interpret these
- types and features of other documentation used for planning installation:
- key stakeholders in commercial installations and communication requirements with these people:
  - client
  - construction professionals, internal and external
  - regulatory inspectors
- communication and negotiation techniques for establishing and maintaining effective working relationships on site
- potential site requirements and limitations, and how these are managed:
  - access permits
  - access limitations and challenges and impact on work
  - communication protocols
  - delivery processes
  - impact of other building and construction personnel and/or equipment
  - safety requirements
  - regulatory requirements

- potential installation resource requirements, both internal and external:
  - human, including staff labour and subcontractors
  - physical, including plant, equipment and materials
  - financial
- project management and critical path techniques:
  - planning and scheduling
  - documentation
  - monitoring
  - communication
- quality control processes and how these are implemented.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace and at worksites requiring commercial glazing installations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# MSFGN2004 Produce simple scale drawings by hand

## Modification History

Release 1. Newly created unit.

## Application

This unit describes the skills and knowledge required to prepare drawings by hand, including orthographic projections, to support product design, manufacture and installation. It includes knowledge of basic drawing symbols and conventions and a basic understanding of how computer-aided drawing (CAD) is applied in industry contexts, but does not necessarily cover skills in using CAD or in producing detailed and complex production drawings. Workers with this competency create drawings to support routine production and installation tasks in cabinet making, furniture, furnishing, wood machining and other industries.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

General

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify drawing requirements	1.1 Identify type of drawing needed from work information provided 1.2 Source relevant information from work documentation and establish geometric features and finished size of item or area to be drawn 1.3 Identify methods for recording spatial and other data in manual and computer-aided drawing 1.4 Obtain drawing materials suited to the type of drawing
2 Prepare drawings	2.1 Make accurate calculations to determine required drawing

Elements	Performance Criteria
	scale 2.2 Accurately mark critical dimensions and geometric features 2.3 Use established drawing conventions and symbols 2.4 Include explanatory notes and additional production or installation information based on work requirements 2.5 Check drawing against requirements to confirm accuracy

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret design and production documentation
- Writing skills to use drawing symbols and notations and provide simple information to support drawings
- Numeracy skills to calculate lengths, areas, volumes and angles, to make calculations related to scale, and to work with geometric concepts.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. New unit. No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet – -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFGN2004 Produce simple scale drawings by hand

## Modification History

Release 1. Newly created unit.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- produce at least one drawing to communicate a design idea for a furniture or furnishing product or component
- produce at least one set of drawings to guide manufacture, assembly and installation of a furniture or furnishing component, including:
  - 1 orthographic projection (front, top and side views)
  - 1 section view
  - 1 detail view.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- drawing conventions according to Australian Standard AS1100
  - centre lines
  - visible lines
  - hidden lines
  - dimension lines
  - hatching
  - breaks
  - end sections
  - symbols representing materials
  - title block
- appropriate scales for different purposes
- the use of drawings in cutting lists
- basic aspects of how computer-aided drawing (CAD) is used by industry, including the links between CAD and CNC production machinery.
-

## Assessment Conditions

Skills must have been demonstrated under routine supervision in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - workplace information on which to base drawings
  - drawing materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGN3003 Advise customers on products and services

### Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFBA3009 Provide advice to customers on blinds and awnings.

### Application

This unit of competency describes the skills and knowledge required to provide advice to customers on products and services. It requires broad and current knowledge relating to the products and services, and skills required to establish customer product or service requirements, and present and discuss the benefits and features of viable options that meet customer requirements and preferences.

The unit applies to those providing customers with product and service advice in a wide range of residential and commercial environments, including small through to large-scale enterprises.

No licensing, legislative or certification requirements apply to this unit at the time of publication

### Pre-requisite Unit

Not applicable.

### Unit Sector

Generic

### Elements and Performance Criteria

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Develop knowledge of products and services relevant to own workplace	1.1	Research and analyse information on characteristics of products and services relevant to own workplace
	1.2	Record and store research findings according to workplace procedures
	1.3	Collect and organise information, materials, product samples and visual aids relating to products and services for future retrieval and use

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
2. Prepare to provide advice to customer	2.1	Review work instructions to establish customer product and service requirements
	2.2	Select fit-for-purpose information, materials, product samples and visual aids that match customer requirement
	2.3	Schedule appointment with customer
3. Provide advice to customer	3.1	Attend scheduled appointment with customer equipped with suitable support information, products, materials and visual aids
	3.2	Consult with client to confirm client requirements and expectations
	3.3	Present viable options relating to product and service requirements in a format and style suited to customer needs
	3.4	Explain and discuss features, benefits, limitations, availability and approximate costs, terms and product and service options with customer within context of customer's specific requirements
4. Finalise advisory service to customer	4.1	Assist customer to decide on preferred product and service options
	4.2	Document customer preferences and selections according to workplace procedures
	4.3	Establish availability of customer preferences and selections with suppliers
	4.4	Store support information, products, materials and visual aids according to workplace procedures
	4.5	Complete workplace documentation and submit to required personnel according to workplace procedures
	4.6	Complete required customer follow-up according to workplace customer service procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

Numeracy skills to:	<ul style="list-style-type: none"> <li>interpret, discuss and use mathematical information in workplace documentation</li> <li>quantify customer requirements</li> <li>estimate and discuss product and service cost information</li> <li>schedule appointments and discuss cooling-off periods and payment terms and conditions</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>listen to customer requirements using questioning and active listening techniques to clarify customer requirements and elicit preferences</li> <li>respond to and feedback customer requirements accurately and clearly, using suitable and sufficiently broad vocabulary to convey the features and characteristics of products and services</li> <li>express own opinion clearly</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>interpret at times complex workplace documentation, including service conditions, customer and supplier legal obligations</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>use ICT-based tools in familiar contexts to access product and service information</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>write simple notes of research findings</li> <li>legibly document customer preferences and selections</li> </ul>

## Unit Mapping Information

# Assessment Requirements for MSFGN3003 Advise customers on products and services

## Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFBA3009 Provide advice to customers on blinds and awnings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- provide at least three different customers with product and service advice; once in relation to a product, once in relation to a service.

In the course of providing the above advice, the person must:

- establish and clarify customer requirements and expectations
- demonstrate current and suitably broad knowledge of product and service range
- explain and discuss each suggested viable option with customer, including:
  - features, benefits and limitations of product or service
  - product or service availability
  - approximate costs
- facilitate informed customer decision-making
- finalise advisory service according to workplace procedures and customer service standards
- work with others, recognising dependencies and using cooperative approaches to optimise work flow and productivity.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- sources of authoritative and current information on products and services relating to advisory services described in performance evidence
- workplace procedures relating to:
  - customer service standards
  - consultation methods
  - communicating product and service information to customers, including presentation methods
  - scheduling appointments
  - recording and reporting outcomes of customer appointment
  - storing and retrieving product and service information

- documenting, communicating and reporting customer preferences
- products and services offered by own workplace
- key features, characteristics, and terms of products and services relating to advisory services described in performance evidence, including features described in:
  - product and service instructions and specification sheets
  - service conditions
  - manufacturer specifications
  - special requirements
- legal obligations associated with products and services described in performance evidence, including:
  - cooling-off periods
  - payment terms and conditions
- principles and techniques of customer service and product promotion
- mathematical methods for quantifying customer requirements and estimating costs.

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to a commercially realistic range of customers requiring the advice described in the performance evidence above, including:

- authoritative sources of information relating to range of products and services that apply to advice in performance evidence
- computer with access to the internet for further research
- product samples, materials and visual aids relating to workplace products and services, including:
  - magazines
  - photographs
  - software presentations
  - sketches
  - trade brochures
- workplace procedures specified in knowledge evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards

## MSFGN3004 Resolve quality and compliance issues

### Modification History

Release 1. Supersedes and is equivalent to MSFSS3003 Resolve quality and compliance issues

### Application

This unit of competency describes the skills and knowledge required to identify actual and potential quality and compliance issues, and plan and implement cost-effective and efficient solutions to resolve those issues.

The unit applies to those resolving routine quality and compliance issues in the fabrication, assembly and installation of blinds, awnings, shutters, security screens and grilles. Resolution of non-routine issues identified in the course of this work is not part of this unit.

Licensing, legislative or certification requirements apply to this unit as roller shutter installers require a building licence in certain States. Relevant state/territory and local government agencies should be consulted to determine necessary certification or licensing for installing roller shutters. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

Not applicable.

### Unit Sector

Generic

### Elements and Performance Criteria

Elements	Performance Criteria	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Plan and organise quality and compliance checks	1.1	Identify nature and scope of quality and compliance checks to be undertaken on work products and processes
	1.2	Access and interpret instructions and plans applicable to work products and processes
	1.3	Access and interpret legislative and workplace quality and

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
		compliance documentation applicable to checking process
	1.4	Identify work health and safety (WHS) and personal protection requirements of compliance check according to workplace procedures
	1.5	Plan and organise required materials, tools and equipment according to workplace and safety procedures and in line with workplace environmental considerations
2. Identify quality and compliance issues	2.1	Investigate products and processes and note actual and potential quality and compliance issues in workmanship, process, and materials
	2.2	Assess nature and scope of noted non-compliances
	2.3	Document current condition of hardware, software, user and procedure
	2.4	Provide verbal and written reports on identified actual and potential quality and compliance issues to required personnel according to workplace procedures and nature of issue
	2.5	Escalate actual and potential quality and compliance issues that represent imminent risk and are outside scope of own level of responsibility
3. Plan and implement solutions to resolve quality and compliance issues	3.1	Identify and prioritise cost-effective and efficient solutions to resolve identified quality and compliance issues and meet quality, compliance and performance requirements
	3.2	Determine quality and compliance issues that can be resolved at own level, and escalate where specialist and higher level intervention is required according to workplace procedures
	3.3	Plan solution to resolve quality and compliance issues
	3.4	Check that planned solution complies with quality and workplace requirements
	3.5	Plan strategies for evaluating effectiveness of planned solution

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
	3.6	Document planned solution and evaluation strategies, and seek authorisation to proceed as required according to workplace procedures
4. Finalise quality and compliance resolution process	3.7	Implement planned solution to rectify identified non-compliances within scope of own role and according to workplace procedures
	4.1	Maintain record of substantiated non-compliances
	4.2	Evaluate effectiveness of implemented solution using established strategies
	4.3	Legibly complete and process report detailing quality and compliance issues and implemented solution according to workplace requirements
	4.4	Clean work area and dispose of, re-use and recycle waste safely and sustainably according to workplace procedures
	4.5	Check tools and equipment, and tag and report faulty items according to established workplace practices
	4.6	Clean and store remaining materials, tools and equipment according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

Learning skills to:	<ul style="list-style-type: none"> <li>review own skills and knowledge in relation to quality and compliance criteria, and seek information as required</li> <li>approach colleagues where assistance and advice are needed in identifying and resolving quality and compliance issues</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>interpret, discuss and use routine mathematical information in documentation and identify quality and compliance implications</li> <li>complete measurements and estimate product and material requirements</li> </ul>

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

Reading skills to:	<ul style="list-style-type: none"><li>• interpret basic plans, quality and compliance criteria and safety procedures</li><li>• read work instructions, including job sheets, cutting lists, plans, drawings and designs</li></ul>
--------------------	---

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFSS3003 Resolve quality and compliance issues

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFGN3004 Resolve quality and compliance issues

## Modification History

Release 1. Supersedes and is equivalent to MSFSS3003 Resolve quality and compliance issues

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- plan and safely and effectively complete checks on five different products or processes relevant to own work in fabricating, assembling, or installing blinds, awnings, shutters, security screens or grilles
- recommend and have accepted:
  - planned solutions to actual or potential quality and compliance issues
  - planned strategies to evaluate solutions
- implement recommended solutions and report on each of the above five resolution processes and their outcomes
- avoid backtracking, work flow interruptions and wastage
- work with others in a team and use cooperative approaches to optimise productivity.

Three of the above issues must be separate and different quality issues, and two must be separate and different compliance issues.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- quality and compliance requirements relating to products and processes being checked in performance evidence:
  - Australian standards
  - state and territory legislation and local government regulations
  - accepted industry good practice
  - manufacturer specifications
  - product drawings
- key features of product specifications and workplace procedures relating to product and process checks described in performance evidence
- work health and safety (WHS), legislative, and workplace requirements relevant to undertaking quality and compliance checks in the performance evidence, including safety data sheets, hazardous and dangerous goods codes and safe operating procedures

- workplace procedures relating to:
  - identifying and resolving quality and compliance issues
  - communicating and escalating non-compliance issues with required personnel
  - recording and reporting non-compliance information
  - safe handling requirements for equipment, products and materials, including use of personal protective equipment
  - following work instructions and inspection processes to:
    - minimise the risk of injury to self and others
    - prevent damage to goods, equipment and products
    - maintain required production output and product quality
- environmental protection requirements relating to disposal of waste material

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to:

- products and processes in the blinds, awnings, shutters, security screens or grilles sectors relevant to candidate where there are quality and compliance issues, which relate to at least two of the following:
  - hardware or software quality or compliance issues
  - user or procedural quality or compliance issues that increase wastage, or unnecessary increase in production or installation time
- defective or inappropriate products, materials or equipment
- PPE applicable to job requirements
- workplace documentation relevant to products and processes being checked, including quality and compliance criteria:
  - manufacturer and product specifications
  - relevant and current legislation, regulations, codes and standards
  - state, territory and local authority policies
- colleagues with specialist and higher level experience to whom quality and compliance issues can be escalated.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## MSFGN3005 Read and interpret work documents

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit of competency is applied in industries where workers interpret and apply information from documents such as standards, codes, specifications, instructions, and work plans and procedures.

Workers with this competency identify types of work document, understand their purpose, interpret them, and plan work based on the information they contain.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Generic

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify type and purpose of work document	1.1 Identify type of work document and its function and basic characteristics 1.2 Identify sections of document relevant to task being undertaken 1.3 Identify supplementary and explanatory information to support document use
2. Interpret document	2.1 Interpret key information in documentation relevant to task being undertaken 2.2 Seek clarification of information where necessary

<b>Elements</b>	<b>Performance Criteria</b>
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
3. Plan own work sequence	3.1 Identify required material, tools and equipment from documentation 3.2 Plan task sequence and identify procedures for checking compliance with work document requirements at each stage
4. Maintain documentation	4.1 Use and maintain work documents according to workplace procedures 4.2 Maintain supplementary, explanatory and modification information according to workplace procedures 4.3 File and store all documentation for efficient retrieval according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Technology skills to access, file and store electronic or hard-copy workplace documentation
- Communication skills to read and interpret documentation and seek clarification.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent MSFGN3001 Read and interpret work documents.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFGN3005 Read and interpret work documents

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- locate, read, and interpret at least 10 different work documents, including each of the following:
  - Australian Standards relevant to sector
  - instructions and specifications from tool or material manufacturer
  - building codes required for a project
  - job procedures
  - safe work instructions or equivalent
  - safety data sheets (SDS)
  - photographs or other visual material
  - work plans
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- the basic format and function of:
  - Australian Standards
  - building codes
  - job procedures
  - manufacturer technical instructions and specifications
  - SDS
  - work plans
- conventions and symbols of plans, drawings, and specifications
- workplace procedures for filing and storing documentation.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - documentation listed in the performance evidence.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGN3006 Estimate and cost job

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit of competency can be applied in any industry involving the manufacture and/or installation of products or delivery of services. It describes the skills and knowledge required to obtain job information, estimate the net cost of providing products and services, calculate mark-up and tax, calculate the full cost to the customer, and develop a customer quotation.

Workers with this competency cost jobs for customers on-site and off-site using discretion, judgement and specialised industry knowledge in line with established costing procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Generic

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Gather job information	1.1 Find out what customer requires in sufficient detail for accurate costings 1.2 Record job specifications based on information gathered 1.3 Identify delivery timing and methods
2. Estimate time and labour	2.1 Identify material and service types and quantities required 2.2 Identify labour requirements to manufacture and install products and perform services

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	2.3 Estimate other costs that may be incurred
3. Calculate costs	3.1 Calculate and document total cost of providing products and services based on estimates 3.2 Determine and document allowances for overheads and mark-up percentages according to workplace procedures 3.3 Calculate and document final cost to customer, including goods and services tax (GST) where required, according to workplace procedures
4. Complete final documentation	4.1 Check and verify costing details according to workplace procedures 4.2 Identify and resolve costing errors or anomalies 4.3 Prepare accurate customer quotation according to workplace formats 4.4 File costing and quotation documentation for future reference according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Communication skills to understand and clarify customer needs
- Numeracy skills to calculate required time and materials, cost, mark-up, and GST
- Technology skills to use standard industry technology for estimation, costing and documentation

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFGN3002 Estimate and cost job

## Links

Companion Volume implementation guides are found in VETNet --

# Assessment Requirements for MSFGN3006 Estimate and cost job

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit and demonstrated the ability to:

- estimate and cost 3 jobs with differing:
  - scope and nature of product or service
  - labour costs
  - material costs
  - quantity requirements
  - overheads.

In estimating and costing each of these 3 jobs, the candidate must:

- use standard industry technology for estimation, costing and documentation
- use mathematical processes to accurately estimate and correctly calculate percentage mark-ups and GST.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- ways in which job information may be gathered, including:
  - on-site inspection and measurement
  - customer discussion
  - review of documentation
- products and services suitable for the job, including:
  - sources of information
  - features and options
  - costs involved in providing products and services:
    - materials
    - labour rates and their components
    - production time and cost
    - transport and delivery
    - overhead components

- industry sector and enterprise costing and quoting procedures:
  - mark-up percentages
  - application of goods and services tax (GST)
  - documentation formats and inclusions for quotations
  - terms and conditions included in quotations
  - checking and approval processes
- workplace procedures and protocols for:
  - identifying customer requirements
  - recording job specifications
  - checking and verifying costing details
  - filing and storing costing and quotation documentation
- legal and ethical considerations relevant to estimating and costing jobs.
- 

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

The candidate must have access to:

- suitable facilities, equipment and resources, including:
  - product/service information
  - costing and quotation procedures and documentation
  - technology for calculation of costs
- modelling of industry operating conditions, including time constraints for preparation of costings and quotations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFKB2003 Prepare for cabinetry installation

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to prepare an installation site and confirm cabinetry and components are complete and ready for installation. It includes checking work documentation and confirming that quality requirements have been met. Workers with this competency follow established procedures, often as assistants under the guidance of a supervisor with trade qualifications.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Access to construction sites requires certification of general induction training specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007).

### Competency Field

Kitchens and bathroom

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Follow site procedures	1.1 Identify roles of different people on site and site communication protocols 1.2 Identify and follow site work health and safety requirements 1.3 Identify and follow site procedures for access and deliveries
2. Prepare for work	2.1 Identify own work requirements from installation plans 2.2 Locate required installation tools and equipment and confirm

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	operational readiness 2.3 Clear and prepare work area in accordance with installation and site safety requirements 2.4 Determine, confirm and access safe power source for tools
3. Confirm readiness of cabinetry for assembly and installation	3.1 Check cabinetry components against delivery documentation and installation plan and confirm completeness 3.2 Move cabinetry components to installation site while minimising risk of injury to self and others and risk of damage to cabinets 3.3 Assess cabinetry and components against work documentation, including quality requirements, and report any defects in accordance with workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret installation documentation
- Writing skills to report basic information about cabinet condition
- Oral communication skills to use questioning and active listening for communication on site
- Numeracy skills to interpret numerical data on installation and delivery documentation and complete numerical processes involving counting and comparison.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFKB2001 Prepare for cabinet installation.

# Assessment Requirements for MSFKB2003 Prepare for cabinetry installation

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- prepare for 2 different cabinetry installation jobs on separate sites, including:
  - identifying and following procedures for site safety and access
  - preparing work area and equipment
  - ensuring cabinetry is ready for installation.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work health and safety requirements
- safe manual handling procedures
- types of installation documentation, and their key features:
  - drawings, including symbols and terminology used
  - product specifications
  - component lists
  - cabinetry layout and design information
  - installation instructions
- tools and equipment, including personal protective equipment (PPE), commonly required for cabinetry installation
- cabinets components, including:
  - cabinet sections
  - door and drawer systems
  - drawer runners and slides
  - handles
  - hinges, runners and latches
  - legs, plinths and kickboards
  - locks

- quality checking procedures
- common defects and how to resolve them:
  - chips and markings
  - colour and texture variations
  - incompleteness
  - scratches
- procedures for maintaining workplace records for cabinetry installation.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - installation site
  - installation tools and equipment, including PPE, required for performance evidence
  - cabinetry and components to be installed
  - site and workplace procedures
  - installation documentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFKB2004 Provide assistance in cabinetry installation

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to assist in the onsite installation of cabinets for kitchens or bathrooms. It includes assembling cabinets, fitting components, and fixing cabinets to wall and floor surfaces, and making a limited range of adjustments.

Workers with this competency follow established procedures, often as assistants under the guidance of a supervisor with trade qualifications.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

Access to construction sites requires certification of general induction training specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007).

### Competency Field

Kitchens and bathroom

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Lay out components and materials	1.1 Identify and follow site work health and safety requirements 1.2 Determine floor layout and individual cabinet construction requirements from installation documentation or through checking with supervisor 1.3 Lay out components to match sequence of assembly 1.4 Check product codes and labels and identify any special installation requirements
2. Assemble carcasses	2.1 Use joining methods according to installation documentation or

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	supervisor instructions 2.2 Complete cabinet facings in accordance with task requirements 2.3 Use measuring techniques to confirm correct carcass levels 2.4 Attach components to cabinets in correct locations 2.5 Make minor adjustments using appropriate assembly techniques according to supervisor instructions 2.6 Inspect completed carcasses for compliance with quality requirements, rectify any deficiencies and confirm work with supervisor 2.7 Use hand and power tools safely and according to operating instructions
3. Fix cabinetry	3.1 Confirm cabinet fixing methods with supervisor according to site requirements 3.2 Fix cabinets to walls and floors according to installation documentation and supervisor instructions 3.3 Fix components according to installation documentation and supervisor instructions
4. Finish work	4.1 Clean cabinets and confirm installation complies with quality requirements 4.2 Identify and rectify any deficiencies under guidance from supervisor 4.3 Clean work area and dispose of rubbish safely and in accordance with environmental standards 4.4 Check, clean and store tools and equipment in accordance with workplace procedures 4.5 Complete installation documentation in accordance with workplace procedures 4.6 Secure work area in accordance with task requirements

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret installation documentation
- Writing skills to record basic information in workplace records

- Oral communication skills to use questioning and active listening when interacting with supervisor
- Numeracy skills to interpret numerical data in installation plans and take measurements.
- Learning skills to seek and use advice from supervisor to improve own work.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFKB2002 Provide assistance in cabinet installation.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFKB2004 Provide assistance in cabinetry installation

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- assist with cabinetry installation tasks on 2 different occasions and sites under supervision, including:
  - laying out, assembling and fixing components
  - quality checking and defect identification and rectification.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work health and safety requirements
  - features of cabinets and their components:
    - cabinet sections
    - door and drawer systems
    - drawer runners and slides
    - handles
    - hinges, runners and latches
    - legs, plinths and kickboards
    - locks
- hand and power tools typically required for cabinet assembly and fixing
- personal protective equipment (PPE) required for cabinet assembly and fixing
- joining methods for cabinet assembly and situations when each is used:
  - screws and hinges
  - adhesives
  - patented devices
  - connectors
- cabinetry fixing methods and situations when each is used:
  - glue
  - staples

- bolts
- screws
- wall plugs
- post-installation quality checking procedures
- common defects and how to resolve them:
  - alignment
  - levelling
- procedures for maintaining workplace records for cabinetry installation.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - installation site
  - installation tools and equipment, including PPE, required for performance evidence
  - cabinetry and components to be installed
  - site and workplace procedures
  - installation documentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFKB3012 Plan kitchen and bathroom projects

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to plan kitchen and bathroom renovation and new-build projects, including sequencing of cabinetry installation and other work.

Workers with this competency include kitchen and bathroom designers, sales advisors and tradespeople involved in kitchen and bathroom construction at different stages of the process.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Kitchens and Bathrooms

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine project scope	1.1 Seek information about the project through direct client communication or review of documentation 1.2 Establish scope and complexity of project from information provided 1.3 Establish key people and organisations to be involved in the project and their respective roles and responsibilities
2. Assess individual work requirements	2.1 Determine own work responsibilities from review of project information 2.2 Agree communication lines and protocols with individuals whose role intersects with, and impacts on, own responsibilities 2.3 Confirm and document detailed sequencing details with others involved in the project
3. Plan work	3.1 Develop and document a project schedule that reflects work

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	requirements 3.2 Address the contingencies involved in project sequencing in consultation with others 3.3 Confirm and communicate work schedule to others involved in the project in a timely manner

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret work documentation
- Writing skills to communicate project sequence
- Oral communication skills to liaise with others working on project

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFKB3011 Plan kitchen and bathroom projects.

## Links

Companion Volume implementation guides are found in VETNet --

# Assessment Requirements for MSFKB3012 Plan kitchen and bathroom projects

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- planned and documented the work process for 3 different projects, 1 of which must be a kitchen and 1 of which must be a bathroom.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- roles and responsibilities of those typically involved in kitchen and bathroom projects, and their involvement at different stages of the project, including at least 7 of the following:
  - architects
  - colour consultants
  - designers
  - material and component suppliers
  - builders
  - cabinetmakers
  - electricians
  - flooring specialists
  - glaziers
  - painters
  - plumbers / gas fitters
  - stonemasons
  - tilers
  - waterproofers
- key stages and sequencing of kitchen and bathroom projects and what each stage involves:
  - concept design
  - design specification
  - planning approval
  - technical site assessment/site measure

- demolition
- construction:
  - services
  - waterproofing
  - installation
- differences between renovation and new build projects
- project planning and implementation, including:
  - sequence of operations
  - budget
  - timelines
  - allocation and delivery of resources
  - contingencies
- features of cabinets and components commonly used in kitchen and bathroom projects, including manufacturing methodologies
- supply chains for kitchen and bathroom components and materials.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - project documentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFPP3010 De-frame artwork

### Modification History

Release 1. Supersedes and is equivalent to MSFPP3001 De-frame artwork.

### Application

This unit describes the skills and knowledge required to dismantle and remove artwork from frames, including the sorting, recording and documentation of original items.

This unit applies to picture framers who de-frame items in different media for the purposes of repair, restoration or re-framing. They use discretion, judgement and specialised knowledge.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Picture Framing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Read work order and identify de-framing requirements 1.2 Identify and follow work health and safety requirements throughout the work 1.3 Select and prepare a safe and suitable work area to de-frame, sort and protect the items 1.4 Examine item in terms of composition, condition and components and determine required process 1.5 Select tools and equipment that match construction and fastener type and check for quality, serviceability and safety prior to use 1.6 Determine dismantling sequence and handling techniques based on

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	nature of the item
2. Dismantle artwork	2.1 Dismantle original frame to the extent required in the work instructions using appropriate tools and procedures 2.2 Remove and store labels, fasteners and attachments 2.3 Separate, protect, tag and store components following workplace procedures 2.4 Examine condition of de-framed object and note details for the work order and condition report 2.5 Identify, collate and file relevant historical information
3. Complete work	3.1 Mark completed work for identification and store in accordance with workplace procedures 3.2 Identify and store items for recycling in accordance with workplace procedures 3.3 Clean work area and safely dispose of rubbish 3.4 Accurately complete required workplace documentation 3.5 Check, clean and store tools and equipment in accordance with workplace procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFPF3001 De-frame artwork.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFPF3010 De-frame artwork

## Modification History

Release 1. Supersedes and is equivalent to MSFPF3001 De-frame artwork.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- de-framed and documented 5 artwork items that include:
  - an object
  - a textile
  - a work on paper
  - a canvas.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work flow process for dismantling of framed items
- different reasons for de-framing artwork and how the scope of work may vary
- safety considerations and requirements when de-framing, including personal protective equipment
- frame construction techniques, materials and processes
- techniques for de-framing artwork, the types of problems that can occur and how to respond
- mathematical procedures for estimation and measurement
- functions, features and safe use of tools used to de-frame artwork:
  - cutting blades
  - hand-operated tools
  - pincers
  - pliers and marking out tools
  - screwdrivers
- documentation requirements for de-framing, including recording for reference all components and their positioning
- potential effects of the de-framing process on the artwork and liabilities and obligations
- artwork conservation handling techniques and practices.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workspace equipped with:
    - tools and equipment to complete de-framing tasks in the Performance Evidence
    - personal protective equipment
  - work orders and condition reports.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFPT4000 Select and use materials for piano repair and manufacture

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to distinguish between and select materials used to manufacture or repair pianos.

This unit applies to piano technologists who work in accordance with established procedures, using discretion, judgement and problem-solving to apply and communicate technical solutions to resolve predictable and unpredictable issues. They use factual, technical and theoretical knowledge to identify, analyse, compare and act on information from a range of sources.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Piano Technology

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine material requirements	1.1 Analyse characteristics of timber, metal and synthetic materials used in piano construction to determine structural and aesthetic requirements 1.2 Review, confirm and clarify client requirements to support materials decisions
2. Select and use fasteners	2.1 Determine job requirements for fasteners, including design, colour, finish process and quality, from work documentation and verbal instructions 2.2 Apply fasteners in accordance with workplace procedures

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	2.3 Set up worksite to meet task requirements, including preparing required material and selecting holding and supporting equipment 2.4 Place or support work in position for fastener application 2.5 Select tools and attach fasteners in accordance with their safety and effecting intended purposes 2.6 Identify and follow work health and safety requirements
3. Select and use adhesives	3.1 Select adhesives in accordance with job requirements 3.2 Set up worksite to meet task requirements, including preparing required materials and selecting holding and supporting equipment 3.3 Place or support work in position for adhesive application 3.4 Identify and follow work health and safety requirements including those that apply to safe application of adhesives 3.5 Apply adhesives using required clamping techniques
4. Determine hardware needs	4.1 Assess type, preparation, application and durability of surface coatings used for interior and exterior finishing on piano components 4.2 Use information to determine hardware needs for piano construction and repair
5. Clean up work area	5.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures 5.2 Clean work area, safely dispose of rubbish and identify items for recycling in accordance with workplace procedures and environmental standards 5.3 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate factual information in familiar workplace documents
- Numeracy skills to measure and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## **Unit Mapping Information**

Release 1. Supersedes and is not equivalent to MSFPT3002 Select materials for piano repair and manufacture.

## **Links**

Companion Volume Implementation Guides are found in VETNet -

# Assessment Requirements for MSFPT4000 Select and use materials for piano repair and manufacture

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- select and use at least three types of fasteners and use three different adhesives to make piano repairs.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace standards, requirements, policies and procedures for selecting materials for piano repair and manufacture
- types, characteristics, uses, limitations and preparation of the following materials, tools, equipment and hardware used in piano repair and manufacture, and where relevant their safe use, operation and maintenance:
  - timber materials, including:
    - spruce
    - ebony
    - beech
    - birch
    - hardwood
    - softwood
    - veneers
    - chipboard
    - medium density fibreboard (MDF)
  - characteristics of piano timbers, including:
    - density
    - moisture content
    - grain
    - shrinkage
    - knots
  - holding and support techniques, including:

- portable workbench
- clamps
- vices
- gripper mats
- clamping tools and techniques, including:
  - sash
  - G clamp
  - spring
  - pipe
- plastic or synthetic materials, including:
  - keys
  - bushings
  - damper head
  - damper flanges
  - hammer butt
  - jack
  - jack flange
  - capstan
- felts including synthetic and wool
- natural materials including ivory and leather
- metals including:
  - aluminium
  - steel
  - solders
  - cast iron
  - brass
- fasteners including:
  - screws (head, slot, machine and thread types)
  - nails (panel pins)
- adhesives including:
  - animal (horse and fish)
  - polyvinyl chloride (PVC)
  - contact
  - epoxy
  - casein
  - latex
- surface coatings including:
  - shellack
  - single pack
  - polyurethane (two pack)

- nitro-cellulose and pre-catalysed lacquers
- woodgrain fillers
- stains
- oils
- enamels
- acrylics
- finishes including:
  - high gloss
  - gloss
  - satin
  - matt
  - limed
  - pigmented
- hardware including:
  - locks
  - hinges (butt and escutcheon inserts)
  - sliding rollers/runners
  - knobs
  - handles
  - finger guards
  - castors
- structural requirements including:
  - hardness
  - density
- aesthetic requirements including:
  - growth rings
  - veneers
  - medullary rays
  - colour
  - grain patterns
- how to identify and resolve routine and non-routine problems
- set-up and operation of tools and equipment used to repair and manufacture pianos
- storage systems and labelling, especially for hazardous materials
- procedures for recording, reporting and maintaining workplace records and information
- work health and safety requirements related to materials used in piano manufacture and repair.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - pianos for repair
  - hand and power tools
  - repair materials
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFPT4001 Provide advice to customers on piano tuning and repair

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to assess piano tuning and repair requirements, liaise with the customers and provide advice and accurate quotations for repair and tuning work.

This unit applies to piano technologists who work in accordance with established procedures, using discretion, judgement and problem-solving to apply and communicate technical solutions to resolve predictable and unpredictable issues. They use factual, technical and theoretical knowledge to identify, analyse, compare and act on information from a range of sources.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Piano Technology

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish customer requirements	1.1 Obtain initial information about tuning and repair requirements from workplace and customer information 1.2 Use questioning and active listening techniques to clarify customer needs and perceived issues 1.3 Provide feedback to customer to ensure correct interpretation of requirements

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Assess piano	2.1 Remove piano case parts and stored safely away from instrument 2.2 Identify and record piano faults based on inspection of instrument 2.3 Determine nature and scope of repairs required to rectify faults from assessment 2.4 Determine required frequency of tuning based on industry recommendations and advise customer on conditions that may affect tuning stability 2.5 Reassemble piano case parts after assessment to return to original state
3. Provide customer with recommendations	3.1 Advise customer of recommendations for tuning and repair 3.2 Provide customer with options regarding priority of repairs to support informed decision 3.3 Explain and discuss options about materials used in repairs to facilitate customer understanding of available products and services
4. Present quotation to customer	4.1 Agree and accurately document customer requirements 4.2 Prepare and document quotation that includes accurate breakdown of all relevant costs 4.3 Provide information that includes advice on terms and conditions in accordance with workplace procedures 4.4 Obtain customer approval for work in accordance with workplace practices

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to estimate costs and make calculations to establish final price of work.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFPT3016 Provide advice to customers on piano tuning and repair.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFPT4001 Provide advice to customers on piano tuning and repair

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- assess 3 different pianos and provide advice and an accurate quotation for tuning and/or repair work for each of the pianos.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types, characteristics, uses, limitations and preparation of materials and equipment used in piano repair and manufacture
- piano tuning and repair terminology
- options available to customers for tuning and repairing pianos, including different materials
- factors that affect the frequency of piano tuning required:
  - condition and age of piano
  - amount of use of the piano
  - quality of the piano
  - environmental considerations:
    - internal and external humidity changes
    - piano position in home or other location
    - air conditioning and heating
    - seasonal temperature and humidity changes
- typical faults and items requiring repair and actions required:
  - worn, loose or broken action parts or keyboards
  - worn or broken pedal systems
  - tuning instability
  - cracks or delamination of bridges, ribs and soundboards
  - case faults
- required inclusions for customer quotations:
  - progressive listing of repair points in an orderly format

- all costs – materials, labour, shipping of parts, potential travel expenses
- statement of warranty terms
- statement of payment terms, including deposit
- estimation of the time the instrument will be out of service.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - pianos for assessment
  - customers
  - tools required for piano assessment and disassembly/reassembly

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFPT4002 Research and apply information about piano technology

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the ability to research and apply knowledge of piano technology to tuning, maintenance, repair and customer advice tasks. It includes knowledge of piano types, piano structures and materials, and the historical evolution of piano technology.

Piano technologists with this competency use discretion, judgement and problem-solving to identify, communicate and implement technical solutions based on an understanding of piano history, construction, and technology.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Piano Technology

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Research historical and contemporary aspects of piano technology	1.1 Identify credible sources of information about piano technology and history 1.2 Source and review information about historical and contemporary piano technology and its relevance to current scope of work 1.3 Establish the contemporary role of piano technicians from research
2. Apply research to work	2.1 Analyse construction of piano to determine work required 2.2 Assess major systems and their parts and functions before commencing work 2.3 Distinguish playing mechanisms and potential implications for

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	tuning and repair 2.4 Select work practices that are suited to age and style of piano being tuned or repaired
3. Maintain knowledge for piano technology work	3.1 Identify opportunities for ongoing development of knowledge to support work in piano technology 3.2 Incorporate updated knowledge and learning into day-to-day work activities

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to source and interpret diverse types of unfamiliar information
- Technology skills to use digital media for research.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFPT3001 Apply piano industry knowledge and work techniques.

## Links

Companion Volume Implementation Guides are found in VETNet -

# Assessment Requirements for MSFPT4002 Research and apply information about piano technology

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- source and research information from 3 different sources on the following:
  - traditional and contemporary upright and grand piano design and the variety of mechanisms used in pianos and how these affect piano technology work
- apply this knowledge to the planning and implementation of 2 different piano tuning or repair jobs.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- sources of credible information about piano technology
- types, characteristics, uses, limitations and preparation of materials and equipment used in piano tuning and repair
- original keyboard instrument types and their features, including:
  - zither
  - clavichord
  - harpsichord
  - forte piano
  - piano
- different periods of keyboard instrument development, including:
  - antique (1700–1850)
  - Victorian (1850–1900)
  - modern (1900–2000)
  - current (2000 onwards)
- types of pianos, including:
  - vertical:
    - upright
    - spinet
    - console

- player
- grand:
  - baby (4'6"-6')
  - professional (6'-7'6")
  - concert (7'6"-9'+)
  - square
- piano infrastructure features, including systems:
  - the case
  - timing pins
  - soundboard and bridges
  - strings
  - pinblock and tuning pins
  - keys and actions
    - actions
    - soundboard/bridges
    - strings
    - structural
- terms used to describe piano components and systems
- facets of role of piano technicians, including:
  - quotations
    - tuning
    - repairs
    - rebuilding
    - restoration
    - polishing
    - piano moving
    - selling
    - advice on purchases
  - areas of change that affect the piano technician role, including:
    - restriction to tuning or repairs only
    - less or more restoration
    - less or more major repairs
    - increased use of technology in tuning process
- established lines of communication and protocols for piano technologists and their customers
- work health and safety requirements that impact the piano technician role.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - upright or grand pianos
  - information technology for research purposes workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume Implementation Guides are found in VETNet -

# MSFPT4003 Repair piano actions, keys and pedals

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to repair piano actions, keys and pedals.

Piano technologists with this competency follow established procedures, using discretion, judgement and problem-solving to apply and communicate technical solutions to resolve predictable and unpredictable issues.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Piano Technology

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare for repairing actions, keys and pedals	<p>1.1 Analyse and confirm job requirements with personnel, customer or from workplace documentation</p> <p>1.2 Identify and follow work health and safety requirements including physical and ergonomic needs</p> <p>1.3 Establish and maintain communication with others involved with the work to ensure efficient workflow, coordination, personnel cooperation and safety in accordance with workplace procedures</p> <p>1.4 Select tools and equipment consistent with task needs, inspect for serviceability and safety, and repair any faults or report in accordance with workplace procedures</p> <p>1.5 Select materials required to repair piano actions, keys and pedals in accordance with job requirements</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Repair piano actions, keys and pedals	2.1 Use required tools and equipment to remove or dismantle actions and keys 2.2 Remove faulty or damaged parts from actions, keys and pedals 2.3 Re-centre action as required to support repair 2.4 Select materials for replacement felts and leathers and cut and glue to action parts 2.5 Replace faulty or damaged parts in accordance with manufacturer recommendations and workplace procedures 2.6 Monitor quality of the repair process in accordance with workplace quality procedures
3. Clean up work area	3.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures 3.2 Clean work area, safely dispose of any waste and identify items for recycling in accordance with workplace procedures and environmental standards 3.3 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate factual information in familiar workplace documents
- Numeracy skills to measure and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFPT3003 Repair piano actions, keys and pedal.

## Links

Companion Volume Implementation Guides are found in VETNet -

# Assessment Requirements for MSFPT4003 Repair piano actions, keys and pedals

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- repair a minimum of two actions, keys and pedals in at least one upright or one grand piano.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace standards, requirements, policies and procedures for repairing upright and grand piano actions, keys and pedals
- types, characteristics, uses, limitations and preparation of materials and equipment used in piano repair and manufacture
- typical faults and or parts that may be damaged, including:
  - actions:
    - broken damper springs
    - faulty hammer heads and shanks
    - faulty hardware
  - keys:
    - broken keys
    - discoloured keys
    - faulty key leads
  - pedals:
    - loose/worn pedal caps
    - worn pedal felt
    - damaged trap work
  - broken pedals
- tasks involved in recentring action parts, including:
  - identifying faulty centre pins
  - extracting faulty centre pins
  - re-bushing flanges

- replacing centre pins
- replacing flanges
- types of tools and equipment used to repair actions, keys and pedals and procedures for their safe use, operation and maintenance, including:
  - knives
  - guillotine
  - measuring equipment
  - centering equipment
  - glue brushes and sticks
  - glue pots
- uses and locations of felts and leathers:
  - felts
    - box cloth
    - cushion felt
    - check felt
    - hammer-rest baize
    - backtouch baize
    - name board felt
    - celeste-rail felt
    - bushing felt
    - damper felts
  - leathers:
    - doeskin
    - pigskin
    - sheepskin
    - kangaroo skin
    - split skin
- problem identification of actions, keys and pedals and resolution
- set-up and operation of tools and equipment used for repairing actions, keys and pedals
- procedures for recording, reporting and maintaining workplace records and information
- best physical and ergonomic approaches to promote muscle control and avoid fatigue, including:
  - standing or seated according to type of piano and height of individual
  - evenly distributing body weight between both feet while standing to reduce fatigue
  - use a resting arm, where available, to aid control during tuning and reduce tiredness
- work health and safety requirements for piano repair.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - pianos to be repaired as specified in performance evidence
  - hand and power tools
  - repair materials
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFPT4004 Regulate actions, keys and pedals of upright pianos

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to regulate upright piano actions, keys and pedals, including adjusting action rail, striking distance, hammer running alignment, key depth, lost motion and set off; checking distance, damper spoon bending, damper stop rail, jack stop rail and sustain, soft, mute and sostenuto pedals.

Piano technologists with this competency established procedures, using discretion, judgement and problem-solving to apply and communicate technical solutions to resolve predictable and unpredictable issues.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Piano Technology

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare for regulating actions, keys and pedals	1.1 Analyse and confirm job requirements with personnel, customer or from workplace documentation 1.2 Identify and follow work health and safety requirements including physical and ergonomic needs 1.3 Establish and maintain communication with others involved with work to ensure efficient workflow, coordination, personnel cooperation and safety 1.4 Analyse written instructions and apply to job requirements 1.5 Select tools and equipment consistent with needs of job, inspect for serviceability and safety, and repair any faults or report in accordance

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	with workplace procedures
2. Align action components	2.1 Inspect and adjust action rail to ensure optimal alignment 2.2 Adjust striking distance to industry specifications 2.3 Inspect and adjust hammer running and angling to ensure optimal alignment 2.4 Align wippen in accordance with workplace procedures
3. Regulate keyboard	3.1 Level, square and space keys 3.2 Inspect and make required adjustments to key depth
4. Regulate keyboard and action	4.1 Assess and make required adjustments to lost motion to achieve optimal key movement efficiency 4.2 Assess and make required adjustments to set-off to achieve optimal key control 4.3 Assess and make required adjustments to checking distance to achieve optimal key control 4.4 Assess and regulate dampers to industry specifications 4.5 Inspect and adjust damper spoon bending to industry specifications 4.6 Inspect and adjust damper stop rail and jack stop rail to industry specifications
5. Assess and adjust pedals	5.1 Inspect and adjust sustain pedal to lift when pedal is one third through its motion 5.2 Assess and make required adjustments to soft pedal to operate in accordance with acceptable lost motion 5.3 Assess and make required adjustments mute pedal so hammers clear felt in rest position but strike felt in lockdown position 5.4 Assess and make required adjustments to sostenuto pedal so relevant dampers are locked in position when note is played
6. Make final check and inspection	6.1 Inspect upright piano for playability and performance against expected standards 6.2 Make further required adjustments to actions, keys and pedals to achieve optimal outcomes
7. Clean up work area	7.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>7.2 Clean work area, safely dispose of rubbish and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>7.3 Complete required workplace records</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFPT3006 Regulate actions, keys and pedals of upright pianos.

## Links

Companion Volume Implementation Guides are found in VETNet -

# Assessment Requirements for MSFPT4004 Regulate actions, keys and pedals of upright pianos

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- regulate actions, keys and pedals in at least 3 upright pianos.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace standards, requirements, policies and procedures for regulating upright piano actions, keys and pedals
- types, characteristics, uses, limitations and preparation of materials and equipment used in piano regulating
- types of tools and equipment used to regulate actions, keys and pedals and procedures for their safe use, operation and maintenance, including:
  - capstan regulator
  - set off regulator
  - touch/dip block
  - rule
  - regulating buttons
  - damper regulator
  - key easing pliers
  - wire bender
  - screwdriver
- problem identification of actions, keys and pedals and resolution
- set-up and operation of tools and equipment used for regulating actions, keys and pedals
- procedures for recording, reporting and maintaining workplace records and information
- best physical and ergonomic approaches to promote muscle control and avoid fatigue, including:
  - standing or seated according to type of piano and height of individual
  - evenly distributing body weight between both feet while standing to reduce fatigue
  - use a resting arm, where available, to aid control during tuning and reduce tiredness

- work health and safety requirements for piano tuning.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - upright pianos for tuning
  - hand and power tools
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFPT4005 Regulate actions, keys and pedals of grand pianos

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to regulate grand piano actions, keys and pedals, including adjusting glide bolts, striking distance, hammer running alignment, key height and depth, set off and drop; checking distance, damper regulation damper stop rail, jack and repetition lever adjustment, sustain, soft and sostenuto pedals.

This unit applies to piano technologists who work in accordance with established procedures, using discretion, judgement and problem-solving to apply and communicate technical solutions to resolve predictable and unpredictable issues.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Piano Technology

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare for work	<p>1.1 Analyse and confirm job requirements with personnel, customer or from workplace documentation</p> <p>1.2 Identify and follow work health and safety requirements including physical and ergonomic needs</p> <p>1.3 Establish and maintain communication with others involved with work to ensure efficient workflow, coordination, personnel cooperation and safety</p> <p>1.4 Analyse written instructions and apply to job requirements</p> <p>1.5 Select tools and equipment consistent with needs of job, inspect for serviceability and safety, and repair any faults or report in accordance</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	with workplace procedures
2. Assess and align action components	2.1 Determine correct action operation by setting trial regulation standards 2.2 Inspect and adjust action rail to ensure optimal alignment 2.3 Inspect and adjust hammer running and angling to ensure optimal alignment 2.4 Align wippen in accordance with workplace procedures 2.5 Bed action to key frame and bed key frame to key bed in accordance with workplace procedures
3. Regulate keys	3.1 Level, square and space keys in accordance 3.2 Inspect and make required adjustments to key depth
4. Regulate actions	4.1 Assess and make required adjustments to jack-to-roller alignment and repetition lever height to achieve optimal note repetition 4.2 Inspect and adjust striking distance to industry specifications 4.3 Assess and make required adjustments to let-off to achieve optimal key control 4.4 Assess and make required adjustments to checking distance to achieve optimal key control 4.5 Assess and make required adjustments to repetition spring to achieve optimal note repetition 4.6 Assess and make required adjustments to hammer drop to industry specifications 4.7 Inspect and regulate dampers to industry specifications
5. Assess and adjust pedals	5.1 Inspect and adjust sustain pedal to lift when pedal is one third through its motion 5.2 Assess and make required adjustments to soft pedal to operate in accordance with acceptable lost motion 5.3 Assess and make required adjustments mute pedal so hammers clear felt in rest position but strike felt in lockdown position 5.4 Assess and make required adjustments to sostenuto pedal so relevant dampers are locked in position when note is played
6. Make final check and	6.1 Inspect grand piano for playability and performance against expected

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
inspection	standards 6.2 Make further required adjustments to actions and pedals to achieve optimal outcomes
7. Clean up work area	7.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures 7.2 Clean work area, safely dispose of rubbish and identify items for recycling in accordance with workplace procedures and environmental standards 7.3 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFPT3007 Regulate actions, keys and pedals of grand pianos.

## Links

# Assessment Requirements for MSFPT4005 Regulate actions, keys and pedals of grand pianos

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- regulate actions, keys and pedals in at least three grand pianos.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace standards, requirements, policies and procedures for regulating grand piano actions, keys and pedals
- types, characteristics, uses, limitations and preparation of materials and equipment used in piano regulating
- types of tools and equipment used to regulate actions, keys and pedals and procedures for their safe use, operation and maintenance, including:
  - capstan regulator
  - set off regulator
  - touch/dip block
  - rule
  - regulating buttons
  - damper regulator
  - key easing pliers
  - wire bender
  - screwdriver
- tasks required to regulate dampers, including:
  - damper lift
  - damper stop rail
  - damper travel
  - alignment to strings
  - damper spacing
  - damper guide bushings
- problem identification of grand piano actions, keys and pedals and resolution

- set-up and operation of tools and equipment used for regulating actions, keys and pedals
- procedures for recording, reporting and maintaining workplace records and information
- best physical and ergonomic approaches to promote muscle control and avoid fatigue, including:
  - standing or seated according to type of piano and height of individual
  - evenly distributing body weight between both feet while standing to reduce fatigue
  - use a resting arm, where available, to aid control during tuning and reduce tiredness
- work health and safety requirements for piano tuning.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - grand pianos
  - hand and power tools
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFPT4006 Apply piano tuning theory and basic acoustics

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to apply piano tuning theory and basic acoustics to piano tuning tasks.

Piano technologists with this competency follow established procedures, using discretion, judgement and problem-solving to apply and communicate technical solutions to predictable and unpredictable issues.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Piano Technology

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Analyse existing acoustics and apply knowledge to optimise	1.1 Analyse existing piano acoustics and apply elements of basic acoustics to piano tuning tasks to achieve optimal acoustics 1.2 Analyse existing piano acoustics and apply acoustical laws of sounding strings to piano tuning tasks to achieve optimal acoustics
2. Analyse existing tuning and apply knowledge to optimise	2.1 Assess and analyse existing piano tuning against piano tuning theory 2.2 Apply elements of piano tuning theory to adjust piano tuning 2.3 Assess effect of inharmonicity on piano tuning and make required adjustments
3. Analyse existing	3.1 Analyse existing scales and apply elements of musical scale theory

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
scales pitching and apply knowledge to optimise	<p>to piano tuning tasks</p> <p>3.2 Assess existing behaviour of piano strings and apply proper dimensions to piano tuning to achieve optimal behaviour</p> <p>3.3 Assess existing string behaviour against laws of strings and make required adjustment to optimise behaviours</p> <p>3.4 Apply optimal musical scales tuning to piano tuning tasks</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFPT3008 Apply piano tuning theory and basic acoustics.

## Links

Companion Volume implementation guides are found in VETNet -

## Assessment Requirements for MSFPT4006 Apply piano tuning theory and basic acoustics

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- analyse existing acoustics, tuning and scales and apply basic acoustics, piano tuning theory and musical scale theory to tuning on at least two upright pianos.

### Knowledge Evidence

There must be evidence the candidate has knowledge of:

- the physics and features of basic acoustics, including:
  - sound waves
  - beats
  - frequencies
  - harmonics
  - cycles
  - partials
  - overtones
  - nodes
  - fundamentals
  - sine waves
  - intonation
  - transients
  - cents
  - commas
  - compound tones
  - inharmonicity
- the physics and features of piano tuning theory, including:
  - how wire vibrates
  - what happens when two or more wires vibrate simultaneously
  - how vibrations are organised into a tuning scale

- how vibrations are related mathematically
- pitch, beat rates, intervals and octave stretching
- musical scale theory, including:
  - diatonic scale
  - equal temperament
  - mean-tone
- laws of strings including Mersenne's laws, including:
  - First law
  - Third law
  - Combined law
  - Taylor's Formula
  - need for wrapped strings
- problem identification for acoustics and tuning, and resolution.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - upright or grand pianos
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFPT4007 Control tuning hammers

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to control tuning hammers by accurately moving the tuning pins in very small increments.

This unit applies to piano technologists who work in accordance with established procedures, using discretion, judgement and problem-solving to apply and communicate technical solutions to resolve predictable and unpredictable issues. They use factual, technical and theoretical knowledge to identify, analyse, compare and act on information from a range of sources.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Piano Technology

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare for using tuning hammers	1.1 Analyse and confirm job requirements with personnel, customer or from workplace documentation 1.2 Identify and follow work health and safety requirements including physical and ergonomic needs 1.3 Establish and maintain communication with others involved with work to ensure efficient workflow, coordination, personnel cooperation and safety 1.4 Analyse written instructions and apply to job requirements 1.5 Select tools and equipment consistent with needs of job, inspect for serviceability and safety, and repair any faults or report in accordance

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	with workplace procedures
2. Set pin in specified position	2.1 Set pin at desired pitch utilising a pitch standard, within accuracy constraints to $\pm 0.5$ cents 2.2 Strike key using stabilising blows 2.3 Demonstrate coordinated motor and auditory reflexes throughout tuning 2.4 Tune and stabilise strings using appropriate techniques
3. Clean up work area	3.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures 3.2 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 3.3 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Reading skills to interpret familiar workplace procedures and work documentation

- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to work with numerical concepts involved in piano tuning.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFPT3009 Develop control of tuning hammers.

## Links

# Assessment Requirements for MSFPT4007 Control tuning hammers

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- set tuning pins and tune and stabilise strings using tuning hammers on upright or grand pianos on 3 occasions.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace standards, requirements, policies and procedures for tuning pianos
- piano tuning process
- types, characteristics, uses, limitations and preparation of materials and equipment used in piano tuning
- types of tools and equipment used to tune pianos and procedures for their safe use, operation and maintenance, including:
  - pitch standard
  - tuning lever/hammer
  - temperament strip
  - mutes and wedges
  - tip wrench
  - tuning tips and heads
- pitch standards, including:
  - piano
  - electronic keyboard
  - electronic tuning device (ETD)
  - tuning fork
- hammer techniques, including:
  - selection of tuning tip and angle
  - jerking movements
  - positioning hammer on pin at correct angle to avoid bending of tuning pin
- stabilisation techniques, including:

- use of firm key blows in conjunction with placement of pin
- calculation of string stretch
- problem identification for tuning hammer work and resolution
- set-up and operation of tools and equipment used for tuning pianos
- procedures for recording, reporting and maintaining workplace records and information
- best physical and ergonomic approaches to promote muscle control and avoid fatigue, including:
  - standing or seated according to type of piano and height of individual
  - evenly distributing body weight between both feet while standing to reduce fatigue
  - use a resting arm, where available, to aid control during tuning and reduce tiredness
- work health and safety requirements for piano tuning.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - pianos for tuning
  - materials used in the tuning pianos
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFPT4008 Pitch raise a piano

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to identify the need for pitch raising (when a piano is more than one cycle flat or sharp from desired standard), and pitch raise a piano prior to the tuning process by calculating and assessing the ability of an upright or grand piano to achieve the desired pitch, including assessment of overpull or stretch of strings.

This unit applies to piano technologists who work in accordance with established procedures, using discretion, judgement and problem-solving to apply and communicate technical solutions to resolve predictable and unpredictable issues. They use factual, technical and theoretical knowledge to identify, analyse, compare and act on information from a range of sources.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Piano Technology

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare for pitch raising	<p>1.1 Analyse and confirm job requirements with personnel, customer or from workplace documentation</p> <p>1.2 Identify and follow work health and safety requirements including physical and ergonomic needs</p> <p>1.3 Establish and maintain communication with others involved with work to ensure efficient workflow, coordination, personnel cooperation and safety</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.4 Analyse written instructions and apply to job requirements 1.5 Select tools and equipment consistent with needs of job, inspect for serviceability and safety, and repair any faults or report in accordance with workplace procedures
2. Assess suitability of piano for pitch raise	2.1 Assess components used in pitch raising for suitability 2.2 Analyse distance from target pitch 2.3 Calculate overpull/stretch required to achieve target pitch 2.4 Establish required pitch standard
3. Pitch raise piano	3.1 Tune strings in accordance with required process 3.2 Pitch raise to achieve an accuracy of $\pm 5$ cent per note 3.3 Demonstrate correct tuning hammer technique to achieve required standard
4. Clean up work area	4.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures 4.2 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 4.3 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to work with numerical concepts involved in piano tuning.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFPT3010 Pitch raise a piano.

# Assessment Requirements for MSFPT4008 Pitch raise a piano

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- tune a minimum of three sets of strings on at least one upright or one grand piano
- pitch raise a minimum of three times on at least one upright or one grand piano.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace standards, requirements, policies and procedures for regulating piano pitch
- types, characteristics, uses, limitations and preparation of materials and equipment used in piano regulating
- types of tools and equipment used to pitch raise and procedures for their safe use, operation and maintenance, including:
  - tuning fork
  - tuning lever/hammer
  - temperament strip
  - mutes and wedges
  - tip wrench
  - tuning tips and heads
  - pitch standard
- components involved in pitch raising a piano, including:
  - strings
  - wrest plank/tuning plank
  - frame
  - soundboard
  - bridges
- pitch standards, including:
  - piano
  - electronic keyboard
  - electronic tuning device (ETD)
  - tuning fork

- how to identify which tuning process is required, including:
  - for a small pitch raise, normal tuning sequence
  - for a significant pitch raise, fast tuning sequence followed by normal tuning sequence to achieve tuning stability problem identification of pitch and pitch raising and resolution
- set-up and operation of tools and equipment used for tuning pianos
- procedures for recording, reporting and maintaining workplace records and information
- best physical and ergonomic approaches to promote muscle control and avoid fatigue, including:
  - standing or seated according to type of piano and height of individual
  - evenly distributing body weight between both feet while standing to reduce fatigue
  - use a resting arm, where available, to aid control during tuning and reduce tiredness
- work health and safety requirements for piano tuning.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - pianos for tuning
  - tools and materials used in piano tuning
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFPT4009 Tune unisons aurally to a beatless condition

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to tune unisons aurally so they can achieve an even and accurate pitch. This may include the use of tuning hammers and stabilisation techniques.

This unit applies to piano technologists who work in accordance with established procedures, using discretion, judgement and problem-solving to apply and communicate technical solutions to resolve predictable and unpredictable issues. They use factual, technical and theoretical knowledge to identify, analyse, compare and act on information from a range of sources.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Piano Technology

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare for tuning unisons aurally	<p>1.1 Analyse and confirm job requirements with personnel, customer or from workplace documentation</p> <p>1.2 Identify and follow work health and safety requirements including physical and ergonomic needs</p> <p>1.3 Establish and maintain communication to ensure efficient workflows, coordination, personnel cooperation and safety</p> <p>1.4 Select tools and equipment consistent with needs of job, inspect for serviceability and safety, and repair any faults or report in accordance with workplace procedures</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Set a string	2.1 Aurally tune fundamental string to a pitch standard 2.2 Given an external pitch standard, match frequency of one string to that pitch to within $\pm .5$ cent 2.3 Stabilise tuned string using correct hammer techniques
3. Tune an adjacent string in unison to the fundamental string	3.1 Adjust pitch of unison string to fundamental string, employing stabilisation techniques, to beatless condition 3.2 Tune remaining strings in accordance with above process
4. Clean up work area	4.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures 4.2 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 4.3 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to work with numerical concepts involved in piano tuning.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFPT3011 Tune unisons aurally to a beatless condition.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFPT4009 Tune unisons aurally to a beatless condition

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- tune at least two unisons aurally on at least one upright or grand piano
- detect aurally the differences in frequency between strings within  $\pm .5$  cent without the aid of an electronic device where the fundamentals are matching with no audible interfering patterns, at least once.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace standards, requirements, policies and procedures for tuning pianos
- types, characteristics, uses, limitations and preparation of materials and equipment used in piano tuning
- types of tools and equipment used to regulate actions, keys and pedals and procedures for their safe use, operation and maintenance, including:
  - pitch standard
  - tuning lever/hammer
  - temperament strip
  - mutes and wedges
  - tip wrench
  - tuning tips and heads
- best physical and ergonomic approaches to promote muscle control and avoid fatigue, including:
  - standing or seated according to type of piano and height of individual
  - evenly distributing body weight between both feet while standing to reduce fatigue
  - use a resting arm, where available, to aid control during tuning and reduce tiredness
- pitch standards, including:
  - piano
  - electronic tuning device (ETD)
  - tuning fork

- techniques for using hammers, including:
  - selection of tuning tip and angle
  - jerking movements
  - positioning hammer on pin at correct angle to avoid bending of tuning pin
- stabilisation techniques, including:
  - use of firm key blows in conjunction with placement of pin
  - calculation of string stretch
- problem identification for tuning unisons and resolution
- set-up and operation of tools and equipment used for tuning pianos
- how to identify the fundamental string (the first string of a given note that is tuned to an external pitch standard) and the adjacent string
- how to recognise that in a bi-cord, the string selected can be either side of the fundamental, while in a tri-cord, three adjacent strings are tuned
- how to identify beatless condition where two strings are at the same frequency
- procedures for recording, reporting and maintaining workplace records and information
- work health and safety requirements for piano tuning.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - pianos for tuning
  - tools and materials used in piano tuning
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFPT4010 Tune octaves aurally to appropriate stretch

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to tune octaves aurally so they achieve an even and accurate pitch and then continue to tune strings while using hammer and stabilisation techniques.

This unit applies to piano technologists who work in accordance with established procedures, using discretion, judgement and problem-solving to apply and communicate technical solutions to resolve predictable and unpredictable issues. They use factual, technical and theoretical knowledge to identify, analyse, compare and act on information from a range of sources.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Piano Technology

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan for tuning octaves aurally	1.1 Analyse and confirm job requirements with personnel, customer or from workplace documentation 1.2 Identify and follow work health and safety requirements including physical and ergonomic needs 1.3 Establish and maintain communication to ensure efficient workflow, coordination, personnel cooperation and safety 1.4 Analyse written instructions and apply to job requirements 1.5 Select tools and equipment consistent with needs of job, inspect for serviceability and safety, and repair any faults or report in accordance with workplace procedures

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Tune the fundamental string aurally to a pitch standard	2.1 Given an external pitch standard, match frequency of one string to that pitch to within $\pm .5$ cent 2.2 Stabilise tuned string using hammer techniques
3. Match frequency of a string one octave above or below pitch standard	3.1 Assess pitch and make adjustments to pitch of string/octave above or below pitch standard 3.2 Utilise stabilisation techniques to retain tuning 3.3 Use 4th and 5th intervals to establish highest or lowest beatless condition 3.4 Match the overtone of primary note a fundamental octave up, or match fundamental of a primary note to 1st octave of one overtone lower 3.5 Use 10th, double octaves and minor 7th checks to verify tuning 3.6 Test intervals going up and down to ensure tuning meets industry standards 3.7 Tune remaining octaves in accordance with above process
4. Clean up work area	4.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures 4.2 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 4.3 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to work with numerical concepts involved in piano tuning.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFPT3012 Tune octaves aurally to appropriate stretch.

# Assessment Requirements for MSFPT4010 Tune octaves aurally to appropriate stretch

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- tune at least two octaves aurally on one upright or one grand piano
- detect aurally the differences in frequency between strings within  $\pm .5$  cent without the aid of an electronic device where the fundamentals are matching with no audible interfering patterns on at least one upright piano.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace standards, requirements, policies and procedures for tuning pianos
- types, characteristics, uses, limitations and preparation of materials and equipment used in piano tuning
- types of tools and equipment used to regulate actions, keys and pedals and procedures for their safe use, operation and maintenance, including:
  - pitch standard
  - tuning lever/hammer
  - temperament strip
  - mutes and wedges
  - tip wrench
  - tuning tips and heads
- pitch standards, including:
  - piano
  - electronic tuning device (ETD)
  - tuning fork
- hammer techniques, including:
  - selection of tuning tip and angle
  - jerking movements
  - positioning hammer on pin at correct angle to avoid bending of tuning pin
- stabilisation techniques, including:

- use of firm key blows in conjunction with placement of pin
- calculation of string stretch
- problem identification for tuning and stretch, and resolution
- set-up and operation of tools and equipment used for tuning pianos
- how to identify the fundamental string (the first string of a given note that is tuned to an external pitch standard) and the adjacent string
- how to recognise that in a bi-cord, the string selected can be either side of the fundamental, while in a tri-cord, three adjacent strings are tuned
- how to identify beatless condition where two strings are at the same frequency
- procedures for recording, reporting and maintaining workplace records and information
- best physical and ergonomic approaches to promote muscle control and avoid fatigue, including:
  - standing or seated according to type of piano and height of individual
  - evenly distributing body weight between both feet while standing to reduce fatigue
  - use a resting arm, where available, to aid control during tuning and reduce tiredness
- work health and safety requirements for piano tuning.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - pianos for tuning
  - tools and materials used in piano tuning
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFPT4011 Tune a temperament octave to produce an equally tempered scale

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to tune temperaments on both upright and grand pianos to produce an equally tempered scale. It may involve using a pitch standard to establish the start note.

This unit applies to piano technologists who work in accordance with established procedures, using discretion, judgement and problem-solving to apply and communicate technical solutions to resolve predictable and unpredictable issues. They use factual, technical and theoretical knowledge to identify, analyse, compare and act on information from a range of sources.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Piano Technology

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare for tuning temperaments	1.1 Analyse and confirm job requirements with personnel, customer or from workplace documentation 1.2 Identify and follow work health and safety requirements including physical and ergonomic needs 1.3 Establish and maintain communication with others involved with work to ensure efficient workflow, coordination, personnel cooperation and safety 1.4 Analyse written instructions and apply to job requirements 1.5 Select tools and equipment consistent with needs of job, inspect for

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	serviceability and safety, and repair any faults or report in accordance with workplace procedures
2. Tune temperament	2.1 Tune start note in temperament octave from established pitch reference 2.2 Tune temperament octave using 4th and 5th cycle, following a set order of notes 2.3 Confirm correct positions using 3rd and 6th checks individually and chromatically
3. Clean up work area	3.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures 3.2 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 3.3 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to work with numerical concepts involved in piano tuning.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

# Assessment Requirements for MSFPT4011 Tune a temperament octave to produce an equally tempered scale

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- tune at least two temperament octaves to produce an equally tempered scale on at least one upright or one grand piano.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace standards, requirements, policies and procedures for tuning pianos
- types, characteristics, uses, limitations and preparation of materials and equipment used in piano tuning
- types of tools and equipment used to regulate actions, keys and pedals and procedures for their safe use, operation and maintenance, including:
  - pitch standard
  - tuning lever/hammer
  - temperament strip
  - mutes and wedges
  - tip wrench
  - tuning tips and heads
- how to identify and work from the start note (the note in the temperament octave that corresponds to the note tuned from the pitch standard)
- how to identify and work from the pitch reference (the first note tuned on piano from pitch standard generally accepted as being A49/C52 or corresponding notes one octave below, which are A37/C40)
- how to identify and work with a temperate octave (notes F 33 through to F 45, with some temperaments spread over 1½ octaves)
- problem identification for temperate octaves and resolution
- set-up and operation of tools and equipment used for tuning pianos
- procedures for recording, reporting and maintaining workplace records and information
- best physical and ergonomic approaches to promote muscle control and avoid fatigue, including:

- standing or seated according to type of piano and height of individual
- evenly distributing body weight between both feet while standing to reduce fatigue
- use a resting arm, where available, to aid control during tuning and reduce tiredness
- work health and safety requirements for piano tuning.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - pianos for tuning
  - tools and materials used in piano tuning
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFPT4012 Tune a piano aurally and electronically

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to tune an upright and grand piano to a set level of accuracy within a specified timeframe and to an appropriate level of accuracy using aural or electronic tuning devices (ETD) that may include computer software or a hardware device. It applies in workplace and on-site environments for small- to large-scale enterprises.

This unit applies to piano technologists who work in accordance with established procedures, using discretion, judgement and problem-solving to apply and communicate technical solutions to resolve predictable and unpredictable issues. They use factual, technical and theoretical knowledge to identify, analyse, compare and act on information from a range of sources.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Piano technology

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare for tuning	1.1 Analyse and confirm job requirements with personnel, customer or from workplace documentation 1.2 Identify and follow work health and safety requirements including physical and ergonomic needs 1.3 Establish and maintain communication with others involved with work to ensure efficient workflow, coordination, personnel cooperation and safety 1.4 Analyse written instructions and apply to job requirements

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.5 Select tools and equipment consistent with needs of job, inspect for serviceability and safety, and repair any faults or report in accordance with workplace procedures
2. Dismantle piano	2.1 Determine required procedure for dismantling piano to meet job requirements 2.2 Dismantle piano to allow access to internal components during tuning process 2.3 Safely store all piano parts while performing tuning tasks in accordance with procedures
3. Tune piano	3.1 Accurately tune start note to a pitch standard 3.2 Assess and tune temperament octave F33-F45 to desired standard 3.3 Assess and tune octaves and unisons to desired standard in accordance with requirements 3.4 Use interval checks to assess accuracy throughout tuning process 3.5 Achieve stable tuning within industry-established timeframes without damage to piano components
4. Re-assemble piano	4.1 Assess and identify case parts and place for re-assembly 4.2 Reassemble case parts in accordance with workplace practices
5. Clean up work area	5.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures 5.2 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 5.3 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to work with numerical concepts involved in piano tuning.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## **Unit Mapping Information**

Release 1. Supersedes and is not equivalent to MSFPT3014 Tune a piano aurally and electronically within time and accuracy constraints.

## **Links**

# Assessment Requirements for MSFPT4012 Tune a piano aurally and electronically

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- tune 2 upright or grand pianos aurally and electronically.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace standards, requirements, policies and procedures for tuning pianos
- types, characteristics, uses, limitations and preparation of materials and equipment used in piano tuning
- types of tools and equipment used to tune pianos and procedures for their safe use, operation and maintenance, including:
  - pitch standard
  - tuning lever/hammer
  - temperament strip
  - mutes and wedges
  - tip wrench
  - tuning tips and heads
- procedures for dismantling upright and grand pianos:
  - upright piano:
    - removal of top front board and fall board
    - lift lid
  - grand piano:
    - removal of fall board and music disk
    - lift lid
- how to identify and the definitions of a start note:
  - the note in the temperament octave that corresponds to the note tuned from the pitch standard
  - the first note tuned on piano from pitch standard generally accepted as being A49/C52 or corresponding notes one octave below, which are A37/C40

- pitch standards, including:
  - piano
  - electronic tuning device
  - tuning fork
- interval checks to be used in assessing tuning, including:
  - thirds
  - fourths
  - fifths
  - sixths
  - sevenths
  - tenths
- common types of piano damage and methods to avoid causing them:
  - bent tuning pins
  - broken strings
  - elongated tuning pin holes
  - damaged bearings
- problem identification for tuning and resolution
- set-up and operation of tools and equipment used for tuning pianos
- procedures for recording, reporting and maintaining workplace records and information
- types of customer requirements and how these affect tuning activities, including:
  - level of playing required:
    - standard of pianist
    - time piano is used
  - environment
  - location of piano
  - pitch requirements
  - budget
- best physical and ergonomic approaches to promote muscle control and avoid fatigue, including:
  - standing or seated according to type of piano and height of individual
  - evenly distributing body weight between both feet while standing to reduce fatigue
  - use a resting arm, where available, to aid control during tuning and reduce tiredness
- work health and safety requirements for piano tuning.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
- pianos for tuning
- tools and materials used in piano tuning
- workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFPT4013 Voice a piano

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to voice a piano to change the tone from harsh to soft or soft to harsh, and to make the tone even after tuning. Work may include needling, reshaping and hardening hammers to change the tone.

This unit applies to piano technologists who work in accordance with established procedures, using discretion, judgement and problem-solving to apply and communicate technical solutions to resolve predictable and unpredictable issues. They use technical and theoretical knowledge to identify, analyse, compare and act on information from a range of sources.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Piano Technology

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare for voicing a piano	1.1 Analyse and confirm job requirements with personnel, customer or from workplace documentation 1.2 Identify work health and safety requirements including physical and ergonomic needs 1.3 Establish and maintain communication with others involved with work to ensure efficient workflow, coordination, personnel cooperation and safety 1.4 Select tools and equipment consistent with needs of job, inspect for serviceability and safety, and repair any faults or report in accordance with workplace procedures 1.5 Confirm that piano has been tuned and regulated to industry

	standards before voicing is commenced
2. Voice a piano	<p>2.1 Assess tone of piano to identify undesirable tonal qualities in consultation with customer or workplace documentation</p> <p>2.2 Reshape surface felt to ensure a clean and square striking surface</p> <p>2.3 Assess tonal effects and response and perform required adjustments to needling on to achieve desired tonal effects and to balance tonal response</p> <p>2.4 Reshape hammers after needling to ensure correct shape and surface texture</p> <p>2.5 Assess requirements for ironing or hardening hammers and make changes in accordance with workplace procedures</p> <p>2.6 Assess final tonal quality against customer requirements and make any required adjustments</p>
3. Clean up work area	<p>3.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures</p> <p>3.2 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>3.3 Complete required workplace records</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to work with numerical concepts involved in piano tuning.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is not equivalent to MSFPT3015 Voice a piano.

## Links

# Assessment Requirements for MSFPT4013 Voice a piano

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- voice at least one upright or grand piano.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace standards, requirements, policies and procedures for tuning and voicing pianos
- knowledge of piano tuning and regulation methodologies
- the nature of undesirable piano tonal qualities, including:
  - harsh/soft noise which may occur when there is a loose hammer head, loose centre pins or uneven level strings
  - string noises
  - false beats in strings
  - bright or metallic sound due to hard hammers
- needling techniques, including:
  - correct method of supporting the hammers to avoid damage to action centres
  - selecting the appropriate needling zones to achieve particular tonal effects
- hardening techniques, including:
  - lacquers
  - irons
  - collodion
- types, characteristics, uses, limitations and preparation of materials and equipment used in piano tuning and voicing
- types of tools and equipment used to tune and voice pianos and procedures for their safe use, operation and maintenance, including:
  - screwdrivers
  - voicing needles
  - voicing tools and blocks
  - hammer iron
  - lacquer and brush

- sandpaper
- hammer lifting tool
- tuning wedge
- string level tool
- string lifting tool
- problem identification for piano voicing and resolution
- set-up and operation of tools and equipment used for tuning pianos
- procedures for recording, reporting and maintaining workplace records and information
- best physical and ergonomic approaches to promote muscle control and avoid fatigue, including:
  - standing or seated according to type of piano and height of individual
  - evenly distributing body weight between both feet while standing to reduce fatigue
  - use a resting arm, where available, to aid control during tuning and reduce tiredness
- work health and safety requirements for piano tuning.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - pianos for tuning
  - tools and materials used in piano tuning
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFSF2015 Cut single layer fabrics

### Modification History

Release 1. Supersedes and is equivalent to MSFSF2001 Cut single layer fabrics

### Application

This unit of competency describes the skills and knowledge required to measure, mark out and cut single layer fabrics for the manufacture of curtains and soft furnishing accessories.

The unit applies to those in the furnishing industry cutting all types of single layer fabrics, including lining and interlining. It does not apply to cutting from patterns.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Unit Sector

Soft furnishing

### Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare to cut single layer fabrics	1.1	Identify job and equipment requirements from work order
	1.2	Select and lay out fabrics according work order and workplace procedures
	1.3	Inspect fabrics for flaws, design features affecting job requirements and required finish
	1.4	Select suitable scissors and blades and check prior to use for required sharpness, set, operation and safe condition
2. Undertake cutting	2.1	Mark out measurements for pleat lines, hems, headings and special seam allowances using workplace-approved

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
process		methods
	2.2	Cut fabric according to work health and safety (WHS) requirements, job requirements, workplace procedures and material characteristics
	2.3	Hang fabric using required protective covers and attached care label information
3. Finish and dispatch work	3.1	Check that completed work complies with quality and work order requirements, and rectify identified deficiencies within scope of own role
	3.2	Dispatch cut lengths according to workplace procedures
	3.3	Collect and store material that can be re-used, and dispose of waste safely and sustainably according to workplace procedures
	3.4	Clean work area and equipment, and tag damaged tools and equipment
	3.5	Complete required workplace records according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret, discuss and use mathematical information in routine workplace documentation</li> <li>• use mathematical information to complete measurements, calculate area and estimate material requirements</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret routine workplace documentation, including work orders, WHS requirements and workplace installation procedures</li> </ul>

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFSF2001 Cut single layer fabrics

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFSF2015 Cut single layer fabrics

## Modification History

Release 1. Supersedes and is equivalent to MSFSF2001 Cut single layer fabrics

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- accurately measure and cut fabric quantities to minimise waste and produce consistent quality items for at least five different work orders; each work order must relate to one of the following types of products:
  - curtain
  - cushion
  - drape
  - swag
  - upholstered furniture component.

Each of the above work orders must require a different type of fabric and number of items to be cut. One work order must require lining or interlining, and one hanging cut fabric.

In the course of completing each of the above five work orders, the person must:

- interpret work order and locate required materials, tools and equipment
- apply safe handling procedures
- follow work instructions and safe operating and inspection procedures to:
  - minimise risk of injury to self and others
  - prevent damage to materials, equipment and products
  - maintain required production output and quality
  - use personal protective equipment (PPE)
- identify special marking out requirements
- use and dispose of waste sustainably
- avoid backtracking, work flow interruptions and wastage
- identify and resolve routine problems and faults encountered

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work health and safety (WHS) requirements to observe when cutting fabrics:

- ergonomic criteria
- personal protection requirements
- work order requirements, and industry-accepted quality indicators and requirements, relating to the cutting process described in performance evidence:
  - safety considerations and potential dangers associated with cutting equipment
  - operation of work systems
  - environmental requirements of cutting operations
  - work flow requirements for cutting process
- layout and key features of work order requirements relating to cutting single layer fabrics:
  - required fabrics
  - number of items to be cut
  - fabric sizes to be cut
  - required allowances
  - required equipment
  - workplace standards
- workplace procedures for:
  - selecting and laying out fabrics
  - marking out measurements for pleat lines, hems, headings and special seam allowances
  - inspecting fabric types for flaws
  - identifying design features affecting job requirements
  - identifying and labelling cut-out materials
  - selecting and using cutting equipment:
    - blades
    - cutting machines
    - scissors
  - cutting out and labelling materials
  - hanging fabrics
  - checking tools and equipment and tagging damaged items
- effect of cutting on fabrics
- use of material features in realising attractive use of fabric patterns:
  - face of materials
  - naps
  - direction
  - pattern matches

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to:

- single layer fabric required for the performance evidence, including lining or interlining
- PPE applicable to job requirements
- measuring and calculating equipment:
  - tapes
  - rulers
  - calculator and other workplace calculating equipment
- cutting equipment:
  - scissors
  - blades
  - cutting machines
- workplace documentation specified in the knowledge evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## MSFSF2016 Operate a steam press

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to operate steam pressing equipment.

Workers with this competency follow established procedures in the soft furnishing sector.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Soft Furnishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify task requirements	1.1 Determine task requirements from work documentation and material care labels 1.2 Identify equipment and processes required to meet task requirements 1.3 Identify workplace quality requirements for finished product
2. Plan steam pressing operations	2.1 Identify and follow work health and safety requirements 2.2 Identify temperatures and any particular precautions from care labels and workplace instructions 2.3 Plan work sequence for task in accordance with workplace procedures 2.4 Identify steam pressing equipment emergency stops, gauges, guards and controls 2.5 Plan task sequences to meet requirements

Elements	Performance Criteria
3. Set up steam pressing equipment	3.1 Set temperatures and adjust equipment to meet task requirement 3.3 Check material for quality prior to pressing and report damaged or incomplete items in accordance with workplace procedures
4. Press fabrics	4.1 Lift materials and hold onto press using appropriate techniques 4.2 Conduct pressing operations in accordance with planned sequence 4.3 Make adjustments to press settings to improve quality of work 4.4 Maintain required quantity and quality of work 4.5 Protect pressed items from dust and other contaminants and place in workplace approved holding areas 4.6 Monitor pressing process and report on materials and equipment operating conditions that may affect product quality in accordance with workplace procedures 4.7 Implement authorised changes in operating procedures and temperatures in accordance with workplace procedures
5. Complete task	5.1 Check, clean and store equipment in accordance with equipment instructions and workplace procedures 5.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures 5.3 Clean work area and safely dispose of waste in accordance with workplace procedures and environmental standards 5.4 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFSF2005 Operate a steam press.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFSF2016 Operate a steam press

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- press at least 5 different types of materials, including all of the following, to workplace quality standards:
  - plain fabrics
  - patterned fabrics
  - lining materials
  - leather.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types of steam press and their characteristics
- effects of steam on different materials
- procedures for minimising damage to and maintaining contaminant-free pressed fabrics
- aspects of the role that require task planning, including:
  - required temperatures and warm up/cool down times
    - key parts of the materials to be pressed which require checks for quality of work
    - work area housekeeping requirements
    - safe and suitable work area
- factors that may impact steam press operations and holding or lifting material, including:
  - machine type
  - personal right or left-hand preference of the operator
  - manipulation requirements for the materials
  - special pressing requirements for different parts of the pressed panels
- work health and safety requirements, including personal protective equipment (PPE) and manual handling procedures.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - work orders
  - items to be pressed with care labels
  - steam pressing equipment
  - PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFSF2017 Construct unlined curtains and drapes

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to construct and machine sew unlined, pleated and gathered curtains and drapes. Workers with this competency follow established procedures in the soft furnishing industry.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Soft Furnishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish task requirements and prepare for task	1.1 Determine task requirements from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Identify heading type and consequent requirements for measuring, calculating, sewing, folding and finishing 1.4 Identify correct side of fabric, naps, direction of pattern and pattern matches to inform lay out 1.5 Check drapery panels for faults 1.6 Select and thread appropriate needle types for fabric
2. Lay out work to be sewn	2.1 Fold top fabric, bringing edges to be seamed together and matching any pattern and maintaining an appropriate finished length in accordance with workplace quality requirements 2.2 Hold fabric together using pins or other workplace-approved

	methods
3. Stitch seams and form corners	<p>3.1 Hold curtain fabrics to suit right- or left-handedness of sewer, and manipulation requirements for bulk and slipperiness of materials</p> <p>3.2 Complete machine sewing operations in accordance with workplace procedures</p> <p>3.3 Fold and form corners to match task requirements, inserting any required weight bags</p> <p>3.4 Complete hems using any required weights, stitch type and appropriate sewing method</p> <p>3.5 Stitch and finish corners and trim any loose threads in accordance with quality standards</p>
4. Construct curtain headings	<p>4.1 Attach curtain heading tape in accordance with workplace-approved method and task instructions</p> <p>4.2 Keep sewn pleat spaces uniform within drops and to specification</p> <p>4.3 Fix care labels to heading or hem of curtain in accordance with workplace standards</p>
5. Finish work	<p>5.1 Check finished curtain panels including stitch length, end finishing and final length of finished curtain panels against work requirements</p> <p>5.2 Press work in readiness for next work stage in accordance with workplace procedures</p> <p>5.3 Repair any parts of the work that do not comply with work order in accordance with workplace procedures</p>
6. Complete work for next process	<p>6.1 Complete and store required workplace documentation in accordance with workplace procedures</p> <p>6.2 Fold, protect and dispatch finished work to next process in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## **Unit Mapping Information**

Release 1. Supersedes and is equivalent to MSFSF2007 Construct unlined curtains and drapes.

## **Links**

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFSF2017 Construct unlined curtains and drapes

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- measure and construct to workplace standards at least 4 different types of pleated or gathered curtains or drapes using industrial sewing machines and pressing equipment.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- equipment and procedures for sewing
- fabric types, common faults and inspection procedures
- risks to health from repetitive actions and prevention strategies
- workplace standards and procedures for construction of curtains and drapes
- types of curtain heading styles, including at least 3 of the following:
  - gathered
  - slotted (rod pocket)
  - pencil pleat and pinch pleat (may include tab top)
  - knife pleat
  - goblet pleat and cartridge
- the function of tools and equipment commonly used to construct curtains and drapes, including:
  - sewing machines
  - hemming machines
  - overlockers
  - pleating machines
- interpretation of work documentation, including requirements for:
  - widths and numbers of finished curtain panels, heading style, number and spacing of pleats
  - finishing and any filling of curtain headings
- materials commonly used to construct curtains and drapes, including:
  - interlining and curtain fabrics

- fasteners
- threads
- techniques for marking out:
  - returns
  - overlaps
  - pleats
  - spaces
- machine sewing procedures, including:
  - straight stitching along marked pleat line from the top of the heading to the lower edge of the stiffening material or vice versa
  - securing beginning and end of threads of the stitching with even and appropriate seam stitch type, length and visibility
  - using flat seams
  - attaching care labels and fibre content labels
  - ensuring finished components match task requirements
- work health and safety requirements, including personal protective equipment (PPE), ergonomic work practices and manual handling procedures.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - work orders
  - sewing machine and consumables
  - PPE
  - fabrics
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFSF2018 Construct lined curtains and drapes

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to construct and machine sew lined curtains and drapes, including detached and sewn-in linings. Work may include interlined loose-lined and bag-lined products. Workers with this competency follow established procedures in the soft furnishing industry.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Soft Furnishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Establish task requirements and prepare for task	1.1 Determine task requirements from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Identify heading type and consequent requirements for measuring, calculating, sewing, folding and finishing 1.4 Identify correct side of fabric, naps, direction of pattern and pattern matches in order to guide lay out 1.5 Identify lining attachment method and consequent requirements for attachments, fasteners, trims and sewing 1.6 Check drapery panels for faults 1.7 Select and thread appropriate needle types for fabric
2 Lay out work to be sewn	2.1 Fold top fabric, bringing edges to be seamed together to

Elements	Performance Criteria
	<p>match pattern where required and maintaining an appropriate finished length in accordance with workplace quality requirements</p> <p>2.2 Lay out linings and any interlining materials and fold ready for sewing</p> <p>2.3 Hold fabric together using pins or other workplace-approved methods</p>
3 Stitch seams and form corners	<p>3.1 Hold curtain fabrics to suit right- or left-handedness of sewer and manipulation requirements for bulk and slipperiness of materials</p> <p>3.2 Sew in place linings to be bagged in accordance with requirements</p> <p>3.3 Complete machine sewing operations in accordance with task requirements</p> <p>3.4 Fold and form corners to match task requirements and insert any required weight bags</p> <p>3.5 Complete hems using required weights, stitch type and appropriate sewing method</p> <p>3.6 Stitch and finish corners and trim any loose threads in accordance with quality standards</p>
4 Construct curtain headings	<p>4.1 Attach curtain heading tape in accordance with workplace procedures and task instructions</p> <p>4.2 Sew attached lining and interlinings into heading in accordance with task requirements</p> <p>4.3 Keep sewn pleat spaces uniform within drops and to specification</p> <p>4.4 Attach linings and interlinings to curtain backs by sewing or using appropriate fasteners</p> <p>4.5 Fix care labels to heading or hem of curtain in accordance with task requirements</p> <p>4.6 Sew separate linings using appropriate heading tape and attach to curtain in accordance with task requirements</p>
5 Finish task	<p>5.1 Check finished curtain panels including stitch length, end finishing and final length of finished curtain panels against task requirements</p> <p>5.2 Press work in readiness for next work stage in accordance with workplace procedures</p>

Elements	Performance Criteria
	5.3 Repair in accordance with workplace procedures any parts of work that do not comply with task requirements
6 Complete work for next process	6.1 Complete and store required workplace documentation in accordance with workplace procedures 6.2 Fold, protect and dispatch finished work to next process in accordance with workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFSF2008 Construct lined curtains/drapes.

# Assessment Requirements for MSFSF2018 Construct lined curtains and drapes

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- measure and construct at least 2 different types of lined curtains or drapes to meet workplace standards using industrial sewing machines and pressing equipment.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- equipment and procedures for sewing
- fabric types including lining and interlining materials, and their common faults and inspection procedures
- risks to health from repetitive actions and prevention strategies
- workplace standards and procedures for construction of curtains and drapes
- tools and equipment commonly used to construct curtains and drapes, including:
  - sewing machines
  - hemming machines
  - overlockers
  - pleating machines
- interpretation of work documentation, including:
  - widths and numbers of finished curtain panels, heading style, number and spacing of pleats
  - finishing and any filling of curtain headings
- materials commonly used to construct curtains and drapes, including:
  - interlining and curtain fabrics
  - fasteners
  - threads
- techniques for marking out:
  - returns
  - overlaps
  - pleats

- spaces
- machine sewing procedures, including:
  - straight stitching along marked pleat line from the top of the heading to the lower edge of the stiffening material or vice versa
  - securing beginning and end of threads of the stitching with even and appropriate seam stitch type, length and visibility
  - using flat seams
  - attaching care labels and fibre content labels
  - ensuring finished components match task requirements
- work health and safety requirements, including personal protective equipment (PPE), ergonomic work practices and manual handling procedures.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - work orders
  - sewing machine and consumables
  - PPE
  - fabrics
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFSF2019 Construct padded pelmets

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to measure, cut and assemble padded pelmets.

Workers with this competency follow established procedures in the soft furnishing industry.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Soft Furnishing

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish task requirements and prepare for work	1.1 Determine task requirements from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Identify requirements for measuring, cutting, padding, fixing and finishing to meet task requirements 1.4 Identify type of pelmet and components of pelmet to be padded 1.5 Select tools, devices and materials required to complete task 1.6 Plan work to conform to quality requirements and efficient use of time and to minimise wastage
2. Cut timber and pad pelmet	2.1 Measure, cut and prepare timber components to meet task requirements 2.2 Lay out padding and other materials 2.3 Assemble and attach components using fastenings, tools and

	<p>equipment to meet task specifications</p> <p>2.4 Operate tools and equipment in accordance with workplace procedures and work health and safety requirements</p>
3. Finish task	<p>3.1 Monitor work to ensure quality of product and correct finish, operation of any moving parts, and number and fitting of fasteners/brackets</p> <p>3.2 Identify problems during work operations and report according to workplace procedures</p> <p>3.3 Minimise waste and collect and store re-usable materials according to workplace procedures</p> <p>3.4 Perform routine maintenance of tools and equipment according to workplace and manufacturer instructions</p> <p>3.5 Clean work area according to workplace procedures</p>
4. Complete work for next process	<p>4.1 Package completed pelmets to meet task requirements</p> <p>4.2 Secure, label and store package according to workplace procedures</p> <p>4.3 Complete and store required workplace documentation in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFSF2009 Construct padded pelmets.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFSF2019 Construct padded pelmets

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- measure, cut and assemble the components of at least 3 different types of padded pelmets to workplace standards.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- characteristics of different types of pelmets
- workplace standards and procedures for construction of padded pelmets
- tools and equipment commonly used to construct padded pelmets, including:
  - measuring and calculating equipment:
  - fabric and general cutting tools:
  - fabric and general assembling tools and materials:
- materials commonly used to construct pelmets:
  - fasteners
  - threads
  - timber
  - adhesives
  - padding material
  - fabric
  - linings and trims
- work health and safety requirements, including personal protective equipment (PPE), ergonomic work practices and manual handling procedures.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders and quality specifications
  - cutting and assembly equipment required for performance evidence
  - PPE
  - fabrics, padding, trims, timber
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFSF2020 Make up tracks for window coverings

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to cut, assemble and package tracking components and curtain hardware in preparation for onsite fitting. Workers with this competency follow established procedures in the soft furnishing industry.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Soft Furnishing

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Identify products, fittings and attachments to be used	1.1 Determine track type, components and tools required from work documentation 1.2 Identify task requirements, including those for quality and quantity
2 Prepare for work	2.1 Identify and follow work health and safety requirements 2.2 Select tools to meet task requirements and check they are safe and functional 2.3 Select materials to meet task requirements and check they meet quality requirements 2.4 Confirm cutting equipment setting and operation of safety cut-out and guards 2.5 Plan work to conform to quality requirements, minimise time, and economically use materials 2.5 Identify procedures for checking quality of work

3 Cut tracking to required length	<p>3.1 Operate cutting equipment in accordance with workplace procedures and work health and safety requirements</p> <p>3.2 Monitor cutting and confirm required quality is achieved</p> <p>3.3 Identify and report operational problems in accordance with workplace procedures</p> <p>3.4 Follow workplace procedures to minimise waste and collect and store re-usable materials</p> <p>3.5 Complete routine maintenance of cutting equipment in accordance with workplace procedures and manufacturer instructions</p> <p>3.6 Remove waste and clean work area in accordance with workplace procedures</p>
4 Assemble and package tracking components	<p>4.1 Collect and assemble components to complete tracking, and complete checks for quality and quantity in accordance with workplace procedures</p> <p>4.2 Package and prepare components for distribution in accordance with workplace procedures</p> <p>4.3 Complete documentation in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFSF2010 Make up tracks for window coverings.

# Assessment Requirements for MSFSF2020 Make up tracks for window coverings

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- make up at least 3 different types of tracks to workplace quality requirements.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- characteristics of different track types:
  - timber
  - metal
  - plastic
- components of tracks and the assembly process:
  - tracks
  - poles
  - brackets
  - runners
  - end pieces
  - cording
  - hooks and rings
- hand and power tools commonly used to make up tracks for window coverings
- work health and safety requirements, including personal protective equipment (PPE), ergonomic work practices and manual handling procedures.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders

- tracks and their components
- tools and equipment required for performance evidence
- PPE
- workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFSF2021 Fit and adjust curtain hardware

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to fit and adjust adjusting tracking, rods, poles and other curtain hardware. Workers with this competency follow established procedures in the soft furnishing industry.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Soft Furnishing

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare for fitting attachments to products	1.1 Identify task requirements from work documentation, including type of tracks, rods or poles and other components to be fitted 1.2 Identify and follow work health and safety requirements 1.3 Identify and review manufacturer information on products to plan work 1.4 Plan attachment process to conform to quality requirements, minimise time, economically use materials and maximise appearance of finished work 1.5 Select tools and equipment to meet task requirements and check they are safe and functional 1.6 Select materials to meet task requirements and check they meet quality requirements 1.7 Set up width and projection to provide for stacking space, overlap, projection, return, and number and type of other

	attachments
2 Complete fitting operations	2.1 Follow task requirements and workplace procedures for fitting hardware 2.2 Install and test all components and confirm they are operational
3 Clean work area and prepare products for the next process	3.1 Clean work area equipment in accordance with workplace procedures 3.2 Inspect completed and confirm compliance with workplace quality requirements 3.3 Repair or return fittings which do not meet quality specifications 3.4 Complete and store required workplace documentation in accordance with workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFSF2011 Fit and adjust curtain hardware.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFSF2021 Fit and adjust curtain hardware

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- fit and adjust 5 different types of window tracks, collectively including the following:
  - one cord-drawn
  - one decorative pole
  - one conduit
  - one ceiling fitted
  - one face fitted.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types of curtain hardware:
  - hand-drawn or cord-drawn tracks
  - decorative rods
  - poles
  - cord tensioners and conduit
- workflow for fitting, customising and adjusting curtain tracks, poles and other hardware, including bending of tracks
- hand and power tools commonly used to fit hardware
- work health and safety requirements, including personal protective equipment (PPE), ergonomic work practices and manual handling procedures.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders

- tracks, rods, poles and conduit
- tools and equipment required for performance evidence
- PPE
- workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFSF2022 Cut single layer fabrics

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to measure, mark out and cut single layer fabrics for the manufacture of curtains and soft furnishing accessories. It does not apply to cutting from patterns.

Soft furnishing workers with this competency follow established procedures.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Soft furnishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish task requirements and prepare for work	1.1 Determine task requirements from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Select and lay out fabrics to meet task requirements 1.4 Inspect fabrics for flaws and design features affecting task requirements and required finish and make adjustments as needed 1.5 Select scissors and blades and check they are safe, functional and sharp
2. Undertake cutting process	2.1 Mark out measurements for pleat lines, hems, headings and special seam allowances using workplace procedures 2.2 Ensure mark out minimises wastage while meeting job requirements 2.3 Cut fabric to meet task requirements

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	2.4 Hang fabric using required protective covers and according to care label information
3. Finish and dispatch work	3.1 Check that completed work complies with task quality requirements 3.2 Rectify identified deficiencies within scope of own role 3.3 Dispatch cut lengths according to workplace procedures 3.4 Collect and store material that can be re-used, and dispose of waste according to workplace procedures 3.5 Clean work area and equipment, and tag damaged tools and equipment 3.6 Complete required workplace records according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Numeracy skills to measure and calculate lengths and areas and estimate material requirements
- Reading skills to interpret familiar workplace procedures and work documentation

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFSF2015 Cut single layer fabrics

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ce216c9c-04d5-4b3b-9bcf-4e81d0950371>

# Assessment Requirements for MSFSF2022 Cut single layer fabrics

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- accurately measure and cut fabric quantities to minimise waste and meet workplace quality requirements for at least 5 separate items. At least one item must include lining or interlining, and at least one must require hanging cut fabric. At least 3 of the following must be included:
  - curtain
  - cushion
  - drape
  - swag
  - upholstered furniture component.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work health and safety requirements for cutting fabrics:
  - safety considerations and potential dangers associated with cutting equipment
  - ergonomic work practices
  - correct use of personal protection equipment (PPE)
- work order requirements and industry-accepted quality indicators and requirements relating to the cutting process
- environmental and sustainability considerations for cutting operations
- workplace procedures for:
  - selecting and laying out fabrics
  - marking out measurements for pleat lines, hems, headings and special seam allowances
  - inspecting fabric types for flaws
  - identifying design features affecting job requirements
  - identifying and labelling cut-out materials
  - selecting and using cutting equipment:

- blades
- cutting machines
- scissors
- cutting out and labelling materials
- hanging fabrics
- checking tools and equipment and tagging damaged items
- effect of cutting on fabrics
- use of material features in realising attractive use of fabric patterns:
  - face of materials
  - naps
  - direction
  - pattern matches.

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - measuring, calculating and cutting equipment required for performance evidence
  - PPE
  - single layer fabrics including lining or interlining
  - workplace procedures
  - any relevant manufacturing specifications, codes, standards and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFSF3014 Construct Roman-style blinds

### Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFSF3004 Construct Roman-style blinds.

### Application

This unit of competency describes the skills and knowledge required to construct and sew Roman-style blinds to job requirements. The unit involves planning job requirements, identifying required fabrics and blind components to be used, and applying workplace procedures to ensure their safe and correct construction. The unit does not involve installing the blinds or constructing wood-weave style Roman blinds.

The unit applies to those constructing Roman-style blinds for any interior residential or commercial environment. The Roman blinds may be bonded, cascade, kooped, oriental, staggered, straight or relaxed. They may be made using lining, interlining or full block fabric. The battens used may be aluminium or timber.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Unit Sector

Soft furnishing

### Elements and Performance Criteria

Elements	Performance Criteria	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare to construct Roman-style blinds	1.1	Identify job requirements from work order and supplier instructions, and confirm with required personnel
	1.2	Identify work health and safety (WHS) and personal protection requirements of blind construction process
	1.3	Identify, select and prepare required hardware, components, tools, and equipment based on work order, and check their

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
		safe and effective operation
	1.4	Identify required fabric and correct side, naps, direction of pattern and pattern matches, and check for flaws
	1.5	Select and thread suitable needle types for selected fabric
2. Sew Roman-style blinds	2.1	Lay out work to be sewn according to workplace procedures
	2.2	Measure and mark out of fold and stitching lines for batten placement according to work order, workplace procedures, and quality requirements
	2.3	Hold fabric together, and support where required, according to workplace-approved methods
	2.4	Complete pre-batten machine sewing operations according to work order and workplace procedures
	2.5	Measure and check finished length and width of panels against work order, and adjust where required to meet quality requirements
	2.6	Insert batten pockets and fix according to workplace procedures
	2.7	Complete post-batten hems and corners, and trim threads
3. Finalise construction of Roman-style blinds	3.1	Check that finished blind complies with quality and work order requirements, and rectify and report identified deficiencies within scope of own role
	3.2	Press work for next work stage and attach rings according to workplace procedures
	3.3	Protect finished work and dispatch to next process according to workplace procedures
	3.4	Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures
	3.5	Check and store tools and equipment, and tag and report faulty items according to workplace procedures
	3.6	Legibly complete and process required workplace

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	documentation according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.	
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret, discuss and use mathematical information in familiar work orders and workplace procedures</li> <li>• complete measurements, calculate area and estimate material requirements</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• communicate ideas and information to confirm work requirements and specifications and report work outcomes and problems:               <ul style="list-style-type: none"> <li>• speaking clearly</li> <li>• asking questions to gain information</li> </ul> </li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret routine workplace documentation, including:               <ul style="list-style-type: none"> <li>• WHS requirements and procedures</li> <li>• supplier instructions</li> <li>• workplace instructions, including job sheets, cutting lists, plans, drawings and designs</li> </ul> </li> </ul>

## Unit Mapping Information

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFSF3004 Construct Roman-style blinds.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFSF3014 Construct Roman-style blinds

## Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFSF3004 Construct Roman-style blinds.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly measure and construct at least two different types of Roman-style blinds to required size and accuracy that match work order requirements.

One of the above blinds must be for a bay window, box bay window or corner window.

Each blind must be a different size and use a different fabric type, design, nap and pattern direction.

One blind must use standard lining and interlining and one blind must use block-out fabric.

One blind must use aluminium back battens and one blind must use timber battens.

In the course of constructing each of the above blinds, the person must:

- interpret work order, and locate required specifications, tools and equipment
- identify fabrics to be used and any special sewing requirements
- apply safe lifting and handling requirements
- follow work instructions, safe operating procedures and inspection processes to:
  - minimise risk of injury to self and others
  - prevent damage to materials, tools, equipment and products
  - maintain required production output and product quality
  - use power tools safely
  - use personal protective equipment (PPE)
- use and dispose of waste sustainably
- identify and resolve routine problems and faults encountered
- avoid backtracking, work flow interruptions and wastage
- work with others, recognising dependencies and using cooperative approaches to optimise work flow and productivity.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of work order and supplier instructions relating to the blind construction specified in the performance evidence, and how to identify and interpret key information
- emerging trends in constructing Roman-style blinds, including new materials and their associated energy ratings and fire retardant attributes
- work order requirements, and industry-accepted quality indicators and requirements, relating to blind-construction described in performance evidence:
  - safety considerations and potential dangers, including risks to health from repetitive actions and prevention strategies
  - identifying work process problems and resolving within scope of own role
  - blind construction requirements relating to:
    - headboard and track requirements
    - cutting patterns and sequences
    - measuring and marking out fold or stitching lines
    - lining and interlining
    - mounting style
    - number and widths of panels
    - required fasteners
    - seam allowances and types
    - widths and numbers of finished blinds
- work health and safety (WHS) regulations, standards, procedures, and practices specific to blind-construction described in performance evidence:
  - ergonomic criteria
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - using firefighting equipment and first aid equipment
  - using personal protective equipment:
    - hearing protection
    - protective clothing and head wear
    - respiratory protection
    - safety footwear
    - safety glasses and goggles
- workplace procedures relating to:
  - communication channels and protocols
  - manual handling, including lifting and carrying
  - identifying required fabric, equipment and processes
  - cutting and laying out work to be sewn:
    - laying out lining and interlining materials and folding ready for sewing
    - matching and securing lining material patterns
    - methods for checking pattern matching and maintaining finished length
    - keeping pattern matches uniform within drops and across matching sets of blinds
  - machine sewing operations that match quality and work requirements

- inspecting fabric and finished blind
- responding to emergencies and evacuations
- tagging and reporting faulty tools and equipment
- disposing of waste safely and in an environmentally sustainable manner
- recycling and re-use guidelines
- using, cleaning, and storing tools and equipment
- recording and reporting blind construction information
- techniques for measuring, cutting, setting up and constructing blinds that:
  - comply with supplier instructions and manufacturer specifications
  - conform to quality requirements relating to:
    - even and appropriate seam stitch type, length and visibility
    - lining and interlining attachment to back of blind
    - required weights, stitch type and sewing method for hems
    - inserting and fixing batten pockets
    - end finishing
    - final length of finished blind
  - maximise the appearance of the finished work:
    - pattern matches
    - flat and straight seam lines
    - clean corners
    - secured beginning and end of threads
  - provide for economical use of labour and materials
- types of common fabric faults and problems that occur during blind construction, and how to avoid and respond
- types, characteristics, terminology, uses, design features and limitations of the following items required to construct the Roman-style blinds in performance evidence:
  - materials to be machined:
    - fasteners
    - headboard and track
    - interlining and curtain fabrics
    - lining
    - threads
  - power tools:
    - sewing machines
    - drills
    - pressing equipment
    - saws
    - staplers
  - hardware:
    - needle types suited to fabric used in the performance evidence

- aluminium and timber battens
- documentation requirements for blind construction described in performance evidence.

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to:

- fabrics to construct blinds specified in the performance evidence
- sewing machine
- PPE applicable to job requirements
- WHS documentation specific to the construction
- tools and equipment specified in the knowledge evidence
- workplace documentation required for blind-construction process, including:
  - work orders
  - workplace procedures
  - equipment and supplier instructions, and manufacturer specifications.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## MSFSF3015 Construct Roman-style blinds

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to construct and sew bonded, cascade, looped, oriental, staggered, straight or relaxed Roman-style blinds using lining, interlining or full block fabric and aluminium or timber battens. It does not include wood-weave style Roman blinds, and it does not include blind installation. Workers with this competency interpret work documentation, identify fabrics and components to be used, and plan and complete construction, resolving routine problems and faults and optimising workflow and productivity.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Competency Field

Soft furnishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to construct Roman-style blinds	<p>1.1 Identify task requirements, including fabric to be used and any special sewing requirements, from work documentation and confirm according to workplace procedures.</p> <p>1.2 Identify and follow work health and safety requirements for task, including personal protective equipment</p> <p>1.3 Select tools and equipment, including needles, to meet task requirements and check that they are safe and functional</p> <p>1.4 Select fabric, hardware and other components to meet task</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>requirements and check they meet quality requirements</p> <p>1.5 Identify inward and outward facing side of fabric, naps, direction of pattern and pattern matches</p> <p>1.6 Place patterns in relation to blind/blinds and determine pattern repeats, allowing enough fabric to match over multiple drops and/or blinds</p> <p>1.7 Identify task sequence and quality checks for each stage to optimise workflow and avoid rework</p>
2. Sew Roman-style blinds	<p>2.1 Lay out fabric according to workplace procedures</p> <p>2.2 Measure and mark out fold and stitching lines for batten placement according to task requirements</p> <p>2.3 Hold fabric together and support where required according to workplace procedures</p> <p>2.4 Complete pre-batten machine sewing operations according to workplace procedures</p> <p>2.5 Measure and check finished length and width of panels against task requirements, and adjust where required</p> <p>2.6 Insert batten pockets and fix according to workplace procedures</p> <p>2.7 Complete post-batten hems and corners, and trim threads</p>
3. Assemble Roman-style blinds	<p>3.1 Attach child safety labels and hardware</p> <p>3.2 Attach care labels</p> <p>3.3 Attach fabric to the headboard or track</p> <p>3.4 Attach rings and affix lifting cords</p>
4. Finalise construction of Roman-style blinds	<p>4.1 Check that finished blind complies with quality and other task requirements and rectify and report identified deficiencies within scope of own role</p> <p>4.2 Protect finished work and dispatch to next process according to workplace procedures</p> <p>4.3 Clean work area and surfaces and dispose of waste safely and sustainably according to workplace procedures</p> <p>4.4 Check and store tools and equipment, and tag and report faulty items according to workplace procedures</p> <p>4.5 Complete and process task documentation according to workplace</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate simple information on familiar workplace documents
- Numeracy skills to measure and calculate length and area and material requirements
- Oral communication skills to confirm and clarify task requirements and to support cooperative and efficient workflow

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFSF3014 Construct Roman-style blind.

## Links

Companion Volume implementation guides are found in VETNet --

# Assessment Requirements for MSFSF3015 Construct Roman-style blinds

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- safely measure and construct at least two different types of Roman-style blinds to meet task and workplace size and quality requirements. These blinds must differ in size and style and have different types of headers, pull-up battens, and fabric type and design.

This work must meet workplace and industry standards for efficiency, including:

- identifying and resolving routine problems and faults, if encountered
- working with others using cooperative approaches to optimise workflow and productivity.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- how to identify and interpret key information from work documentation for the construction of Roman-style blinds, including work orders, cutting lists, designs, and supplier instructions and specifications
- processes and quality requirements for Roman-style blind construction, including:
  - headboard and track
  - cutting patterns and sequences
  - measuring and marking out fold or stitching lines
  - number and widths of batten spacings
  - laying out lining and interlining materials and folding ready for sewing
  - matching and securing lining material patterns
  - checking pattern matching and maintaining finished length
  - keeping pattern matches uniform within drops and across matching sets of blinds
  - machine sewing operations, including even and appropriate seam stitch type, length, and visibility
  - inserting and fixing batten pockets
  - required weights, stitch type and sewing method for hems

- end finishing
- fabric adhesion and fasteners
- inspection of finished blind
- disposing of waste safely and in an environmentally sustainable manner
- using, cleaning, and storing tools and equipment
- tagging and reporting faulty tools and equipment
- recycling and re-use
- recording and reporting blind construction information
- function of tools and components used to construct Roman-style blinds:
  - materials:
    - headboard and track
    - fabrics
    - threads
  - power tools:
    - sewing machines
    - drills
    - pressing equipment
    - saws
    - staplers
  - hardware:
    - needle types suited to fabric used in the performance evidence
    - aluminium and timber battens
    - screws, brackets and assembly hardware
- how to identify and mitigate work process problems within scope of own role
- risks commonly encountered in constructing Roman-style blinds, including risks to health from repetitive actions and manual handling
- risk mitigation methods, including personal protective equipment (PPE)
- workplace communication channels and protocols
- common fabric faults and problems, and how to respond
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - fabrics to construct Roman-style blinds
  - tools and equipment to construct Roman-style blinds, including sewing machine and PPE
  - workplace documentation required for blind-construction process, including:

- work orders
- workplace procedures
- equipment and supplier instructions
- manufacturer specifications
- work health and safety documentation
- 

## Links

Companion Volume implementation guides are found in VETNet – -

<https://vetnet.education.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

## MSFSF3016 Lay out patterns and cut fabrics

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to lay out patterns and cutting fabrics for construction of diverse soft furnishings and upholstery products. Fabrics may be single or double layer and include both plain fabrics and those which involve matching stripes, checks and pattern repeats. Workers with this competency follow established procedures, using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Soft Furnishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan task	1.1 Identify task requirements, including specifications, patterns, fabrics, number of items to be cut and required equipment, from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Identify specific cutting requirements and whether cutting table guides are needed 1.4 Select suitable work area and clean of any contaminants 1.5 Select equipment and tools to suit fabric and other task requirements and check that they are safe and functional

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.6 Check that cutting tools are sharp 1.7 Select fabrics to meet task requirements and lay out smooth and square
2. Prepare materials for cutting	2.1 Inspect fabrics for flaws and appropriate finish 2.2 Identify naps, direction of pattern, pattern repeat and finished side of materials 2.3 Square up fabrics to edges or guide markings on cutting table 2.4 Lay out patterns in accordance with work procedures and instructions using registration points on pattern and other instructions to match required fabric pattern 2.5 Measure and make required adjustments
3. Complete cutting operations	3.1 Cut fabrics to meet task requirements 3.2 Prepare cut fabrics for distribution or next process in accordance with task requirements and workplace procedures 3.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 3.4 Complete and store documentation in accordance with workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate length and area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFSF3007 Lay out patterns and cut fabrics.

## Links

Companion Volume implementation guides are found in VETNet --

# Assessment Requirements for MSFSF3016 Lay out patterns and cut fabrics

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- lay out patterns, measure accurately and cut out at least 5 different fabric types or pattern styles.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- fabric types, common faults and inspection procedures
- procedures for laying out and cutting fabrics, including factors to consider for patterned fabrics and pattern repeats
- types of tools commonly used for layout and cutting, including:
  - measuring devices
  - scissors
  - cutting blades
  - automatic cutting machines
- manual and automated fabric cutting techniques and workflow
- work health and safety requirements, including personal protective equipment (PPE), ergonomic work practices and manual handling procedures.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - cutting tools and equipment required for performance evidence
  - PPE
  - patterns

- fabrics to be cut
- workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFSF3017 Measure up and calculate fabric quantities for window coverings

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to measure up and calculate fabric and tracking quantities for window coverings during a site visit for subsequent use in job specifications and quotes/tenders.

Workers with this competency established procedures, using discretion, judgement and problem-solving to identify and resolve potential issues.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking windows coverings work. Access to construction sites requires certification of general induction training, as specified by the *National Code of Practice for Induction for Construction Work (ASCC 2007)*.

## Competency Field

Soft Furnishing

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for site measure	1.1 Review work order and identify drape requirements, fabric types and lining/interlining requirements 1.2 Identify and obtain required measuring tools and equipment 1.3 Follow workplace procedures to organise site access
2. Complete and	2.1 Document fabric width and repeat features based on customer

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
document drape measurements	selection 2.2 Document finished length of window covering 2.3 Identify heading and required fullness ratio 2.4 Identify and record loose or attached lining preference 2.5 Measure and document finished width of tracking and window covering 2.6 Calculate number of fabric drops per curtain 2.7 Calculate length of each fabric drop based on finished length plus hem and heading allowances and pattern repeats 2.8 Calculate and record fabric requirements, with allowances for seams, hems, headings, drape fullness or heading type
3. Calculate and document lining and interlining quantities	3.1 Document width of lining and interlining fabrics based on customer selection 3.2 Calculate number of lining/interlining widths or quantity of continuous lining based on required number of drape drops or continuous fabric 3.3 Calculate length of lining/interlining including hem allowances 3.4 Calculate and record amount of lining/interlining taking account of need to minimise waste
4. Complete documentation	4.1 Review and check all measurements on documentation for completeness 4.2 Finalise documentation and process in accordance with workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate length and area and material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## **Unit Mapping Information**

Release 1. Supersedes and is equivalent to MSFSF3008 Measure up and calculate fabric quantities for window coverings.

## **Links**

# Assessment Requirements for MSFSF3017 Measure up and calculate fabric quantities for window coverings

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- measure up and accurately calculate and document fabric quantities for at least 3 different window covering types.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- fabric and designs commonly used for window coverings and their requirements for fabric quantities in terms of aesthetics and functionality
- measuring tools and procedures for calculating fabric quantities for curtains and blinds
- mathematical processes for calculating fabric quantities
- workplace procedures for documenting measurements and fabric requirements.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - work orders that include details of fabric and style requirements
  - window openings to measure
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFSF3018 Advise customers on interior decoration products

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to provide advice to customers on interior decoration products in relation to colour coordination, fabric selection and general style.

Workers with this competency provide advice on interior decoration products. They may work in showrooms, retail outlets or other customer service contexts.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Soft furnishing

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop and maintain knowledge of interior decoration products	1.1 Research information on products and services from authoritative sources 1.2 Identify characteristics of different products using available product and service documentation 1.3 Source and maintain product information in format consistent with organisational requirements 1.4 Use knowledge to improve quality of advice provided to customers
2. Identify customer	2.1 Use questioning and active listening techniques to clarify

Elements	Performance Criteria
needs	customer needs and general style preferences 2.2 Establish customer's budget and expectations 2.3 Discuss and confirm customer needs in accordance with organisational customer service standards
3. Provide product advice	3.1 Identify products to meet customer requirements 3.2 Provide information about colour, fabric and design options to meet customer needs 3.3 Provide accurate technical information about products 3.4 Provide product samples and pictures to customer 3.5 Explain benefits and approximate costs of each option 3.6 Document customer decision on product and follow organisational processes for purchasing or ordering

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret unfamiliar product information from diverse sources
- Writing skills to communicate information in familiar workplace sales documents
- Oral communication skills to use questioning and active listening skills to determine needs and to clearly explain product features in language the customer can understand
- Numeracy skills to calculate product costs and costing variables.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release1. Supersedes and is equivalent to MSFSF3010 Advise customers on interior decoration.

## Links

Companion Volume implementation guides are found in VETNet --  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFSF3018 Advise customers on interior decoration products

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- clarify the needs of 3 customers and provide advice on products to meet these needs, collectively including advice on:
  - general style
  - fabric
  - colour.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- individual responsibility when providing product advice under Australian consumer law
- sources and types of information about interior decoration products
- current and emerging trends in interior decoration:
  - different styles and colour trends
  - soft furnishings
  - blinds and awnings
  - furniture and accessories
- principles of colour coordination and matching
- fabric types used in domestic furnishing applications:
  - main characteristics and uses
  - special handling requirements
  - safety considerations
  - benefits and limitations
- organisational customer service and sales protocols and procedures for:
  - interactions with customers
  - documentation requirements.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - customers
  - product information
  - product samples
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet – -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# MSFSS2003 Undertake surface preparation

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers preparing surfaces, by hand or machine, for protective coatings, under-coatings and finishes using solvents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Security Screens and Grilles

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Establish work requirements	1.1	Applicable work health and safety (WHS), legislative and organisational requirements relevant to surface preparation are verified and complied with
		1.2	Instructions, plans and/or work instructions are read and interpreted to identify processes and materials to complete work tasks
		1.3	Tools, equipment and materials are selected and checked prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition
		1.4	Where required, appropriate solvent and application method is selected to meet job specification
2	Prepare worksite	2.1	Worksite is prepared in accordance with surface cleaning

- and set up equipment activity
- 2.2 Appropriate equipment and any required consumables are assembled, set up and prepared in accordance with manufacturer specifications and organisational procedures
  - 2.3 Hazards are recognised and steps adopted to ensure safety
- 3 Prepare surfaces using solvents as required
- 3.1 Surfaces are prepared for procedures
  - 3.2 Safe working environment for solvent use is established according to regulatory requirements and organisational procedures
  - 3.3 Solvents are applied
  - 3.4 Treated surface is neutralised and made safe to handle
  - 3.5 The area is made safe in accordance with organisational procedures
- 4 Prepare surfaces using mechanical means
- 4.1 Safe working environment for mechanical surface preparation is established according to regulatory requirements and organisational procedures
  - 4.2 Surfaces are prepared to specifications using mechanical means
  - 4.3 Adjustments are made, as required, to meet specifications
  - 4.4 Surface preparation faults are rectified as necessary
  - 4.5 Equipment used is cleaned and checked for damage and operational faults in accordance with organisational procedures
- 5 Ensure surfaces are adequately prepared and clean up
- 5.1 Surface preparation is assessed for cleanliness and conformance with specification
  - 5.2 Any faults in the surface preparation are identified and action taken to remedy them in accordance with procedures
  - 5.3 Problems are reported to a designated person
  - 5.4 Records and documentation are completed in accordance with organisational procedures

- 5.5 Work area is restored and waste disposed of in accordance with organisational procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

### Unit context includes:

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving

### Surface preparation includes:

- the preparation of product material for finish coating, either powder coating or other paint type surface, through solvent or mechanical means
- mechanical means include steel brush, file, and so on

### Tools and equipment include:

- files
- hand rasps
- hand finishing tools
- power tools
- jigs
- power sanders

### Materials include:

- metal
- aluminium
- composite materials

- Hazards include:**
- acids
  - hydrocarbons and other solvents as both liquid or vapour
  - moving equipment and machinery
  - manual handling hazards
- Solvents include:**
- acids
  - hydrocarbons
- Application of solvents includes:**
- brush
  - spraying
  - wiping
  - dipping in a solvent bath
- Personal protective equipment includes:**
- that prescribed under legislation, regulation and enterprise policies and practices
- Information and procedures include:**
- workplace procedures relating to the use of tools and equipment and personal protective equipment
  - work instructions, including job sheets, cutting lists, plans, drawings and designs
  - workplace procedures relating to reporting and communication
  - manufacturer specifications and operational procedures

## Unit Mapping Information

Supersedes and is equivalent to LMFSS2004A Undertake surface preparation.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFSS2003 Undertake surface preparation

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Prepare a minimum of two (2) surfaces for powder coating or other finish without the need for further preparation
- Complete work area housekeeping activities, including clean up, effectively and in accordance with organisational procedures
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Avoid backtracking, work flow interruptions or wastage
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Organisational and site standards, requirements, policies and procedures for the preparation of surfaces for coating
- Environmental protection requirements relating to the disposal of waste material
- Established communication channels and protocols
- Relevant problem identification and resolution
- Common surface contaminants
- Treatment for different substrates
- Types of tools and equipment and procedures for their safe use, operation and maintenance
- Safe handling of hazardous materials
- Storage systems and labelling

- Procedures for the recording, reporting and maintenance of workplace records and information

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to materials, equipment and specifications for surface preparation.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

## MSFSS2004 Rectify faults in product

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to identify and rectify defects in workmanship or materials that affect the look or functional quality of security screen or grille products. Work may be performed during installation or production of security screens or grilles, or independently. Workers with this competency follow established procedures to produce or install security screens and grilles.

Licensing, legislative or certification requirements may apply to this unit and relevant state or territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking security screens and grilles work. Access to construction sites requires certification of general induction training specified by the *National Code of Practice for Induction for Construction Work (ASCC 2007)*.

### Competency Field

Security Screens and Grilles

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare for task	1.1 Determine task requirements from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Select tools and equipment to meet task requirements of job, check for serviceability, and rectify or report any faults in accordance with workplace procedures 1.4 Identify, obtain and prepare materials to complete task in accordance with job and safe handling requirements 1.5 Prepare work area and minimise noise, dust and obstacles in

	accordance with workplace procedures and environmental standards
2. Assess fault to identify rectification issues	<p>2.1 Identify and inspect faults to confirm extent and nature of fault</p> <p>2.2 Determine and report on nature and causes of faults</p> <p>2.3 Assess faults to inform required remediation approach</p> <p>2.4 Confirm solution to repair the fault and plan approach</p>
3. Rectify faults	<p>3.1 Prepare damaged or defective area for repair in accordance with workplace procedures</p> <p>3.2 Apply required specialist instruments and tools to rectify fault</p> <p>3.3 Complete rectification to damaged or defective area to meet task requirements</p> <p>3.4 Process rectified parts for inspection and return to production or installation sequence</p>
4. Clean up work area	<p>4.1 Check, clean and store equipment and unused materials in accordance with workplace procedures</p> <p>4.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures</p> <p>4.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>4.4 Complete required workplace records, including nature of fault, work conducted and outcome</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate simple factual information in familiar workplace documents

- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## **Unit Mapping Information**

Release 1. Supersedes and is equivalent to MSFSS2001 Rectify faults in product.

## **Links**

Companion Volume implementation guides are found in VETNet --

# Assessment Requirements for MSFSS2004 Rectify faults in product

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- inspect, assess and rectify at least 5 separate and different faults to specifications and workplace requirements.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace requirements, policies and procedures for manufacturing and installing security screens and grilles
- established communication channels and protocols
- faults commonly found in security screen or grille products and methods to rectify them
- tools and equipment commonly used to rectify security screen or grille products and procedures for their safe use, operation and maintenance
- characteristics of steel and aluminium products and defects
- procedures for maintaining workplace records and information
- work health and safety requirements, including personal protective equipment (PPE) and manual handling procedures.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials
  - materials, equipment and specifications required for performance evidence
  - PPE.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet – -

## MSFSS3004 Install non-security and security screens and grilles

### Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFSS3001 Install security screens and grilles

### Application

This unit of competency describes the skills and knowledge required to identify and install non-security and security screens and grilles according to job requirements. The unit involves planning job requirements, identifying required products to be installed and their measurements and fasteners, and applying workplace procedures to ensure safe and correct installation compliant with industry and Australian standards.

The unit applies to those installing non-security and security screens and grilles in residential and commercial environments on surfaces, including aluminium, concrete, masonry, steel and timber.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking non-security and security screens and grilles work. Access to construction sites requires certification of general induction training specified by the *National Code of Practice for Induction for Construction Work (ASCC 2007)*.

### Pre-requisite Unit

Not applicable.

### Unit Sector

Non-security and security screens and grilles

### Elements and Performance Criteria

Elements	Performance Criteria	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare for installation of non-security and security screens and grilles	1.1	Identify job and product requirements from work order and supplier instructions, and confirm with required personnel
	1.2	Complete check measure on site and document required product specifications, and specific access and installation requirements

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
	1.3	Identify work health and safety (WHS) and personal protection requirements of installation
	1.4	Identify and select required screens and grilles, tools and equipment based on work order, and check their safe and effective operation according to manufacturer specifications
	1.5	Plan logical, safe and efficient work sequence that reflects work order
2. Install non-security and security screens and grilles	2.1	Set up required product, materials and equipment in line with work instructions and manufacturer specifications
	2.2	Prepare installation opening for screens and grilles
	2.3	Insert and fasten security screens and grilles and install locking mechanism according to work order and manufacturer specifications
	2.4	Test installed screens and grilles for correct operation within limits of normal operation, and adjust and repair performance problems in line with own level of responsibility
3. Finalise installation	3.1	Check that completed work complies with quality and work order requirements, and rectify identified deficiencies within scope of own role
	3.2	Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures
	3.3	Identify and store surplus unused items for re-use and recycling according to workplace procedures
	3.4	Check tools and equipment, and tag and report faulty items according to established workplace procedures
	3.5	Clean and store remaining tools and equipment according to workplace procedures
	3.6	Advise customer on correct operation and maintenance of screens and grilles
	3.7	Legibly complete and process workplace documentation according to workplace requirements

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.	
Numeracy skills to:	<ul style="list-style-type: none"> <li>interpret, discuss and use mathematical information in work orders, job sheets, cutting lists, plans, drawings and designs</li> <li>use a blend of 'in the head' and formal methods and tools to estimate and measure materials and installation spaces, including factoring in required tolerances</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>confirm installation requirements and specifications, and report work outcomes and problems:               <ul style="list-style-type: none"> <li>speaking clearly</li> <li>applying effective listening techniques</li> <li>asking questions to gain information</li> </ul> </li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>interpret routine workplace documentation, including work orders, WHS requirements and safety procedures, basic plans and workplace installation procedures</li> </ul>

## Unit Mapping Information

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFSS3001 Install security screens and grilles

## Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFSS3004 Install non-security and security screens and grilles

## Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFSS3001 Install security screens and grilles

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- safely and correctly install the following in line with legislative requirements, industry and Australian standards requirements, and workplace procedures:
  - one hinged security screen door
  - one sliding security screen door
  - one internal or external fixed window grille above ground level in a residential or commercial building, demonstrating the safe and correct use of lifting and safety equipment
  - one emergency egress security screen
  - one non-security screen in any opening or building type.

In the course of each of the above installations, the person must:

- interpret work order and locate and use materials, tools and equipment required for the installation
- apply safe lifting and handling procedures
- demonstrate safe and correct use of safety equipment
- follow work instructions and safe operating procedures to:
  - minimise risk of injury to self and others
  - prevent damage to site, tools, equipment and products
  - maintain required production output and quality
  - use and maintain hand and power tools safely
  - use personal protective equipment (PPE)
  - use and dispose of waste sustainably
  - avoid backtracking, work flow interruptions and wastage
  - identify and resolve routine problems and faults encountered
  - work with others, by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of installation work orders and instructions relating to the types of non-security and security screens and grilles in the performance evidence, and how to identify and interpret key information
- work order requirements, and industry-accepted quality indicators and requirements, relating to installations described in performance evidence:
  - safety considerations and potential dangers associated with incorrect installation
  - consumer product safety standards and requirements
  - instructions for removing existing screens and grilles and installing replacement screens and grilles, including caveats on operational requirements
- key requirements of legislation, regulations, standards and codes of practice relevant to the full range of processes required to install the non-security and security screens and grilles:
  - Australian standards and National Construction Code requirements for individual installers:
    - bushfire attack levels
    - fire attenuation
    - cyclone protection
    - fall prevention
  - requirements specific to installation described in performance evidence
- operation and maintenance requirements of non-security and security screens and grilles in performance evidence
- emerging trends in installing non-security and security screens and grilles
- work health and safety (WHS) procedures, practices and regulations specific to installations described in performance evidence:
  - controlling hazards and risks
  - eliminating hazardous materials and substances
  - using firefighting equipment and first aid equipment
  - operating lifting equipment
  - using safety and personal protective equipment
- workplace procedures relating to:
  - communicating work requirements
  - accessing and inspecting installation sites
  - manual handling, including lifting and carrying
  - installing and securing non-security and security screens and grilles
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines
  - cleaning and storing tools and equipment
  - storing surplus unused items

- recording and reporting installation information:
  - installation completion and equipment faults and malfunctions
  - hazards and incidents
  - outcomes of inspection
  - lock type and location of combination and keys
  - operating limitations and requirements of installed product
  - quality outcomes
- techniques for installing and securing screens and grilles described in performance evidence, including:
  - into openings made of the following materials:
    - aluminium
    - concrete
    - masonry
    - plasterboard
    - steel
    - timber
  - preparing installation position for screens and grilles
    - removing existing screens and grilles
    - assessing suitability of jamb for screen and grille frames to be installed
    - making adjustments to existing jambs
    - safely and securely positioning screen and grille frames
    - preparing for locking mechanism
  - identifying and resolving installation and operational problems:
    - new installation problems
    - problems associated with existing opening and products in place
  - installing and securing that:
    - conform to quality requirements
    - conform to standard building practices
    - comply with supplier instructions and manufacturer specifications
    - maximise the appearance of the finished work
    - provide for economical use of materials and labour
- mathematical methods for estimating and measuring materials and installation spaces, including factoring in required tolerances
- types of common problems that occur during installation, and how to avoid and respond
- types, characteristics, terminology of, uses, maintenance and limitations of the following items required for the installations described in performance evidence:
  - products and materials specific to screen and grille installation:
    - securing products, including DynaBolts, masonry anchors, nails, nuts and bolts, screws and rivets
    - hardware, including tabs, locks, rollers and hinges

- tools and equipment:
  - hand tools, including hammers, screwdrivers, tape measures, squares, chisels and files
  - power tools, including power drills
  - equipment, including ladders, safety barricades, cones, signs, lifting equipment and scaffolding
- documentation requirements for installation work described in performance evidence.
- 

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the installation described in the performance evidence above, including:

- non-security and security screens and grilles to be installed
- locations requiring installation specified in the performance evidence
- PPE applicable to job requirements
- WHS documentation specific to the installations in the performance evidence
- tools and equipment specified in the knowledge evidence
- workplace documentation required for installations in the performance evidence, including:
  - work orders
  - job sheets, cutting lists, plans, drawings and designs
  - legislative and workplace requirements and procedures specified in the knowledge evidence
  - supplier instructions and manufacturer specifications.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# MSFSS3005 Assemble non-security and security screens and grilles

## Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFSGG2010 Fabricate and install insect and security screens

## Application

This unit of competency describes the skills and knowledge required to measure and assemble non-security and security screens and window grilles and their components. It involves following workplace procedures that comply with the requirements of industry and Australian standards.

The unit applies to those assembling non-security and security screens and grilles for residential and commercial environments. The screens and grilles may be for hinged and sliding door and window openings, and for emergency egress.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Unit Sector

Non-security and security screens and grilles

## Elements and Performance Criteria

Elements	Performance Criteria	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare to assemble non-security and security screens and grilles	1.1	Identify job requirements from work instructions and select work method for assembling screens and grilles
	1.2	Calculate quantity of required materials and prepare cutting list from plans, work instructions and measurements of opening to suit type of screen or grille to be installed
	1.3	Select fittings, fixings, joining devices and materials, and

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
		tools and equipment to meet job requirements
	1.4	Check safe and effective operation of tools and equipment according to manufacturer specifications
	1.5	Plan work sequence to suit job requirements and workplace procedures
	1.6	Check size, quantity, finish and profile of screen and grille components against work order
2. Assemble non-security and security screens and grilles	2.1	Measure and mark materials according to cutting list requirements and to maximise economical use
	2.2	Cut materials according to cutting list requirements and workplace procedures
	2.3	Assemble components of screens and grilles in line with work health and safety (WHS) requirements and job requirements, industry standards and workplace procedures
	2.4	Fasten fittings to screens and grilles according to workplace procedures
	2.5	Identify and report non-routine problems to designated personnel according to workplace procedures
3. Finalise assembly	3.1	Check that assembled product complies with quality and work instruction requirements, and rectify identified deficiencies within scope of own role
	3.2	Clean work area and surfaces, and dispose of waste safely and sustainably according to workplace procedures
	3.3	Identify and store surplus unused materials for re-use and recycling according to workplace procedures
	3.4	Check tools and equipment, and tag and report faulty items according to workplace procedures
	3.5	Clean and store remaining tools and equipment according to workplace procedures
	3.6	Legibly complete and process required workplace documentation according to workplace requirements

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.	
Numeracy skills to:	<ul style="list-style-type: none"> <li>interpret, discuss and use mathematical information in familiar work orders, cutting lists, and basic plans, drawings and designs</li> <li>use mathematical ideas and techniques to complete measurements, calculate area and estimate material requirements</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>interpret routine workplace documentation, including:             <ul style="list-style-type: none"> <li>WHS requirements</li> <li>workplace assembly procedures</li> <li>routine work instructions, including work orders, cutting lists, and basic plans, drawings and designs</li> </ul> </li> </ul>

## Unit Mapping Information

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFSGG2010 Fabricate and install insect and security screens

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFSS3005 Assemble non-security and security screens and grilles

## Modification History

Release 1. No equivalent unit. Supersedes but is not equivalent to MSFSGG2010 Fabricate and install insect and security screens

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- prepare and assemble the following in line the requirements of industry and Australian standards and workplace procedures:
  - one hinged security screen door in a residential or commercial building
  - one sliding security screen door in a residential or commercial building
  - one fixed window grille above ground level in a residential or commercial building, demonstrating the safe and correct use of safety and lifting equipment
  - one emergency egress security screen in a residential building
  - one non-security screen in any opening or building type.

In assembling the suite of non-security and security screens and grilles, the candidate must also demonstrate the ability to:

- interpret work order and locate and use materials, tools and equipment required for the assembly
- measure for windows and doors, and identify and select product materials to be used
- correctly select component hardware and fittings required for assembly:
  - door closures
  - hinges
  - lock guards
  - guides and lock mechanisms that comply with Australian Standards
  - wheels
- assemble screen and grille frame and components, optimising materials, and cutting, tooling, drilling and crimping in compliance with Australian standards
- apply safe lifting and handling procedures
- follow work instructions and safe operating procedures and inspection procedures to:
  - minimise risk of injury to self and others
  - prevent damage to site, tools equipment and products
  - maintain required production output and product quality
  - use hand and power tools safely

- use personal protective equipment (PPE)
- use and dispose of waste sustainably
- identify and resolve routine problems and faults encountered
- avoid backtracking, work flow interruptions and wastage

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- features of assembly work orders relating to the performance evidence, and how to identify and interpret key information
- work instruction requirements, and industry-accepted quality indicators and requirements, relating to the assembly described in performance evidence:
  - key requirements of industry and Australian standards
  - work flow requirements
  - safety considerations and potential dangers associated with incorrect assembly
  - pattern and plan to be followed in assembly
- operation of range of non-security and security screens and grilles in performance evidence
- work health and safety (WHS) procedures, practices and regulations specific to assembly described in performance evidence:
  - controlling hazards and risks
  - eliminating hazardous materials and substance
  - using personal protective equipment:
    - aprons and overalls
    - gauntlets
    - gloves
    - hard hats
    - safety footwear
    - safety glasses
- workplace procedures relating to:
  - identifying equipment, processes and procedures to use when assembling non-security and security screens and grilles
  - calculating quantities of required materials:
    - from plans and work instructions
    - by measuring screen opening
  - manual handling, including lifting and carrying
  - safely assembling screens and grilles
  - reporting non-routine problems
  - tagging and reporting faulty tools and equipment
  - disposing of waste safely and in an environmentally sustainable manner
  - recycling and re-use guidelines

- cleaning and storing tools and equipment
- storing surplus unused items
- recording and reporting assembly information
- techniques for assembling non-security and security screens and grilles described in performance evidence that include processes that:
  - conform to quality requirements
  - comply with supplier instructions and manufacturer specifications
  - maximise the appearance of the finished work
  - provide for economical use of materials and labour
- types, characteristics, terminology of, uses, maintenance and limitations of the following items required for the assembly described in performance evidence:
  - framing material and in-fill material
  - tools and equipment:
    - assembly benches
    - bolt cutters or mechanical shears
    - copy routers
    - crimpers
    - drop and up-cut saws
    - electric and pneumatic powered drills and screwdrivers
    - end millers
    - fly screen spline rollers
    - knives
    - pneumatic and manual presses
    - pop rivet guns
    - soft rubber mallets
    - stamping and notching tools
  - materials:
    - anti-jemmy protection hardware
    - corner stakes
    - extruded door framing
    - fittings, fixing and fasteners, including screws and pop rivets
    - fly mesh
    - heavy-duty security mesh
    - interlocks
- uses of non-security and security screen and grille products produced

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the assembly work described in the performance evidence above, including:

- non-security and security screens, grilles and work areas specified in the performance evidence requiring assembly
- PPE applicable to job requirements
- WHS documentation specific to the assembly
- materials required in the assembly of screens and grilles:
  - aluminium or other framing material
  - aluminium or other sheeting
  - fittings, fixing and fasteners
- tools and equipment specified in the knowledge evidence
- workplace documentation required for each assembly, including:
  - work orders, customer orders, job cards and work quotations
  - workplace procedures specified in the knowledge evidence
  - supplier instructions and manufacturer specifications

## MSFUP2007 Use upholstery hand and power tools

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to use hand and power tools for upholstery. Workers with this competency complete routine tasks in the upholstery sector.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Upholstery

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for tool use	1.1 Identify task requirement from work instructions 1.2 Select tools to meet task requirements and identify work health and safety requirements for their use, including use of personal protective equipment 1.3 Confirm tools are safe and functional and report any faults to supervisor 1.4 Select equipment to hold or support material based on tools selected and nature of the task 1.5 Prepare material and hold in position to ensure safe operation
2. Use tools	2.1 Use tools safely and in accordance with workplace procedures and manufacturer specifications

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	2.2 Use techniques that optimise effective use of tools for nominated task 2.3 Ensure safe state, position and location of tools in the work area when not in immediate use 2.4 Follow safety procedures for use of power and handling of power tools
3. Clean up work area and tools	3.1 Clean tools and equipment using cleaning materials and agents suited to item 3.2 Complete routine operator maintenance on tool in accordance with workplace procedures and manufacturer instructions 3.3 Store tools and equipment based on specific storage needs and workplace requirements

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures
- Numeracy skills to interpret work instructions associated with number or measurement.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFUP2001 Use upholstery sector hand and power tools.

## Links

Companion Volume implementation guides are found in VETNet – -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFUP2007 Use upholstery hand and power tools

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- choose appropriate hand tools and use safely on at least 2 separate occasions to complete upholstery projects, including at least 12 of the following:
  - adjustable spanner, sockets, or screwdriver
  - button press and cutters or stud press
  - cross pein, claw, or magnetic tack hammer
  - tin snips, side cutters, bolt cutters or pincers
  - drill
  - file, rasp, or rotating hole punch
  - hand ventilation setter
  - knife (retractable blade)
  - needle (bag) or regulator
  - spring bender or wire bender
  - pop rivet gun
  - ripping chisel
  - ruler, tape measure or nail punch
  - saw
  - seam stretcher
  - shears, scissors or foam slicer
  - soft tipped or white rubber mallet
  - staple remover or stuffing iron tack remover
  - vice or clamps
  - web pliers or web strainer
  - wood chisels
- choose appropriate power tools and use safely on at least 2 separate occasions to complete upholstery tasks, including at least 6 of the following:
  - band, circular or drop saw

- buttoning machine
- drill, impact driver or drill press
- electric iron, hot knife, or hot melt glue gun
- electric/pneumatic foam cutter or fabric cutter
- grinder
- knife fabric cutter (circular or straight)
- lacquer spray gun, silicone cartridge gun, or spray adhesive system
- nail gun or staple gun
- planer or sander.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace procedures for work health and safety
- general use, maintenance and safety requirements, including personal protective equipment (PPE), for hand and power tools used in upholstery.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - upholstery hand and power tools required for performance evidence
  - PPE
  - materials on which tools are used
  - ancillary holding equipment
  - power sources
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFUP2008 Fit upholstery components

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to fit upholstery components to furniture. Workers with this competency complete routine tasks in the upholstery sector.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Upholstery

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for component application	1.1 Determine task requirements, including components to be fitted, design variations, tolerances, process, materials, finish and quality, from work documentation 1.2 Determine fitting sequence to meet task requirements 1.3 Determine procedures for quality checking at each stage of process in accordance with workplace procedures 1.4 Identify and follow work health and safety requirements 1.5 Select fixing devices in accordance with work instructions and type of materials to be used 1.6 Select suitable work area for task 1.8 Obtain components, materials, fittings and attachments to meet task requirements

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.9 Select tools and equipment to meet task requirements and check they are safe and functional.
2. Fit components	2.1 Lay out components and attach using appropriate fastenings 2.1 Use tools and equipment to meet task requirements 2.3 Check attached components for compliance with specifications 2.4 Repair products that do not meet quality specifications or tag for further processing, or recycling or disposal, in accordance with workplace procedures 2.5 Organise and store finished products in accordance with workplace procedures
3. Complete task	3.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures 3.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures 3.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 3.4 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar work documentation and specifications
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFUP2002 Fit upholstery components.

## Links

Companion Volume implementation guides are found in VETNet --

# Assessment Requirements for MSFUP2008 Fit upholstery components

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- fit upholstery components for at least 3 different items of upholstered furniture requiring assembly.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- how to interpret work documentation for upholstered furniture items
- workflows for assembling upholstered furniture
- workplace procedures for problem and quality reporting
- types of upholstery components and their required assembly, including at least 4 of the following:
  - actions
  - arms
  - seats
  - backs
  - legs
  - facings
  - prefabricated polished timber components
  - metal components
  - plinths
  - glides
  - ceramic and plastic fittings
- typical tools and equipment used to fit upholstery components, including at least 4 of the following:
  - measuring tapes or rulers
  - staple gun

- air driver
- air drill and accessories
- scissors and mallets
- air wrench
- nail gun
- clip gun
- tack hammer
- ripping chisels and staple removers
- personal protective equipment (PPE) required when fitting upholstery components
- materials commonly used in fitting upholstery components, including:
  - finished upholstery components
  - frames
  - glues
  - screws
  - nails and staples and other fixing devices
- checks required when fitting upholstery components, including:
  - alignment and squareness
  - correct fastening
  - materials and attachment according to work instruction
  - conformity to work instructions and quality requirements
- work health and safety requirements, including personal protective equipment (PPE) and manual handling procedures.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders or plans
  - upholstery hand and/or power tools, equipment, materials and basic machinery required for performance evidence
  - PPE
  - components for fitting
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFUP2009 Apply contemporary foundations to upholstered furniture

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to construct upholstery foundations using modern methods. Workers with this competency complete routine tasks in the upholstery sector.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Upholstery

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements from work documentation 1.2 Identify and follow work health and safety procedures 1.3 Identify attaching methods and determine fitting sequence to meet task requirements 1.4 Select and prepare work area to meet task requirements 1.5 Select tools and hardware to meet task requirements and check they are safe and functional 1.6 Select required foundation components

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Attach foundation	2.1 Measure required mounting points and mark on frame 2.2 Position contemporary foundation and use appropriate fasteners to secure it to item 2.3 Inspect foundation for fit, finish and quality, and tag those requiring reworking or refitting for further reprocessing or recycling or disposal in accordance with workplace procedures 2.4 Monitor process and note conditions that may affect quality standards in accordance with workplace procedures 2.5 Report variations to normal activities in accordance with workplace procedures 2.6 Implement authorised changes to standard operating and procedures and task requirements in accordance with workplace procedures
3. Complete task	3.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures 3.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures 3.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 3.4 Complete required workplace records in accordance with workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSTUP2003 Apply contemporary foundations to upholstered furniture.

## Links

Companion Volume implementation guides are found in VETNet --

# Assessment Requirements for MSFUP2009 Apply contemporary foundations to upholstered furniture

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- use contemporary foundation items to construct foundations for at least 3 items of furniture, one being a chair requiring seat, back and arms.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workflow in relation to furniture production
- contemporary foundation types and fittings, including at least 4 of the following:
  - elastic webbing
  - nylon webbing
  - no-sag springs
  - conical springs
  - plastic and styrene edging
  - foam and polyester fibre
- materials used in contemporary foundations, including at least 6 of the following:
  - elastic webbing
  - nylon webbing
  - coil springs
  - spiral springs
  - no-sag springs
  - pulma flex
  - plastic and styrene edging
  - foam
  - hessian and polyester fibre
- tools and equipment, including personal protective equipment (PPE), commonly used in contemporary foundation construction

- work health and safety requirements, including PPE and manual handling procedures
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - furniture frames, fittings, tools and equipment, including PPE, required for performance evidence
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFUP2010 Machine sew basic upholstery final cover materials

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to sew upholstery final cover materials using simple sewing machines (flat bed, walking foot or overlocker) and techniques to join two or more pieces of upholstery fabric or vinyl and canvas together. Workers with this competency complete routine tasks in the upholstery sector.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Upholstery

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Determine machines, materials, work method and sequence to meet task requirements 1.4 Identify equipment, supplementary equipment, components and controls and check they are safe and functional 1.5 Identify materials to be used, check they meet task requirements, including those for quality, and report problems in accordance with workplace procedures 1.6 Lay out work pieces in sequence in accordance with task

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	requirements and workplace procedures
2. Control sewing operation	2.1 Set up sewing machine, including attachments, and adjust for task requirements 2.2 Operate machine to maintain required product quality and quantity according to task and workplace requirements 2.3 Check that finished products meet task quality requirements and perform required repairs 2.4 Direct completed work to next operation in accordance with workplace procedures
3. Complete task	3.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures 3.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures 3.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures 3.4 Complete required work records in accordance with workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading and writing skills to confirm work requirements and specifications, and to report work outcomes and problems, interpret basic plans and follow safety procedures.
- Numeracy skills to measure and calculate lengths and areas and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFUP2004 Machine sew basic upholstery final cover materials.

## Links

Companion Volume implementation guides are found in VETNet --

# Assessment Requirements for MSFUP2010 Machine sew basic upholstery final cover materials

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- join final cover materials for fitting to at least 2 items of upholstered furniture using a basic (flat bed, walking foot or overlocker) sewing machine
- sew piping for an item of upholstered furniture
- make seams on fabric, vinyl and canvas.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- procedure for reporting damaged or imperfect products
- workflow requirements for sewing
- how to interpret job requirements from documentation, including:
  - materials
  - threads
  - shape and any special requirements for the item
  - any required workplace documentation to be completed
- how to set up and adjust a basic sewing machine, including:
  - threading machine and winding bobbin
  - setting required tensions
  - selecting required machine settings
  - lubricating and adjusting the machine
  - testing operations for work order requirements
- characteristics of materials used and finished products
- causes of faults and repair methods
- how to identify equipment, processes and procedures
- quality systems and standards

- work health and safety requirements, including personal protective equipment and manual handling procedures.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials
  - appropriate sewing machines, work orders, operating procedures, materials and threads required for performance evidence’.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFUP2011 Develop cutting plan and cut single layer upholstery fabric

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to develop a cutting plan and measure out and cut single-layer plain and patterned upholstery fabrics. Workers with this competency complete routine tasks in the upholstery sector.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Upholstery

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare for cutting	<p>1.1 Determine task requirements, including required fabrics, number and nature of items to be cut and required equipment, from work documentation</p> <p>1.2 Identify fabric sizes to be cut from task requirements, including any required seam allowances</p> <p>1.3 Determine work methods and sequence from task requirements and in accordance with workplace procedures</p> <p>1.4 Identify and follow work health and safety requirements</p> <p>1.5 Select and prepare suitable work area and ensure it is clear of contaminants</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Prepare fabric for cutting and develop cutting plan	<p>2.1 Select suitable scissors, cutting machines, and knives or blades and check for appropriate sharpness, set, operation and safe condition</p> <p>2.2 Select fabric, noting if it is railroaded, and check for quantity, quality, contaminants, size, pattern and consistency in accordance with workplace procedures</p> <p>2.3 Lay out fabric smooth and square and inspect for flaws and appropriate finish</p> <p>2.4 Identify nap or pile direction, pattern matches and face of materials</p> <p>2.5 Develop cutting plan to minimise waste and in accordance with workplace procedures</p> <p>2.6 Measure and mark fabric, including registration points, in accordance with workplace procedures</p>
3. Cut material	<p>3.1 Confirm measurements and make required adjustments to positioning</p> <p>3.2 Cut fabric in accordance with manufacturer instructions and workplace procedures</p> <p>3.2 Inspect cut material against job requirements, and reprocess unsatisfactory items in accordance with workplace procedures</p> <p>3.3 Fold, wrap and store or package cut items in accordance with workplace procedures</p>
4. Complete task	<p>4.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures</p> <p>4.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures</p> <p>4.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures</p> <p>4.4 Complete required workplace records</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate lengths and area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFUP2005 Develop cutting plan and cut single layer upholstery fabric.

## Links

Companion Volume implementation guides are found in VETNet --

# Assessment Requirements for MSFUP2011 Develop cutting plan and cut single layer upholstery fabric

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- develop a cutting plan and measure, mark out, and cut upholstery fabric to meet workplace quality requirements, including at least one patterned material and at least 5 of the following:
  - velour/velvet
  - tapestry
  - damask
  - linen
  - cotton
  - outdoor fabric or acrylic canvas
  - vinyl.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work requirements, including workplace standards, for cutting single-layer fabric
- workflows for planning and cutting upholstery fabric
- fabric types, common faults and inspection procedures
- design features of the finished items in relation to attractive use of fabric patterns
- common tools and equipment required for developing a cutting plan and cutting single-layer upholstery fabric, including:
  - cutting equipment, including:
    - scissors
    - cutting machines
    - knives or blades
  - hot knife (for acrylics)
  - measuring and calculating equipment, including:

- tapes
- rulers
- calculators
- computers
- cutting table
- work health and safety requirements, including personal protective equipment (PPE) and manual handling procedures.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - work orders
  - fabrics, tape measure, cutting table, cutting machines, cutting knives, and blades and scissors
  - PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFUP2012 Dismantle and reassemble furniture for upholstery

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to dismantle and reassemble furniture and fittings for the purposes of fitting or refurbishing upholstery. Workers with this competency complete routine tasks in the upholstery sector.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Upholstery

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for work	1.1 Determine task requirements including process or order for dismantling from work documentation 1.2 Inspect item to be dismantled and identify components to guide sequence for dismantling 1.2 Identify and follow work health and safety requirements 1.4 Select tools and equipment to meet task requirements, check they are safe and functional and report any faults to supervisor in accordance with workplace procedures
2. Dismantle furniture	2.1 Dismantle items using tools and procedures and to extent required to meet task requirements 2.2 Inspect any previous upholstery for wear and condition and identify

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	application techniques 2.3 Remove and store fasteners and attachments in accordance with workplace procedures 2.4 Separate, tag and store component parts in accordance with workplace procedures 2.5 Dispatch component parts to next process in accordance with workplace procedures
3. Reassemble furniture	3.1 Identify items to be reassembled from task requirements 3.2 Reassemble items using tools and procedures to meet task requirements 3.3 Select and use fasteners and attachments in accordance with workplace procedures 3.4 Dispatch assembled piece to next process in accordance with workplace procedures
4. Complete task	4.1 Check, clean and store equipment and unused materials in accordance with workplace procedures 4.2 Identify and tag faulty equipment and inform appropriate personnel in accordance with workplace procedures 4.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 4.4 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFUP2006 Dismantle and re-assemble furniture for upholstery.

# Assessment Requirements for MSFUP2012 Dismantle and reassemble furniture for upholstery

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- dismantle and reassemble at least 4 different upholstered furniture items, including:
  - one armchair
  - one sofa.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- construction techniques and processes for upholstered furniture
- how to avoid damage to materials commonly used in furniture/furnishings during dismantling and reassembly, including at least 4 of the following:
  - timber
  - manufactured board
  - veneer
  - brass
  - laminate
  - perspex
- the function of tools and equipment commonly used for dismantling and reassembling upholstered furniture, including at least 4 of the following:
  - measuring tapes or rulers
  - hammers
  - rubber mallet
  - pincers
  - screwdrivers
  - shifting spanner
  - spanners
  - socket set

- hacksaw and blades
- clamps
- timber wedges
- wood chisels
- dowel drill
- long-nose pliers
- floor board lifter
- power drill/screwdriver
- air compressor and hoses
- workflows for dismantling and reassembling furniture
- work health and safety requirements, including personal protective equipment (PPE) and manual handling procedures.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - upholstered furniture for dismantling/re-assembling required for performance evidence
  - tools and equipment, including PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFUP3015 Apply traditional foundations to upholstered furniture

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to construct traditional upholstery foundations. Upholstery workers with this competency work in accordance with established procedures, using some discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Upholstery

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan task	1.1 Determine task requirements, including confirming type of traditional furniture foundations to be applied, from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Identify attaching methods and determine fitting sequence to meet task requirements 1.4 Select and prepare work area to meet task requirements 1.5 Select tools and hardware to meet task requirements and check they are

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	safe and functional 1.6 Select traditional foundation components to meet task requirements
2. Prepare and attach traditional foundation	2.1 Measure required mounting points and mark on frame 2.2 Position traditional foundation and use appropriate fasteners to secure to item 2.3 Inspect applied foundation for fit, finish and quality, and tag those that require rework, recycling or disposal in accordance with workplace procedures 2.4 Monitor process and note conditions that affect quality standards 2.5 Report variations to normal activities in accordance with workplace procedures 2.6 Implement authorised changes to standard operating procedures and task requirements in accordance with workplace procedures
3. Complete task	3.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures 3.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures 3.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures 3.4 Complete required workplace records, including stock usage, in accordance with workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate lengths and areas and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFUP3001 Apply traditional foundations to upholstered furniture.

# Assessment Requirements for MSFUP3015 Apply traditional foundations to upholstered furniture

## Modification History

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- apply traditional foundations to at least 3 items of upholstered furniture, collectively including at least 4 of the following:
  - interlace and turn back jute webbing
  - tie off and lace up coil springs
  - fit hessian bridles (loose and/or deep)
  - use coconut fibre
  - use wadding (flock or linters)
  - create a stitched edge (one blind, one top, one edge roll).
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workflow for furniture production and refurbishment
- traditional foundation types and fittings
- techniques for constructing traditional foundations
- characteristics and uses of materials, including at least 6 of the following, in traditional foundations:
  - webbing
  - coil springs
  - flock
  - linters
  - coconut fibre
  - bridle
  - bridle ties
  - solid timber base
  - padded frames
  - hard edge
  - hessian
  - calico
  - lacing twine

- twine for stitched edging and sewing in springs
- tools and equipment commonly used in traditional foundation construction
- work health and safety requirements, including personal protective equipment (PPE) and manual handling procedures.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - tools and equipment required for performance evidence
  - PPE
  - furniture frames and materials
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFUP3016 Fit and apply final cover materials to furniture using basic techniques

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to fit and apply plain and patterned materials as the final covering to upholstered furniture using basic techniques.

Upholstery workers with this competency work in accordance with established procedures, using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Upholstery

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements including design, fabrics, accessories and finish from work documentation or spoken instructions 1.2 Identify and follow work health and safety requirements 1.3 Determine materials, work method and sequence to meet task requirements 1.4 Select and prepare suitable work area and clear it of contaminants 1.5 Select equipment and tools to meet task requirements and check they

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>are operating safely</p> <p>1.6 Check that furniture frames and foundations are free of contaminants and in suitable condition for attaching final covers, and perform required modifications or repairs in accordance with workplace procedures</p> <p>1.7 Check that material panels conform with specifications provided in work documentation or spoken instructions</p> <p>1.8 Select trims and check that they meet task requirements</p>
2. Fit and apply fabric	<p>2.1 Lay out work pieces in sequence in accordance with task requirements and workplace procedures</p> <p>2.2 Attach materials to furniture in accordance with workplace procedures and industry standards</p> <p>2.3 Secure materials to foundation using appropriate fixing processes</p> <p>2.4 Check finish of applied material against task and workplace quality standards</p>
3. Fit and apply fabric and trim	<p>3.1 Apply trims in accordance with task requirements and workplace procedures</p> <p>3.2 Check that trims meet task quality requirements in accordance with workplace procedures</p> <p>3.3 Reprocess or make final adjustments to ensure finish meets task and workplace quality requirements</p>
4. Complete task	<p>4.1 Package, protect and store finished product in accordance with workplace procedures</p> <p>4.2 Check, clean and store equipment and any unused materials in accordance with workplace procedures</p> <p>4.3 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures</p> <p>4.4 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>4.5 Complete required workplace records</p>

# Assessment Requirements for MSFUP3016 Fit and apply final cover materials to furniture using basic techniques

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- fit and apply a patterned fabric cover to a minimum of 2 items of furniture and 2 sets of cushions
- fit and apply covers in plain material to a minimum of 2 items of furniture, including a unit construction piece with seat, back and two arms.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work requirements, including workplace quality standards, for fitting and applying final covers
- workflows for applying final material covers to furniture
- common faults and inspection procedures for materials used for final covers, including:
  - plain and patterned fabrics
  - vinyl
  - velvet
- the function of items used in applying final covers to furniture, including at least 5 of the following:
  - piping
  - double piping
  - cords
  - gimp
  - glues
  - staples
  - buttons
  - tacks
  - tinges and antique nails

- quality requirements for applying final cover materials, including ensuring that:
  - patterns, naps/pile, sheens, direction of pattern, pattern repeat, and finished side of the materials are positioned appropriately
  - the finish of the material over the furniture foundation is smooth and consistent
  - weaving lines are straight and square to each other
- tools commonly used when applying final cover materials to furniture
- work health and safety requirements, including personal protective equipment and manual handling procedures.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources required for performance evidence, including:
  - work orders
  - cover materials, trims, furniture frames and foundations, fixing materials and tools
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# Assessment Requirements for MSFUP3017 Fit and apply final cover materials to furniture using decorative techniques

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- fit and apply a final material cover for:
  - 2 bedheads of at least 700 mm x 500 mm, using diamond buttoning, one with hand pleating, one with stitched pleating
  - a chair, using other decorative finishes, including one or more of the following:
    - pleating
    - fluting
    - stab and deep buttoning (elongated).
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work requirements, including workplace quality standards, for fitting and applying final covers with decorative finishes
- workflows for applying final material covers to upholstered furniture using decorative techniques
- characteristics, common faults and inspection procedures for material used for final covers, including:
  - plain and patterned fabrics
  - vinyl
  - velvet
- the function and characteristics of items used in applying final covers to furniture, including at least 5 of the following:
  - piping
  - cords
  - pleats
  - glues
  - staples

- buttons
- tacks
- tangles/gimp pins
- antique nails/upholstery studs
- quality requirements for applying final cover materials, including ensuring that:
  - patterns, naps/pile, sheens, direction of pattern, pattern repeat, and finished side of the materials are positioned appropriately
  - the finish of the material over the furniture foundation is smooth and consistent
  - weaving lines are straight and square to each other
- tools commonly used when applying final cover materials to furniture
- work health and safety requirements, including personal protective equipment (PPE) and manual handling procedures.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - cover materials, trims, furniture frames and foundations, fixing materials and tools required for performance evidence, including PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFUP3018 Lay out patterns and cut leather

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to select leather hides, lay out patterns, and cut leather by hand to the required pattern.

Upholstery and other textile workers with this competency work in accordance with established procedures, using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Upholstery

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements from work documentation, including required colour and quality of materials, number of items to be cut, and tools and equipment required 1.2 Identify and follow work health and safety requirements 1.3 Select and prepare suitable work area and clear it of contaminants 1.4 Identify where pattern pieces fit in finished furnishing component and identify areas subject to high wear 1.5 Select scissors or blades to cut leather and check they have

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>appropriate sharpness</p> <p>1.6 Check that tools and equipment are in functional and safe condition</p> <p>1.7 Select hide, spread out and inspect to identify flaws and durable and less durable parts</p> <p>1.8 Identify direction of natural markings and finished side of leather to inform pattern lay-out</p>
2. Lay out pattern	<p>2.1 Lay out patterns in accordance with workplace procedures and instructions, using low-wear parts of hide on the less heavily used furniture components, and maximising use of hide for the design</p> <p>2.2 Mark any registration points on pattern and follow other instructions to match pattern</p> <p>2.3 Measure hide and make appropriate adjustments</p>
3. Cut leather	<p>3.1 Complete cutting operations in accordance with work instructions and procedures</p> <p>3.2 Inspect cut work, identify any faults and take appropriate remedial action in accordance with workplace procedures</p> <p>3.3 Regularly check performance of cutting equipment, including evidence from cut pieces, for signs of faulty operation</p> <p>3.4 Wrap cut-out components using appropriate protective covers and attach care label information</p>
4. Complete task	<p>4.1 Fold, protect and dispatch cut components to next process following workplace procedures</p> <p>4.2 Check, clean and store equipment and any unused materials in accordance with workplace procedures</p> <p>4.3 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures</p> <p>4.4 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>4.5 Complete required workplace records</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate lengths and areas and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFUP3004 Lay out patterns and cut leather.

# Assessment Requirements for MSFUP3018 Lay out patterns and cut leather

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- select appropriate leather for at least one leather armchair
- measure and cut selected leather for that armchair to match patterns.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work requirements, including workplace standards and inspection procedures, for laying out patterns and cutting leather
- features of different leather types, common faults, and wear capability of different parts of the hide (may be a full hide or partial), including:
  - suitable thickness and quality
  - natural markings
  - finished and unfinished sides
  - high and low wear
  - direction of markings
  - flaws and blemishes
  - colour variation between hides
  - flexibility
- workflows for cutting leather and laying out patterns
- design features of the finished furnishing items and how these relate to laying out the pattern and cutting the leather
- tools commonly used to cut leather, including:
  - scissors
  - cutting blades and electric shears
- work health and safety requirements, including personal protective equipment (PPE) and manual handling.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work order
  - appropriate scissors and cutting blades, leather, patterns and work order required for performance evidence
  - PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFUP3019 Machine sew complex upholstery final cover materials

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to use specific sewing machine techniques to sew upholstery final cover materials. It includes the production of specialised products and decorative finishes using industrial sewing machines and attachments.

Upholstery workers with this competency work in accordance with established procedures, using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Upholstery

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	<p>1.1 Determine task requirements from work documentation, including materials, threads, features, special requirements and shape of finished item</p> <p>1.2 Identify and follow work health and safety requirements</p> <p>1.3 Determine machines, attachments, materials, work method and sequence of tasks to meet task requirements</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.4 Identify equipment, including any supplementary equipment, and check it is operating effectively and safely 1.5 Identify and inspect materials and report on problems, including any materials or part-constructed products that do not meet task requirements, in accordance with workplace procedures 1.6 Lay out work pieces in sequence in accordance with task requirements and workplace procedures
2. Conduct sewing operation	2.1 Set up and adjust sewing machine, including attachments, to meet task requirements 2.2 Operate machine to maintain required product quality and outputs 2.3 Check that finished products meet workplace quality standards
3. Complete task	3.1 Direct completed work to next operation in accordance with workplace procedures 3.2 Check, clean and store equipment and any unused materials in accordance with workplace procedures 3.3 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures 3.4 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 3.5 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate length and area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

# Assessment Requirements for MSFUP3019 Machine sew complex upholstery final cover materials

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- complete at least 1 double-sided stool top with double-stitched quartering of different materials and twin needle decorative finishes, including 3 of the following:
  - single and double piping
  - blind hemming
  - balloon seam
  - gathering
  - sewing with specialised attachments, including gathering
  - sewing fasteners and attachments, including sewing of zips and Velcro.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- procedures for reporting damaged or imperfect products or interruption to workflow
- workflow requirements for upholstery sewing process
- how to operate sewing equipment, including:
  - flat bed
  - walking foot
  - overlocker
  - post or flatbed twin needle
- how to set up and adjust sewing machine features, including:
  - threading machine and winding bobbin
  - setting required tensions
  - selecting required machine settings
  - lubricating and adjusting the machine
  - testing operations to meet work order requirements
- characteristics of materials and their response to machine sewing, including:

- fabrics
- vinyl
- canvas
- acrylics
- leather
- quality systems and standards for machine sewing upholstery cover materials
- workplace procedures for machine sewing
- work health and safety requirements, including personal protective equipment (PPE) and manual handling procedures.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - sewing machine, materials for sewing and threads required for performance evidence
  - PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFUP3020 Fit and apply leather to furniture

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to fit and apply leather that has been pre-cut to a pattern to an upholstered item of furniture.

Upholstery workers with this competency follow established procedures, using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Upholstery

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements, including design, accessories and finish specifications, from work documentation or spoken instructions 1.2 Identify and follow work health and safety requirements 1.3 Determine materials, work method and sequence to meet task requirements 1.4 Select and prepare suitable work area and clear it of contaminants 1.5 Select equipment and tools to meet task requirements and check they are safe and functional 1.6 Check that furniture frames and foundations are in suitable condition

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>for task requirements, and modify or repair as required in accordance with workplace practices</p> <p>1.7 Check leather panels meet task requirements in terms of quantity, quality, grain, size and wear stress</p> <p>1.8 Select and check trims are free of contaminants and meet task requirements for quantity, quality, size, pattern and consistency</p>
2. Fit and apply leather	<p>2.1 Lay out work pieces in sequence in accordance with task requirements and workplace procedures</p> <p>2.2 Apply leather pieces to furniture, ensuring that appropriate leather is fitted to high wear areas and that there is a smooth and consistent finish of leather over the furniture foundation</p> <p>2.3 Apply required decorative features, including pleats, to leather before fitting</p> <p>2.4 Secure leather to foundation using appropriate fixing processes</p> <p>2.5 Check finish of applied leather against task quality standards</p>
3. Apply trim	<p>3.1 Lay out work pieces in sequence in accordance with task requirements and workplace procedures</p> <p>3.2 Apply trims and decorative finishes to item in accordance with task requirement and workplace procedures</p> <p>3.3 Check trims and decorative finishes against task quality requirements and perform any required modifications or repairs</p> <p>3.4 Make any required final adjustments to ensure finish of completed item meets quality standards</p>
4. Complete task	<p>4.1 Package, protect and store finished product in accordance with workplace procedures</p> <p>4.2 Check, clean and store equipment and any unused materials in accordance with workplace procedures</p> <p>4.3 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures</p> <p>4.4 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>4.5 Complete required workplace records</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFUP3006 Fit and apply leather to furniture.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFUP3020 Fit and apply leather to furniture

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- fit and apply pre-cut leather pieces, including pleats, to at least one furniture item.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work requirements including workplace standards for fitting and applying leather to furniture
- workflows for applying leather to furniture
- leather types and their characteristics, common faults and inspection procedures, including:
  - natural markings
  - finished and unfinished sides
  - high and low wear
  - direction of markings
  - flaws and blemishes
  - colour variation between hides
  - flexibility
- workplace and industry standards for quality and fit of finished product
- tools and equipment typically used to fit and apply leather to furniture, including:
  - scissors
  - single or multi-needle flatbed sewing machines
  - heat guns
  - hammers
  - staple guns
  - skiving machines and hand sewing needles
- materials typically used to fit and apply leather to furniture, including:

- glues
- staples
- buttons
- tacks
- piping
- cords
- banding
- hidem binding and pleats
- work health and safety requirements, including personal protective equipment (PPE) and manual handling procedures.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - leather panels, trims, furniture frames and foundations required for performance evidence
  - PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFUP3021 Manufacture and fit loose covers

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to develop a pattern to meet a loose cover requirement, cut from that pattern, and make and fit the loose cover to an item of upholstered furniture.

Upholstery workers with this competency follow established procedures, using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Upholstery

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements, including design, fabrics, accessories and finish specifications, from work documentation or spoken instructions 1.2 Identify and follow work health and safety requirements 1.3 Determine materials, work method and sequence to meet task requirements 1.4 Select and prepare suitable work area and clear it of contaminants 1.5 Select equipment and tools to meet task requirements and check they

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	are safe and functional
2. Develop patterns	<p>2.1 Develop 3D templates from surface of existing furniture without undue distortion</p> <p>2.2 Mark out and cut out component shapes using appropriate technique for material</p> <p>2.3 Produce standard 2D patterns in accordance with specifications and to accepted standards and construction tolerances</p> <p>2.4 Review patterns against client specifications and task requirements</p> <p>2.5 Consult and clarify requirements with client</p>
3. Select and cut fabric	<p>3.1 Select and inspect fabrics in accordance with task requirements and lay out smooth and square</p> <p>3.2 Identify nap/pile, direction of pattern, pattern repeat and finished side of materials</p> <p>3.3 Square up fabrics to edges or guide markings on cutting table to ensure optimal cutting</p> <p>3.4 Lay out patterns using registration points on pattern and other instructions to match required fabric pattern and minimising fabric waste</p> <p>3.5 Cut fabric and inspect cut components in accordance with workplace procedures</p>
4. Sew panels	<p>4.1 Identify and follow sewing machine set-up requirements and make required adjustments</p> <p>4.2 Ensure machine sewing maintains required product quality and outputs</p> <p>4.3 Check finished loose covers for required quality and reprocess as required in accordance with workplace procedures</p>
5. Fit and finish cover	<p>5.1 Apply loose cover to upholstered furniture and check for fit</p> <p>5.2 Apply required decorative accessories</p> <p>5.3 Make required adjustments to ensure fit meets quality standards and specifications</p>
6. Complete task	<p>6.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures</p> <p>6.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>6.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>6.4 Complete required workplace records</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate length and area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFUP3007 Manufacture and fit loose covers.

# Assessment Requirements for MSFUP3021 Manufacture and fit loose covers

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- develop 2 patterns for loose covers for given items of furniture, including:
  - one plain material, including piping detail
  - one patterned material with inverted pleat skirt, including piping detail.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work requirements, including workplace standards and workflows for manufacturing and fitting loose covers
- fabric types, including plain, patterned and velvet, and common faults and inspection procedures
- design features of the finished furnishing items and how this relates to laying out the pattern and cutting the fabrics
- sewing machines typically required to make loose covers, including:
  - single or multi-needle flatbed
  - walking foot
  - overlocker and gatherer
- how to set up and adjust sewing machine features, including:
  - threading machine and winding bobbin
  - setting required tensions
  - selecting required machine settings
  - lubricating and adjusting the machine
  - testing operations for work order requirements
- work health and safety requirements, including personal protective equipment (PPE) and manual handling procedures.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - plain and patterned fabrics, sewing machines and furniture to be upholstered for performance evidence
  - PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFUP3022 Apply finishing techniques to upholstered furniture

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to use concealing and decorative finishing techniques to hand finish upholstered furniture.

Upholstery workers with this competency follow procedures, using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Upholstery

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements including upholstered components to be finished from work documentation or spoken instructions 1.2 Identify and follow work health and safety requirements 1.3 Assemble items to be finished in an appropriate work area and check that they meet task quality requirements 1.4 Select tools, equipment, finishing materials and hardware to meet task requirements
2. Apply finishing	2.1 Apply finishing techniques in accordance with workplace procedures

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
techniques	2.2 Notify appropriate personnel of any problems in accordance with workplace procedures 2.3 Inspect finished upholstered item against task requirements, and send unsatisfactory finish for reworking
3. Complete task	3.1 Package, store and tag finished work and dispatch to next process in accordance with workplace procedures 3.2 Check, clean and store equipment and any unused materials in accordance with workplace procedures 3.3 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures 3.4 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 3.5 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

# Assessment Requirements for MSFUP3022 Apply finishing techniques to upholstered furniture

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- hand sew at least 2 items of upholstered furniture using 2 different sewing methods, collectively including cushion-mouth or outside-back sewing techniques
- sew using each of these concealed finishing techniques:
  - straight-edge
  - shark's-teeth
- apply 3 of the following to upholstered furniture:
  - scroll gimp/braid
  - close studding
  - open studding
  - continuous studding
  - double piping
  - single piping as a finish in a groove
  - band and stud finish
  - flange cord
  - cord and ruching.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- fabric types, common faults and inspection procedures
- materials typically used to finish upholstered furniture, including:
  - fabrics
  - leather
  - upholstery nails
  - gimping
  - metal trim

- piping and vinyl
- finishing methods used for different fabric types
- the function of tools and equipment typically used to finish upholstered furniture, including:
  - needles and threads
  - tack hammers
  - hammers
  - hot melt glue gun
- work health and safety requirements, including personal protective equipment (PPE) and manual handling procedures.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - sewing equipment, hardware and fabrics required for performance evidence
  - PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFUP3023 Develop cutting plan and cut multiple layer upholstery fabric

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to develop a cutting plan and cut multiple layer upholstery fabrics such as velvet or vinyl and plain or patterned fabric by hand or using automatic methods.

Upholstery workers with this competency follow established procedures, using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Upholstery

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements, including required fabrics and equipment and number and nature of items to be cut, from work documentation 1.2 Identify and follow work health and safety requirements 1.3 Determine work methods and sequence from task requirements and in accordance with workplace procedures 1.4 Select and prepare suitable work area and clear it of contaminants

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>1.5 Select appropriate equipment and tools for cutting fabrics and check they are operating safely</p> <p>1.6 Select fabric and check that it is free of contaminants and meets quantity, quality, size, pattern and consistency requirements for job in accordance with workplace procedures</p> <p>1.7 Check that scissors and other cutting equipment are appropriately sharp, functional and in safe condition</p>
2. Develop cutting list and cutting plan	<p>2.1 Note cutting requirements, including bias or other instructions, to inform planning</p> <p>2.2 Take and note measurements for upholstered items to inform planning</p> <p>2.3 Develop cutting list using appropriate format, abbreviations and terminology for cut sizes, names and number of pieces in accordance with workplace procedures</p> <p>2.4 Develop cutting plan taking account of railroaded fabric and ensuring that fabric is laid correctly to indicate run for each panel, that dimensions for each component part are noted, and that fabric waste is minimised, in accordance with workplace procedures</p>
3. Prepare materials for cutting	<p>3.1 Lay out selected fabrics in accordance with task requirements and check that it is free of flaws and has appropriate finish</p> <p>3.2 Identify nap/pile direction, direction of pattern, pattern repeat and finished side of the materials to inform layout of pieces</p> <p>3.3 Square up fabrics to edges or guide markings on cutting table</p> <p>3.4 Lay out patterns in accordance with work procedures and instructions, using registration points on pattern and other instructions to match required fabric pattern</p>
4. Cut material	<p>4.1 Confirm measurements and make required adjustments to positioning</p> <p>4.2 Check that tools and equipment are safe and functional</p> <p>4.3 Complete required cutting operations in accordance with workplace procedures</p> <p>4.4 Inspect cut fabric for quality and process unsatisfactory items in accordance with workplace instructions</p> <p>4.5 Fold fabrics, wrap using appropriate protective covers, and attach care label information prior to dispatch to next process in accordance</p>

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	with workplace procedures
5. Complete task	5.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures 5.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures 5.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 5.4 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate length and area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFUP3009 Develop cutting plan and cut multiple layer upholstery fabric.

# Assessment Requirements for MSFUP3023 Develop cutting plan and cut multiple layer upholstery fabric

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- develop a cutting plan for at least 5 different products. At least 4 of the following materials should be included. At least 1 material should be patterned:
  - velour/velvet
  - tapestry
  - damask
  - linen
  - cotton
  - outdoor fabric or acrylic canvas
  - vinyl.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- common faults and inspection procedures for material, including:
  - plain and patterned fabric
  - velvet
  - vinyl
- work requirements, including workplace standards, for cutting multiple layer fabrics
- typical tools and equipment required for cutting multiple layer upholstery fabrics, including:
  - cutting table
  - tape measures
  - scissors
  - cutting blades
  - round knife cutter
  - straight knife

- automatic cutting machines and cloth cutting machine
- work health and safety requirements, including personal protective equipment (PPE) and manual handling procedures.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - cutting tools and fabrics required for performance evidence
  - PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFUP3024 Cut, sew and fit skirts to upholstered furniture

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to measure, mark out, cut and sew skirts for items of upholstered furniture. Upholstery workers with this competency follow established procedures using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Upholstery

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan task	1.1 Determine task requirements including design, fabrics, accessories and finish for the skirts from work documentation or spoken instructions 1.2 Identify and follow work health and safety requirements 1.3 Determine work method and sequence from task requirements 1.4 Select and prepare suitable work area and clear it of contaminants 1.5 Select equipment and tools to meet task requirements and check they are safe and functional 1.6 Check fabric is free of contaminants and meets task requirements for quantity, quality, size, pattern and consistency

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2. Measure and mark out pattern/template	2.1 Measure furniture item to be fitted or obtain measurements from work documentation 2.2 Develop pattern or template from measurements 2.3 Lay out fabric and position pattern or template to conform with pattern, nap or direction of fabric and to minimise wastage 2.4 Mark any registration points and follow other instructions to match pattern to fabric 2.5 Mark fabric in accordance with workplace procedures
3. Cut and sew skirts	3.1 Square up fabric to edges or guide markings on cutting table 3.2 Cut fabric and check that work is within tolerance for accuracy in accordance with workplace procedures 3.3 Identify and follow sewing machine set-up requirements and adjustments 3.4 Operate machine to maintain required product quality and output 3.5 Check that finished skirts meet quality requirements and reprocess as required by workplace procedures
4. Complete task	4.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures 4.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures 4.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 5.4 Complete required workplace records

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents

- Numeracy skills to measure and calculate length and area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFUP3010 Cut, sew and fit skirts to upholstered furniture.

## Links

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFUP3024 Cut, sew and fit skirts to upholstered furniture

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- measure, mark out, cut and sew each of the following types of skirts, 2 of which must be lined and one of which must be fitted to a footstool or chair:
  - knife pleat skirt
  - box pleat skirt
  - mock box pleat skirt
  - inverted pleat skirt.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work requirements, including workplace standards and inspection procedures, for fabricating skirts
- workflows for fabricating skirts
- material types and characteristics, common faults and inspection procedures, including:
  - fabric
  - calico
  - chalk
  - pattern/template material
- design features of the finished furnishing items in relation to laying out the pattern and cutting the fabric
- tools and equipment typically required to cut, sew and fit skirts to upholstered furniture, including:
  - measuring tape
  - cutting table
  - straight edges
  - skewers

- scissors
- flatbed walking foot and overlocker sewing machines
- how to set up and adjust sewing machine features, including:
  - threading machine and winding bobbin
  - setting required tensions
  - selecting required machine settings
  - lubricating and adjusting the machine
  - testing operations for work order requirements
- work health and safety requirements, including personal protective equipment (PPE) and manual handling procedures.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - items of furniture to which skirts are fitted
  - cutting tools, cutting table, fabric and sewing machines required for performance evidence
  - PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFUP3025 Cut, sew, fit or fill cushions

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to measure, cut, sew, and fit or fill loose and fitted cushions for upholstered furniture. Upholstery workers with this competency follow established procedures using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Upholstery

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan task	1.1 Determine task requirements including design, fabrics, accessories and finish for cushions from work documentation or spoken instructions 1.2 Identify and follow work health and safety requirements 1.3 Determine filling medium, work method and sequence from task requirements 1.4 Select and prepare suitable work area and clear it of contaminants 1.5 Select appropriate equipment and tools and check that they are functional and safe 1.6 Check that materials are free of contaminants and meet requirements for quantity, quality, size, pattern and consistency in accordance with workplace procedures
2. Cut and sew cushion	2.1 Lay out material on cutting table and identify nap or pile, direction

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
covers	<p>of pattern, pattern repeat and finished side of fabric to inform cutting approach</p> <p>2.2 Lay out patterns using registration points on pattern and other instructions to match required fabric pattern, ensuring maximum use of fabric</p> <p>2.3 Cut fabric and inspect work to ensure accuracy and tolerance in accordance with workplace procedures</p> <p>2.4 Identify and follow sewing machine set-up requirements and make required adjustments</p> <p>2.5 Ensure machine maintains required product quality and output</p> <p>2.6 Check that finished cushion meet quality requirements and reprocess as required in accordance with workplace procedures</p>
3. Fit and fill cushions	<p>3.1 Check cushion covers for fit and determine amount of filling for each application</p> <p>3.2 Fill cushions to required size using appropriate methods</p> <p>3.3 Perform final sewing tasks in accordance with workplace procedures</p>
4. Complete task	<p>4.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures</p> <p>4.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures</p> <p>4.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>4.4 Complete required workplace records</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## **Unit Mapping Information**

Release 1. Supersedes and is equivalent to MSFUP3011 Cut, sew and fit or fill cushions.

## **Links**

Companion Volume implementation guides are found in VETNet – -

# Assessment Requirements for MSFUP3025 Cut, sew, fit or fill cushions

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- cut, sew and fit or fill the following cushions:
  - scatter cushion with piping, closed using a slip stitch
  - round seat pad of at least 300 mm diameter and 50 mm thick in a patterned fabric, with border and single top stitch, top border with zipper, and touch tape ties
  - wrap-around cushion with plain-seam side borders
  - typical cane style back-cushion with gathering to the corners, centre piped.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work requirements, including workplace standards and inspection procedures, for cutting, sewing and fitting or filling cushions
- workflows for cutting, sewing and fitting or filling cushions
- material types and characteristics, common faults and inspection procedures, including at least 6 of the following:
  - fabric
  - filling material:
    - foam
    - Dacron
    - flock
    - crumbed foam
    - springs
    - wadding fibre
    - linters and feathers/down
- design features of the finished furnishing items and how these affect laying out the pattern and cutting the fabric
- typical tools and equipment required to cut, sew and fit or fill cushions, including:
  - cutting table

- cutting machines
- scissors
- sewing machines, including flatbed, walking foot and overlocker
- cushion filling machines
- how to set up and adjust sewing machine features, including:
  - threading machine and winding bobbin
  - setting required tensions
  - selecting required machine settings
  - lubricating and adjusting the machine
  - testing operations for work order requirements
- work health and safety requirements, including personal protective equipment (PPE) and manual handling procedures.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - cutting table, material, filling medium, sewing machines and cushion filling machine required for performance evidence
  - PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFUP3026 Apply marine sewing and installation techniques

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Application

This unit describes the skills and knowledge required to use marine sewing techniques to create upholstery items, such as covers for use in marine applications, and to fit required attachments and fixing devices.

Upholstery and marine fit-out workers with this competency work in accordance with established procedures using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Competency Field

Upholstery

## Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements, including machines, attachments, materials and work sequence and method, from work documentation and in accordance with workplace procedures 1.2 Identify and follow work health and safety requirements 1.3 Check that equipment, including components and controls, are functional and safe 1.4 Check that materials and part-constructed products meet job

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	requirements in accordance with workplace procedures 1.5 Lay out work pieces in sequence in accordance with specifications and workplace procedures
2. Conduct sewing operation	2.1 Set up sewing machine, including attachments, and make required adjustments in accordance with workplace procedures 2.2 Fit thread type and size to machine to suit fabric 2.3 Operate machine to maintain required product quality and outputs 2.4 Attach reinforcing or protective measures, fittings or attachments and fixing devices in accordance with workplace procedures 2.5 Inspect finished products, including covers, for quality and reprocess in accordance with workplace procedures
3. Complete task	3.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures 3.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures 3.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards 3.4 Complete required workplace records, including those for stock usage

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate length and area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSFUP3012 Apply marine sewing and installation techniques.

## Links

Companion Volume implementation guides are found in VETNet –

# Assessment Requirements for MSFUP3026 Apply marine sewing and installation techniques

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- prepare and install a minimum of 3 square metres of cover to at least 3 vertical or horizontal surfaces
- sew at least 3 covers, collectively including at least 3 of the following fasteners and attachments:
  - clips
  - press studs
  - buckles
  - eyelets
  - shackles
  - zips
  - reinforcing patches
  - straps.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- procedures for reporting damaged or imperfect products
- workflow requirements for sewing process
- function of sewing equipment, including:
  - overlockers
  - flatbed machines
  - twin needle machines
  - walking foot machines
- common material and product faults and repair methods
- equipment and processes for sewing and installing marine items
- types of sewing machine typically used for marine sewing

- quality systems and standards for marine items
- tools and equipment commonly used in marine sewing and installation
- materials used for marine upholstery and their appropriateness for different applications, including:
  - canvas
  - sail materials
  - leather
  - foam-backed vinyl and upholstery fabrics
- work health and safety requirements, including personal protective equipment (PPE) and manual handling procedures.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - sewing machine, materials, fittings and threads required for performance evidence
  - PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFUP3027 Cut and sew canvas and acrylics

### Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

### Application

This unit describes the skills and knowledge required to measure, cut and sew canvas and acrylic materials and apply fixtures and fittings for varied applications including automotive and marine applications.

Upholstery and automotive and marine fit-out workers with this competency follow established procedures, using discretion, judgement and problem-solving to identify and resolve potential issues. They recognise dependencies and use cooperative approaches to optimise workflow and productivity.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Competency Field

Upholstery

### Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for task	1.1 Determine task requirements from work documentation including required material, number and nature of items to be cut and equipment to be used 1.2 Identify and follow work health and safety requirements 1.3 Determine required machines, attachments, tools, materials, work method and sequence to achieve task requirements 1.4 Select and prepare suitable work area and clear it of contaminants 1.5 Check that equipment, including components, controls and any

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<p>supplementary equipment, is functional and safe</p> <p>1.6 Check that scissors and other cutting equipment are appropriately sharp, functional and safe</p> <p>1.7 Check that materials to be cut and sewn meet requirements and report problems in accordance with workplace procedures</p>
2. Develop cutting plan	<p>2.1 Identify cutting requirements from work documentation</p> <p>2.2 Confirm measurements for item, noting locations of high wear, chafing, fittings, attachments and fixing devices</p> <p>2.3 Develop cutting list using appropriate format, abbreviations and terminology in accordance with workplace procedures</p> <p>2.4 Finalise cutting plan in accordance with workplace procedures</p>
3. Prepare materials for cutting	<p>3.1 Select and lay out material and inspect for flaws in accordance with task requirements</p> <p>3.2 Identify finished side of materials and position on cutting table for marking or pattern lay-out</p> <p>3.3 Mark out material or lay out patterns in accordance with workplace procedures and task requirements</p>
4. Cut material	<p>4.1 Confirm measurements and make required adjustments to positioning of fabric</p> <p>4.2 Check tools and equipment for correct operation</p> <p>4.3 Complete required cutting operations in accordance with task requirements</p> <p>4.4 Inspect cut material for quality and reprocess unsatisfactory items in accordance with workplace instructions</p> <p>4.5 Label and dispatch cut materials to next process in accordance with workplace procedures</p>
5. Conduct sewing operation	<p>5.1 Check that items to be sewn meet size, quality and other task requirements</p> <p>5.2 Set up sewing machine, including attachments and make required adjustments in accordance with workplace procedures</p> <p>5.3 Operate machine in accordance with manufacturer instructions and workplace procedures to maintain required product quality and output</p> <p>5.4 Attach reinforcing or protective measures, fittings or attachments and fixing devices in accordance with workplace procedures</p> <p>5.5 Inspect finished items for quality, and reprocess unacceptable items</p>

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	in accordance with workplace procedures
6. Complete task	<p>6.1 Check, clean and store equipment and any unused materials in accordance with workplace procedures</p> <p>6.2 Tag unserviceable equipment, identify faults and inform appropriate personnel in accordance with workplace procedures</p> <p>6.3 Clean work area, safely dispose of waste and identify items for recycling in accordance with workplace procedures and environmental standards</p> <p>6.4 Complete required workplace records</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

- Reading skills to interpret familiar workplace procedures and work documentation
- Writing skills to communicate information in familiar workplace documents
- Numeracy skills to measure and calculate length and area and estimate material requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

# Assessment Requirements for MSFUP3027 Cut and sew canvas and acrylics

## Modification History

Release 1. Changes to code, application, elements, performance criteria, assessment requirements. Foundation skills added. Range of conditions removed. Assessment requirements changed.

## Performance Evidence

There must be evidence the candidate has completed all the tasks outlined in the elements and performance criteria of this unit, and demonstrated the ability to:

- measure, cut and sew at least one canvas product and one acrylic product, collectively including at least 2 of the following:
  - clips
  - press studs
  - buckles
  - eyelets
  - shackles
  - zips
  - reinforcing patches
  - straps
- apply at least 2 metres of binding as an edge finish, including a curve and three corners.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- procedures for reporting damaged or imperfect products or interruption to workflows
- workflows for the cutting and sewing process
- function of cutting and sewing equipment, including:
  - overlockers
  - flatbed sewing machines
  - walking foot sewing machines
  - measuring tapes
  - scissors
  - cutting blades
  - knives and threads
- characteristics of materials and appropriateness for different applications, including:

- cloths
- canvases
- acrylics
- carpets
- foam-backed fusion bonded
- needle punched materials
- thread
- common fault in material used and repair methods
- quality systems and standards for canvas and acrylics work
- workplace procedures for cutting and sewing canvas and acrylics
- work health and safety requirements, including personal protective equipment (PPE) and manual handling procedures.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - work orders
  - cutting table, scissors, blades and cutting machines and sewing machine required for performance evidence
  - PPE
  - workplace procedures, manufacturing specifications, codes, standards, manuals, and reference materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## AHCLSC308 Install metal structures and features

### Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

### Application

This unit of competency describes the skills and knowledge required to install metal structures and features as a component of landscape project works.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Unit Sector

Landscape (LSC)

### Elements and Performance Criteria

Elements	Performance criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare work	1.1 Interpret plans and specifications

<b>Elements</b>	<b>Performance criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.2 Check the quantity and quality of materials 1.3 Select tools and equipment and check for serviceability 1.4 Identify hazards, assess risks and implement controls 1.5 Select and use personal protective equipment (PPE)
2. Set out the site for the structure	2.1 Determine and locate services 2.2 Mark out the position of the structure or feature 2.3 Establish profiles to conform to nominated tolerances 2.4 Excavate and prepare footings according to the type of structure to be erected
3. Prepare and cut metal components	3.1 Lay components out for assembly 3.2 Mark the length of components and the positions of joints 3.3 Cut, check and join components in preparation for joining and assembly
4. Assemble and erect structure	4.1 Fix, join or assemble metal components into position and fix into place 4.2 Install remaining components and fix into position 4.3 Finish off structure to ensure all components are secure and complete 4.4 Apply coatings
5. Check quality of work and clean-up site	5.1 Inspect the quality of finished works to ensure they have met the required drawings and specifications standards 5.2 Clean debris from structure and site 5.3 Remove and dispose of all debris in a manner that minimises risk to the environment 5.4 Store unused metal components for future re-use 5.5 Clean, maintain and store tools and equipment

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.*

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for AHCLSC308 Install metal structures and features

## Modification History

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 2.0.
Release 1	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 1.0.

## Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and prepare metal structures and features using plans and specifications
- mark out sites for metal structures and features using design drawings and specifications
- use surveying instruments
- establish levels and prepare footings
- excavate footings
- estimate quantities
- use power tools efficiently and safely
- measure and mark lengths of metal components
- fix, join or assemble metal components using a variety of recognised methods
- apply a variety of surface finishes.

## Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of installing metal structures and features
- levelling principles and techniques
- footings for metal structures and their construction methods.

## Assessment Conditions

Assessors must satisfy current standards for RTOs.

# AURVTT121 Select and apply adhesives in automotive and marine service and repair work

## Modification History

Release	Comments
Release 1	This version first released with AUR Automotive Retail, Service and Repair Training Package Version 6.0

## Application

This unit describes the skills and knowledge required to select and use adhesives with a range of automotive and marine surfaces. It involves preparing for the task, selecting and using tools and equipment, and completing workplace processes and documentation.

The unit applies to those working in the automotive service and repair industry. The adhesives include those used with automotive, marine, motorcycle, aircraft or recreational vehicle materials.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## Unit Sector

Vehicle Body Technical - Trimming and Upholstery

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Determine job requirements from workplace instructions 1.2 Access and interpret adhesive information 1.3 Identify hazards associated with the work and manage risks 1.4 Select tools and equipment and check for serviceability 1.5 Prepare work area and plan work to minimise waste and use time efficiently
2. Select adhesive	2.1 Select required adhesive for specific automotive materials according to manufacturer specifications and workplace

ELEMENTS	PERFORMANCE CRITERIA
	<p>procedures</p> <p>2.2 Identify and follow specific safety data sheet (SDS) information for selected adhesive</p>
3. Apply adhesive to prepared surfaces	<p>3.1 Clean and prepare surfaces according to adhesive manufacturer specifications</p> <p>3.2 Apply adhesives according to workplace procedures and safety and environmental requirements, and without causing damage to system or components</p>
4. Complete work processes	<p>4.1 Make final adhesive selection and present for use</p> <p>4.2 Clear work area and dispose of or recycle materials according to workplace procedures</p> <p>4.3 Complete documentation according to workplace procedures</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Learning	<ul style="list-style-type: none"> <li>Locates required sources of information efficiently.</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>Clarifies instructions and procedures</li> <li>Reports quality issues and job outcomes clearly.</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>Plans own work requirements</li> <li>Prioritises actions to achieve required outcomes</li> <li>Ensures tasks are completed within workplace timeframes.</li> </ul>
Technology	<ul style="list-style-type: none"> <li>Uses specialist tools and equipment.</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to AURVTT021 Select and apply adhesives in automotive and marine service and repair work.

## Links

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=b4278d82-d487-4070-a8c4-78045ec695b1>

# Assessment Requirements for AURVTT121 Select and apply adhesives in automotive and marine service and repair work

## Modification History

Release	Comments
Release 1	This version first released with AUR Automotive Retail, Service and Repair Training Package Version 6.0

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- select and apply adhesives to at least three different automotive or marine components, in which the work must involve at least one door trim.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- methods to locate and interpret information required to select and apply adhesives in automotive and marine service and repair work, including:
  - information provided by customer and supervisors
  - manufacturer specifications and procedures or equivalent documentation
- workplace procedures required to select and apply adhesives in automotive and marine service and repair work, including:
  - establishing serviceability of tools and equipment
  - documentation procedures
  - housekeeping procedures, including:
    - examination of tools and equipment
    - storage of equipment
    - identification, tagging and isolation of faulty equipment
    - disposal of excess materials
    - recycling procedures
- work health and safety (WHS) requirements relating to selecting and applying adhesives in automotive and marine service and repair work, including procedures for:
  - selecting and using PPE
  - using safety data sheets (SDS) for adhesives

- using specialist tools and equipment
- storing adhesives
- environmental requirements, including procedures for trapping, storing and disposing of adhesives and waste materials
- information relating to adhesives, including:
  - adhesive-specific specifications
  - adhesive-specific application and removal instructions and processes
  - SDS information
- adhesive manufacturer specifications
- adhesive types required for different automotive and marine materials
- adhesive application techniques and procedures, including:
  - surface preparation
  - application
  - cleaning and disposal
- procedures for protecting vehicle, vessel and components when applying adhesives
- procedures for final inspection of applied adhesive.

## Assessment Conditions

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessment must include direct observation of tasks.

Where assessment of competency includes third-party evidence, individuals must provide evidence that links them to the adhesives they have selected and used on vehicles, vessels and components, e.g. work orders.

Assessors must verify performance evidence through questioning on skills and knowledge to ensure correct interpretation and application.

The following resources must be made available:

- automotive or marine trimming workplace or simulated workplace
- workplace instructions
- instructions relating to the selection and use of adhesives
- SDS for adhesives
- adhesives
- PPE required to use adhesives
- three different automotive or marine components as specified in the performance evidence requiring the use of adhesives
- tools, equipment and materials appropriate for applying adhesives.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBADM311 Maintain business resources

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to determine, administer and maintain resources and equipment to complete a variety of tasks.

It applies to individuals who are skilled operators and apply a broad range of competencies in various work contexts. They may exercise discretion and judgement using appropriate theoretical knowledge of business resources and their basic maintenance to provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Administration – General Administration

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Advise on resource requirements	1.1 Calculate estimates of future and present business resource needs in accordance with organisational requirements 1.2 Ensure advice is clear, concise and relevant to achieve organisational requirements 1.3 Provide information on the most economical and effective choice of equipment, materials and suppliers

ELEMENT	PERFORMANCE CRITERIA
	1.4 Identify resource shortages and possible impact on operations
2 Monitor resource usage and maintenance	<p>2.1 Ensure resource handling is in accordance with established organisational requirements including occupational health and safety requirements</p> <p>2.2 Use business technology to monitor and identify the effective use of resources</p> <p>2.3 Use consultation with individuals and teams to facilitate effective decision-making on the appropriate allocation of resources</p> <p>2.4 Identify and adhere to relevant policies regarding resource use in the performance of operational tasks</p> <p>2.5 Routinely monitor and compare resource usage with estimated requirements in budget plans</p>
3 Acquire resources	<p>3.1 Ensure acquisition and storage of resources is in accordance with organisational requirements, is cost effective, and consistent with organisational timelines</p> <p>3.2 Acquire resources within available timelines to meet identified requirements</p> <p>3.3 Review resource acquisition processes to identify improvements in future resource acquisitions</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 2.4, 2.5, 3.3	<ul style="list-style-type: none"> <li>Identifies and interprets information from a range of sources, including organisational policies and procedures</li> </ul>
Writing	1.1, 1.3, 2.2, 2.5, 3.3	<ul style="list-style-type: none"> <li>Uses clear and succinct language and appropriate layout to provide information, advice and support materials</li> </ul>
Oral Communication	1.2, 1.3, 2.3	<ul style="list-style-type: none"> <li>Presents information or advice choosing language appropriate to the context and needs of the audience</li> <li>Uses active listening and questioning to confirm</li> </ul>

		understanding
Numeracy	1.1, 1.3, 1.4, 2.2, 2.4, 2.5, 3.1-3.3	<ul style="list-style-type: none"> <li>Selects and uses appropriate tools to aid with estimation and other resource assessment requirements</li> <li>Uses a combination of mainly informal and some formal written mathematical equations to represent the outcomes of the resource allocation process</li> </ul>
Navigate the world of work	1.1, 1.2, 2.1, 2.4, 3.1, 3.2	<ul style="list-style-type: none"> <li>Takes some personal responsibility for adherence to organisational procedures and protocols</li> </ul>
Interact with others	2.3	<ul style="list-style-type: none"> <li>Uses collaborative techniques to engage personnel in consultations and negotiations</li> </ul>
Get the work done	1.1, 1.3, 1.4, 2.2, 2.5, 3.3	<ul style="list-style-type: none"> <li>Plans a range of routine tasks and required resources, accepting goals and aiming to achieve them within allocated timeframes</li> <li>Recognises and takes responsibility for addressing predictable problems in familiar work contexts</li> <li>Follows routine procedures for using digital technology to enter, store and retrieve information directly relevant to role</li> <li>Understands the purpose and some specific functions of some common digital tools used in work contexts</li> <li>Evaluates effectiveness of decisions in terms of how well they met stated goals</li> </ul>

# Assessment Requirements for BSBADM311 Maintain business resources

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- collect and record data on resource use
- observe resource use over defined and operational timeframes
- perform routine resource maintenance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list the key provisions of relevant legislation
- identify the organisational resource acquisition policies, plans and procedures
- identify the organisational procedures for record keeping/filing systems, security and safe recording practices.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the general administration field of work and include access to office equipment and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBCRT311 Apply critical thinking skills in a team environment

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Application

This unit describes skills and knowledge required to apply critical thinking skills to generate solutions to workplace problems in a team environment.

The unit applies to individuals who are required to develop and extend their critical and creative thinking skills to different issues and situations. These individuals apply a range of problem solving, evaluation and analytical skills resolve workplace issues within a team context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Critical Thinking & Problem Solving – Critical Thinking

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to address workplace problem	1.1 Identify and select workplace problem to address within scope of job role of team members 1.2 Identify organisational and legislative frameworks applicable to selected problem 1.3 Develop questions to identify key issues and challenges of selected problem 1.4 Consult key stakeholders using questions to gather information on selected problem
2. Evaluate solutions for workplace problem	2.1 Identify a range of critical thinking techniques to generate solutions to selected problem

ELEMENT	PERFORMANCE CRITERIA
	2.2 Develop solutions using knowledge and experience of team members 2.3 Explain development process for individual solutions generated to team members 2.4 Apply agreed criteria for selecting most suitable option in consultation with team members 2.5 Critically evaluate solutions generated and select solution to be implemented
3. Finalise and review solution development process	3.1 Present solution to relevant stakeholders with explanation of critical thinking processes involved 3.2 Respond to challenges and questions from stakeholders 3.3 Evaluate critical thinking processes with team members and using feedback received 3.4 Identify critical thinking learnings to apply to individual and team situations

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

Skill	Description
Learning	<ul style="list-style-type: none"> <li>• Uses questioning as a strategy to expand knowledge</li> <li>• Reflects on existing thinking and current practices to generate new ideas</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>• Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning</li> </ul>
Reading	<ul style="list-style-type: none"> <li>• Comprehends textual information and integrates ideas and concepts from various sources</li> </ul>
Writing	<ul style="list-style-type: none"> <li>• Documents observations and experiences related to problem solving</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Collaborates with others to test, strengthen and explore new ideas and different ways of thinking</li> </ul>

## Unit Mapping Information

No equivalent unit. Supersedes but is not equivalent to BSBCRT301 Develop and extend critical and creative thinking skills.

# Assessment Requirements for BSBCRT311 Apply critical thinking skills in a team environment

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- generate and present solutions to a workplace problem on at least two occasions.

In the course of the above, the candidate must:

- identify and analyse workplace problems as part of a team
- develop questions on key challenges of a chosen problem
- consult relevant stakeholders to gather information on workplace problem
- use a range of creative thinking techniques as part of a team to generate ideas or responses to questions or issues
- use critical thinking processes to develop relevant questions and criteria for identified workplace issue
- present to relevant stakeholders and respond to answers
- assess feedback to identify key personal and team learnings.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational and legislative frameworks
- advantages of different perspectives when asking questions
- critical thinking techniques
- applicable criteria to assess potential solutions to workplace issue
- boundaries to be considered when generating ideas and responses
- methods to develop individual critical and creative thinking skills.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to specific challenges and situations to which critical and creative thinking may be applied to workplace problems as part of a team.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBCRT412 Articulate, present and debate ideas

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

### Application

This unit describes the skills and knowledge required to articulate, present and debate ideas in a work or broader life context using creative techniques in order to provoke response, reaction and critical discussion.

The unit applies to individuals who contribute and present ideas that may be complex in nature and may relate to new products, services, processes or creative works. These individuals are required to communicate ideas persuasively.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Critical Thinking & Problem Solving – Critical Thinking

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish framework for communication	1.1 Assess purpose of, and audience for communication according to task requirements 1.2 Evaluate advantages and disadvantages of various methods of communication according to task requirements 1.3 Research organisational or legislative frameworks applicable to communication
2. Develop ideas for communication	2.1 Assess persuasive communication techniques against objectives of communication 2.2 Identify specific ways to provoke and encourage response in individuals or groups in consultation with others

ELEMENT	PERFORMANCE CRITERIA
	2.3 Consider potential communication challenges and strategies for mitigation 2.4 Research and document selected key ideas for presentation according to objectives of communication
3. Debate and discuss ideas	3.1 Present substantiated communication to audience 3.2 Facilitate conversations that challenge existing, and explore new, approaches to idea generation 3.3 Respond to questions about communication with relevant information 3.4 Use feedback to refine communication

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

Skill	Description
Oral communication	<ul style="list-style-type: none"> <li>Articulates ideas and requirements clearly and creatively using techniques appropriate to audience and environment</li> <li>Participates in a verbal exchange of ideas and elicits the view and opinions of others by listening and questioning</li> <li>Uses a range of persuasive responses and makes comparisons which show an understanding of topics and concepts</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Presents clearly written formats, drawing on a range of communication practices to achieve goals</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>Identifies opportunities to develop and apply new ideas and select ideas for implementation</li> <li>Identifies key themes and ideas to be explored and identifies ways to respond to and use diverse perspectives</li> </ul>
Technology	<ul style="list-style-type: none"> <li>Uses features and functions of digital tools and technologies to store and present information</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBCRT401 Articulate, present and debate ideas.

# Assessment Requirements for BSBCRT412 Articulate, present and debate ideas

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- facilitate a discussion and debate on ideas with at least two different audience types.

In the course of the above, the candidate must:

- evaluate the purpose, audience and legislative and organisational frameworks applicable to task
- identify and analyse methods to elicit responses from audiences in consultation with others
- identify challenges to communication of ideas for mitigation
- research selected ideas for presentation
- adopt persuasive communication techniques
- participate actively in presentation and critical discussion of ideas
- respond constructively to presentation feedback
- use feedback to further refine developed communication.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- ways in which individuals receive and respond to ideas and information, and factors that influence response
- advantages and disadvantages of various methods of communication
- organisational or legislative frameworks applicable to subject or format of communication
- key features of persuasive communication techniques, including storytelling
- methods of researching ideas including:
  - desktop research
  - consultation with relevant experts
- common techniques to tailor comments to audiences.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to opportunities to present, discuss and debate ideas with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBCRT512 Originate and develop concepts

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

### Application

This unit describes the skills and knowledge required to originate and develop concepts for products, programs, processes or services to an operational level.

The unit applies to individuals who develop concepts for any business or community activity or process. This may include marketing and advertising campaigns, staff development programs, information technology and communication systems, radio and television programs and entertainment events. These individuals operate with a high degree of autonomy and also collaborate with others to generate ideas and refine concepts for implementation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Critical Thinking & Problem Solving – Critical Thinking

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Scope issue	1.1 Select issue to be explored in consultation with relevant personnel 1.2 Assess possible solutions to business issue and identify restrictions according to job role and organisational policy 1.3 Research information on possible solutions to identified issue 1.4 Assess factors affecting viability of possible solutions
2. Generate and present solutions	2.1 Brainstorm ideas for addressing issue 2.2 Evaluate ideas against identified factors affecting viability 2.3 Compare ideas with best practice examples of similar products

ELEMENT	PERFORMANCE CRITERIA
	or programs or processes or services 2.4 Select and present a solution in relevant format to stakeholders
3. Refine solutions for implementation	3.1 Seek feedback on ideas from stakeholders 3.2 Respond to questions with substantiated answers 3.3 Document feedback according to organisational requirements 3.4 Refine and finalise solution according to task requirements

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

# Assessment Requirements for BSBCUS301 Deliver and monitor a service to customers

## Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- use communication skills to establish rapport and build relationships with customers in accordance with organisational requirements
- identify customer needs using appropriate questioning and active listening skills
- provide customer service in accordance with organisational requirements
- respond to and record customer feedback and action taken according to organisational standards, policies and procedures
- produce a report which identifies and recommends ways to improve service delivery.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise key provisions of relevant legislation from all levels of government that may affect aspects of business operations
- explain organisational policy and procedures for customer service, including handling customer complaints
- provide examples of verifiable evidence that could be used to review customer satisfaction
- outline the interpersonal skills needed for serving customers, including customers with specific needs.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- office equipment and technology
- workplace documents, organisational policies and procedures for customer service
- examples of customer complaints and feedback
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBCUS402 Address customer needs

### Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0  Version created to clarify assessment conditions
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to manage an ongoing relationship with a customer over a period of time. This includes helping customers articulate their needs and managing networks to ensure customer needs are addressed.

It applies to individuals who are expected to have detailed product knowledge in order to recommend customised solutions. In this role, individuals would be expected to apply organisational procedures and be aware of, and apply as appropriate, broader factors involving ethics, industry practice and relevant government policies and regulations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Stakeholder Relations – Customer Service

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Assist customer to articulate needs	1.1 Ensure customer needs are fully explored, understood and agreed 1.2 Explain and match available services and products to customer

ELEMENT	PERFORMANCE CRITERIA
	needs 1.3 Identify and communicate rights and responsibilities of customers to the customer as appropriate
2 Satisfy complex customer needs	2.1 Explain possibilities for meeting customer needs 2.2 Assist customers to evaluate service and/or product options to satisfy their needs 2.3 Determine and prioritise preferred actions 2.4 Identify potential areas of difficulty in customer service delivery and take appropriate actions in a positive manner
3 Manage networks to ensure customer needs are addressed	3.1 Establish effective regular communication with customers 3.2 Establish, maintain and expand relevant networks to ensure appropriate referral of customers to products and services from within and outside the organisation 3.3 Ensure procedures are in place to ensure that decisions about targeting of customer services are based on up-to-date information about the customer and the products and services available 3.4 Ensure procedures are put in place to ensure that referrals are based on the matching of the assessment of customer needs and availability of products and services 3.5 Maintain records of customer interaction in accordance with organisational procedures

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.3, 2.2, 2.3, 2.4, 3.2, 3.3, 3.4, 3.5	<ul style="list-style-type: none"> <li>Interprets textual information obtained from a range of sources and determines how content may be applied to individuals and to organisational requirements</li> </ul>
Writing	1.1, 3.1, 3.2, 3.3, 3.4, 3.5	<ul style="list-style-type: none"> <li>Prepares written reports, up-to-date procedures and other workplace documentation that communicate complex information clearly and effectively</li> </ul>
Oral	1.1, 1.2, 1.3, 2.1,	<ul style="list-style-type: none"> <li>Clearly articulates customer's needs using language suitable to diverse audiences and employs listening</li> </ul>

Communication	2.2, 3.1, 3.2	and questioning techniques to confirm understanding
Navigate the world of work	3.5	<ul style="list-style-type: none"> <li>Recognises and applies organisational protocols and meets expectations associated with own work</li> </ul>
Interact with others	1.1-1.3, 2.1, 2.2, 3.1, 3.2	<ul style="list-style-type: none"> <li>Selects and uses appropriate communication techniques to establish and maintain positive working relationships</li> <li>Establishes connections and shares information with others who can contribute to effective work outcomes</li> </ul>
Get the work done	2.3, 2.4, 3.3-3.5	<ul style="list-style-type: none"> <li>Develops and implements plans for routine and non-routine tasks recognising the importance of aligning goals and expectations to achieve outcomes</li> <li>Recognises and takes responsibility for addressing predictable and non-predictable problems in own work context</li> <li>Uses digital systems to organise and store information relevant to own work</li> </ul>

# Assessment Requirements for BSBCUS402 Address customer needs

## Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0  Version created to clarify assessment conditions
Release 1	This version first released with Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- communicate effectively with customers including
  - helping customers to articulate their needs and evaluate options
  - explaining products/services and how they match customer needs
  - establishing regular communication
  - explaining customer rights and responsibilities
- address customer's needs
- use organisational procedures to document customer satisfaction
- develop and maintain networks to support meeting customer needs
- identify potential difficulties in meeting customer needs and taking appropriate action.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain organisational procedures and standards for establishing and maintaining customer service relationships

- describe informed consent
- explain consumer rights and responsibilities
- describe ways to establish effective regular communication with customers
- outline details of products or services including with reference to:
  - possible alternative products and services
  - variations within a limited product and service range.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- office equipment and resources
- business technology
- organisational policies, procedures, quality systems, manuals and guidelines for customer management
- examples of products/services and promotional strategies
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for BSBESB403 Plan finances for new business ventures

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop at least one financial plan that addresses financial requirements of a business or new business venture, including cash flow projections and a projected profit statement.

In the course of the above, the candidate must demonstrate that the plan:

- reflects legal requirements applicable to business
- includes strategies to monitor financial performance of business.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory requirements relating to business described in performance evidence
- process for conducting break-even analyses
- workplace procedures for:
  - costing for the business, including margin or mark-up, charge-out rates and unit costs
  - setting profit targets
  - identifying sources and investigating costs of securing appropriate financial assistance
- methods and relative costs of obtaining finance
- principles and procedures for preparing:
  - balance sheets
  - cash flow forecasts
  - profit and loss statements
  - financial plans
- purpose of financial reports
- accounting terminology required when planning finances for new business ventures

- methods for analysing working capital cycles.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- software for financial calculations
- legislation and regulations relating to business described in performance evidence
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBESB405 Manage compliance for small businesses

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

### Application

This unit describes the skills and knowledge required to develop and implement strategies for managing compliance obligations for small businesses. The unit requires broad knowledge of regulatory and legislative requirements used when developing these strategies.

The unit applies to those establishing or operating a business providing self-employment, as well as those establishing a new venture as part of a larger organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Business Competence – Entrepreneurship and Small Business

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine compliance obligations	1.1 Research internal and external compliance requirements and relevant Australian and international standards 1.2 Research codes of practice and material that interprets obligations and legislative requirements 1.3 Apply research information to determine relevance to business operations, products and services 1.4 Document compliance requirements, risks and consequences of possible breaches applicable to own business
2. Develop strategies to manage compliance requirements	2.1 Draft compliance management framework, prioritising areas where breaches have critical implications for the business 2.2 Validate draft compliance management framework using

ELEMENT	PERFORMANCE CRITERIA
	<p>external expertise and/or sources of advice according to workplace procedures</p> <p>2.3 Allocate responsibilities for compliance functions according to compliance management framework and workplace procedures</p>
3. Implement and monitor compliance management strategies	<p>3.1 Select interval between cyclical compliance checks according to compliance management framework</p> <p>3.2 Communicate compliance requirements to required people</p> <p>3.3 Record timing and outcomes of compliance checks according to business requirements and workplace procedures</p> <p>3.4 Take action to address non-compliances according to compliance management framework and confirm that non-compliances have been resolved</p>
4. Conduct improvement in compliance management	<p>4.1 Review outcomes of compliance checks to identify operational problems</p> <p>4.2 Analyse non-compliances to determine modifications required</p> <p>4.3 Update compliance management strategies based on information analysed</p> <p>4.4 Communicate changes in compliance management strategies to relevant people</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

Skill	Description
Reading	<ul style="list-style-type: none"> <li>Identifies, analyses and evaluates information to determine legislative and regulatory requirements, trends and outcomes</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Researches, plans and prepares documentation using format and language appropriate to context, organisational requirements and audience</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>Presents information and seeks advice using language appropriate to audience</li> <li>Participates in discussions using listening and questioning to elicit advice and to clarify or confirm understanding</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Calculates numerical information relating to compliance obligations</li> </ul>

Skill	Description
Self-management	<ul style="list-style-type: none"><li>• Develops, monitors and modifies workplace procedures according to legislative requirements and organisational goals</li><li>• Selects and uses appropriate conventions and protocols when seeking and/or sharing information</li><li>• Uses systematic, analytical processes in setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria</li></ul>
Planning and organising	<ul style="list-style-type: none"><li>• Plans, organises and implements work activities of self and others that ensure compliance with organisational policies and procedures, and legislative requirements</li></ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBSMB418 Manage compliance for small business.

# Assessment Requirements for BSBESB405 Manage compliance for small businesses

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop, implement, and monitor the effectiveness of strategies for managing at least three different compliance requirements for a small business.

In the course of the above, the candidate must:

- analyse small business operations to identify compliance requirements and their implications for the business
- develop compliance strategies that address regulatory and legislative requirements.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- Australian and international standards, legislation, regulations, industry and organisational codes of practice specific to small business described in performance evidence
- external professional, industry based and government sources of advice and expertise
- key features of compliance management strategies relevant to small business
- methods for carrying out compliance checks and developing compliance strategies
- key components of compliance management frameworks
- workplace procedures for
  - accessing external expertise and advice
  - validating compliance management framework
  - allocating responsibilities for compliance functions within business
  - recording timing and outcomes of compliance checks.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- Australian and international standards, laws, regulations, industry and organisational codes and standards relating to business described in performance evidence
- business technology
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBESB406 Establish operational strategies and procedures for new business ventures

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Application

This unit describes the skills and knowledge required to develop and implement operational strategies and procedures for new businesses.

The unit applies to those establishing a business providing self-employment, as well as those establishing a new venture as part of a larger organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Business Competence – Entrepreneurship and Small Business

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Review operational strategies and procedures for business or new business venture	1.1 Develop a detailed operational plan that sets out clear action points to fulfil on business goals and objectives 1.2 Identify work health and safety (WHS) and environmental issues and implement strategies to minimise risk factors 1.3 Review and evaluate, where appropriate, a quality assurance process for the business in line with industry standards, compliance requirements and cultural criteria 1.4 Develop operational key performance indicators (KPIs) that align to business plan 1.5 Align KPIs to business strategies, including utilisation of existing or new technologies, where practicable, to optimise

ELEMENT	PERFORMANCE CRITERIA
	business performance
2. Implement developed operational strategies and procedures	2.1 Implement systems to evaluate business performance and customer satisfaction, including by setting KPIs or targets 2.2 Implement systems to control stock, expenditure or cost, wastage or shrinkage and risks to health and safety according to business plan, incorporating new digital technologies where applicable 2.3 Identify and manage staffing requirements, considering a range of permanent and flexible arrangements, and adhering to budgetary constraints 2.4 Provide products and/or services according to established legal, ethical cultural and technical standards 2.5 Provide products and/or services according to time, cost and quality specifications, and customer requirements, incorporating new digital technologies where applicable 2.6 Apply quality procedures to address product and/or service and customer requirements
3. Evaluate business performance	3.1 Use digital technologies to regularly evaluate and review achievement of operational targets to ensure optimum business performance, according to business goals and objectives 3.2 Review and document systems and structures to support business performance 3.3 Investigate and analyse operating problems to establish causes and implement changes as required, as part of business quality system 3.4 Update operational policies and procedures to incorporate corrective action
4. Review business operations	4.1 Review and adjust business operations to increase business success, according to business goals and objectives 4.2 Research and implement new and emerging digital technologies into business operations according to business goals and objectives and workplace procedures 4.3 Research new business opportunities and adjust business goals and objectives as new opportunities arise

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

Skill	Description
Reading	<ul style="list-style-type: none"> <li>Evaluates complex text to determine legislative, regulatory and workplace documentation</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Prepares written reports and workplace documentation that communicate information clearly and effectively</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Interprets numerical information to manage performance information and regulate cash flow</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Evaluates adherence to workplace policies and procedures and considers own role for its contribution to broader goals of work environment</li> <li>Identifies implications of legal and regulatory responsibilities for own work, with specific reference to safety</li> <li>Identifies concepts, principles and features of approaches in use in other contexts and applies them to own situation</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>Develops plans to manage relatively complex, non-routine tasks that may contribute to longer-term operational and strategic goals</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBSMB420 Evaluate and develop small business operations.

Supersedes but is not equivalent to:

- BSBFRA401 Manage compliance with franchisee obligations and legislative requirements
- BSBFRA402 Establish a franchise
- BSBFRA403 Manage relationship with franchisor
- BSBFRA404 Manage a multiple-site franchise
- BSBFRA501 Establish a franchise operation
- BSBFRA502 Manage a franchise operation
- BSBFRA503 Manage establishment of new sites or regions
- BSBFRA504 Manage relationships with franchisees
- BSBFRA505 Manage closure of a franchise
- BSBIPR501 Manage intellectual property to protect and grow business

# Assessment Requirements for BSBESB407 Manage finances for new business ventures

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- implement a financial strategy for at least one business or new business venture according to business plan and goals.

In the course of the above, the candidate must:

- adhere to legal requirements
- produce financial projections, including cash flow estimates
- develop a plan to negotiate and manage business assets and financial capital
- define strategies for debt collection and contingencies for debtors
- manage cash flow
- define key indicators for financial performance
- communicate with required people
- seek specialist services, where required
- monitor the financial performance of the business and make changes to strategy as required
- identify opportunities to implement new and emerging digital technologies to support the financial management of the business.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory financial requirements that apply to new business venture described in performance evidence
- key purposes of financial reports
- components of financial budgets or projections, including cash flow estimates
- workplace procedures for:
  - recording and communicating financial procedures to required personnel

- distributing financial budgets and projections
- using digital technologies to monitor and report on financial performance targets and analyse data
- assessing and changing financial plan
- forms, channels and modes of communication used in relation to managing business finances
- key features of business and industry benchmarking used to evaluate financial ratios
- key features of financial decision-making relevant to the business, including:
  - strategies that enable adequate financial provision for taxation
- components of client credit policies, including contingencies for debtors in default
- key features of significant financial indicators
- key features of balance sheet preparation and interpretation
- key features of debt collection procedures and strategies
- key features of profit and loss statement preparation and interpretation
- key features of stock records and stock control relevant to the business.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- business equipment and resources, including business technology
- legislation, regulations, codes of practice and standards relating to business described in performance evidence
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBFIN302 Maintain financial records

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

### Application

This unit describes the skills and knowledge required to maintain daily financial records such as reconciling systems for debtors and creditors, preparing and maintaining a general ledger and trial balance. It also includes activities associated with monitoring cash control for accounting purposes.

The unit applies to individuals employed in a range of work environments with responsibility for simple accounting functions within an organisation. They may work as individuals providing administrative support within an enterprise or may be other members of staff with delegated responsibilities relating to maintenance of general financial records.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Business Competence – Financial Literacy

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare journals required for posting to general ledger	1.1 Identify transactions required to be included in journal entries 1.2 Identify general ledger accounts affected according to organisational policies, procedures and accounting standards 1.3 Prepare and document the journal entries according to organisational policies, procedures and accounting standards 1.4 Assess follow-up steps for journal entries
2. Post journal entries and reconcile	2.1 Post journal entries into general ledger system according to organisational policies, procedures and accounting standards

ELEMENT	PERFORMANCE CRITERIA
discrepancies	2.2 Reconcile accounts payable and accounts receivable subsidiary ledger systems with general ledger 2.3 Rectify any discrepancies and escalate, where required if outside scope of individual authority 2.4 Prepare adjusted journal entries and closing entries for general ledger
3. Maintain general ledger	3.1 Prepare closing and post-closing trial balance from general ledger system of the organisation 3.2 Prepare trial balance 3.3 Check general ledger for accuracy of information and despatch to relevant stakeholders, where required 3.4 Check trial balance meets accounting equation requirements

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

Skill	Description
Numeracy	<ul style="list-style-type: none"> <li>• Uses a limited range of mathematical calculations to reconcile amounts using whole numbers and decimals</li> <li>• Integrates data from different sources and records numerical information in a format appropriate to context and purpose of material</li> <li>• Arranges and compares numerical information</li> </ul>
Reading	<ul style="list-style-type: none"> <li>• Recognises and interprets numerical and textual information to determine job requirements and complete required activities</li> </ul>
Writing	<ul style="list-style-type: none"> <li>• Uses factual and suitable financial language to refer issues and inconsistencies in data</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Recognises strengths and expertise of others and seeks their assistance as required</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Identifies and monitors adherence to applicable industry standards, legislative and organisational requirements in undertaking own work</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Selects appropriate practices and protocols when handling confidential information</li> <li>• Recognises and addresses problems in the context of own work and seeks advice from others, as necessary</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Uses digital technologies to access, record, store, organise and</li> </ul>

Skill	Description
	compile data as required

## Unit Mapping Information

No equivalent unit. Supersedes but is not equivalent to:

- BSBFIA301 Maintain financial records
- BSBFIA304 Maintain a general ledger
- BSBINT306 Apply knowledge of international finance and insurance to complete work requirements.

Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- record and process daily transactions for five different days, and identify and respond to discrepancies and errors, according to accounting principles.

In the course of the above, the candidate must:

- enter, transfer and record financial data.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key provisions of relevant legislation, codes of practice and national standards that may affect both:
  - financial record keeping
  - aspects of financial operations
- key components of organisational accounting systems and procedures
- procedures for checking for errors or discrepancies
- organisational policies and procedures relating to maintaining financial records
- types of financial entries including credits and debits
- tax records required to be kept by businesses
- principles of double entry bookkeeping and accrual accounting
- methods of presenting financial data
- processes for rectifying or referring discrepancies or errors in documentation or transactions to designated persons according to organisational and legislative requirements
- accounting software used in the maintenance of financial records.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- accounting software
- examples of source documents relating to financial record keeping including source journals and daily transactions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBFLM303 Contribute to effective workplace relationships

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to gather information and maintain effective relationships and networks, with particular regard to communication and representation.

This unit applies to individuals who use leadership skills including motivation, mentoring and coaching to develop efficient, effective and unified teams and facilitate communication between team members and management of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership – Frontline Management

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Seek, receive and communicate information and ideas	1.1 Collect information associated with the achievement of work responsibilities from appropriate sources 1.2 Communicate ideas and information to diverse audiences in an appropriate and sensitive manner 1.3 Seek contributions from internal and external sources to develop and refine new ideas and approaches in accordance with organisational processes

ELEMENT	PERFORMANCE CRITERIA
	1.4 Facilitate consultation processes to allow employees to contribute to issues related to their work, and promptly communicate outcomes of consultation to the work team  1.5 Promptly deal with and resolve issues raised, or refer them to relevant personnel
2 Encourage trust and confidence	2.1 Treat people with integrity, respect and empathy 2.2 Encourage effective relationships within the framework of the organisation's social, ethical and business standards 2.3 Gain and maintain the trust and confidence of colleagues, customers and suppliers through competent performance 2.4 Adjust interpersonal styles and methods in relation to the organisation's social and cultural environment
3 Identify and use networks and relationships	3.1 Identify and utilise workplace networks to help build relationships 3.2 Identify and describe the value and benefits of networks and other work relationships for the team and the organisation
4 Contribute to positive outcomes	4.1 Identify difficulties and take action to rectify the situation within own level of responsibility according to organisational and legal requirements 4.2 Support colleagues in resolving work difficulties 4.3 Regularly review workplace outcomes and implement improvements in consultation with relevant personnel 4.4 Identify and resolve poor work performance within own level of responsibility and according to organisational policies 4.5 Deal constructively with conflict, within the organisation's established processes

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 1.5, 4.3	<ul style="list-style-type: none"> <li>Comprehends textual information to determine regulatory requirements and adhere to job processes</li> </ul>

		and internal policies
Writing	1.1-1.5, 4.3, 4.4, 4.5	<ul style="list-style-type: none"> <li>• Uses appropriate language to record key information related to the outcomes of the job</li> <li>• Varies writing style to meet requirements of audience and purpose</li> </ul>
Oral Communication	1.2-1.5, 2.1, 2.2, 2.4, 3.1, 4.2-4.5	<ul style="list-style-type: none"> <li>• Speaks clearly using tone and pace appropriate for the audience and purpose</li> <li>• Uses appropriate techniques, including active listening and questioning, to clarify information and to confirm understanding</li> </ul>
Navigate the world of work	1.3, 2.1, 2.2, 2.4, 4.1, 4.4, 4.5	<ul style="list-style-type: none"> <li>• Takes personal responsibility for adherence to explicit and implicit organisational policies, procedures, standards and legislative requirements within own job role and in all interactions with others</li> </ul>
Interact with others	1.2, 1.3, 1.4, 1.5 2.1, 2.2, 2.3, 2.4 4.2, 4.3, 4.4, 4.5	<ul style="list-style-type: none"> <li>• Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to build rapport, establish networks, seek or share information,</li> <li>• Adjusts personal communication style in response to a diverse range of individuals in the work context</li> <li>• Uses collaborative techniques to engage team members in consultations and negotiations</li> <li>• Implements strategies to respond appropriately to conflict and poor work performance</li> </ul>
Get the work done	1.1, 1.3, 1.4, 1.5, 2.3, 3.1, 3.2, 4.1, 4.2, 4.3, 4.4	<ul style="list-style-type: none"> <li>• Takes responsibility for planning, sequencing and prioritising tasks and own workload for effective outcomes</li> <li>• Uses formal analytical thinking techniques and broad ranging consultative processes to identify issues and implement a constructive approach to solutions and improvement opportunities</li> <li>• Uses familiar digital technologies and systems to access, present and communicate information</li> </ul>

# Assessment Requirements for BSBFLM303 Contribute to effective workplace relationships

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- access and analyse information to achieve planned outcomes
- apply techniques for resolving problems and conflicts and dealing with poor performance within organisational and legislative requirements
- review and improve workplace outcomes in consultation with relevant personnel
- adjust interpersonal style and communications to respond to cultural and social diversity
- apply relationship management and communication skills with a range of people that:
  - demonstrate integrity, respect, empathy and cultural sensitivity and promote trust
  - forge effective relationships with internal and/or external people and help to maintain these networks
  - encourage participation and foster contribution of and respect for ideas and feedback
  - provide support to colleagues to resolve difficulties.
- communicate ideas and information to diverse audiences
- develop networks and build team relationships.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of how work relationships and the cultural and social environment can support or hinder achieving planned outcomes
- explain techniques for developing positive work relationships and building trust and confidence in a team
- identify relevant legislation from all levels of government that affects business operation

- describe a range of methods and techniques for communicating information and ideas to a range of stakeholders
- outline problem solving methods
- explain methods to resolve workplace conflict
- explain methods to manage poor work performance
- explain how to monitor, analyse and introduce ways to improve work relationships.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management field of work and include access to:

- relevant legislation and regulations
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBFLM309 Support continuous improvement systems and processes

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Application

This unit describes the skills and knowledge required to support the organisation's continuous improvement systems and processes. Particular emphasis is on actively encouraging the team to participate in the process, monitoring and reporting on specified outcomes and supporting opportunities for further improvements.

It applies to individuals with roles of responsibility who use initiative, organisational and communication skills to influence the ongoing development of the organisation.

At this level, work will normally be carried out within known routines, methods and procedures, and may also involve complex or non-routine activities that require some discretion and judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Management and Leadership – Frontline Management

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Contribute to continuous improvement systems and processes	1.1 Actively encourage and support team members to participate in decision-making processes and to assume responsibility and exercise initiative

ELEMENT	PERFORMANCE CRITERIA
	<p>1.2 Communicate the organisation's continuous improvement processes to individuals and teams</p> <p>1.3 Effectively utilise mentoring and coaching to ensure that individuals/teams are able to support the organisation's continuous improvement processes</p>
2 Monitor and report specified outcomes	<p>2.1 Utilise the organisation's systems and technology to monitor team progress and to identify ways in which planning and operations could be improved</p> <p>2.2 Apply continuous improvement techniques and processes to improve customer service</p>
3 Support opportunities for further improvement	<p>3.1 Communicate agreed recommendations for improvements in achieving the business plan to team members</p> <p>3.2 Document and use work performance to identify opportunities for further improvement</p> <p>3.3 Maintain records, reports and recommendations for improvement within the organisation's systems and processes</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Learning	1.3	<ul style="list-style-type: none"> <li>Contributes to ongoing organisational improvement by mentoring others to support continuous improvement processes</li> </ul>
Reading	2.1, 3.3	<ul style="list-style-type: none"> <li>Interprets everyday workplace documentation</li> </ul>
Writing	1.2, 3.1-3.3	<ul style="list-style-type: none"> <li>Uses appropriate vocabulary and grammatical structures to achieve precise meaning in a range of documentation</li> </ul>
Oral Communication	1.1-1.3, 3.1	<ul style="list-style-type: none"> <li>Articulates information in a positive manner using appropriate terminology, tone and style appropriate to context and audience</li> <li>Uses questioning and listening techniques to exchange and clarify information</li> </ul>

Navigate the world of work	1.2, 3.3	<ul style="list-style-type: none"> <li>Understands the nature and purpose of own role and associated responsibilities and how own role meshes with others and contributes to broader work goals</li> <li>Takes responsibility for adherence to organisational processes and systems</li> </ul>
Interact with others	1.2, 1.3	<ul style="list-style-type: none"> <li>Shares information and resources, offers assistance voluntarily and facilitates effective group interactions</li> </ul>
Get the work done	2.1, 2.2, 3.2, 3.3	<ul style="list-style-type: none"> <li>Takes responsibility for routine low-impact decisions within familiar situations</li> <li>Evaluates effectiveness of decisions in terms of how well they meet stated goals</li> <li>Uses a range of digitally based technology and applications to organise, monitor, manage and communicate relevant information effectively</li> </ul>

# Assessment Requirements for BSBFLM309 Support continuous improvement systems and processes

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- perform actions to support continuous improvement including:
  - using work performance to identify improvement
  - adjusting plans to reflect changes
  - communicating effectively with all stakeholders
  - using technology to monitor operational progress
  - applying suitable recordkeeping processes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain principles and techniques relating to:
  - continuous improvement systems and processes
  - benchmarking
  - best practice
- describe the benefits of continuous improvement
- list quality approaches which the organisation may implement
- explain methods that can be used in continuous improvement
- outline barriers to continuous improvement
- explain recording, reporting and recommendation processes to facilitate continuous improvement applied within the organisation.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others
- business technology.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBINN201 Contribute to workplace innovation

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to make a pro-active and positive contribution to workplace innovation.

It applies to individuals working in any industry or community context, in both small and large organisations who take a pro-active approach to identifying, suggesting and developing ideas about better ways of doing things at a practical operational level in a specific area of activity. While the individual's overall work is undertaken with some supervision and guidance, they apply discretion, judgement and effective interpersonal skills in order to contribute to workplace innovation.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Unit Sector

Creativity and Innovation – Innovation

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Identify opportunities to do things better	1.1 Be aware of own role in workplace innovation 1.2 Proactively identify opportunities for improvement in own area of work 1.3 Gather and review information which may be relevant to ideas and which might assist in gaining support for ideas

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
2 Discuss and develop ideas with others	2.1 Identify people who could provide input into ideas for improvements 2.2 Select the best way of approaching people to begin sharing ideas 2.3 Seek feedback on improvement of ideas, and discuss and develop options and possible variations 2.4 Review and select ideas for follow up based on feedback and further review
3 Address the practicalities of change	3.1 Take action to implement routine changes in consultation with others and within scope of own responsibility 3.2 Identify and articulate issues and practical processes for implementing proposed ideas 3.3 Present ideas and practical suggestions to the appropriate people about how improvements could be made

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<b>Skill</b>	<b>Performance Criteria</b>	<b>Description</b>
Reading	1.3, 2.4, 3.2	<ul style="list-style-type: none"> <li>Categorises, interprets and reviews information from a range of sources to generate ideas relevant to the workplace</li> </ul>
Writing	3.2, 3.3	<ul style="list-style-type: none"> <li>Communicates information using clear language and formats appropriate for the audience</li> </ul>
Oral Communication	2.3, 3.1, 3.2, 3.3	<ul style="list-style-type: none"> <li>Actively participates in verbal exchanges of ideas and elicits the view and opinions of others by listening and questioning</li> <li>Uses clear and relevant language to clarify workplace issues and promote ideas</li> </ul>
Numeracy	1.3, 3.2	<ul style="list-style-type: none"> <li>Performs basic mathematical calculations to estimate time and cost in relation to implementation of ideas</li> </ul>
Navigate the world of work	1.1, 1.2, 3.1	<ul style="list-style-type: none"> <li>Understands responsibilities of own role</li> </ul>
Interact with	2.3, 3.1-3.3	<ul style="list-style-type: none"> <li>Follows accepted communication practices and protocols when discussing or presenting ideas to others</li> </ul>

others		<ul style="list-style-type: none"> <li>Seeks and takes into account perspectives and opinions of others</li> </ul>
Get the work done	1.2, 1.3, 2.1, 2.2, 2.4, 3.1-3.3	<ul style="list-style-type: none"> <li>Plans and implements routine tasks making limited decisions and seeking assistance, when necessary</li> <li>Uses analytical or lateral thinking processes to identify improvements or new ways of approaching tasks</li> <li>Identifies and anticipates operational problems and develops possible solutions</li> </ul>

# Assessment Requirements for BSBINN201 Contribute to workplace innovation

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- identify ideas for improvements and use information from a range of sources including other people to review and select ideas to put forward for implementation
- communicate the ideas and seek input from others in order to identify how the ideas could be implemented
- implement routine changes within scope of responsibility.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the role of individuals in suggesting and making improvements and the importance of pro-active involvement
- list the positive impacts and the challenges of change and innovation
- provide examples of the types of changes that can occur as a result of effective individual participation within own scope of responsibility
- give examples of the types of changes that are within and outside own scope of responsibility
- list typical reasons why suggested improvements or innovations may not be implemented, including operational and management constraints
- explain how to prepare and communicate ideas for improvement to maximise likelihood of support.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the creativity and innovation and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBINS410 Implement records systems for small business

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

### Application

This unit describes the skills and knowledge required to research, develop and implement business or records systems for a small business.

The unit applies to individuals who use a range of organisational, analytical and communication techniques to carry out the responsibilities of their role and report directly to a supervisor or manager within the business or section of a larger organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Technical Skills – Information Services

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine information management requirements	1.1 Consult with relevant stakeholders and identify and document core business functions, supporting activities, resources, and business and social contexts 1.2 Research and identify organisational functions and activities for which records must be kept 1.3 Analyse the organisation's functions and activities and identify required detail and format of records 1.4 Identify security and access requirements for records system content from analysis of organisation's activities 1.5 Analyse business documentation to determine organisational reporting and accountability requirements

ELEMENT	PERFORMANCE CRITERIA
2. Select required records system	2.1 Identify metadata needed to describe, store, locate and retrieve records in a records system 2.2 Specify technological, internal controls, maintenance, disposal and updating requirements of prospective records systems according to scale and nature of business operations 2.3 Select records systems that meets required requirements according to scale, nature, and organisational cash flow requirements
3. Develop procedures and implement records system	3.1 Develop rules for incorporating individual records and metadata into records system 3.2 Develop and document procedures for the use of the system 3.3 Distribute information and instructions to relevant stakeholders in the use of the records system 3.4 Monitor and assist with implementation of the records system

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

Skill	Description
Reading	<ul style="list-style-type: none"> <li>Evaluates and interprets information from a range of relevant sources and identifies relevant and key information</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Creates documents to convey information and instructions using language and format appropriate to text and audience</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Uses active listening and questioning techniques to confirm and clarify information</li> <li>Communicates using words and non-verbal features appropriate to the audience and context</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Interprets, compares and contrasts numerical data to determine needs</li> <li>Uses numerical systems associated with record storage systems</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>Uses understanding of organisational requirements in planning an appropriate information management system</li> <li>Sequences and schedules tasks required to achieve outcomes and manages relevant communication</li> </ul>
Technology	<ul style="list-style-type: none"> <li>Uses digital systems and tools to complete tasks</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBRKG403 Set up a business or records system for a small business.

# Assessment Requirements for BSBINS410 Implement records systems for small business

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- identify, select, develop and implement a records system for a small business.

In the process of the above, the candidate must:

- document the steps used to determine the criteria for a records system appropriate to the organisation's business functions and reporting requirements.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key principles and processes of records management and records management systems
- internal controls required of the business or records system
- key characteristics of the organisational functions, structure and culture relevant to implementation of records system
- organisational policies and procedures relevant to implementing a records system in a small business.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBITU306 Design and produce business documents

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to design and produce various business documents and publications. It includes selecting and using a range of functions on a variety of computer applications.

It applies to individuals who possess fundamental skills in computer operations and keyboarding. They may exercise discretion and judgement using appropriate theoretical knowledge of document design and production to provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Information and Communications Technology – IT Use

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select and prepare resources	1.1 Select and use appropriate technology and software applications to produce required business documents 1.2 Select layout and style of publication according to information and organisational requirements 1.3 Ensure document design is consistent with company and/or client requirements, using basic design principles

ELEMENT	PERFORMANCE CRITERIA
	1.4 Discuss and clarify format and style with person requesting document/publication
2. Design document	2.1 Identify, open and generate files and records according to task and organisational requirements 2.2 Design document to ensure efficient entry of information and to maximise presentation and appearance of information 2.3 Use a range of functions to ensure consistency of design and layout 2.4 Operate input devices within designated requirements
3. Produce document	3.1 Complete document production within designated timelines according to organisational requirements 3.2 Check document produced to ensure it meets task requirements for style and layout 3.3 Store document appropriately and save document to avoid loss of data 3.4 Use manuals, training booklets and/or help-desks to overcome basic difficulties with document design and production
4. Finalise document	4.1 Proofread document for readability, accuracy and consistency of language, style and layout prior to final output 4.2 Make any modifications to document to meet requirements 4.3 Name and store document in accordance with organisational requirements and exit application without data loss/damage 4.4 Print and present document according to requirements

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	2.1, 2.2, 3.2, 3.4, 4.1	<ul style="list-style-type: none"> <li>Recognises and interprets textual information from a range of sources to determine and adhere to requirements</li> <li>Applies strategies to self-correct and verify clarity and conformity of information</li> </ul>

Writing	2.2, 2.3, 3.1, 4.2, 4.3	<ul style="list-style-type: none"> <li>Develops documents using required format, accurate spelling and grammar and terminology specific to requirements</li> <li>Organises content to support purposes and audience of material, using clear and logical language</li> </ul>
Oral Communication	1.4	<ul style="list-style-type: none"> <li>Confirms requirements with relevant personnel using specific terminology and listening and questioning techniques</li> </ul>
Navigate the world of work	1.2, 1.3, 2.1, 2.4, 3.1, 3.2, 4.2-4.4	<ul style="list-style-type: none"> <li>Recognises and follows explicit and implicit protocols and meets expectations associated with own role</li> </ul>
Interact with others	1.4	<ul style="list-style-type: none"> <li>Selects and uses appropriate conventions and protocols when communicating in a range of familiar work contexts</li> </ul>
Get the work done	1.1-1.3, 2.1-2.4, 3.1-3.4, 4.1-4.4	<ul style="list-style-type: none"> <li>Uses basic features and functions within applications to access, store, organise data and perform routine work tasks</li> </ul>

# Assessment Requirements for BSBITU306 Design and produce business documents

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- select appropriate technology and software for design and production of business documents
- adhere to organisational requirements when:
  - selecting layout and style
  - opening and generating files
  - producing documents within designated timelines
  - naming and storing documents
  - printing and presenting documents
- adhere to task requirements when producing documents including:
  - applying basic design principles
  - applying consistent formatting
  - using appropriate styles
  - using correct layouts
  - proofreading as required
- use appropriate data storage options
- apply knowledge of functions and features of contemporary computer applications
- print and present completed documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify appropriate technology for production requirements

- describe functions and features of contemporary computer applications
- outline organisational policies, plans and procedures
- list organisational requirements for document design e.g. style guide.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- office equipment and resources
- relevant software applications
- examples of style guides
- organisational procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for BSBLDR413 Lead effective workplace relationships

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- lead effective workplace relationships on at least four occasions with different individuals or groups.

In the course of the above, the candidate must:

- access and analyse information required to achieve planned outcomes
- collaborate with work team to develop and implement a work task strategy
- apply techniques for resolving problems and conflicts, and dealing with poor performance according to organisational and legislative requirements
- monitor and communicate work progress to relevant internal and external stakeholders
- seek and review feedback to improve workplace leadership.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- considerations for communicating information including audience cultural and social diversity
- consultation processes including internal and external sources of consultees
- impacts of relationships, cultural and social environment, in supporting or hindering the achievement of planned outcomes
- techniques for developing positive work relationships and building trust and confidence in a team, including:
  - interpersonal styles
  - communications
  - consultation
  - cultural and social sensitivity
  - networking

- impact of legislation and organisational policies on workplace relationships
- techniques for communicating information and ideas to a range of stakeholders
- common methods to resolve workplace conflict
- common methods to manage poor work performance
- common methods to monitor, analyse and improve work relationships.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation, regulations, standards and codes relevant to performance evidence
- workplace documentation and resources
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBLDR414 Lead team effectiveness

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

### Application

This unit describes the skills, knowledge and outcomes required to lead the performance of a team and to develop team cohesion.

The unit applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams. Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Social Competence – Leadership

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan team outcomes	1.1 Lead team to identify and establish team objectives and work processes 1.2 Support team to document identified objectives and work processes according to organisational processes 1.3 Encourage team members to incorporate innovation and productivity measures in work plans 1.4 Lead and support team members to meet expected outcomes
2. Promote team cohesion	2.1 Provide opportunities for input of team members into planning, decision making and operational aspects of work team

ELEMENT	PERFORMANCE CRITERIA
	<p>2.2 Support team members to take responsibility for own work and to assist each other in undertaking required roles and responsibilities</p> <p>2.3 Provide feedback to team members on their efforts and contributions</p> <p>2.4 Address or refer issues, concerns and problems identified by team members</p> <p>2.5 Model expected behaviours and approaches</p>
3. Supervise team performance	<p>3.1 Encourage team members to participate in and take responsibility for team activities and communication processes</p> <p>3.2 Support team to identify and resolve problems which impede performance</p> <p>3.3 Ensure own contribution to work team serves as a role model for others</p>
4. Liaise with management	<p>4.1 Establish open communication with line management</p> <p>4.2 Communicate information from line management to the team</p> <p>4.3 Communicate unresolved issues, concerns and problems raised by the team to line management to action</p> <p>4.4 Communicate issues raised by management to the team to action</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

SKILL	DESCRIPTION
Writing	<ul style="list-style-type: none"> <li>Prepares workplace plans that communicate intent and elicits feedback clearly and effectively</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>Engages in discussions or provides information using structure and language appropriate to the audience and situation</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Selects and uses appropriate conventions and protocols when communicating with team members</li> <li>Adapts personal communication style to model required behaviours, build trust and positive working relationships and to show respect for the opinions and values of others</li> <li>Plays a lead role in situations requiring effective collaboration, demonstrating conflict resolution skills and ability to engage and motivate others</li> </ul>

Planning and organising	<ul style="list-style-type: none"><li>• Develops, implements and monitors plans and processes to ensure team engagement and effectiveness</li><li>• Uses formal analytical thinking techniques to identify issues and generate possible solutions, seeking input from others, as required</li></ul>
-------------------------	---

# BSBLEG525 Apply legal principles in intellectual property law matters

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Application

This unit describes the skills and knowledge required to apply legal principles in intellectual property law matters. It covers maintaining control over the copyright owner's work, commercialising copyright material, preventing the unauthorised use of an original work and using other party's original work legitimately.

The unit applies to individuals who provide support in a range of legal service settings with a degree of responsibility to plan and complete investigations.

It also applies to people who may be authors, creators or other owners of works covered by copyright, as well as employees who have a role in ensuring that their organisational copyright is protected and/or that their organisation uses others' copyright appropriately to benefit the organisation without infringing the rights of copyright owners.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Technical Skills – Legal Services

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to apply principles of intellectual property	1.1 Identify task requirements 1.2 Identify key principles of intellectual property law according to task requirements 1.3 Identify key provisions of legislation and common law, policies or procedures relevant to task requirements

ELEMENT	PERFORMANCE CRITERIA
2. Employ principles of intellectual property	2.1 Apply principles of intellectual property law to relevant legal matters arising in the workplace 2.2 Analyse and evaluate key issues 2.3 Develop recommendations of legal and economic implications of copyright infringement according to task requirements
3. Finalise application of intellectual property principles	3.1 Review analysis with designated person 3.2 Obtain feedback from relevant personnel 3.3 Amend advice according to feedback 3.4 Store documents and data used according to organisational policies and procedures

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Description
Reading	<ul style="list-style-type: none"> <li>Researches and analyses complex texts, including legislation, to identify relevant information</li> <li>Monitors and reviews organisational policies and procedures to ensure compliance with legislative requirements</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Records and maintains copyright documentation according to legislative and organisational requirements</li> <li>Reviews and updates organisational policies and procedures to ensure compliance with legislative requirements</li> </ul>

# Assessment Requirements for BSBLEG525 Apply legal principles in intellectual property law matters

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- apply principles of intellectual property law in at least four different matters.

In the course of the above, the candidate must:

- review and interpret information to determine how copyright applies in the organisation
- recommend actions to address risks and infringements
- communicate advice or recommendations about copyright to relevant stakeholders.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative framework for copyright and its application to the organisation including:
  - copyright owner of original works within or used by the organisation
  - policies and procedures for use of own copyright materials by other parties
  - policies and procedures for legitimate use of others' copyright materials
- sources of information and advice on copyright
- the types of works that attract copyright
- circumstances where a copyright notice is required
- regulations on selling copyright rights including:
  - commercialisation potential of copyright material
  - potential benefits for the firm
- intellectual property agreement documentation requirements
- further actions where intellectual property rights are breached
- methods to limit or deter unauthorised use of copyright material
- direct and indirect infringement of copyright
- when authorisation for use of copyright material is needed and how to obtain it

- different types of licences and how they apply to the firm.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- relevant legislation, regulations, standards and codes relevant to intellectual property.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBMGT401 Show leadership in the workplace

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to lead teams and individuals by modelling high standards of conduct to reflect the organisation's standards and values.

It applies to individuals who are making the transition from being a team member to taking responsibility for the work and performance of others and providing the first level of leadership within the organisation. These managers have a strong influence on the work culture, values and ethics of the teams they supervise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Management and Leadership – Management

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Model high standards of management performance and behaviour	1.1 Ensure management performance and behaviour meets the organisation's requirements 1.2 Ensure management performance and behaviour serves as a positive role model for others 1.3 Develop and implement performance plans in accordance with organisation's goals and objectives 1.4 Establish and use key performance indicators to meet

ELEMENT	PERFORMANCE CRITERIA
	organisation's goals and objectives
2. Enhance organisation's image	<p>2.1 Use organisation's standards and values in conducting business</p> <p>2.2 Question, through established communication channels, standards and values considered to be damaging to the organisation</p> <p>2.3 Ensure personal performance contributes to developing an organisation which has integrity and credibility</p>
3. Make informed decisions	<p>3.1 Gather and organise information relevant to the issue/s under consideration</p> <p>3.2 Facilitate individual's and team's active participation in decision-making processes</p> <p>3.3 Examine options and assess associated risks to determine preferred course/s of action</p> <p>3.4 Ensure decisions are timely and communicate them clearly to individuals and teams</p> <p>3.5 Prepare plans to implement decisions and ensure they are agreed by relevant individuals and teams</p> <p>3.6 Use feedback processes effectively to monitor the implementation and impact of decisions</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.1, 3.1, 3.3, 3.5, 3.6	<ul style="list-style-type: none"> <li>Gathers, interprets and analyses text relating to organisational goals, standards and values to aid planning and decision making</li> </ul>
Writing	1.3, 1.4, 3.1, 3.3, 3.5, 3.6	<ul style="list-style-type: none"> <li>Records and reports key information related to the organisational goals, standards and objectives</li> <li>Researches, plans and prepares documentation for relevant stakeholders</li> </ul>
Oral Communication	1.2, 1.3, 2.2, 2.3, 3.2, 3.4, 3.5, 3.6	<ul style="list-style-type: none"> <li>Uses appropriate structure and language when developing performance plans, or when seeking and providing information about organisational goals and</li> </ul>

		objectives
Numeracy	1.4	<ul style="list-style-type: none"> <li>Identifies and comprehends mathematical information in familiar texts to establish key performance indicators</li> </ul>
Navigate the world of work	1.1, 1.2, 1.3, 1.4, 2.1, 2.3	<ul style="list-style-type: none"> <li>Understands how own role meshes with others and contributes to broader work goals</li> <li>Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment</li> </ul>
Interact with others	1.2, 1.3, 2.2, 2.3, 3.2, 3.4, 3.5, 3.6	<ul style="list-style-type: none"> <li>Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective outcomes</li> <li>Recognises the importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate with whom, why and how</li> </ul>
Get the work done	1.1, 1.3, 1.4, 3.1, 3.2, 3.3, 3.4, 3.5, 3.6	<ul style="list-style-type: none"> <li>Develops plans to manage relatively complex, non-routine tasks with an awareness of how they contribute to longer term operational and strategic goals</li> <li>Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria</li> <li>Evaluates effectiveness of decisions in terms of how well they meet stated goals</li> </ul>

## Range of Conditions

*This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.*

Organisation's standards and values must be identified by considering:	<ul style="list-style-type: none"> <li>explicitly stated values</li> <li>values that are implied by the way the organisation conducts its business.</li> </ul>

# Assessment Requirements for BSBMGT401 Show leadership in the workplace

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- identify the organisation's standards and values, whether stated or implied by the way the organisation conducts its business
- evaluate own behaviour and performance against these and adjust to achieve required standards
- develop and implement performance plans and key performance indicators (KPIs) to meet organisation's goals and objectives
- use established communication channels to raise questions about standards and values that may be damaging to the organisation
- ensure own behaviour and performance contributes to the integrity and credibility of the organisation
- facilitate processes to make decisions that are based on:
  - relevant information
  - examination of options and associated risks
  - input from relevant people
- communicate about making and implementing decisions including:
  - facilitating agreement on the preferred course of action and implementation plans
  - monitoring and feedback on the implementation and impact of decisions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how to identify an organisation's standards and values when they are:
  - stated

- implied
- articulate organisational values and expectations of behaviour
- explain basic theory of group behaviour
- outline the organisation's process for raising questions about standards and values
- give examples of behaviours and performance that would typically be considered damaging to an organisation
- explain concepts including:
  - organisational values
  - role modelling
  - integrity and credibility
  - leadership.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# Assessment Requirements for BSBMKG434 Promote products and services

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- Promote at least three products or services.

In the course of the above, the candidate must:

- identify the context for the promotional activities, including:
  - relevant legislation and regulations
  - organisation's goals, objectives, systems, policies and procedures
  - budget and timelines
  - marketing needs and, if defined, marketing plans
  - objectives of the promotional activities
- consult with relevant stakeholders to plan promotional activities to meet objectives, budget and timelines
- coordinate promotional activities including:
  - allocating roles and responsibilities
  - using communication channels to convey responsibilities
  - obtaining relevant resources and promotional products
- analyse feedback and data to evaluate the effectiveness of planning processes and promotional activities and make recommendations on future directions of promotional activities.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory context of the organisation as relevant to promotional activities
- content of action plans, including:
  - task steps

- costs
- timeframe
- resources and responsibilities
- internal and external stakeholders involved in coordinating promotional activities
- planning processes for organising promotional activities
- organisation's marketing objectives and how they support the overall business objectives
- common promotional activities that could be used to support the marketing objectives.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation, regulations, standards and codes for promoting products and services
- workplace documentation and resources for promoting products and services.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBOPS304 Deliver and monitor a service to customers

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

### Application

This unit describes the skills and knowledge required to identify customer needs, deliver and monitor customer service and identify improvements in the provision of customer service.

The unit applies to those who apply a broad range of competencies in various work contexts. In this role, individuals often exercise discretion and judgement using appropriate knowledge of customer service. They provide technical advice and support to customers over short or long-term interactions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Business Competence – Business Operations

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify customer needs	1.1 Identify and clarify customer needs and expectations 1.2 Evaluate customer needs and determine priorities for service delivery according to organisational requirements 1.3 Inform customers about available choices for meeting their needs and assist selection of preferred options 1.4 Identify limitations in addressing customer needs and seek assistance from designated individuals, where required
2. Deliver a service to customers	2.1 Provide service to meet identified customer needs according to organisational and legislative requirements 2.2 Establish and maintain rapport with customers

ELEMENT	PERFORMANCE CRITERIA
	2.3 Manage customer complaints according to organisational and legislative requirements 2.4 Provide assistance and respond to customers with specific needs according to organisational and legislative requirements 2.5 Identify and use available opportunities to promote and enhance services and products to customers
3. Evaluate customer service delivery	3.1 Review customer satisfaction with service delivery using verifiable evidence according to organisational and legislative requirements 3.2 Seek and respond to customer feedback according to organisational policies and procedures 3.3 Identify opportunities to enhance the quality of customer service 3.4 Document recommendations for customer service improvements 3.5 Submit recommendations to relevant personnel according to organisational policies and procedures

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Description
Learning	<ul style="list-style-type: none"> <li>Identifies and follows up on opportunities to improve work practices and outcomes</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>Provides information or advice using structure and language to suit the audience</li> <li>Asks questions and listens to gain information or confirm understanding</li> </ul>

# Assessment Requirements for BSBOPS402 Coordinate business operational plans

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare, implement and review two operational plans.

In the course of the above, the candidate must:

- interact with a range of people and groups to identify resource requirements, performance objectives, systems, procedures and records relating to the operational plan
- plan and acquire physical and human resources using organisation's systems and procedures
- manage and support personnel to achieve performance objectives including facilitating new employee onboarding
- present information and recommendations to support implementation and variation of the operational plan
- monitor operational performance against the performance objectives and budgets and implement improvements to rectify unsatisfactory performance
- vary the operational plan and gain approval to deal with contingencies
- document and provide reports on performance as required by the organisation.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- processes to identify resource requirements
- sources of information to identify resource requirements
- methods to manage contingencies including through consultation with relevant stakeholders
- key features of performance monitoring systems and processes
- common methods for problem solving
- methods to support staff including mentoring, coaching and supervision

- implementation methods for operational plan
- budget and other financial information related to the organisation
- organisational objectives including costs, identified shortfalls and surpluses.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- organisational operational plans, policies and procedures relevant to performance evidence
- workplace documentation and resources including budgets
- physical and human resource procurement documentation
- employee onboarding and performance monitoring procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBOPS403 Apply business risk management processes

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

### Application

This unit describes the skills and knowledge required to identify business risks and to apply established risk management processes to a defined area of operations that are within the responsibilities and obligations of the work role.

The unit applies to individuals with a broad knowledge of risk analysis or project management who contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They may have responsibility to provide guidance or delegate aspects of these tasks to others. Risks applicable to own work responsibilities and area of operation may include projects being undertaken individually or by a team, or operations within a section of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Business Competence – Business Operations

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify risks	1.1 Identify context for risk management 1.2 Undertake required steps to identify risks 1.3 Document identified risks according to relevant policies, procedures, legislation and standards
2. Analyse and evaluate risks	2.1 Analyse risks in consultation with relevant stakeholders 2.2 Undertake risk categorisation and determine level of risk 2.3 Document analysis processes and outcomes

ELEMENT	PERFORMANCE CRITERIA
3. Treat risks	3.1 Identify control measures for risks 3.2 Assess strengths and weaknesses of control measures 3.3 Refer risks to relevant personnel, where required, according to policies and procedures 3.4 Select and implement control measures for personal area of operation and responsibilities
4. Monitor and review effectiveness of risk treatments	4.1 Review implemented treatments against measures of success 4.2 Use review results to improve the treatment of risks 4.3 Monitor and review management of risk in personal area of operation

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Description
Learning	<ul style="list-style-type: none"> <li>• Uses analysis and consultative processes to inform decisions about selection and implementation of risk control measures</li> <li>• Evaluates effectiveness of plans and results to inform improvement decisions</li> </ul>
Reading	<ul style="list-style-type: none"> <li>• Comprehends documents and texts of varying complexity to extract and analyse relevant information</li> </ul>
Writing	<ul style="list-style-type: none"> <li>• Uses specific, industry related terminology and logical organisational structure in workplace documents that identify and analyse risk and report management process outcomes</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>• Participates effectively in interactions with stakeholders by using questioning and listening to elicit opinions and clarify understanding</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>• Uses numerical tools to assess risk and uses numerical data to review plans</li> </ul>
Enterprise and initiative	<ul style="list-style-type: none"> <li>• Complies with organisational and legislative requirements</li> <li>• Takes responsibility for identification and management of risk within own work context and refers matters to others as required</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Selects appropriate communication protocols and conventions when conferring with others to establish risk management requirements</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Determines job sequence and works logically and systematically to undertake defined tasks</li> </ul>

Skill	Description
Technology	<ul style="list-style-type: none"><li>• Uses familiar digital technologies and systems to access information, prepare plans and communicate with others</li></ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBRK401 Identify risk and apply risk management processes.

# Assessment Requirements for BSBOPS403 Apply business risk management processes

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to apply organisational policies, procedures and processes to:

- treat at least three risks by:
  - identifying different types of organisational risks
  - consulting with stakeholders to analyse and evaluate risks
  - implementing control measures
  - referring risks that are beyond own area of responsibility to others
  - maintaining risk management documentation.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory context of the organisation in relation to risk management
- techniques for identifying and evaluating risks
- organisational policies and procedures for risk management
- areas where risks are commonly identified in an organisation
- risks beyond scope of individual responsibility to be referred to relevant organisational personnel
- purpose and key elements of current risk management standards.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation, regulations, standards and codes relating to business risk

- workplace documentation on selected organisational risks.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for BSBOPS404 Implement customer service strategies

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and implement at least two strategies to improve customer service delivery.

In the course of the above, the candidate must:

- respond to and report on customer feedback and complaints
- review client satisfaction using verifiable data
- consult and communicate effectively with relevant people
- develop and implement strategies and methods to improve customer service delivery, including:
  - budgeting
  - promotion to staff
  - documentation and follow up.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- customer communication techniques
- principles of customer service
- sources of verified client information
- techniques for identifying customer needs and reviewing customer satisfaction
- organisational business structure, products and services related to customer service
- techniques for drawing insights from verifiable evidence to develop recommendations and conclusions
- product and service standards and best practice models.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- organisational policies and procedures for customer service
- examples of customer complaints and feedback
- client satisfaction data.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for BSBOPS505 Manage organisational customer service

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and review strategy for delivering and monitoring quality customer service for an organisation or work area.

In the course of the above, the candidate must:

- implement quality customer service policies and procedures
- identify and resolve system problems relating to poor customer service
- assist teams to meet customer service requirements
- develop, procure and use human and physical resources to support quality customer service delivery.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legislative and regulatory frameworks governing customer service
- elements of effective customer service including quality, time and cost
- organisational policies and procedures for customer service and handling customer complaints
- relevant service standards and best practice models
- key principles of public relations and product promotion
- common techniques for solving complaints
- principles and techniques involved in managing:
  - customer behaviour
  - specific customer needs
  - customer research
  - customer relations

- ongoing product and service quality
- problem identification and resolution
- quality customer service delivery
- record keeping and management methods
- strategies for monitoring, managing and introducing ways to improve customer service relationships
- strategies to obtain customer feedback.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- legislation, regulations and codes of practice related to customer service
- workplace documentation and resources
- complex customer complaints.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# Assessment Requirements for BSBPEF301 Organise personal work priorities

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.
Release 2	This version first released with BSB Business Services Training Package Version 7.2.  Release created to amend typographical error in the foundation skills.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- prepare and implement a personal work plan.

In the course of the above, the candidate must:

- prepare a work plan according to organisational requirements and work objectives
- use technology to schedule, prioritise and monitor completion of tasks in a work plan
- assess and prioritise own work tasks and address contingencies
- monitor and assess personal performance against job role requirements by seeking feedback from relevant personnel
- identify personal development needs and access, complete and record skill development and learning.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisational policies and procedures relevant to work tasks
- goals, objectives and key performance indicators for task within scope of job role
- methods to elicit, analyse and interpret feedback when communicating with other people in the workplace
- content of work plans including:
  - timeframes
  - tasks requirements

- risks
- contingencies for identified risks
- types of personal learning and professional development requirements
- principles and techniques of goal setting, measuring performance and time management
- signs and sources of stress and strategies to deal with stress in the workplace
- methods to identify and prioritise personal learning needs.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- challenges and situations to demonstrate application of performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBPMG430 Undertake project work

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

### Application

This unit describes the skills and knowledge required to undertake a minor project or a section of a larger project. It covers developing a project plan, administering and monitoring the project, finalising the project and reviewing the project to identify lessons learned for application to future projects.

The unit applies to individuals who play a significant role in ensuring a project meets timelines, quality standards, budgetary limits and other requirements set for the project.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Business Competence – Project Management

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish project parameters	1.1 Identify project scope 1.2 Define project stakeholders 1.3 Seek clarification from delegating authority of issues related to project and project parameters 1.4 Identify responsibilities of relevant stakeholders and reporting requirements 1.5 Clarify relationship of project to other projects and to the objectives of the organisation 1.6 Identify availability and access of resources for undertaking the project

ELEMENT	PERFORMANCE CRITERIA
2. Develop project plan	<p>2.1 Identify risks and develop a risk management plan for project, including Work Health and Safety (WHS)</p> <p>2.2 Develop project budget and timeframe and seek approval from relevant stakeholders</p> <p>2.3 Consult team members and apply their views in planning the project</p> <p>2.4 Identify and access appropriate project management tools</p> <p>2.5 Develop project plan according to project parameters and deliverables</p> <p>2.6 Finalise project plan and gain necessary approvals to commence project according to documented plan</p>
3. Administer and monitor project	<p>3.1 Communicate to project team members their responsibilities and project requirements</p> <p>3.2 Establish and maintain required recordkeeping systems throughout the project</p> <p>3.3 Implement and monitor plans for managing the project</p> <p>3.4 Undertake risk management as required</p>
4. Finalise and review project	<p>4.1 Complete financial recordkeeping associated with project and confirm according to agreed budget</p> <p>4.2 Complete project documentation and obtain sign-offs for concluding project</p> <p>4.3 Review project outcomes and processes against the project scope and plan</p> <p>4.4 Document feedback and suggested improvements</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> <li>Organises, evaluates and critiques ideas and information from a range of complex texts</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Develops plans, reports and recommendations using vocabulary, structure and conventions appropriate to text</li> <li>Establishes and maintains records according to organisational requirements</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Uses formal and some informal, oral and written mathematical language and representation to prepare and communicate budgetary and financial</li> </ul>

SKILL	DESCRIPTION
	information
Oral communication	<ul style="list-style-type: none"> <li>Participates in verbal discussions using clear language and appropriate features to present or seek information</li> <li>Using listening and questioning skills to seek information and confirm understanding</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Identifies and responds to organisational and legislative/regulatory requirements</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Selects and uses appropriate communication protocols and practices to ensure shared understanding of project roles and expectations</li> <li>Uses collaborative techniques to engage stakeholders in consultations and negotiations</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>Develops and implements plans to manage projects that involve diverse stakeholders with potentially competing demands</li> <li>Systematically gathers and analyses all relevant information and evaluates options to make informed decisions</li> <li>Evaluates outcomes of decisions to identify opportunities for improvement</li> </ul>
Technology	<ul style="list-style-type: none"> <li>Uses digital technologies and applications to access, organise and share information</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBPMG522 Undertake project work.

Supersedes but is not equivalent to BSBADM407 Administer projects.

# Assessment Requirements for BSBPMG430 Undertake project work

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- undertake project work on a minor project or a section of a larger project.

In the course of the above, the candidate must:

- confirm the quality of project outcomes according to expectations of the organisation
- consult and communicate with relevant stakeholders to generate input and engagement in planning, implementing and reviewing the project
- provide support to team members to enable them to achieve deliverables and to transition them as appropriate at completion of the project.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- project management tools
- types of documents and other sources of information commonly used in defining the parameters of a project
- mission, goals, objectives and operations of the organisation
- relevant legislation and regulations, including work health and safety (WHS) requirements, for project planning
- project management processes according to policies and procedures of the organisation and including:
  - lines of authority and approvals
  - quality assurance
  - human resources
  - budgets and finance
  - risk management
  - recordkeeping

- reporting.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- relevant legislation, regulations, standards and codes
- workplace documentation and resources relevant to performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBPRO301 Recommend products and services

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to provide advice and information within an organisation about the development and distribution of its products and services.

It applies to individuals who apply a broad range of administrative competencies in varied work contexts, using some discretion and judgement and who may provide technical advice and support to a team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Unit Sector

Industry Capability – Product Skills and Advice

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop and maintain knowledge of products and services	1.1 Actively and regularly research knowledge and understanding of industry products and services using authoritative sources 1.2 Use available product and service documentation to identify and understand characteristics of products and services, and to make comparisons with other products and services 1.3 Accurately document and maintain information on products and services in a format consistent with organisational requirements

ELEMENT	PERFORMANCE CRITERIA
	1.4 Apply acquired knowledge to improve quality within personal work areas
2. Recommend products and services	<p>2.1 Ensure that recommendations on products and services are in line with organisational requirements</p> <p>2.2 Provide recommendations that emphasise product and service issues relevant to client needs</p> <p>2.3 Ensure that evidence in support of recommendations is verifiable and presented in a suitable format</p> <p>2.4 Structure recommendations to identify clear benefits to clients and the organisation</p>
3. Advise on promotional activities	<p>3.1 Provide advice that is clear, is supported by verifiable evidence and is compatible with organisational requirements</p> <p>3.2 Ensure that promotional documentation and materials are appropriate to presentation of the organisation's products and services</p> <p>3.3 Ensure that costs of promotional activities conform to budget resources</p> <p>3.4 Estimate impact of promotional activities from verifiable customer feedback sources</p> <p>3.5 Evaluate the benefits of promotional activities and incorporate in plans for future promotional activities</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 3.4	<ul style="list-style-type: none"> <li>Interprets, understands and compares textual information about products and services from a range of sources</li> </ul>
Writing	1.2, 1.3, 2.2, 2.3, 2.4, 3.1, 3.2, 3.5	<ul style="list-style-type: none"> <li>Uses clear and specific language to develop documents for different audiences in accordance with organisational requirements</li> </ul>
Oral Communication	3.1	<ul style="list-style-type: none"> <li>Provides recommendations using language appropriate to the purpose and audience</li> </ul>

Numeracy	3.3, 3.4	<ul style="list-style-type: none"> <li>Extracts and evaluates meaning from data to calculate actual costs against budget and impact of promotional activities</li> </ul>
Navigate the world of work	1.3, 1.4, 2.1, 3.1	<ul style="list-style-type: none"> <li>Understands and follows organisational policies and procedures relevant to own role</li> </ul>
Get the work done	1.1-1.3, 2.1-2.4, 3.1, 3.2, 3.5	<ul style="list-style-type: none"> <li>Plans and implements tasks required to achieve required outcomes</li> <li>Analyses information in order to decide on appropriate advice or recommendations</li> <li>Evaluates outcomes of decisions to identify opportunities for improvement</li> </ul>

# Assessment Requirements for BSBPRO301 Recommend products and services

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- use appropriate sources to document accurate information about the organisation's products and services
- prepare and provide advice about products and services according to organisational requirements
- evaluate promotional activities including consideration of:
  - whether promotional materials meet organisational requirements
  - actual costs against budget
  - customer feedback.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list authoritative sources of information about the organisation's products and services
- outline the organisation's products and services
- outline the policies and procedures that apply when providing advice or recommendations about products and services
- list and describe organisational promotional activities
- explain methods used to gather verifiable customer feedback about products and services
- explain how and why customer feedback is analysed.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – product skills and advice field of work and include access to:

- relevant organisational policies and procedures
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBPRO401 Develop product knowledge

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to develop product knowledge in preparation for the sales process.

It applies to individuals who need to solve a defined range of unpredictable problems, analyse and evaluate information from a variety of sources and who may provide leadership and guidance to others with some limited responsibility for the output of others.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Unit Sector

Industry Capability – Product Skills and Advice

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Acquire knowledge of products in a specified area	1.1 Identify information sources about products in a specified area and evaluate them for reliability and validity 1.2 Identify product purpose/s and use/s 1.3 Identify key features of the product/s 1.4 Identify product strengths and weaknesses 1.5 Articulate guarantees and warranties and identify service support details

ELEMENT	PERFORMANCE CRITERIA
2. Convert product knowledge into benefits	<p>2.1 Identify features of the product which have potential buyer appeal</p> <p>2.2 Present features of the product which have buyer appeal as benefits to the buyer</p> <p>2.3 Present product benefits within the context of organisational requirements and legislation</p>
3. Evaluate competitors' products	<p>3.1 Use a range of information sources to identify competitors' products</p> <p>3.2 Compare features, benefits, strengths and weaknesses of competitors' products with own products</p> <p>3.3 Establish relative standing of the organisation's product with the competitors' product/s and communicate differences to the buyer</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 1.4, 2.1, 3.1, 3.2, 3.3	<ul style="list-style-type: none"> <li>Identifies, interprets, understands and compares information to monitor and evaluate quality of product and services and check against client requirements</li> </ul>
Writing	1.1, 1.5, 2.2, 2.3, 3.2	<ul style="list-style-type: none"> <li>Records results of product evaluations to show clear comparisons of features, benefits and weaknesses</li> <li>Uses clear and specific language to develop documents for different audiences in accordance with organisational requirements</li> </ul>
Oral Communication	2.2, 2.3, 1.5, 3.3	<ul style="list-style-type: none"> <li>Provides recommendations using language appropriate to the purpose and audience</li> </ul>
Numeracy	1.3, 1.4, 3.2, 3.3	<ul style="list-style-type: none"> <li>Analyses numerical information to measure, compare and evaluate features</li> </ul>
Navigate the world of work	2.3	<ul style="list-style-type: none"> <li>Understands and follows organisational policies and procedures and legislative requirement relevant to own role</li> </ul>

# Assessment Requirements for BSBPRO401 Develop product knowledge

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- use valid and reliable sources to gather information about the organisation's products and competitors' products
- determine buyer needs and present key features and benefits of product to match needs, in accordance with organisational and legislative obligations
- compare competitors' products with own organisation's products and communicate differences to buyer.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list sources of information for own organisation's products and competitors' products
- explain why it is important to discuss features, benefits, strengths and weaknesses when describing products
- summarise industry competitors, including products offered and potential buyer markets
- outline organisational policies and procedures, relevant to the sales process
- outline the key provisions of relevant legislation, regulations, standards and codes of practice that are relevant to the sales process.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – product skills and advice field of work and include access to:

- information sources regarding an organisation's and competitors' products, service or ideas
- office equipment and resources
- relevant organisational policies and procedures
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

## BSBSLS408 Present, secure and support sales solutions

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to present sales solutions that respond to specific buying needs of a client, and to use sales processes associated with securing prospect commitment to proceed with a sale.

It also includes attending to post-sales activities that build and strengthen the partnership between a salesperson and client, and enhance the likelihood of future sales.

It applies to individuals working in sales-related positions in a small, medium or large enterprise, in a wide variety of industries, who may provide sales solutions individually, or provide advice and support on aspects of sales solutions to support a sales team.

No licensing, legislative or certification requirements apply to this unit at the time of publication

### Unit Sector

Business Development – Sales

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for sales presentation	1.1 Obtain and organise products, ideas and services for use within sales presentation 1.2 Review product information to ensure familiarity with products

ELEMENT	PERFORMANCE CRITERIA
	<p>1.3 Identify sales tactics, and assess and choose options that meet needs and preferences of the prospect</p> <p>1.4 Consider variety of sales solutions and prepare to meet buyer needs</p> <p>1.5 Identify and select sales aids</p> <p>1.6 Identify alternatives for prospects and assess in relation to anticipated buyer needs</p>
2. Present sales solution	<p>2.1 Use gestures, posture, body language, facial expressions and voice to create a supportive selling environment</p> <p>2.2 Use listening skills and open-ended questions to identify buyer needs, preferences, motives and objections</p> <p>2.3 Adjust presentation to match needs and preferences of buyer</p> <p>2.4 Use persuasive communication techniques to secure buyer interest</p> <p>2.5 Ensure presentation demonstrates and communicates key features of product and emphasises benefits in relation to identified buyer needs</p> <p>2.6 Obtain and present proof of benefits through product purchase</p> <p>2.7 Use sales aids to build buyer understanding of how product aligns with needs</p>
3. Respond to buyer signals	<p>3.1 Identify and assess verbal and non-verbal buying signals</p> <p>3.2 Use probing to identify source of buyer resistance</p> <p>3.3 Identify strengths and limitations of buyer resistance strategies</p> <p>3.4 Select and implement strategy for managing buyer resistance</p> <p>3.5 Use trial closes strategically during different stages of sales process</p>
4. Negotiate and finalise sale	<p>4.1 Initiate formal close to sales process following one or more trial closes</p> <p>4.2 Select strategy to close sale, and use supportive and confirming language to support closure</p> <p>4.3 Negotiate conditions of agreement, outline a summary of agreement to buyer, and confirm buyer's decision</p> <p>4.4 Provide advice on financing arrangements, if required</p> <p>4.5 Prepare and complete sales documents, and process and monitor client order</p>

ELEMENT	PERFORMANCE CRITERIA
	4.6 Identify and present cross-selling opportunities to buyer
5. Support post-sale activities	<p>5.1 Ensure contact is made with buyer post-sale to ensure agreed expectations have been met</p> <p>5.2 Provide technical assistance or advice and assist clients to access appropriate after-sales support</p> <p>5.3 Use feedback solicitation regarding sales process and product satisfaction</p> <p>5.4 Address and resolve service problems and difficulties identified through feedback</p> <p>5.5 Develop and implement client loyalty strategies to secure buyer loyalty and facilitate ongoing contact</p> <p>5.6 Offer and implement additional sales solutions and benefits to clients when opportunities arise</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1-1.6, 2.7, 4.3-4.6, 5.1-5.6	<ul style="list-style-type: none"> <li>Analyses and evaluates textual information to develop research strategies, integrate facts and ideas, and meet organisational requirements</li> </ul>
Writing	1.1, 4.5-4.6, 5.1-5.6	<ul style="list-style-type: none"> <li>Creates documents using specific and detailed language to convey explicit information, requirements and recommendations</li> </ul>
Oral Communication	1.1, 2.1-2.7, 3.1-3.5, 4.1-4.6, 5.1-5.6	<ul style="list-style-type: none"> <li>Obtains information by listening and questioning, and</li> <li>Participates in discussions using detailed, clear and persuasive language to contribute details, express requirements and provide advice</li> </ul>
Numeracy	2.6, 4.3-4.5, 5.5	<ul style="list-style-type: none"> <li>Identifies, interprets and compares mathematical information in simple and familiar written texts</li> </ul>
Interact with others	2.3, 2.4, 3.2-3.4, 4.2, 5.3-5.5	<ul style="list-style-type: none"> <li>Uses a range of interpersonal skills to build rapport and establish relationships with others</li> <li>Tailors communication to achieve purpose, demonstrating a sophisticated understanding of audience needs</li> </ul>

Get the work done	1.1-1.3, 2.1-2.7, 3.2, 3.4, 3.5, 4.1-4.6, 5.1-5.6	<ul style="list-style-type: none"> <li>Sequences and schedules complex activities to achieve outcomes in a timely fashion</li> <li>Uses systematic, analytical processes in complex, non-routine situations, setting goals, designing strategies, gathering relevant information and evaluating options</li> <li>Uses formal and informal processes to monitor implementation of solutions and reflect on outcomes</li> <li>Uses main features and functions of digital tools to complete work tasks and access information</li> </ul>

## BSBSTR501 Establish innovative work environments

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

### Application

This unit describes the skills and knowledge required to create an environment that enables and supports practice which focuses on a holistic approach to the integration of innovation across all areas of work practice.

The unit applies to individuals working in leadership or management roles in any industry or community context. The individual could be employed by the organisation, but may also be an external contractor, the leader of a cross organisation team or of a self-formed team of individuals.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Critical Thinking and Problem Solving – Business Strategy

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish work practices	1.1 Identify relevant stakeholders 1.2 Identify organisational objectives and practices 1.3 Evaluate current work conditions 1.4 Determine working conditions that allow innovative practices according to organisational policies and procedures 1.5 Identify organisational resources relating to innovation 1.6 Build and lead team and maximise opportunities for innovation
2. Create an innovative	2.1 Evaluate the impacts of changing work environment

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
environment	2.2 Collaborate with stakeholders and develop ideas for enhancing work environment 2.3 Identify and select resources required for enhancing work environment 2.4 Assess the ability of the workspace to support innovation 2.5 Assist team members to adapt and perform in new work environment
3. Implement innovative work environment	3.1 Encourage creative mindsets, collaborative working and development of positive workplace relationships 3.2 Reinforce the value of innovation according to organisational vision and objectives 3.3 Take risks to open up opportunities for innovation 3.4 Select ways of celebrating and encouraging innovation 3.5 Encourage and support evaluation of innovative ideas
4. Share and evaluate innovative ideas and work environment	4.1 Share relevant information, knowledge and skills on innovative practices with stakeholders 4.2 Provide and encourage formal and informal learning opportunities to develop skills required for innovation 4.3 Create opportunities where individuals can learn from the experience of others 4.4 Seek and respond to suggestions, improvements and innovations from all team members

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

<b>SKILL</b>	<b>DESCRIPTION</b>
Reading	<ul style="list-style-type: none"> <li>Interprets and evaluates information that may deal with complex ideas related to issues both within and outside a given workplace context</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Develops information for others using language to suit the context and audience</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>Presents ideas and concepts to a range of audiences using structure and language to suit the audience</li> <li>Uses active listening and questioning to discuss and clarify information and to confirm understanding</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Takes responsibility for implementing practices and procedures to achieve organisational objectives in innovation according to role</li> </ul>

SKILL	DESCRIPTION
	requirements <ul style="list-style-type: none"> <li>• Accepts responsibility for planning and implementing tasks and practices to achieve organisational goals, negotiating key aspects with others and taking into account current capabilities and needs</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Develops new and innovative ideas through exploration, evaluation, analysis and critical thinking</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Uses required communication techniques to build rapport and foster strong relationships with co-workers in a range of work contexts</li> <li>• Uses inclusive and collaborative techniques to share, promote and convey complex information about new ideas and systems within the workplace</li> <li>• Facilitates a climate where people feel comfortable suggesting and discussing improvements and new ideas</li> </ul>
Problem Solving	<ul style="list-style-type: none"> <li>• Uses problem solving processes to identify, assess and respond to challenges and risks around innovation</li> </ul>

## Unit Mapping Information

No equivalent unit. Supersedes but is not equivalent to:

- BSBINN501 Establish systems that support innovation
- BSBINN502 Build and sustain an innovative work environment.

# Assessment Requirements for BSBSTR501 Establish innovative work environments

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- establish at least two different procedures and practices that foster innovation in areas of work practice, including at least three of the following:
  - collaborative work arrangements
  - building team capacity to contribute to innovation
  - providing formal and informal learning opportunities
  - evaluating ideas of innovation in work environment
  - celebrating and encouraging innovation
  - consulting with relevant stakeholders
  - changing physical work environment, including designing, fitting-out and decorating workspaces
  - communicating and sharing of ideas and feedback.

In the course of the above, the candidate must:

- reinforce the value of innovation to the vision and objectives of the organisation
- model behaviour, including:
  - being receptive to ideas
  - giving constructive advice
  - establishing and maintaining relationships based on mutual respect and trust
  - taking considered risks that provide opportunities for innovation
- support innovation and collaboration of ideas to make improvements.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- concepts and theories of innovation

- context for innovation in the workplace, including:
  - core business values
  - overall objectives
  - broader environmental context
  - value and benefit of innovative ideas and projects
- factors and tools that motivate individuals
- creative thinking and innovative work practices
- ways of celebrating and promoting innovation in the workplace
- approaches to management and leadership and how they support and hinder innovation
- challenges and barriers to innovation and ways of overcoming them, including:
  - rewarding and celebrating innovation
  - coaching and learning
  - modelling behaviour and managing the physical environment.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- relevant legislation and codes of practice
- relevant organisational policies and procedures
- workplace equipment and resources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBTEC201 Use business software applications

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

### Application

This unit describes the skills and knowledge required to select and use software and organise electronic information and data.

The unit applies to those who use a limited range of practical skills with a fundamental knowledge of equipment use and the organisation of data in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Unit Sector

Digital Competence - Technology Use

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select and prepare to use technology	1.1 Identify task purpose, audience, format and presentation requirements, and clarify with relevant personnel, where required 1.2 Select relevant technology and software applications to achieve requirements of the task 1.3 Adjust workspace, furniture and equipment to suit own ergonomic requirements
2. Input and process information or data	2.1 Identify and open application, according to task and organisational requirements 2.2 Enter information or data into application according to organisational requirements

ELEMENT	PERFORMANCE CRITERIA
	2.3 Ensure information or data is checked and amended according to organisational and task requirements 2.4 Format information or data using appropriate application functions according to organisational and task requirements 2.5 Use relevant help functions to overcome simple issues
3. Finalise and store document	3.1 Review and edit final information or data, and prepare for storage in accordance with organisational and task requirements 3.2 Name and store document and exit application

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> <li>Recognises and interprets information from familiar sources to determine job role and task requirements</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Produces and amends files to meet task and organisational requirements</li> <li>Completes required documentation using organisational formats</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to:

- BSBITU211 Produce digital text documents
- BSBITU212 Create and use spreadsheets
- BSBWOR204 Use business technology.

Supersedes but is not equivalent to BSBCUE301 Use multiple information systems.

# Assessment Requirements for BSBTEC201 Use business software applications

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- select and use at least three business software applications on two occasions each.

In the course of the above, the candidate must:

- select and use technology safely and according to organisational requirements
- identify and address faults according to requirements.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key features of:
  - organisation's work health and safety requirements relevant to own role
  - organisation's requirements for file naming and storage
  - applications used for organising electronic information and data.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace equipment and resources
- electronic files, information and data
- workplace documentation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

# BSBTEC301 Design and produce business documents

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Application

This unit describes the skills and knowledge required to design and produce various business documents. It includes selecting and using a range of functions on a variety of computer applications.

The unit applies to those who possess fundamental skills in computer operations. They may exercise discretion and judgement using appropriate theoretical knowledge of document design and production to provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Digital Competence - Technology Use

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select and prepare resources	1.1 Select and use technology and software applications to produce required business documents 1.2 Select layout and style of publication according to information and organisational requirements 1.3 Use basic design principles and ensure document design is consistent with organisational requirements 1.4 Discuss and clarify format and style with required stakeholder
2. Design document	2.1 Identify, open and create files according to task and organisational requirements 2.2 Design document and ensure efficient entry of information

ELEMENT	PERFORMANCE CRITERIA
	2.3 Use a range of functions to ensure consistency of design and layout
3. Produce document	3.1 Complete document production according to organisational policies, procedures and requirements 3.2 Check document produced to ensure it meets task requirements for style and layout 3.3 Store document appropriately and save document 3.4 Use help function to overcome basic difficulties with document design and production, where required
4. Finalise document	4.1 Proofread document for readability, accuracy and consistency of language, style and layout prior to final output 4.2 Modify document according to task requirements 4.3 Name and store document in accordance with organisational requirements and exit application 4.4 Present document according to task requirements

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> <li>Recognises and interprets textual information from a range of sources to determine and adhere to requirements</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Develops documents using required format, accurate spelling and grammar and terminology specific to requirements</li> <li>Organises content to support purposes and audience of material, using clear and logical language</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Recognises and follows explicit and implicit protocols and meets expectations associated with own role</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to:

- BSBITU306 Design and produce business documents
- BSBITU313 Design and produce digital text documents.

Supersedes but is not equivalent to:

- BSBINT305 Prepare business documents for the international trade of goods
- BSBITU309 Produce desktop published documents.

# Assessment Requirements for BSBTEC301 Design and produce business documents

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- design, produce and finalise four different types of business documents, using at least two different software applications.

In the course of the above, the candidate must:

- comply with organisational policies and procedures for producing business documents
- adhere to task requirements when producing documents including:
  - applying basic design principles
  - applying consistent formatting
  - using appropriate styles
  - using correct layouts
  - proofreading
- use required data storage options.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- technology required to produce document
- key functions and features of contemporary computer applications
- organisational policies and procedures
- organisational requirements for document design, including style guide.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- workplace equipment and resources
- relevant software applications
- style guide
- organisational policies and procedures.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBTWK401 Build and maintain business relationships

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

### Application

This unit describes the skills and knowledge required to establish, develop and maintain effective work relationships and networks through relationship building and negotiation skills required by workers. These workers may be within an organisation as well as freelance or contract workers.

The unit applies to individuals with a broad knowledge of networking and negotiation who contribute to creating solutions to unpredictable problems. They may have responsibility for and provide guidance to others.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

### Unit Sector

Social Competence – Teamwork and Relationships

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish business relationships	1.1 Identify business development and networking objectives of the organisation and own role 1.2 Determine networking opportunities according to identified objectives and organisational policies and procedures 1.3 Confirm communication channels for information exchange with business contacts 1.4 Engage with business contacts using written and verbal communication to promote business opportunities
2. Maintain business	2.1 Use communication techniques to establish rapport with

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
relationships	business contacts 2.2 Identify barriers to business development opportunities 2.3 Use problem-solving techniques to negotiate solutions to identified situations 2.4 Seek specialist advice in the development of contacts, as required
3. Build and improve business relationships	3.1 Develop strategies to represent and promote organisational interests to contacts 3.2 Participate in formal and informal networks that promote the organisation 3.3 Communicate issues regarding relationships in writing and verbally to organisational personnel 3.4 Seek and respond to feedback from management on the quality of relationships with business contacts

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<b>SKILL</b>	<b>DESCRIPTION</b>
Learning	<ul style="list-style-type: none"> <li>Seeks opportunities to develop and extend expertise and identify areas for professional improvement</li> </ul>

## BSBWHS311 Assist with maintaining workplace safety

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

### Application

This unit describes the skills and knowledge required to assist with implementing and monitoring an organisation's work health and safety (WHS) policies, procedures and programs as part of a small work team.

The unit applies to individuals who have roles in assisting with maintaining workplace safety in an organisation. Individuals closely monitor aspects of work associated with the safe delivery of products and services, and they contribute to influencing safety in the workplace.

### NOTES

1. The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the</i>	<i>Performance criteria describe the performance needed to</i>

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
<i>essential outcomes.</i>	<i>demonstrate achievement of the element.</i>
1. Assist with incorporating WHS policies and procedures into work team processes	<p>1.1 Identify health and safety requirements of work team according to applicable WHS laws</p> <p>1.2 Assist with explaining organisational WHS policies, procedures, programs and legislative requirements to required personnel</p> <p>1.3 Assist with explaining hazard identification and risk assessment outcomes to required personnel</p>
2. Contribute to consultative arrangements for managing WHS	<p>2.1 Assist with implementing consultative processes designed to engage work team in managing WHS</p> <p>2.2 Respond to WHS issues in a timely manner and according to organisational policies and procedures for issue resolution</p> <p>2.3 Encourage others to participate in arrangements for managing WHS</p> <p>2.4 Assist in engaging with required personnel to identify and implement improvements in response to WHS feedback</p>
3. Contribute to organisational procedures for providing WHS training	<p>3.1 Identify WHS training needs of the work team and report to relevant stakeholders</p> <p>3.2 Identify strategies and opportunities for developing work team's WHS competence and report to relevant stakeholders</p> <p>3.3 Provide assistance to work team members to support the effective development of their WHS competence</p>
4. Participate in identifying hazards, and assessing and controlling risks for the work area	<p>4.1 Identify hazards in the work area and report to relevant stakeholders according to organisational policies and procedures, and WHS legislative requirements</p> <p>4.2 Assist with implementing processes designed to control risks using the hierarchy of control measures according to organisational procedures and WHS legislative requirements</p> <p>4.3 Identify and document inadequacies in existing risk control measures according to organisational policies and procedures, the hierarchy of control measures and WHS legislative requirements</p> <p>4.4 Report inadequacies in existing risk control measures to relevant stakeholders</p> <p>4.5 Complete and maintain WHS incident records in the work area according to organisational procedures and WHS legislative requirements</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Description
Reading	<ul style="list-style-type: none"> <li>• Interprets WHS legislative and organisational documentation</li> <li>• Applies appropriate strategies to construct meaning from WHS legislative and organisational documentation</li> </ul>
Writing	<ul style="list-style-type: none"> <li>• Documents WHS information using required format and industry specific vocabulary</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>• Presents information using language and non-verbal communication appropriate to audience and context</li> <li>• Uses questioning and active listening to confirm understanding</li> </ul>
Navigate the world of work	<ul style="list-style-type: none"> <li>• Follows WHS policies, procedures and legislative requirements relevant to own role</li> <li>• Keeps up to date with changes to WHS laws relevant to own role</li> </ul>
Interact with others	<ul style="list-style-type: none"> <li>• Selects appropriate communication protocols and conventions to provide information to others</li> <li>• Collaborates with others to achieve joint outcomes</li> <li>• Plays an active role in facilitating effective group interaction, influencing direction and taking a leadership role on occasion</li> <li>• Provides feedback to others in forms with which they can engage and respond</li> </ul>
Get the work done	<ul style="list-style-type: none"> <li>• Sequences and schedules activities, monitors implementation and manages relevant communication</li> <li>• Initiates standard procedures when responding to issues raised through consultation</li> <li>• Uses feedback to participate in the identification and implementation of opportunities to improve arrangements for managing WHS issues</li> </ul>

## Unit Mapping Information

# Assessment Requirements for BSBWHS311 Assist with maintaining workplace safety

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- assist with implementing and monitoring at least three different organisational work health and safety (WHS) policies or procedures into a work team's processes.

During the above, the candidate must:

- assist with implementing and monitoring consultation about each policy or procedure according to legislative and organisational requirements
- identify opportunities to encourage work team to contribute to implementing improvements to each policy or procedure based on feedback received through consultation
- complete WHS documentation.

## Knowledge Evidence

The candidate must demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- characteristics and composition of the work team
- procedures related to the following:
  - identifying hazards
  - assessing and controlling risks to health and safety, including the hierarchy of control measures
- organisational WHS policies and procedures, including those relating to:
  - risk management
  - fire
  - emergencies
  - evacuation
  - incident investigation

- reporting
- relevant legislation, regulations and codes of practice from all levels of government that impact on business operations, including those relating to:
  - WHS and environmental issues
  - equal opportunity
  - industrial relations
  - anti-discrimination
- WHS aspects of other organisational systems and procedures.

## Assessment Conditions

Assessment must comply with WHS laws, and WHS legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and include access to:

- safety processes relevant to the area of work
- organisational policies and procedures, standard operating procedures and plans
- standards, WHS laws and licensing requirements
- opportunities for interaction with others
- workplace equipment and resources required for the performance evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package release 1.0

## Application

This unit describes the skills and knowledge required to implement and monitor an organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area in order to meet legislative requirements.

It applies to individuals with supervisory responsibilities for implementing and monitoring the organisation's WHS policies, procedures and programs in a work area. These individuals have a broad knowledge of WHS policies and contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They provide supervision and guidance to others and have limited responsibility for the output of others.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the</i>	<i>Performance criteria describe the performance needed to</i>

ELEMENT	PERFORMANCE CRITERIA
<i>essential outcomes.</i>	<i>demonstrate achievement of the element.</i>
1. Provide information to the work team about WHS policies and procedures	1.1 Accurately explain to the work team relevant provisions of WHS Acts, regulations and codes of practice 1.2 Provide information about the organisation's WHS policies, procedures and programs, and ensure it is readily accessible to, and understandable by the work team 1.3 Regularly provide and clearly explain to the work team information about identified hazards and the outcomes of risk assessment and control
2. Implement and monitor participation arrangements for managing WHS	2.1 Communicate to workplace parties the importance of effective consultation mechanisms in managing health and safety risks in the workplace 2.2 Apply consultation procedures to facilitate participation of the work team in managing work area hazards 2.3 Promptly deal with issues raised through consultation, according to organisational consultation procedures and WHS legislative and regulatory requirements 2.4 Promptly record and communicate to the work team the outcomes of consultation over WHS issues
3. Implement and monitor organisational procedures for providing WHS training	3.1 Identify WHS training needs according to organisational requirements and WHS legislative and regulatory requirements 3.2 Make arrangements to meet WHS training needs of team members in consultation with relevant individuals 3.3 Provide workplace learning opportunities and coaching and mentoring assistance to facilitate team and individual achievement of identified WHS training needs 3.4 Identify and report to management the costs associated with providing training for work team, for inclusion in financial and management plans
4. Implement and monitor organisational procedures and legal requirements for identifying hazards and assessing and controlling risks	4.1 Identify and report on hazards in work area according to WHS policies and procedures and WHS legislative and regulatory requirements 4.2 Promptly action team member hazard reports according to organisational procedures and WHS legislative and regulatory requirements 4.3 Implement procedures to control risks using the hierarchy of control, according to organisational and WHS legislative requirements

ELEMENT	PERFORMANCE CRITERIA
	<p>4.4 Identify and report inadequacies in existing risk controls according to hierarchy of control and WHS legislative requirements</p> <p>4.5 Monitor outcomes of reports on inadequacies, where appropriate, to ensure a prompt organisational response</p>
5. Implement and monitor organisational procedures for maintaining WHS records for the team	<p>5.1 Accurately complete and maintain WHS records of incidents of occupational injury and disease in work area, according to WHS policies, procedures and legislative requirements</p> <p>5.2 Use aggregate information and data from work area records to identify hazards and monitor risk control procedures in work area</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1-1.3, 5.2	<ul style="list-style-type: none"> <li>Interprets and analyses complex WHS legislative and organisational texts</li> </ul>
Writing	1.1-1.3, 2.3, 2.4, 3.1, 3.2, 3.4, 4.1, 4.4, 5.1	<ul style="list-style-type: none"> <li>Documents WHS legislative and organisational information using structure, layout and language suitable for audience</li> <li>Records WHS issues and actions taken according to reporting requirements</li> <li>Prepares and maintains required records using appropriate structure and vocabulary</li> </ul>
Oral communication	1.1-1.3, 2.1, 2.4, 3.2, 3.3, 4.1, 4.4	<ul style="list-style-type: none"> <li>Provides WHS legislative and organisational information and advice using structure and language suitable for audience</li> </ul>
Numeracy	3.4, 5.2	<ul style="list-style-type: none"> <li>Extracts, interprets and comprehends mathematical information in relation to training costs and risk management data</li> </ul>
Navigate the world of work	1.1,1.2, 2.3, 3.1, 4.1-4.5, 5.1	<ul style="list-style-type: none"> <li>Takes responsibility for adherence to legal and regulatory responsibilities and organisational policies and procedures in relation to WHS</li> <li>Keeps up to date on changes to WHS legislation or regulations and organisational policies and procedures</li> </ul>
Interact with	2.2, 3.2, 3.3	<ul style="list-style-type: none"> <li>Selects and uses appropriate conventions and protocols to facilitate consultation or provide feedback</li> </ul>

others		<ul style="list-style-type: none"> <li>• Initiates and contributes to facilitating consultative role, responding, explaining, clarifying and expanding on ideas and information as required</li> <li>• Collaborates with others to achieve individual and team outcomes</li> </ul>
Get the work done	2.2, 3.2, 3.3, 4.1-4.5, 5.1	<ul style="list-style-type: none"> <li>• Uses combination of formal, logical planning and intuitive understanding of context to identify relevant information and risks, and identify and evaluate alternative strategies</li> <li>• Uses formal decision-making processes, setting or clarifying goals, gathering information and identifying and evaluating choices against a set of criteria</li> <li>• Recognises and takes responsibility for reporting WHS risk control inadequacies</li> <li>• Uses formal and informal processes to monitor implementations of WHS solutions and reflect on outcomes</li> </ul>

# Assessment Requirements for BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- explain clearly and accurately to work team the relevant work health and safety (WHS) information including:
  - WHS legislative and organisational requirements
  - identified hazards and outcomes of risk assessment and control
- ensure that the team has access to information about WHS policies, procedures and programs in appropriate structure and language
- implement and monitor procedures according to organisational and legislative WHS requirements including:
  - consultation and communications to enable team members to participate in managing WHS risks and hazards
  - identifying WHS training needs and providing learning opportunities, coaching and mentoring as appropriate to needs
  - identifying, reporting and taking action on WHS hazards and risks
  - identifying and reporting inadequacies in existing risk controls and monitoring outcomes to ensure a prompt organisational response
  - reporting on the cost of WHS training
  - keeping WHS records
  - analysing aggregate WHS data to identify hazards and monitor risk control procedures in work area.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legal responsibilities and duties of managers, supervisors, persons conducting businesses or undertakings (PCBUs) and workers in relation to WHS risk management in the workplace
- identify key provisions of relevant WHS Acts, regulations and codes of practice that apply to the business and outline how they apply in the work area
- explain organisational policies and procedures relating to hazard identification, risk management, fire, emergency and evacuation, incident investigation and reporting
- explain the importance of effective consultation mechanisms in managing health and safety risks in the workplace
- explain how the hierarchy of control applies in the work area.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- an actual workplace or simulated environment
- workplace equipment and resources
- examples of documents relating to workplace safety, hazard identification and risk assessment
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

# BSBWHS411 Implement and monitor WHS policies, procedures and programs

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Application

This unit describes the skills and knowledge required to implement and monitor an organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area in order to meet legislative requirements.

The unit applies to those with supervisory responsibilities in a work area who have a broad knowledge of WHS policies and contribute well-developed skills in creating solutions to problems through analysis and evaluation of information from a variety of sources. They provide supervision and guidance to others and have limited responsibility for the output of others.

## NOTES

1. The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

## Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Provide information to work team about WHS policies and procedures	1.1 Identify and communicate relevant provisions about WHS laws to work team 1.2 Provide information about organisation's WHS policies, procedures and programs, and ensure it is readily accessible to work team 1.3 Communicate information about identified hazards and outcomes of risk assessment and control to work team
2. Implement and monitor work team consultative arrangements for managing WHS	2.1 Communicate importance of consultation mechanisms in managing WHS risks to work team 2.2 Apply consultation mechanisms to facilitate work team participation in managing work area hazards, according to organisational policies and procedures 2.3 Contribute to managing issues raised through consultation mechanisms, according to organisational consultation procedures and WHS legislative requirements 2.4 Communicate outcomes of consultation about WHS issues to work team
3. Implement and monitor organisational procedures for providing WHS training to work team	3.1 Identify and document team WHS training needs according to organisational requirements and WHS laws 3.2 Make arrangements to meet WHS training needs of team members in consultation with relevant stakeholders 3.3 Provide workplace learning opportunities to facilitate team and individual achievement of identified WHS training needs
4. Implement and monitor organisational procedures and legal requirements for identifying hazards, and assessing and controlling risks	4.1 Identify and report on hazards in work area according to organisational policies and procedures, and WHS legislative requirements 4.2 Contribute to managing and implementing hazard reports according to organisational policies and procedures, and WHS legislative requirements 4.3 Implement procedures to control risks using the hierarchy of control measures according to organisational policies and procedures, and WHS legislative requirements 4.4 Identify and report inadequacies in existing risk controls according to the hierarchy of control measures, and WHS legislative requirements 4.5 Monitor outcomes of reports on inadequacies, as required, to ensure prompt organisational response

ELEMENTS	PERFORMANCE CRITERIA
5. Implement and monitor organisational procedures for maintaining WHS records	<p>5.1 Complete and maintain WHS incident records of occupational injury and disease in work area according to organisational policies and procedures, and WHS legislative requirements</p> <p>5.2 Use aggregate information and data from work area records to meet organisational recordkeeping requirements</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

Skill	Description
Reading	<ul style="list-style-type: none"> <li>Interprets and analyses WHS laws and organisational texts</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Documents organisational WHS policies, procedures and programs according to WHS laws, using structure, layout and language suitable for audience</li> <li>Records WHS issues and actions taken according to reporting requirements</li> <li>Prepares and maintains required records using appropriate structure and vocabulary</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>Provides WHS organisational information and advice using structure and language suitable for audience</li> <li>Uses questioning and active listening to clarify understanding</li> </ul>
Navigate the world of work	<ul style="list-style-type: none"> <li>Adheres to legal and regulatory responsibilities, and organisational policies and procedures in relation to own WHS role and responsibilities</li> <li>Keeps up to date on changes to WHS laws, and related organisational policies and procedures relevant to own role</li> </ul>
Interact with others	<ul style="list-style-type: none"> <li>Selects and uses appropriate conventions and protocols to facilitate consultation and provide feedback</li> <li>Initiates and contributes to facilitating consultative role: responding, explaining, clarifying and expanding on ideas and information as required</li> <li>Collaborates with others to achieve individual team member and team outcomes</li> </ul>
Get the work done	<ul style="list-style-type: none"> <li>Uses combination of logical planning and intuitive understanding of context to identify relevant information and risks, and to identify and evaluate alternative strategies</li> <li>Uses decision-making processes: sets and clarifies goals, gathers</li> </ul>

Skill	Description
	<p>information, and identifies and evaluates choices against a set of criteria</p> <ul style="list-style-type: none"><li>• Takes responsibility for reporting WHS risk control inadequacies</li><li>• Uses processes to monitor implementation of WHS organisational procedures</li></ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements.

# Assessment Requirements for BSBWHS411 Implement and monitor WHS policies, procedures and programs

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to:

- implement and monitor the work health and safety (WHS) policies, procedures and programs for one work area in an organisation.

During the above, the candidate must:

- explain relevant WHS information clearly and accurately to work team
- provide work team with access to WHS policies, procedures and programs in appropriate structure and language
- implement and monitor procedures, according to WHS legislative and organisational requirements, for:
  - consultation on and communication about WHS hazards and risks
  - WHS training needs and learning opportunities
  - WHS records
  - using WHS aggregate data relating to hazards and risk control.

## Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- key provisions of commonwealth and state/territory WHS laws that apply to the business, and procedures for their application in the work area
- organisational policies and procedures for:
  - consulting during WHS issue management
  - identifying hazards and managing risks, including using aggregate information and work area data
  - incident response, investigation and reporting

- legal responsibilities and duties of managers, supervisors, persons conducting a business or undertaking (PCBUs) and workers in relation to WHS risk management in the workplace
- procedures for assessing implications of near misses in relation to incidents, injuries and illnesses in the work area
- effective consultation mechanisms in managing health and safety risks in the workplace
- features of effective workplace learning opportunities, including coaching and mentoring assistance that facilitates team and individual achievement of WHS training needs
- key principles and components of the hierarchy of control measures
- procedures for applying the hierarchy of control measures in own work area.

## Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- actual workplace or simulated environment
- workplace equipment and resources
- examples of documents about workplace safety, hazard identification and risk assessment
- WHS laws and organisational documentation required to demonstrate the performance evidence
- opportunities for interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## BSBWRT411 Write complex documents

### Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

### Application

This unit describes the skills and knowledge required to plan, draft and finalise complex documents.

The unit applies to individuals who work in a range of business environments and are skilled in the creation of documents that are more complex than basic correspondence, memos and/or forms and that require review and analysis of a range of information sources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Social Competence – Written Communication

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan complex document	1.1 Determine audience, purpose and requirements of document according to organisation policies and procedures 1.2 Determine required format, style and structure for document 1.3 Establish method of communication 1.4 Develop content overview of document 1.5 Determine categories and logical sequence of information according to proposed structure, content and document requirements
2. Draft complex document	2.1 Confirm information is cohesive and satisfies document purpose and requirements 2.2 Develop draft document to communicate data, information and

ELEMENT	PERFORMANCE CRITERIA
	<p>knowledge according to organisational policies and procedures</p> <p>2.3 Identify gaps in required data, information and knowledge, and collect additional material from relevant sources, if required</p> <p>2.4 Draft text according to document purposes and requirements</p>
3. Finalise complex document	<p>3.1 Review draft text and confirm document purpose and requirements are met</p> <p>3.2 Check grammar, spelling and style for accuracy and punctuation</p> <p>3.3 Confirm draft text is approved by relevant organisation personnel</p> <p>3.4 Review and incorporate any amendments in final copy</p> <p>3.5 Apply basic design elements for document appropriate to audience and purpose</p> <p>3.6 Check document and confirm all requirements are met</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> <li>Interprets a variety of text to determine and confirm task requirements</li> <li>Proofreads document checking for grammar, spelling, structure, and suitability of style and format for audience</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Uses listening and questioning skills to seek additional information or confirmation of task completion</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Follows accepted communication practices and protocols when seeking information or feedback from others</li> <li>Takes responsibility for planning, sequencing and prioritising tasks to achieve required outcomes</li> </ul>
Technology	<ul style="list-style-type: none"> <li>Uses the main features and functions of digital tools to complete work tasks</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBWRT401 Write complex documents.

## Links

Companion Volume Implementation Guide is found on VETNet -

# Assessment Requirements for BSBWRT411 Write complex documents

## Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- plan, draft and finalise three different complex documents that convey the required information in a format suitable for the intended audience and purpose according to organisational policies and procedures for document production.

In the course of the above, the candidate must:

- review and analyse a range of information sources
- use business technology to apply formatting and incorporate graphics
- apply organisation style guide/house style.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- organisation style guide/house style
- format and its impact on readability, cohesion and appearance of document
- categories and logical sequences of information
- rules and conventions for written English
- key features of word processing software
- key features of written communication methods, including:
  - general emails
  - procedures
  - business letters
  - meeting agendas
- organisational policies and procedures relating to written communication
- process for checking:
  - suitability of document for audience, purpose, format, and structure

- grammar, spelling and style for accuracy and punctuation
- key text elements including basic design elements.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- office equipment and resources
- organisational policies and procedures
- organisational style guides.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## BSBXCMB01 Engage in workplace communication

### Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 7.0. Version created to clarify knowledge evidence
Release 1	This version first released with BSB Business Services Training Package Version 4.0.

### Application

This unit describes the skills and knowledge required to communicate (through written, oral and nonverbal form) in the workplace within an industry.

This unit applies to a wide range of workers, but has a specific focus on the communication skills required for workers with limited responsibility for others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Cross Sector Skill

### Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan workplace communication	1.1 Establish audience and purpose of workplace communication 1.2 Identify information needs and communication requirements of intended recipients of workplace communication 1.3 Establish methods of communication available to convey message or information based on work context

	<p>1.4 Select appropriate method(s) of communication to convey messages or information</p> <p>1.5 Plan content of message or communication</p>
2. Undertake routine communication	<p>2.1 Communicate message or information according to organisational requirements and in a manner that is respectful and clear in meaning</p> <p>2.2 Adjust communication methods to enable effective communication with those from diverse backgrounds as required</p> <p>2.3 Receive workplace information and instructions, and interpret and clarify as needed</p> <p>2.4 Respond to communications according to requirements of the message</p> <p>2.5 Identify and report any communication challenges to appropriate person</p>
3. Participate in workplace communication	<p>3.1 Clearly contribute ideas and information to workplace discussions</p> <p>3.2 Support others to communicate in workplace discussions through courteous and professional behaviour</p> <p>3.3 Use active listening and questioning techniques to clarify issues in a group situation</p> <p>3.4 Seek feedback from others on effectiveness of communication</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

Skill	Description
Navigate the world of work	<ul style="list-style-type: none"> <li>Understands nature and purpose of own role and associated responsibilities and how it contributes to organisational goals and outcomes</li> </ul>
Get the work done	<ul style="list-style-type: none"> <li>Uses problem-solving skills to identify and analyse issues or barriers, consider options and develop responses and opportunities for improvement</li> <li>Uses digital technology to find, record or communicate basic information</li> </ul>

## Unit Mapping Information

No equivalent unit. New unit.

# Assessment Requirements for BSBXCM301 Engage in workplace communication

## Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 7.0. Version created to clarify knowledge evidence
Release 1	This version first released with BSB Business Services Training Package Version 4.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria, and foundation skills of this unit, including on at least one occasion, evidence of the ability to:

- identify the most appropriate method of communication for the intended audience
- prepare written material that is clear in meaning and format according to organisational requirements
- demonstrate active listening and questioning techniques in a workplace discussion
- communicate information and ideas verbally in a workplace discussion, considering the needs of those from diverse backgrounds
- identify and report any communication challenges to superiors
- seek feedback from others on effectiveness of communication
- 

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- legislative requirements relevant to workplace communication
- organisational requirements relevant to workplace communication (including digital form):
  - ethical behaviour guidelines from state or federal governments
  - workplace policies
  - codes of conduct
  - organisational reputation and culture
- techniques to resolve communication challenges

- methods and techniques to participate in workplace discussions, including active listening, questioning and providing feedback
- key principles of cross-cultural communication and communication with individuals with special needs or disabilities
- communication methods suited to audience and workplace requirement:
  - verbal means: telephones, mobile devices, video conference
  - written means: email, SMS, social media
  - Internet of Things (IoT)
- communication challenges relevant to performance evidence:
  - conflicts with clients or team members
  - potential risks or safety hazards
  - unethical or inappropriate communication
- key relevant features of:
  - different communication styles
  - different communication methods
  - relevant cross cultural communication techniques.

## Assessment Conditions

Mandatory conditions for assessment include:

- A safe working or simulated environment

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

# CPCBC4001A Apply building codes and standards to the construction process for low rise building projects

## Modification History

Not Applicable

## Unit Descriptor

**Unit descriptor** This unit of competency specifies the outcomes required to access, interpret and apply relevant building codes and standards applicable to the construction processes of residential and low rise commercial buildings (low rise' licensing classification with reference to Class 1 and 10 construction and Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction).

To successfully construct low rise buildings requires a thorough knowledge of the purpose and content of the Building Code of Australia (BCA), coupled with the ability to interpret other codes and standards related to a specific building.

## Application of the Unit

**Application of the unit** This unit of competency supports builders, site managers and related construction industry professionals responsible for ensuring compliance with building codes and standards in the residential and commercial construction industry.

## Licensing/Regulatory Information

Refer to Unit Descriptor

## Pre-Requisites

**Prerequisite units** Nil

## Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

---

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

### ELEMENT

### PERFORMANCE CRITERIA

---

- |   |   |
|---|---|
| 1. Access and interpret relevant code and standard requirements.                            | 1.1.Relevant performance requirements from the BCA that apply to individual projects (described as <b><i>low rise</i></b> ) are identified.<br>1.2.Requirements of relevant BCA deemed-to-satisfy (DTS) provisions are determined.<br>1.3.Requirements of relevant Australian standards referenced in the BCA are accessed and interpreted accordingly. |
| 2. Classify buildings.  | 2.1.Nature of a building is determined according to its use and arrangement.<br>2.2.BCA criteria to determine the defined classification are applied.<br>2.3.BCA requirements for multiple classification are identified and interpreted.   |
| 3. Analyse and apply a range of solutions to a construction problem for compliance with the | 3.1.Range of criteria that will ensure that construction methods comply with BCA performance requirements is determined.<br>3.2.Alternative solutions to a design or construction problem that will comply with BCA requirements are  |

ELEMENT	PERFORMANCE CRITERIA
BCA.	discussed and proposed in accordance with company policies and procedures. 3.3. Performance-based solutions are identified and documented in accordance with BCA requirements. 3.4. <i>Assessment methods</i> referenced in the BCA to determine whether a building solution complies with <i>performance requirements</i> or DTS provision of the BCA are analysed and applied. 3.5. Relevant documentation is identified and completed in accordance with BCA requirements.
4. Apply fire protection requirements.	4.1. Passive and active fire control elements for low rise building required by the BCA and other legislation are identified and applied. 4.2. Level of fire resistance required for the construction of various low rise buildings is determined. 4.3. Check of existing buildings for compliance with passive and active fire protection requirements is carried out in accordance with BCA requirements.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills for this unit are:

- analysis and interpretation skills relating to documentation from a wide range of sources, including BCA and referenced documents
- application of design concepts and principles in accordance with BCA, namely:
  - Class 1 and 10
  - Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction
- attention to detail in applying building codes and standards
- communication skills to:
  - discuss and propose alternative solutions
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand

## REQUIRED SKILLS AND KNOWLEDGE

- read and interpret:
  - documentation from a variety of sources, including BCA and referenced documents
  - drawings and specifications
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- written skills to complete documentation in accordance with BCA requirements
- numeracy skills to interpret and apply mathematical information included in building codes and standards.

### Required knowledge

Required knowledge for this unit is:

- basic design principles and the behaviour of structures under stress, strain, compression, bending or combined actions
- BCA performance hierarchy
- definitions and common technical terms or usage specified under general provisions of BCA
- general nature of materials and the effects of performance
- relevant Australian standards
- relevant legislative and OHS requirements, codes and practices
- types of working drawings and specifications
- understanding of the BCA relating to:
  - Class 1 and 10
  - Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

This unit of competency could be assessed by the application of design principles and solutions specified in BCA performance requirements or DTS provisions applicable to a building project.

This unit of competency can be assessed in the

## EVIDENCE GUIDE

---

	<p>workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.</p>
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>A person who demonstrates competency in this unit must be able to provide evidence of the ability to:</p> <ul style="list-style-type: none"><li>• comply with organisational quality procedures and processes</li><li>• apply and interpret relevant documentation and codes</li><li>• accurately apply BCA performance requirements relating to the design and construction of a building</li><li>• understand assessment methods available to determine compliance with the BCA</li><li>• identify faults and problems and proposed action to rectify.</li></ul>
<b>Context of and specific resources for assessment</b>	<p>This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.</p> <p>Assessment of essential underpinning knowledge will usually be conducted in an off-site context.</p> <p>Assessment is to comply with relevant regulatory or Australian standards' requirements.</p> <p>Resource implications for assessment include:</p> <ul style="list-style-type: none"><li>• access to BCA and relevant documents referenced in the BCA</li><li>• access to relevant legislation</li><li>• project documentation, including design brief, design drawings, specifications, construction schedules and other supporting documents</li><li>• research resources, including product information and data</li><li>• relevant computer software package and suitable hardware.</li></ul> <p>Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to</p>

## EVIDENCE GUIDE

---

modified equipment and other physical resources, and the provision of appropriate assessment support.

### Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing

## EVIDENCE GUIDE

---

supervisors, team leaders or specialist training staff.

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Low rise*** is described as falling within the BCA classes:

- Class 1 and 10
- Classes 2 to 9 with a gross floor area not exceeding 2000 square metres, not including Type A or Type B construction.

***Assessment methods*** include:

- comparison with BCA DTS provisions
- evidence of suitability as described in the BCA
- expert judgement as defined in the BCA
- verification method as defined in the BCA.

***Performance requirements*** include:

- performance requirements contained within other legislation applicable to a specific project
- performance requirements of the BCA determined to be relevant to a specific project
- performance-based contractual requirements that must be fulfilled by any party.

Functional area

# CPCBC4002 Manage work health and safety in the building and construction workplace

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Typographical error in Element and Performance Criteria 2.4 corrected.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4002A Manage occupational health and safety in the building and construction workplace. Title change. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to inspect workplaces for hazards and conduct work health and safety (WHS) risk analyses. It includes the development and implementation of appropriate responses to mitigate risks to meet government legislation and regulations.

This unit of competency applies to builders, site managers and forepersons who are responsible for the management of risk in building and construction workplaces.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

## Pre-requisite Unit

Nil.

## Unit Sector

Building and Construction

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |  |
|---|--|
| 1 Assess workplace risk.                | 1.1 Evaluate construction site safety and identify potential risk areas.   |
|   | 1.2 Assess on site worker's health and safety.   |
|   | 1.3 Identify hazards and determine control measures that comply with legislative requirements and organisational policies.   |
|   | 1.4 Consult with workers to evaluate effectiveness of existing control measures and WHS experts, as necessary, to contribute to an inspection report.                |
|   | 1.5 Complete a workplace inspection report with recommended actions to minimise workplace incidents and mitigate risk.   |
| 2 Establish and implement safety plans. | 2.1 Establish a workplace safety plan incorporating information from the workplace inspection report to raise safety awareness and support safe workplace practices. |
|   | 2.2 Implement processes to identify hazards, rate the risks and put control measures in place.   |
|   | 2.3 Establish educational programs specific to the building and construction workplace to ensure workers carry out safe work practices.                              |
|   | 2.4 Negotiate and resolve safety issues and conflicts.   |
| 3 Monitor workplace safety.             | 3.1 Monitor and audit workplace safety to ensure compliance with WHS regulations and workplace safety requirements.  |
|   | 3.2 Record findings and recommend and implement actions to address non-compliance.   |

- 3.3 Review effectiveness of educational programs to ensure all workers have been inducted and maintain safe work practices.
- 3.4 Monitor, review and document effectiveness of control measures to determine changes and improvements as required.

## **Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Unit Mapping Information**

Supersedes and is equivalent to CPCBC4002A Manage occupational health and safety in the building and construction workplace

## **Links**

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCBC4002 Manage work health and safety in the building and construction workplace

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Typographical error in Element and Performance Criteria 2.4 corrected.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4002A Manage occupational health and safety in the building and construction workplace. Title change. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by conducting a workplace safety audit for a construction worksite.

In doing this, a candidate must:

- access and interpret relevant government work health and safety (WHS) legislation and regulations
- identify faults, problems and non-compliances and their impact on workplace safety
- introduce safety systems allowing for ease of reporting safety issues, controlling hazards and maintaining worker safety and competence.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- current WHS Acts and regulations
- relevant safety codes, standards and guidelines
- organisation's workplace safety policies and procedures:
  - workplace safety and reporting requirements
- inspection, auditing and investigation processes
- hazards arising from:
  - high-risk construction work:
    - crane operation
    - dogging and rigging
    - concrete pumping

- tilt-up panel construction
- scaffolding
- operation of plant and equipment
- demolition
- asbestos removal and exposure to asbestos fibres
- exposure to silica
- airborne contaminants
- exposure to excessive noise
- electrical work
- working at heights
- hazardous materials and substances
- working in confined spaces
- safe work practices:
  - emergency, first aid and evacuation procedures
  - waste management and environmental practices
  - personal protective equipment (PPE)
- educational programs:
  - worker site-specific induction training
  - contractor detailed WHS induction
  - WHS induction for visitors
  - Health and Safety Representative (HSR) training
- mental health first aid and welfare of workers
- digital tools and devices to communicate and collaborate effectively with others
- a range of digitally-based technology and applications to access, extract, integrate and compile information.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- WHS legislation and regulations
- safety codes, standards and guidelines
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements
- workplace incident data and incident reports
- business equipment to collect and record data, and produce reports

- digital devices, applications and software to research, transmit and receive information electronically.

# CPCBC4003 Select, prepare and administer a construction contract

## Modification History

- Release 3 This version first released with CPC Construction, Plumbing and Services Training Package Release 8.0.  
Performance Criteria 3.1 updated to provide clarity.
- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.  
Typographical error in Element and Performance Criteria 3.3 corrected.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.  
Supersedes but is not equivalent to CPCBC4003A Select and prepare a construction contract. Combines CPCBC4003A Select and prepare a construction contract and CPCBC4016A Administer a construction contract.  
Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to select, prepare and administer contracts for commercial and residential construction projects. It includes contract selection, administration of a range of documents related to the contract and identifying causes of breach of contract.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys
- Commercial - Class 2 to 9, Type C only constructions.

It applies to builders, estimators and project and site managers who interpret complex documents and communicate clearly and succinctly during contract negotiations.

This unit of competency is suitable for people operating with autonomy. A person working at this level would be expected to take responsibility for selecting and preparing construction contracts.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

## Pre-requisite Unit

Nil.

## Unit Sector

Building and Construction

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |  |   |
|--|---|
| 1 Identify and analyse business contracts. | 1.1 Recognise various types of building and construction contracts, their legal requirements and application.     |
|  | 1.2 Analyse the importance of the intention to create legal relations.  |
|  | 1.3 Read and interpret essential contract elements, terms, sections and clauses of a valid construction contract. |
|  | 1.4 Evaluate rights, obligations and liabilities of all parties.  |
|  | 1.5 Identify and analyse circumstances that constitute a breach of contract.                                      |
|  | 1.6 Identify factors involved in the termination of contracts.  |
|  | 1.7 Identify legislative requirements and procedures.   |
| 2 Select appropriate contract.             | 2.1 Communicate clearly and directly with all parties to confirm the capacity to form a binding agreement.        |
|  | 2.2 Prepare and compile the range of documents that collectively make up the contract.                            |
|  | 2.3 Establish factors and special conditions associated with the parties' consent to a contract.                  |
|  | 2.4 Recognise and apply the requirements associated with an   |

- offer and acceptance of a contract.
- 2.5 Select a contract appropriate to the type of construction.
- 3 Prepare the contract.
- 3.1 Prepare selected contract draft with relevant details, in consultation with relevant personnel and in accordance with the accepted processes of the organisation and legal requirements.
- 3.2 Assess and schedule progress payments, including processes for applying for extension of time.
- 3.3 Ensure any discrepancies or disagreements are resolved prior to contract preparation.
- 3.4 Ensure legality and validity of draft contract in consultation with relevant persons.
- 3.5 Prepare final contract in accordance with the organisation's legal process.
- 4 Administer the contract.
- 4.1 Process progress payments accurately as due under the contract.
- 4.2 Process applications for extension of time in accordance with organisational policies and contract conditions.
- 4.3 Identify, negotiate and document variations to contract.
- 4.4 Act to minimise liquidated damages or penalties nominated in the contract.
- 4.5 Administer contract and resolve contractual disputes in accordance with contract and relevant legislation and regulations.
- 4.6 Assess conditions for issuing a final certificate.
- 5 Finalise a contract.
- 5.1 Apply process for practical completion of contract.
- 5.2 Finalise defects liability under a building or construction contract.
- 5.3 Finalise contract in accordance with relevant legislation

and contract provisions.

- 5.4 Issue appropriate certificate upon completion of the contract work.
- 5.5 Complete and secure documentation arising from finalisation of a contract for records purposes.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

- Supersedes and is not equivalent to CPCBC4003A Select and prepare a construction contract
- Supersedes and is not equivalent to CPCBC4016A Administer a construction contract.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCBC4003 Select, prepare and administer a construction contract

## Modification History

- Release 3 This version first released with CPC Construction, Plumbing and Services Training Package Release 8.0.  
Performance Criteria 3.1 updated to provide clarity.
- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.  
Typographical error in Element and Performance Criteria 3.3 corrected.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.  
Supersedes but is not equivalent to CPCBC4003A Select and prepare a construction contract. Combines CPCBC4003A Select and prepare a construction contract and CPCBC4016A Administer a construction contract. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by selecting, preparing and administering one contract for a construction project.

In doing this, the candidate must:

- select the correct contract by analysing identified legislative requirements and construction type
- prepare the construction contract specifying requirements for contract termination and special conditions agreed by all parties
- administer the contract following government legal and regulatory requirements and to the organisation's standards
- monitor price and time variations and negotiate with various parties to resolve contract anomalies
- collect all related construction contract and final inspection documentation and issue completion certificate.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- Australian legal system and its relevance to contracts

- various types of housing and construction industry contracts and the circumstances they cover
- definitions and interpretations commonly applied to contracts
- Australian Standards
  - *AS2124 General conditions of contract*, and
  - *AS4000 General conditions off contract series*
- relationships between the organisation and its clients
- range of documents associated with a contract:
  - equipment, site accommodation and services information
  - human resource projections
  - materials lists
  - construction drawings and specifications
  - project timelines
  - schedules
- digital tools and devices to communicate and collaborate effectively with others
- range of digitally-based technology and applications to access, extract, integrate and compile information.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government building and construction and contract legislation
- current building and construction codes and standards
- relevant construction industry contracts
- construction drawings and specifications
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements
- digital devices, applications and software to transmit and receive information electronically.

# CPCBC4004 Identify and produce estimated costs for building and construction projects

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4004A Identify and produce estimated costs for building and construction projects. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to establish estimated costs associated with the acquisition of materials and labour for building and construction projects. It includes factoring in relevant overhead costs and margins.

This unit of competency applies to estimators, builders, managers and trade contractors within the construction industry responsible for producing estimated costs on various residential and commercial construction projects within their scope of work as a trade contractor or builder.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

## Pre-requisite Unit

Nil.

## Unit Sector

Building and Construction

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |  |
|---|--|
| 1 Establish project requirements.               | 1.1 Read and interpret construction drawings and specifications in conjunction with relevant building and construction regulations, codes and standards. |
|   | 1.2 Identify building site features, type of building and method of construction, and specified building materials.                                      |
|   | 1.3 Establish site facilities, and communication and temporary boundary fencing requirements.  |
|   | 1.4 Identify waste removal requirements and apply waste management site fees.  |
|   | 1.5 Identify additional project-specific statutory, approvals or compliance costs.   |
| 2 Calculate materials and labour costs.         | 2.1 Produce a materials and consumables quantity list and obtain a price from supplier.  |
|   | 2.2 Identify and estimate off-site production costs, including delivery.   |
|   | 2.3 Identify numbers of contractors, sub-contractors and employees appropriate for the project and work rates.   |
|   | 2.4 Estimate labour hours and calculate labour costs, including on-costs and worker insurance costs.   |
| 3 Identify type and cost of physical resources. | 3.1 Identify physical resources required for the project.  |
|   | 3.2 Determine limitations, conditions, operational costs and timeframes for hire of physical resources.  |
|   | 3.3 Obtain supplier prices, including transport of physical resources.   |
|   | 3.4 Identify, itemise and cost plant, equipment and machinery.   |

- 4 Produce estimated project costs.
  - 4.1 Review and compile materials, consumables and off-site production costs and delivery charges.
  - 4.2 Compile labour costs inclusive of rates and entitlements.
  - 4.3 Compile costs of physical resources.
  - 4.4 Apply organisational overhead recovery and margins.
  - 4.5 Produce estimated project costs for inclusion in a tender or bill.
  - 4.6 Manage and mitigate risks associated with estimating project costs.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to CPCBC4004A Identify and produce estimated costs for building and construction projects.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCBC4004 Identify and produce estimated costs for building and construction projects

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4004A Identify and produce estimated costs for building and construction projects. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by estimating the cost of one residential or commercial building and construction project.

In doing this, the candidate must:

- estimate project costing from construction drawings, specifications and written information
- list physical resources appropriate for the construction of the project
- produce project cost using an appropriate software program.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- government building and construction regulations
- building and construction standards and codes
- the National Construction Code (NCC)
- organisational policies and procedures
- organisational scope, processes and requirements for using employee and subcontractor labour
- Environmental Protection Authority (EPA) regulations
- construction drawings and specifications
- relevant physical resources and requirements for their operations:
  - earth moving and excavation equipment
  - hoists and lifting equipment
  - mobile cranes
  - compressors
  - generators
  - pumps

- calculating unit costs:
  - construction cost per square metre
  - laying of foundation per metre
  - laying of slabs per square metre
  - masonry walls per square metre
  - laying of steel tray roofing per square metre
  - installation of pipes per metre
  - installation of sanitary ware per unit
  - tiling per square metre
  - painting per square metre
- a range of digitally-based technology and applications to estimate quantities, calculate costs and maintain records
- workplace procedures, workplace safety and environmental requirements.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current construction drawings and specifications
- building and construction standards and codes
- government building and construction regulations
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements
- calculating technology, online applications and software to produce building and construction costs.

## Links

Companion volumes to this training package are available at the VETNet website -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPCBC4005 Produce labour and material schedules for ordering

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4.

Correction to Training Package title in the Modification History from CPC Property Services to CPC Construction, Plumbing and Services Training Package.

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4005A Produce labour and material schedules for ordering. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to produce schedules for physical and human resources and materials for residential or commercial projects. It includes monitoring project schedules and tracking and recording costs as they are incurred.

This unit of competency applies to site managers and forepersons, estimators, project managers and builders in the construction industry with responsibility for producing schedules for ordering materials and allocating labour.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

## Pre-requisite Unit

Nil.

## Unit Sector

Building and Construction

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |   |
|---|---|
| 1 Assess physical and human resource requirements.  | <ul style="list-style-type: none"> <li>1.1 Check conditions of approval from local government and regulatory bodies and project commencement dates.</li> <li>1.2 Identify variations to scope of works and contractual terms and arrangements by the client.</li> <li>1.3 Compile a list of nominated and approved suppliers and contractors and develop channels for effective communication.</li> <li>1.4 Confirm availability of materials with suppliers and labour with contractors.</li> <li>1.5 Enter critical project information into project schedule.</li> </ul> |
| 2 Produce schedules.                                | <ul style="list-style-type: none"> <li>2.1 Prepare electronic call forward sheet and site files containing necessary site documentation.</li> <li>2.2 Break down project into stages and tasks and set milestones and timeframes for commencement and completion.</li> <li>2.3 Itemise materials and labour required for the stages of construction.</li> <li>2.4 Sequence material delivery dates and commencement times for labour.</li> <li>2.5 Factor in unplanned delays.</li> </ul>   |
| 3 Monitor project costs and maintain project files. | <ul style="list-style-type: none"> <li>3.1 Monitor construction stage progression costs and approved variation costs against estimated project cost.</li> <li>3.2 Manage and monitor project progress against scheduled timelines.</li> </ul>   |

- 3.3 Record unscheduled and approved variations, changes to the approved plan and specifications and delays to the project.
- 3.4 Resolve issues, within scope of responsibilities, and maintain a cost analysis against final estimated project cost.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- technology skills to:
  - use digital devices to communicate and collaborate effectively with suppliers, contractors and others
  - use equipment and programs to prepare and access electronic call forward sheets and files.

## Unit Mapping Information

Supersedes and is equivalent to CPCBC4005A Produce labour and material schedules for ordering

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCBC4005 Produce labour and material schedules for ordering

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4.

Correction to Training Package title in the Modification History from CPC Property Services to CPC Construction, Plumbing and Services Training Package.

Release 1 This version first released with CPC Property Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4005A Produce labour and material schedules for ordering. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by producing a schedule for the ordering of materials and allocation of labour for a residential or commercial building and construction project.

In doing this, the candidate must:

- produce a labour and materials schedule across the life of the project
- develop and manage efficient communications between staff, contractors and suppliers
- monitor, maintain and record project progress and variations, estimated and increased costs and changes to construction drawings and specifications.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- relevant government building legislation and regulations
- building and construction codes and standards
- construction drawings and specifications
- building and construction contractor and supplier contracts
- local authority building application processes, approval and conditions
- organisational policies and procedures:
  - costing and ordering materials
  - selecting and engaging suppliers
  - approving and contacting contractors

- projects costs:
  - organisational and subcontractor labour
  - organisation overheads
  - public liability, professional indemnity and workers' compensation
  - temporary electrical, plumbing and draining services
  - temporary site facilities, storage facilities and boundary fencing
  - communications
  - project administration
- workplace procedures, workplace safety and environmental requirements.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current construction drawings and specifications
- relevant organisational policies and procedures
- various construction industry contracts
- organisational policies and procedures and other quality documentation required to undertake the performance criteria and assessment requirements
- digital devices, applications and software to set up electronic call forward sheets, compile site files and create channels of communication with internal and external stakeholders.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# **CPCBC4008 Supervise site communication and administration processes for building and construction projects**

## **Modification History**

- Release 5 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.5.  
Changes to Foundation Skills, Knowledge Evidence and Performance Evidence.
- Release 4 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4.  
Correction to version release numbering.
- Release 3 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.0.  
Typographical error in Element 4 corrected.  
Element 4.2 corrected from; Conduct onsite inspections for project monitoring according to schedule using relevant inspection checklists to:  
4.2 Conduct onsite project monitoring and inspection of work quality
- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.  
Typographical corrections in Performance Evidence.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.  
Supersedes and is equivalent to CPCBC4008B Conduct on-site supervision of building and construction projects. Title change for clarity purposes. Updated to meet the Standards for Training Packages 2012.

## **Application**

This unit of competency specifies the skills and knowledge required to supervise site communications, monitor and maintain compliance with codes and standards and implement project administration processes on a building and construction project.

It is strongly recommended that the site, as specified in the performance evidence, is 'live' (see Companion Volume for guidance).

This unit of competency specifies the skills and knowledge required to supervise the administration of quality control compliance and the use of site communications and record keeping systems; and conduct onsite inspections to complete the required project administration processes.

This unit applies to National Construction Code (NCC) classifications:

- Residential - Class 1 buildings to a maximum of two storeys
- Commercial - NCC Class 2 to 9, Type C only constructions.

This unit of competency is suitable for builders, site managers, forepersons and other construction industry professionals using specialised knowledge and skills to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program, specified in the model Code of Practice for Construction Work, is required by anyone carrying out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

## Pre-requisite Unit

Nil.
