| 1 Supervise the administration of quality control compliance. | 1.1 | Identify project quality control compliance requirements.   |
|   | 1.2 | Communicate organisational quality control processes and industry requirements to relevant personnel.   |
|   | 1.3 | Develop processes to ensure onsite work performance meets industry regulatory framework, jurisdictional requirements and quality control standards. |
|   | 1.4 | Confirm that regulatory, jurisdictional and organisational compliance and quality control requirements have been met.                               |
|   | 1.5 | Access or develop schedules and checklists detailing specific inspections to be conducted at appropriate stages                                     |

of construction.

- |   |  |     |  |
|---|--|-----|--|
| 2 | Supervise the administration of projects.                            | 2.1 | Identify project administration requirements.  |
|   |  | 2.2 | Authorise payment of material and contractor invoices, drawing against contract allowances and back-charges, as required.  |
|   |  | 2.3 | Authorise variations to contracts and take corrective action as required.  |
|   |  | 2.4 | Process insurance claims for site loss or damage.  |
| 3 | Supervise the use of site communications and record keeping systems. | 3.1 | Develop and implement systems for effective communication between onsite and offsite staff, contractors and suppliers that systematically gather onsite information. |
|   |  | 3.2 | Develop and implement construction project recording systems to capture relevant project details.  |
|   |  | 3.3 | Maintain a daily communications diary and key events.  |
|   |  | 3.4 | Record information relating to certifier inspections, union and legislative matters.   |
| 4 | Conduct onsite project monitoring and inspection of work quality     | 4.1 | Apply workplace safety requirements and project administration procedures during onsite visit.   |
|   |  | 4.2 | Conduct onsite project monitoring and inspection of work quality.  |
|   |  | 4.3 | Inspect and record quality of work, notify relevant people of defects and issue rectification notice.  |
|   |  | 4.4 | Develop systems to monitor rectified work to ensure compliance with organisational quality control requirements, building standards and client satisfaction.         |
| 5 | Complete project administration processes.                           | 5.1 | Record work defects notified by external parties, establish liabilities and remedial action required, and develop inspection checklist.                              |

- 5.2 Notify client of rectification, and record client's response to completed work.
- 5.3 Instigate procedures that will result in client approval and acceptance where this was not the client's initial response.
- 5.4 Confirm contract requirements are fulfilled with relevant company personnel and client.
- 5.5 Arrange for local authority completion inspection.
- 5.6 Prepare certificates and appropriate client handover information, including all guarantees, warranties and termite protection forms.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria, including:

- technology skills to:
  - use communication tools and devices to communicate and collaborate effectively with others
  - use equipment and programs to access, extract information and develop relevant documentation

## Unit Mapping Information

Supersedes and is equivalent to CPCBC4008B Conduct on-site supervision of building and construction projects.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCBC4008 Supervise site communication and administration processes for building and construction projects

## Modification History

- Release 5 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.5.  
Changes to Foundation Skills, Knowledge Evidence and Performance Evidence.
- Release 4 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.4.  
Correction to version release numbering.
- Release 3 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.0.  
Typographical error in Element 4 corrected.  
Element 4.2 corrected from; Conduct onsite inspections for project monitoring according to schedule using relevant inspection checklists to:  
4.2 Conduct onsite project monitoring and inspection of work quality
- Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.  
Typographical corrections in Performance Evidence.
- Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.  
Supersedes and is equivalent to CPCBC4008B Conduct on-site supervision of building and construction projects. Title change for clarity purposes. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency in this unit, a candidate must meet the elements and performance criteria by:

1. Developing a plan to supervise the administration processes for one building and construction project which is either a:
  - Class 1 to a maximum of two storeys, or

- Class 2 to 9, Type C building

In doing this, the candidate must:

- a. Create a plan to implement, administer, maintain and monitor site quality control.
  - b. Read and understand thoroughly the Site Safety Plan used on site.
  - c. Outline the communication systems that will be used on site.
  - d. Outline how systematic gathering of onsite information will be recorded.
  - e. Develop a progress inspection checklist for at least two trades for a section of building.
2. Conducting at least one site inspection to evaluate safety, project progress and work quality for at least one section of a building. This worksite must be for a building and construction project which is either a:
- Class 1 to a maximum of two storeys, or
  - Class 2 to 9, Type C building

In doing this, the candidate must submit the following two documents:

- a. The inspection checklist used
- b. The rectification plan which outlines:
  - i. What must be rectified
  - ii. Why it must be rectified (with reference to appropriate standard, code or plan specification, etc)
  - iii. The recommended order in which rectifications should be done
  - iv. Expected duration of each rectification and when they are expected to be rectified by
  - v. Who will carry out the rectification and how they will be notified
  - vi. Will any rectifications affect the work remaining schedule, if yes - who did you notify.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- building and construction industry contracts
- construction methodologies

- workplace procedures
- work health and safety (WHS):
  - hierarchy of control
  - duty of care
  - risk assessment
- organisational quality management systems related to:
  - communicating with regulatory authorities
  - worker and contractor payment systems
  - issuing of completion certificates and appropriate documentation
  - finalising project contractual agreements
- onsite communication:
  - emails
  - face-to-face verbal communication
  - telephone contacts
  - site diaries
  - written reports and memoranda

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated workplace is one that fully replicates the resources, environment and any time and productivity pressures that exist in the actual workplace, and which meets industry standards for safety and environmental practices. The simulated workplace environment must be developed in consultation with industry stakeholders. (see Companion Volume for guidance).

Candidates must have access to:

- relevant jurisdictional safety legislation and regulations
- building and construction codes and standards
- relevant project plans and specifications
- organisational quality control documentation relevant to supervising the administration of quality control compliance, communications and recording systems, and work progress and quality
- business and safety equipment and materials to supervise administration processes for a building and construction project onsite.

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPCBC4009 Apply legal requirements to building and construction projects

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4009B Apply legal requirements to building and construction projects. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to apply legal requirements to residential and commercial building and construction projects. It includes meeting licensing requirements, complying with financial and insurance laws and meeting the conditions of building contracts.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys
- Commercial --Class 2 to 9, Type C only constructions.

This unit of competency applies to builders, site managers, forepersons, estimators and other construction industry personnel responsible for applying legal requirements to residential or commercial building and construction projects.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems relating to legal requirements of building and construction projects.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

## Pre-requisite Unit

Nil.

## Unit Sector

Building and Construction

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |  |   |
|--|---|
| 1 Identify legislation relating to the construction project. | 1.1 Identify legal requirements from relevant government Acts and regulations appropriate to the type of building and construction project. |
|  | 1.2 Identify legal requirements for building contracts, construction insurance, industrial relations obligations and payroll systems.       |
|  | 1.3 Determine class of building for the project and check for limitations of builder's registration and licence.                            |
|  | 1.4 Identify any construction activity restrictions, limitations and conditions from building approvals and permits for the project.        |
|  | 1.5 Check licensing requirements or competencies for subcontractors, site supervisors and managers.   |
|  | 1.6 Identify sustainability, environmental and waste management legislated requirements.  |
|  | 1.7 Identify work health and safety (WHS) legislation and requirements of Construction work Code of Practice.                               |
| 2 Apply site safety requirements.                            | 2.1 Apply all the relevant requirements of WHS regulations that apply to the project.   |
|  | 2.2 Adapt organisation's workplace procedures and workplace safety requirements to align with the project.                                  |
|  | 2.3 Implement strategies to ensure all workers are inducted, informed and regularly updated of their on-site safety responsibilities.       |
| 3 Apply legal  | 3.1 Apply contract law in accordance with common law principles, relevant state or territory laws and                                       |

- requirements. regulations, and fair trading legislation.
- 3.2 Apply the contract agreements and meet all the conditions during construction of the project.
  - 3.3 Confirm all mandatory building, subcontractor and worker's compensation insurances are current and applied to comply with legal requirements.
  - 3.4 Administer payroll system which incorporates employee and contractor payments, deduction of taxes, including goods and services tax (GST), tracking of transactions and calculating wages.
- 4 Apply industrial relations.
- 4.1 Apply workplace and subcontractor agreements and relevant awards to comply with industrial relations legislation.
  - 4.2 Identify and apply provisions for training agreements and make information available to all workers.
  - 4.3 Take proactive measures to ensure discrimination and harassment are not practiced in the workplace.
- 5 Resolve disputes and complaints.
- 5.1 Apply dispute resolution processes following organisational policies.
  - 5.2 Address complaints promptly, consult with complainant and resolve issue with the best solution for all.
  - 5.3 Record dispute outcome and maintain documentation.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to CPCBC4009B Apply legal requirements to building and construction projects

## Links

Companion volumes to this training package are available at the VETNet website -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCBC4009 Apply legal requirements to building and construction projects

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4009B Apply legal requirements to building and construction projects. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by applying legal requirements to one residential or commercial building and construction project.

In doing this, the candidate must:

- identify and apply relevant legislative requirements applicable to the building and construction project
- apply legal obligations for:
  - insurance covering workers, materials and building
  - industrial relations, financial transactions, payment of wages and payment of subcontractor and supplier invoices
  - contractual agreements
- apply building and construction standards and codes during construction.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- building and construction industry contracts
- builder registration and licensing
- Construction work Code of Practice
- appropriate government legislation:
  - business registration and licensing
  - industrial relations
  - work health and safety (WHS)
  - taxation and financial transactions
  - insurance
  - waste management and environmental protection

- organisational policies and procedures.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- relevant government building and construction legislation
- current building and construction codes and standards
- relevant construction industry contracts
- organisational policies and procedures, insurance, industrial relations and other quality documentation required to undertake the performance criteria and assessment requirements
- digital devices, applications and software to obtain legal and building and construction information and record outcomes of disputes.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPCBC4012 Read and interpret plans and specifications

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4012B Read and interpret plans and specifications. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to read and interpret plans and specifications applicable to residential and commercial projects. It includes identifying site characteristics, features of the proposed building and details of the construction.

It applies to National Construction Code (NCC) classifications:

- Residential - Class 1 and 10 buildings, maximum two storeys
- Commercial - Class 2 to 9, Type C only constructions.

The unit of competency applies to site managers, forepersons, estimators, builders, managers and other building and construction industry personnel who read and interpret plans and specifications for quantity surveying, costing and tendering and construction of building and construction projects.

This unit is suitable for people with specialised knowledge, completing routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, regulatory or registration requirements apply to this unit of competency in some jurisdictions. Relevant state and territory regulatory authorities should be consulted to confirm these requirements.

## Pre-requisite Unit

Nil.

## Unit Sector

Building and Construction

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1 Identify types of plans.	1.1 Confirm plans, specifications and amendments are the current version.
	1.2 Identify types of plans and aspects of the drawings specific for the intended purpose.
	1.3 Confirm details on plans comply with the specifications.
2 Read and interpret the plan.	2.1 Distinguish key features on the plans.
	2.2 Identify building location from site plan.
	2.3 Identify building layout, spaces and dimensions from floor plan.
	2.4 Examine detail drawings to determine sizes, thickness and methods of construction.
	2.5 Identify internal linings, external cladding and roof materials from plans and specifications.
3 Identify structural details.	3.1 Identify concrete footing and slab sizes and position and type of reinforcing.
	3.2 Identify load bearing points of the building.
	3.3 Identify wind bracing and tie-down requirements.
4 Identify non-structural details.	4.1 Identify provisional sum (PS) and prime cost (PC) items.
	4.2 Locate installation and connection points of services to the building.
	4.3 Identify location of fixtures from plans and details of finishes from specifications.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to CPCBC4012B Read and interpret plans and specifications

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCBC4012 Read and interpret plans and specifications

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4012B Read and interpret plans and specifications. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by identifying and interpreting building and construction information from a set of plans and specifications.

In doing this, the candidate must:

- identify orientation of structures, site contours, datum and reduced levels, and site features to be removed or retained
- identify structural load bearing information of the building and compare information from specification
- check wind bracing materials and tie-down methods for accuracy against the wind bracing table
- interpret essential elements from two-dimensional to three-dimensional format, and apply to estimation, planning and supervisory tasks.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- types of plans:
  - concept drawing/sketches
  - architectural
  - structural
  - civil
  - mechanical
  - electrical
  - plumbing and draining
- parts of a plan:
  - site plan
  - floor plan

- elevations
- sections
- details
- drawing conventions:
  - datum and reduced levels (RL)
  - title block
  - scale
  - dimensions
  - abbreviations
- utilities and services plans and specifications
- isometric drawings, oblique drawings, perspective drawings and orthographic drawings
- computer-aided design (CAD) drawings
- building and construction regulations, standards and codes
- classes of buildings
- the NCC
- building information modelling (BIM)
- building and construction methods and terminology
- workplace processes, workplace safety and environmental requirements.

## Assessment Conditions

Assessors must satisfy the requirements for assessors listed in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- plans and specifications and other quality documentation required to undertake the performance criteria and assessment requirements
- relevant government building and construction and contract legislation
- current building and construction codes and standards
- National Construction Code
- computers, applications and software to access CAD.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPCBC4013 Prepare and evaluate tender documentation

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4013A Prepare and evaluate tender documentation. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to evaluate project and contract requirements and prepare and formalise tender documentation in the building and construction industry. It includes interpreting, compiling and documenting essential project information and demands into a final tender document.

It applies to builders, estimators and managers in the building and construction industry who have a responsibility for evaluating and preparing tenders for residential and commercial projects.

This unit of competency is suitable for those using specialised knowledge to complete routine and non-routine tasks and using their own judgement to deal with predictable and sometimes unpredictable problems.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil.

## Unit Sector

Building and Construction

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |  |     |   |
|---|--|-----|---|
| 1 | Research project requirements.         | 1.1 | Gather relevant information for tender preparation from current and approved project plans, specifications and project documentation. |
|   |  | 1.2 | Select appropriate contracts and tender documents.  |
|   |  | 1.3 | Identify and record risks during evaluation of contracts and tender documents.  |
| 2 | Prepare tender documentation.          | 2.1 | Collate all information for tender preparation and check for accuracy.  |
|   |  | 2.2 | Prepare tender documentation to correspond with selected contracts and organisational processes and procedures.                       |
| 3 | Attach supporting documentation.       | 3.1 | Select and accurately complete relevant documentation required to submit with the tender.   |
|   |  | 3.2 | Attach vital information, drawings, specifications or other supporting evidence to the tender document.                               |
|   |  | 3.3 | Prepare and attach client acceptance forms and any amendments and conditions to the tender or contract.                               |
| 4 | Obtain tender approval or endorsement. | 4.1 | Conduct final evaluation of completed tender documentation.   |
|   |  | 4.2 | Complete appropriate client contract for the project.   |
|   |  | 4.3 | Provide tender documentation to the appropriate staff member for approval or endorsement.   |

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to:
  - extract and comprehend relevant information from complex document text
- technology skills to:

- use tools and devices to communicate and collaborate effectively with others
- use equipment and programs to access and extract information and develop relevant documentation.

## **Unit Mapping Information**

Supersedes and is equivalent to CPCBC4013A Prepare and evaluate tender documentation

## **Links**

Companion volumes to this training package are available at the VETNet website -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCBC4013 Prepare and evaluate tender documentation

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCBC4013A Prepare and evaluate tender documentation. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by preparing tender documents for two contracts, with one being for a residential project and one for a commercial project.

In doing this, the candidate must:

- source and check relevant plans, specifications and tender documentation for currency and amendments
- evaluate risk associated with the tender process.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- relevant government building and construction regulations, codes and standards
- structure and operations of the organisation's costing, tendering and contracting system
- tender documents and supporting documentation:
  - artist's impressions
  - building information modelling (BIM)
  - product information
  - promotional materials
  - reports and findings beneficial to the organisation
- project risks associated with tendering:
  - breach of contract
  - project delays
  - payment disputes
  - delays in progress payments
  - circumstances, such as:
    - delivery delays that extend project completion dates
    - labour shortages

- weather
- exposure through clauses that work against the organisation
- failure to adequately anticipate labour or materials costs
- inappropriate funding levels and funding shortfalls
- industrial disputes through misunderstandings or overt action
- risk of default or non-performance of key players
- types of building and construction drawings and specifications
- types, scope and usage of labour through the employee and subcontractor systems
- using appropriate costing software programs.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment can be undertaken in the workplace or in a simulated workplace environment.

A simulated environment is one that realistically replicates workplace conditions, materials and equipment, interactions with others and workplace irregularities, and which meets industry standards for safety and environmental practices.

Candidates must have access to:

- current relevant government legislation
- current relevant building and construction codes and standards
- construction contracts and associated tender documentation
- organisational policies, procedures and other quality documentation to undertake the performance criteria and evidence requirements
- business technology, applications and software to produce tender documentation.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPCCCA3010 Install windows and doors

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCA3010A Install and replace windows and doors. Title change. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to plan, prepare and install window and door units, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

## Unit Sector

Carpentry and Joinery

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Plan and prepare.

1.1 Read and interpret work instructions and plan sequence of work.

1.2 Plan all work to comply with laws and regulations, the

- National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.
- 1.3 Select tools and equipment, check for serviceability and report any faults.
  - 1.4 Select and use personal protective equipment (PPE) as required for each stage of the task.
  - 1.5 Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades.
  - 1.6 Select materials required for task, calculate quantities, handle safely and prepare and position ready for use.
- 2 Install window units.
- 2.1 Check wall frame opening for adequate clearance for window unit.
  - 2.2 Position window unit with packing and flashings so that the head and sill are level, stiles are plumb and in wind, and reveals or frame are finished flush with face of inside wall lining.
  - 2.3 Select type, gauge and quantity of fasteners as per *Australian Window Association - An Industry Guide to the Correct Fixing of Windows and Doors* and fix window to wall frame.
- 3 Prepare internal and external door openings, and construct and fix jamb.
- 3.1 Check wall frame for adequate clearance for door frame.
  - 3.2 Mark door jamb and head, cut to length, allowing for door clearances.
  - 3.3 Trench the door head to accommodate jambs, allowing for specified clearances.
  - 3.4 Assemble, square, fix and brace door frame with flush rebates.
  - 3.5 Select type, gauge and quantity of fasteners as per *Australian Window Association - An Industry Guide to the Correct Fixing of Windows and Doors*. Install door

frame into wall frame opening, ensuring the door jambs are plumb and in wind, positioned flush to linings, head is level, and all appropriate flashings are in place.

- |   |                                    |     |   |
|---|------------------------------------|-----|---|
| 4 | Install door.                      | 4.1 | Mark out hinges and fit to door and jamb.   |
|   |                                    | 4.2 | Fit door to frame and adjust gaps to requirements of <i>AS2688 Timber and composite doors</i> .   |
|   |                                    | 4.3 | Fit and fix door furniture and door stop components to manufacturers' specifications.   |
| 5 | Install cavity door and door unit. | 5.1 | Fit hardware (rollers) to door according to manufacturer's specifications.  |
|   |                                    | 5.2 | Fit door to cavity sliding door unit and adjust height of rollers to ensure leading door edge is plumb and closes neat against cavity sliding door stile. |
|   |                                    | 5.3 | Make final adjustments to packing of cavity sliding door stile.   |
|   |                                    | 5.4 | Fit and fix door furniture and cavity door centring locators, according to manufacturer's specifications.   |
| 6 | Clean up.                          | 6.1 | Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.   |
|   |                                    | 6.2 | Check, maintain and store tools and equipment and report any faults.  |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to CPCCCA3010A Install and replace windows and doors.

## Links

Companion volumes to this training package are available at the VETNet website -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCCCA3010 Install windows and doors

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCA3010A Install and replace windows and doors. Title change. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- installing in wall frames:
  - a standard window
  - a sliding cavity door unit and door
- constructing and fitting a standard external rebated door frame
- fitting and hanging one door, including door furniture, privacy set and door stops
- fitting and hanging a pair of doors.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards, relevant to installing windows and doors, including *AS2688 Timber and composite doors* and *AS2047 Windows and external glazed doors in buildings*, and *Australian Window Association - An Industry Guide to the Correct Fixing of Windows and Doors*
- workplace quality policies and standards relevant to installing windows and doors
- safety requirements for installing windows and doors
- flashing requirements and installation techniques relevant to installing windows and doors
- plans, specifications and drawings for installing windows and doors
- types of tools and equipment required to install windows and doors, their characteristics, uses and limitations
- processes for setting out windows and doors
- processes for calculating material requirements for installing windows and doors
- materials relevant to installing windows and doors
- various types of doors:
  - flush panel, framed and panelled, and glazed

- hinged door units including standard doors, sliding, flywire, combination window and door units, door sidelight units (glazed or unglazed) and internal doors
- jambs, stiles and sills
- flashing
- door furniture, including flush pulls, latches and deadlocks, push plates and closers, handles and locks
- window, door installation including flashing and fixing
- types of windows and doors, materials used and their characteristics and uses.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation reflecting workplace conditions and standards, materials, equipment, activities, responsibilities, procedures, safety requirements and environmental considerations.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPCCCA3014 Construct and install bulkheads

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCA3014A Construct bulkheads. Title change. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to construct bulkheads for decorative purposes, to contain fittings, such as range hoods and cupboards, to conceal services, and to help facilitate changes in ceiling heights, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit includes preparing for sheeting bulkheads with plasterboard, lining boards, reconstituted timber products and metal or plastic decorative panels; and installation of bulkheads which may be hung from, incorporated into, or fastened onto a structure in situ.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

## Unit Sector

Carpentry and Joinery

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- 1 Plan and prepare.
  - 1.1 Read and interpret work instructions and plan sequence of work.
  - 1.2 Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.
  - 1.3 Select tools and equipment, check for serviceability and report any faults.
  - 1.4 Select and use personal protective equipment (PPE) for each part of the task.
  - 1.5 Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades.
  - 1.6 Identify materials required for task, calculate quantities, handle safely and prepare and position ready for use.
- 2 Fabricate bulkhead components.
  - 2.1 Set out bulkhead.
  - 2.2 Cut bulkhead trimmers and plates to set out.
- 3 Install bulkhead components.
  - 3.1 Select fasteners to support the weight of the bulkhead.
  - 3.2 Assemble bulkhead, fix to position and specification.
- 4 Install pre-manufactured bulkheads.
  - 4.1 Set out pre-manufactured bulkhead sections.
  - 4.2 Use fasteners as specified by frame manufacturer.
  - 4.3 Fix to position and specification.
- 5 Clean up
  - 5.1 Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.
  - 5.2 Check, maintain and store tools and equipment and

report any faults.

## **Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Unit Mapping Information**

Supersedes and is equivalent to CPCCCA3014A Construct bulkheads.

## **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCCCA3014 Construct and install bulkheads

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCA3014A Construct bulkheads. Title change. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- constructing and installing:
  - one straight bulkhead framed in timber or steel measuring a minimum of 2 m width, 300 mm height and 300 mm depth
  - one curved bulkhead framed in timber or steel measuring a minimum of 2 m width, 300 mm height and 300 mm depth
- installing a pre-manufactured bulkhead measuring a minimum of 2 m width, 300 mm height and 300 mm depth.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards relevant to constructing and installing bulkheads
- workplace quality policies and standards relevant to constructing and installing bulkheads
- safety requirements relevant to constructing and installing bulkheads
- purposes of bulkheads:
  - decoration, to contain fittings (bar hoods and cupboards) and help facilitate changes in height to ceilings
  - services
  - range hoods
- materials and methods used to construct and install bulkheads
- application of curved geometry in the construction of bulkheads
- load and anchor capacities for bulkheads
- use of plans, specifications and drawings when constructing and installing bulkheads
- types and uses of tools and equipment used to construct and install bulkheads
- processes for setting out and measuring materials used to construct bulkheads

- processes for calculating material requirements for constructing and installing bulkheads.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

## Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPCCCM2002 Carry out hand excavation

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and equivalent to CPCCCM2002A Carry out excavation. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to undertake hand excavation tasks to form excavations for footings and the provision of services.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of unit *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

## Unit Sector

Common

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |   |   |
|---|---|
| 1 Plan and prepare for hand excavation. | 1.1 Read and interpret work instructions and plan sequence of work.                                     |
|   | 1.2 Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian |

- Standards, work health and safety (WHS) and environmental requirements, workplace requirements, drawings and specifications.
- 1.3 Select and use personal protective equipment (PPE) for each part of the task.
  - 1.4 Select tools and equipment, check for serviceability and report any faults.
- 2 Prepare excavation site and erect safety equipment.
- 2.1 Inspect work site to locate above ground services and assess hazards and determine risk controls.
  - 2.2 Locate service markers or taped areas to ensure underground services are avoided and free from interference.
  - 2.3 Establish line and depth using site pegs/profiles to mark excavation limits.
  - 2.4 Establish required signage and barricades and other risk controls.
  - 2.5 Establish temporary drainage system to divert surface and sub-surface water from excavation.
- 3 Dig excavations.
- 3.1 Dig excavations with hand tools to route, line and depth, following procedures to minimise risk to self and others.
  - 3.2 Install basic trench/excavation support.
  - 3.3 Use hand tools to remove loose material from excavation.
- 4 Check and store tools and equipment.
- 4.1 Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.
  - 4.2 Check, maintain and store tools and equipment and report any faults.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and equivalent to CPCCCM2002A Carry out excavation.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCCCM2002 Carry out hand excavation

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and equivalent to CPCCCM2002A Carry out excavation. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must satisfy all the elements, performance criteria and foundation skills of this unit by excavating, by hand, a 3 metre trench with a right angle, .5 metres deep and .5 metres wide.

All work must be performed to the standard required in the workplace and must comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, workplace requirements, drawings and specifications.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the Commonwealth and state or territory legislation relevant to carrying out excavations
- workplace quality policies and standards for carrying out excavations
- safety requirements for carrying out excavations
- environmental requirements for carrying out excavations
- types and uses of hand tools and equipment required for carrying out excavations
- locating services on construction sites
- use and types of service markers
- processes for establishing trench line and depth
- temporary drainage systems to divert surface and sub-surface water from excavations
- types of basic trench excavation support.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed:

- in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques replicate construction workplace conditions, materials, activities, responsibilities and procedures
- using realistic tasks or simulated tasks, relevant specifications and work instructions, standard work practices, safety requirements and environmental constraints.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPCCCM2006 Apply basic levelling procedures

## Modification History

Release 1.

This version first released with CPC Construction, Plumbing and Services Training Package Version 2.

Revised unit of competency. Replaces superseded equivalent unit CPCCCM2006B Apply basic levelling procedures.

## Application

This unit of competency specifies the outcomes required to carry out levelling in a single plane for the purpose of establishing correct and accurate set-out of building components. It includes the set-up, testing and use of levelling devices, and establishing and transferring heights using a range of levelling equipment.

The unit supports workers in the construction industry who use a variety of common methods and equipment when working with others and as a member of a team. It applies to levelling work on residential and commercial work sites.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Competency Field

Common

## Unit Sector

Construction

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Plan and prepare.
  - 1.1. Job requirements are obtained, confirmed with relevant personnel, and applied to planning.
  - 1.2. Work site is inspected, and conditions and hazards are identified within scope of own role and reported according to workplace procedures.
  - 1.3. ***Health and safety requirements*** for levelling procedures are confirmed and applied to planning.
  - 1.4. ***Levelling tools and equipment*** are selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.5. Team roles and verbal and non-verbal communication signals are confirmed, as required.
2. Set up and use levelling device.
  - 2.1. Required heights or levels are identified from work instructions.
  - 2.2. Levelling device is set up, and ***levelling device tolerance is checked*** according to manufacturer specifications.
  - 2.3. Levels are shot and heights are transferred to required location and ***marked*** according to job requirements.
  - 2.4. Results of ***levelling activities*** are documented according to organisational requirements.
3. Clean up.
  - 3.1. Work area is cleared and materials sorted and removed or recycled according to statutory and regulatory authority requirements.
  - 3.2. Tools and equipment are cleaned, checked, maintained and stored according to manufacturer specifications.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
Numeracy skills to:	<ul style="list-style-type: none"><li>interpret and calculate levelling readings and measurements.</li></ul>
Reading skills to:	<ul style="list-style-type: none"><li>read and interpret documentation from a variety of sources, including drawings and specifications.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>enter routine data associated with levelling procedures legibly into workplace documentation.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>plan and schedule work in a logical sequence.</li></ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Health and safety requirements</i></b> must include:	<ul style="list-style-type: none"><li>emergency procedures, including:<ul style="list-style-type: none"><li>evacuation</li><li>first aid</li></ul></li><li>hazard identification and risk control procedures</li><li>safe operating procedures for levelling, including:<ul style="list-style-type: none"><li>manufacturer specifications</li><li>safe work method statements (SWMS)</li><li>safety data sheets (SDS)</li></ul></li><li>selection, correct fitting, and use of personal protective equipment (PPE) prescribed under legislation, regulations and workplace policies and practices</li><li>selection and use of tools and equipment.</li></ul>
--	---

***Levelling tools and equipment must include:***

- each of the following:
  - laser levels and targets
  - marking equipment
  - measuring tapes and rules
  - spirit levels and straight edges
- two of the following:
  - automatic/optical levels
  - plumb bobs
  - water levels.

***Levelling device tolerance checks*** must include one or more of the following:

- reverse readings for spirit level
- two peg test for automatic level.

***Marks*** for heights or levels must include:

- chalk or nail mark
- mark on vertical surface
- datum or survey peg
- drawing or sketch.

***Levelling activities*** must include three or more of the following:

- measuring and recording heights for the installation of signage
- positioning offsets and recovery pegs for construction projects
- recording ground levels at respective critical set-out points
- recording heights or level and the transfer of data points
- recording or checking levels in drainage
- recording slab or pad levels for placement of steel columns or masonry piers
- setting up levelling devices
- shooting levels for concrete slabs
- transferring levels and heights for formwork.

## Unit Mapping Information

CPCCCM2006B Apply basic levelling procedures

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCCCM2006 Apply basic levelling procedures

## Modification History

Release 1.

This version first released with CPC Construction, Plumbing and Services Training Package Version 2.

Revised unit of competency. Replaces superseded equivalent unit CPCCCM2006B Apply basic levelling procedures.

## Performance Evidence

A person who demonstrates competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must also transfer levels and record differences in height for three different projects as required by job specifications, using at least three of the following levelling devices:

- a spirit level and straight edge
- automatic/optical levelling device
- levelling with water technique
- laser levelling device.

In doing the above work, the person must:

- conduct a two peg test with an automatic/optical level to confirm that the instrument meets manufacturer tolerances
- locate, interpret and apply relevant information in job specifications to the levelling task
- comply with site safety plan, and health and safety regulations applicable to workplace operations
- comply with organisational policies and procedures, including quality requirements
- safely and effectively use tools and equipment
- communicate and work effectively and safely with others, including using agreed communication signals
- confirm accuracy of the readings taken, including set-up and movement of device in two locations
- accurately record results of each levelling procedure according to organisational requirements.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- characteristics, technical capabilities and limitations of different types of levelling devices
- methods of performing calculations associated with levelling
- processes for setting out levelling tasks
- requirements for line, level and plumb in construction projects
- site and equipment safety requirements relevant to basic levelling procedures
- symbols and construction terminology used when interpreting construction plans
- techniques used when applying basic levelling procedures
- contents of and terms used in job safety analyses (JSA) and safe work method statements (SWMS) and the use of this documentation when levelling.

## Assessment Conditions

Suitable assessment of performance requires:

- equipment and tools:
  - as listed in the range of conditions and assessment requirements
- specifications:
  - job requirements
  - health and safety requirements
  - manufacturer specifications
  - safety data sheets (SDS)
  - SWMS
  - workplace and relevant work site procedures
- relationships with team members and supervisor:
  - work must be completed as part of a team and under direct supervision and observation
- timeframe:
  - according to job requirements.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

## Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPCCCM2010 Work safely on scaffolding higher than two metres

## Modification History

Release 1.

This version first released with CPC Construction, Plumbing and Services Training Package Version 2.

## Application

This unit of competency specifies the outcomes required to work safely on construction sites where the work activity involves working above two metres from ground level and where fall protection measures are required. It covers safe methods for accessing the work site; and safe methods of moving or passing tools, equipment and materials to heights above two metres, including handling methods that avoid excessive bending or twisting.

The unit supports construction workers operating from scaffolding over two metres in height that has already been constructed with signage and exclusion barriers in place, in order to reach upper storeys or roofs of buildings. It applies to workers who need to control the risk of falling and of falling objects when working on site or removing scaffold components.

It applies to construction work on residential and commercial work sites in new construction, renovation or refurbishment, and maintenance projects.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of endorsement.

## Pre-requisite Unit

Nil

## Competency Field

Common

## Unit Sector

Construction

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Identify work requirements.
  - 1.1. Site of proposed work at heights is identified from relevant information.
  - 1.2. Tasks to be completed are identified from work orders and supervisor instructions.
  - 1.3. Personal protective equipment (PPE) suitable to the job is selected and checked for serviceability.
  - 1.4. Method of accessing work area is identified according to ***safe work method statement*** (SWMS).
  - 1.5. Safe work methods for moving tools, equipment and materials to work area are identified to minimise risks.
  - 1.6. Verbal and non-verbal communication signals are confirmed with team members, supervisor and other personnel working on site, as required.
  
2. Access work area.
  - 2.1. Work site is inspected and conditions and ***hazards*** are assessed and reported, as required, and risk controls selected according to SWMS.
  - 2.2. ***Safety of scaffolding*** is checked and faults are reported to relevant personnel.
  - 2.3. Arrangements are made to install required access equipment according to SWMS.
  - 2.4. Access equipment is inspected for defects and issues are reported and rectified according to health and safety requirements.
  - 2.5. Safe work methods are used to access work area and to move tools, equipment and materials to required locations on the work site.
  - 2.6. Tools and materials are placed to eliminate or reduce the risk of items falling.

- |    |                          |      |   |
|----|--------------------------|------|---|
| 3. | Conduct work tasks.      | 3.1. | Work is conducted following workplace-approved procedures and SWMS.   |
|    |                          | 3.2. | Communication with team members and other site personnel is maintained as required to progress work tasks according to required timelines.        |
|    |                          | 3.3. | Fall protection equipment is kept in place and adjusted to cater for movement during work.  |
|    |                          | 3.4. | Scaffold components and fall barriers are kept in place during work.  |
| 4. | Finalise work processes. | 4.1. | Egress from work area is completed following SWMS and work site supervisor approved methods for moving self, tools and materials to ground level. |
|    |                          | 4.2. | Tools, equipment and materials returned to ground level are cleaned, checked, maintained and stored according to manufacturer specifications.     |

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

### Skill

### Performance feature

Numeracy skills to:

- perform measurements relating to checking safety of scaffolding.

Oral communication skills to:

- report faults in scaffolding construction or materials
- report non-routine hazards to a supervisor.

Reading skills to:

- interpret safe work methods and risk control strategies in the SWMS relating to job tasks.

Planning and organising skills to:

- plan and schedule work in a logical sequence.

Initiative and enterprise

- identify standard controls for routine hazards.

skills to:

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Safe work method statement*** must include:

- establishing exclusion areas using signage and barricades
- identifying hazards and assessing risks associated with work site and job tasks
- health and safety and environmental requirements mandated by regulatory authorities, work site safety plan, and workplace procedures
- identifying risk control measures to be implemented for job tasks
- safe operating procedures for:
  - accessing, moving within, and leaving work site
  - moving and placing tools, equipment and materials
- using tools and equipment, including PPE, prescribed by legislation, regulations, and work site and workplace requirements
- using tools and equipment at heights.

***Hazards*** to be considered must involve:

- air temperature
- construction activity involving other workers and contractors
- dust and vapours
- electrical equipment
- energy sources
- equipment and materials
- hazardous materials
- light
- manual handling
- moisture
- noise
- stationary and moving plant
- working at heights.

***Safety of scaffolding***

- access gate

- must include checking for:
- bracing
  - condition of scaffold frame and planks
  - guard rails
  - locking pins for castors, if present
  - mid-rails
  - sheeting, if required
  - toe boards.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPCCCM2010 Work safely on scaffolding higher than two metres

## Modification History

Release 1.

This version first released with CPC Construction, Plumbing and Services Training Package Version 2.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must also identify, assess and manage risks while completing three different work tasks on scaffolding higher than two metres at different locations and in different conditions.

The work tasks conducted must involve transporting tools, equipment and materials to the work site; completing the task using the tools, equipment and materials; and then returning them to ground level.

In doing the above work, the person must:

- locate, interpret and apply relevant job task information, standards and specifications
- comply with site safety plan and safe work method statements (SWMS) for access to the work site and completion of the job tasks at heights
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- select and use height access work methods, including inspecting scaffold for faults
- apply knowledge of construction materials to identify:
  - manual handling risks
  - types of lifting and support structures approved for use
- modify work activities to cater for variations in work site procedures, contexts and environment to work safely at heights
- use safe handling requirements, based on information provided for equipment, products and materials.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- construction terminology relevant to working at heights

- contents of and terms used in job safety analyses (JSA) and SWMS for accessing work sites at heights and for completing job tasks while working at heights
- contents of and terms used in safety data sheets (SDS) relevant to the use of tools, equipment and materials
- emergency procedures relevant to working on scaffolding higher than two metres
- quality requirements relating to the set-up of equipment for accessing heights, and for job tasks completed while working at heights
- requirements of Australian standards and codes of practice governing work at heights, including:
  - AS 6001 Working platforms for housing construction
  - AS/NZS 1576 Scaffolding – General requirements
  - AS/NZS 4576 Guidelines for scaffolding
  - Safe Work Australia Model Code of Practice – Preventing Falls in Housing Construction
- types, characteristics, uses and limitations of plant, tools and equipment, including personal protective equipment (PPE), used for accessing work sites over two metres, and for applying safe work methods to complete job tasks while working at heights
- common faults in scaffolding and access equipment
- workplace and work site health and safety requirements relevant to working at heights.

## Assessment Conditions

Suitable assessment of performance requires:

- equipment:
  - scaffolding erected for access to a construction work site higher than two metres
  - access equipment to move self, tools, equipment and materials to working platforms, including ladders and hoists
  - tools, equipment and materials to conduct the work tasks specified in the performance evidence
  - PPE relevant to task
- materials:
  - materials required to perform three work tasks at height
- contingencies:
  - faults in scaffolding construction and access equipment
- specifications:
  - AS 6001 Working platforms for housing construction
  - AS/NZS 1576 Scaffolding – General requirements
  - AS/NZS 4576 Guidelines for scaffolding
  - diagrams or sketches relating to work at heights
  - instructions issued by authorised organisational or external personnel
  - JSA, SWMS and SDS relating to the work to be conducted at heights

- Safe Work Australia Model Code of Practice – Preventing Falls in Housing Construction
- schedules, plans and specifications for working at heights
- signage at the work site
- verbal, written and graphical instructions relating to work to be conducted at heights
- physical conditions:
  - different weather conditions, such as wet or windy weather
- relationships with team members and supervisor:
  - work must be completed as part of a team and under direct supervision and observation
- timeframe:
  - according to job specification.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPCCCM2012 Work safely at heights

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCM2010B Work safely at heights.  
Updated to meet the Standards for Training Packages 2012.

## Application

This unit specifies the skills and knowledge required to work safely on construction sites where the worker has the potential to fall from one level to another.

This unit of competency does not cover the erection of scaffold or work platforms, but it does include identifying and reporting common faults with scaffold or work platform systems.

Work at heights is undertaken in a range of construction work, including new construction, renovation, refurbishment and maintenance.

This unit also applies to workers in other industries who need to control the two separate risks associated with people and objects falling from heights.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

Licensing, legislative, regulatory or certification requirements apply to this unit of competency in some states and territories. For further information, check with the relevant regulatory authority.

## Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

## Unit Sector

Construction

## Elements and Performance Criteria

Elements describe the            Performance criteria describe what needs to be done to

- essential outcomes. demonstrate achievement of the element.
- 1 Identify task requirements.
    - 1.1 Read work order and associated drawings and consult with relevant persons to determine the proposed work-at-heights task, including where and how work is to be carried out, and the equipment or plant to be used.
    - 1.2 Participate in the development of the safe work method statement (SWMS) for the specified task.
    - 1.3 Select appropriate work-at-heights control measures including required fall restraint devices and/or fall arrest devices in accordance with workplace and regulatory requirements.
    - 1.4 Determine location of anchor points for harness-based work to safely access required work area.
    - 1.5 Review completed SWMS and clarify issues with relevant persons.
  - 2 Access and assess work area.
    - 2.1 Select personal protective equipment (PPE), check for serviceability and report problems.
    - 2.2 Identify unstable, fragile or brittle work surfaces and implement control measures to prevent a fall from height.
    - 2.3 Check fall protection equipment, including required fall restraint and fall arrest devices to ensure serviceability and report problems.
    - 2.4 Identify, select and install signage and barricade equipment in accordance with SWMS or relevant safe work procedure.
    - 2.5 Install/fit fall protection equipment, including fall restraint devices and fall arrest devices as appropriate, within the limitations of licensing requirements, level of authority and SWMS.
    - 2.6 Ensure required fall protection, scaffold and barriers have been adequately installed and where necessary certified, in accordance with regulatory and workplace requirements.
    - 2.7 Connect to fall protection equipment, including temporary anchor points, without being exposed to a risk

- of a fall from height.
- 2.8 Consult with relevant persons to confirm fall protection equipment and safety systems are correctly fitted, adjusted and installed, and are appropriate to the task.
  - 2.9 Access work area safely and move and place tools, equipment and materials using methods that eliminate or minimise the risk of falling objects.
- 3 Conduct work tasks.
- 3.1 Undertake work tasks in compliance with the SWMS and workplace requirements.
  - 3.2 Traverse between anchor points while remaining connected to the fall prevention system and protected from a risk of a fall from height.
  - 3.3 Use PPE appropriate to the task and in accordance with manufacturer requirements.
  - 3.4 Maintain communication with relevant persons while working at height.
  - 3.5 Keep fall protection equipment in place and adjust to allow for movement during work.
  - 3.6 Keep fall prevention equipment adjusted to prevent falling off or through a structure using the restraint technique.
  - 3.7 Keep scaffold/work platform components and fall barriers in place during work.
  - 3.8 Monitor control measures and consult with relevant persons to respond to changing work practices or site conditions.
  - 3.9 Exit from work area removing tools and materials in compliance with worksite procedures, safety and environmental requirements.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Unit Mapping Information**

Supersedes and is equivalent to CPCCCM2010B Work safely at heights.

## **Links**

Companion volumes to this training package are available at the VETNet website -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCCCM2012 Work safely at heights

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCM2010B Work safely at heights.  
Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency in this unit, a candidate must meet the elements and performance criteria by working safely at heights above 2 m on three occasions, using different fall protection equipment/devices on each occasion.

One occasion must include a restraint technique (anchor point) system with a minimum of three anchor points.

The candidate must access the work area, traverse between anchor points and exit from the work area.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace and regulatory requirements for working safely at heights under applicable Commonwealth, state or territory work health and safety (WHS) legislation, Australian Standards and codes of practice:
  - hazard identification and risk control
  - job safety and environmental analyses (JSEAs)
  - safe work method statements (SWMSs)
  - safety data sheets (SDSs)
  - safety manuals and instructions for plant, tools and equipment:
    - operation manuals
    - manufacturer specifications
    - safety signs and load charts for plant
  - signage and barricades
  - selection, fitting and use of personal protective equipment (PPE)
  - environmental and worksite safety plans
  - reporting problems
- processes for planning to work safely at heights:

- assessment of weather and ground conditions that may affect safety while working at heights
- assessment of conditions and hazards
- determination of work requirements
- identification of equipment defects
- inspection of worksites
- methods for identifying common faults with scaffold or work platform systems
- types, characteristics, uses and limitations of equipment used when working safely at heights:
  - air compressors and hoses
  - anchor points
  - edge protection
  - elevated work platforms (EWPs)
  - fall arrest anchors
  - fall arrest inertia reels
  - guard rails
  - hand and power tools including nail guns
  - ladders
  - power leads
  - rescue equipment
  - ropes
  - safety harnesses, lanyards and attachments such as snap hooks and carabiners
  - scaffolding
  - shock absorbers
  - stairways
  - static line systems
  - temporary anchor systems
  - trestles
- safe methods for accessing work area, traversing between anchor points and exiting from work area including removing tools and materials when working at heights.
- 

## Assessment Conditions

Assessors must meet the requirements for assessors outlined in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- industry-standard equipment required to perform the tasks specified in the Performance Evidence
- appropriate workplace information and records, including policies, procedures and legislative requirements.

## **Links**

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPCCCM3001 Operate elevated work platforms up to 11 metres

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 8.0.

Changes to the Performance Evidence.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Version 2.

Revised unit of competency. Replaces superseded equivalent CPCCCM3001C Operate elevated work platforms.

## Application

This unit of competency specifies the outcomes required to operate specific types of elevated work platforms (EWPs) safely and effectively in different locations, including on uneven terrain. The unit includes locating, setting up, operating and shutting down scissor lifts and self-propelled boom lifts with a boom length under 11 metres.

The unit supports construction workers in the safe and effective operation of electrical, hydraulic and mechanical EWPs.

The unit does not cover truck-mounted EWPs, powered telescoping devices, hinged devices or articulated devices, or any combination of these used to support a platform on which personnel, equipment and materials may be elevated to perform work and which has a boom length of 11 metres or more.

It applies to construction work on residential and commercial work sites in new construction, renovation or refurbishment, and maintenance projects.

Licensing, legislative, regulatory or certification requirements apply to this unit in some States. Relevant state and territory regulatory authorities should be consulted to confirm those requirements.

## Pre-requisite Unit

Nil

## Competency Field

Common

## Unit Sector

Construction

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

1. Plan and prepare.
  - 1.1. Job requirements are obtained, confirmed and applied to planning.
  - 1.2. Work site is inspected and terrain level checked to determine stabilising and safe working area requirements.
  - 1.3. Work site conditions and hazards are assessed and site health and safety requirements confirmed and applied to planning.
  - 1.4. ***Safe work method statement*** (SWMS) for the type of EWP and job and work site requirements is reviewed with relevant personnel and confirmed.
  - 1.5. Plant, tools and equipment, including personal protective equipment (PPE), are selected according to job requirements, checked for serviceability, and faults are rectified or reported before starting work.
  - 1.6. Materials appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use.
  - 1.7. Verbal and non-verbal communication signals are confirmed with team members, supervisor, and other personnel working on site, as required.
  - 1.8. Rescue plan, including use of fall arrest system, is established and practised before using EWP.

2. Conduct routine checks of EWP.
  - 2.1. Power source is connected to platform equipment according to manufacturer specifications.
  - 2.2. Routine pre-operational equipment checks are carried out according to operator manual or manufacturer specifications, and logbooks for defect checks and EWP maintenance schedules.
  - 2.3. Equipment is switched on in line with start-up procedures, and controls are checked for correct operation and ease of movement.
  - 2.4. EWP is checked to ensure that *emergency safety devices* specified in operator manual are present and operating correctly.
3. Locate EWP in place.
  - 3.1. Platform is positioned for work application and stabilisers, if fitted, are engaged to set equipment base level into place according to safe operating procedures.
  - 3.2. Tools, equipment and materials are placed into bucket or on platform according to job application requirements.
4. Elevate platform to work location.
  - 4.1. Fall arrest harness is fitted securely and lanyard is connected to attachment point.
  - 4.2. EWP controls are operated according to manufacturer recommendations and platform is elevated to work position.
  - 4.3. Power is switched off where specified and locking devices are engaged according to operator manual.
  - 4.4. Work is carried out according to job specification, operator manual, and health and safety requirements.
5. Lower platform and shut down.
  - 5.1. Controls are operated according to manufacturer recommendations and platform is lowered to down position.

- 5.2. Shut-down procedures are carried out according to operator manual instructions and equipment is switched off.
6. Clean up.
- 6.1. Work area is cleared and materials disposed of, reused or recycled according to legislation, regulations, codes of practice, and job specifications.
- 6.2. EWP, tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations and standard work practices.
- 6.3. **Work completion procedures** are applied and relevant personnel notified that work is finished.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret safe working load of EWP from manufacturer specifications</li> <li>• calculate the load to be put on EWP.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• provide work site personnel with key safety information when elevating and lowering an EWP</li> <li>• use listening and questioning to clarify job and health and safety requirements.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret operator manual instructions for using different controls of EWPs and operating on different types of terrain.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• legibly complete required documentation, including:           <ul style="list-style-type: none"> <li>• equipment inspection and handover documents that form part of work completion procedures</li> <li>• faulty equipment or workplace incident reports.</li> </ul> </li> </ul>

Planning and organising skills to:

- plan and schedule work in a logical sequence.

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Safe work method statement*** must include:

- assessing terrain at work site
- identifying location of overhead power lines directly above or within specified clearance distances as set out in documentation, such as WorkSafe Victoria's 'No Go Zones For Overhead Electrical Power Lines'
- reference to permission to operate EWP from the power authority, if required
- identifying hazards and assessing risks for type of EWP, work site and job tasks, including existence of underground pits
- health and safety and environmental requirements mandated by regulatory authorities, work site safety plan, and workplace procedures
- establishing exclusion areas using signage and barricades
- identifying risk control measures to be implemented for job tasks
- safe operating procedures for type of EWP
- safe working load of the EWP
- using tools and equipment, including PPE, prescribed by legislation, regulations, and work site and workplace requirements.

***Emergency safety devices*** must be applicable to the EWP and include three or more of the following:

- bleed valves
- electronic override
- emergency electric hydraulic pump
- emergency or controlled descent device
- ground controls
- manual hydraulic pump.

***Work completion procedures*** must include:

- completing logbook
- completing post-operational checks
- safely and securely storing safety equipment.

## Unit Mapping Information

CPCCCM3001C Operate elevated work platforms

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCCCM3001 Operate elevated work platforms up to 11 metres

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 8.0.

Changes to the Performance Evidence.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Version 2.

Revised unit of competency. Replaces superseded equivalent CPCCCM3001C Operate elevated work platforms.

## Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. The person must also set up and operate each of the following types of elevated work platforms (EWPs) at two different locations on the site, including moving the plant around the work site safely:

- self-propelled boom lift (BL)
- scissor lift (SL).

The following functions and controls must be performed while operating both BL and SL:

- boom up and down
- operate attachments
- operate outriggers, where fitted.

The following functions and controls must be performed while operating the BL:

- slew left and right
- telescope in and out.

At least one EWP must be set up and operated on uneven terrain, using outriggers as required.

In doing the above, the person must fit harnesses and attach lanyards as follows:

- energy or shock absorbers, which must be used with all fall arrest equipment

- lanyards, which must be attached to the harness installed so that the maximum distance a person equipped with a harness would free fall before the fall arrest system takes effect is two metres.

In doing the above, the person must also:

- establish and apply a rescue plan
- apply safe operating procedures, including conducting operational risk assessment and treatments associated with:
  - earth leakage boxes
  - lighting
  - power cables, including overhead service trays, cables and conduits
  - restricted access barriers
  - surrounding structures
  - traffic control
  - trip hazards
  - work site visitors and the public
  - working at heights up to 11 metres
  - working in proximity to others
  - working with dangerous materials
- locate, interpret and apply information relating to job requirements, including:
  - diagrams and sketches
  - environmental requirements, including:
    - clean-up protection
    - noise and dust management
    - vibration management
    - waste management
  - quality requirements relevant to EWP work
  - instructions issued by authorised organisational and external personnel
  - manufacturer specifications, operator manual, and instructions where specified
  - signage
  - industry standards and job specifications
  - verbal, written and graphical instructions
  - work schedules, plans and specifications
- comply with site safety plan and health and safety legislation, regulations and codes of practice applicable to workplace operations
- safely and effectively use tools, plant and equipment relevant to EWP work
- ensure safe working load of EWP is not exceeded
- communicate with others on the work site using verbal and non-verbal communication and communication technology
- work effectively and safely with others on the work site.

## Knowledge Evidence

A person demonstrating competency in this unit must demonstrate knowledge of:

- functions and operational limitations of EWP equipment
- types of EWP equipment and health and safety authority certification of competency requirements
- controls and techniques for using EWP
- health and safety requirements for construction work sites, including:
  - procedures relating to equipment operation, including emergency shutdown and stopping, extinguishing equipment fires, organisational first aid requirements, and evacuation procedures
  - hazard identification and risk control procedures, including for handling hazardous materials and dangerous goods
  - selection and use of personal protective equipment (PPE)
  - location and use of firefighting equipment
  - selection and use of tools and equipment
- processes for identifying equipment faults
- general construction terminology relevant to operating EWPs
- safe operating procedures for operating EWPs, including contents of and terms used in:
  - job safety analyses (JSA)
  - safe work method statements (SWMS)
  - safety data sheets (SDS)
- processes for calculating load mass requirements
- quality requirements relevant to operating EWPs
- regulatory and legislative requirements relevant to operating EWPs
- AS 2550 Set: Cranes, hoists and winches - Safe use
- relevant Acts, regulations and codes of practice relevant to working safely at heights on construction sites
- procedures for working safely at heights
- signalling methods and communications relevant to operating EWPs
- types, characteristics, use and limitations of plant, tools and equipment relevant to operating EWPs
- use and limitations of fall rescue systems.

## Assessment Conditions

Suitable assessment of performance requires:

- equipment:
  - EWPs
  - extension leads
  - safety harnesses and lanyards
  - special attachments for the EWP when shifting equipment

- PPE prescribed under legislation, regulations, codes of practice and workplace policies and practices
- materials:
  - logbooks
  - service manuals
  - operator manuals
- contingencies:
  - uneven terrain
- specifications:
  - AS 2550 Set: Cranes, hoists and winches - Safe use
  - job specifications
  - manufacturer specifications
  - SWMS
- physical conditions:
  - different weather conditions
- relationship with team members and supervisor:
  - work is conducted as part of a team
- timeframe:
  - according to job requirements.

### **Assessor requirements**

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

### **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPCCCO2013 Carry out concreting to simple forms

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Knowledge Evidence formatted for clarity.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCO2013A Carry out concreting to simple forms. Updated to meet the Standards for Training Packages.

## Application

This unit of competency specifies the skills and knowledge required to safely install formwork, reinforcement and place and finish concrete for the construction of minor slabs, pathways and other minor works to a specified design finish, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

## Unit Sector

Concreting

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |                                |   |
|--------------------------------|---|
| 1 Plan and prepare.            | 1.1 Read and interpret work instructions and plan sequence of work.   |
|                                | 1.2 Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications. |
|                                | 1.3 Select tools and equipment, check for serviceability and report any faults.   |
|                                | 1.4 Select and use personal protective equipment (PPE) for each part of the task.   |
|                                | 1.5 Inspect work site, locate services, assess hazards and apply risk controls, including required signage and barricades.  |
|                                | 1.6 Select materials required for task, calculate quantities, handle safely and prepare and position ready for use.   |
| 2 Erect simple formwork.       | 2.1 Prepare substrate.  |
|                                | 2.2 Review formwork design from drawings.   |
|                                | 2.3 Erect formwork.   |
|                                | 2.4 Install vapour barrier.   |
| 3 Place and tie reinforcement. | 3.1 Handle, cut and position reinforcing components.  |
|                                | 3.2 Position reinforcing bars and mesh.   |
|                                | 3.3 Position bar chairs and spacers with minimum edge cover.  |
| 4 Place concrete.              | 4.1 Clean formwork or excavation of excess material and   |

- debris before concrete placement.
- 4.2 Transport concrete by wheelbarrow.
  - 4.3 Place concrete in formwork to specified depth.
  - 4.4 Screed concrete to the alignment of formwork and specified datums.
  - 4.5 Finish surface of concrete to specifications.
- 5 Strip simple formwork.
- 5.1 Denail timber components following stripping of formwork.
  - 5.2 Clean and stack components and store for reuse or bundle for removal.
  - 5.3 Remove formwork components from site.
- 6 Clean up.
- 6.1 Clean up, meeting all legislative and workplace requirements for safety, waste disposal, materials handling and protection of the environment.
  - 6.2 Check, maintain and store tools and equipment and report any faults.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to CPCCCO2013A Carry out concreting to simple forms.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCCCO2013 Carry out concreting to simple forms

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Knowledge Evidence formatted for clarity.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCCO2013A Carry out concreting to simple forms. Updated to meet the Standards for Training Packages.

## Performance Evidence

To demonstrate competency, a candidate must satisfy all the elements, performance criteria and foundation skills of this unit by carrying out concreting to a simple form slab of at least 1 square metre and 100 mm in depth by:

- preparing substrate
- erecting formwork
- cutting, placing and tying reinforcement
- placing and hand-screeding concrete to the required finished level and job specification.

All work must be planned and performed using appropriate tools and equipment to the standard required in the workplace and must comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards relevant to concreting to simple forms
- workplace quality policies and standards relevant to concreting to simple forms
- safety requirements for concreting to simple forms
- types and uses of tools and equipment required for concreting to simple forms
- uses of concreting materials, including:
  - bar chairs
  - bracing

- edge form and boards
- fabric sheet mesh
- pegs
- spacers
- reinforcing bars
- vapour barriers
- concreting techniques, including:
  - placing
  - screeding
  - finishing
  - floating
- simple forms of concrete, including:
  - beam thickeners
  - channels
  - garden edges
  - pathways
  - post holes
  - simple concrete aprons and slabs
- finishing, including:
  - broomed
  - trowelled
  - trowelling machine finish
  - wood-floated
- properties and use of concrete relevant to concreting to simple forms, including:
  - uses and limitations at differing strength levels
  - ingredients and proportions
  - maintaining design strength during placement
  - mixing techniques
  - curing techniques
  - vibrating and over-vibration
- levelling techniques for concreting to simple forms
- materials storage and environmentally friendly waste management
- plans, drawings and specifications for concreting to simple forms
- processes for the calculation of material requirements for concreting to simple forms, including volume of concrete
- quality requirements for concreting to simple forms
- simple formwork and reinforcing componentry.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPCCJN3003 Manufacture components for doors, windows and frames

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Performance Evidence formatted for clarity.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCJN3003A Manufacture components for doors, windows and frames. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to manufacture components for doors, windows and frames, meeting all relevant requirements of the National Construction Code (NCC), Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

## Unit Sector

Carpentry and Joinery

## Elements and Performance Criteria

Elements describe the Performance criteria describe what needs to be done to

- essential outcomes. demonstrate achievement of the element.
- 1 Plan and prepare.
    - 1.1 Read and interpret work instructions and plan sequence of work.
    - 1.2 Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.
    - 1.3 Select tools and equipment, check for serviceability and report any faults.
    - 1.4 Select and use personal protective equipment (PPE) for each part of the task.
    - 1.5 Inspect workplace, assess hazards and apply risk controls, including required signage and barricades.
    - 1.6 Select materials required for task, calculate quantities, handle safely and prepare and position ready for use.
  - 2 Dress materials.
    - 2.1 Check machines and cutting tools for safe and effective operation.
    - 2.2 Adjust machine settings for task requirements.
    - 2.3 Position and cut material, check for quality and rectify faults.
  - 3 Shape materials.
    - 3.1 Check spindles, cutting tools and jigs for safe and effective operation.
    - 3.2 Adjust spindle machine settings for task requirements.
    - 3.3 Feed material into machine and operate machine to shape material.
  - 4 Join materials and produce components.
    - 4.1 Set out materials for joining.
    - 4.2 Check joining machines, cutting tools and jigs for safe and effective operation.

- 4.3 Adjust joining machine settings for task requirements.
  - 4.4 Operate machine to produce joints.
- 5 Finish components and prepare for assembly.
- 5.1 Check finishing and sanding machines for safe and effective operation and adjust for task requirements.
  - 5.2 Dry-assemble components, check for quality and consistency, and rectify faults.
  - 5.3 Sand and finish components, check for quality and consistency, and rectify faults.
- 6 Clean up.
- 6.1 Clean up, meeting all legislative and workplace requirements for safety, waste disposal and materials handling.
  - 6.2 Clean, check, maintain and store machines, tools and equipment and report any faults.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to CPCJN3003A Manufacture components for doors, windows and frames.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCCJN3003 Manufacture components for doors, windows and frames

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Performance Evidence formatted for clarity.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and is equivalent to CPCCJN3003A Manufacture components for doors, windows and frames. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by machining, dry-assembling and finishing components for:

- a four-panelled door and door frame
- a four-light operable sash and frame.

In performing these tasks, the candidate must:

- prepare and assemble the following components:
  - door stops
  - jambs
  - mullion
  - panels
  - sills/threshold
  - styles
  - top, bottom and mid rail
  - glazing bars
- use the following machines:
  - band saws
  - docking saws
  - rip saws
  - panel saw
  - planing machines:
    - surface planer

- thicknesser
- shaping machines
- joining machines:
  - mortising
  - tenoning
- sanding machines:
  - finisher
  - wide belt/stroke.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code (NCC) and Australian Standards relevant to manufacturing door and window components
- workplace quality policies and standards relevant to manufacturing door and window components
- safety requirements for manufacturing door and window components
- processes and techniques used to manufacture door and window components, including to:
  - set out door and window components:
    - door stops
    - jambs
    - mullion
    - panels
    - sills/threshold
    - styles
    - top, bottom and mid rail
    - glazing bars
  - produce cutting lists
- material identification marking systems used when manufacturing door and window components
- properties, performance and limitations of different types of timber available for manufacturing doors and window components:
  - plastic covered timber-cored material
  - raw timber
- range, type and characteristics of materials used to manufacture door and window components
- types and uses of machines, tools and equipment required to manufacture door and window components:
  - band saws
  - docking saws

- rip saws
- panel saw
- planing machines:
  - surface planer
  - thicknesser
- shaping machines
- multi-head moulding machines
- joining machines:
  - mortising
  - tenoning
  - horizontal borer
- sanding machines:
  - disk sander
  - finisher
  - wide belt/stroke
- processes for operating machines:
  - setting up processes
  - safety checking, fault finding and rectification
  - monitoring machine processes
  - cleaning and maintaining machines in accordance with manufacturers' specifications.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation reflecting workplace conditions and standards, materials, equipment, activities, responsibilities, procedures, safety requirements and environmental considerations.

## Links

Companion volumes to this training package are available at the VETNet website -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPCCPB3004 Fix wet area sheets

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and equivalent to CPCCPB3004A Fix wet area sheets. Updated to meet the Standards for Training Packages 2012.

## Application

This unit of competency specifies the skills and knowledge required to fix wet area sheets to comply with manufacturer and job specifications.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

## Unit Sector

Plasterboard

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |                     |   |
|---------------------|---|
| 1 Plan and prepare. | 1.1 Read and interpret work instructions and plan sequence of work.                                     |
|                     | 1.2 Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian |

- Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, and workplace requirements.
- 1.3 Select and use personal protective equipment (PPE) for each stage of the task.
  - 1.4 Inspect work site, assess hazards and apply risk controls, including required signage and barricades.
  - 1.5 Select tools and equipment, check for serviceability and report any faults that may affect the safe operation of the equipment, tag equipment and set aside.
  - 1.6 Select materials required for task, calculate quantities, handle safely and prepare and position ready for use.
- 2 Plan and cut wet area sheets.
- 2.1 Determine work sequences, fixing processes from manufacturers' specifications and AS/NZS2589 Gypsum linings - application and finishing.
  - 2.2 Match sheet size to wall dimensions.
  - 2.3 Plan cutting process to minimise dust exposure for others.
  - 2.4 Follow manufacturers' specifications for cutting process and provision for penetrations.
  - 2.5 Cut sheets to minimise waste and number of joints and maximise board use.
- 3 Fix wet area sheets.
- 3.1 Hang and fix sheets using manual handling techniques and following manufacturer's specifications, ensuring the sheets have appropriate gap from the floor and flashing are installed to specification.
  - 3.2 Check completed work to ensure stop-up activities can be easily completed.
- 4 Clean up.
- 4.1 Clear work area and dispose of, reuse or recycle materials.
  - 4.2 Clean, check, maintain and store tools and equipment in

accordance with manufacturers' specifications

## **Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Unit Mapping Information**

Supersedes and equivalent to CPCCPB3004A Fix wet area sheets

## **Links**

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCCPB3004 Fix wet area sheets

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and equivalent to CPCCPB3004A Fix wet area sheets. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must satisfy all of the elements, performance criteria and foundation skills of this unit by hanging and fixing 15 square metres of wet area sheets.

All work must be performed to the standard required in the workplace and must comply with Commonwealth and state/territory laws and regulations, the National Construction Code, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, and workplace requirements.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards for fixing wet area sheets, including AS/NZS2589 Gypsum linings - application and finishing
- quality policies and standards for fixing wet area sheets
- requirements for wet areas that will be tiled, and for wet areas that will be non-tiled
- safety requirements for fixing wet area sheets, including personal protective equipment (PPE), job safety analyses, safe work method statements and safety data sheets
- processes for safe handling and lifting of wet area sheets
- environmental requirements for fixing wet area sheets
- manufacturers' specifications for fixing wet area sheets
- types and uses of adhesives and fasteners for fixing wet area plasterboard sheets
- wet area plasterboard materials
- installing flashings to specification
- materials storage and environmentally friendly waste management
- plans, drawings and specifications for fixing wet area plasterboard sheets
- plasterboard fixing techniques for wet area plasterboard sheets
- processes for the calculation of material requirements for fixing wet area plasterboard sheets
- types of tools and equipment for fixing wet area plasterboard sheets.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed:

- in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques replicate construction workplace conditions, materials, activities, responsibilities and procedures
- using realistic tasks or simulated tasks, relevant specifications and work instructions, standard work practices, safety requirements and environmental constraints.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

## CPCCSH2003A Apply and install sealant and sealant devices

### Modification History

Not Applicable

### Unit Descriptor

**Unit descriptor** This unit specifies the outcomes required to apply sealants and sealant devices to structures.

### Application of the Unit

**Application of the unit** This unit of competency supports the achievement of skills and knowledge to apply and install sealant and sealant devices, which may include working with others and as a member of a team.

### Licensing/Regulatory Information

Not Applicable

### Pre-Requisites

#### Prerequisite units

CPCCOHS2001A	Apply OHS requirements, policies and procedures in the construction industry
--------------	--

### Employability Skills Information

**Employability skills** This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	<p>1.1. Work instructions and operational details are obtained using relevant <i>information</i>, confirmed and applied for <i>planning and preparation</i> purposes.</p> <p>1.2. <i>Safety (OHS)</i> requirements are followed in accordance with safety plans and policies.</p> <p>1.3. Signage and barricade requirements are identified and implemented.</p> <p>1.4. <i>Tools and equipment</i> selected to carry out tasks are consistent with job requirements, checked for serviceability and any faults are rectified or reported prior to commencement.</p> <p>1.5. Sealant material quantity requirements are calculated in accordance with plans, specifications and <i>quality requirements</i>.</p> <p>1.6. Materials appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use.</p> <p>1.7. <i>Environmental requirements</i> are identified for the project in accordance with environmental plans and <i>statutory and regulatory authority</i> requirements, and are applied.</p>
2. Prepare surface to receive sealants.	<p>2.1. Surface is cleaned free of contaminants such as oil, grease, dust or moisture.</p> <p>2.2. Surface is prepared by sanding and/or cleaning in accordance with preparation specifications.</p>
3. Apply sealant.	<p>3.1. <i>Sealant materials</i> are <i>applied</i> to manufacturer recommendations and specifications.</p> <p>3.2. Care is taken to ensure no air is trapped within</p>

ELEMENT	PERFORMANCE CRITERIA
	applied sealant.
	3.3.Surfaces are aligned and fixings correctly installed to specifications.
4. Install sealant devices.	4.1. <i>Sealant devices</i> are fitted securely to specified positions.
	4.2.Assistance is provided to secure installation of fixtures, assuring level and plumb to line.
5. Clean up.	5.1.Excessive sealant is removed from joints and surrounding surfaces, and cartridge nozzle or container is sealed securely.
	5.2.Sealants are promptly removed from tools and equipment.
	5.3.Work area is cleared and <i>waste material and debris</i> are disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specifications.
	5.4.Tools and equipment are cleaned, routinely maintained and returned to store.

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Required skills for this unit are:

- ability to recognise procedures, respond to change and contribute to workplace responsibilities, such as current work site environmental sustainability frameworks or management systems
- communication skills to:
  - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
  - follow instructions
  - use and interpret non-verbal communication
  - use language and concepts appropriate to cultural differences
- innovation skills to select appropriate tools and equipment, respond to workplace challenges and put ideas into action

## REQUIRED SKILLS AND KNOWLEDGE

- numeracy skills to apply measurements and calculations relevant to surface areas
- problem solving skills to recognise and take action to rectify minor faults and problems
- teamwork skills to be able to work with others to action tasks and relate to people from a range of cultural, social, ethnic backgrounds and with varying physical and mental abilities.

### Required knowledge

Required knowledge for this unit is:

- AS1940 The storage and handling of flammable combustible liquids
- behaviour of sealant materials used in structures
- job safety analysis (JSA) and safe work method statements
- measurement and calculation techniques relevant to surface areas
- safe materials handling techniques and requirements, including hazardous materials relevant to sealant application work
- safe use of scaffolding and working platforms
- types and performance of sealants used in buildings
- types and use of hand tools and equipment relevant to sealant application and installation work
- workplace and equipment safety requirements.

## Evidence Guide

### EVIDENCE GUIDE

---

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

#### Critical aspects for assessment and evidence required to demonstrate competency in this

A person who demonstrates competency in this unit must be able to handle and use all the sealant materials and application devices listed in the

## EVIDENCE GUIDE

<p><b>unit</b></p>	<p>range statement, providing evidence of the ability to:</p> <ul style="list-style-type: none"> <li>• comply with OHS regulations and state and territory legislation applicable to workplace operations</li> <li>• comply with organisational policies and procedures, including quality assurance requirements</li> <li>• select and use appropriate processes, tools and equipment to carry out tasks</li> <li>• adopt and carry out correct procedures prior to and during handling and application of materials</li> <li>• demonstrate safe and effective operational use of tools and equipment</li> <li>• demonstrate safe application in the process of cleaning up application area and cleaning equipment</li> <li>• communicate with others to ensure safe and effective operations.</li> </ul>
<p><b>Context of and specific resources for assessment</b></p>	<p>This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.</p> <p>Assessment of essential underpinning knowledge will usually be conducted in an off-site context.</p> <p>Assessment is to comply with relevant regulatory or Australian standards' requirements.</p> <p>Resource implications for assessment include:</p> <ul style="list-style-type: none"> <li>• sealants and sealant devices appropriate to application tasks</li> <li>• plant and equipment appropriate to application processes</li> <li>• hand tools appropriate to application processes</li> <li>• work location appropriate to activity processes</li> <li>• MSDS information.</li> </ul> <p>Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.</p>

## EVIDENCE GUIDE

---

### Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm a reasonable inference that competency is not only verified under the particular assessment circumstance, but is able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should, as far as is practical, take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

## Range Statement

### RANGE STATEMENT

---

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

***Information*** includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions, where specified
- material safety data sheets (MSDS)
- memos
- regulatory and legislative requirements pertaining to application of sealants and sealant devices
- relevant Australian standards
- safe work procedures relating to application of sealants and sealant devices
- signage
- verbal, written and graphical instructions
- work bulletins
- work schedules, plans and specifications.
- assessment of conditions and hazards
- determination of work requirements and safety plans and policies
- equipment defect identification
- work site inspection.
- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling hazardous materials where applicable in accordance with AS1940 The storage and handling of flammable combustible liquids
- hazard control
- hazardous materials and substances
- organisational first aid

***Planning and preparation*** include:

***Safety (OHS)*** is to be in accordance with state and territory legislation and regulations and project safety plan and may include:

## RANGE STATEMENT

---

- PPE prescribed under legislation, regulations and workplace policies and practices
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
  - concealed services (water, power and gas)
  - lighting
  - restricted access barriers
  - traffic control
  - work site visitors and the public
  - working at heights
  - working in confined spaces
  - working in proximity to others
- use of firefighting equipment
- use of tools and equipment
- workplace environmental requirements and safety.

*Tools and equipment* include:

- brooms
- brushes
- cartridge applicators
- putty knives and paring knives
- rollers
- sanders
- spray equipment.

*Quality requirements* include:

- attention to job specifications
- control of handling procedures
- preparation of surfaces
- quality of materials
- relevant regulations, including:
  - Australian standards
  - internal company quality policy and standards
  - manufacturer specifications where specified
  - workplace operations and procedures
- use and maintenance of equipment.

*Environmental requirements* include:

- clean-up management
- dust and noise
- stormwater protection
- waste management.

## RANGE STATEMENT

---

<i>Statutory and regulatory authority</i> includes:	<ul style="list-style-type: none"> <li>• federal, state and local authorities administering applicable Acts, regulations and codes of practice.</li> </ul>
<i>Sealant materials</i> include:	<ul style="list-style-type: none"> <li>• bitumen</li> <li>• mastic</li> <li>• putty</li> <li>• silicone</li> <li>• waterproof paint.</li> </ul>
Sealant materials can be <i>applied</i> to:	<ul style="list-style-type: none"> <li>• acrylic sheeting</li> <li>• bricks and concrete masonry</li> <li>• concrete</li> <li>• glass</li> <li>• metal sheeting</li> <li>• paints</li> <li>• plaster sheeting</li> <li>• plywood and particle board</li> <li>• structural metallic sections and components</li> <li>• timber.</li> </ul>
<i>Sealant devices</i> include:	<ul style="list-style-type: none"> <li>• cover plates to aluminium framework</li> <li>• cover straps or beading to sheet jointing</li> <li>• flashings to window and door frames</li> <li>• impregnated material for masonry expansion joints</li> <li>• strip or sheet membrane.</li> </ul>
<i>Waste material and debris</i> include:	<ul style="list-style-type: none"> <li>• broken or damaged goods</li> <li>• cardboard</li> <li>• loose material</li> <li>• paper</li> <li>• plastic</li> <li>• sealants and sealing materials.</li> </ul>

# CPCCWC3004 Install suspended ceilings

## Modification History

Release 4 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.6.

Change to Knowledge Evidence.

Release 3 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.2.

Correction to prerequisite unit code from CPPWHS2001 Apply WHS requirements, policies and procedures in the construction industry to CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Updated to reflect current industry terminology, tools and equipment.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 2.0.

## Application

This unit of competency specifies the skills and knowledge required to install exposed and concealed suspended ceilings.

It includes setting out and installing ceiling suspension systems and installing lining material.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

CPCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

## Unit Sector

Construction

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |                              |  |
|------------------------------|--|
| 1 Plan and prepare.          | 1.1 Read and interpret work instructions and plan sequence of work.  |
|                              | 1.2 Plan all work to comply with laws and regulations, the National Construction Code (NCC), Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, and workplace requirements. |
|                              | 1.3 Select and use personal protective equipment (PPE) for each stage of the task.   |
|                              | 1.4 Inspect work site, assess hazards and apply risk controls, including required signage and barricades.  |
|                              | 1.5 Select tools and equipment, check for serviceability and report any faults that may affect the safe operation of the equipment, tag equipment and set aside.   |
|                              | 1.6 Select materials required for task, calculate quantities, handle safely and prepare and position ready for use.  |
| 2 Install suspension system. | 2.1 Set out ceiling grid and alignment levels for ceiling.   |
|                              | 2.2 Fix suspension rods to underside of soffit and structural members with masonry anchors, bolts and screws at prescribed centres.  |
|                              | 2.3 Assemble suspended framework and connect to suspension rods.   |
|                              | 2.4 Fasten suspension system, check for looseness and  |

- rattles, and secure as required.
- 2.5 Fix bridging framework to both sides of service ducts to support suspension system.
- 3 Install lining materials.
- 3.1 Install lining materials according to design pattern set out in job drawings.
- 3.2 Cut edges of lining materials and conceal to match pre-finished edges.
- 3.3 Provide openings and penetrations as shown in job drawings.
- 3.4 Fix trims and beads at junctions with other building elements and surfaces.
- 4 Clean up.
- 4.1 Clear work area and dispose of, reuse or recycle materials.
- 4.2 Clean, check, maintain and store tools and equipment in accordance with manufacturers' specifications.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and equivalent to CPCCWC3004A Install suspended ceilings

# Assessment Requirements for CPCCWC3004 Install suspended ceilings

## Modification History

Release 4 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.6.

Change to Knowledge Evidence.

Release 3 This version first released with CPC Construction, Plumbing and Services Training Package Release 6.2.

Correction to prerequisite unit code from CPPWHS2001 Apply WHS requirements, policies and procedures in the construction industry to CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry.

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Updated to reflect current industry terminology, tools and equipment.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 2.0.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by installing:

- one exposed suspended ceiling of minimum area of 10 square metres
- one concealed suspended ceiling of minimum area of 15 square metres.

Each of the suspended ceilings must include grid and support wires or rods, and a penetration to accommodate one or more of the following fittings:

- an air duct
- an exhaust system
- a support column or beam.

All work must be performed to the standard required in the workplace and must comply with Commonwealth and state/territory laws and regulations, national construction codes, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, and workplace requirements.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- compliance requirements of the National Construction Code and Australian Standards for installing suspended ceilings
- quality policies and standards for installing suspended ceilings
- safety requirements for installing suspended ceilings, including personal protective equipment (PPE), job safety analyses, safe work method statements and safety data sheets
- environmental requirements for installing suspended ceilings
- methods to mitigate risks of seismic movement when installing suspended ceilings
- processes for reading and interpreting plans, drawings and specifications used when installing suspended ceilings
- suspended ceiling installation techniques and processes, including:
  - alignment levelling
  - anchors and bolts
  - droppers and suspension rods
  - furring channels
  - main beams, rails and runners
  - spacer bars
  - tracks and main tracks
  - reinforced concrete ceiling and floor slabs
  - steel ceiling and rod framing
  - timber and steel floor
  - timber ceiling and rod framing
- suspended ceiling materials and their preparation and applications, including:
  - fibre cement sheeting
  - infill panels, including:
    - acoustic
    - decorative timber
    - metal
  - two-pack
  - insulation materials
  - plasterboard
  - suspended ceiling components
- techniques for calculating material requirements for installing suspended ceilings
- types of tools and equipment for installing suspended ceilings.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed:

- in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques replicate construction workplace conditions, materials, activities, responsibilities and procedures
- using realistic tasks or simulated tasks, relevant specifications and work instructions, standard work practices, safety requirements and environmental constraints.

## Links

Companion Volume implementation guides are found in VETNet -

# CPCCWHS1001 Prepare to work safely in the construction industry

## Modification History

Release    Comment

Version 1    Replaces superseded equivalent CPCCOHS1001A Work safely in the construction industry.

## Application

This unit of competency specifies the mandatory work health and safety training required prior to undertaking construction work. The unit requires the person to demonstrate personal awareness and knowledge of health and safety legislative requirements in order to work safely and prevent injury or harm to self and others. It covers identifying and orally reporting common construction hazards, understanding basic risk control measures, and identifying procedures for responding to potential incidents and emergencies. It also covers correctly selecting and fitting common personal protective equipment (PPE) used for construction work.

This unit meets the general construction induction training requirements of:

- Part 1.1 Definitions and Part 6.5 of the Model Work Health and Safety Regulations;
- Division 11 of Part 3 of the Occupational Safety and Health Regulations 1996 for Western Australia; and
- Division 3 of Part 5.1 of the Occupational Health and Safety Regulations 2007 for Victoria.

It is expected that site-specific induction training will be conducted prior to conducting construction work.

Licensing, legislative, regulatory or certification requirements apply to this unit. Relevant work health and safety state and territory regulatory authorities should be consulted to confirm jurisdictional requirements.

## Pre-requisite Unit

Nil

## Unit Sector

Construction

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.
1. Identify health and safety legislative requirements of construction work.	1.1. Basic roles, responsibilities and rights of duty holders are identified and explained according to <b><i>jurisdictional health and safety legislative requirements</i></b> . 1.2. Duty of care requirements are identified. 1.3. Construction safe work practices are identified and explained.
2. Identify construction hazards and risk control measures.	2.1. Basic principles of risk management are identified. 2.2. Construction hazards are identified and discussed. 2.3. Purpose and use of PPE are identified and demonstrated. 2.4. Measures for controlling hazards are identified.
3. Identify health and safety communication and reporting processes.	3.1. Health and safety documents are identified and discussed. 3.2. Roles of designated health and safety personnel are identified and explained. 3.3. Safety signs and symbols are identified and explained. 3.4. Procedures for reporting hazards, incidents and injuries are identified.
4. Identify incident and emergency response	4.1. Procedures for responding to incidents and emergencies are identified and explained. 4.2. Procedures for accessing first aid are identified.

procedures.

- 4.3. Types and purpose of fire safety equipment are identified and discussed.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

<b>Skill</b>	<b>Performance feature</b>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• locate and recognise numbers commonly used in safety signs.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• ask questions to clarify instructions</li> <li>• listen to instructions to identify key safety information</li> <li>• tell another person about a construction problem or hazard.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• follow simple pictorial safety instructions</li> <li>• follow simple safety instructions that are written in English.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>• select risk control measures.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<b><i>Jurisdictional health and safety legislative requirements</i></b> must include at least one of the following state and territory Acts or their equivalent:	<ul style="list-style-type: none"> <li>• Australian Capital Territory: Work Health and Safety Act 2011</li> <li>• New South Wales: Work Health and Safety Act 2011</li> <li>• Northern Territory: Work Health and Safety (National Uniform Legislation) Act 2011</li> <li>• Queensland: Work Health and Safety Act 2011</li> <li>• South Australia: Work Health and Safety Act 2012</li> <li>• Tasmania: Work Health and Safety Act 2012</li> <li>• Victoria: Occupational Health and Safety Act 2004</li> <li>• Western Australia: Occupational Safety and Health Act 1984.</li> </ul>
--	---

## Unit Mapping Information

Supersedes and is equivalent to CPCCOHS1001A Work safely in the construction industry

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CPCCWHS1001 Prepare to work safely in the construction industry

## Modification History

Release Comment

Version 1 Replaces superseded equivalent CPCCOHS1001A Work safely in the construction industry.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills, and range of conditions of this unit, in addition to the specific performance and knowledge evidence described below.

The person must:

- identify and orally report two construction hazards
- orally explain how risk could be reduced or removed in relation to those two hazards
- select appropriate personal protective equipment (PPE) to control the risk
- orally explain basic procedures for responding to incidents and emergencies, including types and purpose of the following fire safety equipment:
  - fire blankets
  - fire extinguishers, including water, carbon dioxide, powder and foam
  - hose reels and mains
- identify and orally explain the meaning of required safety signs and symbols
- orally explain the purpose of job safety analyses (JSAs), safe work method statements (SWMS) and safety data sheets (SDS)
- orally explain the roles of the following designated health and safety personnel:
  - first aid officers
  - work health and safety representatives
  - work health and safety committee members
  - supervisors.

The person must also demonstrate correctly fitting to themselves the PPE listed below:

- eye protection
- hearing protection
- hard hat

- high visibility retro reflective vest.

## Knowledge Evidence

A person must demonstrate knowledge of:

- basic duty of care, and the roles, rights and responsibilities of business owners and workers in relation to working safely while undertaking construction work
- basic meaning of the terms ‘hazard’ and ‘risk’
- basic principles of risk management, including the following five steps in order:
  - identify hazard
  - assess risk
  - consult and report
  - control hazard
  - review
- basic procedures for accessing first aid
- construction hazards, including those relating to:
  - asbestos
  - confined spaces
  - electrical: power lines, cords and equipment
  - excavations and trenches, including underground services
  - dust
  - falling objects
  - hazardous substances and dangerous goods
  - hot and cold work environments
  - manual handling
  - noise
  - plant and equipment operation
  - traffic and mobile plant
  - unplanned collapse
  - ultraviolet radiation
  - working at heights, including scaffolding
- construction work that requires a high risk work licence
- types, purpose and use of PPE used in construction, as specified in the performance evidence, and including safety footwear, harnesses and respiratory protection, and ultraviolet (UV) protective clothing and sunscreen
- construction emergencies, including:
  - chemical spill
  - fire
  - injury to personnel
  - structural collapse
  - toxic or flammable vapour emission

- vehicle or mobile plant accident
- construction incidents, including:
  - incidents resulting in personal injury or damage to property
  - near misses or dangerous occurrences that do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence
- safe work practices that should be followed in construction work, including:
  - accessing and using site amenities for drinking water, hand washing and toilets
  - following safety procedures when performing work tasks and using equipment
  - identifying and reporting hazards, incidents and injuries in the workplace
  - keeping the work area clean, tidy and free from debris
  - not using or being affected by drugs and/or alcohol while at work
  - preventing bullying and harassment in the workplace
  - selecting and using required PPE
  - smoking only in designated areas
  - storing and removing waste and debris in designated areas
- meanings and symbols associated with construction safety signs, symbols and tags, including:
  - emergency information signs: exits, emergency equipment and first aid
  - fire signs: location of fire alarms and firefighting equipment
  - hazard signs and symbols: danger and warning
  - regulatory signs and symbols: prohibition, mandatory and limitation or restriction
  - safety and lockout tags: danger and out-of-service tags.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - all of the PPE listed in the performance evidence
- specifications:
  - state or territory Act relevant to the location of the learner, as specified in the range of conditions.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically and/or by an assessor observing the learner via audio and visual media in real time.

## Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

Assessors must hold the unit *CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry*, or its successor.

## **Links**

Companion Volume implementation guides are found in VETNet -

# CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

## Modification History

Release 1.

Supersedes and equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

## Application

This unit specifies the outcomes required to carry out work health and safety (WHS) requirements through safe work practices in all on- or off-site construction workplaces.

It requires the performance of work in a safe manner through awareness of risks and work requirements, and the planning and performance of safe work practices with concern for personal safety and the safety of others.

The unit covers fundamental WHS requirements necessary to undertake work tasks within any sector in the construction industry. It includes the identification of hazardous materials, including asbestos, and compliance with legislated work safety practices. It does not cover removal of asbestos, which is a licensed activity.

It applies to workers in the construction industry.

This unit also relates directly to the general construction induction training requirements of the Model Work Health and Safety Regulations 2011 and relevant occupational health and safety regulations for Victoria and for Western Australia. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* covers these induction training requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Unit Sector

## Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Identify and assess risks.	<p>1.1 Identify, assess and report hazards in the work area to designated personnel.</p> <p>1.2 Report safety risks in the work area based on identified hazards, to designated personnel.</p> <p>1.3 Follow safe work practices, duty of care requirements and safe work instructions for controlling risks.</p> <p>1.4 Contribute to WHS, hazard, accident or incident reports in accordance with workplace procedures, Australian government and state or territory WHS legislation, and relevant information.</p>
2. Identify hazardous materials and other hazards on work sites.	<p>2.1 Correctly identify and, if appropriate, handle and use hazardous materials on a work site in accordance with legislative requirements, and workplace policies and procedures.</p> <p>2.2 Apply measures for controlling risks and construction hazards effectively and immediately.</p> <p>2.3 Use appropriate signs and symbols to secure hazardous materials that have safety implications for self and other workers, immediately they are identified.</p> <p>2.4 Identify asbestos-containing materials on a work site and report to designated personnel.</p>
3. Plan and prepare for safe work practices.	<p>3.1 Identify, wear, correctly fit, use and store correct personal protective equipment and clothing for each area of construction work in accordance with workplace procedures</p> <p>3.2 Select tools, equipment and materials, and organise tasks in conjunction with other personnel on site and in accordance with workplace procedures.</p> <p>3.3 Determine required barricades and signage, and erect at the appropriate site location.</p> <p>3.4 Apply material safety data sheets (MSDSs), job safety analyses (JSAs) and safe work method statements (SWMSs) relevant to the work to be performed.</p>
4. Apply safe work practices.	<p>4.1 Carry out tasks in a manner that is safe for operators, other personnel and the general community, in accordance with legislative requirements, and workplace policies and procedures.</p> <p>4.2 Use plant and equipment guards in accordance with manufacturers' specifications, work site regulations and Australian Standards.</p> <p>4.3 Follow procedures and report hazards, incidents and injuries</p>

	<p>to relevant authorities.</p> <p>4.4 Recognise and do not use prohibited tools and equipment in areas containing identified asbestos.</p> <p>4.5 Identify and follow requirements of work site safety signs and symbols.</p> <p>4.6 Clear and maintain work site area to prevent and protect self and others from incidents and accidents, and to meet environmental requirements.</p>
5. Follow emergency procedures.	<p>5.1 Identify designated personnel in the event of an emergency for communication purposes.</p> <p>5.2 Follow safe workplace procedures for dealing with accidents, fire and other emergencies, including identification and use, if appropriate, of fire equipment within scope of own responsibilities.</p> <p>5.3 Describe, practice and effectively carry out emergency response and evacuation procedures when required.</p> <p>5.4 Carry out emergency first aid treatment of minor injuries and, as soon as possible, accurately report treatment details to designated personnel.</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

## Modification History

Release 1.

Supersedes and equivalent to CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry.

The unit of competency was updated to the Standards for Training Packages 2012.

This version first released with CPC Construction, Plumbing and Services Training Package Version 4.0.

## Performance Evidence

To demonstrate competency in this unit, a person must apply WHS requirements, policies and procedures on three separate and different occasions in the construction industry.

In doing this, the person must meet the performance criteria for this unit.

## Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- jurisdictional work health and safety (WHS) and environmental legislation and regulations
- workplace requirements for undertaking all aspects of applying WHS requirements, policies and procedures in the construction industry including interpreting work orders and reporting problems
- procedures and policies for identifying and reporting hazards, safety risks and hazardous materials, including asbestos, in the workplace
- procedures for following safe practices when dealing with hazards and hazardous materials, and controlling risks associated with them
- use of appropriate protective equipment and clothing, choice of tools, use of barricades and signage, and the necessity of following relevant safety procedures as indicated
- methods of safely performing tasks in accordance with legislative requirements and workplace policies and procedures
- procedures for reporting hazards, incidents and injuries
- necessity for keeping work site clear of risks to prevent accidents and to meet environmental requirements
- policies and procedures to be followed in an accident, fire or other type of emergency.

## Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment of performance must be undertaken in the workplace or in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits expected in a workplace.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- appropriate documents, materials, tools, equipment and personal protective equipment currently used in industry
- requirements of appropriate sections of legislation and regulations
- relevant workplace policies and procedures.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPCCWP3002 Apply waterproofing process to internal wet areas

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Changes to Performance Evidence and Unit Sector.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and equivalent to CPCCWP3002A Apply waterproofing process to internal wet areas. Updated to meet the Standards for Training Packages 2012.

## Application

This unit specifies the skills and knowledge required to apply waterproofing to internal wet areas, meeting all relevant requirements of Australian Standards, work health and safety (WHS), and Commonwealth and state or territory legislation.

It includes identification of the appropriate waterproofing system to be used, its preparation and its application.

A person working at this level would be expected to take responsibility for organising and completing tasks assigned to them without close supervision.

Completion of the general construction induction training program specified by the model Code of Practice for Construction Work is required for any person who is to carry out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

CPCCWHS2001 Apply WHS requirements, policies and procedures in the construction industry

## Unit Sector

Construction waterproofing

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- |  |   |
|--|---|
| 1 Plan and prepare to apply waterproofing process to internal wet areas. | <ul style="list-style-type: none"> <li>1.1 Read and interpret work instructions and plan sequence of work.</li> <li>1.2 Select and use personal protective equipment (PPE) as required for each stage of the task.</li> <li>1.3 Plan all work to comply with laws and regulations, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications, workplace requirements, drawings and specifications.</li> <li>1.4 Follow requirements of job safety analyses and safety data sheets.</li> <li>1.5 Inspect work site, assess hazards and apply risk controls, including required signage and barricades.</li> <li>1.6 Select tools and equipment, check for serviceability and report any faults.</li> <li>1.7 Select materials required for task, calculate quantities, handle safely and prepare and position ready for use.</li> </ul> |
| 2 Select waterproofing system.   | <ul style="list-style-type: none"> <li>2.1 Locate internal structure to be waterproofed from drawings and specifications.</li> <li>2.2 Check area for soundness and surface defects.</li> <li>2.3 Select waterproofing systems suitable for and compatible with site conditions and substrate.</li> </ul>   |
| 3 Prepare for waterproofing installation.                                | <ul style="list-style-type: none"> <li>3.1 Set out internal wet area and check alignment, fixtures and finished levels for conformity with drawings and specifications, and report defects.</li> <li>3.2 Test moisture content in substrate for compatibility with system and report defects.</li> <li>3.3 Check adequacy of drainage and report defects.</li> </ul>  |

- 3.4 Prepare flashings and termination seals and make ready for installation to manufacturers' specifications.
  - 3.5 Check that substrate has a uniform finish to manufacturers' instructions.
  - 3.6 Clean and prepare substrate ready for waterproofing.
  - 3.7 Prime substrate ready for waterproofing.
- 4 Apply waterproofing.
  - 4.1 Apply waterproofing system to prepared surface to manufacturers' specifications.
  - 4.2 Detail and terminate waterproofing membrane in accordance with system requirements.
  - 4.3 Check completed waterproofing installation for conformity to manufacturers' specifications.
  - 4.4 Document movement joints for subsequent trades.
  - 4.5 Perform final inspection and completion activities.
  - 4.6 Protect waterproofing membrane.
- 5 Apply sealants to construction joints.
  - 5.1 Select sealant for compatibility with application, substrate and finishes.
  - 5.2 Install backing rods and/or release agents to prevent three-sided adhesion.
  - 5.3 Apply sealant manufacturers' specifications, tool to required finish and allow to cure.
  - 5.4 Perform final inspection and completion activities.
  - 5.5 Protect sealant, in accordance with manufacturers' specifications.
- 6 Clean up.
  - 6.1 Clear work area, dispose of materials, and reuse or recycle in compliance with legislation, regulations and codes of practice.
  - 6.2 Clean, check, maintain and store tools and equipment in

accordance with manufacturers' recommendations.

## **Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Unit Mapping Information**

Supersedes and equivalent to CPCCW3002A Apply waterproofing process to internal wet areas.

## **Links**

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCCWP3002 Apply waterproofing process to internal wet areas

## Modification History

Release 2 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.1.

Changes to Performance Evidence and Unit Sector.

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0.

Supersedes and equivalent to CPCCWP3002A Apply waterproofing process to internal wet areas. Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must satisfy all of the elements, performance criteria and foundation skills of this unit by waterproofing an internal wet area, including:

- one shower area, a minimum 1800 millimetres high, 900 millimetres x 900 millimetres wide, incorporating:
  - a niche
  - tap penetrations
  - draining connection
  - water stop/hob
- surrounds for an inserted bath with periphery barrier or water stop.

All work must be performed to the standard required in the workplace and must comply with laws and regulations, Australian Standards, work health and safety (WHS) and environmental requirements, manufacturers' specifications and workplace requirements.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- requirements of Australian Standards for waterproofing internal wet areas
- safety requirements for waterproofing internal wet areas, including:
  - job safety analyses and/or safe work method statements in accordance with Safe Work Australia Code of Practice for Construction Work or state and/or territory equivalent
  - safety data sheets (SDS)
  - personal protective equipment (PPE)
- manufacturers' specifications for waterproofing systems and materials

- assessment and appreciation of moisture content in substrate materials for waterproofing internal wet areas
- waterproofing around fixtures:
  - vanities
  - toilets
  - shower screens
  - taps
  - penetrations
- waterproofing materials, processes and systems for internal wet areas:
  - waterproofing systems/materials:
    - cementitious
    - water-based
    - moisture-cured
    - sealants
    - sprayed material membranes
    - sheet:
      - butyl
      - ethylene propylene diene monomer rubber (EPDM)
      - polyvinyl chloride (PVC)
      - decoupling
  - ancillary materials:
    - adhesives
    - sealants
    - drainage flanges
    - penetration flashings
    - water stops
- internal waterproofing materials, processes and techniques
- types and uses of materials storage and environmentally friendly waste management
- types and uses of plans, drawings and specifications for waterproofing internal wet areas
- types and uses of tools and equipment for waterproofing internal wet areas
- principles and considerations of water exclusion
- processes for the calculation of material requirements for waterproofing internal wet areas
- quality requirements for waterproofing internal wet areas
- termination and flashing principles.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

This unit must be assessed in the workplace or a close simulation using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

## **Links**

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPCSHP3005 Apply and trim decorative additions to shopfittings and components

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0

Supersedes and is equivalent to CPCCSH3005 Apply and trim decorative additions to shopfittings and components.

## Application

This unit of competency specifies the skills and knowledge required to apply and trim specifically designed decorative panelling, frames, borders and mirrors to shopfittings and components to ensure a quality finish. It includes offsite work on units being fabricated for installation and on-site installation of units and internal walls.

It applies to shopfitters who also work concurrently with clients and associated contractors to accommodate client requirements where the shop is operational.

Individuals at this level take responsibility for organising and completing these tasks with a high degree of self-direction.

No licensing, legislative or certification requirements apply to this unit of competency at the time of publication.

Completion of the general construction induction training program, specified in the Safe Work Australia model *Code of Practice: Construction Work*, is required by anyone carrying out construction work. Achievement of *CPCCWHS1001 Prepare to work safely in the construction industry* meets this requirement.

## Pre-requisite Unit

Nil.

## Unit Sector

Shopfitting

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- 1 Plan and prepare to apply decorative additions.
  - 1.1 Identify, read and interpret decorative additions from job requirements, plans and specifications.
  - 1.2 Determine type of decorative addition to be applied and calculate material quantities using measurements and formulas.
  - 1.3 Identify worksite hazards and conditions and implement risk control measures following work health and safety and environmental requirements.
  - 1.4 Determine job priorities and sequence job tasks in consultation with others in the workplace.
  - 1.5 Obtain materials, check for conformity and safely handle and locate materials ready for use.
  - 1.6 Establish appropriate method for fixing decorative additions to the substrate.
  - 1.7 Select, fit and use personal protective equipment (PPE) required for the task.
  - 1.8 Select tools and equipment for the task, check for serviceability, and rectify and report faults.
  
- 2 Fix and finish decorative additions.
  - 2.1 Set out position of decorative additions in accordance with plan and job description and confirm with client.
  - 2.2 Draw a plan to develop a true mitre for a compound angle and a mitre of different material widths and calculate angles by dissection.
  - 2.3 Set out, mark and cut to length decorative additions.
  - 2.4 Follow specifications to cut curved decorative additions work.
  - 2.5 Fit decorative additions and use established method to fix to substrate.
  - 2.6 Trim and finish decorative additions to meet organisational quality requirements.
  
- 3 Clean up.
  - 3.1 Clean tools and equipment, check for serviceability and

report damage or faults.

- 3.2 Clear work area and dispose of, reuse or recycle materials following workplace and environmental requirements.
- 3.3 Store and secure tools and equipment following workplace procedures.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to CPCSSH3005 Apply and trim decorative additions to shopfittings and components.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# Assessment Requirements for CPCSH3005 Apply and trim decorative additions to shopfittings and components

## Modification History

Release 1 This version first released with CPC Construction, Plumbing and Services Training Package Release 5.0

Supersedes and is equivalent to CPCCSH3005 Apply and trim decorative additions to shopfittings and components.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by applying and trimming:

- decorative timber panelling with a minimum of two square metres to a section of wall
- a minimum of two square metre extruded section border to a wall
- a timber or aluminium frame for a mirror that is at least 1200 mm x 600 mm.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- shopfitting regulations, codes and standards
- organisation's quality assurance requirements relating to the application and trimming of decorative additions to shopfittings and components
- sustainable shopfitting practices
- content of and terms, symbols and conventions used in working drawings and specifications
- workplace processes and procedures and environmental requirements
- characteristics, applications and limitations of materials commonly used for decorative and ornamental additions to shop components:
  - decorative panelling
  - extruded sections and mouldings
  - mirrors
  - adhesives and double-sided tapes
  - fixings and fastenings
  - acrylic
  - glass
  - laminates
  - manufactured board

- workplace safety:
  - job safety and environmental analysis (JSEA)
  - safe work method statements (SWMSs)
  - safety data sheets (SDSs)
  - hazardous manual tasks
  - exposure to excessive noise
  - exposure to dust
  - electrical safety
  - emergency procedures (evacuation, location and use of firefighting equipment, first aid)
  - safety of public, visitors and others in the workplace
- processes and techniques for applying and trimming decorative additions:
  - efficient cutting strategies to minimise waste
  - geometry to develop a true raking mould shape or mitre
- functional and operational features of tools and equipment:
  - air compressor and hoses
  - nail guns
  - power drills
  - levelling equipment
  - battery operated tools
- solving problems, overcoming issues and meeting project schedules.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or a simulated workplace using realistic conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to:

- relevant shopfitting legislation, codes and Australian Standards
- current workplace procedures, workplace safety and environmental documentation
- shopfitting drawings and specifications, organisational policies, procedures and equipment to undertake the performance criteria and assessment requirements
- digital technology, devices and software to program equipment and to develop and save documents electronically.

## Application

This unit of competency specifies the mandatory work health and safety training required prior to undertaking construction work. The unit requires the person to demonstrate personal awareness and knowledge of health and safety legislative requirements in order to work safely and prevent injury or harm to self and others. It covers identifying and orally reporting common construction hazards, understanding basic risk control measures, and identifying procedures for responding to potential incidents and emergencies. It also covers correctly selecting and fitting common personal protective equipment (PPE) used for construction work.

This unit meets the general construction induction training requirements of:

- Part 1.1 Definitions and Part 6.5 of the Model Work Health and Safety Regulations;
- Division 11 of Part 3 of the Occupational Safety and Health Regulations 1996 for Western Australia; and
- Division 3 of Part 5.1 of the Occupational Health and Safety Regulations 2007 for Victoria.

It is expected that site-specific induction training will be conducted prior to conducting construction work.

Licensing, legislative, regulatory or certification requirements apply to this unit. Relevant work health and safety state and territory regulatory authorities should be consulted to confirm jurisdictional requirements.

## Pre-requisite Unit

Nil

## Unit Sector

Construction

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.

- |   |   |
|---|---|
| 1. Identify health and safety legislative | 1.1. Basic roles, responsibilities and rights of duty holders are identified and explained according to <b>jurisdictional</b> |
|---|---|

requirements of construction work.		<b>health and safety legislative requirements.</b>
	1.2.	Duty of care requirements are identified.
	1.3.	Construction safe work practices are identified and explained.
2. Identify construction hazards and risk control measures.	2.1.	Basic principles of risk management are identified.
	2.2.	Construction hazards are identified and discussed.
	2.3.	Purpose and use of PPE are identified and demonstrated.
	2.4.	Measures for controlling hazards are identified.
3. Identify health and safety communication and reporting processes.	3.1.	Health and safety documents are identified and discussed.
	3.2.	Roles of designated health and safety personnel are identified and explained.
	3.3.	Safety signs and symbols are identified and explained.
	3.4.	Procedures for reporting hazards, incidents and injuries are identified.
4. Identify incident and emergency response procedures.	4.1.	Procedures for responding to incidents and emergencies are identified and explained.
	4.2.	Procedures for accessing first aid are identified.
	4.3.	Types and purpose of fire safety equipment are identified and discussed.

## Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria.

Skill	Performance feature
-------	---------------------

Numeracy skills to:	<ul style="list-style-type: none"> <li>locate and recognise numbers commonly used in safety signs.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>ask questions to clarify instructions</li> <li>listen to instructions to identify key safety information</li> <li>tell another person about a construction problem or hazard.</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>follow simple pictorial safety instructions</li> <li>follow simple safety instructions that are written in English.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>select risk control measures.</li> </ul>
Written skills to:	<ul style="list-style-type: none"> <li>complete a basic form.</li> </ul>

## Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

***Jurisdictional health and safety legislative requirements*** must include at least one of the following state and territory Acts or their equivalent:

- Australian Capital Territory: Work Health and Safety Act 2011
- New South Wales: Work Health and Safety Act 2011
- Northern Territory: Work Health and Safety (National Uniform Legislation) Act 2011
- Queensland: Work Health and Safety Act 2011
- South Australia: Work Health and Safety Act 2012
- Tasmania: Work Health and Safety Act 2012
- Victoria: Occupational Health and Safety Act 2004
- Western Australia: Occupational Safety and Health Act 1984.

## Unit Mapping Information

Supersedes and is equivalent to CPCCWHS1001 Prepare to work safely in the construction industry.

## Performance Evidence

A person demonstrating competency in this unit must satisfy the requirements of the elements, performance criteria, foundation skills, and range of conditions of this unit, in addition to the specific performance and knowledge evidence described below.

The person must:

- identify and orally report two construction hazards
- explain how risk could be reduced or removed in relation to those two hazards
- select appropriate personal protective equipment (PPE) to control the risk
- explain basic procedures for responding to incidents and emergencies, including types and purpose of the following fire safety equipment:
  - fire blankets
  - fire-extinguishers, including water, carbon dioxide, powder and foam
  - hose reels and mains
- identify and orally explain the meaning of required safety signs and symbols
- explain the purpose of job safety analyses (JSAs), safe work method statements (SWMS) and safety data sheets (SDS)
- explain the roles of the following designated health and safety personnel:
  - first aid officers
  - work health and safety (WHS) representatives
  - WHS committee members
  - supervisors.

The person must also demonstrate correctly fitting to themselves the PPE listed below:

- eye protection
- hearing protection
- hard hat
- high visibility vest, shirt or jacket.

## Knowledge Evidence

A person must demonstrate knowledge of:

- basic duty of care, and the roles, rights and responsibilities of business owners and workers in relation to working safely while undertaking construction work
- basic meaning of the terms ‘hazard’ and ‘risk’
- basic principles of risk management, including the following five steps in order:
  - identify hazard
  - assess risk
  - consult and report
  - control hazard
  - review
- basic procedures for accessing first aid

- construction hazards, including those relating to:
  - asbestos
  - confined spaces
  - electrical: power lines, cords and equipment
  - excavations and trenches, including underground services
  - dust
  - falling objects
  - hazardous substances and dangerous goods
  - hot and cold work environments
  - manual handling
  - noise
  - plant and equipment operation
  - traffic and mobile plant
  - unplanned collapse
  - ultraviolet (UV) radiation
  - working at heights, including scaffolding
- construction work that requires a high-risk work licence
- types, purpose and use of PPE used in construction, as specified in the performance evidence, and including safety footwear, harnesses and respiratory protection, and UV protective clothing and sunscreen
- construction emergencies, including:
  - chemical spill
  - fire
  - injury to personnel
  - structural collapse
  - toxic or flammable vapour emission
  - vehicle or mobile plant accident
- construction incidents, including:
  - incidents resulting in personal injury or damage to property
  - near misses or dangerous occurrences that do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence
- safe work practices that should be followed in construction work, including:
  - accessing and using site amenities for drinking water, hand washing and toilets
  - following safety procedures when performing work tasks and using equipment
  - identifying and reporting hazards, incidents and injuries in the workplace
  - keeping the work area clean, tidy and free from debris
  - not using or being affected by drugs and/or alcohol while at work
  - preventing bullying and harassment in the workplace
  - selecting and using required PPE

- smoking only in designated areas
- storing and removing waste and debris in designated areas
- meanings and symbols associated with construction safety signs, symbols and tags, including:
  - emergency information signs: exits, emergency equipment and first aid
  - fire signs: location of fire alarms and firefighting equipment
  - hazard signs and symbols: danger and warning
  - regulatory signs and symbols: prohibition, mandatory and limitation or restriction
  - safety and lockout tags: danger and out-of-service tags.

## Assessment Conditions

The following must be present and available to learners during assessment activities:

- equipment:
  - all of the PPE listed in the performance evidence
- specifications:
  - state or territory Act relevant to the location of the learner, as specified in the range of conditions.

The assessment must reflect a range of methods including practical demonstration, oral and written reporting.

The assessment of performance evidence must be conducted by direct observation of the learner by an assessor, either by an assessor observing the learner physically and/or by an assessor observing the learner via audio and visual media in real time.

### Assessor requirements

As a minimum, assessors must satisfy the assessor requirements in the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

Assessors must hold the unit *CPCWHS2001 Apply WHS requirements, policies and procedures in the construction industry*, or its successor.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=7e15fa6a-68b8-4097-b099-030a5569b1ad>

# CPPBDN4107 Investigate construction methods for Class 1 and 10 buildings

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 11.0.

Supersedes and is not equivalent to CPPBDN4001 Research and evaluate construction materials and methods for building design projects.

CPPBDN4001 Research and evaluate construction materials and methods for building design projects was split to create two units. This unit is based on the construction methods component.

Updated to meet the Standards for Training Packages 2012.

## Application

This unit specifies the skills and knowledge required to investigate construction methods for Class 1 and 10 buildings as defined in the National Construction Code (NCC). It includes determining the application, performance and interaction of contemporary construction methods against compliance with relevant legislation, the NCC and Australian Standards.

The unit applies to drafters who work under the supervision of building designers or architects to identify and apply information and data on construction methods across building design projects. Drafters use specialised knowledge to complete routine and non-routine tasks and deal with predictable and sometimes unpredictable drafting problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil.

## Unit Sector

Building Design

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

- 1 Assess and select construction methods for site preparation, foundations and footings for building project.
  - 1.1 Interpret site classification report for foundation material and wind classification to identify implications for structural design of building.
  - 1.2 Evaluate implications of earthworks, vegetation and existing structures on construction methods.
  - 1.3 Investigate drainage methods required to manage surface water and subsoil drainage, during and post construction works.
  - 1.4 Select termite risk management systems to suit regional characteristics.
  - 1.5 Identify, select, sketch and annotate appropriate construction methods for common concrete footings and slabs.
  - 1.6 Identify, select, sketch and annotate appropriate construction methods for common sub-floor and suspended structural floor systems.
  
- 2 Assess construction methods for framing, cladding and lining systems for building project.
  - 2.1 Sketch and annotate commonly used structural wall and roof framing systems.
  - 2.2 Sketch and annotate commonly used systems for structural masonry.
  - 2.3 Sketch and annotate commonly used cladding systems.
  - 2.4 Identify insulation systems appropriate for region and building type.
  - 2.5 Sketch and annotate common lining systems.
  - 2.6 Sketch and annotate construction details of eaves and box gutter supporting systems.
  
- 3 Determine compliance of selected construction methods.
  - 3.1 Confirm NCC requirements for glazing methods for perimeter framed glazing, doors, showers and balustrades for a building design project.
  - 3.2 Confirm NCC requirements for fire separation in a building design project taking account of non-combustible materials, position of openings,

- boundary offsets and construction techniques.
- 3.3 Identify NCC compliant construction methods for a building design project in a bushfire prone area.
  - 3.4 Confirm NCC requirements for health and amenity for wet areas, room heights, facilities, natural light and ventilation.
  - 3.5 Confirm NCC requirements for safe movement and access for stairs, balustrades and swimming pools.
- 4 Confirm internal fit-out of Class 1 and 10 buildings.
    - 4.1 Identify, sketch and annotate commonly used joinery components for cabinetry, architraves, skirting boards and decorative finishes.
    - 4.2 Determine and record structural implications of options for placement and selection of internal fixtures, fittings and finishes.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to interpret:
  - key requirements of the NCC and Australian Standards
  - specifications for construction materials and methods
  - specialised vocabulary, acronyms and technical terminology used in construction documentation.

## Unit Mapping Information

Supersedes and is not equivalent to CPPBDN4001 Research and evaluate construction materials and methods for building design projects.

CPPBDN4001 Research and evaluate construction materials and methods for building design projects was split to create two units. This unit is based on the construction methods component.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPBDN4107 Investigate construction methods for Class 1 and 10 buildings

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 11.0.

Supersedes and is not equivalent to CPPBDN4001 Research and evaluate construction materials and methods for building design projects.

CPPBDN4001 Research and evaluate construction materials and methods for building design projects was split to create two units. This unit is based on the construction methods component.

Updated to meet the Standards for Training Packages 2012.

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by investigating and selecting construction methods to produce sketches and annotations of commonly used construction methods for three building design projects:

- each project must be a Class 1 building and at least one must incorporate an associated Class 10 building, as defined by the National Construction Code (NCC)
- at least one project must be a two-storey building
- at least one project must be a building in a bushfire-prone area.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- correct terminology to define building construction and methodologies for Class 1 and 10 buildings
- sketching and annotation methods
- types of construction relevant to Class 1 and 10 building designs
- construction methods associated with different geographical locations and climatic conditions, including strengths and weaknesses for different contexts
- basic principles of soil mechanics as outlined in *AS 2870 Residential slabs and footings*
- glazing methods for Class 1 and 10 buildings specified in *AS 1288 Glass in buildings - Selection and installation*
- quality and tolerance standards to industry guidelines for construction methods used in Class 1 and 10 buildings
- application, behaviour, performance and interactions of construction methods used in Class 1 and 10 buildings

- common hazards and risks associated with construction methods used in Class 1 and 10 buildings
- key requirements of engineer site classification reports:
  - foundation material
  - wind classification
- commonly used footing and slab construction methods, articulation, shrinkage control
- structural implications for provision of services
- typical structural wall and roof framing systems, bracing, tie-down and provision for services
- typical systems for structural masonry:
  - reinforced
  - unreinforced
  - retaining
- typical cladding systems, non-structural masonry, roofing and flashings.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations. Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting where these skills and knowledge would be performed. This includes access to:

- computer with internet access and word processing software
- relevant regulations, codes and standards
- technical references with current information on construction methods
- drafting equipment for computer or hand detail sketching.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# CPPSEC2022 Install electronic locks and locking systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

CPPSEC2022A Install mechanical lock and locking system. Updated to meet the Standards for Training Packages

## Application

This unit specifies the skills and knowledge required to install a range of electronic locks and locking systems for door and window applications. It includes upgrading or strengthening hollow doors to increase security, and fitting door control devices and locks to windows, doors and jams.

The unit is suitable for those with basic skills and knowledge undertaking routine work tasks under the direction of more experienced workers.

This unit may form part of the licensing requirements for people who sell, supply, advise on, install, maintain, monitor, repair or service security equipment and systems in those states and territories where these are regulated activities.

## Pre-requisite Unit

None.

## Unit Sector

Technical

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe what needs to be done to demonstrate achievement of the element.

1 Prepare to install electronic lock and locking systems.

1.1 Review work instructions to confirm installation timeframes, client needs, site location and equipment requirements, and clarify issues with relevant persons.

1.2 Identify and obtain electronic lock and locking system to be installed following workplace procedures.

- 1.3 Review and follow workplace policies and procedures including work health and safety (WHS) when carrying out work tasks.
- 2 Plan and organise installation operation.
  - 2.1 Plan and prioritise work tasks allowing sufficient time to meet work instructions.
  - 2.2 Select and organise required tools and equipment including personal protective equipment and check for safe and correct operation.
  - 2.3 Select and organise required materials and hardware for product installation suitable to the specific installation surfaces and procedures.
  - 2.4 Inspect installation area to identify and control or report risks and hazards.
- 3 Conduct installation procedures.
  - 3.1 Use safe work practices when carrying out installation procedures according to WHS requirements.
  - 3.2 Fit locks to windows, doors and jams in accordance with manufacturers' instructions.
  - 3.3 Fit door control devices to allow correct operation of doors in accordance with manufacturers' instructions.
  - 3.4 Upgrade or strengthen hollow doors to increase security.
  - 3.5 Identify problems impacting the installation and obtain approval from relevant persons to vary the installation plan if required.
  - 3.6 Inspect installed electronic locks and locking and system to confirm correct operation and ensure no damage or distortion to the surrounding environment or services.
- 4 Complete installation and documentation.
  - 4.1 Notify installation completion to relevant persons.
  - 4.2 Complete installation documentation according to workplace requirements.
  - 4.3 Check tools and equipment for faults, wear or damage

and rectify or report problems.

- 4.4 Restore work area to original condition and remove waste caused by installation operation.

## Foundation Skills

As well as the foundation skills explicit in the performance criteria of this unit, candidates require:

- reading skills to understand key requirements of:
  - plans when locating installation sites for electronic locks and locking systems
  - Australian standards and manufacturers' instructions
- numeracy skills to calculate measurements to accurately position and fix door control devices and locks.

## Unit Mapping Information

Supersedes and equivalent to CPPSEC2022A Install mechanical lock and locking system.

## Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

# Assessment Requirements for CPPSEC2022 Install electronic locks and locking systems

## Modification History

Release 1 This version first released with CPP Property Services Training Package Release 9.0.

CPPSEC2022A Install mechanical lock and locking system. Updated to meet the Standards for Training Packages

## Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by installing electronic locks and locking systems involving:

- upgrading or strengthening two hollow doors
- fitting three door control devices
- fitting locks to three windows, doors and jams.

## Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- workplace policies and procedures that ensure compliance with legislative and regulatory requirements when installing electronic locks and locking systems:
  - licensing requirements and limits of own authority
  - reporting and documentation
  - requirements for complying with Australian Communications and Media Authority cabling rules
  - work health and safety
- basic carpentry techniques used when installing electronic locks and locking systems
- documentation to be completed when installing electronic locks and locking systems to ensure compliance with licensing and warranty requirements
- general principles of locksmithing
- installation methods and procedures for electronic locks and locking systems
- materials, hardware, tools and equipment including personal protective equipment (PPE) used when installing electronic locks and locking systems
- types, functions and features of electronic locks and locking systems
- types of doors and windows suitable for electronic lock applications
- typical hazards encountered when installing electronic locks and locking systems and the control measures for each:
  - confined spaces

- electrical
  - ground glass
  - hazardous materials and chemicals
  - people in the work area
  - power tools
  - vermin
- welding and drilling techniques used when installing electronic locks and locking systems.

## Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainers licence (where such a licence exists within the relevant jurisdiction) and the licence for performing the security activities for which the individual is providing training or assessment. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment must be conducted in the workplace or in a simulated workplace environment. Candidates must have access to:

- workplace policies and procedures, work instructions, documentation, electronic locks and locking systems, PPE, tools, materials and hardware required to achieve the performance evidence
- product information and manufacturers' instructions for locks and locking systems being installed.

## CUAACD101 Use basic drawing techniques

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

### Application

This unit describes the skills and knowledge required to create a basic visual representation of objects or ideas. It does not relate to drawing as an art form.

It applies to individuals in any context where a basic sketch or drawing of objects, ideas or layouts is required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Visual communication – art, craft and design

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for drawing	1.1 Clarify purpose of drawings with appropriate people 1.2 Identify tools and materials required for basic drawing techniques 1.3 Select appropriate tools and materials for basic drawing techniques
2. Produce basic drawings	2.1 Apply a limited range of techniques to represent objects or ideas 2.2 Follow safety instructions when handling tools and materials 2.3 Seek feedback on drawings from relevant people and refine

ELEMENT	PERFORMANCE CRITERIA
	drawings as required

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	2.2	<ul style="list-style-type: none"> <li>Comprehends safe handling instructions for tools and materials</li> </ul>
Oral Communication	1.1, 2.3	<ul style="list-style-type: none"> <li>Uses questioning and active listening techniques to confirm task purpose and seek feedback</li> </ul>
Navigate the world of work	2.2	<ul style="list-style-type: none"> <li>Follows defined safety procedures when handling tools and materials</li> </ul>
Get the work done	1.1, 1.2, 1.3, 2.1, 2.2, 2.3	<ul style="list-style-type: none"> <li>Decides on tools, materials and techniques required to complete tasks, with the assistance of others</li> </ul>

## Unit Mapping Information

CUAACD101 Use basic drawing techniques	CUVACD101A Use basic drawing techniques	Updated to meet Standards for Training Packages and clarify intent.	Equivalent unit

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

# Assessment Requirements for CUAACD101 Use basic drawing techniques

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

## Performance Evidence

Evidence of the ability to:

- identify tools, materials and techniques required to produce drawings
- use a range of basic drawing techniques to produce and refine drawings that represent objects or ideas.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list materials and tools commonly used for drawing and explain how to use them safely
- describe different types of drawing techniques.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to materials and tools used in drawing work.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUAACD311 Produce drawings to communicate ideas

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to produce drawings that represent and communicate ideas. It does not relate to drawing as an art form. It involves planning drawing work, experimenting with ideas and producing drawings.

The unit applies to those who use drawings, either digital or hand drawn, for personal use or in response to a project or brief. They allow for visual communication and are used as visual representation tools. Drawings may include design concepts for objects, layout planning, illustrations, processes, sequences or spaces.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Visual Communication – Art, Craft and Design

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan drawing work	1.1 Identify drawing requirements from reference material and confirm with applicable personnel 1.2 Identify factors that may impact on how drawing work is undertaken 1.3 Gather information about drawing techniques, materials and equipment from different sources 1.4 Evaluate information for application to communicating ideas and specific drawings
2. Experiment to represent	2.1 Explore different drawing techniques with identified materials

ELEMENT	PERFORMANCE CRITERIA
ideas	and equipment 2.2 Select approaches that best suit the purpose of drawings and their presentation context
3. Create drawings	3.1 Organise materials, tools and equipment for selected techniques 3.2 Produce preliminary drawings and compare with drawing requirements in consultation with required personnel 3.3 Confirm intellectual property and other applicable legislative requirements are met 3.4 Finalise drawings, incorporating feedback on work in progress as required 3.5 Prepare drawings for presentation context

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> <li>Interprets information from familiar sources to determine drawing production requirements and legal and safety constraints</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Gathers information and opinions from others using questioning and active listening techniques</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Complies with safety requirements associated with creative work</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Uses accepted practices and protocols in discussions of work progress with others</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>Analyses drawing requirements and tests the capabilities of materials, tools and equipment when determining the approach for final production that meets drawing requirements</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to CUAACD301 Produce drawings to communicate ideas.

# Assessment Requirements for CUAACD311 Produce drawings to communicate ideas

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- produce drawings to communicate at least three different ideas.

In the course of the above, the candidate must:

- identify and analyse drawing requirements
- explore techniques, materials and equipment according to required safety procedures
- determine intellectual property requirements
- produce drawings that:
  - show a command of selected techniques
  - successfully communicate the required ideas.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- properties and capabilities of the range of materials, tools and equipment used in drawing digitally and by hand
- sources of information about different approaches to drawing
- work health and safety requirements associated with tools and materials used for drawing
- intellectual property and copyright requirements and other legislation related to own drawing work.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- equipment, tools and materials required to produce drawings
- information sources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUAACD312 Produce computer-aided drawings

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to use different computer-aided design and drafting (CADD) program functions to produce drawings and documentation. It involves preparing to undertake the work, understanding the object or project brief parameters and measurements and finalising drawings according to requirements. The focus of this unit is on the technical skills required to operate CADD, not on design skills.

The unit applies to those who use computer-aided drawing skills in various contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Visual Communication – Art, Craft and Design

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for computer-aided drawing work	1.1 Clarify drawing requirements and objectives in concept or project information 1.2 Identify hardware, software, tools and equipment required for computer-aided design and drafting projects 1.3 Set up hardware and software according to operating instructions and organisational procedures as required 1.4 Identify and retrieve digitised information required for projects
2. Gather object parameters and measurements	2.1 Establish and record critical dimensions and data for required designs

ELEMENT	PERFORMANCE CRITERIA
	2.2 Identify requirements in relation to accuracy, tolerances and other information according to drawing requirements
3. Prepare plots or drawings	3.1 Access and use CADD functions and features according to operating instructions 3.2 Access and use peripheral equipment required for projects 3.3 Prepare and review preliminary drawings in consultation with required personnel
4. Finalise drawings	4.1 Check designs against project objectives and specifications and mark up documentation according to organisational procedures 4.2 Identify and make required adjustments to designs in consultation with required personnel 4.3 Store data files according to operating instructions and organisational procedures 4.4 Submit final drawings within agreed time parameters

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> <li>Interprets and evaluates detailed information, instructions and technical specifications in different formats when preparing for and producing computer aided drawings</li> <li>Reviews accuracy of drawings against specifications and project information</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Records key design information using industry standard conventions and terminology</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Elicits information and opinions from others using questioning and careful listening</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Identifies and records measurements and other numerically expressed specifications required for drawings</li> <li>Operates numerical functions of computer aided drawing equipment and produces drawings to scale and measurements that meet drawing requirements</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Takes responsibility for following necessary organisational procedures when planning and undertaking work</li> </ul>

<b>SKILL</b>	<b>DESCRIPTION</b>
Teamwork	<ul style="list-style-type: none"><li>• Participates in review of work progress with required personnel</li></ul>
Planning and organising	<ul style="list-style-type: none"><li>• Plans and organises required equipment, software and data in logical steps according to workplace and project requirements</li><li>• Prepares preliminary drawings for evaluation by others and makes recommended refinements</li><li>• Manages time to complete final drawings within established timeframes</li></ul>
Technology	<ul style="list-style-type: none"><li>• Produces, edits, stores and retrieves drawings using features of digital systems and tools</li></ul>

## Unit Mapping Information

Supersedes and is equivalent to CUAACD302 Produce computer-aided drawings.

## Links

Companion Volume Implementation Guide is found on VETNet -

# Assessment Requirements for CUAACD312 Produce computer-aided drawings

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- use features and functions of a computer-aided design and drafting (CADD) program to produce at least three different computer-aided drawings that meet project objectives.

In the course of the above, the candidate must:

- select CADD hardware and software to suit project requirements
- follow operating instructions and organisational procedures
- use feedback from others to refine and produce final drawings within specified timelines.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- software, peripheral equipment and tools used for CADD
- ways in which CADD is used within the specific workplace situation
- typical features and functions of CADD programs, including:
  - drawing tools to support methods for drawing lines, arcs, polylines, texts, dimensions
  - view displays
  - edit functions
  - working with layers
  - plotting and printing.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- CADD equipment and software
- project or concept information
- operating instructions and organisational procedures
- required personnel.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUAACD313 Produce technical drawings

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to apply different techniques to produce technical drawings that meet required standards and conventions. It involves planning and preparing for technical drawing activities, creating technical drawings and finalising them according to project requirements.

The unit applies to those who use technical drawings in different contexts to meet project requirements

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Visual Communication – Art, Craft and Design

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare for technical drawing work	1.1 Identify drawing requirements with reference to project documentation in consultation with required personnel 1.2 Identify factors that may impact on technical drawing work 1.3 Select techniques to fit the purpose of drawings 1.4 Prepare equipment and materials according to workplace procedures and safety requirements
2. Create technical drawings	2.1 Produce and review preliminary drawings according to drawing requirements 2.2 Apply applicable conventions and standards to technical drawings

ELEMENT	PERFORMANCE CRITERIA
	2.3 Discuss drawings with required personnel and confirm required amendments 2.4 Amend drawings according to drawing requirements
3. Finalise technical drawings	3.1 Check drawings against project objectives and drawing requirements according to organisational procedures 3.2 Finalise and submit technical drawings within agreed timeframes

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> <li>Interprets project documentation and other applicable information when identifying drawing requirements and constraints</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Elicits information and opinions from others using questioning and careful listening</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Interprets numerical and spatial concepts related to drawing standards and conventions</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Takes responsibility for following workplace procedures and safety requirements when planning and undertaking work</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Participates in review of work progress with required personnel</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>Plans tasks in a logical sequence and manages time to complete final drawings within established timeframes</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to CUAACD303 Produce technical drawings.

## Links

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

# Assessment Requirements for CUAACD313 Produce technical drawings

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- produce technical drawings according to at least three different project requirements.

In the course of the above, the candidate must:

- show a command of selected techniques
- adhere to technical drawing standards and conventions
- satisfy specified drawing purposes and concepts
- follow workplace procedures and safety requirements
- use feedback from others to refine and produce final drawings
- meet deadlines.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- physical properties and capabilities of the range of materials, tools and equipment used for technical drawing work
- technical drawing techniques and their application to a range of contexts and subject matter
- common standards and conventions for technical drawing
- work health and safety requirements relating to preparing technical drawing materials and equipment.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- equipment and materials required to produce technical drawings
- documented technical drawing requirements
- workplace documentation
- required personnel.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUAACD314 Make scale models

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to make three-dimensional (3-D) physical scale models in response to specifications. It does not cover the use of 3-D digital software. It involves preparing to make scale models, completing construction of the models and finalising the model construction process according to scale model requirements.

The unit applies to those who work in many industries and use any 3-D form to make scale models as an essential part of the design process for a range productions or events.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Visual Communication – Art, Craft and Design

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to make scale models	1.1 Clarify scale model requirements according to documentation, verbal briefs and consultation with required personnel 1.2 Identify potential challenges and plan work to minimise risk in consultation with required personnel 1.3 Select techniques for model making according to project requirements 1.4 Confirm presentation requirements and timelines for final scale models 1.5 Confirm equipment, materials and work space requirements for model construction

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	1.6 Set up work space and equipment according to safety considerations and organisational procedures
2. Complete model construction	2.1 Make preliminary models representing core dimensions in line with specifications 2.2 Review preliminary models against objectives and specifications in consultation with required personnel 2.3 Confirm intellectual property and other relevant legislative requirements are met 2.4 Make adjustments to models as required 2.5 Complete models according to project requirements
3. Finalise model construction process	3.1 Present models to required personnel according to project and organisational requirements 3.2 Follow organisational storage and inventory procedures post-construction 3.3 Seek and use feedback from others to improve own skills

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

<b>SKILL</b>	<b>DESCRIPTION</b>
Reading	<ul style="list-style-type: none"> <li>Assesses information from different sources and identifies key objectives of scale model projects, and construction and presentation details</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Elicits information and opinions from others and presents scale model solutions using selected strategies</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Interprets and applies numerical specifications and scale requirements to accurate construction and adjustment of scale models</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Complies with intellectual property and other legislative requirements within the scope of own role and responsibility when planning and undertaking work</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Collaborates and cooperates with colleagues to determine design requirements and plan work processes to achieve effective and compliant design outcomes</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>Organises tasks in a logical sequence to enable completion within prescribed timeframe</li> <li>Analyses task requirements to select applicable techniques</li> </ul>

SKILL	DESCRIPTION
	<ul style="list-style-type: none"><li data-bbox="467 297 1348 331">• Determines production resources required with input from others</li></ul>

## Unit Mapping Information

Supersedes and is equivalent to CUAACD304 Make scale models.

## Links

Companion Volume Implementation Guide is found on VETNet -

# Assessment Requirements for CUAACD314 Make scale models

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- make scale models according to at least two different project requirements.

In the course of the above, the candidate must:

- identify appropriate equipment and materials to make three-dimensional (3-D) models
- establish a safe work space for the use of equipment and materials
- use selected techniques and processes to make models that meet project requirements
- use safe work practices at all times
- communicate with others during preparation, construction and presentation of 3-D models.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- common model making methods, processes and techniques, including the physical properties and capabilities of equipment, tools and materials used
- ways to present finished scale models
- work space requirements for producing scale models, including set-up of work space for particular types of work
- issues and challenges that arise in making scale models
- intellectual property requirements and legislation associated with making scale models
- work health and safety requirements that apply to scale model making.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- documented scale model requirements and organisational procedures
- tools, materials and equipment required to construct scale models
- interaction with appropriate people.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAACD412 Experiment with moulding and casting techniques

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Application

This unit describes the skills and knowledge required to develop technical skills in moulding and casting through experimentation. It involves developing different ideas based on own knowledge and existing ideas, extending moulding and casting skills through experimentation and producing moulds and casts.

The unit applies to those who work on the design and production of three-dimensional projects in industrial and creative contexts. In the creative industries this includes ceramic artists, sculptors and prop makers.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual Communication – Art, Craft and Design

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop ideas and designs for moulds and casts	1.1 Research, adapt and use applicable ideas and approaches from own knowledge of different casting and moulding techniques and other practitioners to inform ideas and designs 1.2 Explore ideas and techniques at the same time to strengthen potential outcomes 1.3 Consider market potential, required techniques and access to materials, tools and equipment when developing ideas for work 1.4 Refine and confirm ideas based on experimentation, research and collaboration with others

ELEMENT	PERFORMANCE CRITERIA
2. Extend moulding and casting skills	2.1 Evaluate potential for new approaches to moulding and casting based on capabilities of techniques already used 2.2 Adapt or introduce new materials, tools and equipment to achieve different outcomes 2.3 Extend capabilities of moulding and casting through experimentation
3. Make moulds and casts	3.1 Set up or coordinate resources according to safety or other workplace requirements 3.2 Create moulds and casts using techniques and media selected from research and experimentation 3.3 Review and refine ideas and approaches based on ongoing experiences with the production of work
4. Evaluate own work	4.1 Review own work in terms of conceptual development and technical execution 4.2 Identify areas for future improvement, especially in terms of own skill development 4.3 Discuss completed work with required personnel and respond positively to feedback

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> <li>Interprets information from different sources and determines applicable moulding techniques</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>Elicits opinions and feedback from others using detailed and clear language</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Determines resource requirements using simple mathematical formulae</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Takes responsibility for compliance with legal, safety and sustainability practices associated with moulding and casting techniques</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Seeks collaborative relationships with others and discusses own ideas, elicits feedback on completed work and identifies skill development opportunities</li> </ul>
Planning and	<ul style="list-style-type: none"> <li>Plans and organises requirements for casting production</li> </ul>

<b>SKILL</b>	<b>DESCRIPTION</b>
organising	
Initiative and enterprise	<ul style="list-style-type: none"><li>• Achieves different results and extends skills and experience using research, exploration and experimentation</li></ul>

## Unit Mapping Information

Supersedes and is equivalent to CUAACD402 Experiment with moulding and casting techniques.

## Links

Companion Volume Implementation Guide is found on VETNet -

# Assessment Requirements for CUAACD412 Experiment with moulding and casting techniques

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- Produce at least one finished moulded item and one cast item using techniques selected from experimentation.

In the course of the above, the candidate must:

- develop ideas and techniques using research and experimentation and considering intellectual property requirements
- adapt, extend and combine the capabilities of different moulding materials and techniques
- apply techniques using safe and sustainable work practices throughout the moulding, casting and production process
- evaluate own work through self-reflection and collaboration with others.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- physical properties and capabilities of different materials and tools used in moulding and casting
- characteristics of different materials under different treatments and their potential to achieve different effects
- research methodologies used by artists who experiment with moulding and casting techniques
- suppliers of moulding and casting resources needed in a professional practice
- intellectual property requirements and other applicable legislation if using or adapting ideas from other practitioners
- work health and safety and sustainability requirements for the set-up and operation of moulding and casting work space.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- casting and mould-making materials, tools and equipment
- a workspace in which items can be constructed safely
- research tools and information sources
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUAACD508 Refine model making skills

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

### Application

This unit describes the, skills and knowledge required to refine techniques for the development of three-dimensional (3-D) physical models.

It applies to individuals working across a range of media and industry contexts who use well developed technical and creative skills to build 3-D models independently or as part of a team. The model could be used as a way of testing or presenting ideas. In some cases the model may be a finished work or artistic piece.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Visual communication – art, craft and design

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Maintain professional practice	1.1 Comply with workplace expectations, and ethical and legal obligations in professional activities 1.2 Update information about creative approaches, techniques, materials and equipment relevant to model making 1.3 Identify techniques from other industries that could be applied to the development of scale models and make connections in own work 1.4 Source new ideas and trends through regular review of the work

ELEMENT	PERFORMANCE CRITERIA
	<p>of others</p> <p>1.5 Use feedback from others to improve own skills in design</p> <p>1.6 Seek opportunities to develop technical and conceptual skills</p>
2. Refine and consolidate own technique	<p>2.1 Experiment with new techniques, materials and equipment when developing model making ideas</p> <p>2.2 Identify strengths and weaknesses of various approaches through practice and play</p> <p>2.3 Identify and select approaches best suited to own practice</p> <p>2.4 Develop and document a design process that reflects own style and approach</p>
3. Make models to professional standard	<p>3.1 Interpret ideas, problem-solving tasks or briefs with creativity, accuracy and efficiency</p> <p>3.2 Develop a clear plan and schedule for model making work</p> <p>3.3 Select and assemble appropriate model making materials, tools, techniques and equipment consistent with specifications</p> <p>3.4 Develop precise and accurate scale models as required</p> <p>3.5 Identify opportunities for refinement and re-thinking and make adjustments as required</p> <p>3.6 Communicate the design process and the final solution using detailed work documentation</p> <p>3.7 Present maquettes and models that meet project requirements to key people</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.2, 1.4, 3.1, 3.3	<ul style="list-style-type: none"> <li>Interprets and evaluates a range of visual and textual information to generate ideas, clarify design project requirements and maintain awareness of industry trends and practices</li> </ul>
Writing	2.4, 3.2, 3.6	<ul style="list-style-type: none"> <li>Develops and refines a range of detailed textual and visual documents using clear language and industry</li> </ul>

		specific terminology
Oral communication	1.5, 3.7	<ul style="list-style-type: none"> <li>• Uses detailed and clear language to present information to others</li> <li>• Uses active listening and questioning techniques to elicit information and confirm understanding</li> </ul>
Numeracy	3.4	<ul style="list-style-type: none"> <li>• Interprets measurements for the production of models</li> </ul>
Navigate the world of work	1.1, 1.2, 1.6	<ul style="list-style-type: none"> <li>• Meets workplace expectations and takes responsibility for compliance with legal and ethical requirements associated with design work</li> <li>• Updates and maintains knowledge of model making practice in order to perform role</li> </ul>
Get the work done	1.3, 1.4, 1.5, 1.6, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 3.4 3.5, 3.7	<ul style="list-style-type: none"> <li>• Sequences work to a plan, managing resource selection and assembly and the development and refinement of scale model designs and production processes to meet requirements</li> <li>• Selects practical strategies to enhance and support industry expertise including peer feedback, self-directed inquiry and review</li> <li>• Uses experimentation with new materials and techniques and critical analysis of outcomes to inform decisions</li> <li>• Presents resolved solutions that meet all requirements</li> </ul>

## Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
CUAACD508 Refine model making skills	CUVACD508A Refine model making skills	Updated to meet Standards for Training Packages and clarify intent.	Equivalent unit

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

# Assessment Requirements for CUAACD508 Refine model making skills

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

## Performance Evidence

Evidence of the ability to:

- identify and explore new techniques, resources and materials and integrate into model making
- develop and refine models that meet project specifications and professional standards
- document the design process.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify ways in which model making is used in a range of industry contexts
- describe the basic principles and techniques for model making
- outline physical properties and capabilities of the range of materials, tools and equipment used for model making
- describe presentation methods for finished models
- describe work space requirements for the production of models, including work space set-up for particular types of model making work
- describe typical issues and challenges that arise in the context of making scale models
- outline the ethical, organisational and legislative requirements associated with model making.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- projects that require construction of models
- tools, equipment and other resources required for constructing models.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUAACD511 Make moulds and casts

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

### Application

This unit describes the skills and knowledge required to create moulds and casts for a range of artistic and other purposes.

It applies to individuals who work independently in industrial and creative contexts and use well-developed technical skills for the chosen methods of casting or moulding. Individuals typically work as ceramic artists, glass artists, sculptors or prop makers, but the unit is relevant to others working with the design and production of any three-dimensional object.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Visual communication – art, craft and design

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Evaluate mould-making and casting approaches	1.1 Research historical and contemporary theories and practices of mould-making and casting in the context of own work 1.2 Evaluate the ways in which casting and moulding may be used in different contexts and for different purposes 1.3 Investigate current materials, technologies and options for mould making and casting

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
2. Design and make models for the mould-making and casting process	2.1 Evaluate the design and production limitations of a variety of models 2.2 Design a variety of forms suitable for the mould-making and casting process 2.3 Make a variety of forms based on own designs 2.4 Evaluate forms to assess aesthetic, functional and technical issues 2.5 Make patterns or models suitable for reproduction by mould making and casting 2.6 Prepare patterns or models for mould making and casting
3. Select mould-making and casting resources	3.1 Establish the mould-making and casting needs of specific work projects, including technical specifications, in consultation with relevant people 3.2 Select appropriate materials, tools and equipment for the project 3.3 Consider the particular safety issues that affect mould-making and casting work 3.4 Calculate correct quantities of materials, avoiding wastage where possible
4. Complete construction process	4.1 Use mould-making and casting materials to meet specific work needs 4.2 Select and use different techniques and equipment to achieve desired outcomes 4.3 Fabricate one-piece and multi-piece moulds that meet technical specifications 4.4 Achieve different outcomes and effects through experimentation with various materials 4.5 Determine and allow required curing and drying time 4.6 Recognise and resolve technical and design issues in the mould-making and casting process 4.7 Apply safe strategies for the use, maintenance and storage of mould-making and casting materials, tools and equipment
5. Evaluate work	5.1 Review items produced in terms of durability and quality of finish 5.2 Assess the work in terms of its creative and aesthetic objectives 5.3 Identify and act on the potential for adjustment and refinement in future work

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3	<ul style="list-style-type: none"> <li>Evaluates and integrates facts and ideas from a range of sources to inform work practice</li> </ul>
Writing	1.1, 1.3, 3.1	<ul style="list-style-type: none"> <li>Records facts, information, project requirements and specifications accurately using industry terminology and simple vocabulary</li> </ul>
Oral communication	3.1	<ul style="list-style-type: none"> <li>Participates in exchanges with others to elicit required information and establish understanding</li> </ul>
Numeracy	3.4, 4.5	<ul style="list-style-type: none"> <li>Calculates resource and material requirements and production time requirements</li> </ul>
Navigate the world of work	3.3, 4.7	<ul style="list-style-type: none"> <li>Meets obligations to follow safe practices for mould-making and casting work</li> <li>Follows required safety practice for the use, maintenance and storage of tools and equipment</li> </ul>
Get the work done	1.1, 1.2, 2.1- 2.6, 3.2, 4.1- 4.6, 5.1, 5.2, 5.3	<ul style="list-style-type: none"> <li>Plans and organises work in a logical sequence in response to needs of specific projects</li> <li>Makes a series of analytical decisions in relatively complex situations considering design options for moulds, appropriate casting processes and required resources for projects</li> <li>Applies systematic, intuitive and experimental approaches to mould construction tasks and recognises and resolves problems encountered in the process</li> <li>Evaluates the technical properties of products from mould and cast production processes, and their visual and creative qualities and identifies future improvement opportunities</li> </ul>

# Assessment Requirements for CUAACD511 Make moulds and casts

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

## Performance Evidence

Evidence of the ability to:

- assess and use information about mould-making and casting in own work
- develop a range of design models suited to reproduction
- produce multiple items using mould-making and casting techniques that meet specified technical and design requirements
- apply safe work practices to the preparation and completion of moulding and casting construction processes
- assess the quality of final work and document future improvement opportunities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- briefly outline historical and contemporary theories and practices of mould-making and casting, relevant to own area of work
- describe in detail how mould-making and casting are used in own area of work
- identify current technologies and equipment used for mould-making and casting and outline their application to different purposes
- list the properties and applications of materials commonly used for mould-making and casting in the relevant work context
- explain reasons for the use of particular materials and techniques to achieve particular effects
- identify common technical problems that arise in the creation of moulds and casts
- detail the workplace health and safety requirements for making moulds or casts in the relevant work context.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- casting and mould-making materials, tools and equipment
- a work space in which items can be made safely.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUAACD537 Refine 3-D design ideas and processes

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to extend understanding and use of three-dimensional (3-D) design ideas and processes for the production of work at a professional level.

The unit applies to those who work with a wide and potentially complex range of ideas about 3-D design.

No licensing, legislative or certification requirements apply to this unit at time of publication.

### Unit Sector

Visual Communication – Art, Craft and Design

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Originate ideas for 3-D design	1.1 Obtain design brief from required personnel 1.2 Research and explore information and generate ideas for design concepts 1.3 Develop initial design concepts consistent with aim of the work or specifications of the brief 1.4 Evaluate and explore options and materials that meet design brief requirements 1.5 Refine options and select approach that best meets design brief requirements
2. Plan design process	2.1 Develop clear plan and schedule for design realisation 2.2 Organise and allocate resources to meet design brief requirements

ELEMENT	PERFORMANCE CRITERIA
	2.3 Discuss design process with others involved in design realisation as required 2.4 Monitor process and confirm purpose and quality of the design is maintained 2.5 Identify difficulties or problems and take action to rectify as required 2.6 Maintain documentation according to organisational policies and procedures
3. Refine and consolidate process	3.1 Develop 3-D designs and design processes that meet design brief requirements 3.2 Develop and document design process that reflects own style and approach 3.3 Identify opportunities for refinement and review and make adjustments as required 3.4 Communicate the design process and final solution according to design brief requirements and organisational policies and procedures 3.5 Prepare and present 3-D design solutions to required personnel
4. Maintain expertise	4.1 Improve own design skills using feedback from others 4.2 Maintain currency of industry standards and seek opportunities to further develop technical and conceptual skills 4.3 Source new ideas and trends through regular review of the work of others 4.4 Keep informed about new creative approaches, techniques, materials and equipment for 3-D design

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> <li>Interprets and evaluates different visual and textual information to generate ideas, identify requirements of design projects and maintain awareness of industry trends and practices</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Develops and refines different detailed textual and visual documents using clear language and industry specific terminology</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Presents and shares information with others using detailed and clear language</li> </ul>

<b>SKILL</b>	<b>DESCRIPTION</b>
	<ul style="list-style-type: none"> <li>Elicits information and confirms understanding using active listening and questioning techniques</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Performs mathematical calculations to schedule work activities and allocate resources within budget requirements</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Takes responsibility for compliance with legal, ethical and organisational requirements associated with design work</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Selects and uses appropriate conventions and techniques when liaising with colleagues to provide information, present designs, seek feedback and gather current industry information</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>Develops a structured plan for the design process incorporating scheduling, resource allocation and required communication</li> <li>Independently manages the development and refinement of the design process in documents that reflects personal style and originality</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>Monitors progress and determines solutions to problems as they are encountered</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>Develops ideas in response to parameters of a brief using independent research and experimentation</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to CUAACD507 Refine 3-D design ideas and processes.

## Links

Companion Volume Implementation Guide is found on VETNet: -

# Assessment Requirements for CUAACD537 Refine 3-D design ideas and processes

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- plan, develop and document effective 3-D design solutions and design processes that meet project requirements.

In the course of the above, the candidate must:

- originate and refine concept for three-dimensional (3-D) designs
- apply applicable ethical, organisational and legislative requirements to design activities
- use feedback and own initiative to extend proficiency and practice in 3-D design work.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- techniques for creating 3-D designs in the particular area of work
- basic principles of 3-D design
- physical properties and capabilities of different equipment, tools and materials used for 3-D design
- common presentation methods for finished 3-D designs
- work space requirements for producing 3-D design, including set-up of work space for particular types of 3-D work
- typical issues and challenges that arise in the context of making 3-D designs
- ethical and organisational requirements associated with 3-D designs.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- work specifications and/or design brief
- information sources
- equipment and tools and appropriate work space to produce design work
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUAANM302 Create 3D digital animations

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

### Application

This unit describes the skills and knowledge required to animate simple 3D models and create 3D animations, which may include audio components. The models are for inclusion in interactive media products, short stand-alone animated sequences and basic games.

It applies to individuals who plan and create 3D animated sequences in consultation with relevant personnel in a wide variety of contexts in the digital content industry.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Visual Communication – Animation and Digital Effects

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Clarify animation requirements	1.1 Clarify 3D animation requirements documented in design briefs with relevant personnel 1.2 Examine models to be animated to determine appropriate animation techniques 1.3 Identify file formats and delivery platform for animated sequences 1.4 Identify factors that may influence animation design approach

ELEMENT	PERFORMANCE CRITERIA
	1.5 Clarify work flow sequences with relevant personnel to ensure production schedule deadlines are met
2. Plan approach	2.1 Research animations, artworks and other creative sources that may inspire ideas 2.2 Generate a range of ideas for animations that are technically feasible, respond to briefs and provide creative solutions to all design issues 2.3 Present ideas to relevant personnel using appropriate design techniques 2.4 Adjust approach to incorporate feedback and agree on final design concept 2.5 Discuss and select 3D animation software with relevant personnel to ensure animated sequences meet technical and creative requirements 2.6 Identify audio assets to support animations as required
3. Produce animated sequences for review	3.1 Create 3D animations using software and animation techniques to suit design requirements 3.2 Adopt safe ergonomic practices when using equipment for long periods of time 3.3 Apply basic animation, screen, visual design and communication principles to produce animations 3.4 Apply real world camera techniques to virtual cameras used in 3D animation as required 3.5 Confirm with relevant personnel that models have not infringed copyright 3.6 Render completed animated sequences using appropriate output file formats 3.7 Save and store animated sequences using standard naming conventions and version control protocols 3.8 Demonstrate 3D animated sequences to relevant personnel for evaluation by agreed deadlines
4. Finalise animated sequences	4.1 Review animated sequences to assess creative solutions to design briefs, appropriateness to users or audience, and technical feasibility 4.2 Discuss and confirm additional requirements or modifications with relevant personnel, and complete changes as required for signoff

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1-1.3, 1.5, 2.1, 2.2, 3.5, 4.1	<ul style="list-style-type: none"> <li>Interprets production documentation and design specifications in relation to own duties and copyright issues</li> </ul>
Writing	3.6, 3.7, 4.2	<ul style="list-style-type: none"> <li>Generates and records information for the design of 3D animations in required format</li> <li>Uses standard naming conventions and version control protocols when saving and storing files</li> </ul>
Oral Communication	1.1, 1.5, 2.3-2.5, 4.2	<ul style="list-style-type: none"> <li>Obtains information by listening and questioning</li> <li>Uses clear language to discuss ideas, contribute information, and express requirements</li> </ul>
Navigate the world of work	3.2, 3.5	<ul style="list-style-type: none"> <li>Understands and complies with legislative requirements relevant to role</li> </ul>
Interact with others	1.1, 1.5, 2.3-2.5, 3.8, 4.2	<ul style="list-style-type: none"> <li>Responds to and draws on others' perspectives when negotiating design of 3D animations</li> <li>Collaborates to achieve joint outcomes in the design process, playing an active role in facilitating effective group interaction</li> </ul>
Get the work done	1.1-1.5, 2.1-2.3, 2.5, 2.6, 3.3-3.8, 4.1, 4.2	<ul style="list-style-type: none"> <li>Organises and completes animation requirements in line with specifications, arranging consultations at key design points</li> <li>Takes responsibility for decisions directly related to own tasks</li> <li>Uses digital software to create drawings and animations and to manage files</li> </ul>

# Assessment Requirements for CUAANM302 Create 3D digital animations

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

## Performance Evidence

Evidence of the ability to:

- interpret design specifications and generate a range of creative ideas and concepts that respond to the brief
- collaborate with others to clarify requirements, discuss ideas, select final design concept and review final animations
- use animation software to create 3D animations that meet requirements of design briefs within production deadlines
- correctly name and store animations in appropriate file formats.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain basic animation techniques and principles
- describe screen, visual design and communication principles as they apply to animations
- outline intellectual property considerations if using images from external sources
- outline work health and safety requirements as they apply to using screens and keyboards for extended periods of time.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- production documents and briefs
- resources, equipment and software required for 3D animations

- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUAANM313 Create 3D digital models

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

### Application

This unit describes the skills and knowledge required to create 3D digital models that are produced primarily for online and mobile device application, and meet technical and design specifications.

The unit applies to those who clarify production requirements and produce 3D models under supervision, but they may have responsibility for planning their own work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Visual communication – Animation and digital effects

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Clarify work requirements	1.1 Clarify requirements and purpose for 3D digital models with reference to production documents 1.2 Confirm workflow sequences and production schedule deadlines in consultation with required personnel 1.3 Clarify modelling technique that suits production requirements with required personnel 1.4 Discuss and select digital modelling software that suits production delivery platform and modelling techniques, with required personnel 1.5 Gather and analyse reference materials for visualising 3D models
2. Develop 3D digital	2.1 Block out models based on reference materials using software

ELEMENT	PERFORMANCE CRITERIA
models	features and modelling principles 2.2 Adopt safe ergonomic practices when using screens and keyboards for extended periods of time 2.3 Apply different effects to shape models according to design requirements using software features and geometry 2.4 Perform basic rigging to an animated skeleton to test models' topology allows for required deformation 2.5 Refine and check integrity of models progressively until they meet design requirements 2.6 Confirm with required personnel that models have not infringed copyright 2.7 Test and identify model faults, and modify as required 2.8 Apply models to required personnel for feedback, and adjust as required
3 Finalise 3D digital models	3.1 Review 3D models to ensure creative solutions meet design specifications 3.2 Discuss and confirm with required personnel additional requirements or modifications to 3D models and undertake necessary amendments 3.3 Render and output models in required format and submit to required personnel by agreed deadlines 3.4 Make back-up copies of files, and save and store 3D models using standard naming conventions

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Numeracy	<ul style="list-style-type: none"> <li>Performs required adjustments to models using knowledge of shapes, symmetry and solids</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>Explains ideas and requirements clearly and listens carefully to verbal instructions</li> <li>Confirms understanding using questioning and listening skills</li> </ul>
Reading	<ul style="list-style-type: none"> <li>Analyses textual information from production documents and reference materials to confirm design requirements</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Clarifies requirements and prepares work-related documentation using specific language required for audience</li> </ul>

<b>SKILL</b>	<b>DESCRIPTION</b>
Planning and organising	<ul style="list-style-type: none"> <li>Plans, organises and implements tasks required to meet requirements within deadlines</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Applies legislative requirements relevant to own role</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Responds to and draws on others' perspectives when negotiating design of 3D digital models</li> <li>Collaborates to achieve joint outcomes in the design process, playing an active role in facilitating effective group interaction</li> <li>Makes aesthetic and technical decisions in collaboration with others</li> </ul>
Technology	<ul style="list-style-type: none"> <li>Uses digital software to create models and manage files</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to CUAANM303 Create 3D digital models.

## Links

Companion Volume Implementation Guide is found on VETNet -

# Assessment Requirements for CUAANM313 Create 3D digital models

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- create at least two 3D digital models that meet design requirements and production deadlines.

In the course of the above, the candidate must:

- collaborate with others to clarify requirements, discuss techniques, select modelling software and review models
- use 3D modelling software proficiently to build models and apply various modelling effects
- adopt safe ergonomic practices when using screens and keyboards for extended periods of time
- correctly store 3D models in appropriate file formats using industry naming conventions.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- stages in the production process from initial design through to finished product
- basic modelling principles used to build 3D digital models
- methods of using geometry to create scale, form, weight and volume in 3D models
- standard file naming conventions for saving and storing 3D models
- concept of integrity as it applies to 3D modelling
- relationship between topology and deformation
- processes of rendering as it applies to 3D modelling
- processes for using digital modelling software
- intellectual property and copyright considerations if using images from external sources
- work health and safety requirements relating to using screens and keyboards for extended periods of time.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- production documentation
- software for producing 3D digital models
- interaction with others required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUAANM512 Create 3D digital environments

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

### Application

This unit describes the skills and knowledge required to create 3D digital environments using appropriate software, reference material and established designs.

The unit applies to those who follow technical and design specifications to produce 3D environments to scale. As members of a production team they must consider how later production stages rely on, and therefore influence, the creation of their work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Visual communication – Animation and digital effects

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Clarify work requirements	1.1 Determine requirements and purpose for 3D digital environments with reference to production documentation 1.2 Identify workflow sequences and production deadlines in consultation with required personnel 1.3 Select software that best suits the type of production and delivery platform for which 3D digital environments are being created 1.4 Gather and analyse reference materials for visualisation of 3D environments
2. Create 3D digital environments	2.1 Build a previsualisation of environments in relation to reference materials using software features, and submit to required personnel for approval

ELEMENT	PERFORMANCE CRITERIA
	2.2 Build realistically detailed environment models and progressively refine them until they meet design requirements 2.3 Check integrity of models and ensure spatial relationship meets design requirements 2.4 Apply texture coordinates according to design requirements 2.5 Create and incorporate matte paintings according to design requirements 2.6 Apply lighting and shaders according to design requirements 2.7 Experiment with different lighting rigs and select a rig that meets design requirements 2.8 Adopt safe ergonomic practices when using screens and keyboards for extended periods of time 2.9 Continuously refine all aspects of 3D digital environments until required creative effect is achieved 2.10 Submit environments to required personnel for feedback on whether production requirements have been met and make final adjustments as required
3. Finalise projects	3.1 Render and output environments and submit to required personnel by agreed deadlines 3.2 Make back-up copies of files, and save and store animations using appropriate output file formats and standard naming conventions 3.3 Participate in project evaluations and contribute ideas and suggestions about ways to improve future projects

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Oral communication	<ul style="list-style-type: none"> <li>• Uses clear language to explain and discuss task requirements</li> <li>• Confirms understanding using questioning and listening techniques</li> </ul>
Reading	<ul style="list-style-type: none"> <li>• Interprets and analyses textual information from different sources for idea development and confirmation of job parameters</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Plans and manages workflow processes to ensure design and production requirements are satisfied</li> <li>• Documents task requirements and workflow sequences</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Follows organisational procedures when managing files and directories</li> <li>• Adheres to work health and safety requirements</li> </ul>

<b>SKILL</b>	<b>DESCRIPTION</b>
Teamwork	<ul style="list-style-type: none"><li>• Uses appropriate communication practices and protocols to present drafts</li><li>• Refines ideas and discusses project outcomes in collaboration with others</li></ul>
Technology	<ul style="list-style-type: none"><li>• Uses digital tools to develop refined, technically accurate 3D digital environments for different productions and delivery platforms using digital tools</li></ul>

## Unit Mapping Information

Supersedes and is equivalent to CUAANM502 Create 3D digital environments.

# Assessment Requirements for CUAANM512 Create 3D digital environments

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- create detailed 3D digital environments that meet design requirements and production deadlines for at least two different productions.

In the course of the above, the candidate must:

- apply a range of modelling techniques to achieve creative and realistic effects
- select and proficiently use required animation software to achieve product outcomes
- store 3D environments in required file formats using industry naming conventions
- participate productively in project evaluation for improvement
- adopt safe ergonomic practices when using screens and keyboards for extended periods of time
- work collaboratively with others in a production team to achieve project outcomes.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- strategies to address typical challenges when creating digital environments
- digital modelling techniques used in development of 3D environments
- the realistic construction of 3D environments using spatial relationship elements including scale, form, weight and volume
- strategies to evaluate projects to improve future projects
- concept of integrity in modelling 3D environments
- different 3D animation software
- following concepts and their application to developing 3D environments:
  - texture coordinates
  - matte paintings
  - lighting and shaders

- required file formations and industry naming conventions
- work health and safety requirements relating to working with computers and keyboards for extended periods of time.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- production documentation
- interaction with others required to demonstrate the performance evidence
- animation software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUACAL311 Produce calligraphy

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to explore and use different techniques to produce finished calligraphic works. Works are informed by design concepts which are reviewed and adjusted during the work in progress.

It applies to individuals who are developing their expertise in design and technique. They work under supervision but have some independence and use discretion and judgement within defined guidelines.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Visual communication – calligraphy

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan calligraphy work	1.1 Discuss ideas and techniques for own calligraphic work in consultation with required personnel 1.2 Research historical and contemporary calligraphic practices to apply to own work 1.3 Consider intellectual property requirements for own work 1.4 Select calligraphy strategies and techniques for own work
2. Create calligraphy work	2.1 Calculate, select and organise type and quantity of calligraphic equipment, tools and materials based on the requirements of chosen work 2.2 Use combined calligraphy techniques, and elements and design

ELEMENT	PERFORMANCE CRITERIA
	<p>principles when creating desired effects</p> <p>2.3 Handle equipment, tools and materials safely and minimise waste throughout all processes</p> <p>2.4 Review work in progress and make adjustments as required to produce final work</p>
3. Finalise and evaluate calligraphy work	<p>3.2 Dispose of equipment, tools and materials according to workplace safety and sustainability requirements as required</p> <p>3.3 Clean and store equipment, tools and materials according to specific requirements of different items</p> <p>3.4 Seek feedback from relevant personnel on proficiency of work and success in communicating ideas</p> <p>3.5 Evaluate own work using feedback from relevant personnel</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> <li>Interprets and evaluates complex and unfamiliar information for supporting design ideas</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Documents comprehensive records of production using clear, industry relevant terminology</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Shares ideas for designs and techniques using industry relevant terminology</li> <li>Uses questioning and active listening techniques to elicit information and feedback, and confirm understanding</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Determines quantities of equipment, tools and materials and measures dimensions of art pieces using basic calculations</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Follows defined guidelines for legal, safety and sustainability practices</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Seeks perspective and guidance from others to inform design ideas</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>Organises processes to set up work, assess techniques and produce creative work with guidance from others</li> <li>Makes routine decisions directly related to own role</li> </ul>
Problem solving	<ul style="list-style-type: none"> <li>Uses trial and error processes to solve technique problems</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to CUACAL301 Produce calligraphy.

## Links

Companion Volume Implementation Guide is found on VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

## Assessment Requirements for CUACAL311 Produce calligraphy

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- create at least two pieces of calligraphic work that adapt and combine calligraphy techniques and show technical proficiency in chosen techniques.

In the course of the above, the candidate must:

- discuss ideas and techniques from historical and contemporary calligraphic practice
- review and document the work process.

### Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- techniques for achieving different effects in calligraphic works
- historical and contemporary principles of calligraphic practice and how they can inform own design ideas
- key characteristics and interrelationships used in calligraphic work to inform elements and principles of design
- tools and equipment used for producing calligraphic work, including:
  - physical features and uses
  - maintenance techniques
  - storage requirements
- physical properties and capabilities of different materials and techniques used to produce calligraphic work
- typical workspace requirements for producing calligraphic work including ways of organising space and equipment for efficient work operation
- procedures for working safely with calligraphy materials, tools and equipment
- copyright, moral rights and intellectual property requirements with reference to calligraphy

- techniques, workplace health safety requirements, and sustainability requirements for disposing of calligraphy resources.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- equipment, tools, materials and information sources required for producing calligraphic work.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUADES201 Follow a design process

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to follow a design process at a basic level, incorporating an element of problem solving to identify and resolve challenges that may hinder the process. It involves establishing the challenges faced in the design process, exploring different ideas for solutions and solving the associated challenges through implementation of solutions.

The unit applies to those who work under direct supervision and respond to specific issues or changes which may relate to product and service requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Design – Design Process

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Clarify the challenge	1.1 Confirm nature and scope of challenge with stakeholders 1.2 Agree on specific objectives with stakeholders 1.3 Identify constraints that may impact the design process 1.4 Identify and source applicable supporting information and assistance
2. Explore different ideas and select solutions	2.1 Generate different ideas according to challenge requirements 2.2 Explore different options and ideas for meeting requirements and discuss with stakeholders

ELEMENT	PERFORMANCE CRITERIA
	2.3 Analyse different ideas and feedback and select preferred solution 2.4 Summarise key ideas and present to stakeholders in required format 2.5 Obtain required approvals to progress solution
3. Implement solution	3.1 Schedule key tasks and organise resources required for implementation 3.2 Carry out testing, prototyping or trialling of proposed solution 3.3 Maintain any required documentation 3.4 Identify problems and seek advice and guidance from others
4. Evaluate solution	4.1 Check success of solution based on original objectives 4.2 Seek feedback from required stakeholders 4.3 Review both the solution and the process undertaken and record for future reference

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Learning	<ul style="list-style-type: none"> <li>Reviews own work and identifies improvement opportunities</li> </ul>
Reading	<ul style="list-style-type: none"> <li>Reviews and interprets textual information from different sources to scope job requirements and generate ideas</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Produces meeting summaries using simple language and structure</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Gains information, confirms understanding and seeks feedback using questioning and listening techniques</li> <li>Presents ideas using correct pronunciation and vocabulary</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Recognises and interprets numerical information relating to timeframes and dates</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Cooperates with others in immediate work context</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>Plans routine tasks with familiar goals and outcomes</li> </ul>

<b>SKILL</b>	<b>DESCRIPTION</b>
Self-management	<ul style="list-style-type: none"><li>• Seeks assistance when problems are beyond immediate responsibilities or experience</li><li>• Takes responsibility for routine low-impact decisions within familiar situations</li></ul>
Initiative and enterprise	<ul style="list-style-type: none"><li>• Identifies ideas in use in other contexts and considers how they might be applied in own context with minimal adjustment</li></ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBDES201 Follow a design process.

## Links

Companion Volume Implementation Guide is found on VETNet -

# Assessment Requirements for CUADES201 Follow a design process

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- follow the design process for at least two challenges.

In the course of the above, the candidate must:

- determine project objectives, possible constraints and required support materials
- collaborate with others to generate ideas, solve problems and seek approvals and feedback
- schedule tasks and create project documentation that support proposed solutions
- review work and identify at least one area for future improvement.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- creative thinking techniques used to generate ideas
- key steps in the design process as a way of thinking and solving problems
- sources of information for new ideas, applicable to specific context.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- office equipment required to implement solutions.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## CUADES202 Evaluate the nature of design in a specific industry context

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to examine and consider the design process in a specific industry context. It involves exploring industry specific designs, establishing links between designs and own work and retaining knowledge on industry design trends.

The unit applies to those who, in any context, need to develop a basic appreciation and knowledge of the way design works in a particular industry, and of its potential impacts on industry and individual work practice.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Design – Design Process

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Explore design in given industry context	1.1 Investigate the nature, history, role and importance of design in one's own industry context 1.2 Evaluate roles played by designers and other contributors in design process 1.3 Source information on impact of technology on design in the industry
2. Examine links between design and own work	2.1 Investigate impact of design on own work 2.2 Determine role of individual workers across the industry

ELEMENT	PERFORMANCE CRITERIA
	in affecting future design directions
3. Keep up-to-date with industry design trends	3.1 Identify and access opportunities and maintain currency of knowledge about industry design trends 3.2 Evaluate how design trends affect the overall industry and how it operates 3.3 Share information and discuss emerging trends with work colleagues 3.4 Identify trends that will impact own work and seek opportunities to develop applicable skills

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Learning	<ul style="list-style-type: none"> <li>Identifies and uses opportunities to maintain and improve skills and knowledge</li> </ul>
Reading	<ul style="list-style-type: none"> <li>Reviews textual information from different sources and identifies applicable information</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Prepares specific information using clear and appropriate language to present to other personnel</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Participates in verbal exchanges using vocabulary, style and tone applicable for audience</li> <li>Clarifies understanding using listening techniques</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Achieves shared goals in collaboration with others</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>Plans routine tasks with familiar goals and outcomes</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>Identifies ideas in use in other contexts and considers how they might be applied in own context with minimal adjustment</li> <li>Identifies and applies some general design and operating principles of digital tools to inform design work</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Takes responsibility for routine low-impact decisions within familiar situations</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBDES202 Evaluate the nature of design in a specific industry context.

# Assessment Requirements for CUADES202 Evaluate the nature of design in a specific industry context

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- evaluate the nature of design in at least one industry context.

In the course of the above, the candidate must:

- identify design concepts from different information sources on design and identify how they can be applied to own work.
- identify one or more opportunities to maintain currency of industry trends and design skills
- identify and share information on emerging design trends with colleagues.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- consumer/end-user expectations of design in the chosen industry context
- current and emerging technologies and their effects on design in the chosen industry context
- influential designers, both past and present, in the chosen industry context
- major design trends in chosen industry context
- role of design in chosen industry context.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- office equipment and resources

- sources of information on design in a specific industry context.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## CUADES301 Explore the use of colour

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to explore the use of colour and to apply colour theory. It involves researching colour and colour theory, experimenting with different colours and colour-combinations and communicating different ideas using colour.

It applies to individuals whose work involves understanding and applying the use of colour according to colour requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Design – Design Process

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Source information on colour and colour theory	1.1 Identify and access sources of information on colour and colour theory 1.2 Evaluate and collate information on colour and its application in different contexts
2. Experiment with colour	2.1 Develop ideas on testing, challenging or confirming colour theory 2.2 Test different colours and colour-combinations through experimentation with different ideas 2.3 Confirm safe use of materials, tools and equipment during experimentation with colour

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
3. Communicate ideas through use of colour	3.1 Investigate how colour communicates particular ideas 3.2 Select materials, tools and equipment applicable to idea 3.3 Apply colour to communicate idea based on own knowledge of colour and colour theory 3.4 Review own use of colour and what it communicates 3.5 Seek and obtain feedback from others on way colour has been used and its success in communicating idea 3.6 Present and store work samples as required for future use

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

<b>SKILL</b>	<b>DESCRIPTION</b>
Reading	<ul style="list-style-type: none"> <li>Evaluates and integrates facts and descriptions of colour from different texts including text embedded in visual media</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Produces different text types using applicable vocabulary, grammatical structure and conventions</li> <li>Applies basic referencing and sequencing of professional and archival resources</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Presents ideas, asks questions and listens, seeks feedback and generates ideas</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Selects and uses mathematical information for measurement and volume</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Takes some personal responsibility for adherence to legal and regulatory requirements with specific reference to safety</li> <li>Takes responsibility for routine low-impact decisions within familiar situations</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>Plans, sequences and implements tasks required to achieve outcomes</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>Evaluates decisions on how well they meet stated goals</li> <li>Contributes to design of new approaches within immediate work environment</li> </ul>
Technology	<ul style="list-style-type: none"> <li>Follows routine procedures for using digital technology to enter, store and retrieve information directly relevant to role</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBDES301 Explore the use of colour.

## Links

Companion Volume Implementation Guide is found on VETNet -

# Assessment Requirements for CUADES301 Explore the use of colour

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- communicate at least two different ideas using colour.

In the course of the above, the candidate must:

- research information on colour and colour theory to inform work
- develop ideas through experimentation with different colours and techniques.
- review completed work and gain feedback on the effectiveness of the way colour has been used.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- colour attributes and colour relationships related to communicating ideas
- colour theories and their application in different contexts
- limitations of colour theory
- materials, tools and equipment required to experiment with colour
- ways other practitioners use colour in communicating ideas.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- office equipment and resources
- materials, resources and equipment needed to apply colour in the applicable work context.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## CUADES302 Explore and apply the creative design process to 2D forms

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to explore and creatively apply the design process to the development of two-dimensional (2D) forms. It involves exploring ideas and the creative design process, and communicating different ideas through application of design processes to 2D forms.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Design – Design Process

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Source information on 2D design	1.1 Identify and access applicable sources of information on 2D design 1.2 Evaluate and collate information on features of 2D design
2. Explore the creative design process for 2D forms	2.1 Generate different ideas and options for use of 2D design using creative thinking techniques 2.2 Explore and challenge different ideas using experimentation of different 2D designs 2.3 Challenge assumptions, evaluate ideas and refine approaches 2.4 Consciously change perspective, and evaluate

ELEMENT	PERFORMANCE CRITERIA
	ideas and situations in new ways
3. Communicate ideas through application of design processes to 2D forms	3.1 Investigate and examine how a particular idea might be communicated in 2D 3.2 Select materials, tools and equipment applicable to the realisation of idea 3.3 Apply a creative design process to produce different 2D idea realisations 3.4 Examine own application of design process and success in communicating the idea 3.5 Seek and obtain feedback from others about the 2D form and its success in communicating idea 3.6 Present and store concept realisations and work samples as required

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> <li>Interprets textual information from applicable sources to determine and adhere to requirements</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Produces different text types using applicable vocabulary, grammatical structure and referencing conventions</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Participates in verbal exchanges using vocabulary, style and tone applicable to audience</li> <li>Clarifies understanding using listening techniques</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Performs mathematical calculations to produce 2D designs</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>Plans and organises required tasks</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>Identifies ideas in use in other contexts and considers how they might be applied in own context</li> <li>Selects new ideas that may improve a process in immediate work context</li> <li>Evaluates decisions on how well they meet stated goals</li> </ul>

# Assessment Requirements for CUADES302 Explore and apply the creative design process to 2D forms

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- realise at least two different ideas using creative design processes on two-dimensional (2D) forms.

In the course of the above, the candidate must:

- apply creative thinking techniques and experimentation processes based on available resource materials
- review own work and identify one or more areas for future improvements.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- creative thinking techniques that can be used as part of the design process
- elements and principles of design as applied to 2D forms
- materials, tools and equipment required for the design of 2D forms
- ways an individual can interpret and choose ideas within the design process
- common challenges that arise in the design of 2D forms.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- materials, resources and equipment needed to apply design processes to 2D forms.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Numeracy	<ul style="list-style-type: none"> <li>Performs mathematical calculations required to produce 3D concept designs</li> </ul>
Get the work done	<ul style="list-style-type: none"> <li>Plans and organises required tasks</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>Identifies ideas in use in other contexts and considers how they might be applied in own context</li> <li>Selects and adopts new ideas to improve a process in immediate work context</li> <li>Evaluates decisions on how well they meet stated goals</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Takes responsibility for routine low-impact decisions within</li> </ul>

SKILL	DESCRIPTION
	familiar situations

## Unit Mapping Information

Supersedes and is equivalent to BSBDES303 Explore and apply the creative design process to 3D forms.

## Links

Companion Volume Implementation Guide is found on VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

# Assessment Requirements for CUADES303 Explore and apply the creative design process to 3D forms

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- realise at least two different ideas using creative design processes on three-dimensional (3D) forms.

In the course of the above, the candidate must:

- apply creative thinking techniques and experimentation processes based on available resource materials
- review own work and identify one or more areas for future improvements.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- creative thinking techniques that can be used as part of the design process
- elements and principles of design as applied to 3D forms
- materials, tools and equipment required for the design of 3D forms
- ways an individual can interpret and choose ideas within the design process
- challenges and issues in the design of 3D forms
- relationships between form and space.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- materials, resources and equipment needed to apply design processes to 3D forms.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## CUADES304 Source and apply design industry knowledge

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to source, apply and update general knowledge of the design industry based on problem solving, aesthetics, materials and processes appropriately used within the design industry. It involves researching information on different features of the industry, applying it to one's own work practice, and remaining up-to-date on industry practices.

It applies to individuals who work under supervision and support the professional design process such as evaluating the nature of design.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Design – Design Process

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Source and apply information on the structure and operation of design industry	1.1 Identify and analyse information on the design industry and professional design practice 1.2 Inform own design practice and work using knowledge of the design industry 1.3 Obtain information on employment obligations and opportunities in the design industry 1.4 Apply knowledge of employment obligations and opportunities within day-to-day work activities
2. Seek information on new design	2.1 Identify sources of information on new technology

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
technology	affecting different areas of design practice 2.2 Investigate applicable technologies to assist required work performance
3. Update industry knowledge	3.1 Identify and use opportunities to update knowledge of the design industry and monitor current issues of concern to the industry 3.2 Share updated knowledge with colleagues and peer group as required, and incorporate into day-to-day work activities
4. Apply information on ethical and legal work practices	4.1 Source information on ethical and legal work practices in the context of design 4.2 Share updated knowledge on ethical and legal work practice in day-to-day work activities

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

<b>SKILL</b>	<b>DESCRIPTION</b>
Reading	<ul style="list-style-type: none"> <li>Evaluates different texts to determine legislative and regulatory requirements, and current industry practices</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Produces different text types using applicable vocabulary, grammatical structure and referencing conventions</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Presents information using vocabulary, style and tone appropriate to audience</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Identifies and comprehends numerical information in different familiar texts</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Takes some personal responsibility for adherence to legal, ethical and regulatory requirements</li> <li>Takes responsibility for routine low-impact decisions within familiar situations</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>Plans and organises required tasks</li> <li>Contributes to design of new approaches within immediate work environment</li> </ul>
Technology	<ul style="list-style-type: none"> <li>Completes routine tasks using common digital systems and tools</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBDES304 Source and apply design industry knowledge.

## Links

Companion Volume Implementation Guide is found on VETNet -

# Assessment Requirements for CUADES304 Source and apply design industry knowledge

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- identify the following for working in the design industry and its application to own work:
  - employment obligations and opportunities
  - new technology
  - ethical and legal work practices.
- participate in at least one open information sharing session with peers
- investigate one or more new technologies and identify how they can affect and assist design output
- identify and participate in at least one activity to maintain currency in design industry trends and practices.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- relationship between design and allied industries design industry
- impact of legislation, including intellectual property, on the design industry
- ethical work practices in the design industry
- current and emerging technologies used within the design industry
- obligations of employers and employees in the design industry
- key organisations that may provide advice or information about the design industry
- sources of information on the design industry and ways of maintaining current industry knowledge.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- sources of information on industry structure, business practices, technologies, and ethical, legal and intellectual property requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## CUADES305 Source and apply information on the history and theory of design

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to source information on design history and theory, and to apply that information in the individual's design work.

It applies to individuals who work in design and need to develop and maintain a general knowledge of design history and theory.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Design – Design Process

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collect information on design history and theory	1.1 Identify and access applicable sources of information on design history and theory 1.2 Organise research material and findings for use in design practice, facilitating easy access and cross-referencing
2. Apply information to own area of work	2.1 Evaluate information in the context of current design practice 2.2 Assess which aspects of information on design history and theory could be used or adapted to inform current practice 2.3 Apply understanding of own area of work using applicable information in culturally appropriate way

ELEMENT	PERFORMANCE CRITERIA
3. Update and maintain knowledge of design trends	3.1 Identify and use opportunities to update and expand knowledge of design trends and developments 3.2 Incorporate and integrate knowledge into design activities

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> <li>Identifies, interprets and evaluates information on historical and current design trends from different sources</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Notes findings and sources of information for design knowledge, trends and developments</li> <li>Documents information for colleagues and peers as requested</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Asks questions and clarifies information, listens to responses and shares ideas with others</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Understands main tasks, responsibilities and boundaries of own role</li> <li>Takes responsibility for routine low-impact decisions within familiar situations</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>Plans and implements required tasks</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>Contributes to new approaches within immediate work environment</li> </ul>
Technology	<ul style="list-style-type: none"> <li>Follows routine procedures for using digital technology to enter, store and retrieve information directly applicable to role</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBDES305 Source and apply information on the history and theory of design.

## Links

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

# Assessment Requirements for CUADES305 Source and apply information on the history and theory of design

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- identify features of the history and theory of design and how they can be adapted and applied to own work.

In the course of the above, the candidate must:

- source and organise research findings on history and theory of design applicable to own work
- identify one or more opportunities to expand on maintain currency of theoretical and design knowledge.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- current design trends in industry contexts applicable to that of one's own work
- evolution of design in industry contexts applicable to that of one's own work
- organisational information practices and their application in industry contexts applicable to that of one's own work
- sources of information on design history and theory applicable to own design work.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- sources of information on applicable industry history and theories of design.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## CUADES411 Generate design solutions

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to generate design solutions in response to a particular design need.

The unit applies to those who generate concepts and solutions in response to a design challenge in any industry context. The starting point may be an open or closed brief; a spontaneous idea; modification of an existing product, service, process or system; or a point in an ongoing design process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Design – Design Process

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Define the design challenge	1.1 Determine and evaluate stakeholder needs 1.2 Clarify specifications, parameters and constraints of the design challenge in consultation with required personnel 1.3 Articulate essence of the design challenge in a format that meets stakeholder requirements
2 Undertake research to inform the design solution	2.1 Source and evaluate information that may assist in responding to the design challenge 2.2 Determine historical, current and future perspectives and trends that might inform design solutions 2.3 Identify applicable social, economic, environmental,

ELEMENT	PERFORMANCE CRITERIA
	<p>ethical and cultural issues that may impact design solutions</p> <p>2.4 Analyse, distil and collate information to inform the development of the design solution</p>
3 Communicate and collaborate with others	<p>3.1 Establish and develop working relationships with required personnel</p> <p>3.2 Seek and integrate input and ideas from others during design process</p> <p>3.3 Inform key stakeholders about progress of the design and related implications</p> <p>3.4 Negotiate and agree on any changed requirements or modifications</p>
4 Generate ideas and responses to the design challenge	<p>4.1 Examine and integrate ideas generated from research and consultation</p> <p>4.2 Generate different options and ideas using creative thinking techniques</p>
5 Select a design solution	<p>5.1 Evaluate different options and ideas using developed criteria</p> <p>5.2 Select a solution based on agreed criteria and in consultation with required personnel</p> <p>5.3 Adjust and refine proposed design solution based on research, testing and reflection</p> <p>5.4 Present proposed design solution with applicable supporting documentation according to project requirements</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> <li>Researches, collates and analyses textual information from different sources</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Documents ideas, sources and concepts using applicable formats and specific language</li> <li>Refines and edits work</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Participates in verbal exchanges of ideas and elicits views and opinions of others using listening and questioning techniques</li> </ul>

<b>SKILL</b>	<b>DESCRIPTION</b>
	<ul style="list-style-type: none"> <li>Clarifies, explains or presents information relating to design solution using clear and specific language applicable for audience</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Interprets numeric data and applies mathematical calculations applicable to design solution</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Understands nature and purpose of own role and associated responsibilities and how it contributes to the work of others in immediate work context</li> <li>Selects the applicable form, channel and mode of communication for a specific purpose required for own role</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Cooperates with others as part of familiar routine activities and contributes to specific activities requiring joint responsibility and accountability</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>Takes responsibility for planning and implementing required tasks</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>Analyses and evaluates information systematically to aid in decision making and problem solving</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>Applies some basic principles of lateral thinking to generate new or innovative ideas</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBDES401 Generate design solutions.

## Links

Companion Volume Implementation Guide is found on VETNet -

# Assessment Requirements for CUADES411 Generate design solutions

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- generate design solutions according to at least two different stakeholder needs.

In the course of the above, the candidate must:

- develop and document a design solution through research, reflection, and generation and refinement of ideas
- apply principles of functionality, ergonomics, aesthetics and sustainability to the development of ideas
- communicate effectively in collaboration with others in the design process.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- elements and principles of design and their application in the applicable design context
- key features of the wider industry, and the economic, social and historical context design solutions are being generated in
- design trends and technologies, including other designs and the work of other design practitioners in the relevant industry context
- sources of information that support the development of technical and other knowledge
- materials, tools, equipment, techniques and processes used in the generation of design solutions in the applicable industry context.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- interaction with others for the collaborative nature of the design process
- sources of information on design for the applicable industry context.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## CUADES412 Interpret and respond to a design brief

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to interpret and creatively respond to a design brief through the production of work. Individuals are required to integrate the creative, communication and planning processes that support effective response to a design brief.

The unit applies to those who work in any industry or design context where work is prescribed by a commissioning agent/client in a brief. Work is carried out independently, although guidance is available if required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Design – Design Process

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Interpret design brief	1.1 Analyse the specifications of design brief 1.2 Establish client for the proposed product/service 1.3 Identify and clarify specifications, parameters or constraints of design brief in consultation with required personnel 1.4 Source and evaluate information pertinent to design brief
2 Explore and develop design concept	2.1 Generate ideas for design concept through research, exploration and experimentation 2.2 Develop initial design concept consistent with design brief parameters 2.3 Evaluate and explore options for refining concept that meets

ELEMENT	PERFORMANCE CRITERIA
	<p>design brief parameters</p> <p>2.4 Refine options and select approach which best meets design brief requirements</p>
3 Liaise with client	<p>3.1 Agree on communication process and frequency of communication with client</p> <p>3.2 Present concepts for work at required stages during design process</p> <p>3.3 Present and explore different options and creative ideas with client when required</p> <p>3.4 Reach agreement on concept for work which complies with design brief</p>
4 Plan production of work	<p>4.1 Assess specific design production risks</p> <p>4.2 Identify all components required to produce a prototype</p> <p>4.3 Assess technical requirements for production against specified guidelines</p> <p>4.4 Identify and consult with support services required for production</p> <p>4.5 Produce a prototype and evaluate against design brief requirements</p> <p>4.6 Analyse prototype and determine any further adjustments to production requirements</p> <p>4.7 Finalise production specifications supported by required documentation</p>
5 Complete production of work	<p>5.1 Collect and organise required components for the work</p> <p>5.2 Produce or monitor the production of work and confirm all parameters of design brief are met</p> <p>5.3 Document work progress in format required for the nature of the design and requirements of design brief</p> <p>5.4 Seek client approval for work as required</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> <li>Analyses textual information and interprets job specifications</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Develops, documents and amends workplace documentation using</li> </ul>

<b>SKILL</b>	<b>DESCRIPTION</b>
	specific industry-related terminology
Oral Communication	<ul style="list-style-type: none"> <li>Participates actively in verbal exchanges of ideas and elicits the views and opinions of others using listening and questioning techniques</li> <li>Clarifies, explains and presents information using clear language</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Interprets numeric data and applies mathematical calculations to produce prototype according to design specification</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Identifies the requirements of important communication exchanges, selecting applicable channels, format, tone and content to suit purpose and audience</li> <li>Collaborates and negotiates with others to achieve joint outcomes</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Takes responsibility for planning and implementing required tasks</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>Analyses and evaluates information systematically to aid in decision making and problem solving</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>Applies some basic principles of lateral thinking to generate new or innovative ideas</li> <li>Understands and explicitly applies some basic principles of lateral thinking to generate new or innovative ideas</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBDES402 Interpret and respond to a design brief.

## Links

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

# Assessment Requirements for CUADES412 Interpret and respond to a design brief

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- interpret and respond to at least two different design briefs.

In the course of the above, the candidate must:

- articulate and document the process of developing own design practice
- adjust work processes via peer feedback and self-evaluation.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- current and emerging trends and technologies in the design discipline related to the brief described in the performance evidence, and the opportunities and challenges they represent
- sources of information relating to work opportunities and career planning.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- materials, design briefs, resources and equipment used in the development of technical and conceptual skills in the design context described in the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## CUADES413 Develop and extend design skills and practice

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to develop and extend skills as a practising designer. It involves obtaining and developing conceptual and technical skills, developing an individual style in these skills and evaluating the use of these skills in own work tasks. Designers must continually refine, develop and evaluate their own conceptual and technical skills. Research, experimentation and collaboration are key factors in this process.

The unit applies to those who work as a designer, in any industry context, either independently or employed by an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Design – Design Process

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Acquire and develop technical skills	1.1 Plan strategies for development of applicable technical skills in design practice 1.2 Plan and use opportunities to develop and assess technical skills 1.3 Identify and use practice, feedback, discussion and evaluation opportunities to continuously improve technical skills 1.4 Develop and extend technical skills through testing capabilities of materials, tools and equipment 1.5 Identify and use applicable media to stimulate technical and professional development

ELEMENT	PERFORMANCE CRITERIA
2 Develop conceptual skills and ideas	2.1 Engage in ongoing experimentation and exploration of different ideas and techniques 2.2 Discuss ideas with others and apply knowledge gained to own work 2.3 Stimulate conceptual and technical skills development using studies of others work 2.4 Research and share ideas across different design disciplines 2.5 Identify and use different opportunities to develop own skills and keep informed about current design practice
3 Develop own voice	3.1 Explore and experiment with new ideas in making and interpreting design work 3.2 Develop own voice and expand practice using technology where required
4 Evaluate own work	4.1 Seek and apply constructive criticism from others 4.2 Evaluate own work against planned strategy for own practice 4.3 Evaluate own work in the context of work by others 4.4 Adjust work processes and practice as necessary to improve technical, conceptual and commercial outcomes
5 Research work opportunities	5.1 Identify sources of information relating to work opportunities for designers 5.2 Identify networks and promotional opportunities for designers which may be helpful in developing career opportunities 5.3 Incorporate research results and information into own work and career planning

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Learning	<ul style="list-style-type: none"> <li>Identifies and implements improvements in own creative and technical design skills and practice</li> </ul>
Reading	<ul style="list-style-type: none"> <li>Researches and evaluates a variety of textual information from different sources</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Documents ideas, feedback and research results using clear and specific language</li> </ul>
Oral	<ul style="list-style-type: none"> <li>Participates in different verbal exchanges and presentations using applicable tone and vocabulary to suit the audience</li> </ul>

<b>SKILL</b>	<b>DESCRIPTION</b>
Communication	<ul style="list-style-type: none"> <li>Clarifies and confirms understanding using active listening techniques</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Determines importance of developing technical skills and of learning from feedback and self-reflection</li> <li>Broadens areas of interest and focus, seeks new challenges and understands expertise can be adapted and applied in diverse contexts</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Cultivates relationships with people with the knowledge, skills and influence to provide collaborative support</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>Takes responsibility for planning and implementing required tasks</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>Applies basic principles of lateral thinking to generate new or innovative ideas</li> <li>Recognises potential of new approaches to enhance work practices and outcomes</li> <li>Evaluates effectiveness of decisions on how well they meet stated goals</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>Analyses and evaluates information to aid in decision making and problem solving</li> </ul>
Technology	<ul style="list-style-type: none"> <li>Understands principles and concepts underpinning the design and operation of digital systems and applies these when seeking to understand the potential of new technology</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBDES403 Develop and extend design skills and practice.

## Links

# Assessment Requirements for CUADES413 Develop and extend design skills and practice

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and use strategies to develop or extend skills, ideas and a unique voice.

In the course of the above, the candidate must:

- identify adjustments to work processes as a result of peer feedback and self-evaluation
- research work options, networking and promotional opportunities and identify how to incorporate information into own work and career development.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- current and emerging designers in the applicable design discipline
- current and emerging trends and technologies in the applicable design discipline, and the opportunities and challenges they represent
- professional development information and resources available to designers in the applicable design discipline
- sources of information relating to work opportunities and career planning.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- materials, resources and equipment used in the development of technical and conceptual skills in the design context.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## CUADES422 Research and apply techniques in product design

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to test and apply techniques for the design and construction of product design prototypes. It involves planning resources required to meet the design brief, testing different approaches based on research and developing prototypes of products that meet brief requirements.

It applies to individuals who generate product designs as part of their working environment. Products may include soft furnishings, furniture, toys, decorative objects and kitchenware.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Design – design process

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and organise requirements	1.1 Interpret design briefs in consultation with required personnel 1.2 Research financial, physical and human resources required for developing design concept to prototype stage 1.3 Investigate environmental, ethical and technical factors that impact on selection and use of resources 1.4 Select and prepare resources based on research into designs and approaches used for similar objects
2. Test design approaches	2.1 Produce preliminary visuals according to design brief requirements 2.2 Experiment and test design approaches using different

ELEMENT	PERFORMANCE CRITERIA
	techniques 2.3 Evaluate, challenge and refine testing processes 2.4 Critique own work and seek feedback as required 2.5 Document outcomes of testing according to organisational policies and procedures 2.6 Select final design approach based on outcomes of testing and input from others
3. Make prototypes of products	3.1 Scope work and determine requirements for object fabrication 3.2 Select and organise materials, tools and equipment for fabrication according to design approach 3.3 Make prototype consistent with design concepts and briefs 3.4 Respond to feedback and refine work as required 3.5 Present prototypes within agreed timeframes

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> <li>Evaluates detailed textual and visual information and determines conceptual and production requirements, including applicable legislation and standards</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Documents resources information and outcomes from idea development and testing using clear, specific language and industry-related terminology</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Elicits feedback and confirms understanding using questioning and active listening techniques</li> <li>Participates in discussions using language and non-verbal features applicable to audience and context</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Identifies financial needs and calculates resource requirements for prototype production</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Understands purpose of own role, and related responsibility for compliance with legal and ethical requirements and design standards</li> <li>Directs own exploration of techniques and processes, and critically evaluates test samples</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Collaborates with others and discusses work process and outcomes, elicits feedback and identifies improvements</li> </ul>

<b>SKILL</b>	<b>DESCRIPTION</b>
	<ul style="list-style-type: none"><li>• Selects and uses applicable communication conventions and techniques to respond to feedback and present prototypes to others</li></ul>
Planning and organising	<ul style="list-style-type: none"><li>• Plans, organises and completes tasks required to meet project and time requirements</li></ul>
Initiative and enterprise	<ul style="list-style-type: none"><li>• Makes analytical decisions about design options and applicable resources required for different design outcomes and their representation, using input from others when required</li></ul>

## Unit Mapping Information

Supersedes and is equivalent to CUADES402 Research and apply techniques in product design.

## Links

Companion Volume Implementation Guide is found on VETNet -

# Assessment Requirements for CUADES422 Research and apply techniques in product design

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- design two products using at least two different researched product design techniques.

In the course of the above, the candidate must:

- interpret requirements in a design brief in consultation with required personnel
- identify and prepare resources required to respond to the design brief
- test and use different approaches and techniques for the design of products, and document the results of testing
- create a prototype based on selected design approach
- adhere to applicable standards and legislative requirements for the design and manufacture of products.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- factors that impact on the selection and use of resources when researching and applying techniques in product design
- materials, tools and equipment, and their capabilities and application to product design and manufacture
- role of experimentation and testing in the design process
- techniques and processes used to test design approaches
- legislation and standards relevant to product design and production.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- product design briefs
- equipment, tools and materials used to produce prototypes of products
- a suitable work space.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## CUADES423 Research and apply techniques in spatial design

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to test and apply techniques for the production of models or maquettes for spatial designs. It involves planning resources required to meet the design brief, testing different approaches based on research and developing prototypes of products that meet brief requirements.

It applies to individuals who generate ideas and solutions for the layout of spaces. Spatial design solutions are required for exhibitions, fit-outs for exterior spaces or environments, and fit-outs for building foyers and offices, special events and theatre sets.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Design – design process

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and organise requirements	1.1 Interpret requirements of design briefs in consultation with required personnel 1.2 Research financial, physical and human resources required for developing design concept to prototype stage 1.3 Investigate environmental, ethical and technical factors that impact on selection and use of resources 1.4 Select and prepare resources based on research into designs and approaches used for similar spaces
2. Test design approaches	2.1 Produce preliminary visuals according to design brief

ELEMENT	PERFORMANCE CRITERIA
	requirements 2.2 Experiment and test design approaches using different techniques 2.3 Evaluate, challenge and refine testing processes 2.4 Critique own work and seek feedback as required 2.5 Document outcomes of testing according to organisational policies and procedures 2.6 Select final design approach based on outcomes of testing and input from others
3. Make spatial design models	3.1 Scope work and determine requirements for object fabrication 3.2 Select and organise materials, tools and equipment for fabrication according to design approach 3.3 Make models consistent with design concepts and briefs 3.4 Respond to feedback and refine work as required 3.5 Present models or maquettes within agreed timeframes

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> <li>Evaluates detailed textual and visual information and determines conceptual and production requirements, including applicable legislation and standards</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Documents resources information and outcomes from idea development and testing processes using clear, specific language and industry-related terminology</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Elicits feedback and confirms understanding using questioning and active listening techniques</li> <li>Selects and uses applicable strategies to respond to feedback and present sample designs to others</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Identifies financial needs from information that may be embedded in texts and calculates resource requirements</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Understands purpose of own role and related responsibility for compliance with applicable legal and ethical requirements and design standards when planning and undertaking design work</li> </ul>

<b>SKILL</b>	<b>DESCRIPTION</b>
Interact with others	<ul style="list-style-type: none"><li>• Collaborates with others and discusses work process and outcomes, elicits feedback and identifies improvements</li><li>• Selects and uses applicable communication conventions and techniques to respond to feedback and present prototypes to others</li></ul>
Planning and organising	<ul style="list-style-type: none"><li>• Plans, organises and completes tasks required to meet project and time requirements</li><li>• Makes a series of analytical decisions about design options and applicable resources required for different design outcomes and their representation, using input from others when required</li></ul>
Initiative and enterprise	<ul style="list-style-type: none"><li>• Directs own exploration of techniques and processes, and critically evaluates test samples</li></ul>

## Unit Mapping Information

Supersedes and is equivalent to CUADES403 Research and apply techniques in spatial design.

## Links

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

# Assessment Requirements for CUADES423 Research and apply techniques in spatial design

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- design two products according to at least two different researched spatial design techniques.

In the course of the above, the candidate must:

- interpret requirements in a design brief in consultation with required personnel
- identify and prepare resources required to respond to the design brief
- test and use different approaches and techniques for the design of products, and document the results of testing
- create a prototype based on selected design approach
- adhere to applicable standards and legislative requirements for spatial design.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- factors that impact on the selection and use of resources when researching and applying techniques in spatial design
- materials, tools and equipment, and their capabilities and application to spatial design and manufacture
- role of experimentation and testing in the design process
- techniques and processes used to test design approaches
- legislation and standards relevant to spatial design.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- spatial design briefs
- equipment, tools and materials used to produce models or maquettes of spatial designs
- a suitable work space.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## CUADES511 Implement design solutions

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to take a design concept or solution to the implementation stage. It involves confirming the proposed solution, gathering resources required to implement the solution, testing the solution and developing a prototype, and presenting the prototype to required personnel.

The unit applies to those who work as a designer, in any industry context, either independently or employed by an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Design – Design Process

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise resources for realising the design solution	1.1 Confirm nature and scope of the proposed design solution 1.2 Research resources required for developing the design concept to implementation stage 1.3 Investigate different factors impacting the selection and use of resources 1.4 Select and prepare resources based on research and other legislative or organisational requirements
2. Test the design solution	2.1 Experiment with the design solution using different techniques and processes 2.2 Evaluate, challenge and refine testing processes

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	2.3 Gain input and feedback from required personnel during testing 2.4 Document outcomes of testing according to organisational and design solution requirements 2.5 Select final design solution based on outcomes of testing and input from others
3. Develop prototype	3.1 Create prototype based on agreed approaches 3.2 Select and organise materials, tools and equipment according to chosen design solution as required 3.3 Expose model to quality checks and ongoing analysis, enhancement and refinement 3.4 Compare completed prototype against identified needs and other considerations and make adjustments as required
4. Present prototype or model	4.1 Identify required personnel design should be presented to 4.2 Select format for presentation based on nature of audience and design 4.3 Present prototype and optimise clarity, conciseness and appeal

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

<b>SKILL</b>	<b>DESCRIPTION</b>
Reading	<ul style="list-style-type: none"> <li>• Researches and interprets textual information from different sources</li> </ul>
Writing	<ul style="list-style-type: none"> <li>• Documents research, resource requirements and testing outcomes using applicable language and formats</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>• Participates in different verbal exchanges and presentations using tone and vocabulary to suit audience</li> <li>• Gains input and feedback using active listening and questioning techniques</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>• Interprets and applies numeric information applicable to design solution</li> <li>• Compares numerical data gathered from testing</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Understands and adheres to organisational policies, procedures and legislative requirements during planning and implementation of design solution</li> </ul>

<b>SKILL</b>	<b>DESCRIPTION</b>
Teamwork	<ul style="list-style-type: none"> <li>• Takes audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Sequences and schedules routine and complex activities, monitors implementation, and manages required communication</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Makes different critical and non-critical decisions in relatively complex situations, taking client requirements and different into account</li> <li>• Creates new and innovative ideas through exploration, analysis and critical thinking</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Applies formal problem-solving processes when responding to unpredictable issues and challenges that arise during the testing process</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBDES501 Implement design solutions.

## Links

Companion Volume Implementation Guide is found on VETNet -

# Assessment Requirements for CUADES511 Implement design solutions

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- implement solutions according to at least two different designs.

In the course of the above, the candidate must:

- undertake critical analysis, testing and development of a prototype or aspect of a design solution to meet an identified need
- present prototype to required personnel using applicable best practice methods.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- elements and principles of design and their application in the applicable design context
- key features of the wider industry, with economic, social and historical context for the design solution
- design trends and technologies including other designs and the work of other design practitioners in the applicable design context
- sources of information that support the development of technical and other knowledge in the applicable design context
- technical expertise, resources, materials, tools, equipment, techniques and industry processes required for the area the design solutions are being implemented in.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- other people to discuss the collaborative nature of the design process
- resources required to test a design solution in a given industry context including materials, tools, equipment and expertise.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## CUADES512 Establish, negotiate and refine a design brief

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to work proactively with a client or commissioning organisation to develop and negotiate a design brief. It involves determining design requirements with stakeholders, developing and refining the design brief and finalising the terms and conditions of the brief.

It applies to individuals working in any industry or design context where the designer plays a key role in determining the scope and nature of work required. Establishment, negotiation and refinement of a design brief requires the integration of highly-developed creative thinking, communication and planning skills in a process that may not be linear. Adaptability and effective responses to change and new ideas are crucial.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Design – Design Process

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish design requirements	1.1 Identify and make contact with required stakeholders for the design project, in addition to the client 1.2 Identify and source information and references required for design project 1.3 Undertake critical analysis of sources and extract key information to inform the design project 1.4 Determine overall objectives and parameters for design project in

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	collaboration with client and other key stakeholders 1.5 Seek, review and act on information needed to inform constructive communication with client
2. Develop and refine design brief	2.1 Develop concepts and ideas for inclusion in design brief 2.2 Undertake own analysis of concept and challenge ideas and approaches taken 2.3 Present ideas in applicable format/medium and discuss, debate and critically analyse in collaboration with key stakeholders 2.4 Re-evaluate and refine options based on own analysis and discourse with others 2.5 Establish and agree on final nature and scope of design brief with client and document details according to organisational policies, procedures and standards
3. Negotiate terms and conditions	3.1 Negotiate and agree terms and conditions of brief in accordance with applicable organisational and professional standards 3.2 Clarify, agree and document roles and responsibilities of those involved in the project 3.3 Confirm agreements in writing in accordance with organisational policies and procedures 3.4 Identify the need for specialist advice when developing formal agreements or contracts, and seek required assistance

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

<b>SKILL</b>	<b>DESCRIPTION</b>
Reading	<ul style="list-style-type: none"> <li>Identifies and interprets textual information from various sources</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Develops different documents using applicable vocabulary, context and formatting for different audiences</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Participates in discussions and elicits views of others using questions and listening techniques</li> <li>Presents ideas and seeks feedback from others using applicable tone, vocabulary and language structures</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Interprets and applies numeric information applicable to design brief</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Identifies and adheres to organisational policies and procedures, industry standards and legislative requirements during planning and</li> </ul>

	design of design solution
Teamwork	<ul style="list-style-type: none"> <li>• Seeks information from stakeholders using applicable communication conventions and protocols</li> <li>• Uses a range of collaborative techniques to clarify and refine ideas and negotiate agreeable outcomes with others</li> <li>• Clarifies and refines ideas and negotiates agreeable outcomes with others using different collaborative techniques</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Sequences and schedules complex activities, monitors implementation, and manages required communication</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Applies formal problem-solving processes when responding to unpredictable issues and challenges that arise during the testing process</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Makes different critical and non-critical decisions in complex and non-complex situations, taking client and organisational requirements and possible constraints into account</li> <li>• Generates new and innovative ideas and concepts through exploration, analysis and critical thinking</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBDES502 Establish, negotiate and refine a design brief.

## Links

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

## Assessment Requirements for CUADES512 Establish, negotiate and refine a design brief

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop and finalise at least two different design briefs for a specific industry purpose.

In the course of the above, the candidate must:

- identify and establish brief requirements with client and key stakeholders.
- determine and include the following information and references to the design brief:
  - legislative and regulatory context
  - financial and budgetary information
  - organisational materials
  - technical reports and data
  - schedules and timelines
- participate in a discussion to clarify, negotiate and agree on terms and conditions.

### Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- legal issues that affect negotiations and contracts in the applicable work context
- the design process within the specific industry context/design discipline
- scope, nature and potential variations that occur within design briefs applicable to a specific context
- sources of information to assist the development of design concepts within a specific industry context.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- required equipment and media to communicate and present ideas
- sources of information relevant to industry context
- interaction with others to reflect the collaborative nature of the work, and communication and negotiation skills required.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## Links

Companion Volume Implementation Guide is found on VETNet -

## CUADES611 Manage design realisation

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to manage the process of taking a design from concept to final realisation or production. It involves planning the realisation of designs, managing the implementation of the design and managing different stakeholders throughout the completion of the realisation process.

It applies to individuals working in any industry context or design discipline who take responsibility for turning design concept into reality – a product or service of value to the end-user. This person could be an individual designer-maker or a designer working as part of a larger design/production team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Design – Design Process

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan realisation of design	1.1 Collect, analyse and maintain required information on the design 1.2 Discuss and agree on standards of work and monitoring requirements with required personnel 1.3 Develop plan and schedule realisation that meets design requirements 1.4 Incorporate key roles and responsibilities linked to timelines and budget in plan

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
2. Implement and monitor realisation of design	2.1 Organise and allocate resources according to design requirements 2.2 Confirm obligations and quality standards are met according to design requirements 2.3 Maintain accurate, applicable and complete documentation in accordance with agreed standards 2.4 Monitor process through challenging and interrogating own design work 2.5 Confirm integrity of design is maintained at all times 2.6 Identify difficulties and problems that arise in relation to realisation of design and take action to rectify situation
3. Liaise and negotiate with stakeholders	3.1 Establish and maintain applicable communication channels with required personnel 3.2 Seek and provide information to required personnel according to design requirements 3.3 Assess adherence to agreed terms and conditions and negotiate changes in light of changed circumstances as required 3.4 Negotiate and agree on revisions with required parties according to organisational policies and procedures
4. Complete design process	4.1 Finalise design outcomes in accordance with terms and conditions 4.2 Seek feedback from required personnel on finished design and make final adjustments as agreed 4.3 Evaluate completed design in relation to own work and overall process

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

<b>SKILL</b>	<b>DESCRIPTION</b>
Reading	<ul style="list-style-type: none"> <li>Collates and analyses textual information from different sources applicable to the design realisation</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Produces documentation using applicable structure, language and context to articulate own ideas and positions</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Articulates clearly using specific language and applicable tone to convey information</li> </ul>

<b>SKILL</b>	<b>DESCRIPTION</b>
	<ul style="list-style-type: none"> <li>• Confirms understanding using active questioning and listening techniques</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>• Interprets and uses numeric information in budgets and to determine work schedules</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Works independently and collectively within broad parameters, with a sense of responsibility and ownership of plans, decisions and outcomes</li> <li>• Adheres to organisational policies and procedures</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Takes audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how</li> <li>• Fosters a collaborative culture within own sphere of influence, facilitating a sense of cohesion and commitment</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Takes responsibility for planning and organising tasks to meet workplace deadlines, including those tasks that require liaison with other people</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Analyses how variables impact outcomes using different experiences</li> </ul>
Problem-solving	<ul style="list-style-type: none"> <li>• Applies formal problem-solving processes when responding to unpredictable issues and challenges that arise during the design process</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBDES601 Manage design realisation.

# Assessment Requirements for CUADES611 Manage design realisation

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- manage the realisation of at least two different designs.

In the course of the above, the candidate must:

- adhere and monitor brief requirements that include:
  - standards, timeframes and budgets
  - technical feasibility
- develop a plan and schedule for design realisation
- participate in a discussion to clarify, negotiate and agree on terms and conditions of design realisation.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key responsibilities of required personnel in the design realisation context
- best practices when dealing with setbacks in the production process
- organisational policies and procedures applicable to realising designs
- production processes in a particular industry context or discipline including required materials, tools and equipment.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- resources, tools, materials and equipment required for realising a design in a specific context
- a design concept that the candidate can take to realisation stage
- other people to reflect the collaborative nature of the work.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## CUADES612 Research global design trends

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to research and critically evaluate global design trends. It involves research and analysis of information and ideas at a complex level, and the evaluation and extension of the individual's professional skills.

It applies to individuals who need to maintain a current and comprehensive knowledge of global design trends to inform their own professional practice. Although predominantly for designers, this unit may also be applicable to those who work in related management, marketing and production areas.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Design – Design Process

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Research design trends	1.1 Analyse and select formal and informal research strategies and source information on global design trends 1.2 Identify and explore new and alternative sources of information 1.3 Evaluate the credibility of information gathered and confirm research scope is sufficiently broad
2. Analyse design trends to inform own practice	2.1 Challenge and extend own perspectives and ways of thinking using researched information 2.2 Examine and assess implications and consequences of

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	<p>design trends on own work</p> <p>2.3 Identify creative and commercial opportunities presented by emerging trends and technologies using critical analysis</p> <p>2.4 Develop systems to identify and respond to opportunities</p>
3. Develop and articulate positions and ideas	<p>3.1 Develop substantiated positions and ideas on global design trends</p> <p>3.2 Generate informed discussion, debate and critical analysis with peers and colleagues</p> <p>3.3 Challenge and refine own positions using debate and feedback</p>
4. Extend own design skills	<p>4.1 Identify and use opportunities presented by research to extend own design skills</p> <p>4.2 Re-evaluate and refine approaches to work in the context of current and emerging trends</p> <p>4.3 Improve skills continuously using practice, discussion and ongoing evaluation</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

<b>SKILL</b>	<b>DESCRIPTION</b>
Learning	<ul style="list-style-type: none"> <li>Plans and implements strategies to improve and extend own knowledge and skills</li> </ul>
Reading	<ul style="list-style-type: none"> <li>Analyses and synthesises complex and varied information from different sources</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Documents methods for identifying future opportunities using vocabulary and structure applicable to context and purpose</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Elicits the views others by participating in critical discourse and debate on conceptual and technical design trends</li> <li>Gains input and feedback using active listening techniques</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Keeps abreast of trends and issues</li> <li>Appreciates the world of work is dynamic, with changing needs and priorities, and that career development is not a linear process that can be closely controlled</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>Takes responsibility for planning and organising tasks required to conduct required research, including how to link with the work of others</li> </ul>

<b>SKILL</b>	<b>DESCRIPTION</b>
Initiative and enterprise	<ul style="list-style-type: none"><li>• Keeps abreast of innovations and good practice beyond own context, borrowing, adapting, combining and redesigning for own purposes</li><li>• Evaluates outcomes using reflection and feedback from others</li></ul>
Technology	<ul style="list-style-type: none"><li>• Identifies digital systems, devices and applications with potential to meet current and future needs</li></ul>

## Unit Mapping Information

Supersedes and is equivalent to BSBDES602 Research global design trends

## Links

Companion Volume Implementation Guide is found on VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

# Assessment Requirements for CUADES612 Research global design trends

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- conduct research on at least three different global design trends.

In the course of the above, the candidate must:

- document the analysis, critique and synthesis of complex sources to develop own positions and ideas
- collaborate with others at least once during the research process to present and refine own positions and ideas
- identify at least two opportunities to refine own design skills in the context of current and emerging trends.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- broad global design trends that apply to all design disciplines
- business implications and consequences of adopting trends and emergent technologies
- research methodologies and options applicable to researching global design trends
- sources of information on global design, design trends and broader references that may inform emerging and innovative design practice
- current and emerging design technologies and trends at a global level in at least one area of design.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- sources of information required to research global design trends
- technology required to conduct research
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## CUADIG303 Produce and prepare photo images

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

### Application

This unit describes the skills and knowledge required to prepare photo images for integration into an interactive media sequence or product.

It applies to individuals who produce a variety of photo images for production of virtual worlds, from digital still composition to panoramas. They work closely with a programmer or interactive media author and may offer technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Visual Communication – Digital Content and Imaging

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Use scanner to capture photo images	1.1 Source and identify appropriate photographic images according to requirements of photographic project brief 1.2 Discuss selection of images with relevant personnel, and check compliance with copyright conditions 1.3 Assess scanner features to confirm quality outcomes will meet brief requirements 1.4 Operate scanner according to manufacturer's specifications

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	<p>1.5 Use appropriate scanner settings to ensure image output meets production requirements</p> <p>1.6 Transfer and store photographic image files to a computer using standard naming conventions</p>
2. Use digital camera to create photo images	<p>2.1 Clarify photographic project brief with relevant personnel</p> <p>2.2 Assess digital camera features to ensure outcome will meet requirements of brief</p> <p>2.3 Plan camera shots, taking into account lighting, framing, composition and other relevant factors</p> <p>2.4 Load and operate digital camera according to manufacturer's specifications</p> <p>2.5 Consider digital camera focus, exposure and shutter speed to ensure image capture meets production requirements</p> <p>2.6 Check photographic images meet brief requirements</p> <p>2.7 Transfer and store photographic image files to a computer using standard naming conventions</p>
3. Edit photo images	<p>3.1 Load digital imaging software and import photo image source files</p> <p>3.2 Adopt safe ergonomic practices when using screens and keyboards for extended periods of time</p> <p>3.3 Manipulate and save digital images using designated digital imaging software</p> <p>3.4 Create photo images that incorporate visual design and communication principles</p> <p>3.5 Evaluate outcome for visual impact, effectiveness and fitness for purpose</p> <p>3.6 Confirm images meet project requirements with relevant personnel</p>
4. Prepare photo image assets	<p>4.1 Save files in appropriate output format to meet platform requirements</p> <p>4.2 Assign metadata tags if required</p> <p>4.3 Group files logically in a folder system using standard naming conventions</p> <p>4.4 Store files in share drive or repository for production team access</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<b>Skill</b>	<b>Performance Criteria</b>	<b>Description</b>
Reading	1.1, 1.4-1.6, 2.4-2.7, 4.1, 4.3	<ul style="list-style-type: none"> <li>Interprets textual information to follow equipment operation and project requirements</li> </ul>
Writing	1.6, 2.7, 4.1-4.3	<ul style="list-style-type: none"> <li>Selects the vocabulary and conventions appropriate to text for naming files</li> </ul>
Oral Communication	1.2, 2.1, 3.6	<ul style="list-style-type: none"> <li>Uses listening and questioning techniques to discuss project brief and to confirm outcomes</li> <li>Uses descriptive and technical language to participate in oral exchanges</li> </ul>
Navigate the world of work	1.2, 3.2	<ul style="list-style-type: none"> <li>Complies with legislative requirements</li> </ul>
Interact with others	1.2, 2.1, 3.6	<ul style="list-style-type: none"> <li>Uses appropriate communication practices and protocols to confirm requirements and present images</li> </ul>
Get the work done	1.1, 1.3-1.6, 2.2-2.7, 3.1, 3.3-3.6, 4.1-4.4	<ul style="list-style-type: none"> <li>Takes responsibility for logically planning and producing photo images according to design briefs and visual design principles</li> <li>Makes decisions directly related to task completion</li> <li>Utilises a range of features within digital cameras, scanners and digital imaging software to create and store photo images</li> </ul>

## Unit Mapping Information

<b>Code and title current version</b>	<b>Code and title previous version</b>	<b>Comments</b>	<b>Equivalence status</b>
CUADIG303 Produce and prepare photo images	CUFDIG303A Produce and prepare photo images	Updated to meet Standards for Training Packages. Minor edits to performance criteria.	Equivalent unit

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for CUADIG303 Produce and prepare photo images

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

## Performance Evidence

Evidence of the ability to:

- use a scanner and digital camera to capture images that satisfy project briefs
- use digital imaging software and techniques, design and communication principles to produce images that meet project requirements
- save and store files according to requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the features of a digital camera that are essential for creating images to the required standard
- outline the basic techniques used to compose camera shots
- explain how visual design and communication principles are relevant to photography
- explain safe work practices in relation to working on computers for periods of time
- explain the procedure for checking copyright clearance.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- a scanner and digital camera
- digital imaging software
- project briefs
- information or manuals about operating equipment.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUADIG304 Create visual design components

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

### Application

This unit describes the skills and knowledge required to create visual designs for interactive media components that can be integrated into a range of media products.

It applies to individuals who generate and assess ideas to create visual design components in response to specifications under supervision in a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Visual Communication – Digital Content and Imaging

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Clarify work requirements	1.1 Clarify visual design components required in the project brief, in consultation with relevant personnel 1.2 Identify project timelines and discuss factors that may determine or affect visual design concepts 1.3 Clarify, in discussion with relevant personnel, the target user or audience, and determine format and delivery platform
2. Generate and assess ideas	2.1 Research media products, designs, images, artwork and other creative sources that may inspire visual design ideas

ELEMENT	PERFORMANCE CRITERIA
	2.2 Develop a range of visual design ideas that are technically feasible, respond to project specifications and provide creative solutions to design issues 2.3 Present and review visual design ideas with relevant personnel
3. Develop design concept	3.1 Experiment with traditional and digital methods to create required visual design components 3.2 Explore a range of typographical and visual design elements to create components 3.3 Evaluate initial design ideas with relevant personnel to select final design concept 3.4 Confirm design concept complies with copyright laws 3.5 Check output format meets delivery platform requirements 3.6 Adopt safe ergonomic practices when using equipment for long periods of time
4. Produce components	4.1 Develop components based on the final design concept using various design techniques 4.2 Apply visual design principles and communication principles to produce components that have high visual impact 4.3 Save components in an appropriate format according to project specifications
5. Finalise visual design components	5.1 Review visual design components against design and technical specifications 5.2 Discuss and confirm additional requirements or modifications with relevant personnel, and make amendments as required 5.3 Save and archive visual design components using industry or enterprise naming conventions and version control protocols

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	2.1, 3.1, 3.2, 3.3,	<ul style="list-style-type: none"> <li>Reviews and researches creative source material to generate ideas</li> </ul>

	4.1, 4.3, 5.1, 5.2, 5.3	<ul style="list-style-type: none"> <li>Checks that output meets requirements</li> <li>Locates correct folders for storing electronic data</li> </ul>
Writing	2.2, 3.1, 3.2, 4.1, 4.3, 5.2, 5.3	<ul style="list-style-type: none"> <li>Prepares information to accompany design components</li> <li>Names files according to requirements</li> </ul>
Oral Communication	1.1-1.3, 2.3, 3.3, 4.3, 5.2	<ul style="list-style-type: none"> <li>Participates effectively in spoken interactions using active listening and questioning to confirm and clarify understanding</li> </ul>
Navigate the world of work	3.4, 3.6	<ul style="list-style-type: none"> <li>Complies with legislative requirements</li> </ul>
Interact with others	1.1-1.3, 2.3, 3.3, 4.3, 5.2	<ul style="list-style-type: none"> <li>Collaborates with relevant personnel to ensure that end result meets requirements</li> </ul>
Get the work done	1.1-1.3, 2.1-2.3, 3.1-3.3, 3.5, 4.2, 4.3, 5.1-5.	<ul style="list-style-type: none"> <li>Takes responsibility for planning and producing design components according to project requirements and design principles</li> <li>Makes decisions directed related to completion of tasks</li> <li>Uses experimentation to develop new or innovative design approaches</li> <li>Selects and uses appropriate software to conceive, produce, store and present visual design components</li> </ul>

## Unit Mapping Information

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

# Assessment Requirements for CUADIG304 Create visual design components

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

## Performance Evidence

Evidence of the ability to:

- explore and experiment with design techniques and visual design and communication principles to produce ideas and concepts for visual design components
- use design techniques to create visual design components that respond effectively to a project brief
- present and discuss ideas, concepts and designs with relevant personnel
- save and archive files using standard industry or enterprise naming conventions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe differences between traditional and digital methods in creating visual images, and advantages and disadvantages of each
- describe visual design, typographic and communication principles used to construct visual design components
- explain safe work practices in relation to working on computers for periods of time
- explain the procedure for checking copyright clearance.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- project briefs
- relevant software

- manuals and information to support software.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUADIG517 Design digital simulations

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

### Application

This unit describes the skills and knowledge required to research, plan and design drafts for digital simulations of real-world environments and processes.

The unit applies to those who work closely with subject experts to develop virtual environments for fields including architecture, science and engineering, medicine, conservation and manufacturing. They may also collaborate with programmers and software authors so the simulation is technically achievable.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Visual communication – Digital content and imaging

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify project requirements	1.1 Confirm objectives and desired outcomes of project brief in consultation with required personnel 1.2 Identify target audience and determine format and delivery platform of simulations in discussion with required personnel
2. Research and plan approach	2.1 Investigate real world environment to be simulated and determine technical parameters that may be required 2.2 Evaluate designs and other information that may assist modelling real world environment 2.3 Determine performance objectives, task complexity and user skill levels

ELEMENT	PERFORMANCE CRITERIA
	2.4 Determine required depth of physical and functional fidelity that meets production requirements 2.5 Research and identify applicable simulation authoring tools 2.6 Discuss ideas and solutions in collaboration with required personnel
3. Draft simulation design documents	3.1 Identify processes that determine functional behaviour of simulation and specify how this behaviour is represented by control objects 3.2 Define underlying functionality in model that specifies essential settings, states, conditions and parameters 3.3 Specify user interface controls that enable user interaction with simulation 3.4 Identify critical impacts, alerts or costs for incorrect user operation 3.5 Specify sequencing of difficulty levels, if required 3.6 Confirm proposed simulation is technically feasible in consultation with required personnel 3.7 Present clear and detailed draft simulation design specifications for discussion and feedback with required personnel 3.8 Outline positive and negative feedback from user responses when interacting with simulations, and adjust as required
4. Finalise simulation design documents	4.1 Review designs against desired project outcomes and objectives 4.2 Review designs against creative, technical and intellectual property requirements 4.3 Adjust design specifications as necessary after discussions with required personnel 4.4 Archive user interface controls

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Oral communication	<ul style="list-style-type: none"> <li>• Participates effectively in spoken interactions using language and features applicable to audience</li> <li>• Confirms project requirements and elicits feedback using questioning and listening strategies</li> <li>• Communicates with audience using industry standard practices and protocols</li> </ul>

<b>SKILL</b>	<b>DESCRIPTION</b>
Reading	<ul style="list-style-type: none"> <li>• Interprets and comprehends familiar and unfamiliar technical, descriptive, and legal textual information</li> </ul>
Writing	<ul style="list-style-type: none"> <li>• Documents information using correct formatting procedures, and uses specialised vocabulary when drafting design documents</li> <li>• Accurately incorporates modifications and user feedback in specification documentation</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Integrates prior knowledge with new technical research and feedback from required personnel</li> <li>• Ensures design integrity remains and continually generates and evaluates design ideas</li> <li>• Makes decisions that impact on entire project</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Takes responsibility, coordinates and plans tasks and ensures project requirements met</li> <li>• Ensures project is continually assessed and evaluated</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Adheres to legislative requirements related to intellectual property</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Works collaboratively with production personnel throughout all stages of project</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Assists with design tasks using digital tools</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to CUADIG507 Design digital simulations.

## Links

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

# Assessment Requirements for CUADIG517 Design digital simulations

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- design at least two examples of digital simulations according to different project briefs.

In the course of the above, the candidate must:

- research and generate ideas for technically feasible simulations that meet target audience requirements
- develop draft design specifications for digital simulations that are clear, detailed and technically feasible
- review and seek feedback from required personnel and produce final design specifications.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- typical formats and documentation for presenting simulation designs
- strategies to evaluate designs and respond to feedback to improve designs
- technical parameters of digital simulations, including:
  - algorithms
  - rules
  - laws
  - physical & mathematical formulae
- authoring tools used for digital simulations
- user interfaces used for digital simulations
- ways that technical parameters represent real world processes
- common delivery platforms of simulations
- how intellectual property rights are managed in design of digital simulations.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- briefs for digital simulations on which designs can be based
- access to real-world environments to be simulated
- facilities and resources to develop design simulations
- interaction with others required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## Links

Companion Volume Implementation Guide is found on VETNet -

# CUADIG519 Investigate technologies for the creation of digital art

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Application

This unit describes the skills and knowledge required to further application of technologies in own creative practice. It involves researching different technologies, exploring them in-depth and applying different technologies to one's own work.

The unit applies to those who produce creative digital media work or integrate digital and traditional media. Their technology exploration is conducted independently with mentoring and guidance as required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual Communication – Digital Content and Imaging

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Research digital technologies	1.1 Evaluate current, emerging and experimental digital technologies and equipment applicable to artistic practice 1.2 Research the capabilities of different digital technologies and equipment to achieve different effects 1.3 Determine cost and supply issues for different technologies and equipment
2 Select digital technologies for in-depth exploration	2.1 Assess the creative and professional opportunities offered by different technologies 2.2 Determine limitations and constraints of different

ELEMENT	PERFORMANCE CRITERIA
	<p>technologies</p> <p>2.3 Discuss the characteristics and opportunities of different digital art technologies with required personnel</p> <p>2.4 Select technologies that suit own artistic practice and apply according to safety requirements</p>
3 Integrate technologies into own work	<p>3.1 Experiment with technologies to challenge and extend their capabilities for use in own artistic works</p> <p>3.2 Develop own ways of working with technologies to achieve desired outcomes</p>
4 Manage digital technologies in professional practice	<p>4.1 Establish systems to maintain currency of knowledge of digital art technologies</p> <p>4.2 Maintain the quality and life of equipment and consumables through required handling and storage procedures</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Reading	<ul style="list-style-type: none"> <li>Interprets technical information and specifications for application to creative work</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Records technical and numerical information related to job requirements and outcomes</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Participates in detailed discussions about digital technologies with required personnel using clear language and related industry terminology</li> <li>Gathers information and confirms understanding using careful listening and questioning techniques</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Assesses costs of digital resources</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Maintains industry knowledge required to perform role</li> <li>Meets workplace expectations to use equipment and consumables responsibly to minimise waste, repair or replacement</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>Evaluates research findings to inform analytical decisions about selection of digital technologies for exploration</li> </ul>
Technology	<ul style="list-style-type: none"> <li>Implements organisational systems to keep up with changes in digital technologies</li> </ul>

SKILL	DESCRIPTION
	<ul style="list-style-type: none"><li data-bbox="459 309 1396 412">• Recognises the potential of new approaches in use of digital systems and tools and incorporates exploratory and experimental strategies into own work to achieve desired outcomes</li></ul>

## Unit Mapping Information

Supersedes and is equivalent to CUADIG509 Investigate technologies for the creation of digital art.

## Links

Companion Volume Implementation Guide is found on VETNet -

# Assessment Requirements for CUADIG519 Investigate technologies for the creation of digital art

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- investigate at least two different technologies for the creation of digital art.

In the course of the above, the candidate must:

- research, experiment with and integrate technologies to create at least two individual styles of digital art
- use and adapt technologies in ways that support coherence of own creative works.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- ways in which different digital technologies and processes are used, adapted, combined and challenged by professional artists in contemporary practice
- cost and supply parameters issues for different technologies and types of equipment to support professional practice
- storage requirements and options for different materials used in digital work
- ways to remain informed of changes in digital art technologies
- key safety requirements for digital technologies in an art context.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- tools, equipment and materials required for exploring technologies for the creation of digital art

- applicable information sources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUADRA201 Develop drawing skills

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

### Application

This unit describes the skills and knowledge required to use a limited range of basic drawing techniques to produce fundamental drawings from simple ideas. This unit relates to drawing as an art form and differs from units that focus on drawing as a visual representation tool.

It typically applies to individuals who have developed some general design or drawing skills and who are now embarking on a career in visual arts. They have little or no experience in drawing and work under close supervision and with guidance from others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Visual communication – drawing

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare drawing resources	1.1 Calculate and obtain type and quantity of drawing equipment, tools and materials according to own selected ideas for the work 1.2 Prepare equipment, tools and materials according to procedures for workplace safety, cost control and waste minimisation 1.3 Set up a safe work space with guidance from key people
2. Use and test drawing	2.1 View a range of drawings in different styles, and discuss with

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
techniques	<p>key people how effects are achieved</p> <p>2.2 Match potential techniques to ideas for own drawings with assistance from key people</p> <p>2.3 Test a range of techniques to determine the effects they achieve through experimentation with samples, practice pieces or work in progress</p> <p>2.4 Use selected techniques to produce fundamental drawings, considering and applying elements and principles of design</p> <p>2.5 Clean and store equipment, tools, and materials according to specific needs of different items</p> <p>2.6 Handle equipment, tools and materials safely and minimise waste throughout all processes</p>
3. Review work to develop skills	<p>3.1 Review own drawings and note areas for future improvement</p> <p>3.2 Seek and consider feedback from key people to identify areas for improvement</p> <p>3.3 Review different opportunities to build own skills and select suitable options</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<b>Skill</b>	<b>Performance Criteria</b>	<b>Description</b>
Learning	3.3	<ul style="list-style-type: none"> <li>Plans a learning process to build own skills</li> </ul>
Reading	1.2	<ul style="list-style-type: none"> <li>Interprets detailed information from familiar procedural documents to determine production and safety requirements</li> </ul>
Oral Communication	1.3, 2.1, 2.2, 3.2	<ul style="list-style-type: none"> <li>Clearly explains ideas for designs and techniques using relevant industry language</li> <li>Uses questioning and active listening techniques to gain information and feedback and confirm understanding</li> </ul>
Numeracy	1.1, 1.3, 2.4	<ul style="list-style-type: none"> <li>Uses basic calculations to determine quantities of materials, measure dimensions of work space and drawings</li> </ul>

Navigate the world of work	1.2, 1.3, 2.4, 2.6	<ul style="list-style-type: none"> <li>Follows defined procedures and legislative requirements, understands boundaries of own work and skill, and seeks clarification and guidance on all issues</li> </ul>
Interact with others	1.3, 2.1, 2.2, 3.2	<ul style="list-style-type: none"> <li>Seeks guidance and cooperates with instructions and advice from others to achieve best outcomes for own creative work</li> </ul>
Get the work done	1.1-1.3, 2.1-2.4	<ul style="list-style-type: none"> <li>Organises all processes to set up work space, test techniques and produce creative work with close guidance from others</li> <li>Makes routine decisions using procedures to guide activities</li> <li>Makes decisions about appropriate techniques by evaluating and testing a limited range of known options with assistance from others</li> <li>Resolves problems with technique through trial, error and practice</li> </ul>

## Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
CUADRA201 Develop drawing skills	CUVDRA201A Develop drawing skills	Updated to meet Standards for Training Packages and clarify intent.	Equivalent unit

# Assessment Requirements for CUADRA201 Develop drawing skills

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

## Performance Evidence

Evidence of the ability to:

- produce multiple fundamental drawings where the materials and techniques support own ideas for work
- document a basic plan to build own skills, outlining own selected skill development options.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the general features of major styles of drawing and the work of key practitioners relevant to individual area of interest
- outline, for the elements and principles of design, the fundamental characteristics, primary interrelationships and use in fundamental drawings
- outline, for a range of equipment and tools used to produce drawings, key physical features and uses, cleaning techniques and storage requirements
- outline the general features and use of a basic range of materials and techniques used to produce fundamental drawings
- outline typical work space requirements for producing fundamental drawings including ways of organising space and equipment for efficient work operation
- outline procedures for working safely with drawing materials, tools and equipment.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- equipment, tools and materials used to produce drawings
- relevant information sources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUAILL401 Develop and refine illustrative work

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

### Application

This unit describes the skills and knowledge required to work with a brief to create illustrations through a process of testing design approaches and illustration techniques.

It applies to illustrators who are still developing a full repertoire of professional skills and an individual style. They work with limited supervision and guidance as required. Illustrators may be employees or work on a freelance basis.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Visual communication – illustration

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Interpret briefs for illustrative work	1.1 Interpret the specifications of illustration briefs 1.2 Discuss and clarify issues about specifications, parameters and constraints with relevant people as required 1.3 Evaluate client requirements to make decisions about style and content of illustrative work 1.4 Source and evaluate information pertinent to briefs
2. Organise resources	2.1 Calculate, select and organise equipment, tools and materials

ELEMENT	PERFORMANCE CRITERIA
	based on the requirements of the work 2.2 Set up a safe and efficient workspace 2.3 Prepare, maintain, store and dispose of all resources according to each item's needs and according to workplace procedures
3. Test design approaches for illustrative work	3.1 Produce preliminary visual representations that take account of intellectual property requirements 3.2 Identify possible illustrative approaches and establish criteria, in line with the brief, for selecting final approach 3.3 Experiment with different illustrative techniques to test a range of approaches that will best communicate ideas required by the brief 3.4 Evaluate testing processes against criteria and select approach that best meets requirements of briefs 3.5 Critique own work for conceptual success and technical execution and seek feedback, as required 3.6 Refine and accurately document the illustrative approach based on testing processes
4. Produce finished illustrative work	4.1 Create illustrations using techniques selected from experimentation and testing, considering and applying elements and principles of design 4.2 Review and refine ideas and approaches based on ongoing experience with production of own work 4.3 Seek and consider feedback from key people to refine illustrative work as required 4.4 Present finished work within agreed work parameters

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.4	<ul style="list-style-type: none"> <li>Interprets and evaluates complex and unfamiliar information in briefs</li> </ul>
Writing	3.6	<ul style="list-style-type: none"> <li>Uses clear, specific and industry related terminology to document a comprehensive record of illustrative approaches to a design brief</li> </ul>

Oral Communication	1.2, 3.5, 4.3	<ul style="list-style-type: none"> <li>Uses questioning and active listening techniques to elicit information about job requirements and confirm understanding</li> </ul>
Numeracy	2.1	<ul style="list-style-type: none"> <li>Performs basic calculations required to identify quantities of resources</li> </ul>
Navigate the world of work	2.1, 2.2, 2.3, 3.1	<ul style="list-style-type: none"> <li>Understands and complies with legislative requirements and defined workplace procedures</li> </ul>
Interact with others	1.2, 3.5, 4.3	<ul style="list-style-type: none"> <li>Seeks the perspective and guidance of others to inform design ideas and achieve best outcomes for own creative work</li> <li>Seeks and considers feedback from peers and others to enhance future performance</li> </ul>
Get the work done	1.3, 1.4, 2.1, 3.2-3.4, 4.1, 4.2, 4.4	<ul style="list-style-type: none"> <li>Organises and implements processes to set up work, assess techniques and produce creative work within set parameters</li> <li>Manages own decisions about appropriate techniques by testing a range of explored options</li> <li>Resolves problems with technique through experimentation and testing</li> <li>Reviews work in progress, resolving problems with technique through refinement of approach</li> </ul>

## Unit Mapping Information

# Assessment Requirements for CUAILL401 Develop and refine illustrative work

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

## Performance Evidence

Evidence of the ability to:

- organise workspace and resources needed to meet requirements of illustrative work, according to workplace and legislative requirements
- experiment with illustration techniques to create multiple illustrations that:
  - meet the requirements of associated briefs
  - show technical proficiency in chosen techniques
  - indicate review and refinement of own ideas.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe intellectual property requirements relevant to producing illustrations
- describe the role of experimentation in developing and refining ideas for illustrations
- explain how the elements and principles of design are used to inform illustrative work
- list and briefly describe the resources required to produce illustrations, including key physical features, cleaning and maintenance techniques, and storage requirements
- discuss typical workspace requirements for producing illustrations including ways of organising space and equipment for safe and efficient work operation
- describe practices and procedures for working safely and sustainably with materials, tools and equipment for producing illustrations.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- equipment, tools and materials used to produce illustrations
- briefs on which to base illustrations
- relevant information sources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUAPPR512 Develop sustainability of own professional practice

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to establish goals for own professional practice and determine how your practice can be developed in a sustainable way. All aspects of sustainability, such as individual, social, environmental and economic, should be considered.

The unit applies to those who may be required to consider the sustainability of their practice in any creative sector or artistic area of expertise.

No licensing, legislative or certification conditions apply to this unit at the time of publication.

### Unit Sector

Industry capability – Professional practice

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Research and develop goals for own practice	1.1 Identify own professional goals and aspirations in context of chosen practice area 1.2 Identify and consult with required personnel to support identified goals and aspirations 1.3 Evaluate opportunities and limitations that affect contemporary practice in chosen area 1.4 Identify future directions for professional practice in consultation with required personnel 1.5 Develop goals for overall practice direction
2. Evaluate current	2.1 Identify and explore components of sustainable professional

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
sustainability of own practice	<p>practice in chosen area of work</p> <p>2.2 Evaluate current practice against identified components</p> <p>2.3 Research ways to increase sustainability of professional practice</p>
3. Develop and implement strategies to improve professional practice sustainability	<p>3.1 Develop and implement practical and innovative strategies for enhancing sustainability of practice</p> <p>3.2 Develop and nurture own professional networks and collaborate with others</p> <p>3.3 Integrate practices that support own lifelong learning in chosen field</p> <p>3.4 Seek feedback and refine own ideas and strategies for developing professional practice</p> <p>3.5 Evaluate constraints and limitations of strategies and address as required</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

<b>SKILL</b>	<b>DESCRIPTION</b>
Oral communication	<ul style="list-style-type: none"> <li>Actively participates in discussions of a range of sustainability issues with peers, using listening and questioning skills to elicit views</li> </ul>
Reading	<ul style="list-style-type: none"> <li>Evaluates a broad range of sometimes complex information in a variety of forms</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>Uses systematic, analytical processes in a variety of situations to set goals, gather required information, and identify and evaluate options</li> <li>Identifies potential of new approaches to enhance work practices and outcomes, and considers fundamental and incremental changes that lead to longer term goals</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Makes judgements and decisions in response to complex factors in contemporary practice in chosen area</li> <li>Takes responsibility for own workload, discussing some key aspects with others</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Participates in a collaborative exchange of ideas and trends</li> <li>Builds rapport to establish relationships</li> </ul>

## Unit Mapping Information

No equivalent unit. Supersedes and is not equivalent to CUAPPR502 Develop own sustainable professional practice.

## Links

Companion Volume Implementation Guide is found on VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

# Assessment Requirements for CUAPPR512 Develop sustainability of own professional practice

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- identify at least two opportunities and implement at least two strategies to enhance sustainability in own practice.

In the course of the above, the candidate must:

- research and collaborate with required personnel to identify professional development ideas and issues applicable to own practice
- develop a set of at least five realistic goals for own practice that contribute to sustainability of own professional practice
- adopt sustainable work practices in all areas of activity.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- sustainability opportunities and constraints as they apply to own professional context
- factors that affect contemporary practice, including:
  - buying trends
  - sustainable work practices
  - economic considerations
  - impacts of technology on practice
  - lifestyle trends
  - practice location
  - social issues
  - intellectual property considerations
  - personal emotional wellness

- tools, techniques and strategies used by practitioners to develop and evaluate practice sustainability
- key aspects of individual, social, economic and environmental sustainability and their impact on an area of practice.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- research sources
- opportunities to develop professional networks
- interaction with others required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## Links

Companion Volume Implementation Guide is found on VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

## CUAPPR513 Present a body of own creative work

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to use creative, technical and project management skills to produce a professional and innovative presentation of own creative work.

The unit applies to individuals who maintain an up-to-date presentation package or portfolio of creative work. This unit involves the use of digital formatting in the design and delivery of the presentation or portfolio.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Industry capability – Professional Practice

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Evaluate and select presentation ideas	1.1 Research presentation ideas using required information sources 1.2 Explore new and innovative ideas for digitally presenting work using ideas from other disciplines 1.3 Develop presentation ideas in consultation with required personnel 1.4 Select presentation idea based on intended purpose and requirements 1.5 Evaluate production requirements and content implications of selected presentation idea
2. Plan presentation	2.1 Develop presentation concept using critical thinking techniques

ELEMENT	PERFORMANCE CRITERIA
	2.2 Refine presentation concept considering explicit and implicit messages required for intended audience 2.3 Develop production budget, timeframes and workflow plan 2.4 Support key communication messaging using design templates and prototypes
3. Create presentation	3.1 Develop presentation within required timeframe, selecting and integrating content that supports identified objectives and messages 3.2 Obtain and record clearance of copyright and intellectual property rights on sourced content 3.3 Address conceptual and technical challenges as required 3.4 Review projected and actual budget outcomes, adjusting process as required
4. Deliver and evaluate presentation	4.1 Present own creative work in format and style required for intended audience and purpose 4.2 Evaluate presentation based on identified objectives and feedback from required personnel 4.3 Identify opportunities for updating and refining presentation

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Numeracy	<ul style="list-style-type: none"> <li>Performs calculations or estimates of requirements, timeframe and costs</li> <li>Selects, totals and orders required resources within budgetary and time constraints</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>Explains own ideas for presentation to required personnel using language required for audience</li> <li>Participates in abstract discussions of ideas and solutions using listening and questioning skills to elicit feedback</li> <li>Uses required communication practices and protocols in discussions and presentations</li> </ul>
Reading	<ul style="list-style-type: none"> <li>Gathers, interprets and analyses information from different sources and identifies required information</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Completes presentation using accurate, specific and industry-related terminology</li> </ul>

<b>SKILL</b>	<b>DESCRIPTION</b>
	<ul style="list-style-type: none"> <li>• Completes required supporting documentation using clear and technically specific language</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Gains insight into current practices and ideas for change using perspectives of others</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Manages complex tasks and understands their contribution to longer term goals</li> <li>• Recognises potential of developing and applying new ideas for improvements in work practices and outcomes</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• Sets goals, gathers required information, and evaluates and selects options</li> </ul>
Problem solving	<ul style="list-style-type: none"> <li>• Uses systematic and analytical processes in different situations</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Takes responsibility for compliance with legal and regulatory responsibilities</li> </ul>
Technology	<ul style="list-style-type: none"> <li>• Considers purpose, needs and limitations when selecting and using different technologies and applications</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to CUAPPR503 Present a body of own creative work.

## Links

Companion Volume Implementation Guide is found on VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

# Assessment Requirements for CUAPPR513 Present a body of own creative work

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- complete at least one presentation for a selected creative product that reflects proposed purpose, objectives and messages and meets requirements of intended audience.

In the course of the above, the candidate must:

- research and identify at least one or more new or innovative ways for presenting portfolios of creative work
- use digital formatting in design and delivery of presentation
- apply copyright and intellectual property requirements to presentation of creative product
- design a presentation concept that includes key proposed objectives and messages
- realise the presentation concept within required budget and timeframes
- evaluate presentation and document ways to respond to future presentation opportunities.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- common techniques used for presenting portfolios of work in creative practices
- techniques for digitally formatting presentation design and delivery
- professional trends related to presentation ideas and technologies for area of work, including design, layout, typography, interactivity and accessibility
- critical thinking techniques that inform presentation concept developments
- elements of cohesive and coherent presentations
- copyright and intellectual property issues and legislation associated with professional creative practice, including ways of identifying requirements related to:
  - information in professional presentations
  - self-promotion

- contracts.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- technology and sources of information required for researching presentation methodologies
- presentation tools
- information sources required to present creative work described in performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## Links

Companion Volume Implementation Guide is found on VETNet -

## CUAPPR514 Establish and maintain environmentally sustainable creative practice

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to integrate environmentally sustainable approaches into creative art or design practice in order to reduce own ecological footprint across all areas of operation. It involves evaluating environmental sustainability of current practices, ensuring resources are used in a sustainable way and making sustainable decisions to ensure continuous sustainability in the practice.

The unit applies to those who work as artists or designers. Sustainability considerations apply both to activities within the practice and to the design of products and services that might be made, operated or used by others. The practitioner applies a self-directed approach to ensuring the sustainability of own creative practice.

No licensing, legislative or certification conditions apply to this unit at the time of publication.

### Unit Sector

Industry capability – Professional practice

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Evaluate environmental sustainability of current practice	1.1 Assess source of materials used in current practice, taking account of their origin and abundance 1.2 Investigate and evaluate resource use and sustainability issues in current practice 1.3 Identify and evaluate applicable legislation, codes of practice and national standards that impact on workplace sustainability and

ELEMENT	PERFORMANCE CRITERIA
	confirm compliance 1.4 Analyse and address existing and potential environmental risks and hazards in the workplace
2. Use resources sustainably in own practice	2.1 Use sustainable work practices across all areas of activity 2.2 Explore use of alternative sources of materials, including recycled products where possible 2.3 Source and use more sustainable approaches in work, including sustainable materials in preference to materials in short supply 2.4 Maximise use of waste products arising from the creative process 2.5 Monitor and measure use of resources in own practice, and make changes that reduce usage where practicable
3. Make sustainable design decisions	3.1 Evaluate choice and use of materials in design briefs, whether generated by self or others 3.2 Assess impact of user needs and preferences on sustainable design options 3.3 Assess environmental impact of intended production processes 3.4 Enhance sustainability by asking pertinent questions 3.5 Positively influence the sustainability of design process within scope of own responsibility 3.6 Include explicit reference to sustainability issues in design and production documentation
4. Maintain currency of sustainability issues and options	4.1 Maintain currency of specialised knowledge of sustainability issues applicable to own area of expertise 4.2 Proactively identify sources of information and professional development to build own sustainability skills 4.3 Integrate current and emerging ideas into own practice

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Learning	<ul style="list-style-type: none"> <li>Identifies and analyses sustainability aspects of completed work through self-appraisal and positively enhances practice</li> <li>Enhances professional development through ongoing accumulation of information about contemporary and developing methodologies</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Prepares detailed resource specifications, making adjustments based on sustainability considerations relating to availability and usage</li> </ul>

SKILL	DESCRIPTION
Oral communication	<ul style="list-style-type: none"> <li>• Articulates clearly and conveys sustainability requirements using specific and applicable language suitable to audience</li> <li>• Confirms and clarifies understanding using listening and questioning techniques</li> </ul>
Writing	<ul style="list-style-type: none"> <li>• Accurately records applicable sustainability issues and approaches in workplace documentation using clear and specialised language</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Sets sustainability goals, gathers applicable information and identifies and evaluates options against agreed criteria using systematic and analytical processes in different situations</li> <li>• Recognises the potential to develop and apply new ideas and enhance sustainable work practices and outcomes</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Keeps up to date with legislation, codes of practice, and national standards applicable to own rights and responsibilities and considers implications of these for own work practice</li> <li>• Takes responsibility for own work practices negotiating some key sustainability aspects with others</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to CUAPPR504 Establish and maintain environmentally sustainable creative practice.

## Links

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

# Assessment Requirements for CUAPPR514 Establish and maintain environmentally sustainable creative practice

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- establish and maintain at least two environmentally sustainable creative practices.

In the course of the above, the candidate must:

- develop new ideas for developing sustainable practices within own creative work
- develop a set of actions that enhance the environmental sustainability of individual practice
- work with others and positively influence the sustainability of the design process where applicable
- apply varied knowledge of key aspects of sustainability to those areas of creative practice that can be made more sustainable
- monitor, measure and reduce, where practicable, use of resources in own practice.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- sources of raw materials used in the applicable area of creative practice
- specific sustainability issues that impact on the applicable area of creative practice in terms of both design and production
- ways to positively influence sustainability in the design and production of own work
- tools, techniques and strategies used by practitioners to build sustainable practice
- legislation, codes of practice and standards about sustainability in the relevant areas of practice.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- information relating to sustainable practices and materials
- scenarios requiring the establishment and maintenance of environmentally sustainable creative practices.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUAPPR515 Establish and maintain safe creative practice

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to determine and respond effectively to broad and specific safety requirements in a professional practice. It involves determining work health and safety (WHS) requirements, identifying hazards, managing risks, and monitoring and enhancing safety of the practice.

The unit applies to those who are sole practitioners or working in collaborative teams across all sectors and areas of expertise, who are responsible for managing safety. The practitioner applies a self-directed approach to ensuring safety. The unit could apply to a range of internal and external work environments, including workshops, studios, offices, field locations and performance venues. The unit does not apply to individuals employed by organisations to manage the safety of a practice.

No licensing, legislative or certification conditions apply to this unit at the time of publication.

### Unit Sector

Industry capability – Professional practice

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine WHS requirements for professional practice	1.1 Research key features of legislation that apply to professional practice 1.2 Source and evaluate practice-specific codes, standards and guidelines that affect the management of safety in the applicable work environment 1.3 Develop systems and procedures that respond to WHS requirements and effectively integrate those responses into

ELEMENT	PERFORMANCE CRITERIA
	<p>practice management</p> <p>1.4 Evaluate the role of others in practice safety and involve them as required</p>
2. Identify hazards and assess and manage risks	<p>2.1 Identify existing and potential hazards specific to the area of practice using applicable methods, templates and tools</p> <p>2.2 Assess and manage risks associated with those hazards in line with established processes and according to WHS legislation and codes of practice</p> <p>2.3 Implement and monitor developed systems and procedures in response to identified requirements for hazard control measures and risk assessment in the workplace</p> <p>2.4 Develop and maintain current and accurate documentation that supports hazard identification and risk management in workplace practices</p> <p>2.5 Address hazard identification and risk assessment and management at the planning, design and evaluation stages of any change in the workplace and confirm that new hazards are not created</p>
3. Monitor and enhance safety of the practice	<p>3.1 Maintain currency of WHS knowledge applicable to own area of practice</p> <p>3.2 Seek feedback from colleagues on workplace safety practices and potential issues, and integrate improvements into systems and procedures as required</p> <p>3.3 Proactively identify other sources of information and professional development opportunities relating to safety</p> <p>3.4 Integrate current and emerging ideas and technologies that support workplace safety into own practice</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

SKILL	DESCRIPTION
Numeracy	<ul style="list-style-type: none"> <li>• Collects and interprets numerical information relating to workplace hazards, identifying issues and responding by amending workplace systems and procedures as required</li> <li>• Calculates, measures and estimates in relation to probability and the likelihood of specific types of risks, and develops their control measures</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>• Listens to and notes specific information relating to practice safety and confirms and clarifies requirements using listening and questioning</li> </ul>

<b>SKILL</b>	<b>DESCRIPTION</b>
	skills <ul style="list-style-type: none"> <li>Participates in an oral exchange requiring some negotiation regarding safety procedures and practices</li> </ul>
Reading	<ul style="list-style-type: none"> <li>Reads and evaluates a series of complex texts and determines how general and specific legislative, regulatory and work requirements relate to the safety of practice</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Writes detailed procedural text based on the needs of the practice, providing clear plain English information about systems and procedures required to address workplace safety and meet reporting obligations</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>Reflects on the way in which variables impact on decision outcomes and contributes to refinement of decision-making processes in the future using past experiences</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>Develops plans and manages complex tasks with an awareness of how they may contribute to long-term goals</li> <li>Gathers applicable information and identifies and evaluates options against established criteria using systematic, analytical processes in different situations</li> </ul>
Problem solving	<ul style="list-style-type: none"> <li>Recognises different problems and responds intuitively to those requiring immediate attention, quickly drawing on current knowledge and past experience to devise solutions</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Keeps abreast of applicable legislative requirements and considers their implications when negotiating, planning and undertaking work relating to improving practice safety</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Collaborates with others and achieves joint outcomes, playing an active role in influencing practice safety and sometimes taking a leadership role</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to CUAPPR505 Establish and maintain safe creative practice.

# Assessment Requirements for CUAPPR515 Establish and maintain safe creative practice

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- establish and maintain at least two safe creative practices.

In the course of the above, the candidate must:

- analyse the needs of a particular practice and develop a set of systems, procedures and practices that support safety in that context
- identify key safety issues, including specific hazards and risks in the applicable area of practice
- apply general work health and safety (WHS) legislation and specific codes, standards or guidelines relevant to own practice.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- essential components of work health and safety (WHS) legislation, regulations and codes of practice applicable to the specific area of practice
- essential WHS responsibilities of employers, manufacturers, suppliers, employees and other parties with legal responsibilities
- applicable industry or process-specific safety guidelines that apply to particular fields of work and particular work environments
- hazards and their associated risks that exist in the specific professional practice
- potential impact of not addressing hazards and risks in the specific area of practice
- organisational systems, procedures and practices that support WHS management and regulatory compliance for a professional practice, including those relating to:
  - business planning, especially new technology and organisational change
  - purchasing policies and procedures
  - reporting on financial, technical and other resource needs

- maintenance of WHS systems and procedures.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to general and practice-specific (WHS) information.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUAPPR612 Collaborate in professional creative projects

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to collaborate with other creative practitioners to establish, realise and evaluate a creative project.

The unit applies to those who are independent creative practitioners working together in a collaborative team on commercial or community creative projects in physical or virtual environments. They may work on individual pieces of creative work or on thematically connected works in the broader context of a work brief, exhibition, competition or themed event. The unit applies to self-generated projects as well as those developed in response to opportunities presented by others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Industry capability – Professional Practice

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for collaborative project	1.1 Establish sustainable and productive creative relationships 1.2 Engage with collaborative communities and partnerships based on potential benefits for self and others 1.3 Identify factors inhibiting potential collaboration and address as required 1.4 Identify and pursue collaboration opportunities

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
2. Establish collaborative project	2.1 Establish collaborative project and contribute to project objectives and parameters 2.2 Agree ways of working that acknowledges different contributions of required personnel 2.3 Determine ethical considerations, copyright and intellectual property requirements 2.4 Identify professional and practical project requirements 2.5 Organise and allocate work activities with clear and agreed outcomes
3. Realise collaborative project	3.1 Contribute own technical and creative expertise from idea generation to project realisation 3.2 Extend own expertise and learn from others as project progresses 3.3 Monitor project progress against agreed objectives 3.4 Challenge, test and share ideas with project team 3.5 Suggest ideas and solutions for technical, creative and organisational challenges 3.6 Meet established personal responsibilities for creative work and overall project
4. Evaluate collaborative project	4.1 Engage in review and evaluation with others involved in project 4.2 Evaluate own contribution based on collaborative effort and professional relationships with others 4.3 Identify and seek opportunities for refining and expanding own expertise

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

<b>SKILL</b>	<b>DESCRIPTION</b>
Learning	<ul style="list-style-type: none"> <li>Identifies strengths and weaknesses and opportunities for improvement using self-appraisal and feedback</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>Shares and explores abstract creative concepts and ideas using required language and communication methods</li> </ul>
Reading	<ul style="list-style-type: none"> <li>Interprets information from project documentation</li> </ul>

<b>SKILL</b>	<b>DESCRIPTION</b>
Writing	<ul style="list-style-type: none"> <li>Documents roles and project requirements using language and format required for context and intended audience</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Establishes and maintains professional working relationships</li> <li>Achieves joint outcomes using and enhancing skills and knowledge related to complex issues, ideas and creative challenges</li> <li>Recognises and responds to explicit and implicit meanings in communication, seeking clarification where misinterpretation might create difficulties</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>Achieves goals of professional standard using diverse practices</li> <li>Works autonomously and takes responsibility and ownership for complex project work</li> <li>Explores new ideas with understanding of importance for viability and effectiveness of own role</li> <li>Gathers required information and identifies, evaluates and refines options against agreed understanding using systemic and analytical processes</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>Develops plans for managing complex tasks and incorporates contribution of own and others' practice</li> </ul>
Problem solving	<ul style="list-style-type: none"> <li>Identifies different problems and responds to difficulties by drawing on current knowledge and past experience to devise solutions within required timeframes</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Complies with legal, regulatory and ethical responsibilities</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to CUAPPR602 Collaborate in professional creative projects.

Companion Volume Implementation Guide is found on VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

# Assessment Requirements for CUAPPR612 Collaborate in professional creative projects

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- realise at least one creative work of professional standard in collaboration with required personnel, involving:
  - contributing to agreed objectives and parameters
  - contributing to technical, creative and organisational expertise according to agreed team approaches
  - modelling due diligence and professionalism
  - establishing and maintain sustainable professional relationships
  - evaluating and resolve complex technical, creative or organisational problems.

In the course of the above, the candidate must:

- apply copyright and intellectual property requirements to creative work.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- types of face-to-face and virtual communities, networks and groups required for own professional creative practice
- benefits of collaboration for individuals, businesses and communities, including value of collaboration as problem-solving tool
- behaviours and factors supporting professional relationships and collaboration in context of creative projects
- common problems in collaborative process and how to avoid or resolve them
- project management processes and procedures required for creative projects
- ways of evaluating success of projects and collaborative undertakings, including benefits of alternative evaluation approaches:

- formal reporting
- professional critique
- reviewing peer feedback
- copyright and intellectual property issues and legislation associated with professional creative practice, including ways of identifying requirements related to:
  - shared intellectual property
  - self-promotion
  - contracts.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- opportunities to collaborate with other individuals.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUAPPR613 Engage in the business of creative practice

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to approach the business aspects of working as a creative practitioner in a professional manner. It involves developing professional work practices, evaluating different business practices, investigating financial and legal aspects of creative practice and evaluating own professional opportunities.

The unit applies to those who, depending on the creative practice, operate as sole practitioners, in artist cooperatives, or as freelance or contract workers. Regardless of the business model, all practitioners earning income from their practice engage with the professional business requirements for a sustainable creative practice. Independent creative practitioners sometimes work as employees in small and large organisations.

No licensing, legislative or certification conditions apply to this unit at the time of publication.

### Unit Sector

Industry capability – Professional practice

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop and apply professional work practices	1.1 Develop a professional work ethic when practicing creatively 1.2 Collaborate and communicate with other professionals about the business aspects of creative practice 1.3 Determine the skills and knowledge needed to operate as a successful creative practitioner 1.4 Evaluate own current skills and knowledge and the need for related professional development

ELEMENT	PERFORMANCE CRITERIA
	1.5 Identify own skills and knowledge and assess potential for using specialist expertise
2. Evaluate different business practices	2.1 Investigate different ways that creative practitioners do business 2.2 Investigate different business practices, systems and procedures that need to be considered as part of professional creative practice 2.3 Assess relevance and implications of particular business structures 2.4 Identify physical resources required by own creative practice and how they might be accessed 2.5 Develop an overall approach to business aspects of own practice based on evaluation of applicable information 2.6 Evaluate all aspects of own practice as a key component of business and personal growth
3. Address financial aspects of creative practice	3.1 Investigate financial considerations for creative practice 3.2 Research and assess different ways of commercialising work and ideas 3.3 Evaluate different ways of costing and selling creative work 3.4 Assess broader financial management requirements and their application to own practice 3.5 Develop and apply individual approaches to financial management of practice
4. Analyse the rights and obligations of creative practitioners	4.1 Evaluate legal and moral rights and obligations of professional creative practice 4.2 Practise work and business in ways that meet legal and moral obligations 4.3 Pursue own rights as a creative practitioner consistent with own professional and ethical standards 4.4 Establish and maintain sound approaches to safety and sustainability in professional practice
5. Evaluate and pursue professional opportunities	5.1 Evaluate work opportunities within and beyond the creative sector 5.2 Identify and pursue potential work opportunities beyond established patterns of work 5.3 Identify and access sources of professional advice 5.4 Evaluate local and global opportunities for own practice 5.5 Identify and evaluate opportunities offered by current and emerging trends in the consumption of culture and creative products 5.6 Analyse the experiences of others as a way of discovering different opportunities

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

<b>SKILL</b>	<b>DESCRIPTION</b>
Learning	<ul style="list-style-type: none"> <li>• Demonstrates commitment to an ongoing process of professional development</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>• Interprets numerical information and manages financial aspects of the professional practice business</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>• Interacts effectively with different professional practitioners, choosing language to share and explore potentially abstract creative concepts and ideas</li> </ul>
Reading	<ul style="list-style-type: none"> <li>• Identifies, analyses and evaluates often complex information from different sources and identifies practices, systems and procedures that could enhance own professional creative practice</li> </ul>
Writing	<ul style="list-style-type: none"> <li>• Prepares documentation of work that incorporates synthesis of knowledge and ideas using appropriate terminology and cohesive language in a format applicable to purpose</li> </ul>
Initiative and enterprise	<ul style="list-style-type: none"> <li>• Gathers applicable information and identifies, evaluates and refines options against agreed criteria using systematic and analytical processes</li> <li>• Identifies the way in which variables impact on decision outcomes and refines decision-making processes using experiences</li> <li>• Identifies the critical importance of the ongoing exploration of new ideas to the viability and effectiveness of own role</li> </ul>
Problem solving	<ul style="list-style-type: none"> <li>• Articulates and challenges the values, beliefs and assumptions that may shape thinking and routinely reframes and redefines problems when generating new ideas and fresh perspectives</li> <li>• Identifies different problems and responds intuitively to difficulties by quickly drawing on current knowledge and past experience to devise solutions</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>• Works with a high degree of autonomy, taking responsibility and ownership for all aspects of work, including compliance with legal and regulatory rights and responsibilities</li> <li>• Keeps abreast of trends and issues in a dynamic world and readily adapts to changing needs and priorities</li> <li>• Identifies innovative ways of developing and sharing skills and knowledge with others</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>• Contributes to a collaborative culture, collaborating with others on practice development issues, facilitating a sense of commitment and cohesion, and highlighting and using the strengths of those involved</li> <li>• Invests time and energy in building rapport with other creative and business professionals as an integral part of addressing management and development issues</li> </ul>

## Unit Mapping Information

# Assessment Requirements for CUAPPR613 Engage in the business of creative practice

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- develop at least two cohesive approaches and strategies, that are grounded in research and analysis, for developing and managing own practice.

In the course of the above, the candidate must:

- research and evaluate different complex and varied business information, including business structures, financial considerations, and legal rights and obligations
- interact with other professionals on management and development issues
- identify professional work opportunities within and beyond the creative sectors, including new and emerging opportunities
- apply legal and moral rights and obligations relevant to own practice.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- types of behaviour, skills and practice that constitute a professional way of working in the specific area of creative practice
- professional development opportunities for the specific area of creative practice
- types and sources of external expertise and professional advice for creative practitioners that could be used in professional practice, including different industry organisations
- general business structures, practices, systems and procedures that apply to all professional practitioners, as well as typical ways that business is done in the specific area of creative practice
- physical resources needed for different types of professional practice and different ways they may be set up or accessed
- financial management practices that apply to all professional practitioners, including financial models and structures that apply to the specific area of creative practice

- factors to consider when costing and selling work and methods of selling work, including commissions
- trends in the consumption of culture and creative products and their impact on professional creative practice
- legal and moral obligations of creative practitioners, including intellectual property, work health and safety, and sustainability considerations.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- interaction with others required to demonstrate the performance evidence
- general business information required to demonstrate the performance evidence.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUARES301 Apply knowledge of history and theory to own arts practice

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

### Application

This unit describes the skills and knowledge required to assess the relevance of historical and theoretical information for application to own arts practice.

It applies to individuals working in any area of arts practice who use analytical skills and apply some judgement and autonomy to the research process.

No licensing, legislative or certification conditions apply to this unit at the time of publication.

### Unit Sector

Knowledge management – research

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Maintain and develop knowledge of history and theory	1.1 Monitor relevant sources of industry information based on areas of interest, work and learning 1.2 Develop processes to review and maintain knowledge of history and theory relevant to own arts practice in consultation with appropriate people
2. Evaluate information	2.1 Evaluate information from range of sources 2.2 Extract and evaluate key ideas relevant to own arts practice

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	2.3 Use information in compliance with intellectual property requirements and in culturally appropriate way
3. Apply information to own arts practice	3.1 Determine own ideas about ways information is used 3.2 Integrate ideas into development of own arts practice 3.3 Discuss application of knowledge of history and theory with appropriate people and incorporate feedback and ideas as required

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<b>Skill</b>	<b>Performance Criteria</b>	<b>Description</b>
Reading	1.1, 2.1, 2.2	<ul style="list-style-type: none"> <li>Identifies useful information sources and evaluates visual and textual content to select information relevant to own practice</li> </ul>
Oral Communication	1.2, 3.3	<ul style="list-style-type: none"> <li>Participates in exchanges of ideas and information with others</li> <li>Uses listening and questioning to clarify and confirm understanding of other opinions</li> </ul>
Navigate the world of work	2.3	<ul style="list-style-type: none"> <li>Understands responsibility to follow legal requirements and cultural protocols when using information in own practice</li> </ul>
Get the work done	1.1, 1.2, 3.1, 3.2	<ul style="list-style-type: none"> <li>Plans and organises a range of routine tasks required to inform own practice</li> <li>Determines simple organisational processes to keep up with information relevant to own practice</li> <li>Analyses theoretical information to decide how it will be used in own practice</li> </ul>

## Unit Mapping Information

## Assessment Requirements for CUARES301 Apply knowledge of history and theory to own arts practice

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

### Performance Evidence

Evidence of the ability to:

- review a range of information and evaluate its relevance to current arts practice
- maintain information for application to own creative practice
- participate in discussions about art practice and demonstrate how feedback and ideas are used in own arts practice.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

### Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify sources of information on history and theory relevant to own arts practice
- describe theoretical and historical contexts relevant to own arts practice
- outline ways information assists the development of own arts practice
- describe information maintenance methods that enhance own arts practice
- outline intellectual property issues and legislation relevant to the use of information and ideas in own work.

### Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- a range of relevant and current information services and sources
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## CUASCU411 Experiment with techniques to produce sculpture

### Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

### Application

This unit describes the skills and knowledge required to proactively experiment and innovate with various sculptural techniques and design concepts to develop professional practice, form an individual style and produce finished sculptures.

The unit applies to those who have well developed skills in design and technique and who often produce work at a pre-professional level for sale in a range of settings. They work independently with limited supervision and guidance as required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Visual Communication – Sculpture

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop proficiency with a range of sculptural techniques and media	1.1 Evaluate potential for new approaches to sculpture based on capabilities of known techniques 1.2 Achieve different effects by introducing and adapting new equipment, tools and materials 1.3 Extend own capability with sculptural techniques through experimentation on samples, practice pieces or a work in progress 1.4 Assess safety and sustainability issues for different techniques and media
2. Develop ideas for sculptures	2.1 Research, adapt and use relevant ideas and approaches

ELEMENT	PERFORMANCE CRITERIA
	<p>from other practitioners and comply with intellectual property requirements</p> <p>2.2 Use knowledge of different sculptural techniques to inform ideas and discuss with required personnel</p> <p>2.3 Evaluate how different techniques and ideas can best work together</p> <p>2.4 Assess the professional potential and presentation requirements of own work</p> <p>2.5 Refine and confirm ideas based on research, experimentation and collaboration with others</p>
3. Organise sculpture resources	<p>3.1 Identify specific resource requirements for sculpture work</p> <p>3.2 Research potential sources of supply for sculpture resources</p> <p>3.3 Evaluate cost and other constraints that impact on development of the work</p> <p>3.4 Evaluate and respond to presentation considerations for finished sculptures</p> <p>3.5 Coordinate required resources and set up according to safety requirements</p>
4. Create finished sculptures	<p>4.1 Create sculptures using techniques and media selected from research and experimentation</p> <p>4.2 Review and refine ideas and approaches based on ongoing experience with production of own work</p> <p>4.3 Handle equipment, tools and materials safely; minimise and safely dispose of waste throughout all processes</p> <p>4.4 Document development of own work and the research and ideas that informed it</p>
5. Evaluate own sculptural work	<p>5.1 Reflect on own conceptual development and technical execution of work</p> <p>5.2 Identify areas for future skill development and options to learn</p> <p>5.3 Discuss completed work with others and consider all feedback</p>

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.*

<b>SKILL</b>	<b>DESCRIPTION</b>
Learning	<ul style="list-style-type: none"> <li>Formulates a learning plan when attempting to fill skill gaps</li> </ul>
Reading	<ul style="list-style-type: none"> <li>Interprets and evaluates complex and unfamiliar information when considering design ideas</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Uses clear, specific and industry related terminology when documenting a comprehensive record of research, conceptual idea development and production</li> </ul>
Oral Communication	<ul style="list-style-type: none"> <li>Represents clear ideas for designs and techniques using required industry and conceptual language</li> <li>Uses questioning and active listening techniques to elicit different perspectives about creative ideas and feedback and to confirm understanding</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Uses basic calculations to measure and record dimensions of display areas and appropriate size of art pieces to suit</li> <li>Uses basic calculations to determine and record quantities of equipment, tools and materials</li> <li>Interprets budgetary constraints and supplier prices and calculates sometimes complex order costs</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Assess design ideas and review own work through the perspective and guidance of others</li> <li>Engages in an open conversation to elicit and consider the merit of feedback from peers and others</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Takes responsibility for compliance with legal, safety and sustainability practices associated with creative work</li> <li>Manages own decisions about appropriate design ideas and techniques by experimentation with a range of explored options</li> <li>Reviews work in progress, resolving problems through refinement of approach</li> <li>Creates opportunities to use a more innovative approach and personal style</li> </ul>

## Unit Mapping Information

Supersedes and is equivalent to CUASCU401 Experiment with techniques to produce sculpture.

## Links

Companion Volume Implementation Guide is found on VETNet -

# Assessment Requirements for CUASCU411 Experiment with techniques to produce sculpture

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package Version 5.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- experiment with at least two different sculpture techniques and apply findings to sculpture works.

In the course above, the candidate must:

- confirm ideas for own work using a process of thorough research and experimentation
- identify and acquire resources required to complete chosen work
- adapt and use a range of sculptural techniques to create a single major work or multiple pieces of sculpture that:
  - shows technical proficiency
  - incorporates understanding of elements and principles of design
  - demonstrates innovation and the emergence of an individual style
- review and document the research and development process.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- key contemporary conceptual frameworks in sculpture
- intellectual property requirements relevant to producing sculptural works.
- methods used to research creative and technical approaches to sculptural work
- how the works of other practitioners may be used to inform individual practice
- role of experimentation in developing and refining ideas for sculptures and how it relates to the development of an individual style
- ways to adapt, extend and combine the capabilities of a wide range of sculptural techniques
- elements and principles of design, including:

- detailed design characteristics
- key interrelationships
- use in sculptures and how they may be challenged
- tools and equipment used to produce sculpture:
  - key physical features and uses
  - cleaning and maintenance techniques
  - storage requirements
- physical properties and capabilities of a range of materials and techniques used to produce sculptures
- suppliers of resources for professional sculpture practice, including raw, part-processed and processed sculpture materials
- practices and procedures for working safely and sustainably with materials, tools and equipment for producing sculpture.

## Assessment Conditions

Skills in this unit must be demonstrated in a workplace or simulated environment where the conditions are typical of those in a working environment in this industry.

This includes access to:

- equipment, tools and materials used to produce sculptures
- credible information sources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

# CUAWOO401 Experiment with techniques to produce wood objects

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

## Application

This unit describes the skills and knowledge required to proactively experiment and innovate with various woodworking techniques and design concepts to develop professional practice and an individual style.

It applies to individuals who have well developed skills in design and technique and who often produce work at a pre-professional level for sale in outlets such as markets and fairs. They work independently with limited supervision and guidance as required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Visual communication – wood

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop proficiency with a range of woodworking techniques and media	1.1 Evaluate potential for new approaches to woodwork based on capabilities of known techniques 1.2 Adapt or introduce new equipment, tools and materials to achieve different effects 1.3 Extend own capability with woodworking techniques through experimentation on samples, practice pieces or a work in progress

ELEMENT	PERFORMANCE CRITERIA
	1.4 Assess safety and sustainability issues for different techniques and media
2. Develop ideas for wood objects	2.1 Discuss, with key people, creative and other goals for own wood objects 2.2 Research, adapt and use relevant ideas and approaches from other practitioners and comply with intellectual property requirements 2.3 Use knowledge of different woodworking techniques to inform ideas 2.4 Consider how different techniques and ideas can best work together 2.5 Assess the professional potential and presentation requirements of own work to inform ideas 2.6 Refine and confirm ideas based on research, experimentation and collaboration with others
3. Organise woodworking resources	3.1 Identify specific resource requirements for the chosen work 3.2 Research potential sources of supply for woodworking resources 3.3 Evaluate cost and other constraints that impact on development of the work 3.4 Evaluate and respond to presentation considerations for finished wood objects 3.5 Coordinate required resources and set up according to safety requirements
4. Create finished wood objects	4.1 Create wood objects using techniques and media selected from research and experimentation, considering and applying elements and principles of design 4.2 Review and refine ideas and approaches based on ongoing experience with production of own work 4.3 Handle equipment, tools and materials safely; minimise and safely dispose of waste throughout all processes 4.4 Document development of own work and the research and ideas that informed it
5. Evaluate own wood objects	5.1 Reflect on own conceptual development and technical execution of the work 5.2 Identify areas for future skill development and options to learn 5.3 Discuss completed work with others and consider all feedback

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Learning	5.2	<ul style="list-style-type: none"> <li>Identifies own skill gaps and future learning options</li> </ul>
Reading	2.2, 3.2	<ul style="list-style-type: none"> <li>Interprets and evaluates complex and unfamiliar information to support design ideas and to identify key information about resources</li> </ul>
Writing	4.4	<ul style="list-style-type: none"> <li>Uses clear, specific and industry related terminology to document a comprehensive record of research, conceptual idea development and production</li> </ul>
Oral Communication	2.1, 5.3	<ul style="list-style-type: none"> <li>Clearly represents ideas for designs and techniques using relevant industry and conceptual language</li> <li>Uses questioning and active listening techniques to elicit different perspectives about creative ideas and feedback and to confirm understanding</li> </ul>
Numeracy	2.5, 3.1-3.3	<ul style="list-style-type: none"> <li>Uses basic calculations to measure and record dimensions of display areas and appropriate size of wood objects to suit</li> <li>Uses basic calculations to determine and record quantities of equipment, tools and materials</li> <li>Interprets budgetary constraints and supplier prices and calculates sometimes complex order costs</li> </ul>
Navigate the world of work	1.4, 2.2, 3.5, 4.3	<ul style="list-style-type: none"> <li>Takes responsibility for compliance with legal, safety and sustainability practices associated with creative work</li> </ul>
Interact with others	2.1, 5.3	<ul style="list-style-type: none"> <li>Discusses design concepts and collaborates with other artists to generate new ideas and solutions to achieve best outcomes for own creative work</li> <li>Engages in an open conversation to elicit and consider the merit of feedback from peers and others to enhance future performance</li> </ul>
Get the work done	1.1-1.3, 2.2-2.6, 3.1, 3.5, 4.1, 4.2	<ul style="list-style-type: none"> <li>Takes responsibility for completing own creative works from design inception to realisation, efficiently and logically sequencing the stages of preparation and production</li> <li>Manages own decisions about appropriate design ideas and techniques by experimentation with a range of</li> </ul>

		<p>explored options</p> <ul style="list-style-type: none"> <li>• Resolves problems with technique through experimentation and analysis</li> <li>• Reviews work in progress resolving problems through refinement of approach</li> <li>• Creates opportunities to use a more innovative approach and personal style.</li> </ul>
--	--	--

## Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
CUAWOO401 Experiment with techniques to produce wood objects	CUVWOO401A Experiment with techniques to produce wood objects	Updated to meet Standards for Training Packages and clarify intent. Minor edits to performance criteria.	Equivalent unit

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

# Assessment Requirements for CUAWOO401 Experiment with techniques to produce wood objects

## Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

## Performance Evidence

Evidence of the ability to:

- use a process of thorough research and experimentation to confirm ideas for own work
- identify and acquire resources required to complete chosen work
- adapt and use a range of woodworking techniques to create a single major work or multiple wood objects that:
  - shows technical proficiency in chosen techniques
  - reflects understanding of elements and principles of design
  - demonstrates innovation and the emergence of an individual style
- review and document the research and development process.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe intellectual property requirements relevant to producing wood objects
- summarise methods used to research creative and technical approaches to woodworking
- explain how the works of other practitioners may be used to inform individual practice
- describe the role of experimentation in developing and refining ideas for wood objects and how it relates to the development of an individual style
- explain ways to adapt, extend and combine the capabilities of a wide range of woodworking techniques
- describe, for the elements and principles of design, the detailed characteristics, key interrelationships, use in wood objects and how they may be challenged
- summarise, for a range of tools and equipment used to produce wood objects, key physical features and uses, cleaning and maintenance techniques and storage requirements

- describe the physical properties and capabilities of a range of materials and techniques used to produce wood objects
- list suppliers of resources for professional woodworking practice with particular emphasis on raw, part-processed and processed woodworking materials
- describe practices and procedures for working safely and sustainably with materials, tools and equipment for producing wood objects.

## Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- equipment, tools and materials used to produce wood objects
- information sources.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1db201d9-4006-4430-839f-382ef6b803d5>

# HLTAID011 Provide First Aid

## Modification History

Not applicable.

## Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty in line with first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies.

The unit applies to all persons who may be required to provide a first aid response in a range of situations, including community and workplace settings.

*Specific licensing/regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.*

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Respond to an emergency situation.

- 1.1. Recognise and assess an emergency situation.
- 1.2. Ensure safety for self, bystanders and casualty.
- 1.3. Assess the casualty and recognise the need for first aid response.
- 1.4. Seek assistance from emergency services.

2. Apply appropriate first aid procedures.

- 2.1. Perform cardiopulmonary resuscitation (CPR) in accordance ARC guidelines.
- 2.2. Provide first aid in accordance with established first aid principles.
- 2.3. Display respectful behaviour towards casualty.
- 2.4. Obtain consent from casualty where possible.
- 2.5. Use available resources and equipment to make the casualty as comfortable as possible.
- 2.6. Operate first aid equipment according to manufacturers' instructions.
- 2.7. Monitor the casualty's condition and respond in accordance with first aid principles.

3. Communicate details of the incident.
  - 3.1. Accurately convey incident details to emergency services.
  - 3.2. Report details of incident in line with appropriate workplace or site procedures.
  - 3.3. Complete applicable workplace or site documentation, including incident report form.
  - 3.4. Maintain privacy and confidentiality of information in line with statutory or organisational policies.
4. Review the incident.
  - 4.1. Recognise the possible psychological impacts on self and other rescuers and seek help when required.
  - 4.2. Contribute to a review of the first aid response as required.

## Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and not equivalent to HLTAID003 Provide first aid

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ced1390f-48d9-4ab0-bd50-b015e5485705>

# Assessment Requirements for HLTAID011 Provide First Aid

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the workplace or community setting.

There must be evidence that the candidate has completed the following tasks in line with State/Territory regulations, first aid codes of practice, first aid guidelines determined by the Australian Resuscitation Council (ARC) and other Australian national peak clinical bodies and workplace or site procedures:

- managed, in line with ARC guidelines, the unconscious, breathing casualty including appropriate positioning to reduce the risk of airway compromise
- managed, in line with ARC guidelines, the unconscious, non-breathing adult, including:
  - performing at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
  - following the prompts of an automated external defibrillator (AED) to deliver at least one shock
  - demonstrating a rotation of single rescuer operators with minimal interruptions to compressions
  - responding appropriately in the event of regurgitation or vomiting
- managed, in line with ARC guidelines, the unconscious, non-breathing infant, including:
  - performing at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- managed casualties, with the following:
  - anaphylaxis
  - asthma
  - non-life-threatening bleeding
  - choking
  - envenomation, using pressure immobilisation
  - fractures, dislocations, sprains and strains, using appropriate immobilisation techniques
  - minor wound cleaning and dressing
  - nosebleed
  - shock

- responded to at least one simulated first aid incident contextualised to the candidate's workplace or community setting, where the candidate has no knowledge of the casualty's condition prior to starting treatment, including:
  - identifying the casualty's illness or injury through history, signs and symptoms
  - using personal protective equipment (PPE) as required
  - providing appropriate first aid treatment
  - conveying incident details to emergency services or advising casualty on any required post incident action
  - providing an accurate verbal and written report of the incident
  - reviewing the incident.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- guidelines and procedures including:
  - ARC guidelines relevant to the provision of first aid
  - first aid guidelines from Australian national peak clinical bodies
  - potential incident hazards and risk minimisation processes when providing first aid
  - infection control procedures, including use of standard precautions and resuscitation barrier devices
  - requirements for currency of skill and knowledge
  - first aid codes of practice
  - appropriate workplace or site procedures relevant to the provision of first aid
  - contents of first aid kits
- legal, workplace and community considerations including:
  - duty of care requirements
  - own skills and limitations
  - consent and how it relates to the conscious and unconscious casualty
  - privacy and confidentiality requirements
  - awareness of potential need for stress management techniques and available support for rescuers
- considerations when providing CPR, including:
  - upper airway and effect of positional change
  - appropriate duration and cessation of CPR
  - appropriate use of an AED
  - safety and maintenance procedures for an AED
  - chain of survival
  - how to access emergency services
- techniques for providing CPR to adults, children and infants including:
  - how to recognise that a casualty is unconscious and not breathing normally

- rate, ratio and depth of compressions and ventilations
- correct hand positioning for compressions
- basic anatomy, physiology and the differences between adults, children and infants relating to CPR
- signs, symptoms and management of the following conditions and injuries:
  - allergic reaction
  - anaphylaxis
  - asthma
  - non-life-threatening and life-threatening bleeding
  - burns
  - cardiac conditions, including chest pain
  - choking
  - diabetes
  - drowning
  - envenomation - all current treatments
  - eye injuries
  - fractures, dislocations, strains and sprains
  - head, neck and spinal injuries
  - hypothermia
  - hyperthermia
  - minor wounds
  - nose-bleed
  - poisoning
  - seizures
  - shock
  - sharps injuries
  - stroke.

## Assessment Conditions

Each candidate to demonstrate skills in an environment that provides realistic in-depth, scenarios and simulations to assess candidates' skills and knowledge.

Due to the nature of this type of training, it is acceptable for the performance evidence to be collected in a simulated environment.

Compression and ventilation skills must be demonstrated on resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures.

Assessment must ensure access to:

- adult and infant resuscitation manikins following ARC guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device

- AED training devices
- workplace first aid kit
- placebo bronchodilator and spacer device
- different types of wound dressings and bandages
- blankets and items to treat for shock
- personal protective equipment (PPE)
- workplace injury, trauma or illness record, or other applicable workplace or site incident report form.

Simulated assessment environments must simulate real-life situations where these skills and knowledge would be performed, with all the relevant equipment and resources of that workplace or community environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors and must hold this unit or demonstrate equivalent skills and knowledge to that contained within this unit.

## ICPPRN3840 Set up and produce basic digital print

### Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 4.0.

### Application

This unit describes the skills and knowledge required to set up for and produce basic digitally printed product incorporating the use of raster image processor (RIP) technology when outputting to digital devices including wide format.

It applies to individuals working as print machinists in the printing and graphic arts industry who may set up, operate and monitor equipment and machinery and who may have to prepare material and apply solutions to problems. They may also provide leadership and guidance to others with some limited responsibility for the output of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Printing

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Check components and functions of digital print system	1.1 Check user-replaceable consumables and replacement as required 1.2 Check substrate feeding mechanisms and transport units and clear of misfeeds as required 1.3 Complete set up for data and electrical power 1.4 Perform shutdown and restart procedures according to manufacturer specifications 1.5 Install and set up required print driver and job download

ELEMENT	PERFORMANCE CRITERIA
	software
2. Perform digital printing system maintenance	2.1 Perform routine maintenance tasks according to manufacturer specifications and work health and safety (WHS) requirements 2.2 Clean substrate transport and inking systems 2.3 Check temperature and humidity conditions and substrate registration mechanisms 2.4 Perform ink density calibration 2.5 Implement basic maintenance solutions to minimise ink residue, substrate misfeed, paper particle dust, uncalibrated systems and ink coverage
3. Undertake substrate handling procedures	3.1 Develop and maintain paper handling and storage system for digital print environment according to requirements for substrate integrity and digital image quality 3.2 Check machine status, review print counters and consumable levels and estimate time requirements for reordering, servicing and reporting purpose
4. Confirm job specifications	4.1 Identify job specifications 4.2 Confirm availability of all job components 4.3 Check finishing requirements and coordinate internal workflow and outsource arrangements according to enterprise procedures 4.4 Calculate run time and completion time of job
5. Set up reel system	5.1 Adjust unwind reel 5.2 Set up and adjust rewind reel 5.3 Set up and adjust minor in-line processes
6. Set up sheet transportation system on sheet-fed machine	6.1 Load substrate into feeding mechanism and specify substrate properties in the user control interface 6.2 Identify and make adjustments to the delivery unit using the user control interface 6.3 Adjust on-line finishing unit using the user control interface
7. Use processor to set up job	7.1 Locate and retrieve electronic data files 7.2 Set processor parameters according to job specifications 7.3 Perform required preview and preflight checks of electronic data files 7.4 Apply basic troubleshooting methods to identify and rectify

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
	unverified data files, file errors and job requirement inconsistencies according to manufacturer specifications
8. Submit data files to digital print machine	8.1 Determine job priority according to job specifications and production schedules 8.2 Submit data file to print and image quality, and perform machine productivity checks
9. Produce digital proof and run digital print job	9.1 Conduct proof run and confirm proof conforms to job specifications and client requirements according to enterprise procedures 9.2 Conduct print run is according to job specifications 9.3 Monitor quality throughout print job and make adjustments as required
10. Perform document finishing	10.1 Identify and perform required document finishing 10.2 Package finished print according to delivery requirements

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

<b>Skill</b>	<b>Description</b>
Writing	<ul style="list-style-type: none"> <li>Enters routine data associated with production processes and enterprise procedures</li> </ul>
Numeracy	<ul style="list-style-type: none"> <li>Interprets and analyses a range of mathematical information used in familiar and routine tasks</li> </ul>
Self-management	<ul style="list-style-type: none"> <li>Identifies and follows explicit and implicit protocols and meets expectations associated with own role, taking some responsibility for decisions regarding when and how to complete tasks, co-ordinate with, or delegate to others</li> <li>Complies with work health and safety and enterprise procedures relevant to own role</li> </ul>
Teamwork	<ul style="list-style-type: none"> <li>Cooperates with others as part of familiar routine activities, and contributes to specific activities requiring joint responsibility and accountability</li> <li>Identifies what to communicate, with whom and how, in routine work situations</li> </ul>
Planning and	<ul style="list-style-type: none"> <li>Determines priorities and sequences steps involved in clearly defined,</li> </ul>

organising	familiar tasks
Problem solving	<ul style="list-style-type: none"><li>• Responds to predictable problems and implements standard or logical solutions related to role in immediate work environment</li></ul>
Technology	<ul style="list-style-type: none"><li>• Follows routine procedures for using digital technology by reading data from electronic monitoring and control systems</li></ul>

## Unit Mapping Information

Supersedes and is equivalent to ICPPRN384 Set up and produce basic digital print.

## Links

Companion Volume Implementation Guide is found on VETNet -

# Assessment Requirements for ICPPRN3840 Set up and produce basic digital print

## Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 4.0.

## Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including evidence of the ability to:

- set up and print four basic digital printing jobs according to manufacturer specifications, enterprise procedures and work health and safety (WHS) requirements.

## Knowledge Evidence

The candidate must be able to demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, including knowledge of:

- enterprise procedures, manufacturer specifications and work health and safety (WHS) requirements for:
  - setting up and operating in-line processes
  - the rewind function
- workplace job ticket procedures and pre-printing set-up checks and procedures
- procedures for:
  - file transfer actions and problem solving
  - selecting inks/toners for varied printed products and ensuring ink/toner quality
  - setting up on-line processes
  - obtaining client approval of the print and final approval of a basic job
  - proof checking
  - circumstances where client's required binding method is unavailable
  - packaging finished print work
- common problems and faults arising from:
  - printing on lightweight paper
  - incorrect feeding and delivery
- the process if required substrate is unavailable
- the range of substrate weights that can be printed on a specific machine

- the availability of pre-prepared substrates for a specific machine
- the maximum delivery quantity for a specific machine
- the function of the raster image processor (RIP) in the job
- data formats used in digital print
- common troubleshooting methods required in the job
- required calculations for run and completion time of job
- the benefits of electronic data over scanning hardcopy, and ways to submit a PDF file to a digital printer
- in-line options and on-line finishing options available on a specific machine
- circumstances where a job would be modified before printing
- various types of binding
- alternative options if document size is too thick to staple
- quality criteria to check in proof
- the purpose of packing finished print work
- manufacturer manuals, enterprise procedures and work health and safety documentation, including their location and purpose.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the printing field of work and include access to:

- special purpose tools, equipment and materials
- digital print machinery
- RIP or front-end processor.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## ICPSUP455 Supervise and schedule work of others

### Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

### Application

This unit describes the skills and knowledge required to supervise and schedule work of a team or individuals.

It applies to individuals who perform a broad range of skilled tasks relating to the printing and graphic arts industry, and who may also provide some leadership and guidance to others in application and planning of the skills.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Support

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and implement work schedules	1.1 Tasks and/or jobs are identified and prioritised according to overall production schedule 1.2 Timelines, personnel and equipment are identified for each job and task 1.3 Schedules are communicated logically and in an easily understood manner 1.4 Changes to schedules are implemented through reorganisation of priorities, with reasons being clearly conveyed to the team or

ELEMENT	PERFORMANCE CRITERIA
	<p>individuals</p> <p>1.5 Priority of tasks is communicated to the team or individuals</p>
<p>2. Monitor performance of tasks</p>	<p>2.1 Required standard is effectively communicated to the team or individuals to ensure understanding of allotted task</p> <p>2.2 Instruction or support to achieve required standard is provided as necessary</p> <p>2.3 Standard of performance is monitored, including quality standards, to ensure achievement of outcomes, and is reported according to enterprise procedures</p> <p>2.4 Completion times of tasks/jobs are monitored and scheduling is adjusted as appropriate</p>
<p>3. Monitor and support development of teams or individuals</p>	<p>3.1 Team or worker performance is monitored to determine effectiveness and is reported according to enterprise procedures</p> <p>3.2 Support is provided to individuals or teams to ensure full participation</p> <p>3.3 Procedures are provided to assist interaction and feedback on effectiveness between teams and individuals</p>
<p>4. Monitor application of WHS in the work area</p>	<p>4.1 Implementation of standards, both work health and safety (WHS) and environmental, is monitored to determine safety in the work area requirements</p> <p>4.2 Strategies for prevention or correction of problems are determined from the monitoring process</p> <p>4.3 Recommendations for prevention or correction are made to achieve established standards</p>
<p>5. Communicate with management, work teams and individuals</p>	<p>5.1 All information affecting work is explained logically and in an easily understood manner to team coordinators, teams or individuals where appropriate</p> <p>5.2 Effective and appropriate information provision is carried out with management and/or external personnel</p> <p>5.3 Written reports are concise and conform to enterprise procedures</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.4, 3.1, 3.3, 4.1	<ul style="list-style-type: none"> <li>Recognises relevant text within organisational documents and follows written instructions</li> </ul>
Writing	1.1, 1.4, 2.3, 2.4, 3.1, 3.3, 4.3, 5.1-5.3	<ul style="list-style-type: none"> <li>Records numerical and textual information related to outcomes of the job</li> </ul>
Oral Communication	1.3-1.5, 2.1, 2.2, 3.2, 3.3, 4.3, 5.1-5.3	<ul style="list-style-type: none"> <li>Provides explanations using vocabulary and non-verbal features appropriate for audience and context</li> </ul>
Numeracy	1.2-1.4, 2.4	<ul style="list-style-type: none"> <li>Uses simple mathematical calculations related to timeframes and schedules</li> </ul>
Navigate the world of work	2.3, 3.1, 4.1, 5.3	<ul style="list-style-type: none"> <li>Recognises and follows organisational and legislative requirements associated with own role</li> </ul>
Interact with others	1.3-1.5, 2.1, 2.2, 3.2, 3.3, 4.3, 5.1-5.3	<ul style="list-style-type: none"> <li>Uses appropriate communication protocols and conventions to convey information to co-workers</li> <li>Plays a lead role in collaborating, consulting and cooperating with co-workers to achieve shared understanding of individual roles and group objectives</li> </ul>
Get the work done	1.1, 1.2, 2.3, 2.4, 4.2	<ul style="list-style-type: none"> <li>Takes responsibility for planning and organising own workload and workloads of others</li> <li>Initiates standard procedures when responding to familiar problems within immediate context</li> </ul>

# Assessment Requirements for ICPSUP455 Supervise and schedule work of others

## Modification History

Release	Comments
Release 1	This version first released with ICP Printing and Graphic Arts Training Package Version 1.0.

## Performance Evidence

Evidence of the ability to:

- effectively schedule and supervise a team or individuals
  - create a portfolio of documents showing:
    - planning, implementing and monitoring schedules
    - monitoring and reporting on the performance of others
    - providing support and feedback on performance to others
    - determining safety requirements in the work area
    - monitoring work health and safety and environmental standards. (Suitable documents for the portfolio include rosters, schedules, quality-related documentation and testimonials from superiors and workers being supervised.)

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

## Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

### WHS standards

- explain who is responsible for work health and safety (WHS) standards in the workplace
- explain reporting procedures for WHS incidents

### Planning and implementing work schedules

- explain how priority of jobs is determined
- describe work scheduling procedures used within the organisation
- explain why changes to scheduling might be needed

### Standards monitoring

- outline information reported in performance monitoring

- identify who is responsible for providing instruction to achieve the required standard

### **Staff and workforce development**

- describe how often teams or individuals should be monitored on performance
- outline changes that can be made to enhance individual performance
- outline changes that can be made to enhance team performance
- list advantages of providing written reports to management.

## **Assessment Conditions**

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the Support field of work and include access special purpose tools, equipment and materials.

Assessors must satisfy NVR/AQTF assessor requirements.

# MEM13015 Work safely and effectively in manufacturing and engineering

## Modification History

Release 1. New unit. Supersedes and not equivalent to MEM13014A Apply principles of occupational health and safety in the work environment, MEM14004A Plan to undertake a routine task, MEM15002A Apply quality systems, MEM15024A Apply quality procedures, MEM16007A Work with others in a manufacturing, engineering or related environment.

## Application

This unit of competency defines the skills and knowledge required to work effectively in manufacturing and engineering work situations, including planning routine work and participating in and following work health and safety (WHS) procedures. The unit applies to working either individually or in a team situation and includes contributing to work-related group activities in a manufacturing or engineering workplace.

This unit covers WHS skills associated with carrying out routine operational activities safely and in compliance with legislative and regulatory requirements.

The unit covers the skills associated with participation in quality systems, communication and cooperation with others. The unit applies to workplaces with informal or formal quality management and improvement systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

**Band: A**

**Unit Weight: 2**

## Pre-requisite Unit

Nil.

## Competency Field

Work health and safety

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	<b>Determine job requirements</b>	1.1	Identify goals, objectives and task requirements and clarify with appropriate persons, where required
		1.2	Prioritise task requirements
2	<b>Review and modify plan</b>	2.1	Adjust timelines, priorities and other planning components to respond to contingencies, as necessary
		2.2	Re-examine results of work activity against the plan and identify possible improvements to future performance of work tasks
3	<b>Work effectively with others in the workplace</b>	3.1	Identify own role and responsibilities and relationship to other employees, including employees performing related/interdependent activities
		3.2	Identify supervisors and other sources of advice and assistance for own work
		3.3	Apply effective interpersonal skills to interact with others and contribute to activities and objectives
		3.4	Review and modify own work progress to complement the work of others
		3.5	Report own work progress to supervisors and where required to fellow employees using standard operating procedures (SOPs)
4	<b>Follow safe work practices</b>	4.1	Check for and identify hazards in the work area before and during work
		4.2	Follow procedures for avoiding or controlling hazards already identified in instructions, signage or other workplace communication
		4.3	Identify and report risks and hazards not covered by procedures

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	<ul style="list-style-type: none"> <li>4.4 Select, use and maintain relevant personal protective equipment (PPE) by procedures, as required</li> <li>4.5 Recognise emergency situations and take appropriate initial emergency action</li> <li>4.6 Follow procedures for responding to emergencies</li> <li>4.7 Report incidents, injuries and other WHS non-conformances according to procedures</li> </ul>
<b>5 Work within a quality system</b>	<ul style="list-style-type: none"> <li>5.1 Follow instructions and procedures and perform duties in accordance with standard operating procedures or quality system requirements</li> <li>5.2 Ensure conformance of product and process to specifications</li> <li>5.3 Report defects and non-conformance to specifications according to procedures</li> <li>5.4 Participate in process improvement procedures, where required</li> </ul>
<b>6 Participate in workplace health and safety procedures</b>	<ul style="list-style-type: none"> <li>6.1 Identify workplace health and safety policies and procedures relevant to own work and work area</li> <li>6.2 Identify relevant WHS managers and representatives for own work area</li> <li>6.3 Provide input to minimise hazards in work area in line with organisation WHS procedures and participative arrangements</li> </ul>

## Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Quality systems include one (1) or more of the following**

- quality planning
- quality assurance
- quality control
- quality improvement procedures and processes

**Task requirements include one (1) or more of the following:**

- timeframe
- quality requirements
- outcome and performance requirements
- job history
- checks
- reporting requirements
- tools and equipment
- materials and parts
- supporting documents

**Specifications include one (1) or more of the following:**

- task lists
- instructions
- manufacturer manuals
- diagrams and schematics
- sketches
- parts lists
- SOPs

**Planning includes one (1) or more of the following:**

- preparing a plan to complete the task
- organising task into manageable steps including appropriate order and timing
- monitoring the progress of processes related to own responsibilities
- applying relevant WHS instructions
- collecting, sorting, recording results of work
- seeking advice and guidance on setting priorities and timeframes

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- seeking feedback from supervisor, trainer or mentor

## Unit Mapping Information

Release 1. New unit. Supersedes and not equivalent to MEM13014A Apply principles of occupational health and safety in the work environment, MEM14004A Plan to undertake a routine task, MEM15002A Apply quality systems, MEM15024A Apply quality procedures, MEM16007A Work with others in a manufacturing, engineering or related environment.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MEM13015 Work safely and effectively in manufacturing and engineering

## Modification History

Release 1. New unit. Supersedes and not equivalent to MEM13014A Apply principles of occupational health and safety in the work environment, MEM14004A Plan to undertake a routine task, MEM15002A Apply quality systems, MEM15024A Apply quality procedures, MEM16007A Work with others in a manufacturing, engineering or related environment.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- identifying and avoiding or controlling hazards
- reporting hazards, incidents, injuries and other work health and safety (WHS) non-conformances following SOPs
- recognising and responding to emergencies following SOPs
- identifying and obtaining, instructions and information on job requirements, including one or more of the following:
  - verbal or written job instructions
  - specifications
  - SOPs
  - charts
  - lists
- identifying and responding to contingencies, including:
  - equipment breakdowns
  - non-conforming components
  - safety hazards
- recording information into proforma workplace documents, including:
  - production tally forms
  - quality control forms
  - safety incident forms
- performing assigned tasks and checking outcome of own work for conformance to specifications
- identifying own responsibilities within the workplace quality system
- giving and receiving feedback on own and group work
- seeking assistance from supervisors and mentors.

## Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures and use and application of personal protective equipment
- basic quality system terminology and concept, including:
  - quality assurance
  - quality control
  - quality improvement
- procedures to be followed in performing own work
- objectives, requirements and specifications to which the individual's work is to comply
- costs and consequences of poor quality
- effective interpersonal skills:
  - effective listening
  - basic speaking skills
  - use of workplace terminology and jargon
  - giving and receiving feedback
  - checking and clarifying task-related information
  - verbal, visual and written instructions
  - appropriate modes and methods of communication
- barriers to effective communication
- sources of technical expertise/assistance
- hazards and control measures associated with workplace activities.

## Assessment Conditions

- Assessors must:
  - have vocational competency in working safely and effectively in manufacturing and engineering at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills

- 
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
  - Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=b7050d37-5fd0-4740-8f7d-3b7a49c10bb2>

# MEM16006 Organise and communicate information

## Modification History

Release 1. Supersedes and is equivalent to MEM16006A Organise and communicate information

## Application

This unit of competency covers the skills and knowledge required to access, organise and communicate information related to production, maintenance or associated processes or tasks that apply in manufacturing, engineering or related environments.

For accessing and recording of data requiring system knowledge and judgement, Unit MEM16008 Interact with computing technology should be selected.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

**Band:** A

**Unit Weight:** 2

## Pre-requisite Unit

MEM13015 Work safely and effectively in manufacturing and engineering

## Competency Field

Communication

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |                           |     |   |
|---|---------------------------|-----|---|
| 1 | <b>Access information</b> | 1.1 | Determine information requirements of tasks and access relevant information from a range of sources |
|   |                           | 1.2 | Recognise and use workplace terminology correctly   |

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2 <b>Organise and analyse information</b>	2.1    Interpret information and organise in accordance with work requirements
	2.2    Determine relevance and implications for immediate work requirements
3 <b>Communicate organised information using established workplace methods</b>	3.1    Identify purpose of communication and appropriate communication method
	3.2    Communicate information using established workplace methods

## Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

<b>Range of sources include using one (1) or more of the following:</b>	• job instructions
	• specifications
	• standard operating procedures (SOPs)
	• charts
	• lists
	• documents
	• computer data
	• drawings
	• sketches
	• tables

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- technical manuals and/or charts
- other applicable reference material

**Determining relevance of information includes one (1) or more of the following:**

- checking relevance of information to own work
- selecting task relevant information from a larger document or from a diagram
- preparing an opinion based on analysis of simple facts
- expressing an opinion on the cause of faults

**Workplace terminology refers to one (1) or more of the following:**

- equipment
- processes
- workplace areas
- staff
- procedures

**Established workplace methods include using one (1) or more of the following:**

- proforma reports
- data entry
- verbal
- drawings

**Purpose of communication includes one (1) or more of the following:**

- simple incident/non-conformance report
- maintenance request
- production records
- material usage records
- work records
- other standard workplace records

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MEM16006A Organise and communicate information

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MEM16006 Organise and communicate information

## Modification History

Release 1. Supersedes and is equivalent to MEM16006A Organise and communicate information

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- accessing and recording relevant information from a range of sources
- recognising and using workplace appropriate terminology
- reading, interpreting and following information in workplace documentation
- checking and clarifying information
- organising, categorising and sequencing information
- communicating using appropriate methods and procedures for a variety of situations.

## Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures
- types of information relevant to the workplace and required tasks
- terminology used in the workplace relevant to own work
- available sources of information
- information analysis techniques appropriate to tasks and position
- methods of categorising and organising information including correct sequencing of information
- methods of recording and communicating information.

## Assessment Conditions

- Assessors must:
  - have vocational competency in organising and communicating information at least to the level being assessed with relevant industry knowledge and experience

- satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

# MEM16008 Interact with computing technology

## Modification History

Release 1. Supersedes and is equivalent to MEM16008A Interact with computing technology

## Application

This unit of competency defines the skills and knowledge required to use a range of computing technology typically used in manufacturing, engineering or related environments to access, input and store information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

**Band: A**

**Unit Weight: 2**

## Pre-requisite Unit

MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information

## Competency Field

Communication

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	<b>Determine job requirements</b>	1.1	Follow standard operating procedures and comply with work health and safety (WHS) requirements at all times
		1.2	Identify job requirements from specifications, job sheets or work instructions
		1.3	Identify information/data required to be accessed, input

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.  
or stored and its source

- |   |                                      |   |
|---|--------------------------------------|---|
| 2 | <b>Access information/data</b>       | <p>2.1 Follow access procedures and navigate technology to find the required information/data</p> <p>2.2 Use relevant software application menus, functions and commands to locate required information/data</p> <p>2.3 Retrieve information/data using organisational procedures</p> <p>2.4 Check information/data for relevance to job requirements</p> |
| 3 | <b>Input information/data</b>        | <p>3.1 Use relevant software menus, functions and commands to manipulate information/data</p> <p>3.2 Enter, change or remove information/data, as required</p>  |
| 4 | <b>Store information/data</b>        | <p>4.1 Save data/files following standard procedures prior to exiting the application</p> <p>4.2 Produce data output, as required</p> <p>4.3 Follow procedures for shutting down/logging off/exiting computing technology</p>   |
| 5 | <b>Access assistance as required</b> | <p>5.1 Identify appropriate personnel and consult, as required</p> <p>5.2 Identify manuals, online help and other reference materials and use, as required</p>  |

## Foundation Skills

This section describes those required skills (reading, writing, oral communication and numeracy) that are essential to workplace performance in this unit of competency.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Access procedures include one (1) or more of the following:**
- logging on
  - security procedures
  - virus checks
  - start-up routines
  - application start-up

- Technology includes one (1) or more of the following:**
- hand held data recording devices
  - screen based equipment
  - personal computers
  - bar coders
  - tablets

- Applications include one (1) or more of the following:**
- word processing
  - spreadsheets
  - databases
  - customised engineering and manufacturing applications
  - material resource planning (MRP)
  - warehousing inventory applications
  - predictive reliability and maintenance applications
  - production data management applications

- Data output includes one (1) or more of the following:**
- report
  - email
  - chart
  - graph
  - printout
  - data transfer
  - labels

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MEM16008A Interact with computing technology

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MEM16008 Interact with computing technology

## Modification History

Release 1. Supersedes and is equivalent to MEM16008A Interact with computing technology

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least two (2) occasions and include:

- following work instructions, standard operating procedures (SOPs) and safe work practices
- accessing, inputting, manipulating and storing information using workplace computing technology whilst following standard procedures
- accessing assistance, where required.

## Knowledge Evidence

Evidence required to demonstrate the required knowledge for this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include knowledge of:

- safe work practices and procedures
- functions and capabilities of computing technology used in the workplace
- functions of software applications
- use and features of data outputs.

## Assessment Conditions

- Assessors must:
  - have vocational competency in interacting with computing technology at least to the level being assessed with relevant industry knowledge and experience
  - satisfy the assessor requirements in the *Standards for Registered Training Organisations 2015* or its replacement and comply with the *National Vocational Education and Training Regulator Act 2011*, its replacement or equivalent legislation covering VET regulation in a non-referring state/territory as the case requires
- Where possible assessment must occur in operational workplace situations. Where this is not possible or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment that reflects realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills

- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

## MEM18001C Use hand tools

### Modification History

Not Applicable

### Unit Descriptor

<b>Unit descriptor</b>	This unit covers using a range of hand tools for a variety of general engineering applications.
------------------------	---

### Application of the Unit

<b>Application of the unit</b>	<p>Applications may include hand tools used for adjusting, dismantling, assembling and finishing of items or components, and the finishing, cutting, scraping of metallic and non-metallic material to size and shape. This includes simple tapping and threading and routine maintenance of hand tools.</p> <p>This unit should not be selected if the hand tool is dedicated to a single operation or machine and if only a machine specific/customised tool is used.</p> <p>When using hand held power tools or power tools used for hand held operations, refer to Unit MEM18002B (Use power tools/hand held operations).</p> <p><b>Band: A</b></p> <p><b>Unit Weight: 2</b></p>
--------------------------------	--

### Licensing/Regulatory Information

Not Applicable

## Pre-Requisites

<b>Prerequisite units</b>	

## Employability Skills Information

<b>Employability skills</b>	This unit contains employability skills.
-----------------------------	--

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Use hand tools	<p>1.1. Hand tools are selected appropriate to the task requirements.</p> <p>1.2. Hand tools are used to produce desired outcomes to job specifications which may include finish, tension, size or shape.</p> <p>1.3. All safety requirements are adhered to before, during and after use.</p> <p>1.4. Unsafe or faulty tools are identified and marked for repair according to designated procedures before, during and after use.</p> <p>1.5. Routine maintenance of tools, including hand sharpening is undertaken according to standard</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>operational procedures, principles and techniques.</p> <p>1.6. Hand tools are stored safely in appropriate location according to standard operational procedures and manufacturers' recommendations.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- reading and following information on standard operating procedures
- following verbal instructions
- selecting hand tools appropriate to the task
- using hand tools safely
- identifying hand tool defects and marking for repair
- maintaining/sharpening hand tools using appropriate techniques
- storing hand tools in accordance with manufacturers'/standard operating procedures

#### Required knowledge

Look for evidence that confirms knowledge of:

- applications of different hand tools in a general engineering context
- common faults and/or defects in hand tools
- procedures for marking unsafe or faulty tools for repair
- routine maintenance requirements for a range of hand tools
- storage location and procedures for a range of hand tools
- hazards and control measures associated with using hand tools
- use and application of personal protective equipment
- safe work practices and procedures

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	<p>A person who demonstrates competency in this unit must be able to use hand tools for a range of general engineering applications.</p>
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.</p>
<b>Context of and specific resources for assessment</b>	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with using hand tools or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
<b>Method of assessment</b>	<p>Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.</p>
<b>Guidance information for assessment</b>	

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Hand tools</b>	Hacksaws, hammers, punches, screwdrivers, sockets, wrenches, scrapers, chisels, gouges, wood planes and files of all cross-sectional shapes and types
<b>Job specifications</b>	Finish, tension, size or shape etc.
<b>Routine maintenance</b>	Cleaning, lubricating, tightening, simple tool repairs, hand sharpening and adjustments using engineering principles, tools, equipment and procedures

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Use power tools	<p>1.1. Power tools are selected appropriate to the task requirements.</p> <p>1.2. Power tools are used for a determined sequence of operations - which may include clamping, alignment and adjustment to produce desired outcomes - to job specifications which may include finish, size or shape.</p> <p>1.3. All safety requirements are adhered to before, during and after use.</p> <p>1.4. Unsafe or faulty tools are identified and marked for repair before, during and after use according to designated procedures.</p> <p>1.5. Operational maintenance of tools, including hand sharpening, is undertaken according to standard</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>workplace procedures, principles and techniques.</p> <p>1.6. Power tools are stored safely in appropriate location according to standard workshop procedures and manufacturers' recommendations.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- reading and following information on standard operating procedures
- following verbal instructions
- selecting power tools appropriate to the task
- using power tools safely
- using clamping/securing devices
- identifying power tool defects
- maintaining power tools using appropriate techniques
- sharpening tools/tool bits within the scope of this unit
- storing power tools according to manufacturers'/ standard operating procedures.

#### Required knowledge

Look for evidence that confirms knowledge of:

- application of different power tools
- clamping/securing methods
- adjustments/alignments to a range of power tools
- common faults and/or defects in power tools
- procedures for marking unsafe or faulty power tools for repair
- routine maintenance requirements of a range of power tools
- tool sharpening techniques for a range of power tools
- storage location and procedures of a range of power tools
- hazards/control measures associated with power tools
- use and application of personal protective equipment
- safe work practices and procedures

## Evidence Guide

<b>EVIDENCE GUIDE</b>	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<b>Overview of assessment</b>	<p>A person who demonstrates competency in this unit must be able to use power tools/hand held operations.</p>
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	<p>Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.</p>
<b>Context of and specific resources for assessment</b>	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with using power tools/hand held operations or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
<b>Method of assessment</b>	<p>Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.</p>

**EVIDENCE GUIDE**

<b>Guidance information for assessment</b>	
--	--

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Power tools**

Electric or pneumatic/hydraulic drills, grinders, jigsaws, nibblers, cutting saws, sanders, planers, routers, pedestal drills and pedestal grinders

**Clamping**

Multigrips, vices, jigs and fixtures, clamps etc.

**Job specifications**

Finish, size or shape etc.

**Operational maintenance**

Hand sharpening, cleaning, lubricating, tightening  
Simple tool repairs and adjustments using engineering principles, tools, equipment and procedures to statutory and regulatory requirements

## Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

## Elements and Performance Criteria

<b>ELEMENT</b>	<b>PERFORMANCE CRITERIA</b>
1. Establish installation and upgrade requirements	<p>1.1. Customer requirements and work order/instructions are identified and clarified with appropriate person/s as required in accordance with organisational requirements.</p> <p>1.2. Customer is advised of products, product options and possible upgrade options in accordance with organisational and customer requirements.</p> <p>1.3. Installation procedure is established in accordance with work order and with minimal disruption to customer, services or normal work routines.</p>
2. Organise and prepare installation	2.1. Appropriate and serviceable tools, equipment, and materials are selected and obtained in accordance with organisational requirements, procedures and

ELEMENT	PERFORMANCE CRITERIA
	<p>fitting instructions.</p> <p>2.2. A safe work site is established and maintained in accordance with OHS, legislative and organisational requirements.</p> <p>2.3. Suitable safety and personal protective equipment is selected and used in accordance with OHS, legislative and organisational requirements.</p> <p>2.4. Access to site and specific site requirements are established, and appropriate arrangements made in accordance with client and organisational requirements.</p>
3. Install and upgrade locks and hardware	<p>3.1. Installation location is prepared, measured and marked out as appropriate.</p> <p>3.2. Locks and hardware are fitted in accordance with manufacturer specifications and organisational requirements.</p> <p>3.3. Lock and hardware function is checked for correct functioning and operational problems are rectified.</p> <p>3.4. Work is carried out using safe work procedures and practices and in accordance with applicable legislation, codes, regulations and standards.</p> <p>3.5. Problems affecting the installation are identified and variations to installation are discussed and resolved with appropriate persons.</p>
4. Complete the installation	<p>4.1. Work site is cleaned and left in presentable condition in accordance with original presentation, client requirements, industry standards and organisational requirements.</p> <p>4.2. Final inspections are undertaken to ensure installation conforms with industry, legislative and order requirements.</p> <p>4.3. Client is notified of job completion and client acceptance is obtained in accordance with organisational procedures.</p> <p>4.4. Client is instructed on use of product in accordance with organisational requirements and manufacturer specifications.</p> <p>4.5. Relevant documentation is accurately completed and processed in accordance with industry, legislative and organisational requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- measuring and marking out with tape measures, rules, squares and templates
- identify existing fixtures and fittings (if any) including type and quality of construction
- establishing customer requirements such as location, product type/colour/function, compatibility with existing hardware
- communicating product information
- interpreting fitting instructions/templates/terminology
- planning stages/steps for installation or upgrade and suitable timeframe for installation
- checking tools for serviceability
- selecting appropriate tools for the type of products, materials and conditions
- identifying and assessing hazards
- using safety and personal protective equipment
- safely using tools and equipment
- drilling, filing, fixing
- applying safe work practices
- assessing the potential for unforeseen problems and incidents to affect the installation
- testing and confirming function of locks and hardware
- completing and processing documentation

#### Required knowledge

Look for evidence that confirms knowledge of:

- utility and application of locks/hardware/accessories
- fixtures (doors, frames, windows etc.) and their type of construction, such as foam fill, hollow, clad, steel, aluminium and other materials
- types and functions of locks, hardware and accessories to suit different fixtures and materials
- factors for determining customer requirements
- factors affecting suitable options including intended use, cost, compatibility with existing hardware
- installation procedures for locks/hardware/accessories
- terminology relating to lock products and installation
- tools and equipment for installing locks, hardware and lock furniture

## REQUIRED SKILLS AND KNOWLEDGE

- use of specialised tools, such as morticers, routers, jigs, cherry centre
- materials, parts and components for installation of locks and lock furniture
- hazards and risks to installer, client and public
- applicable legislation, local regulations
- safety and emergency measures and safe work practices to avoid or minimise potential and actual hazards
- individual responsibilities and duty of care
- types and uses of personal protective equipment
- access and installation factors, such as site safety issues, night access, disruption to client work routines, installation environment, building codes
- procedures for measuring and marking lock and lock furniture positions
- installation procedures for locks and lock furniture
- effects of incorrect installation
- common installation problems
- troubleshooting and lock testing methods
- potential installation problems and incidents, including breakdowns, environmental, physical, time and cost restrictions, product supply problems
- strategies for resolving problems and incidents
- procedures and industry standards for site clean-up
- organisational requirements for final inspection
- organisational requirements for client acceptance
- manufacturer specifications, uses, limitations and warranties for relevant product/s
- procedures to complete and process relevant documentation, including installation details, costings, materials used, records of faults and damage, installation problems and factors, testing and inspection results
- environmentally safe disposal procedures for packaging and other waste
- procedures for client notification and acceptance of job completion

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must be able to install and upgrade locks and hardware. Competency in this unit cannot be claimed until all

<b>EVIDENCE GUIDE</b>	
	prerequisites have been satisfied.
<b>Critical aspects for assessment and evidence required to demonstrate competency in this unit</b>	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
<b>Context of and specific resources for assessment</b>	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with installing and upgrading locks and hardware, or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
<b>Method of assessment</b>	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
<b>Guidance information for assessment</b>	

## Range Statement

<b>RANGE STATEMENT</b>	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<b>Customer requirements</b>	May relate to product type, function and capabilities, access issues, installation locations and positions, upgrade information, service and maintenance requirements, product operation and warranty information, costings
<b>Work order/instructions</b>	Schedules, timeframes, access and site information, products, installation and upgrade requirements, specific client requests, materials, costings, warranties and service information, legislation, codes and regulatory requirements, OHS factors and requirements
<b>Organisational requirements</b>	Quality assurance standards and procedures, service standards, safety and OHS practices and obligations, resource storage and use, organisational processes and procedures, documentation processes, product and process training
<b>Tools, equipment and other materials</b>	Hand tools, power tools and accessories, fixing tools, special-purpose equipment, lubricants, adhesives and sealants, cleaning materials, wire and cable, vacuum, door&window and frame materials e.g. aluminium, timber, MDF
<b>Safety and personal protective equipment</b>	Night hats, signs, barriers, masks/goggles/safety glasses, earmuffs/plugs, vests, hard hats, gloves, knee pads, safety boots, warning signs and tapes, fire extinguisher, first aid kit
<b>Locks and hardware</b>	Cylinder nightlatches and deadlocks, lever and cylinder mortice locks, tubular deadbolts, key in knob, key in lever, tie bolts, door control devices, exit devices, lockable bolts, peep holes, window locks
<b>Safe work procedures and</b>	Risk identification and assessment, non

<b>RANGE STATEMENT</b>	
<b>practices</b>	compliance with building codes and regulations, safety practices and regulations, safe use of tools and equipment, individual responsibilities and obligations, safety training and procedures, emergency and first aid procedures, working in confined spaces, use of personal protective equipment, industry standards and codes of practice, dust and fibres in relation to MDF and possible asbestos
<b>Legislation, codes, regulations and standards</b>	Industry licensing, industry codes of practice, privacy laws, Australian standards, building codes and those of other regulatory bodies, quality assurance, organisational standards and practices, awards and enterprise agreements, competition, trade and consumer protection laws

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for installation and service	<p>1.1. Work order is reviewed and clarified with appropriate person(s) as required in accordance with organisational requirements.</p> <p>1.2. Tools, equipment and materials are selected appropriate to job requirements and checked for operational effectiveness in accordance with manufacturers' specifications.</p> <p>1.3. Faulty or unsafe tools are identified and segregated for repair or replacement in accordance with organisational procedures.</p> <p>1.4. Potential and existing risks and hazards associated with maintenance activities are identified and controlled in accordance with OHS policies and procedures and organisational requirements.</p> <p>1.5. Suitable personal protective equipment is selected</p>

ELEMENT	PERFORMANCE CRITERIA
	and maintained in accordance with OHS and organisational requirements.
2. Install door control devices/systems	<p>2.1.All work is conducted using safe operating practices in accordance with OHS and organisational requirements.</p> <p>2.2.The appropriate door control device/systems are selected for the given door type and specifications.</p> <p>2.3.Door control devices/systems are installed in accordance with manufacturers' specifications, work order and OHS requirements legislative and organisational requirements.</p> <p>2.4.Door control devices/systems are checked for correct operation and adjusted as necessary.</p>
3. Service door control device	<p>3.1.Checks are conducted on door control devices/systems and/or components to identify any damage, friction or sticking in accordance with manufacturers' specifications.</p> <p>3.2.Assessment of viability for continued operation or replacement of door control device.</p> <p>3.3.Door control devices/systems and/or components are adjusted in accordance with manufacturers' specifications, work order and OHS requirements legislative and organisational requirements.</p>
4. Complete installation or service	<p>4.1.Notification of work completion is made to appropriate person(s) in accordance with organisational procedures.</p> <p>4.2.Documentation is promptly and accurately completed and processed in accordance with industry, legislative and organisational requirements.</p> <p>4.3.Work area, tools and equipment are cleaned and stored in accordance with OHS and organisational requirements.</p> <p>4.4.Malfunctions, faults, wear or damage to tools is reported for repair or replacement in accordance with organisational policy and procedures.</p> <p>4.5.Waste from service and repair activities is collected, treated and disposed or recycled in accordance with organisational and environmental requirements.</p>

## Required Skills and Knowledge

### REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

#### Required skills

Look for evidence that confirms skills in:

- communicating in a clear and concise manner
- using appropriate tools and equipment
- lubricating mechanical locks and locking systems
- demonstrating basic logic and lateral thinking processes
- disassembling/reassembling mechanical locks/locking systems
- identifying faults
- reading and interpreting specifications, charts and diagrams
- methodically organising and prioritising work tasks
- solving routine problems
- working in confined spaces
- accurately estimating materials, tools and equipment requirements
- applying safe and environmentally aware workplace practices

#### Required knowledge

Look for evidence that confirms knowledge of:

- types, functions and specifications of door control devices/systems
- correct selection of door control devices
- operational principles of door control devices/systems
- common door control devices/systems faults
- maintenance requirements of door control devices/systems
- tests to confirm door control devices/systems operation
- procedures to disassemble/reassemble
- technical terminology
- types of doors and windows and mechanical system applications
- maintenance risks and hazards
- working in confined space procedures
- duty of care

## Evidence Guide

### EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

#### Overview of assessment

A person who demonstrates competency in this unit must be able to install and maintain door control devices/systems across a range of areas. Competency in this unit cannot be claimed until all prerequisites have been satisfied.

#### Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

#### Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with installing and maintaining door control systems/devices, or other units requiring the exercise of the skills and knowledge covered by this unit.

#### Method of assessment

Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

**EVIDENCE GUIDE**

<b>Guidance information for assessment</b>	
--	--

**Range Statement****RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

**Work order**

Work schedules, completion dates, job requirements and tasks, specific client requirements, access to site and specific site requirements, resource requirements, OHS requirements, compliance with relevant legislation, budget allocations, warranties and service information

**Appropriate person(s)**

Installer, sub contractor, technician, supervisor, manager, director, client

**Organisational requirements**

Legal and organisational operational policies and procedures, operations manuals, induction and training materials, insurance policy agreements, client and organisational confidentiality requirements, organisational goals/objectives/plans/systems/ processes, employer and employee rights and responsibilities, own role, responsibility and delegation, quality and continuous improvement processes and standards, client service standards, defined resource parameters, OHS policies/procedures/programs, emergency and evacuation procedures, duty of care, code of conduct, code of ethics, access and equity policy, principles and practice, records and information systems and processes, communication channels and reporting procedures

<b>RANGE STATEMENT</b>	
<b>Tools and equipment</b>	Hand tools, fixing tools, strippers, router, file, drill, power saw, spirit level, soldering iron, welder, ladder, hoist, drop sheet, batteries, master key plans, personal protective equipment, communications equipment
<b>Materials</b>	Solder, insulation tape, springs, pins, graphite powder, oil, silicon, dry lube, grease, lockease, glue, paint, patch materials, electronic components, cleaning compounds, key blanks
<b>Risks and hazards</b>	Non-compliance with building codes and regulations, exposed electrical wiring, manual handling, exposure to asbestos, dust, noise, live power, vermin, water, glass fibre, building debris, natural and other gas build-up
<b>Maintenance</b>	Cleaning, inspection, lubrication, routine repairs, identification of worn parts, confirming operation, adjustments, key cutting, replacement of worn parts
<b>OHS policies and procedures</b>	Hazardous and risk assessment mechanisms, implementation of safety regulations, safety training, safety systems incorporating - work clearance procedures, isolation procedures, gas and vapour, monitoring/testing procedures, use of protective equipment and clothing, use of codes of practice
<b>Personal protective clothing and equipment</b>	Masks, safety glasses, head protection, ear muffs, safety boots, knee pads, gloves, warning signs and tapes, first aid kit
<b>Door control devices/systems</b>	Surface mounted door closers, semi concealed door closers, concealed closers, semi automatic/automatic door control devices, exit devices
<b>Safe operating practices</b>	Working safely around electrical wiring, cables and overhead power lines, working safely around tools and equipment, hazard recognition, emergency procedures, awareness of electrical hazards, following confined spaces procedures, administering first aid

**RANGE STATEMENT**

<b>Applicable legislation, codes and national standards</b>	Compliance with Australian building codes and regulations, compliance with Australian Communications Authority (ACA) cabling standards, EPA noise control regulations, relevant Commonwealth/State/Territory legislation which affect organisational operation - OHS and safe work practices, environmental issues, equal employment opportunity, industrial relations, anti-discrimination and diversity, licensing arrangements, Australian standards, quality assurance and certification requirements, relevant industry codes of practice, trade practices, award and enterprise agreements, privacy requirements and privacy related legislation
<b>Documentation</b>	Completion of work log, mechanical lock/locking system problems/faults, warranty conditions and allowances, recommendation for repairs, operational checks and maintenance conducted, testing and commissioning results, parts and components replaced, materials used, recommendations for future operation and maintenance, costings

## Competency field

Competency field	Locksmithing
------------------	--------------

# **MEM30031A Operate computer-aided design (CAD) system to produce basic drawing elements**

## **Modification History**

Release 1 - New unit of competency

## **Unit Descriptor**

This unit of competency covers the skills and knowledge required to apply functions of computer-aided design (CAD) software programs that are typically used in the production of detail drawings.

## **Application of the Unit**

This unit is suitable for those working within a CAD or drafting work environment and may be applied across engineering and manufacturing environments. It covers competent use of a CAD program to perform basic drawing tasks used in the development of detail drawings. Drawings may include plans, diagrams, charts, circuits, systems or schematics.

This unit includes using computer equipment and selecting software functions in order to generate basic drawing elements.

Work is conducted under supervision.

## **Licensing/Regulatory Information**

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

## **Pre-Requisites**

Not applicable.

## **Employability Skills Information**

This unit contains employability skills.

## **Elements and Performance Criteria Pre-Content**

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

performance is to be consistent with the evidence guide.

## Elements and Performance Criteria

- |   |                                       |     |   |
|---|---------------------------------------|-----|---|
| 1 | Confirm drawing requirements          | 1.1 | Confirm purpose, scope, and information and presentation requirements for drawing   |
|   |                                       | 1.2 | Review available information relevant to project and work requirements, and identify and address further information needs          |
|   |                                       | 1.3 | Identify computing equipment and software used in the organisation  |
|   |                                       | 1.4 | Identify work flow and procedures for work supervision  |
|   |                                       | 1.5 | Examine requirements for presentation of drawings   |
| 2 | Identify key features of CAD software | 2.1 | Describe types of CAD software used for detail drafting, their key features and suitability for producing specific drawing outcomes |
|   |                                       | 2.2 | Describe types of CAD software used for design drafting, their key features and suitability for producing specific drawing outcomes |
|   |                                       | 2.3 | Identify differences in CAD process to generate 2-D drawings and 3-D models, and reasons for each presentation                      |
|   |                                       | 2.4 | Identify differences in CAD process to generate single and multiple view drawings, and reasons for each presentation                |
|   |                                       | 2.5 | Identify CAD software used in the organisation and confirm compatibility with other software programs and peripheral equipment      |
|   |                                       | 2.6 | Identify software features for linked specifications, catalogues or materials ordering  |
| 3 | Access software and set up for        | 3.1 | Open software and navigate organisational filing and library system   |

---

drawing work	3.2	Identify organisational and software templates and determine uses
	3.3	Identify organisational symbols, codes and standards to be applied in drafting work and how these are accessed and applied
	3.4	Apply workplace procedures to retrieve and manipulate required information and navigate computing technology
	3.5	Set up working environment
4	Produce basic drawing elements	4.1 Use CAD functions to produce basic drawing elements
		4.2 Use editing and transfer tools and methods to modify drawing elements
		4.3 Apply dimensions, text and symbols to drawing elements
		4.4 Import and export files into/out of working space
		4.5 Generate different views and perspectives
		4.6 Organise presentation of work
5	Complete CAD operations	5.1 Save and file drawing elements according to organisational procedures
		5.2 Print drawing elements and evaluate presentation
		5.3 Evaluate work and identify areas for improvement
		5.4 Close applications, perform CAD housekeeping and maintain organisational filing system

## Required Skills and Knowledge

### Required skills

Required skills include:

- literacy skills sufficient to read instructions for drawings work

- using computer technologies and navigating software
- numeracy skills sufficient to interpret technical information and determine scaling and layout issues
- navigating software to:
  - manipulate drawing entities
  - modify dimension styles
  - create and use layers
  - manipulate the drawing origin
  - define and utilise symbol libraries
  - utilise grids/grid snaps and object snaps
  - display views at multiple scales
  - add title blocks/frame to layout a drawing for printing
  - prepare advanced drawings in plane orthogonal or equivalent
  - set up prototype drawings
  - define and extract attribute data
  - create bills of materials (BOM) utilising attribute data and third-party application software

### Required knowledge

Required knowledge includes:

- general knowledge of different approaches to drawing
- awareness of copyright and intellectual property issues and legislation in relation to drawing
- environmental and occupational health and safety (OHS) issues associated with the tools and materials used for drawing
- quality assurance procedures
- CAD program capabilities and processes

### Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria required skills and knowledge range statement and the Assessment Guidelines for the Training Package.

<b>Overview of assessment</b>	A person who demonstrates competency in this unit must be able to use CAD software to produce graphics commonly used in drafting work.
<b>Critical aspects for assessment and evidence required to demonstrate competency in this</b>	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required

<p><b>unit</b></p>	<p>knowledge, and be capable of applying the competency in new and different situations and contexts.</p> <p>Specifically the candidate must be able to:</p> <ul style="list-style-type: none"> <li>• work within typical site/teamwork structures and methods</li> <li>• apply worksite communication procedures</li> <li>• comply with organisational policies and procedures, including quality requirements</li> <li>• participate in work meetings</li> <li>• comply with quality requirements</li> <li>• use industry terminology</li> <li>• apply appropriate safety procedures</li> <li>• identify drawing work requirements and determine appropriate software functions and features</li> <li>• identify features and uses of CAD software used in detail and design drafting</li> <li>• access and use computing equipment and CAD software functions to produce drawing elements.</li> </ul>
<p><b>Context of and specific resources for assessment</b></p>	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team.</p> <p>Where applicable, reasonable adjustment must be made to work environments and training situations to accommodate ethnicity, age, gender, demographics and disability.</p> <p>Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with drafting or other units requiring the exercise of the skills and knowledge covered by this unit.</p>

<b>Method of assessment</b>	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways, including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
-----------------------------	---

## Range Statement

<b>CAD software</b>	CAD software may include: <ul style="list-style-type: none"> <li>• AutoCAD</li> <li>• Inventor</li> <li>• Revit</li> <li>• Solidworks</li> <li>• ProSteel</li> <li>• XSteel</li> <li>• other programs</li> </ul>
<b>Key features</b>	Key features may include: <ul style="list-style-type: none"> <li>• 2-D</li> <li>• 3-D modelling</li> <li>• built-in specifications</li> <li>• file import/export</li> <li>• save</li> <li>• undo</li> <li>• scale</li> </ul>
<b>Specific drawing outcomes</b>	Specific drawing outcomes may include <ul style="list-style-type: none"> <li>• 2-D</li> <li>• 3-D modelling</li> <li>• drawings for specific engineering applications</li> <li>• orthographic/isometric/perspectives/schematics</li> </ul>
<b>Basic drawing elements</b>	Basic drawing elements may include: <ul style="list-style-type: none"> <li>• points, line angles, circles, arcs, planes, figures</li> </ul>

	<p>and solids</p> <ul style="list-style-type: none"><li>• squares, rectangles and triangles</li><li>• bisected lines and dividing lines</li><li>• polygon, ellipse, spline, dimension and hatch</li></ul>
<b>Editing and transfer tools and methods</b>	<p>Editing and transfer tools and methods may include:</p> <ul style="list-style-type: none"><li>• delete, fillet, chamfer, erase, trim/extend, break, undo and redo commands</li><li>• zooming and panning</li><li>• moving, copying, rotating and mirroring</li><li>• polar and rectangular duplication</li><li>• object snaps</li><li>• dimensions</li><li>• selecting entities</li><li>• dividing</li><li>• scaling</li><li>• measuring</li><li>• grouping</li></ul>

## Unit Sector(s)

Drawing, drafting and design

## Custom Content Section

Not applicable.

# MSAPMSUP201A Receive or despatch goods

## Modification History

Not applicable.

## Unit Descriptor

### Unit descriptor

This competency covers the handling of materials by an operator as an adjunct to the job of making product. It applies to a limited range of materials. It is NOT intended to be an alternative warehousing competency.

This competency is typically performed by operators working either independently or as part of a work team.

## Application of the Unit

### Application of this unit

This competency applies to operators who receive, process despatch orders, despatch products/materials and maintain records. The key factors are correctly identifying and selecting the goods to be despatched and ensuring they are despatched to the correct location.

It includes:

- checking order requests/consignment note documentation for products/materials to be despatched
- identifying and selecting the correct products/materials
- organising products/materials to be moved into the right place by the right time, using the appropriate handling equipment
- preparing products/materials for despatch
- completing and checking all documentation
- updating records.
- 

## Licensing/Regulatory Information

Not applicable.

## Pre-Requisites

### Prerequisites

This unit has **no** prerequisites.

## Employability Skills Information

### Employability Skills

This unit contains employability skills.

## Elements and Performance Criteria Pre-Content

ELEMENT	PERFORMANCE CRITERIA
Elements describe the essential outcomes of a unit of competency	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
ELEMENT	Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
1. Identify work requirements.	1.1 Read and interpret documentation. 1.2 Identify required schedules for receipt or despatch. 1.3 Identify correct product/material. 1.4 Plan work sequence using workplace and product knowledge. 1.5 Select appropriate materials handling equipment as required. 1.6 Identify OH&S requirements.
2. Move materials into/out of storage or from production.	2.1 Check paperwork and identity of materials. 2.2 Check for completeness and/or damage. 2.3 Take action on non-conforming products/materials. 2.4 Handle and move products/materials into/out of storage safely. 2.5 Store materials safely as necessary.
3. Prepare goods for	3.1 Identify and read workplace procedures for

<b>ELEMENT</b> ELEMENT	<b>PERFORMANCE CRITERIA</b> Performance Criteria describe the required performance needed to demonstrate achievement of the Element. Assessment of performance is to be consistent with the Evidence Guide.
despatch.	assembling and completing orders. 3.2 Select and check goods for despatch. against product/material knowledge, labels and other identification systems. 3.3 Sort, assemble and consolidate products as necessary. 3.4 Secure order and place in storage areas, in accordance with schedule. 3.5 Check order against despatch schedule and order form.
4. Complete materials movement records.	4.1 Complete materials movement records (in or out). 4.2 Update records as required. 4.3 Complete other paperwork and records as required.

## Required Skills and Knowledge

This describes the essential skills and knowledge and their level required for this unit.

Knowledge and understanding of the materials handling processes and requirements sufficient to recognise non-standard situations and then determine appropriate action which is consistent with operating guidelines is required.

Knowledge is required of the product/material, its properties and uses sufficient for correct receipt, storage and despatching. Knowledge of the relevant OHS and environmental requirements is required along with an ability to implement them in a manner which is relevant to the materials handled.

Competence includes the ability to apply and/or describe:

- product/material knowledge
- inventory and ordering systems
- transport requirements and restrictions for products/materials
- correct OHS procedures
- storage/handling principles and procedures
- material hazard properties and their implications for safe handling and storage
- significance of material to customers; transport requirements and restrictions for materials
- plan own work, including predicting consequences and identifying improvements

- identify and describe own role and role of others involved directly in the processing of orders and despatching of products
- use PPE, safely handle products and materials, read relevant safety information and apply safety precautions appropriate to the task
- distinguish between causes of problems such as product requirements and job priority as relevant to the practical completion of the job.

### **Language, literacy and numeracy requirements**

This unit requires the ability to read and interpret typical product specifications, job sheets, procedures, material labels and safety information as provided to operators.

Writing is required to the level of completing workplace forms.

Basic numeracy is required, e.g. to determine that two 25 kg bags are needed to make up a requirement for 50 kg.

## **Evidence Guide**

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, required skills and knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

### **Overview of assessment**

A holistic approach should be taken to the assessment.

Assessors must be satisfied that the person can consistently perform the unit as a whole, as defined by the Elements, Performance Criteria and skills and knowledge.

### **Critical aspects for assessment and evidence required to demonstrate competency in this unit**

It is essential that competence is demonstrated in the ability to recognise and analyse potential situations requiring action and then in implementing appropriate corrective action.

Consistent performance should be demonstrated. For example, look to see that:

- packaging standards are met consistently
- procedures and work instructions are read and interpreted correctly
- potential problems are recognised and action is taken (ie, the problem is fixed or reported)
- action is taken to ensure problems are dealt with in a timely manner
- problems caused by product/material issues are recognised and an appropriate contribution made to a solution
- items initiated are followed through until final resolution has occurred.
- effective communication between team members, supervisors and other staff is maintained.

Competence must be demonstrated in the operation of all ancillary equipment to the level required for this competency unit.

## **Assessment method and context**

Assessment will occur using industrial equipment and will be undertaken in a work-like environment.

Competence in this unit may be assessed:

- by observation over time on a processing plant
- by using a suitable simulation and/or a range of case studies/scenarios
- through a combination of these techniques.

In all cases it is expected that practical assessment will be combined with targeted questioning to assess the underpinning knowledge and theoretical assessment will be combined with appropriate practical/simulation or similar assessment. Assessors need to be aware of any cultural issues that may affect responses to questions.

Assessment processes and techniques must be culturally appropriate and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed.

## **Specific resources for assessment**

This section should be read in conjunction with the Range Statement for this unit of competency. Resources required include suitable access to an operating plant or equipment that allows for appropriate and realistic simulation. A bank of case studies/scenarios and questions will also be required to the extent that they form part of the assessment method. Questioning may take place either in the workplace, or in an adjacent, quiet facility such as an office or lunchroom. No other special resources are required.

Access must be provided to appropriate learning and/or assessment support when required. Where applicable, physical resources should include equipment modified for people with disabilities.

## **Range Statement**

### **RANGE STATEMENT**

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Where reference is made to industry codes of practice, and/or Australian/international standards, the latest version must be used.

### **Context**

This competency covers the handling of a limited range of products/materials and their moving into and out of a plant/storage. It is NOT intended for people who, as a major function, operate a warehouse. The appropriate Transport and Distribution competencies should be used here.

This competency may require the operation of forklift trucks or other regulated load shifting devices which are NOT included in this competency, and so would be a co-requisite competency.

The terms order request, documentation, labels, transportation requirements 'paperwork' and 'records' mean any and all relevant information and data whether it is manual, paper based, electronic or verbal, either in person or by phone/radio.

This competency does not imply that moving materials into and from storage/plant are conducted equally, or even using similar techniques. Customers may be internal or external and the loading/unloading of products/materials may mean getting them onto/off a truck or simply from/to the next department.

### **Procedures**

All operations are performed in accordance with procedures.

Procedures include all relevant workplace procedures, work instructions, temporary instructions and relevant industry and government codes and standards.

### **Tools and equipment**

This competency includes use of equipment and tools such as:

- mobile plant/fork lifts
- manual handling equipment
- hand tools
- shrink wrappers
- tape machine labellers
- loose bulk packing equipment.
- computers, bar code readers
- bag filling equipment
- pallets
- wrapping machines
- personal protective equipment (PPE)
- distribution equipment, including A-frames, stillages, containers, elevated platforms and communication equipment.

### **Hazards**

Typical hazards include:

- inappropriate movements and postures
- physical and atmospheric hazards of materials
- height or depth of storage receptacles
- stationary and moving machinery, parts or components
- noise, light, energy sources
- humidity, air temperature, radiant heat
- manual handling hazards.

### **Problems**

'Respond to routine problems' means 'apply known solutions to a limited range of predictable problems'. Typical process and product problems may include:

- special storage requirements including moisture and contamination control
- handling of incomplete loads (either in or out)

- handling of materials which do not meet specifications
- conflicting priorities
- incomplete or incorrect paperwork.
- product requirements
- job priority
- product/material variations.

### **Variables**

Key variables to be monitored include:

- types of products or materials to be received/despached
- handling heights
- types of equipment
- types of workplace documentation
- atmospheric conditions.
- 

### **Unit Sector(s)**

Not applicable.

## MSFDG2001 Assemble leadlight and stained glass components

### Modification History

Release 1. Supersedes and is equivalent to MSFSL2001 Assemble leadlight and stained glass components.

### Application

This unit describes the skills and knowledge required to assemble leadlight and stained glass components using a range of fixing and joining components.

This unit applies to individuals working with designed glass.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Leadlight and Stained Glass

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare for work	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Identify and select tools and equipment based on job requirements and check for serviceability and safety prior to use 1.3 Identify, obtain and prepare materials appropriate to the work application and safely handle and locate ready for use 1.4 Identify workplace environment considerations and apply measures to reduce noise, dust and obstacles 1.5 Plan assembly sequence in a logical order

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Assemble components	<p>2.1 Lay out components and assemble using jigs and appropriate fastenings</p> <p>2.2 Use hand and/or power tools, and equipment correctly based on job needs</p> <p>2.3 Check assembled work for compliance with specifications</p> <p>2.4 Prepare, assemble and fit components in accordance with specifications</p> <p>2.5 Repair or tag work which does not meet quality specifications for further processing, recycling or disposal in accordance with workplace procedures</p> <p>2.6 Organise and store finished products in holding area suited to the product</p>
3. Clean work area and maintain equipment	<p>3.1 Tag and report faulty and/or defective equipment in accordance with workplace procedures</p> <p>3.2 Remove waste and scrap in accordance with workplace procedures</p> <p>3.3 Clean and inspect tools and equipment for serviceable condition and store appropriately in accordance with workplace procedures</p> <p>3.4 Maintain equipment and clean-up work area in accordance with workplace procedures</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFSL2001 Assemble leadlight and stained glass components.

# Assessment Requirements for MSFDG2001 Assemble leadlight and stained glass components

## Modification History

Release 1. Supersedes and is equivalent to MSFSL2001 Assemble leadlight and stained glass components.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- assembled leadlight and stained glass components, including at least 1 of each of the following:
  - panel
  - door insert
  - window insert.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- state or territory work health and safety legislation, regulations, standards and codes of practice relevant to the full range of processes for assembling leadlight and stained glass components
- organisational and site standards, requirements, policies and procedures for component assembly
- environmental protection requirements relating to the disposal of waste material
- problem identification and resolution in assembly
- types of tools and equipment and procedures for their safe use, operation and maintenance
- characteristics of leadlight and stained glass components and materials used in assembly
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

- materials for assembly
- tools and equipment to complete tasks in the Performance Evidence
- job requirements
- workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFDG3003 Paint and fire glass

### Modification History

Release 1. Supersedes and is equivalent to MSFSL3005 Paint and fire glass.

### Application

This unit describes the skills and knowledge required to apply patterns and/or designs to glass with vitreous paints to achieve specific outcomes through the firing of glass.

This unit applies to individuals working with designed glass.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Leadlight and Stained Glass

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify painting and firing requirements	1.1 Identify and follow work health and safety, legislative and workplace procedures 1.2 Identify types and quantities of patterns, designs and materials required from plans or work instructions 1.3 Identify the processes for painting patterns and designs onto glass and achieving specific outcomes through the firing of glass
2. Prepare to paint and fire glass	2.1 Determine painting sequence in a logical order to suit the job 2.2 Select and check tools, equipment and materials for suitability, serviceability and safety prior to use 2.3 Check patterns and design templates against specifications or job

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	order 2.4 Match paint colours against the plan or work order and prepare glass for painting
3. Apply vitreous paint	3.1 Apply paint to the glass surface in accordance with the pattern or design template 3.2 Identify and rectify any problems occurring during the painting operation
4. Conduct firing operations	4.1 Determine firing sequence in a logical order to suit the job 4.2 Check kiln prior to use to ensure it is appropriate for the firing, serviceable and in a safe condition 4.3 Identify and check kiln components and controls, including emergency stops and guards, for correct operation 4.4 Prepare glass for firing and operate, adjust and monitor kiln equipment to ensure correct product quality and output 4.5 Identify and rectify any problems occurring during the firing operation
5. Finalise the work	5.1 Inspect painted and fired glass for quality of work and repair or discard in accordance with workplace procedures 5.2 Clean and store tools, equipment and materials in accordance with workplace procedures 5.3 Clean work area is cleaned and leave in a safe condition and dispose of waste or recycle in accordance with workplace protocols 5.4 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFSL3005 Paint and fire glass.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFDG3003 Paint and fire glass

## Modification History

Release 1. Supersedes and is equivalent to MSFSL3005 Paint and fire glass.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- painted and fired glass using both of the following techniques:
  - freehand process
  - template process.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- state or territory work health and safety legislation, regulations, standards, codes of practice, relevant to the full range of processes for painting and firing glass
- organisational and site standards, requirements, policies and procedures for glass painting and firing
- glass painting and firing terminology and techniques
- types of glass suitable for painting and firing, their properties, uses and limitations
- types of vitreous paints, their characteristics, properties, uses and limitations
- techniques for application of different types of patterns and designs
- operation of glass firing kiln
- characteristics and properties of glass when heat is applied and the likely impact of various environmental effects on painted and fired glass
- environmental protection requirements relating to the disposal of waste material
- problem identification and resolution relating to painting and firing glass
- storage systems and labelling
- procedures for the recording, reporting and maintenance of workplace records and information
- mathematical procedures for estimation and measurement.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - glass for painting
  - kiln
  - tools and equipment to complete tasks in the Performance Evidence
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFF3001 Match and make up colours

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers matching and making up colours for surfaces which have previously been coated or polished, or for new work which must match existing work or a specified sample.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furniture finishing

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |                       |     |  |
|---|-----------------------|-----|--|
| 1 | Plan and prepare work | 1.1 | Work instructions are used to determine job requirements, including design, colour, finish process and quality   |
|   |                       | 1.2 | Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work |
|   |                       | 1.3 | Colour matching aids and colouring materials are accessed and readied for use                                    |
|   |                       | 1.4 | Types of colouring materials are identified and prepared for colouring task                                      |
|   |                       | 1.5 | Tools, equipment and accessories are identified and  |

- checked for safe and effective operation
- 2 Match colours
- 2.1 Surfaces are cleaned and prepared to enable accurate colour matching
- 2.2 Characteristics of the surface and the impact of these on colouring are taken into account
- 2.3 Techniques for colour application are identified and selected according to workplace practices
- 2.4 Properties of colouring agents are assessed in relation to the specific circumstances
- 2.5 Colour matching techniques are applied to identify most likely fit in terms of product, colour and application techniques
- 2.6 Colour matching outcomes are confirmed through trials of proposed products, colours and application techniques
- 2.7 Colour matching formulae are recorded to enterprise or industry standards
- 3 Make up colours
- 3.1 Product quantities are identified from client demand or accurate assessment of coating/colouring requirement
- 3.2 Colouring additives are calculated from manufacturer specifications
- 3.3 Colouring additives are accurately measured and blended with the base product
- 4 Apply colours
- 4.1 Colour solution is applied in accordance with selected application techniques and workplace procedures
- 4.2 Colour application is constantly checked against sample colour
- 4.3 Surface is inspected for faults in applied colour film and defects are rectified
- 4.4 Coloured or matched up surface is sealed with finishing material in accordance with job specification and workplace procedures
- 5 Clean up work area
- 5.1 Colouring materials are stored and labelled ready for next process
- 5.2 Waste and unwanted material is disposed of safely and

in accordance with relevant environmental regulations

5.3 Unused materials are sealed and stored

5.4 Tools and equipment are cleaned, maintained and stored

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

### Unit context includes:

- WHS requirements, including legislation, building codes, material safety management systems, hazardous and dangerous goods codes, and local safe operating procedures or equivalent
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving in the accurate matching of colours

### Tools and equipment include:

- mixing pots
- brushes
- spray equipment and mechanical mixer/vibrator
- colour rubber
- colour wad

### Materials include:

- spirit-based stains
- pigments
- lacquers
- oil varnish

- two-part polyurethane
  - methylated spirits
  - lacquer thinners
  - mineral turpentine and polish
- Colouring agents include:**
- pigments
  - dyes
  - stains
  - universal tinters and toning lacquer
- Properties of colouring agents include:**
- colour
  - specific gravity
  - staining power
  - refractive power
  - texture
  - durability
  - opacity
  - spreading power
  - toxicity and oil absorptive power
- Personal protective equipment includes:**
- that prescribed under legislation, regulations and enterprise policies and practices
- Information and procedures include:**
- workplace procedures relating to the use of tools and equipment
  - work instructions, including job sheets, cutting lists, plans, drawings and designs
  - workplace procedures relating to reporting and communication
  - manufacturer specifications and operational procedures

## Unit Mapping Information

Supersedes and is equivalent to LMFFF3001B Match and make up colours

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFF3001 Match and make up colours

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Interpret work order and locate and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Accurately colour match using pigments and/or stains on a minimum of five (5) occasions
- Record colour formulae for production situations
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Minimise wastage of resources, including materials, time and money
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Types, characteristics and degradation patterns of coatings and stains
- Properties of coated and stained surface materials and the impact of these on colouring
- Types, characteristics, uses and limitations of colouring agents
- Types, uses and limitations of matching aids
- Product catalogues and other information systems
- Material safety management systems and related safety requirements

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

- have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
- be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to sample colouring requirements, colouring agents, base coating products, mixing and testing equipment, and cleaning equipment and materials.

## MSFFL2030 Receive and prepare flooring materials

### Modification History

Release 1. Supersedes and is not equivalent to MSFFL2002 Receive and prepare floor covering materials for installation and MSFFL2003 Select, operate and maintain floor covering cutting machine.

### Application

This unit describes the skills and knowledge required to check, prepare, package, transport and load flooring materials to an installation site with minimum damage. It includes acclimatisation and storage of materials on site and only the use of non-regulated moving devices such as hand trolleys and palette-jacks.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify preparation requirements	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Read work documentation and identify job and material preparation requirements 1.3 Confirm details of the site conditions, including safety and security requirements, from reports or physical inspection 1.4 Identify delivery point, access and storage on site and determine

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>methods for loading and/or hoisting floor coverings</p> <p>1.5 Determine any special packaging requirements for transportation to site</p> <p>1.6 Select and check tools, equipment and materials for suitability, serviceability and safety prior to use</p>
2. Receive flooring materials	<p>2.1 Receive and segregate flooring materials into products</p> <p>2.2 Check received materials against delivery documentation for type, quantity and production batch</p> <p>2.3 Inspect received materials for defects and damage and reject or segregate unacceptable items</p> <p>2.4 Accurately complete receipt documentation in accordance with workplace procedures</p>
3. Prepare and package flooring materials	<p>3.1 Confirm types and quantities of materials required for the work plan</p> <p>3.2 Prepare and accurately measure or estimate materials based on job requirements</p> <p>3.3 Package materials and equipment for transport to site taking into account potential damage factors</p>
4. Secure and protect load	<p>4.1 Check distribution to ensure that it is even, meets regulatory loading and transporting requirements and is within safe working capacity</p> <p>4.2 Check load to ensure that dangerous goods and hazardous substances are appropriately segregated in accordance with current dangerous goods codes</p> <p>4.3 Secure load using the correct load restraint and protection equipment for different loads, carrying and storage conditions</p> <p>4.4 Protect load in accordance with legal and workplace safety requirements</p>
5. Load flooring materials on to the worksite	<p>5.1 Identify roles and related responsibilities for the successful completion of the loading and lifting activity</p> <p>5.2 Estimate time requirements to complete the loading and/or lifting of flooring materials based on scope of work</p> <p>5.3 Select, access and use materials handling equipment appropriate to the task in accordance with regulatory and/or site requirements</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	5.4 Complete movement activities as an individual or working directly with others as required by the work tasks
6. Store flooring materials and accessories on site	6.1 Observe condition of flooring materials and accessory products on arrival on site, identify any damage and separate for further action 6.2 Store flooring materials and accessory products on site observing any requirements for protection from potential damage factors 6.3 Identify and satisfy product and site acclimatisation requirements 6.4 Stack materials appropriately for weight loading, size and crushability of flooring materials or accessory products 6.5 Locate required products to enable ready access when required on site
7. Complete housekeeping	7.1 Store and recycle unused materials in accordance with workplace procedures 7.2 Check, clean and store tools and equipment in accordance with workplace procedures 7.3 Clean work area and dispose of rubbish safely 7.4 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for MSFFL2030 Receive and prepare flooring materials

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL2002 Receive and prepare floor covering materials for installation and MSFFL2003 Select, operate and maintain floor covering cutting machine.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- checked, prepared, packaged, loaded for transport and stored flooring materials in accordance with workplace requirements for 2 different jobs with varied site conditions and potential damage considerations
- safely used 2 different non-regulated materials handling devices.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of weight and estimation of material requirements
- handling, transporting and storage of flooring materials:
  - relevant Australian standards and regulations including state/territory mass and loading regulations
  - Australian and international regulations and codes of practice for the handling and transport of dangerous goods and hazardous substances
  - workplace safety and risk management systems
  - environmental protection requirements
  - work flow
  - types, characteristics and uses of flooring materials and common defects
  - items used in installation of different types of flooring materials
- the importance of acclimatisation on site, factors that can cause damage to flooring materials and how this impacts handling and storage:
  - humidity
  - moisture
  - temperature
  - weather effects
  - handling
  - crushing

- scratching
- contamination requirements for minimising damage to and maintaining contaminant free unfinished materials goods and completed products
- potential hazards around products to be stored, including:
  - fire and explosion risk
  - security issues
  - operator safety
- types, characteristics, safe use, maintenance and limitations of tools and equipment used in preparing flooring materials for their safe use, operation and maintenance, including:
  - non-motorised lifting and movement aids
  - open and enclosed pallets
  - pre-fabricated and fixed shelving
  - shipping containers
  - cutting machinery
- transportation of prepared flooring materials and associated equipment to the installation site including:
  - packaging for damage minimisation during transportation
  - weight calculations and considerations for package shape, size and suitability for the vehicle to be used for transportation
  - workplace procedures and policies for the loading and unloading of goods or cargo
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - sites for storage and handling of product
  - flooring materials in sufficient quantity to undertake complete installations
  - non-regulated materials handling devices and preparation equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL2031 Remove existing floor coverings

### Modification History

Release 1. Supersedes and is equivalent to MSFFL2005 Remove existing floor coverings.

### Application

This unit describes the skills and knowledge required to remove existing floor coverings.

This unit applies to individuals removing floor coverings in accordance with established workplace procedures.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan work	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Read documentation and identify work requirements 1.3 Select tools, equipment and materials and check for suitability, serviceability and safety prior to use 1.4 Plan sequence of work to ensure removal of floor coverings is in logical order

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Prepare and position materials and equipment for use
2. Remove floor coverings	2.1 Select starting point to ensure entry and exit access throughout the operation 2.2 Check area and flooring for presence of any hazardous substances and take appropriate action 2.3 Remove floor covering using techniques suited to the type of material 2.4 Securely package removed floor coverings in manageable bundles for removal from the area 2.5 Check exposed floor and safely remove any protruding nails, carpet grippers, adhesives, levelling compounds and remnants of floor coverings
3. Complete housekeeping	3.1 Store and recycle unused materials in accordance with workplace procedures 3.2 Check, clean and store tools and equipment in accordance with workplace procedures 3.3 Clean work area and dispose of rubbish safely 3.4 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFFL2005 Remove existing floor coverings.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFL2031 Remove existing floor coverings

## Modification History

Release 1. Supersedes and is equivalent to MSFFL2005 Remove existing floor coverings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- removed floor coverings in accordance with safety and job requirements:
  - 1 by hand
  - 1 using mechanical equipment.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- removal of floor coverings:
  - workplace safety system requirements
  - environmental protection and sustainability requirements
  - work flow
  - potential risk factors, including the presence of hazardous substances, and how to respond, including to the presences of asbestos
  - characteristics of floor coverings and different techniques and materials used to fix:
    - carpet with soft underlay and gripper strips
    - parquetry with hard underlay
    - resilient floor covering installed on concrete
    - carpet, resilient and cork tile
    - tiled floors
    - strip timber
    - floating floor
  - techniques and processes for the removal of different types of floor coverings, the types of problems that may occur and how to avoid and respond
  - types of tools and equipment use for removal and procedures for their safe set up, use and maintenance:
    - manual
    - mechanical
- procedures for the recording, reporting and maintenance of workplace records and information.

- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations with floor covering for removal
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFL2032 Select, prepare and apply moisture barriers to concrete subfloors

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL2009 Select, prepare and apply moisture barriers and damp-proof membranes to concrete sub-floors.

## Application

This unit describes the skills and knowledge required to apply moisture barriers in readiness for the installation of floor coverings and coatings.

This unit applies to flooring technicians preparing floors in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Flooring technology

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Read documentation and identify work requirements and process 1.3 Inspect subfloors in accordance with Australian Standards and identify treatment system

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Select and check tools, equipment and materials for suitability, serviceability and safety prior to use</p> <p>1.5 Access safety data sheets (SDS), or equivalent, and apply to work</p> <p>1.6 Prepare materials and equipment and safely position for use</p> <p>1.7 Prepare surfaces in accordance with manufacturer recommendations</p>
2. Apply moisture suppressant	<p>2.1 Apply surface coating to required depth and coverage in accordance with manufacturer specifications and job requirements</p> <p>2.2 Check subfloor is clear for application of moisture barrier in accordance with requirements</p>
3. Apply moisture barrier	<p>3.1 Establish moisture type as hydrostatic pressure, capillary moisture, or new concrete with high moisture content</p> <p>3.2 Establish moisture content as reducing, construction moisture or a result of damaged membrane or capillary action</p> <p>3.3 Strengthen all corners, cracks and other penetrations in accordance with manufacturer instructions</p> <p>3.4 Lay barrier material with required number of coats in accordance with manufacturer instructions</p> <p>3.5 Check subfloor for compliance with quality requirements and identify and rectify deficiencies</p>
4. Complete housekeeping	<p>4.1 Store or recycle unused materials in accordance with workplace procedures</p> <p>4.2 Clean remains of compounds used and dispose of appropriately</p> <p>4.3 Check, clean and store tools and equipment in accordance with workplace procedures</p> <p>4.4 Clean work area, remove waste material and dispose of safely</p> <p>4.5 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFL2032 Select, prepare and apply moisture barriers to concrete subfloors

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL2009 Select, prepare and apply moisture barriers and damp-proof membranes to concrete sub-floors.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed 2 moisture suppressant and barrier installations:
  - 1 moisture barrier (dealing with an external moisture problem that may be due to hydrostatic pressure or capillary action)
  - 1 moisture suppressant (dealing with construction moisture in green concrete).
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- application of moisture suppressant and barrier systems:
  - Australian Standards requirements
  - workplace safety system requirements
  - environmental protection and sustainability requirements
  - work flow
  - types, characteristics, safe use, maintenance and limitations of tools and equipment used during work process
  - types, characteristics, uses and limitations of moisture barriers and moisture suppressants
  - techniques for the application of products, the types of problems that may occur and how to avoid and respond
- procedures for the recording, reporting and maintenance of workplace records and information.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - concrete subfloors to be treated
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - safety data sheets
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL2033 Install hard underlays

### Modification History

Release 1. Supersedes and is equivalent to MSFFL2016 Install hard underlays.

### Application

This unit describes the skills and knowledge required to cut and fit hard underlay materials prior to laying floor coverings.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for installation	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Read documentation and identify work requirements 1.3 Assess subfloor condition for the type of underlay and/or floor covering to be installed 1.4 Select underlay material suitable to the final surface to be laid

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Select adhesives and fastenings based on job requirements 1.6 Select tools and equipment and check for suitability, serviceability and safety prior to use 1.7 Plan sequence of work, including the starting point, to ensure efficiency and quality of installation
2. Set out materials	2.1 Check hard underlay to be installed against order 2.2 Acclimatise hard underlay in accordance with manufacturer recommendations 2.3 Establish working lines and starting point 2.4 Lay out materials to meet specification requirements and to minimise waste 2.5 Mark and cut material to specification with minimum waste
3. Lay underlay	3.1 Identify and follow instructions and sequence for laying and fixing 3.2 Organise materials for fixing and use in accordance with safety management requirements 3.3 Use fixing methods and equipment following manufacturer instructions 3.4 Check completed installation for flaws and materials and rectify
4. Complete housekeeping	4.1 Store and recycle unused materials in accordance with workplace procedures 4.2 Check, clean and store tools and equipment in accordance with workplace procedures 4.3 Clean work area and dispose of rubbish safely 4.4 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

# Assessment Requirements for MSFFL2033 Install hard underlays

## Modification History

Release 1. Supersedes and is equivalent to MSFFL2016 Install hard underlays.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed 2 hard underlay installations in accordance with job requirements and manufacturer recommendations using 5.5mm sheet products:
  - 1 adhesive and fastener fixed on to the subfloor
  - 1 fastener fixed on timber subfloor.
  -

## Knowledge Evidence

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- installation of hard underlays:
  - Australian Standards requirements
  - workplace safety system requirements
  - environmental protection and sustainability requirements
  - how to access manufacturer instructions
  - work flow
  - types, characteristics, uses and limitations of hard underlays
  - types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
  - laying techniques, the types of problems that can occur and how to avoid and respond
  - quality indicators for completed work
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

- locations requiring installation of hard underlay
- underlay as specified in the Performance Evidence
- equipment, tools and materials to complete tasks in the Performance Evidence
- work orders
- workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFL2034 Prepare subfloors with cementitious coating applications

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL2006 Prepare, select and apply smoothing and patching compounds, and, MSFFL2007 Select and apply appropriate compounds and additives.

## Application

This unit describes the skills and knowledge required to select, prepare, and apply primers, admix and cementitious products to concrete and timber subfloors using skim, smoothing, levelling and bulk filling coating techniques in readiness for the installation of floor coverings and coatings. It may apply to internal and external applications.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

# Assessment Requirements for MSFFL2034 Prepare subfloors with cementitious coating applications

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL2006 Prepare, select and apply smoothing and patching compounds, and, MSFFL2007 Select and apply appropriate compounds and additives.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- achieved the required substrate finish with each of the following on both timber and concrete subfloors:
  - level coat to 3mm thickness
  - primer
  - rapid set mortar patch or ramp
  - skim coat.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- characteristics and requirements of concrete and timber subfloor preparation
- characteristics and requirements of concrete and fibre board wall preparation
- application of compounds and additives:
  - workplace safety system requirements
  - environmental protection and sustainability requirements
  - how to access manufacturer instructions
- types, characteristics, uses and limitations of compounds and additives, including:
  - porous substrate primer
  - non-porous substrate primer
  - substrate moisture barrier and green slab primer
  - fibre
  - high polymer cement-based finishes
  - latex powder and emulsion based subfloor smoothing compounds
  - levelling and smoothing compounds and primers

- pumpable cement base floor leveller
- rapid setting and drying repair mortar
- self-smoothing and/or levelling cements
- synthetic resin dispersion
- two part, chemically cured epoxy coating for porous concrete floors
- graded aggregate for bulking
- kiln dry sand for priming and bulking
- types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
- techniques for the application of compounds and additives, the types of problems that may occur, and how to avoid and respond
- quality indicators for subfloor surface finishes
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - subfloors requiring application of compounds and additives
  - compounds and additives
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFL2035 Mechanically prepare surfaces for installation of flooring materials

## Modification History

Release 1. Supersedes and is not equivalent to:

- MSFFL2011 Select, operate and maintain grinding equipment
- MSFFL2012 Select, operate and maintain shot blasting equipment
- MSFFL2013 Select, operate and maintain demolition equipment
- MSFFL2014 Select, operate and maintain scarifying equipment

## Application

This unit describes the skills and knowledge required to select and use powered equipment for the preparation of surfaces prior to the installation of flooring materials. It includes the requirement for floor grinding, and for knowledge of a range of different preparation methods.

This unit applies to flooring technicians preparing surfaces in accordance with pre-determined work orders where assessment of preparation needs would already have taken place.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

# Assessment Requirements for MSFFL2035 Mechanically prepare surfaces for installation of flooring materials

## Modification History

Release 1. Supersedes and is not equivalent to:

- MSFFL2011 Select, operate and maintain grinding equipment
- MSFFL2012 Select, operate and maintain shot blasting equipment
- MSFFL2013 Select, operate and maintain demolition equipment
- MSFFL2014 Select, operate and maintain scarifying equipment
- 

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- prepared 2 surfaces in accordance with finish requirements using powered floor preparation equipment, with at least one being a grinding preparation.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- how to identify subfloors where specialist preparation is required and the different types of preparation methods available to achieve the required surface quality
- floor preparation using equipment:
  - organisational and site standards, requirements, policies and procedures
  - Australian Standards requirements
  - workplace safety system requirements
  - how to access manufacturer instructions
  - environmental protection and sustainability requirements
  - work flow for different types of floor preparation
- types, characteristics, uses, and limitations of different floor preparation equipment, including how to operate equipment used for:
  - floor demolition
  - grinding – single headed, double-headed, planetary action (tooling selection requirements)
  - scarifying
  - shot blasting
  - sanding with rotary floor sander
- fixtures and fittings that need to be removed prior to surface preparation

- when wet method cleaning is required prior to mechanical methods being used
- cleaning products suited to different types of contaminant and how they are used
- processes for clean-up and disposal of waste slurry
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - floors requiring preparation
  - grinding equipment
  - surfaces to be prepared
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL2036 Install soft carpet underlays and gripper accessories

### Modification History

Release 1. Supersedes and is equivalent to MSFFL2017 Install carpet cushion underlays and gripper accessories.

### Application

This unit describes the skills and knowledge required to prepare, lay out, cut, lay and fix soft carpet underlays, and carpet gripper accessories prior to laying carpet floor coverings, using the carpet gripper system.

This unit applies to flooring technicians installing underlay in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for installation	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Read documentation and identify work requirements and process 1.3 Confirm sub-floor suitability for installation consistent with Australian Standards and manufacturer recommendations

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Select and check tools, equipment and materials for suitability, serviceability and safety prior to use</p> <p>1.5 Select suitable adhesives, fixing trims and accessories</p> <p>1.6 Lay out materials to meet specification requirements and to minimise waste</p> <p>1.7 Plan sequence of work, including the starting point, to ensure efficiency and quality of installation</p>
2. Set out materials	<p>2.1 Check carpet cushion or underlay and gripper accessories to be installed against order and acclimatise in accordance with manufacturer recommendations</p> <p>2.2 Fit carpet grippers in accordance with specifications, plan and workplace procedures</p> <p>2.3 Fit metal mouldings at thresholds and abutments to other flooring surfaces in accordance with specifications, plan and workplace procedures</p>
3. Lay and fix floor covering	<p>3.1 Identify and follow instructions and sequence for laying and fixing</p> <p>3.2 Cut underlay to required shape with minimum waste of materials</p> <p>3.3 Organise and use materials for fixing in accordance with manufacturer and safety management requirements</p> <p>3.4 Fix underlay using methods and equipment which follow manufacturer instructions</p>
4. Complete housekeeping	<p>4.1 Store and recycle unused materials in accordance with workplace procedures</p> <p>4.2 Check, clean and store tools and equipment in accordance with workplace procedures</p> <p>4.3 Clean work area and dispose of rubbish safely</p> <p>4.4 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFFL2017 Install carpet cushion underlays and gripper accessories.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFL2036 Install soft carpet underlays and gripper accessories

## Modification History

Release 1. Supersedes and is equivalent to MSFFL2017 Install carpet cushion underlays and gripper accessories.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- installed 2 soft carpet underlays to complete rooms in accordance with job requirements with 1 incorporating obstructions and irregular (obtuse and acute) angles:
  - 1 to timber subfloor
  - 1 to concrete subfloor
- installed:
  - internal and external miters to naplocks
  - ripple trims
  - multi-purpose trims.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area, angles, and estimation of material requirements
- soft carpet underlay and gripper accessory installation:
  - Australian Standards requirements
  - workplace safety system requirements
  - how to access manufacturer instructions
  - environmental protection and sustainability requirements
  - work flow
  - characteristics and requirements of sub-floor preparation
  - type, characteristics, uses and limitations of soft carpet underlays, including:
    - single fibre
    - composite fibre
    - foam rubber
    - bonded foam
  - characteristics of materials, products and defects types,

- characteristics, safe use, maintenance and limitations of tools, equipment and materials
- techniques for set out, laying, cutting and fixing, the types of problems that may occur and how to avoid and respond
- quality indicators for completed work
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations requiring soft carpet underlays
  - carpet underlay
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL2037 Install unpatterned tufted carpet

### Modification History

Release 1. Supersedes and is not equivalent to MSFFL2018 Install unpatterned tufted and bonded carpet floor coverings, and, MSFFL2020 Install unpatterned tufted and bonded carpet floor coverings to stairs.

### Application

This unit describes the skills and knowledge required to prepare, cut, lay out, join, power stretch, trim and finish unpatterned tufted carpet, using the carpet gripper installation system. It includes installation to box and winder steps.

This unit applies to flooring technicians installing carpet in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring Technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for installation	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Correctly identify work requirements and process from review of documentation 1.3 Select and check tools, equipment and materials for suitability,

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>serviceability and safety prior to use</p> <p>1.4 Plan sequence of work, including the starting point, to ensure efficiency and quality of installation</p> <p>1.5 Confirm sub-floor suitability for installation consistent with Australian Standards and manufacturer recommendations</p>
2. Set out materials	<p>2.1 Check carpet to be installed against order and acclimatise carpet in accordance with manufacturer recommendations</p> <p>2.2 Inspect underlay and gripper strips to confirm correct fitting</p> <p>2.3 Clear work area of scraps or other contaminants.</p>
3. Lay carpet	<p>3.1 Identify and follow instructions and sequence for laying and fixing</p> <p>3.2 Lay out carpet pieces and check for size, direction of pile and match</p> <p>3.3 Cut, seal and join carpet pieces in accordance with manufacturer instructions and Australian Standards</p> <p>3.4 Use stretching and fixing methods in accordance with manufacturer instructions and Australian Standards</p> <p>3.5 Inspect finished work for compliance with work order, workplace and Australian Standards</p>
4. Complete housekeeping	<p>4.1 Store and recycle unused materials in accordance with workplace procedures</p> <p>4.2 Check, clean and store tools and equipment in accordance with workplace procedures</p> <p>4.3 Clean work area and dispose of rubbish safely</p> <p>4.4 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for MSFFL2037 Install unpatterned tufted carpet

## Modification History

Not applicable.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- installed 2 types of tufted carpet using a carpet gripper installation system to each of the following:
  - connecting rooms, including at least 1 seam join and 1 cross join
  - a box step stairway containing at least 3 steps
  - a kite winder treads stairway containing at least 3 steps
- installed tufted carpet on both concrete and timber staircases (at least once each).
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- unpatterned tufted carpet floor covering installation:
  - Australian Standards requirements
  - workplace safety system requirements
  - how to access manufacturer instructions
  - environmental protection and sustainability requirements
  - work flow
  - types, characteristics, uses and limitations of unpatterned and tufted carpets
  - types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
  - techniques for preparing, cutting, laying out, joining, power stretching, trimming and finishing carpet, the types of problems that may occur and how to avoid and respond:
  - characteristics and requirements of soft underlays, gripper strips and metal mouldings
  - quality indicators for completed work
- procedures for the recording, reporting and maintenance of workplace records and information.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations, including stairways requiring unpatterned and tufted carpet
  - unpatterned and tufted carpet
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL2038 Install lay flat vinyl floor coverings

### Modification History

Release 1. Supersedes and is equivalent to MSFFL2021 Install lay flat vinyl floor coverings.

### Application

This unit describes the skills and knowledge required to set out, lay and cut flat vinyl floor coverings to single and connecting rooms using pattern matching, seam cutting, joining and sealing techniques.

This unit applies to flooring technicians laying floor coverings in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for installation	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Read documentation and identify work requirements 1.3 Confirm subfloor suitability for installation consistent with Australian Standards and manufacturer recommendations 1.4 Select adhesives, trims and accessories based on job requirements

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.5 Select and check tools, equipment and materials for suitability, serviceability and safety prior to use</p> <p>1.6 Plan sequence of work, including starting point, to ensure efficiency and quality of installation</p> <p>1.8 Check coverings to be installed against order and acclimatise in accordance with manufacturer recommendations</p>
2. Set out materials	<p>2.1 Identify and follow instructions and sequence for laying and fixing</p> <p>2.2 Organise and use floor coverings in accordance with safety management requirements</p> <p>2.3 Establish working lines and starting point</p>
3. Lay flat vinyl	<p>3.1 Lay out floor coverings to meet directional sequence, pattern match, specification requirements minimising waste and joins</p> <p>3.2 Accurately and clearly mark floor coverings for cutting</p> <p>3.3 Cut floor coverings to required pattern and shape with minimum waste of materials</p> <p>3.4 Apply adhesives in accordance with manufacturer instructions</p> <p>3.5 Seal seams using cold welding techniques and equipment suited to the material</p> <p>3.6 Check completed installation for flaws in installation and materials, and identify and rectify faults</p>
4. Complete housekeeping	<p>4.1 Store and recycle unused materials in accordance with workplace procedures</p> <p>4.2 Check, clean and store tools and equipment in accordance with workplace procedures</p> <p>4.3 Clean work area and dispose of rubbish safely</p> <p>4.4 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFFL2021 Install lay flat vinyl floor coverings.

# Assessment Requirements for MSFFL2038 Install lay flat vinyl floor coverings

## Modification History

Release 1. Supersedes and is equivalent to MSFFL2021 Install lay flat vinyl floor coverings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- cut, laid and fixed flat vinyl floor coverings in accordance with job requirements:
  - to a single room with external corners, including pattern match at seams, using freehand, template or scribing method, with seams to be cold-welded
  - to connecting rooms, including pattern match at seams and cross joins using free-hand, template or scribing method, with seams to be cold-welded
  - pattern match repair by double cutting the corresponding pattern, with seams to be cold-welded.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- lay flat vinyl flooring installation:
  - Australian Standards requirements
  - workplace safety system requirements
  - how to access manufacturer instructions
  - environmental protection and sustainability requirements
  - work flow
  - characteristics and requirements of sub-floor preparation
  - types, characteristics, uses and limitations of:
    - lay flat vinyl floor coverings including encapsulated glass fibre and text backing products
    - lay flat vinyl floor covering installation adhesives including water-based acrylic, water-based contact and solvent-based contact
    - cold chemical seam welding techniques
  - types, characteristics, safe use, maintenance and limitations of tools and equipment
  - type, characteristics, uses and limitations of other materials used

- techniques for set out, laying and cutting, the types of problems that may occur and how to avoid and respond
- quality indicators for completed work
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations requiring lay flat vinyl installations
  - lay flat vinyl flooring
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# Assessment Requirements for MSFFL2039 Install laminate flooring

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL2023 Install laminate timber and bamboo flooring.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed 3 laminate installations in accordance with job requirements, featuring each of the following at least once:
  - a complete room
  - intermediate expansion trims
  - proprietary finishing trims.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- laminate flooring installation:
  - Australian Standards requirements
  - workplace safety system requirements
  - work flow
  - environmental protection and sustainability requirements
  - how to access manufacturer instructions
- types, characteristics, uses and limitations of:
  - laminate flooring
  - installation adhesives
  - underlays
  - types, characteristics, uses and limitations of adhesives used in floating flooring, including:
    - polyvinyl alcohol (PVA)
    - epoxy
    - polyurethane elastomeric
  - characteristics and requirements of sub-floor preparation

- types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
- techniques for set out, laying, cutting and fixing, the types of problems that may occur and how to avoid and respond
- quality indicators for completed work
- procedures and protocols for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - location for installation
  - laminate flooring
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL2040 Install engineered timber flooring

### Modification History

Release 1. Supersedes and is equivalent to MSFFL2024 Install engineered timber flooring.

### Application

This unit describes the skills and knowledge required to prepare for work and install, stick by stick, an engineered timber floor within a space over a soft underlay, including preparation, cutting, laying and fixing.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

# Assessment Requirements for MSFFL2040 Install engineered timber flooring

## Modification History

Release 1. Supersedes and is equivalent to MSFFL2024 Install engineered timber flooring.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- installed each of the following types of engineered timber flooring systems in accordance with job requirements:
  - direct stick system
  - floating system
  - nail down system.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- engineered timber flooring installation:
  - Australian Standards requirements
  - workplace safety system requirements
  - work flow
  - environmental protection and sustainability requirements
  - how to access manufacturer instructions
  - types, characteristics, uses and limitations of different products
  - types, characteristics, uses and limitations of adhesives, including:
    - polyvinyl alcohol (PVA)
    - epoxy
    - polyurethane elastomeric
  - characteristics and requirements of subfloor preparation
  - types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
  - techniques for set out, laying, cutting and fixing, the types of problems that may occur and how to avoid and respond
  - quality indicators for completed work

- procedures and protocols for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - location for installation
  - engineered timber flooring
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL2041 Install impact and sound absorption underlay

### Modification History

Release 1. Supersedes and is equivalent to MSFFL2025 Install impact and sound absorption underlay.

### Application

This unit describes the skills and knowledge required to prepare, set out, cut and lay impact and sound absorption underlay over a new or existing subfloor in preparation for the installation of a laminate or engineered timber floor.

This unit applies to flooring technicians installing underlay in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Correctly identify work requirements and process from review of documentation 1.3 Confirm subfloor suitability for installation consistent with

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	Australian Standards and manufacturer recommendations 1.4 Select adhesives, mouldings, trims and fixings based on job requirements 1.5 Select and check tools and equipment prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition 1.6 Plan sequence of work to ensure efficiency and quality of application
2. Set out materials	2.1 Check impact and sound absorption underlay against work order and acclimatise in accordance with manufacturer recommendations 2.2 Use materials in accordance with safety management requirements 2.3 Establish working lines and starting point
3. Cut impact and sound absorption underlay	3.1 Follow instructions and sequence for laying and fixing 3.2 Lay out underlay to meet directional sequence, specification requirements and to minimise waste and joins 3.3 Cut underlay to required shape with minimum waste of materials
4. Lay and fix impact and sound absorption underlay	4.1 Use materials in accordance with safety management requirements 4.2 Prepare required adhesives and edge strips/accessories for use 4.3 Apply required adhesive to subfloor in accordance with manufacturer instructions 4.4 Fix underlay using methods and equipment that follow manufacturer instructions 4.5 Check completed installation for flaws in installation and materials and rectify faults in accordance with workplace procedures
5. Complete housekeeping	5.1 Store and recycle unused materials in accordance with workplace procedures 5.2 Check, clean and store tools and equipment in accordance with workplace procedures 5.3 Clean work area and dispose of rubbish safely 5.4 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

## Unit Mapping Information

Supersedes and is equivalent to MSFFL2025 Install impact and sound absorption underlay.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFL2041 Install impact and sound absorption underlay

## Modification History

Release 1. Supersedes and is equivalent to MSFFL2025 Install impact and sound absorption underlay.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed 3 sound absorption underlay installations to complete rooms in accordance with job requirements – jobs should individually or cumulatively involve:
  - obstructions
  - irregular angles.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and angles, and estimation of material requirements
- impact and sound absorption underlay installation:
  - Australian Standards requirements
  - workplace safety system requirements
  - work flow
  - environmental protection and sustainability requirements
  - how to access manufacturer instructions
  - types, characteristics, uses and limitations of products, including:
    - single fibre
    - composite fibre
    - bonded foam
    - recycled rubber
  - characteristics and requirements of subfloor preparation
  - types, characteristics, uses and limitations of different adhesives, including:
    - solvent and water-based contact
    - acrylic or polyurethane elastomeric
  - types, characteristics, safe use, maintenance and limitations of tools, equipment and materials

- techniques for set out, laying and cutting, the types of problems that may occur and how to avoid and respond
- quality indicators for completed work
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - location for installation
  - impact and sound absorption underlay
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL2042 Nail strip timber flooring

### Modification History

Release 1. Supersedes and is equivalent to MSFFL2026 Nail strip timber flooring.

### Application

This unit describes the skills and knowledge required to use top-nailing or secret nailing methods when installing tongue and groove strip timber flooring onto plywood underlay and battens over joists, concrete or a subfloor to either raise a floor or correct the level of a floor

Timber flooring includes timber plywood underlay manufactured under a JAS-ANZ accredited product certification scheme meeting the internationally recognised ISO Type 5 system for product reliability to AS/NZS 2269.0:2012 Plywood - Structural - Specifications

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Correctly identify work requirements and process from review of

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>documentation</p> <p>1.3 Assess subfloor condition for suitability for nailing consistent with Australian Standards and manufacturer recommendations</p> <p>1.4 Select fixings and adhesives based on job requirements</p> <p>1.5 Select and check tools, equipment and materials prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition</p> <p>1.6 Plan sequence of work to ensure efficiency and quality of application</p>
2. Prepare to nail strip timber flooring	<p>2.1 Follow instructions and sequence for nailing and fixing timber flooring</p> <p>2.2 Establish work lines and starting point</p> <p>2.3 Lay out timber flooring to meet directional sequence, pattern match, specification requirements, minimising waste and joins</p> <p>2.4 Inspect timber flooring material and confirm species, grade, size and quantity against work orders</p> <p>2.5 Moisture check timber using required equipment and confirm suitability of moisture content for site conditions as per pre-site inspection procedures</p> <p>2.6 Maximise the aesthetics of the materials by matching grains and colours where appropriate</p> <p>2.7 Establish safely located work station as power source for nail guns, and run air hoses to worksite in manner that minimises risk</p>
3. Nail strip timber flooring	<p>3.1 Organise and use nails, staples and adhesives for fixing in accordance with safety management requirements</p> <p>3.2 Use nailing methods and equipment in accordance with manufacturer recommendations and Australian Standards</p> <p>3.3 Position strip timber flooring using cramping procedures</p> <p>3.4 Use required nailing methods based on job requirements</p> <p>3.5 Inspect finished job and rectify any imperfections following workplace procedures.</p>

<b>Elements</b>	<b>Performance Criteria</b>

# Assessment Requirements for MSFFL2042 Nail strip timber flooring

## Modification History

Release 1. Supersedes and is equivalent to MSFFL2026 Nail strip timber flooring.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed 3 solid timber flooring installations to complete rooms in accordance with work requirements, demonstrating the use of:
  - top nail fixing throughout a room
  - secret nail fixing throughout a room.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- nailing of timber flooring:
  - Australian Standards requirements
  - workplace safety system requirements
  - work flow
  - environmental protection and sustainability requirements
  - how to access manufacturer instructions
  - types, characteristics, uses and limitations of:
    - installation adhesive, including elastomeric, polyvinyl alcohol (PVA), polyurethane
    - nails or staples
  - characteristics and requirements of subfloor preparation
  - types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
  - techniques for secret and top nailing, the types of problems that may occur and how to avoid and respond, including basic wood working techniques
  - quality indicators for completed work
- procedures and protocols for the recording, reporting and maintenance of workplace records and information.

- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - location for installation
  - strip timber flooring requiring nailing
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL2043 Install expansion joints

### Modification History

Release 1. Supersedes and is equivalent to MSFFL2027 Install expansion joints.

### Application

This unit describes the skills and knowledge required to install expansion joints and gaps, calculating how many and how often they are to be installed, and what size and type are necessary for the application at hand.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Correctly identify work requirements and process from review of documentation 1.3 Confirm subfloor suitability for installation consistent with Australian Standards and manufacturer recommendations 1.4 Select suitable expansion joints, cover strips, fixings and adhesives

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.5 Select and check tools, equipment and materials prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition</p> <p>1.6 Plan sequence of work to ensure efficiency and quality of installation</p>
2. Set out expansion joints for installation	<p>2.1 Position expansion joints according to the requirements of the flooring type, manufacturer specifications and Australian Standards</p> <p>2.2 Organise timber or metal mouldings or cork expansion strip for fixing and use in accordance with relevant management requirements</p> <p>2.3 Prepare required adhesives and fixings for use in accordance with manufacturer instructions</p> <p>2.4 Establish working lines and starting point</p>
3. Prepare expansion joints	<p>3.1 Follow instructions and sequence for cutting and fixing</p> <p>3.2 Lay out timber or metal mouldings to meet directional sequence, pattern match, specification requirements and to minimise waste and joins</p> <p>3.3 Maximise the aesthetics of the materials, where appropriate, matching grains and colours</p> <p>3.4 Accurately and clearly mark timber or metal moulding or cork expansion strip materials for cutting</p> <p>3.5 Cut timber or metal moulding or cork expansion strip to length and size for final fixing ensuring minimum waste</p>
4. Install expansion joints	<p>4.1 Organise and use timber or metal mouldings or cork expansion strip for fixing in accordance with relevant safety management requirements</p> <p>4.2 Prepare and use required adhesives and mechanical fixings in accordance with manufacturer instructions</p> <p>4.3 Fit timber or metal mouldings or cork expansion strip to perimeter wall expansion gaps, expansion joints in the body of the floor or transition areas</p> <p>4.4 Inspect finished job and rectify any imperfections following workplace procedures</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
5. Complete housekeeping	5.1 Store and recycle unused materials in accordance with workplace procedures 5.2 Check, clean and store tools and equipment in accordance with workplace procedures 5.3 Clean work area and dispose of rubbish safely 5.4 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFFL2027 Install expansion joints.

## Links

# Assessment Requirements for MSFFL2043 Install expansion joints

## Modification History

Release 1. Supersedes and is equivalent to MSFFL2027 Install expansion joints.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- assessed the need for, placed and fitted 5 expansion joints in complete rooms, including:
  - intermittent expansion allowance in a solid strip floor
  - cork expansion trim in a solid timber or parquet floor
  - caulking joint to a solid timber or parquet floor
  - proprietary trims to a laminate, bamboo or engineered floor
  - expansion joint to a previously completed floor of any type.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- expansion joint installation:
  - Australian Standards requirements
  - workplace safety system requirements
  - work flow
  - environmental and sustainability protection requirements
  - how to access manufacturer instructions
  - how to assess the requirements for expansion joints and the implications of incorrect assessment
  - types, characteristics, uses and limitations of:
    - the placement and fitting of expansion joints for timber and engineered flooring
    - timber or metal mouldings and cork expansion strip when fitting expansion joints to timber and engineered flooring
  - characteristics and requirements of expansion joint preparation
  - types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
  - techniques for set out, laying, cutting and fixing, the types of problems that may occur and how to avoid and respond, including basic wood working techniques

- quality indicators for completed work
- procedures and protocols for the recording, reporting and maintenance of workplace records and information.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - flooring installations requiring expansion joints
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.
  -

# MSFFL2044 Install mouldings and edge trims to timber flooring

## Modification History

Release 1. Supersedes and is equivalent to MSFFL2028 Install mouldings and edge trims to timber flooring.

## Application

This unit describes the skills and knowledge required to prepare, set out, cut and fix timber or metal mouldings and trims to timber and engineered flooring after installation, replacement, sanding and finishing.

This unit applies to flooring technicians installing mouldings and edge trims in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Flooring technology

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Correctly identify work requirements and process from review of documentation 1.3 Confirm floor suitability for installation consistent with Australian

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	Standards, industry standards and manufacturer recommendations 1.4 Select adhesives, mouldings, trims and fixings based on job requirements 1.5 Select and check tools, equipment and materials prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition 1.6 Plan sequence of work, including the starting point, to ensure efficiency and quality of installation
2. Set out materials for installation	2.1 Acclimatise mouldings and trims in accordance with manufacturer recommendations 2.2 Organise mouldings, trims and materials in accordance with safety management requirements 2.3 Establish working lines and starting point.
3. Cut mouldings and trims	3.1 Follow instructions and sequence for cutting and fixing 3.2 Lay out mouldings and trims to meet directional sequence, pattern match, specification requirements and to minimise waste and joints 3.3 Maximise the aesthetics of the materials, where appropriate, matching grains and colours 3.4 Accurately and clearly mark moulding and trim materials for cutting 3.5 Cut moulding and trim to length and size for final fixing ensuring minimum waste
4. Fix mouldings/trims	4.1 Prepare adhesives, mechanical fixings and accessories for use in accordance with manufacturer instructions 4.2 Use fixing methods and equipment in accordance with manufacturer recommendations 4.3 Fit skirting boards and/or mouldings to perimeter walls allowing for expansion joints 4.4 Fit and/or re-fit cover trims and edge strips to expansion joints and transitions of the timber flooring 4.5 Inspect finished job and rectify any imperfections in accordance with workplace procedures

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
5. Complete housekeeping	5.1 Store and recycle unused materials in accordance with workplace procedures 5.2 Check, clean and store tools and equipment in accordance with workplace procedures 5.3 Clean work area and dispose of rubbish safely 5.4 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

## Unit Mapping Information

Supersedes and is equivalent to MSFFL2028 Install mouldings and edge trims to timber flooring.

# Assessment Requirements for MSFFL2044 Install mouldings and edge trims to timber flooring

## Modification History

Release 1. Supersedes and is equivalent to MSFFL2028 Install mouldings and edge trims to timber flooring.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed 3 installations to complete rooms in accordance with job requirements.
- installed each of the following moulding types at least once:
  - edge and end mouldings
  - metal cover strips
  - scotia
  - skirting boards (scribed)
  - skirting boards (mitred)
  - stair nosing.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- moulding and edge trim fixing:
  - Australian Standards requirements
  - workplace safety system requirements
  - environmental protection and sustainability requirements
  - how to access manufacturer instructions
  - work flow
  - characteristics and requirements of sub-floor preparation
  - types, characteristics, uses and limitations of:
    - timber and metal mouldings and trims
    - adhesives
    - mechanical fixings
  - types, characteristics, safe use, maintenance and limitations of tools and equipment
  - basic wood working techniques

- techniques for set out, cutting and fixing, the types of problems that may occur and how to avoid and respond
- quality indicators for installed mouldings and edge trims
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - installation requiring mouldings and edge trims
  - mouldings and edge trims
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL2045 Coarse sand timber flooring

### Modification History

Release 1. Supersedes and is equivalent to MSFFL2015 Coarse sand timber flooring.

### Application

This unit describes the skills and knowledge required to prepare for work and coarse sand existing floors using a drum or belt driven sanding machine to grade the surface to remove cupping, ridges, high points or deep scratches. This usually involves three passes and the gradual overlapping of each run.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for the work	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Read work documentation and identify job requirements 1.3 Inspect timber flooring for contamination, moisture content and suitability for sanding operations, and identify and complete any pre-sanding tasks

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Assess timber flooring condition and confirm the extent of floor preparation required to meet job specifications</p> <p>1.5 Remove mechanical fixings to avoid damage to equipment and surfaces</p> <p>1.6 Select and check tools, equipment and materials for suitability, serviceability and safety prior to use</p> <p>1.7 Plan sequence of work suited to the job</p>
2. Conduct coarse sanding operations	<p>2.1 Set up and check sanding equipment and safety features in accordance with manufacturer instructions</p> <p>2.2 Select and change equipment to meet requirements of the job</p> <p>2.3 Conduct trial runs and confirm machine operation and quality of finished work</p> <p>2.4 Select, attach and routinely check sanding belts or papers and change to ensure quality finish</p> <p>2.5 Complete sanding systematically and effectively within the required timeframe</p> <p>2.6 Complete routine lubrication and adjustments to the equipment as required for efficient operation</p> <p>2.7 Clean and check final finish against quality and job requirements, and rectify deficiencies</p>
3. Complete housekeeping	<p>3.1 Store and recycle unused materials in accordance with workplace procedures</p> <p>3.2 Check, clean and store tools and equipment in accordance with workplace procedures</p> <p>3.3 Clean work area and dispose of rubbish safely</p> <p>3.4 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

## Unit Mapping Information

Supersedes and is equivalent to MSFFL2015 Coarse sand timber flooring.

# Assessment Requirements for MSFFL2045 Coarse sand timber flooring

## Modification History

Release 1. Supersedes and is equivalent to MSFFL2015 Coarse sand timber flooring.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- coarse sanded 2 complete rooms, including edges, in accordance with job requirements.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area
- coarse sanding operations:
  - Australian Standards requirements
  - workplace safety systems
  - work flow
  - environmental protection and sustainability requirements
  - floor conditions requirements for sanding operations
  - characteristics, safe use, maintenance and limitations of tools and equipment for both edge and centre sanding
  - techniques for machine use, the types of problems that may occur and how to avoid and respond
- procedures and protocols for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - floors requiring sanding
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment

- work orders
- workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL3052 Plan and cost flooring technology work

### Modification History

Release 1. Supersedes and is equivalent to MSFFL3001 Plan and cost flooring technology work.

### Application

This unit describes the skills and knowledge required to obtain job information, plan the scope of work, estimate the net cost of providing products and/or services and calculate the final cost to the customer. It includes the development of customer quotations.

This unit applies to flooring technicians.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

Nil

### Competency Field

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify job requirements	1.1 Obtain details of customer requirements in a manner suited to the nature of the job 1.2 Read and correctly interpret aspects of site plans and supporting documentation that affect flooring installation 1.3 Take and record accurate site measurements 1.4 Confirm details of other conditions that may impact installation from site assessment reports

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Create a floor plan to scale and record details in accordance with workplace procedures
2. Develop a work plan	2.1 Identify and analyse technical and material options for completing the work 2.2 Accurately quantify details of products and/or services required for the work 2.3 Confirm draft outline work proposal with customer and amend as necessary 2.4 Finalise and document work plan that clearly specifies the scope of work
3. Estimate costs	3.1 Estimate required materials types and quantities based on work plan 3.2 Calculate types and duration of usage of major tools and equipment required to support the work plan 3.3 Estimate labour requirements based on work plan 3.4 Identify and estimate other costs that may be incurred based on work plan
4. Determine cost to customer	4.1 Accurately calculate and document total cost of providing products and/or services based on estimates 4.2 Determine and document allowances for overheads and mark-up percentages in accordance with workplace procedures 4.3 Accurately calculate and document final cost to customer in accordance with workplace procedures
5. Complete final documentation	5.1 Check and verify costing details in accordance with workplace procedures 5.2 Identify and resolve costing errors or anomalies 5.3 Prepare accurate customer quotation in accordance with workplace formats 5.4 File or store costing and quotation documentation for future reference in accordance with workplace procedures

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to draw floor plans to scale and to use calculators and computers for costings and quotation preparation.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFFL3001 Plan and cost flooring technology work

# Assessment Requirements for MSFFL3052 Plan and cost flooring technology work

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3001 Plan and cost flooring technology work.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- planned, costed and documented 3 flooring installation jobs that have different requirements in terms of:
  - scope and nature of products and/or services
  - labour costs
  - material costs
  - major equipment usage
  - site conditions
- created scale floor plans in both manual and digital formats
- used the following processes correctly in estimating and costing the 3 jobs:
  - estimation
  - measurement
  - the four basic mathematical operations – addition, subtraction, multiplication and division
  - calculation of percentage mark-ups
  - calculation of Goods and Services Tax (GST).
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- implications of Australian Standards on planning and costing of work for the relevant flooring materials
- mathematical procedures for estimation and measurement, including calculation of area and estimation of material and labour requirements
- site conditions and how they may impact planning and costing of work:
  - access requirements
  - building project status
  - heating/cooling requirements

- humidity
- lighting
- power supply
- security arrangements
- temperature
- ventilation
- how to draw a floor plan to scale
- products and/or services for which costings are being prepared, including:
  - sources of information
  - features, options and suitability for different customer requirements including requirements for preparation, installation and finishing
  - legal and ethical considerations
  - costs involved in providing products/services:
    - materials, tools and major equipment for preparation, installation and finishing
    - labour rates and their components (normal and overtime estimates, both direct and indirect costs covering employees and contractors)
    - production time and cost
    - transport and delivery
    - overhead components
- project management principles and their application to planning of flooring installations
- components of a work plan that inform job costing, including:
  - covering and/or installation type
  - finishing
  - floor preparation
  - personnel and timings by labour type
  - transportation methods and costs
  - work area isolation and/or protection
  - work permits, as applicable
  - work timings and program
- industry sector and enterprise costing and quoting procedures:
  - mark-up percentages
  - application of GST
  - documentation formats and inclusions for quotations and contracts
  - terms and conditions included in quotations
  - checking and approval processes
  - procedures to address variations.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - details of customer requirements
  - sites requiring installation of flooring materials
  - measuring equipment
  - site assessment information
  - manual drawing materials
  - digital drawing software
  - information technology hardware
  - workplace procedures and costing schedules for planning and costing of work.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFL3053 Establish and maintain a safe flooring technology work environment

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3002 Establish and maintain a safe flooring technology work environment.

## Application

This unit describes the skills and knowledge required to conduct a systematic risk assessment of the work and work area to establish and maintain a safe work environment throughout the conduct of flooring technology operations.

This unit applies to all flooring technicians.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

Nil

## Competency Field

## Unit Sector

Flooring technology

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify and interpret operational and environmental information	1.1 Read and interpret instructions and/or plans and identify processes for completion of work tasks 1.2 Identify and analyse the safety implications of required tools and equipment and their operating characteristics 1.3 Identify and analyse the safety implications of proposed flooring materials

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Identify hazards	2.1 Identify and analyse work area conditions and potential hazards 2.2 Access and analyse safety systems information and eliminate situations covered adequately by existing procedures 2.3 Recognise and accurately document the type and scope of unresolved hazards and their likely impact
3. Assess risk	3.1 Consider and determine likelihood of the event happening 3.2 Evaluate and determine consequence if the event should occur 3.3 Consider and determine risk level based on identified likelihood and consequence
4. Identify and decide on risk treatment	4.1 Identify and assess treatments which may eliminate or minimise the risk 4.2 Subject feasible options to detailed analysis in the context of job parameters and constraints 4.3 Select most appropriate treatment based on analysis
5. Implement the risk treatment	5.1 Prepare a detailed plan for the course of risk treatment that includes actions, responsibilities and resource requirements 5.2 Organise resources in accordance with workplace procedures 5.3 Implement the risk treatment in accordance with the detailed plan, applying safety information and procedures throughout operation 5.4 Communicate information on the risk treatment and implementation to the relevant people

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFFL3002 Establish and maintain a safe flooring technology work environment.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFL3053 Establish and maintain a safe flooring technology work environment

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3002 Establish and maintain a safe flooring technology work environment.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- established and responded to the safety requirements and risks associated with 1 flooring installation.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- state or territory work health and safety legislation, regulations, standards and codes of practice relevant to risk management in a flooring technology work environment
- organisational and site standards, requirements, policies and procedures for flooring technology risk management
- types of tools, equipment and materials used in flooring installations and the safety impacts of their use
- common flooring technology related hazards, including:
  - dust inhalation
  - environmental hazards
  - falls
  - flying debris
  - fume inhalation
  - lack of control during pouring
  - machine safety
  - power sources and leads
  - trips
  - vibration (direct and indirect consequences)
- common treatments and how they are used:
  - debris protection, such as machine guards, skirts, distance and access controls
  - dust and fumes extraction systems
  - isolation through testing, distance, barriers, entry limits and signage

- personal protective equipment
- pour protection through area sealing and plugs
- power source protection, such as earth leakage and coded leads
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - location to be assessed for safety risk
  - work orders
  - workplace procedures.

## MSFFL3054 Assess flooring installation sites

### Modification History

Release 1. Supersedes and is not equivalent to MSFFL2004 Moisture test timber and concrete floors, and, MSFFL3003 Inspect sub-floors.

### Application

This unit describes the skills and knowledge required to assess and formally report on the condition of both timber and concrete subfloors and factors in the environment that may impact flooring installation.

This unit applies to all flooring technicians responsible for pre-installation inspections.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Competency Field

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Identify type of proposed floor covering and other work requirements from customer enquiry or workplace documentation

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Determine floor surface requirements for the proposed coverings from manufacturer or workplace information 1.4 Obtain and prepare tools, equipment and required materials for the work
2. Assess the installation environment	2.1 Identify aspects of the internal and external environment that may affect installation 2.2 Investigate the potential interactions between the environment and the proposed flooring 2.3 Select appropriate equipment to conduct inspections and tests
3. Assess flooring	3.1 Identify the type of floor construction materials and the building floor structure and substructure based on visual inspection 3.2 Run and check datum lines and confirm accurate dimensions 3.3 Complete required tests in accordance with the approved process and Australian Standards
4. Report findings	4.1 Accurately document relevant findings in accordance with current standards and workplace practice 4.2 Send copies of the inspection report to appropriate personnel and suitably file in accordance with workplace procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFL3054 Assess flooring installation sites

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL2004 Moisture test timber and concrete floors, and, MSFFL3003 Inspect sub-floors.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed a full internal and external site assessment and documented assessment findings for:
  - 1 timber subfloor
  - 1 concrete subfloor.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area
- pre-installation inspections:
  - workplace safety system requirements
  - work flow
  - types, characteristics, safe use, maintenance and limitations of tools and equipment
  - characteristics and requirements of subfloor preparation for different flooring types
  - type, characteristics and defects of timber and concrete subfloor structures, including the role of moisture and how it impacts installation
- how to conduct the following moisture tests on both timber and concrete subfloors in accordance with Australian Standards:
  - visual inspection for signs of moisture
  - electrical resistance moisture test on timber flooring, floor joists, bearers and stumps
  - hygrometer moisture test on concrete flooring
  - capacitance moisture test on concrete flooring
- how to conduct a flatness and falls assessment
- inspection items required for timber flooring:
  - datum line running and checking – relating to floor fall, dips, irregularities and finished floor height in relation to other floor coverings and door clearances
  - protruding nails

- loose metal and other objects
- cracked, loose, rotting or damaged boards
- insect attack
- cross-flow ventilation
- inspection items required for concrete flooring:
  - datum line running and checking
  - protruding obstacles
  - cracks or damage (identifying static versus dynamic)
  - damage to expansion joints
  - concrete surface for weakness
  - the presence of concrete sealers and/or surface treatments
  - existing floor coatings
  - oil, fats, grease, and/or detergent contamination
  - transitions to other flooring systems
  - drainage requirements including falls to drains
  - ramps
- aspects of the internal and external environment that need to be inspected in addition to the subfloor
- formats and required inclusions for inspection reports, including:
  - the type of the inspection completed
  - testing methods used
  - inspection findings
  - suggested remedies to any faults identified
  - recommendations for floor coverings or finishing.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - floors and environments for assessment
  - assessment tools, equipment and materials
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -

# MSFFL3055 Respond to complaints about flooring installations

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL3032 Inspect defective timber flooring.

## Application

This unit describes the skills and knowledge required to prepare for, carry out and report on inspections of flooring where there are issues related to defective materials or workmanship. It includes the development of proposals for remediation of faults.

This unit applies to flooring technicians who have a full suite of installation skills and knowledge in one or more areas of flooring technology, and who are only responding to complaints installations undertaken by themselves or their business.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

## Competency Field

## Unit Sector

Flooring technology

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine work requirements	1.1 Identify the nature of the flooring problem from work documentation or through consultation with the customer 1.2 Clarify and agree to the purpose, scope, formality and reporting requirements for the inspection 1.3 Consult with customer and document and agree to the need for, and

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	liability associated with, the outcome of invasive inspection techniques 1.4 Select and check tools, equipment and materials required for the inspection for suitability, serviceability and safety prior to use 1.5 Plan sequence of work to ensure efficiency and quality of outcome
2. Conduct the inspection	2.1 Identify and follow work health and safety legislative and organisational requirements 2.2 Complete initial visual and other non-invasive inspections to identify and isolate further inspection needs 2.3 Make areas which have been invasively inspected safe
3. Report on the inspection	3.1 Accurately document the report, clearly identifying the scope of the inspection, findings and suggested options for addressing the faults or findings 3.2 Present report to the customer and provide required technical clarifications 3.3 Organise follow up action based on report outcomes and recommendations.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFL3055 Respond to complaints about flooring installations

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL3032 Inspect defective timber flooring.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- conducted 2 inspections that individually or cumulatively include:
  - a report and scope of works to remediate an issue, or make alterations to a previously completed floor
  - a report that identifies a client issue and uses technical information and appropriate industry and manufacture guidelines to justify not remediating the identified client issue/s.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- key aspects of state or territory legislation, regulations, standards and codes of practice, including individual technician rights and obligations relating to:
  - workplace health and safety
  - consumer law
  - invasive inspection techniques and effects commonly experienced
- organisational customer communication standards and protocols
- organisational and site standards, requirements, policies and procedures for the inspection of floors and associated reporting
- industry and manufacturer guidelines and how they are applied in situations of defective materials or workmanship
- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- scope, format and inclusions for flooring reports, and how these may vary
- different types of faults and repair / restoration options:
  - subfloor
  - materials
  - structural
  - finishing.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - defective floors for inspection
  - work orders
  - workplace procedures
- modelling of industry operating conditions.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL3056 Polish concrete floors

### Modification History

Release 1. Supersedes and is equivalent to MSFFL3047 Polish concrete floors using planetary machines

### Application

This unit describes the skills and knowledge required to select, prepare and use floor surfacing machines and their attachments for wet or dry polishing of concrete floors. It applies to concrete cleaning and polishing operations in commercial and residential environments.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

### Competency Field

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select concrete polishing equipment	1.1 Read work documentation and identify polishing requirements and processes 1.2 Select planetary concrete grinding and/or polishing equipment and attachments consistent with the needs of the job 1.3 Check equipment for serviceability and safety, correct any faults,

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>or process for repair in accordance with workplace procedures</p> <p>1.4 Plan starting point and sequence of work to ensure efficiency and quality of work</p>
2. Clean and prepare subfloor	<p>2.1 Identify and follow work health and safety, legislative and organisational requirements</p> <p>2.2 Remove fittings, fixtures, loose debris, dirt and other items from the subfloor using suitable methods and products</p> <p>2.3 Inspect subfloor and determine the need for removal of existing adhesive, paint or other contaminants</p> <p>2.4 Safely measure and mix cleaning chemicals in required ratios in accordance with product recommendations</p> <p>2.5 Select planetary polishing machine, appropriate machine rotation speed, direction and diamond tools for removal of contaminants</p> <p>2.6 Follow machine operating procedures to remove contaminants in accordance with client specifications</p>
3. Polish the floor	<p>3.1 Follow machine operating procedures using techniques to establish a passing pattern and polish the main area to meet job specifications</p> <p>3.2 Overlap outer zones and stagger passes to achieve desired finish</p> <p>3.3 Monitor machine operation constantly to ensure motor/s are running within manufacturer's safe operational limits and no electrical faults are evident</p> <p>3.4 Polish perimeter of the designated area using edge and corner polishing equipment and appropriate attachments</p> <p>3.5 Identify excessive wear of polishing tools and exchanges or take required remedial action during the polishing process</p> <p>3.6 Buff surface with correct and effective use of buffing pads</p> <p>3.7 Clean floor area, inspect against quality requirements and rectify deficiencies</p>
4. Clean up work area and tools	<p>4.1 Check tools and equipment, and clean and store in accordance with workplace procedures</p> <p>4.2 Clean work area and dispose of rubbish of safely</p> <p>4.3 Accurately complete required workplace documentation</p>

## **Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Unit Mapping Information**

Supersedes and is equivalent to MSFFL3047 Polish concrete floors using planetary machines

## **Links**

# Assessment Requirements for MSFFL3056 Polish concrete floors

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3047 Polish concrete floors using planetary machines

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- polished 2 concrete subfloors in complete rooms
- used all of the following concrete polishing equipment:
  - single headed
  - double headed
  - planetary action
  - hand grinding and edging machines.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and use of ratios
- concrete polishing:
  - Australian Standards requirements
  - workplace safety system, including personal protective equipment
  - work flow
  - environmental protection and sustainability requirements
  - floor preparation and cleaning methods
  - fittings and fixture that need to be removed prior to polishing
  - types, characteristics, safe use, and limitations of concrete polishing equipment, including:
    - single headed, double headed and planetary action grinders and/or polishers
    - dust and/or vacuum systems
    - diamond abrasives, including half set, full set, different tool bond types
    - factors that affect the diamond wear
    - maintenance requirements for planetary machines
    - types, characteristics, uses and limitations of hand grinding and edging tools

- techniques for polishing concrete, the types of problems that may occur and how to avoid and respond
- quality indicators for finished concrete floors
- procedures and protocols for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - concrete floors for polishing
  - equipment, tools and materials to perform tasks in the Performance Evidence
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFL3057 Select and fit diamond tools for concrete surface preparation and polishing

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3048 Select and fit diamond tools for concrete surface preparation and polishing.

## Application

This unit describes the skills and knowledge required to select and fit appropriate diamond grinding and polishing tools for use in concrete floor preparation and finishing machines. It applies to concrete cleaning and polishing operations in commercial and residential environments and involves application of skills and knowledge at a sub-trade worker level.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

## Competency Field

Flooring technology

## Unit Sector

Flooring technology

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify the required concrete surface	1.1 Examine concrete surface to be prepared and polished to evaluate the level, any undulations and surface condition

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
application	<p>1.2 Establish types of grinding and polishing techniques required based on floor inspection of the job</p> <p>1.3 Determine the need for wet or dry application and any additional abrasives required</p> <p>1.4 Evaluate floor moisture test results and use results to determine the floor grinding and polishing steps for the job</p>
2. Select diamond grinding tools	<p>2.1 Identify required diamond tools and bond type for surface preparation</p> <p>2.2 Determine grit size for grinding based on job requirements</p> <p>2.3 Match segments of diamond tool and bond type to the job requirements and machine to be used for grinding</p> <p>2.4 Fit diamond tools to the planetary machine for surface preparation operations ensuring tool rotation is correct for the machine set-up</p>
3. Select floor diamond polishing tools	<p>3.1 Identify required diamond tools and bond type for surface polishing</p> <p>3.2 Determine grit size for the polishing job</p> <p>3.3 Match segments of diamond tool and bond type to the job requirements and machine to be used for polishing</p> <p>3.4 Fit diamond tools to the planetary machine for surface polishing operations ensuring tool rotation is correct for the machine set up</p>
4. Clean up work area and tools	<p>4.1 Examine all diamond tools and identify those which are able to be re-used and which are to be discarded</p> <p>4.2 Clean and store tools and equipment in accordance with workplace procedures</p> <p>4.3 Record items to be discarded in workplace documentation and make disposal in accordance with manufacturer recommendations</p> <p>4.4 Clear work area and safely remove waste</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFFL3048 Select and fit diamond tools for concrete surface preparation and polishing.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFL3057 Select and fit diamond tools for concrete surface preparation and polishing

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3048 Select and fit diamond tools for concrete surface preparation and polishing.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- selected and fit appropriate diamond grinding and polishing tools to be used in planetary action concrete finishing equipment to meet the requirements of 2 different jobs.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- concrete surface preparation and polishing:
  - Australian Standards requirements
  - environmental protection and sustainability requirements
  - equipment types:
    - full set of single or twin segments (for when a flat floor finish is required)
    - half set of single or twin segments (for when flat floor finish is not required)
  - different diamond tool applications:
    - floor flattening and removing undulation (hard, medium and soft concrete)
    - removal of surface contaminants:
      - carpet glue
      - vinyl adhesive
      - epoxy paint
    - smoothing exposed aggregate
    - grinding exposed aggregate
    - concrete surface polishing (hard, medium and soft)
    - gloss levels (high, medium and low gloss)
    - hardness of material being ground (aggregate and sand abrasiveness)
    - the grinding and/or polishing pressure
  - bond types:
    - metal
    - resin

- ceramic
- hybrid
- factors that influence wear:
  - hardness of the bond
  - diamond grit size
  - number of segments
  - presence of water
  - use of additional abrasives such as sand, silicone or carbide
  - quality of diamond tool being used
  - machine speed
  - operator experience
  - grit size
  - too small so surface contaminants, such as glue smears
  - too coarse leaving scratching and excessive diamond wear
  - bond
    - too soft, leaving machine marks and excessive diamond wear
    - too hard, resulting in glazed surface
    - not using hardest bond first
  - incorrect choice of segments could result in an uneven floor, excessive diamond consumption and overloading the planetary machine, scratches remaining in finished floor
- procedures and protocols for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - concrete surface floors for polishing
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL3058 Provide advice to customers on floor coverings

### Modification History

Release 1. Supersedes and is equivalent to MSFFL3050 Provide advice to customers on floor coverings.

### Application

This unit describes the skills and knowledge required to develop product knowledge and provide advice to customers on a range of floor coverings, including carpet and other textile, resilient, timber and laminate products.

This unit applies to any individual providing advice on floor coverings.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

### Competency Field

Flooring technology

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop and maintain knowledge of flooring products and services	1.1 Research current information on floor covering products and services from authoritative sources 1.2 Identify characteristics of floor covering products and services using available product and service documentation 1.3 Document and maintain information on floor covering products and services in a format consistent with organisational requirements 1.4 Use knowledge to improve quality within personal work areas

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Identify customer needs	2.1 Question customers in detail and use active listening to determine product and/or service requirements 2.2 Offer accurate technical and/or specialist advice to the customer to support sales activity and customer understanding and decision making 2.3 Establish customer's financial limitations and expectations for flooring product purchase 2.4 Discuss and confirm customer needs based on information gathered
3. Recommend flooring products and services	3.1 Make recommendations consistent with organisational requirements and customer needs 3.2 Promote advantages of product and organisation based on knowledge of produce features and services offered 3.3 Verify evidence in support of recommendations and present in a suitable format 3.4 Estimate impact of activities from verifiable customer feedback sources

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFFL3050 Provide advice to customers on floor coverings.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFL3058 Provide advice to customers on floor coverings

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3050 Provide advice to customers on floor coverings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- responded to 4 different customer enquiries that individually or cumulatively require provision of information on all of the following floor coverings:
  - carpet and other textile products
  - laminate
  - resilient
  - timber
- provided accurate information for each of the above enquiries that includes:
  - product characteristics and origins
  - competitive features
  - how the product matches the customer needs
  - installation techniques and requirements
  - maintenance requirements
  - cost.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legal and ethical considerations when providing advice on floor coverings, including individual responsibility under Australian consumer law
- workplace safety systems related to floor coverings and their installation
- sources and types of reliable information about different floor covering materials
- types, characteristics, uses and limitations of different floor covering materials, including installation, finishing and maintenance considerations for:
  - timber and laminate floor coverings products and services
  - resilient floor coverings products and services
  - carpet and other textile floor coverings products and services
- product and service information, including:

- availability
- competitive features
- distribution process
- origins
- price and organisational pricing policies
- organisational customer service and sales protocols and procedures for:
  - interactions with customers
  - documentation requirements.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - product information
  - customer enquiries
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL3059 Install carpet tiles

### Modification History

Release 1. Supersedes and is not equivalent to MSFFL2019 Install carpet tiles using standard installation procedures, and, MSFFL3005 Install carpet tiles using custom designs.

### Application

This unit describes the skills and knowledge required to prepare, set out, cut, lay and fix carpet tiles in single and multiple connecting rooms in both residential and commercial sites using both single and multi-directional installation methods. It includes the installation of tiles with specific design features such as patterns, motifs and logos.

This unit applies to flooring technicians installing carpet tiles in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring Technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for installation	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Read documentation and identify work requirements and process 1.3 Confirm sub-floor suitability for installation consistent with

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>Australian Standards and manufacturer recommendations</p> <p>1.4 Select suitable adhesives, trims and accessories</p> <p>1.5 Select and check tools and equipment for suitability, serviceability and safety prior to use</p> <p>1.6 Plan sequence of work, including the starting point, to ensure efficiency and quality of installation</p>
2. Set out materials	<p>2.1 Check carpet tiles to be installed against work order and acclimatise in accordance with manufacturer recommendations</p> <p>2.2 Set out carpet tiles are in accordance with design requirements</p> <p>2.3 Organise and use materials for fixing in accordance with manufacturer and safety management requirements</p> <p>2.4 Establish working lines and starting point</p>
3. Lay carpet tiles	<p>3.1 Follow instructions for application of adhesive system and sequence for laying</p> <p>3.2 Lay out materials to meet specification requirements and to minimise waste</p> <p>3.3 Match and contrast material grains and patterns as appropriate</p> <p>3.4 Clearly and accurately mark tiles for cutting</p> <p>3.5 Cut and lay tiles to required shape with minimum waste of materials</p> <p>3.6 Place and fix trims and accessories in accordance with job requirements</p> <p>3.7 Check for flaws in materials and completed installation and rectify faults</p>
4. Complete housekeeping	<p>4.1 Store and recycle unused materials in accordance with workplace procedures</p> <p>4.2 Check, clean and store tools and equipment in accordance with workplace procedures</p> <p>4.3 Clean work area and dispose of rubbish safely</p> <p>4.4 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for MSFFL3059 Install carpet tiles

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL2019 Install carpet tiles using standard installation procedures, and, MSFFL3005 Install carpet tiles using custom designs.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- performed at least 3 installations including at least 2 full spread that cover all of the following at least once, in any combination:
  - all of the following adhesive installation systems:
    - pressure sensitive adhesive
    - low adhesive
  - all of the following design features:
    - hallway with multiple connecting rooms
    - site link-up around a central core
    - custom design requirement
    - multi-directional patterns or borders.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- carpet tile installation:
  - Australian Standards requirements
  - workplace safety system requirements
  - how to access manufacturer instructions
  - environmental protection and sustainability requirements
  - work flow
- types, characteristics, uses and limitations of different carpet tiles, including:
  - backed or un-backed
  - fixed or un-fixed
  - wool
  - synthetic or combination of fibres
  - pile

- needle-punch
- tufted
- fusion bonded and woven
- modular and square to one metre
- tile of various shapes and sizes, square tile, rectangular tile and other tile shapes (hexagonal, diamond)
- characteristics and requirements of sub-floor preparation
- type, characteristics uses and limitations of different adhesives, including:
  - pressure sensitive and wet acrylics
  - water and solvent-based contacts
  - double sided tape
- types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
- techniques for set out, laying, cutting and fixing, the types of problems that may occur and how to avoid and respond
- quality indicators for completed work
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations requiring carpet tiles
  - carpet tiles and adhesive systems
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL3060 Install adhesive fixed carpet

### Modification History

Release 1. Supersedes and is equivalent to MSFFL3006 Install adhesive fixed carpet floor coverings.

### Application

This unit describes the skills and knowledge required to prepare, cut, lay, fix, join and finish, direct stick and dual-bonded carpet installations.

This unit applies to flooring technicians installing carpet in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for installation	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Consult floor inspection report to confirm suitability of floor for carpet installation 1.3 Read documentation and identify work requirements and process 1.4 Confirm sub-floor suitability for installation consistent with

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	Australian Standards and manufacturer recommendations 1.5 Select and check tools, equipment and materials for suitability, serviceability and safety prior to use 1.6 Select and prepare suitable finishing, joining and fixing materials based on job requirements 1.7 Plan sequence of work, including the starting point, to ensure efficiency and quality of installation
2. Set out materials	2.1 Check carpet to be installed against order and acclimatise in accordance with manufacturer recommendations 2.2 Check underlay and carpet to be installed against work instructions and appropriate standards 2.3 Apply appropriate primers to the subfloor
3. Lay carpet flooring	3.1 Identify and follow instructions and sequence for laying and fixing 3.2 Check underlay is cut and installed to specification 3.3 Lay out carpet pieces and check for size, direction of pile and pattern 3.4 Trim carpet to shape, and cut and seal joins in accordance with manufacturer instructions and Australian Standards 3.5 Apply adhesives in accordance with manufacturer instructions 3.6 Lay carpet in accordance with manufacturer instructions and Australian Standards 3.7 Fix cover and finishing strips suited to the type of sub-floor 3.8 Install any required protective coverings as specified 3.9 Inspect finished work for compliance with work order, workplace and Australian Standards
4. Complete housekeeping	4.1 Store and recycle unused materials in accordance with workplace procedures 4.2 Check, clean and store tools and equipment in accordance with workplace procedures 4.3 Clean work area and dispose of rubbish safely 4.4 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for MSFFL3060 Install adhesive fixed carpet

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3006 Install adhesive fixed carpet floor coverings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed the following installations in accordance with job requirements:
  - 1 direct stick carpet installation using tufted or woven carpet to connecting rooms, including at least 1 cross join and 1 seam join
  - 1 dual-bond carpet installation using tufted or woven carpet on adhesive fixed underlay to connecting rooms, including at least 1 cross join and 1 seam join using heat bond tape.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- adhesive fixed carpet installation:
  - Australian Standards requirements
  - workplace safety system requirements, including ventilation needs
  - how to access manufacturer instructions
  - environmental protection and sustainability requirements
  - work flow
  - types, characteristics, uses and limitations of different products:
    - tufted carpet
    - fusion-bonded carpet
    - woven carpet
    - needle punched carpet
    - PVC-backed carpet
    - fibrous and bonded foam underlays
  - types, characteristics uses and limitations of installation adhesives:
    - plasticised and rubber resin acrylic

- water and solvent-based adhesives
- solvent-based contact adhesive
- characteristics and requirements of sub-floor preparation
- types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
- techniques for set out, laying and cutting, the types of problems that may occur and how to avoid and respond
- quality indicators for completed work
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations requiring carpet
  - carpet
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL3061 Install commercial carpet

### Modification History

Release 1. Supersedes and is equivalent to MSFFL3007 Install commercial carpet floor coverings.

### Application

This unit describes the skills and knowledge required to install commercial grade carpet to multiple connecting rooms, large commercial areas and multi-storey buildings. It includes preparation, cutting, laying out, joining, power stretching and finishing of carpet floor coverings.

This unit applies to flooring technicians installing carpet in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

# Assessment Requirements for MSFFL3061 Install commercial carpet

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3007 Install commercial carpet floor coverings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- performed at least 3 commercial carpet installations using the carpet gripper system that cover all of the following at least once, in any combination:
  - all of the following types of carpet:
    - commercial woven
    - commercial tufted
  - all of the following designs:
    - area containing at least 3 rooms connected by a common corridor
    - an area containing at least 10 lineal metres of carpet by a minimum of 7 lineal metres in length
    - an area of a minimum of 10 lineal metres by 7 lineal metres containing a lift lobby or similar obstacle
  - 3 of each of the following techniques:
    - seam joins
    - cross joins.
    -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
  - commercial carpet installation:
    - Australian Standards requirements
    - workplace safety system requirements
    - how to access manufacturer instructions
    - environmental protection and sustainability requirements
    - work flow
    - characteristics and requirements for underlays

- types, characteristics, uses and limitations of commercial carpets
- types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
- techniques for installation in commercial spaces, the types of problems that may occur and how to avoid and respond
- quality indicators for completed work
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations requiring commercial carpet
  - commercial carpet
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.
  -

## MSFFL3062 Install patterned and custom designed carpet

### Modification History

Release 1. Supersedes and is not equivalent to MSFFL3008 Install patterned carpet floor coverings, and, MSFFL3009 Install custom design carpet and decorative finishes.

### Application

This unit describes the skills and knowledge required to set out, lay, stretch, join and finish woven and tufted carpets containing geometric, decorative and other custom designed patterns using adhesive-bonded and carpet gripper systems.

This unit applies to flooring technicians installing carpet in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

# Assessment Requirements for MSFFL3062 Install patterned and custom designed carpet

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL3008 Install patterned carpet floor coverings, and, MSFFL3009 Install custom design carpet and decorative finishes.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- performed at least 3 installations that cover all of the following at least once, in any combination:
- all of the following types of carpet:
  - woven patterned
  - tufted patterned
- all of the following designs:
  - pattern matching at seams and cross joints
  - custom design concepts including custom border
  - a motif
- all of the following installation systems:
  - dual-bond
  - adhesive bonded
  - gripper strip.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- patterned and custom design carpet installation:
  - Australian Standards requirements
  - workplace safety system requirements
  - how to access manufacturer instructions
  - environmental protection and sustainability requirements
  - work flow
  - characteristics and requirements of sub-floor preparation
  - types, characteristics, safe use, maintenance and limitations of tools, equipment and materials

- techniques for set out, laying, stretching, joining and fixing, the types of problems that may occur and how to avoid and respond
- quality indicators for completed work
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

# MSFFL3063 Install synthetic textile floor coverings to sports facilities and outdoor spaces

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3010 Install synthetic textile floor coverings to sports facilities.

## Application

This unit describes the skills and knowledge required to install synthetic synthetic turf and needle- punch floor coverings to indoor and outdoor sporting facilities and outdoor spaces, including the preparation, cutting, laying out, joining, fixing and finishing of the synthetic textile floor covering material.

This unit applies to flooring technicians installing coverings in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. # Assessment Requirements for MSFFL3063 Install synthetic textile floor coverings to sports facilities and outdoor spaces

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3010 Install synthetic textile floor coverings to sports facilities.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- installed the following in accordance with job requirements:
  - 1 synthetic turf grass to an outdoor installation, or recreational or sports area
  - 1 synthetic needle-punch to an indoor installation or recreational or sports area.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- synthetic floor covering installation in sport and outdoor spaces:
  - Australian Standards requirements
  - workplace safety system requirements
  - how to access manufacturer instructions
  - environmental protection and sustainability requirements
  - work flow
  - types of installation locations
  - characteristics and requirements of sub-floor preparation
  - types, characteristics, uses and limitations of:
    - synthetic textile and other floor coverings used in indoor and outdoor spaces and sporting facilities:
      - needle punch carpet
      - PVC-backed carpet
      - rubber-backed carpet
      - synthetic turf:
        - unfilled
        - sand filled
        - rubber filled
  - installation adhesives and their uses:

- plasticised and rubber resin acrylic
- solvent-based outdoor / grass adhesive
- two-part polyurethane
- water, solvent-based and solvent-free adhesives
- underlay and/or shock pads:
  - bonded foam
  - latex foam
  - rubber
  - styrene-butadiene rubber (SBR)
- other materials, including finishing trims, angles and joining tapes
- types, characteristics, safe use, maintenance and limitations of tools and equipment used during installation
- quality indicators for completed work
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations requiring synthetic floor covering installation
  - synthetic floor covering
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

## MSFFL3064 Install carpet to custom design stairs

### Modification History

Release 1. Supersedes and is equivalent to MSFFL3011 Install carpet floor coverings to custom design stairs.

### Application

This unit describes the skills and knowledge required to prepare, set out, cut, join and fix plain and patterned carpet to angular, curved, rounded and wrap-rounded stairs, including patterns, metal moulding and decorative finishes using adhesive-bonded and carpet gripper systems.

This unit applies to flooring technicians installing carpet in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for installation	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Read documentation and identify work requirements and process 1.3 Confirm subfloor suitability for installation consistent with Australian Standards and manufacturer recommendations

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Select and check tools, equipment and materials for suitability, serviceability and safety prior to use</p> <p>1.5 Plan sequence of work, including the starting point, to ensure efficiency and quality of installation</p>
2. Set out materials	<p>2.1 Check carpet to be installed against work order and acclimatise in accordance with manufacturer recommendations</p> <p>2.2 Measure stairway or step and accurately calculate the required amount of floor covering and underlay based on type of step</p> <p>2.3 Select suitable adhesives, gripper strips and edge strips</p> <p>2.4 Establish work lines and starting point</p> <p>2.5 Cut and install required gripper strips in accordance with Australian Standards</p> <p>2.6 Check required underlay against specified type and fit as specified in Australian Standards</p>
3. Lay carpet to stairs	<p>3.1 Identify and follow instructions and sequence for laying and fixing</p> <p>3.2 Lay out carpet floor coverings to meet allowances for type of stair requirements and to minimise waste</p> <p>3.3 Accurately measure and clearly mark carpet floor coverings for cutting</p> <p>3.4 Cut carpet floor coverings to required shape with minimum waste of materials and lay in accordance with specifications</p> <p>3.5 Use instructions, sequence, fixing methods and equipment in accordance with Australian Standards</p> <p>3.7 Check finished stairway against specification and identify and rectify any faults</p>
4. Complete housekeeping	<p>4.1 Store and recycle unused materials in accordance with workplace procedures</p> <p>4.2 Check, clean and store tools and equipment in accordance with workplace procedures</p> <p>4.3 Clean work area and dispose of rubbish safely</p> <p>4.4 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFFL3011 Install carpet floor coverings to custom design stairs.

## Links

Companion Volume implementation guides are found in VETNet -

## Assessment Requirements for MSFFL3064 Install carpet to custom design stairs

### Modification History

Supersedes and is equivalent to MSFFL3011 Install carpet floor coverings to custom design stairs.

### Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- installed at least 1 patterned tufted carpet or 1 patterned woven carpet to concrete or timber staircases in accordance with job requirements with a minimum step combination as follows:
  - bullnose step – single step
  - boxed step – single step
  - circular or kite winder – minimum of three step combination
  - open newell– minimum of three step combination
  - open tread– minimum of three step combination.
  -

### Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- stairway custom design carpet installation:
  - Australian Standards requirements
  - workplace safety system requirements
  - environmental protection and sustainability requirements
  - how to access manufacturer instructions
  - work flow
  - types of stairways and characteristics that impact carpet installation
  - characteristics of timber and concrete subfloors and their impact on installation
  - types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
  - techniques for set out, cutting, laying, joining and fixing, the types of problems that may occur with stairs and how to avoid and respond, including for:
    - open newell
    - bullnose steps

- circular
- recessed steps
- open tread
- quality indicators for completed work
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - custom design stairs
  - carpet
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL3065 Install resilient tiles

### Modification History

Release 1. Supersedes and is not equivalent to MSFFL2022 Install resilient tiles using standard installation procedures, and, MSFFL3015 Install resilient tiles using custom designs and decorative finishes.

### Application

This unit describes the skills and knowledge required to prepare, set out, cut, lay and fix resilient tiles in single and multiple connecting rooms in both residential and commercial sites using both single and multi-directional installation methods. It includes the installation of tiles with specific design features such as patterns, motifs and logos.

This unit applies to flooring technicians installing resilient tiles in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

# Assessment Requirements for MSFFL3065 Install resilient tiles

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL2022 Install resilient tiles using standard installation procedures, and, MSFFL3015 Install resilient tiles using custom designs and decorative finishes.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- installed the following resilient tiles where cutting and fixing is required, on either a timber or concrete subfloor in accordance with job requirements:
  - 1 resilient tile and/or plank installation of connecting rooms using multi-directional patterns
  - 1 resilient tile and/or plank installation that includes a 45 degree set out with borders
  - 1 resilient tile and/or plank installation that includes a custom design or feature strips.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area, angles and estimation of material requirements
- resilient tile installation:
  - Australian Standards requirements
  - workplace safety system requirements
  - environmental protection and sustainability requirements
  - how to access manufacturer instructions
  - work flow
  - characteristics and requirements of subfloor preparation
  - types, characteristics, uses and limitations of different resilient tiles, including:
    - homogenous and heterogeneous
    - linoleum
    - planks
    - rigid
    - rubber
    - semi-rigid
  - types, characteristics, uses and limitations of different adhesives, including:

- double sided tape
- pressure sensitive and wet acrylics
- water and solvent-based contacts
- two-part epoxy
- polyurethane contact adhesive
- types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
- techniques for set out, laying, cutting and fixing, the types of problems that may occur and how to avoid and respond:
  - 45 degrees set out
  - borders
  - feature strips
  - herringbone
- quality indicators for completed work
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations requiring resilient tile installation
  - resilient tiles
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL3066 Install linoleum floor coverings

### Modification History

Release 1. Supersedes and is equivalent to MSFFL3012 Install linoleum floor coverings.

### Application

This unit describes the skills and knowledge required to set out, cut and lay linoleum floor coverings in domestic and commercial installations using templating and scribing methods.

This unit applies to flooring technicians installing linoleum in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for installation	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Read documentation and identify work requirements 1.3 Confirm subfloor suitability for installation consistent with Australian Standards and manufacturer recommendations 1.4 Select adhesives, trims and accessories based on job requirements 1.5 Select and check tools, equipment and materials for suitability,

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	serviceability and safety prior to use 1.6 Plan sequence of work, including the starting point, to ensure efficiency and quality of installation 1.7 Check linoleum to be installed against work order and acclimatise in accordance with manufacturer recommendations
2. Set out materials	2.1 Identify and follow instructions and sequence for laying and fixing 2.2 Organise linoleum floor coverings for fixing and use in accordance with safety management requirements 2.3 Establish working lines and starting point 2.4 Cut required soft underlay to specification 2.5 Set out, cut and fit required pre-form fillet in accordance with specification
3. Cut materials	3.1 Lay out linoleum floor coverings to meet directional sequence, pattern match, specification requirements, minimising waste and joins 3.2 Accurately and clearly mark linoleum floor coverings for cutting 3.3 Cut linoleum floor coverings to required pattern and shape with minimum waste of materials
4. Lay linoleum	4.1 Organise and use materials for welding and fixing in accordance with safety management requirements 4.2 Use welding and fixing methods and equipment following manufacturer instructions 4.3 Set out and install resilient skirting, reducer and edge strips in accordance with job requirements 4.4 Check complete installation for flaws in installation and materials and rectify faults
5. Complete housekeeping	5.1 Store or recycle unused materials in accordance with workplace procedures 5.2 Check, clean and store tools and equipment in accordance with workplace procedures 5.3 Clean work area and dispose of rubbish safely 5.4 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for MSFFL3066 Install linoleum floor coverings

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3012 Install linoleum floor coverings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- installed the following linoleum floor coverings in accordance with job requirements:
  - pattern scribe, cut, lay and heat-welded linoleum sheet floor coverings using 32mm fillet cove in one sheet to a small area (WC, laundry including heat-welded joints
  - scribe to skirting boards, cut, flat lay and heat-welded linoleum sheet floor coverings in multiple runs
  - pattern scribe or scribe, cut, flat lay and butt join seam linoleum sheet floor coverings to one room.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- linoleum floor covering installation:
  - Australian Standards requirements
  - workplace safety system requirements
  - environmental protection and sustainability requirements
  - how to access manufacturer instructions
  - work flow
  - types, characteristics, uses and limitations of linoleum floor coverings and installation adhesives
  - characteristics and requirements of sub-floor preparation
  - types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
  - techniques for set out, layout, cutting and installation, the types of problems that may occur and how to avoid and respond, including specific linoleum heat welding techniques

- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations requiring linoleum flooring installations
  - linoleum flooring
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFL3067 Complete large scale and complex vinyl flooring installations

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL3013 Install commercial vinyl floor coverings, and, MSFFL3021 Cut and install resilient floor coverings.

## Application

This unit describes the skills and knowledge required to prepare, cut, weld, layout and fix resilient floor covering to large and potentially complex areas such as stairs, stringers and steps.

This unit applies to flooring technicians installing resilient flooring in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

# Assessment Requirements for MSFFL3067 Complete large scale and complex vinyl flooring installations

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL3013 Install commercial vinyl floor coverings, and, MSFFL3021 Cut and install resilient floor coverings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- performed at least 4 resilient floor installations – 2 using heterogeneous sheet vinyl and 2 using homogeneous sheet vinyl, that cover all of the following at least once, in any combination:
  - all of the following installation types:
    - cove installation
    - flat installation
    - stair installations with a metal stair nosing
  - all of the following characteristics:
    - pencil cove
    - cove fillet
    - border cove
    - internal and external mitred corners
    - more than two widths of vinyl
    - hallway or passage with connecting room
  - all of the following techniques:
    - trimming selvages
    - bar scribing
    - direct scribing
    - template scribing
    - under scribing
    - pattern matching
    - heat weld joins.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- resilient floor covering installation:
  - Australian Standards requirements
  - environmental protection and sustainability requirements
  - workplace safety system requirements
  - how to access manufacturer instructions
  - work flow
  - types and characteristics of large commercial areas
  - types and characteristics of different types of stairs, including:
    - box steps
    - bullnose steps
    - circular
    - kit winder treads
    - open newell
    - open tread
    - recessed steps
  - types and characteristics, uses and limitations of different resilient floor coverings:
    - homogenous and heterogeneous
    - linoleum sheet
    - encapsulated glass fibre
    - rubber sheet
  - characteristics and requirements of subfloor preparation:
    - concrete
    - timber
  - types, characteristics, uses and limitations of different adhesives, including:
    - waterbased acrylic
    - two-part epoxy
    - two-part polyurethane
    - single pack polyurethane
    - water-based and solvent-based contact adhesive
  - types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
  - techniques for set out, laying, cutting, welding and fixing, the types of problems that may occur and how to avoid and respond, including:
    - cold chemical welding
    - heat welding
    - scribing – direct and template
    - seam preparation
  - quality indicators for completed work

- procedures for the recording, reporting and maintenance of workplace records and information.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - areas to be covered as per Performance Evidence
  - resilient floor coverings
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# Assessment Requirements for MSFFL3068 Install resilient floor coverings using custom designs and decorative finishes

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3014 Install resilient floor coverings using custom designs and decorative finishes.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- cut and laid resilient floor coverings using custom designs and decorative finishes in accordance with job requirements:
  - 1 inlaid custom designed pattern including a circle design and heat welded.
  - 1 feature border coved installation with heat welded external and internal mitres
  - 1 feature welding design of a different colour to the existing floor colour.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- resilient floor covering custom design installation:
  - Australian Standards requirements
  - workplace safety system requirements
  - environmental protection and sustainability requirements
  - how to access manufacturer instructions
  - work flow
  - types, characteristics, uses and limitations of different resilient floor coverings:
    - homogenous and heterogeneous
    - linoleum sheet
    - encapsulated glass fibre
    - inlaid
  - characteristics and requirements of subfloor preparation
  - types, characteristics, uses and limitations of different adhesives, including:
    - plasticised and rubber resin acrylic
    - two-part epoxy
    - water-based and solvent-based contact adhesives

- types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
- techniques for set out, laying, cutting, welding and fixing, the types of problems that may occur and how to avoid and respond
- quality indicators for completed work
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations requiring installation of resilient sheet flooring
  - resilient sheet flooring
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL3069 Install rubber floor coverings

### Modification History

Release 1. Supersedes and is equivalent to MSFFL3016 Install rubber floor coverings.

### Application

This unit describes the skills and knowledge required to set out, cut, lay and fix rubber sheet and tile floor coverings.

This unit applies to flooring technicians installing rubber floor coverings in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for installation	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Read documentation and identify work requirements 1.3 Confirm subfloor suitability for installation consistent with Australian Standards and manufacturer recommendations 1.4 Select adhesives, trims and accessories based on job requirements 1.5 Select and check tools, equipment and materials for suitability,

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>serviceability and safety prior to use</p> <p>1.6 Plan sequence of work, including the starting point, to ensure efficiency and quality of installation</p> <p>1.7 Check rubber floor covering against order and acclimatise in accordance with manufacturer recommendations</p>
2. Set out materials	<p>2.1 Identify and follow instructions and sequence for laying and fixing</p> <p>2.2 Organise and use rubber floor coverings for fixing in accordance with safety management requirements</p> <p>2.3 Establish working lines and starting point.</p>
3. Lay resilient floor covering	<p>3.1 Lay out rubber floor coverings to meet directional sequence, pattern match, specification requirements, minimising waste and joins</p> <p>3.2 Accurately and clearly mark rubber flooring materials for cutting</p> <p>3.3 Cut rubber floor covering materials to required shape ensuring minimum waste</p> <p>3.4 Prepare adhesives and edge strips and/or accessories for use as required</p> <p>3.5 Use fixing methods and equipment in accordance with manufacturer recommendations</p> <p>3.6 Inspect finished job and rectify any imperfections in accordance with workplace procedures</p>
4. Complete housekeeping	<p>4.1 Store and recycle unused materials in accordance with workplace procedures</p> <p>4.2 Check, clean and store tools and equipment in accordance with workplace procedures</p> <p>4.3 Clean work area and dispose of rubbish safely</p> <p>4.4 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFFL3016 Install rubber floor coverings.

# Assessment Requirements for MSFFL3069 Install rubber floor coverings

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3016 Install rubber floor coverings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- installed the following rubber floors in accordance with job requirements:
  - 1 epoxy rubber tile installation to connecting rooms
  - 1 polyurethane rubber sheet installation to connecting rooms.

## Knowledge Evidence

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- rubber floor covering installation:
  - Australian Standards requirements
  - workplace safety system requirements
  - environmental protection and sustainability requirements
  - how to access manufacturer instructions
  - work flow
  - type, characteristics, uses and limitations of:
    - rubber floor covering including, sheet and tile, smooth and studded
    - installation adhesives including, two-part epoxy, acrylic, contact
    - trims and accessories
  - characteristics and requirements of subfloor preparation
  - types, characteristics, safe use, maintenance and limitations of tools and equipment
  - techniques for set out, laying and cutting, the types of problems that may occur and how to avoid and respond
  - quality indicators for completed work
- procedures for the recording, reporting and maintenance of workplace records and information.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations requiring rubber flooring installations
  - rubber flooring
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL3070 Install resilient sheet to walls

### Modification History

Release 1. Supersedes and is not equivalent to MSFFL2010 Prepare walls for coverings, and, MSFFL3017 Install resilient sheet to walls.

### Application

This unit describes the skills and knowledge required to prepare walls and install resilient sheet to dry and wet walls.

This unit applies to flooring technicians installing resilient sheet to walls in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

# Assessment Requirements for MSFFL3070 Install resilient sheet to walls

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL2010 Prepare walls for coverings, and, MSFFL3017 Install resilient sheet to walls.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed the following in accordance with job requirements:
  - 1 patch and repair to a wall, including internal and external corners
  - 1 skim coat to walls, including internal and external corners
  - 1 installation of a wet room resilient wall covering using a horizontal installation system with heat-welded joints, including internal and external corners to walls, the covering of window reveals, and sealing to door frames and fittings
  - 1 installation of a wet room resilient wall covering using a vertical installation system with heat-welded joints, including internal and external corners to walls, the covering of window reveals and sealing to door frames and fittings
  - 1 installation of resilient tile and/or planks to walls.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- resilient wall covering installation:
  - Australian Standards requirements
  - workplace safety system requirements
  - environmental protection and sustainability requirements
  - how to access manufacturer instructions
  - work flow
  - types, characteristics, uses and limitations of resilient wall coverings:
    - encapsulated glass fibre
    - homogeneous and heterogeneous
    - linoleum sheet
  - characteristics and techniques for substrate preparation for wall coverings, including for:

- concrete
- cement rendered
- fibrous cement board
- medium and high-density fibreboard (MDF/HDF) hard underlay
- ply sheeting
- types, characteristics, uses and limitations of:
  - primers, repairing and smoothing cement-based compounds
  - adhesives including acrylic, water and solvent-based
- types, characteristics, uses and limitations of different profiles
  - internal and external angles
  - bullnoses
  - coves
  - profiling to pipe work
- types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
- techniques for set out, laying, cutting fixing and finishing, the types of problems that may occur and how to avoid and respond:
  - abraiding and fusing
  - feathering - fitment of PVC edge fillet diminishing strip and the use of pre-mixed or mixed cementitious compounds
  - sealing
  - trimming
  - welding including heat and cold chemical
- quality indicators for completed work
- procedures for the recording, reporting and maintenance of workplace records and information.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations requiring rubber flooring installations
  - rubber flooring
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFL3071 Install anti-static and conductive resilient floor coverings

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL3019 Install anti-static resilient floor coverings, and, MSFFL3020 Install conductive resilient floor coverings.

## Application

This unit describes the skills and knowledge required to prepare, cut, lay and fix anti-static and conductive resilient floor coverings using specialised techniques in residential or commercial properties.

This unit applies to flooring technicians installing floor coverings in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Flooring technology

## Elements and Performance Criteria

# Assessment Requirements for MSFFL3071 Install anti-static and conductive resilient floor coverings

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL3019 Install anti-static resilient floor coverings, and, MSFFL3020 Install conductive resilient floor coverings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed the following installations in accordance with job requirements:
  - 1 anti-static resilient floor installation using a conductive acrylic adhesive system
  - 1 installation of a static conductive resilient floor covering with an isolating layer and using conductive adhesive and earthing strip.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- anti-static and conductive resilient floor covering installation:
  - Australian Standards requirements
  - workplace safety system requirements
  - environmental protection and sustainability requirements
  - how to access manufacturer instructions
  - work flow
  - characteristics and requirements of subfloor preparation
- types, characteristics, uses and limitations of:
  - anti-static and resilient flooring with a resistance rating from 108 to 1010 ohms
  - static conductive covering with a resistance reading of 10 4 to 10 8 using a copper grid and isolating layer
- types, characteristics, safe use, maintenance and limitations of tools and equipment
- types, characteristics, uses and limitations of:
  - adhesives including acrylic, conductive acrylic
  - copper earthing strips
  - tapes
  - trims and accessories

- techniques for set out, laying, cutting and fixing, the types of problems that may occur and how to avoid and respond
- quality indicators for completed work
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations requiring installation of anti-static and conductive resilient floor coverings
  - anti-static and conductive resilient floor coverings
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFL3072 Mix and apply thin-film rollcoat resin flooring systems

## Modification History

Release 1. New unit.

## Application

This unit describes the skills and knowledge required to prepare and apply thin-film rollcoat resin flooring systems.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Flooring technology

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Identify and follow work health and safety legislative, and organisational requirements 1.2 Correctly interpret work orders and confirm job requirements 1.3 Select and check tools and equipment for suitability, serviceability and safety prior to use 1.4 Plan application with respect to specified film thickness and/or consumption, cutting in, boundaries, seams, joints and exit points

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Prepare substrate	<p>2.1 Inspect condition of the mechanically prepared subfloor and confirm suitability for required finish consistent with manufacturer recommendations</p> <p>2.2 Remove dust and debris from the substrate prior to application, and control sources</p>
3. Set out work area	<p>3.1 Establish mixing area in suitable area and select surface protection measures and apply to areas not being coated</p> <p>3.2 Check coating materials for correct quantities, undamaged packaging and no obvious discrepancies in colour and viscosity</p> <p>3.3 Select suitable masking tape and correctly apply to mark off edges, transitions and other floor boundaries</p>
4. Prepare rollcoat system	<p>4.1 Correctly fit personal protective equipment (PPE) before coating materials are handled</p> <p>4.2 Accurately measure and mix component quantities in accordance with supplier instructions</p>
5. Apply rollcoat system	<p>5.1 Apply mixed basecoat in accordance with supplier application notes</p> <p>5.2 Prepare cured basecoat for topcoat application in accordance with supplier application notes</p> <p>5.3 Apply mixed topcoat in accordance with supplier application notes</p> <p>5.4 Check coating applications for quality at each stage and rectify any deficiencies</p>
6. Complete housekeeping	<p>6.1 Check, clean and store tools and equipment in accordance with workplace procedures</p> <p>6.2 Seal and store unused coating materials in accordance with supplier instructions</p> <p>6.3 Clean work area and dispose of rubbish safely</p> <p>6.4 Accurately complete required workplace and project documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFFL3072 Mix and apply thin-film rollcoat resin flooring systems

## Modification History

Release 1. New unit.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- applied 3 separate thin-film rollcoat resin flooring systems in accordance with job requirements:
  - 1 to an area of at least 10m<sup>2</sup>
  - 1 to an area of more than 10m<sup>2</sup>
  - 1 to an area of more than 50m<sup>2</sup>
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- key aspects of state or territory legislation, regulations, standards and codes of practice, including individual technician rights and obligations relating to:
  - workplace health and safety
  - consumer law
  - environmental protection and sustainable use of materials
  - how to access supplier instructions
- types, characteristics, uses and limitations of thin-film rollcoat flooring systems
- mathematical procedures for estimation and measurement, including calculation of area and use of ratios for mixing
- types, uses and limitations of tools and equipment used in thin-film applications
- characteristics and requirements of suitable substrate preparation, including different methods and products used to profile, repair, prime and clean
- the features and layout of an effective mixing area
- taping techniques to protect surfaces that aren't to be coated, including walls, edges, transitions and boundaries on the floor.
- personal protective equipment (PPE) and correct usage
- techniques for the following, the types of problems that may occur and how to avoid and respond:
  - measuring out and mixing thin-film rollcoat flooring systems, including pigment, fillers and stir-in additives

- applying thin-film rollcoat flooring systems, including cutting in, brushing, spreading with a squeegee and rolling
- characteristics and requirements of suitable preparation between coats
- quality indicators for finished flooring system
- cleaning and storage procedures for PPE, tools, equipment and unused materials
- disposal procedures for waste materials
- requirements and protocols for recording, reporting and maintaining workplace records and information.
- 

## Assessment Conditions

The following aspects of the Performance Evidence must have been demonstrated and directly observed by the assessor in the workplace or in a simulated environment that reflects workplace conditions and contingencies:

- application of a thin-film rollcoat resin flooring system to an area of at least 10m<sup>2</sup>.

Remaining aspects of the Performance Evidence may be demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies but there is no requirement for direct observation by the assessor.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations requiring thin-film rollcoat resin flooring
  - work orders
  - tools and equipment to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# Assessment Requirements for MSFFL3073 Mix and apply thin-film broadcast resin flooring systems

## Modification History

Release 1. New unit.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- applied the following range of thin-film broadcast flooring systems in accordance with job requirements:
  - 1 flake flooring system to an area of at least 10m<sup>2</sup>
  - 1 flake flooring system to an area of more than 10m<sup>2</sup>
  - 1 non-slip flooring system to an area of more than 10m<sup>2</sup>
  - 1 broadcast flooring system (flake or non-slip) to an area of more than 50m<sup>2</sup>.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- key aspects of state or territory legislation, regulations, standards and codes of practice, including individual technician rights and obligations relating to:
  - workplace health and safety
  - consumer law
  - environmental protection and sustainable use of materials
- how to access supplier application notes
- types, characteristics, uses and limitations of broadcast flooring systems
- mathematical procedures for estimation and measurement, including calculation of area and use of ratios for mixing
- types, uses and limitations of tools and equipment used in broadcast applications
- characteristics and requirements of suitable substrate preparation, including different methods and products used to profile, repair, prime and clean
- the features and layout of an effective mixing area
- taping techniques to protect surfaces that aren't to be coated, including walls, edges, transitions and boundaries on the floor
- personal protective equipment (PPE) and correct usage
- techniques for the following, the types of problems that may occur and how to avoid and respond:
  - measuring out and mixing broadcast flooring systems, including aggregate, pigment, fillers and stir-in additives

- applying thin-film broadcast flooring systems, including broadcasting, cutting in, brushing, spreading with a squeegee and rolling
- characteristics and requirements of suitable preparation between coats
- quality indicators for finished flooring system
- cleaning and storage procedures for PPE, tools, equipment and unused materials
- disposal procedures for waste materials
- requirements and protocols for recording, reporting and maintaining workplace records and information.
- 

## Assessment Conditions

The following aspects of the Performance Evidence must have been demonstrated and directly observed by the assessor in the workplace or in a simulated environment that reflects workplace conditions and contingencies:

- application of a flake flooring system to an area of at least 10m<sup>2</sup>.

Remaining aspects of the Performance Evidence may be demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies but there is no requirement for direct observation by the assessor.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations requiring broadcast flooring
  - work orders
  - tools and equipment to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFL3074 Mix and apply self-levelling resin flooring systems

## Modification History

Release 1. New unit.

## Application

This unit describes the skills and knowledge required to prepare and apply self-levelling flooring systems.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Flooring technology

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for the work	1.1 Identify and follow work health and safety, legislative, and organisational requirements 1.2 Correctly interpret work orders and confirm job requirements 1.3 Check tools and equipment prior to use to ensure suitability, condition and safety 1.4 Plan application with respect to specified film thickness and/or consumption, cutting in, boundaries, seams, joints and exit points

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Prepare the substrate	<p>2.1 Inspect condition of the mechanically prepared subfloor and confirm suitability for required finish consistent with manufacturer recommendations</p> <p>2.2 Remove dust and debris from the substrate prior to application, and control sources</p>
3. Set out work area	<p>3.1 Establish mixing area in suitable area and select surface protection measures and apply to areas not being coated</p> <p>3.2 Check coating materials for correct quantities, undamaged packaging and no obvious discrepancies in colour and viscosity</p> <p>3.3 Select suitable masking tape and correctly apply to mark off edges, transitions and other floor boundaries</p>
4. Prepare self-levelling system	<p>4.1 Correctly fit personal protective equipment (PPE) before coating materials are handled</p> <p>4.2 Accurately measure component quantities and mix in accordance with supplier instructions.</p>
5. Apply self-levelling system	<p>5.1 Apply mixed primer in accordance with supplier application notes</p> <p>5.2 Suitably prepare cured primer in accordance with supplier application notes in readiness for self-level application</p> <p>5.3 Apply mixed self-level in accordance with supplier's application notes</p> <p>5.4 Check coating applications for quality at each stage and rectify any deficiencies</p>
6. Complete housekeeping	<p>6.1 Check, clean and store tools and in accordance with workplace procedures</p> <p>6.2 Seal and store unused coating materials in accordance with supplier instructions</p> <p>6.3 Clean work area and dispose of rubbish safely</p> <p>6.4 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for MSFFL3074 Mix and apply self-levelling resin flooring systems

## Modification History

Release 1. New unit.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- applied 3 separate self-levelling flooring systems in accordance with job requirements:
  - 1 to an area of at least 10m<sup>2</sup>
  - 1 to an area of more than 10m<sup>2</sup>
  - 1 to an area of more than 20m<sup>2</sup>.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- key aspects of state or territory legislation, regulations, standards and codes of practice, including individual technician rights and obligations relating to:
  - workplace health and safety
  - consumer law
  - environmental protection and sustainable use of materials
- how to access supplier application instructions
- types, characteristics, uses and limitations of self-levelling flooring systems
- mathematical procedures for estimation and measurement, including calculation of area and use of ratios for mixing
- types, uses and limitations of tools and equipment used in self-levelling applications
- characteristics and requirements of suitable substrate preparation, including different methods and products used to profile, repair, prime and clean
- the features and layout of an effective mixing area
- taping techniques to protect surfaces that aren't to be coated, including walls, edges, transitions and boundaries on the floor
- personal protective equipment (PPE) and correct usage
- techniques for the following, the types of problems that may occur and how to avoid and respond:
  - measuring out and mixing thin-film rollcoat flooring systems (primer) and self-levelling flooring systems, including pigment, fillers and stir-in additives
  - applying self-levelling flooring systems, including cutting in, trowelling and spike rolling

- characteristics and requirements of suitable preparation between coats
- quality indicators for finished flooring system
- cleaning and storage procedures for PPE, tools, equipment and unused materials
- disposal procedures for waste materials
- requirements and protocols for recording, reporting and maintaining workplace records and information.
- 

## Assessment Conditions

The following aspects of the Performance Evidence must have been demonstrated and directly observed by the assessor in the workplace or in a simulated environment that reflects workplace conditions and contingencies:

- application of a self-levelling flooring system to an area of at least 10m<sup>2</sup>.

Remaining aspects of the Performance Evidence may be demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies but there is no requirement for direct observation by the assessor.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations requiring self-levelling flooring applications
  - work orders
  - tools and equipment to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# Assessment Requirements for MSFFL3075 Mix and apply trowel-applied resin flooring systems

## Modification History

Release 1. New unit.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- applied the following range of trowel-applied flooring systems in accordance with job requirements
  - 1 to an area of at least 10m<sup>2</sup>
  - 1 to screed an area of more than 10m<sup>2</sup>
  - 1 to slurry coat an area of more than 10m<sup>2</sup>
  - 1 to re-grade an area of more than 10m<sup>2</sup>
  - 1 slurry broadcast system.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- key aspects of state or territory legislation, regulations, standards and codes of practice, including individual technician rights and obligations relating to:
  - workplace health and safety
  - consumer law
  - environmental protection and sustainable use of materials
- how to access supplier instructions
- types, characteristics, uses and limitations of trowel-applied flooring systems
- mathematical procedures for estimation and measurement, including calculation of area and use of ratios for mixing
- types, uses and limitations of tools and equipment used in self-levelling applications
- characteristics and requirements of suitable substrate preparation, including different methods and products used to profile, repair, prime and clean
- the features and layout of an effective mixing area
- taping techniques to protect surfaces that aren't to be coated, including walls, edges, transitions and boundaries on the floor
- personal protective equipment (PPE) and correct usage
- techniques for the following, the types of problems that may occur and how to avoid and respond:

- measuring out and mixing trowel-applied flooring systems, including pigment, fillers and stir-in additives
- applying trowel-applied flooring systems, including screeding, setting floor heights and finishing
- applying a slurry broadcast system
- characteristics and requirements of suitable preparation between coats
- quality indicators for finished flooring system
- cleaning and storage procedures for PPE, tools, equipment and unused materials
- disposal procedures for waste materials
- requirements and protocols for recording, reporting and maintaining workplace records and information.
- 

## Assessment Conditions

The following aspects of the Performance Evidence must have been demonstrated and directly observed by the assessor in the workplace or in a simulated environment that reflects workplace conditions and contingencies:

- application of a trowel-applied resin flooring system to an area of at least 10m<sup>2</sup>.

Remaining aspects of the Performance Evidence may be demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies but there is no requirement for direct observation by the assessor.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations requiring trowel-applied flooring applications
  - work orders
  - tools and equipment to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - workplace procedures.

The assessor must directly observe the mixing and application of the flooring system to a complete area of at least 10m<sup>2</sup>.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFL3076 Mix and apply high-build decorative resin flooring systems

## Modification History

Release 1. New unit.

## Application

This unit describes the skills and knowledge required to prepare and apply high-build decorative flooring systems.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Flooring technology

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for the work	1.1 Identify and follow work health and safety, legislative, and organisational requirements 1.2 Correctly interpret work orders and confirm job requirements 1.3 Select and check tools and equipment for suitability, serviceability and safety prior to use 1.4 Plan application with respect to specified film thickness and/or consumption, cutting in, boundaries, seams, joints and exit points

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Prepare the substrate	<p>2.1 Inspect condition of the mechanically prepared subfloor and confirm suitability for required finish consistent with supplier recommendations</p> <p>2.2 Remove dust and debris from the substrate prior to application, and control sources</p>
3. Set out work area	<p>3.1 Establish mixing area in suitable area and select surface protection measures and apply to areas not being coated</p> <p>3.2 Check coating materials for correct quantities, undamaged packaging and no obvious discrepancies in colour and viscosity</p> <p>3.3 Select suitable masking tape and correctly apply to mark off edges, transitions and other floor boundaries</p>
4. Prepare high-build decorative system	<p>4.1 Correctly fit personal protective equipment (PPE) before coating materials are handled</p> <p>4.2 Accurately measure component quantities and mix in accordance with supplier instructions.</p>
5. Apply high-build decorative system	<p>5.1 Apply mixed basecoat in accordance with supplier application notes</p> <p>5.2 Prepare cured basecoat for topcoat application in accordance with supplier application notes</p> <p>5.3 Apply mixed topcoat in accordance with supplier application notes</p> <p>5.4 Check coating applications for quality at each stage and rectify any deficiencies</p>
6. Complete housekeeping	<p>6.1 Check, clean and store tools and equipment in accordance with workplace procedures</p> <p>6.2 Seal and store unused coating materials in accordance with supplier instructions</p> <p>6.3 Clean work area and dispose of rubbish safely</p> <p>6.4 Accurately complete required workplace and project documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for MSFFL3076 Mix and apply high-build decorative resin flooring systems

## Modification History

Release 1. New unit.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- applied 3 separate high-build decorative resin flooring systems in accordance with job requirements:
  - 1 to an area of at least 10m<sup>2</sup>
  - 1 to an area of more than 10m<sup>2</sup>
  - 1 to an area of more than 20m<sup>2</sup>.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- key aspects of state or territory legislation, regulations, standards and codes of practice, including individual technician rights and obligations relating to:
  - workplace health and safety
  - consumer law
  - environmental protection and sustainable use of materials
- how to access supplier instructions
- types, characteristics, uses and limitations of high-build decorative flooring systems
- mathematical procedures for estimation and measurement, including calculation of area and use of ratios for mixing
- types, uses and limitations of tools and equipment used in high-build decorative applications
- characteristics and requirements of suitable substrate preparation, including different methods and products used to profile, repair, prime and clean
- the features and layout of an effective mixing area
- taping techniques to protect surfaces that aren't to be coated, including walls, edges, transitions and boundaries on the floor
- personal protective equipment (PPE) and correct usage
- techniques for the following, the types of problems that may occur and how to avoid and respond:

- measuring out and mixing high-build flooring systems, including pigment, fillers and stir-in additives
- applying high-build decorative flooring systems, including cutting in, brushing, spreading with a squeegee, rolling and pigment blending/manipulation
- characteristics and requirements of suitable preparation between coats
- quality indicators for finished flooring system
- cleaning and storage procedures for PPE, tools, equipment and unused materials
- disposal procedures for waste materials
- requirements and protocols for recording, reporting and maintaining workplace records and information.
- 

## Assessment Conditions

The following aspects of the Performance Evidence must have been demonstrated and directly observed by the assessor in the workplace or in a simulated environment that reflects workplace conditions and contingencies:

- application of high-build decorative resin flooring system to an area of at least 10m<sup>2</sup>.

Remaining aspects of the Performance Evidence may be demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies but there is no requirement for direct observation by the assessor.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations requiring high-build decorative flooring applications
  - work orders
  - tools and equipment to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - workplace procedures.

The assessor must directly observe the mixing and application of the flooring system to a complete area of at least 10m<sup>2</sup>.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFL3077 Prepare subfloors for resin flooring systems

## Modification History

Release 1. New unit.

## Application

This unit describes the skills and knowledge required to prepare and repair subfloors in preparation for the installation of resin flooring systems. It includes patching, floor levelling, in-fills, dynamic cracks, joints, coving and priming to strengthen weak slabs.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Flooring technology

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for the work	1.1 Identify and follow work health and safety, legislative, and organisational requirements 1.2 Correctly interpret work orders and confirm job requirements 1.3 Select and check tools and equipment for suitability, serviceability and safety prior to use 1.4 Plan application with respect to order of repairs, material

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	consumption, height of coves boundaries, joints and exit points
2. Prepare subfloors	<p>2.1 Inspect condition of the substrate and confirm suitability for required repair consistent with supplier recommendations</p> <p>2.2 Select and safely use equipment and machinery for required cutting and removal</p> <p>2.3 Remove dust and debris from the substrate prior to application, and control sources</p>
3. Set out work area	<p>3.1 Establish mixing area in suitable area and select surface protection measures and apply to areas not being coated</p> <p>3.2 Check materials for correct quantities, undamaged packaging and no obvious discrepancies in colour and viscosity</p> <p>3.3 Select suitable masking tape and correctly apply to mark off edges, transitions and other floor boundaries</p>
4. Prepare subfloor repair system	<p>4.1 Correctly fit personal protection equipment (PPE) before coating materials are handled</p> <p>4.2 Accurately measure and mix component quantities in accordance with supplier instructions.</p>
5. Apply subfloor repair system	<p>5.1 Apply mixed priming and repair materials in accordance with supplier application notes</p> <p>5.2 Manipulate, measure and cut materials using appropriate tools and in accordance with project requirements</p> <p>5.3 Check repair applications for quality at each stage and rectify any deficiencies</p>
6. Complete housekeeping	<p>6.1 Check, clean and store tools and equipment in accordance with workplace procedures</p> <p>6.2 Seal and store unused materials in accordance with supplier instructions</p> <p>6.3 Clean work area and dispose of rubbish safely</p> <p>6.4 Accurately complete required workplace and project documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for MSFFL3077 Prepare subfloors for resin flooring systems

## Modification History

Release 1. New unit.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed the following:
  - 2 patch repairs – patch chipped concrete and static crack repairs to feather edge
  - 2 floor levelling repairs – ramp at door transition and falls to drain
  - 2 in-fills – rebuild expansion joint and install a floor waste
  - 2 crack repairs – chase out, overfill, grind back and infill, sawcut and caulk sealant
  - 2 coves – install arrowhead coving system and smooth edge cove
  - 1 primer to strengthen weak or porous substrate.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- key aspects of state or territory legislation, regulations, standards and codes of practice, including individual technician rights and obligations relating to:
  - workplace health and safety
  - consumer law
  - environmental protection and sustainable use of materials
- how to access supplier instructions
- mathematical procedures for estimation and measurement, including calculation of area, volumes and use of ratios for mixing
- types, uses and limitations of tools and equipment used in substrate repair
- characteristics and requirements of suitable subfloor preparation, including different methods and products used to profile, repair, prime and clean
- the features and layout of an effective mixing area
- taping techniques to protect surfaces that aren't to be coated, including walls, edges, transitions and boundaries on the floor
- personal protective equipment (PPE) and correct usage
- techniques for the following, the types of problems that may occur and how to avoid and respond:

- measuring out and mixing substrate repair systems, including pigment, fillers and/or aggregate and stir-in additives
- applying floor levelers, including brushing, rolling, raking and troweling
- identifying when and how to apply a suitable resin primer to strengthen up a weak or porous substrate
- applying in-fills, including brushing, trowelling and finishing
- applying dynamic crack repair systems, including concrete cutting, trowelling and caulking
- applying joint repair systems, including concrete cutting, jackhammering, trowelling and caulking
- applying coving, including brushing, trowelling, coving and finishing
- quality indicators for repaired substrate
- cleaning and storage procedures for PPE, tools, equipment and unused materials
- disposal procedures for waste materials
- requirements and protocols for recording, reporting and maintaining workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - subfloors requiring repairs as outlined in the Performance Evidence
  - work orders
  - tools and equipment to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - workplace procedures.

The assessor must directly observe each type of repair being made on at least one occasion.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL3078 Install direct stick timber flooring

### Modification History

Release 1. Supersedes and is equivalent to MSFFL3031 Install direct stick timber flooring.

### Application

This unit describes the skills and knowledge required to set out, cut, lay and fix pre-finished, engineered or solid direct stick timber flooring within a space to a hard underlay base or subfloor.

This unit applies to flooring technicians installing timber flooring in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Correctly identify work requirements and process from review of documentation 1.3 Confirm subfloor suitability for installation consistent with Australian Standards and manufacturer recommendations

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Select underlays adhesives, trims and accessories based on job requirements</p> <p>1.5 Select and check tools, equipment and materials prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition</p> <p>1.6 Plan sequence of work, including the starting point, to ensure efficiency and quality of installation.</p>
2. Set out materials for installation	<p>2.1 Check flooring against work order and acclimatise in accordance with manufacturer recommendations</p> <p>2.2 Organise pre-finished, engineered or direct stick timber flooring for fixing and use in accordance with relevant safety management requirements</p> <p>2.3 Remove or undercut skirting boards or cover trims, if required, and store for re-fitting or send for machining in accordance with job requirements</p> <p>2.4 Prepare required adhesives and accessories for use in accordance with manufacturer instructions</p> <p>2.5 Establish working lines and starting point</p>
3. Prepare and cut flooring	<p>3.1 Follow instructions and sequence for laying and fixing</p> <p>3.2 Lay appropriate underlay in accordance with manufacturer recommendations</p> <p>3.3 Lay out flooring to meet directional sequence, pattern match, specification requirements, and minimising waste and joints</p> <p>3.4 Maximise the aesthetics of materials, where appropriate, by matching grains and colours</p> <p>3.5 Accurately and clearly mark flooring for cutting</p> <p>3.6 Cut timber flooring to length and size for final laying ensuring minimum waste.</p>
4. Lay flooring	<p>4.1 Organise materials for fixing and use in accordance with safety management requirements</p> <p>4.2 Prepare required adhesives and accessories for use</p> <p>4.3 Use fixing methods and equipment in accordance with manufacturer recommendations</p> <p>4.4 Allow appropriate field and perimeter expansion joints</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>4.5 Fit and/or re-fit skirting boards or cover trims and finish in accordance with job requirements</p> <p>4.6 Inspect finished job and rectify any imperfections in accordance with workplace procedures</p>
5. Complete housekeeping	<p>5.1 Store and recycle unused materials in accordance with workplace procedures</p> <p>5.2 Check, clean and store tools and equipment in accordance with workplace procedures</p> <p>5.3 Clean work area and dispose of rubbish safely</p> <p>5.4 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

## Unit Mapping Information

Supersedes and is equivalent to MSFFL3031 Install direct stick timber flooring.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFL3078 Install direct stick timber flooring

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3031 Install direct stick timber flooring.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed 3 installations of solid timber product to complete rooms in accordance with job requirements, with at least 1 of each of the following:
  - direct stick to timber
  - direct stick to concrete.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- direct stick timber flooring:
  - Australian Standards requirements
  - workplace safety system requirements
  - work flow
  - environmental protection and sustainability requirements
  - how to access manufacturer instructions
  - types, characteristics, uses and limitations of:
    - direct stick timber flooring
    - installation adhesives, including polyvinyl alcohol (PVA), epoxies, polyurethane elastomeric
  - characteristics and requirements of subfloor preparation
  - types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
  - techniques for set out, laying, cutting and fixing, the types of problems that may occur and how to avoid and respond, including basic wood working techniques
  - quality indicators for completed work
- procedures and protocols for the recording, reporting and maintenance of workplace records and information.

- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - location requiring direct stick timber installation
  - direct stick timber
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.
  -

# MSFFL3079 Adapt and apply custom designs to timber flooring

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3029 Adapt and apply custom designs to timber flooring.

## Application

This unit describes the skills and knowledge required prepare and present a range of design solutions to fulfill a design brief, including the interpretation of technical drawings, design schedules, and the adaption of installation systems and materials to provide solutions to environmental issues.

This unit applies to flooring technicians.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Flooring technology

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select and adapt the design	1.1 Determine parameters of client design concept from documentation or interaction with the client 1.2 Match client design concept with available custom designs and select the preferred design 1.3 Confirm subfloor suitability for installation consistent with Australian Standards and manufacturer recommendations 1.4 Adapt design concept to suit the site conditions
2. Select materials	2.1 Use budget and availability constraints to identify realistic material

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>options</p> <p>2.2 Analyse timber options on the basis of durability, longevity, aesthetics, manufacturer recommendations and client expectations</p> <p>2.3 Select most appropriate material options and incorporate into the job specification</p>
3. Select the installation system and finishing technique	<p>3.1 Identify and analyse effects of finishing materials on the final appearance of the design</p> <p>3.2 Identify environmental and site conditions that may create limitations or restrictions on the installation systems available</p> <p>3.3 Identify effects of the finishing technique on the final appearance of the design</p> <p>3.4 Select finishing techniques and materials which best complement the design aesthetics and incorporate into the job specification</p>
4. Finalise the job specification	<p>4.1 Finalise job specifications covering working drawings, material specifications and costs</p> <p>4.2 Obtain client approval for the job specification</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

## Unit Mapping Information

Supersedes and is equivalent to MSFFL3029 Adapt and apply custom designs to timber flooring.

## Links

# Assessment Requirements for MSFFL3079 Adapt and apply custom designs to timber flooring

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3029 Adapt and apply custom designs to timber flooring.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- adapted 2 custom designs for timber flooring, including the preparation of detailed job specifications.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- types, characteristics, uses and limitations of commonly used flooring timbers in relation to:
  - colour
  - texture
  - hardness
  - workability
  - compatibility
  - endurance
- types, characteristics, uses, limitations and effects on timber of finishing materials
- availability and costs of flooring timbers
- manual and computer aided drawing techniques.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - product information

- customer requirements
- drawing materials – manual and/or computer-aided
- workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL3080 Install timber flooring materials to stairs

### Modification History

Release 1. Supersedes and is equivalent to MSFFL3030 Cut and install timber flooring materials to stairs.

### Application

This unit describes the skills and knowledge required to prepare, set out, cut and lay timber flooring materials to stairs and steps.

This unit applies to flooring technicians installing timber to stairs in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare materials for installation	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Correctly identify work requirements and process from review of documentation 1.3 Confirm subfloor suitability for installation consistent with Australian Standards and manufacturer recommendations

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Measure stairway or steps and accurately calculate the required amount flooring materials</p> <p>1.5 Select adhesives, trims and accessories based on job requirements</p> <p>1.6 Select tools and equipment and check prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition</p> <p>1.7 Plan sequence of work, including a starting point, to ensure efficiency and quality of installation</p>
2. Set out materials for installation	<p>2.1 Check timber flooring against work order and acclimatise in accordance with manufacturer recommendations</p> <p>2.2 Use materials in accordance with safety management requirements</p> <p>2.3 Establish working lines and starting point</p>
3. Lay out flooring material	<p>3.1 Follow instructions and sequence for laying and fixing</p> <p>3.2 Lay out materials to meet specifications and minimise waste</p> <p>3.3 Maximise the aesthetics of the materials, including matching grains and colours</p> <p>3.4 Check required underlay against specified type, manufacturer recommendations and fittings</p> <p>3.5 Carry out any remedial work to stairway to ensure finished stairway is consistent with guidelines set out in relevant standards, codes and guidelines</p>
4. Install flooring material	<p>4.1 Cut flooring materials in accordance with workplace procedures</p> <p>4.2 Install required underlay in accordance with manufacturer recommendations</p> <p>4.3 Use fixing methods and equipment in accordance with manufacturer recommendations and safety management requirements</p> <p>4.4 Install flooring materials to specifications to the subfloor in accordance with workplace procedures</p> <p>4.5 Check finished stairway for flaws in installation and materials and rectify faults</p>
5. Complete housekeeping	<p>5.1 Store and recycle unused materials in accordance with workplace procedures</p> <p>5.2 Check, clean and store tools and equipment in accordance with workplace procedures</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	5.3 Clean work area and dispose of rubbish safely 5.4 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

## Unit Mapping Information

Supersedes and is equivalent to MSFFL3030 Cut and install timber flooring materials to stairs.

## Links

# Assessment Requirements for MSFFL3080 Install timber flooring materials to stairs

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3030 Cut and install timber flooring materials to stairs.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed 3 types of timber flooring material installations to stairs, that individually or cumulatively involve:
  - standard stairs
  - kite winders
  - triangular winders
  - installation of a non-slip nosing, tape or non-slip coating.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- timber flooring installations to stairs:
  - Australian Standards requirements
  - workplace safety system requirements
  - work flow
  - environmental protection and sustainability requirements
  - how to access manufacturer instructions
  - characteristics of timber and monolithic sub-floors
  - techniques for preparing sub-floors
  - techniques and requirements for conducting moisture testing (why only this unit?)
  - types and characteristics of different stair styles, including:
    - open newel
    - bullnose steps
    - circular
    - recessed steps
    - open tread

- box steps
- kite winder treads
- types, characteristics, uses and limitations of timber flooring materials on stairs, including:
  - parquetry
  - floating floors
  - strip timber floors (non-structural)
- types, characteristics, safe use, maintenance and limitations of tools, materials and equipment
- techniques for set out, laying, cutting and fixing, the types of problems that may occur and how to avoid and respond
- quality indicators for completed work
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - stairs requiring installation of timber coverings
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

## MSFFL3081 Install block parquet flooring

### Modification History

Release 1. Supersedes and is not equivalent to MSFFL3033 Install block parquet flooring, and, MSFFL3035 Install patterned parquet flooring.

### Application

This unit describes the skills and knowledge required to prepare, set out, cut and install block parquet flooring in domestic and commercial sites. It includes patterned parquet.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Correctly identify work requirements and process from review of documentation 1.3 Confirm subfloor condition as suitable for installation consistent with Australian Standards and manufacturer recommendations

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Select and check tools, equipment and materials prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition</p> <p>1.5 Remove or undercut skirting boards or cover trims if required and store for re-fitting in accordance with work requirements</p> <p>1.6 Plan sequence of work, including the position of each expansion joint, to ensure efficiency and quality of installation</p>
2. Set out block parquetry flooring	<p>2.1 Inspect timber flooring material and check against work orders, ensuring the species, grade, size and quantity are correct</p> <p>2.2 Moisture check timber using required equipment and confirm suitability of moisture content for site conditions as per pre-site inspection procedures</p> <p>2.3 Organise and use block parquetry flooring for fixing in accordance with safety management requirements</p> <p>2.4 Prepare required adhesives and edge strips in accordance with manufacturer instructions</p> <p>2.5 Accurately measure area to be covered, and establish working lines and starting point</p>
3. Lay out and cut parquetry blocks	<p>3.1 Follow instructions and sequence for laying and fixing</p> <p>3.2 Lay appropriate underlay in accordance with manufacturer recommendations</p> <p>3.3 Lay out block parquetry flooring to meet directional sequence, pattern match, specification requirements, and to minimise waste and joins</p> <p>3.4 Maximise the aesthetics of the materials, including matching grains and colours</p> <p>3.5 Accurately and clearly mark parquetry blocks for cutting</p> <p>3.6 Cut parquetry blocks, to provide appropriate size and shape ensuring minimum waste</p>
4. Install block parquetry	<p>4.1 Use required adhesives and edge strips/accessories in accordance with manufacturer instructions</p> <p>4.2 Use fixing methods and equipment following manufacturer recommendations</p> <p>4.3 Install and fix parquetry to produce required pattern</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.4 Allow for appropriate field and perimeter expansion joints 4.5 Fit and/or re-fit and finish skirting boards or cover trims 4.6 Inspect finished job and rectify any imperfections following workplace procedures
5. Complete housekeeping	5.1 Store and recycle unused materials in accordance with workplace procedures 5.2 Check, clean and store tools and equipment in accordance with workplace procedures 5.3 Clean work area and dispose of rubbish safely 5.4 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for MSFFL3081 Install block parquet flooring

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL3033 Install block parquet flooring, and, MSFFL3035 Install patterned parquet flooring.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- installed 2 block parquet floors to complete rooms in accordance with job requirements, as follows:
  - 1 block floor with a straight or square pattern
  - 1 block floor with herringbone pattern.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- block and patterned parquet flooring:
  - Australian Standards requirements
  - workplace safety system requirements
  - work flow
  - environmental protection and sustainability requirements
  - how to access manufacturer instructions
  - types, characteristics, uses and limitations of patterned and mosaic parquet
  - characteristics and requirements of subfloor preparation
  - types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
  - techniques for set out, laying, cutting and installation, the types of problems that may occur and how to avoid and respond, including basic wood working techniques
  - quality indicators for completed work
- procedures and protocols for the recording, reporting and maintenance of workplace records and information.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations requiring parquet installations
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL3082 Install cork tiles

### Modification History

Release 1. Supersedes and is equivalent to MSFFL3034 Install cork tiles.

### Application

This unit describes the skills and knowledge required to set out, lay, cut and install pre-finished or raw cork tiles, or cork supplied in other forms, over a pre-prepared hard underlay or subfloor.

This unit applies to flooring technicians installing cork in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. # MSFFL3085 Install battens or plywood in preparation for strip timber

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL3038 Install strip timber flooring onto battens and MSFFL3039 Install strip timber flooring onto plywood.

## Application

This unit describes the skills and knowledge required to prepare for work, lay moisture membrane and cut and fix timber battens or plywood before installing strip timber. Battens or plywood may be over joists or a subfloor. Batten may be used to either raise a floor or correct the level of a floor.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

## Unit Mapping Information

Supersedes and not equivalent to MSFFL3038 Install strip timber flooring onto battens and MSFFL3039 Install strip timber flooring onto plywood.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFL3085 Install battens or plywood in preparation for strip timber

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL3038 Install strip timber flooring onto battens and MSFFL3039 Install strip timber flooring onto plywood.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- installed battens and plywood in accordance with job requirements:
  - 1 complete area using full thickness battens packed to achieve a level surface
  - scribing full battens down to thinner sizes to be installed fully supported over a subfloor
  - plywood mechanically fixed to a concrete sub-floor.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- installation of strip timber onto battens:
  - Australian Standards requirements
  - workplace safety system requirements
  - environmental protection and sustainability requirements
  - how to access manufacturer instructions
  - work flow
  - types, characteristics, uses and limitations of timber installed on to battens, including:
    - strip tongue and groove floating floors
    - manufactured engineered flooring
    - nature of timber battens and what this means for installation (i.e. timber battens with a density less than or equal to 600 Kg/m<sup>3</sup>, greater than 600 Kg/m<sup>3</sup>)
    - benefits and limitations of batten subfloors
  - types, characteristics, uses and limitations of strip timber flooring installed onto plywood underlay:
    - plywood underlay (including ISO Type 5 system for product reliability to AS/NZS 2269.0:2012 Plywood - Structural – Specifications)
  - characteristics and requirements of subfloor preparation

- types, characteristics, uses and limitations of adhesives used in timber flooring, including:
  - elastomeric
  - polyurethane
  - polyvinyl alcohol (PVA)
- types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
- techniques for set out, laying, cutting and fixing, the types of problems that may occur and how to avoid and respond, including basic wood working techniques
- quality indicators for completed work
- procedures and protocols for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations requiring strip timber flooring on battens
  - strip timber and battens
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFFL3087 Plan and implement maintenance systems for timber, laminate and engineered flooring

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3041 Maintain timber, laminate and engineered flooring.

## Application

This unit describes the skills and knowledge to prepare and implement maintenance systems for timber, laminate and engineered flooring. The maintenance plan must be cost-effective, environmentally sensitive and specific to floor type and location.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Flooring technology

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare maintenance plan	1.1 Identify maintenance requirements for timber, laminate and engineered flooring from relevant information sources 1.2 Identify and qualify maintenance costs based on review of information 1.3 Check maintenance requirements against warranty, insurance agreements and indemnity provisions 1.4 Develop maintenance plan to promote and sustain performance and

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	production systems in accordance with workplace requirements 1.5 Establish communication strategies with regard to maintenance plan, environmental and work health and safety policies, and enterprise requirements 1.6 Confirm subfloor suitability for installation consistent with Australian Standards and manufacturer recommendations
2. Implement maintenance plan	2.1 Select and check tools, equipment and materials prior to use 2.2 Identify, secure and include resource and supply requirements in enterprise budgets and operational considerations 2.3 Communicate prepared maintenance schedules and procedures to customers, staff, contractors and suppliers 2.4 Implement and schedule maintenance plans and work sequences to minimise disruption to customer operations 2.5 Assess potential risks and/or hazards with regard to staff and supply problems, and prepare contingency plans accordingly 2.6 Maintain timber, laminate and engineered flooring to manufacturer specifications, work health and safety and organisational requirements
3. Monitor maintenance plan	3.1 Monitor maintenance activities and performance against maintenance plan for efficiency and effectiveness 3.2 Monitor and control workplace hazards and environmental implications associated with maintenance procedures in line with WHS and customer requirements 3.3 Monitor and control costs within maintenance system budget requirements 3.4 Accurately document relevant information maintenance plan information in accordance with customer requirements 3.5 Maintain timber, laminate and engineered flooring in clean and safe operational condition

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

## Unit Mapping Information

Supersedes and is equivalent to MSFFL3041 Maintain timber, laminate and engineered flooring.

# Assessment Requirements for MSFFL3087 Plan and implement maintenance systems for timber, laminate and engineered flooring

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3041 Maintain timber, laminate and engineered flooring.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- prepared 3 of the following maintenance systems:
  - 1 strip timber floor
  - 1 parquetry flooring
  - 1 cork flooring
  - 1 laminate floating flooring
  - 1 pre-finished engineered flooring
- implemented 1 of the above maintenance systems.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and calculation maintenance and repair costing within budgetary guidelines
- flooring maintenance planning:
  - Australian Standards requirements
  - types of maintenance requirements
  - environmental protection and sustainability requirements
  - manufacturer recommendations
  - information to be evaluated
  - resource implications
  - methods and process for planning
  - communication
  - implementation scheduling.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - floors requiring maintenance schedules.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL3089 Apply solvent-based coatings to timber flooring

### Modification History

Release 1. Supersedes and is equivalent to MSFFL3023 Apply solvent-based coatings to timber flooring.

### Application

This unit describes the skills and knowledge required to select solvent-based coating systems appropriate for the job, prepare for the work and apply selected coatings to timber and parquet floors.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify and prepare for work requirements	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Read work documentation and identify job requirements 1.3 Select coating material based on product qualities and client expectations 1.4 Assess selected coating materials for compatibility with each other,

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>with the surface to be finished and with manufacturer recommendations</p> <p>1.5 Select and check tools, equipment and materials for suitability, serviceability and safety prior to use</p> <p>1.6 Inspect and confirm readiness of surface to be finished, and erect barrier signs to coating area</p> <p>1.7 Plan sequence of work to ensure efficiency and quality of application</p>
2. Apply finishing system	<p>2.1 Check ventilation before chemical fumes are released, and confirm all work health and safety and environmental protection requirements are met</p> <p>2.2 Apply coating material in accordance with manufacturer recommendations</p> <p>2.3 Observe recommended drying times between coats</p> <p>2.4 Buff and sand between coats in accordance with manufacturer recommendations</p> <p>2.5 Check final finish against quality and job requirements, and rectify deficiencies</p> <p>2.6 Provide required floor maintenance instructions and warranty provisions to the client in accordance with workplace procedures.</p>
3. Complete housekeeping	<p>3.1 Reseal unused materials and store in accordance with workplace procedures</p> <p>3.2 Check, clean and store tools and equipment in accordance with workplace procedures</p> <p>3.3 Clear and clean work area and dispose of rubbish safely</p> <p>3.4 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

## Unit Mapping Information

Supersedes and is equivalent to MSFFL3023 Apply solvent-based coatings to timber flooring.

# Assessment Requirements for MSFFL3089 Apply solvent-based coatings to timber flooring

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3023 Apply solvent-based coatings to timber flooring.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- applied solvent-based coatings in accordance with job requirements to 2 complete rooms:
  - used 2 different products
  - applied coating to 2 different timber species.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area
- solvent-based coating application:
  - Australian Standards requirements
  - workplace safety systems
  - work flow
  - environmental protection and sustainability requirements
- methods of, and requirements for, timber floor preparation, including basic sanding, finishing sanding and edging
- type, characteristics, uses and limitations of different resin, epoxy and polyurethane products in relation to:
  - aesthetic quality
  - durability and longevity
  - ventilation and other safety requirements
  - moisture content
  - reaction to change of temperature and relative humidity
  - manufacturer recommendations
- characteristics, safe use, maintenance and limitations of finishing tools and equipment
- techniques for application, the types of problems that may occur and how to avoid and respond

- procedures and protocols for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - floors requiring finishing
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFFL3028 Apply stains and fillers to timber flooring.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFL3094 Apply stains and fillers to timber flooring

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3028 Apply stains and fillers to timber flooring.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- applied each of the following types of stain to a complete room in accordance with job requirements:
  - lacquer-based
  - spirit-based
- applied fillers to:
  - 1 parquet floor
  - 1 strip timber floor.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area
- stain and filler application:
  - Australian Standards requirements
  - workplace safety systems requirements
  - work flow
  - environmental protection and sustainability requirements
  - methods of, and requirements for, timber floor preparation - basic sanding, finishing sanding and edging
- type, characteristics, uses and limitations of different stain and filler products in relation to:
  - aesthetic quality
  - durability and longevity
  - ventilation and other safety requirements
  - moisture content
  - reaction to change of temperature and relative humidity
  - manufacturer recommendations

- characteristics, safe use, maintenance and limitations of finishing tools and equipment
- techniques for application, the types of problems that may occur and how to avoid and respond
- procedures and protocols for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - floors requiring finishing
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL3095 Fine sand timber flooring

### Modification History

Release 1. Supersedes and is equivalent to MSFFL3042 Fine sand timber flooring.

### Application

This unit describes the skills and knowledge required to prepare for work and fine sand existing floors either after coarse sanding, where only minor rectification of scratches or wear and tear has occurred, or between coats. It involves operating rotary sanding machines.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for the work	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Read work documentation and identify job requirements 1.3 Inspect timber flooring for contamination, moisture content and suitability for fine sanding operations, and identify and complete any pre-sanding tasks 1.4 Assess and confirm timber flooring condition and the extent of fine

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	sanding required to meet job specifications 1.5 Select and check tools, equipment and materials for suitability, serviceability and safety prior to use 1.6 Isolate and/or encapsulate the job site to contain dust fallout from sanding operation 1.7 Plan sequence of work suited to the job
2. Conduct fine sanding operations	2.1 Set up and check sanding equipment and safety features in accordance with manufacturer instructions 2.2 Select and change equipment to meet requirements of the job 2.3 Select, attach and routinely check and change sanding belts or papers to ensure quality finish 2.4 Conduct trial runs to check machine operations and quality of finished work 2.5 Complete sanding systematically and effectively within the minimum required timeframe 2.6 Complete routine lubrication and adjustments to the equipment as required for efficient operation 2.7 Clean and check final finish against quality and job requirements, and rectify deficiencies
3. Complete housekeeping	3.1 Store and recycle unused materials in accordance with workplace procedures 3.2 Check, clean and store tools and equipment in accordance with workplace procedures 3.3 Clean work area and dispose of rubbish safely 3.4 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFFL3042 Fine sand timber flooring.

# Assessment Requirements for MSFFL3095 Fine sand timber flooring

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3042 Fine sand timber flooring.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed fine sanding for 3 complete rooms that individually or cumulatively include fine sanding for:
  - a new or existing solid floor (parquetry or tongue and groove)
  - a pre-finished or engineered floor.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area
- sanding operations:
  - Australian Standards requirements
  - workplace safety system requirements
  - work flow
  - environmental protection and sustainability requirements
  - floor condition requirements for sanding operations
  - characteristics, safe use, maintenance and limitations of tools and equipment for fine sanding
  - techniques for machine use, the types of problems that may occur and how to avoid and respond
- procedures and protocols for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - floors requiring fine sanding
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

## MSFFL3096 Edge sand timber flooring

### Modification History

Release 1. Supersedes and is equivalent to MSFFL3043 Edge sand timber flooring.

### Application

This unit describes the skills and knowledge required to prepare for work and edge sand existing floors using a disc, orbital or belt sander to grade the surface and remove cupping, ridges, high points or deep scratches along the edges of the room, in corners or areas of reduced access, such as wardrobes. The pattern of sanding is to overlap and blend the floor boards into the body of the sanded floor.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

# Assessment Requirements for MSFFL3096 Edge sand timber flooring

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3043 Edge sand timber flooring.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed 2 timber flooring preparations requiring edge sanding:
  - to grade the surface
  - to remove cupping, ridges, high points or deep scratches along the edges of the room, in corners or areas of reduced access
  - to blend the floor boards into the body of course and fine sanded timber floor.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area
- edge sanding operations:
  - Australian Standards requirements
  - workplace safety systems
  - work flow
  - environmental protection and sustainability requirements
  - floor conditions requirements for sanding operations
  - characteristics, safe use, maintenance and limitations of tools and equipment
  - techniques for machine use, the types of problems that may occur and how to avoid and respond
- procedures and protocols for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - floors requiring sanding
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL3098 Sand and fill parquetry flooring

### Modification History

Release 1. Supersedes and is equivalent to MSFFL3045 Sand and fill parquetry flooring.

### Application

This unit describes the skills and knowledge required to prepare for work and sand and fill parquetry floors in preparation for applying coating or re-coating to the flooring. It involves operating split drum and/or belt floor sander, rotary or orbital sanding and edge sanding machines.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant State and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for the work	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Read work documentation and identify job requirements 1.3 Identify surface suitability for fine sanding based on contamination and moisture content inspection, and complete pre-sanding

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	requirements 1.4 Assess and confirm parquetry flooring condition and the extent of coarse, finish and fine sanding and filling required to meet job specifications 1.5 Select and check tools, equipment and materials for suitability, serviceability and safety prior to use 1.6 Isolate and/or encapsulate the job site to contain dust fallout from sanding operation 1.7 Plan sequence of work to ensure efficiency and quality of application
2. Sand floor	2.1 Set up, check and adjust sanding equipment and safety features in accordance with manufacturer instructions 2.2 Select and change equipment to meet requirements of the job 2.3 Select, attach and routinely check and change sanding belts or papers to ensure quality finish 2.4 Conduct trial runs to check machine operations and quality of finished work 2.5 Complete sanding systematically and effectively with the grain, against the grain and across the grain within the minimum required timeframe 2.6 Complete required routine lubrication and adjustments to the equipment 2.7 Clean and check final finish against quality and job requirements, and rectify deficiencies
3. Fill floor	3.1 Check ventilation before chemical fumes are released, and confirm all WHS and environmental protection requirements are met 3.2 Prepare filling material in accordance with manufacturer specifications 3.3 Make trial applications of fillers to check equipment operation, materials consistency, viscosity and specified colour 3.4 Identify faults and/or inconsistencies in colour and follow workplace procedures for rectification and adjustments 3.5 Apply filling material in accordance with manufacturer recommendations and observe drying times between coats 3.6 Sand between coats as required in accordance with manufacturer

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>recommendations</p> <p>3.7 Clean and check final finish against quality and job requirements, and rectify deficiencies</p>
4. # Assessment Requirements for MSFFL3098 Sand and fill parquet flooring

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3045 Sand and fill parquet flooring.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed the full sanding process for 2 parquet floors in complete rooms in accordance with job specifications:
  - 1 block
  - 1 mosaic or multi-directional patterned.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area
- parquet sanding operations:
  - Australian Standards requirements
  - procedures
  - workplace safety systems
  - work flow
  - environmental protection and sustainability requirements
  - floor condition requirements for sanding operations
  - characteristics, safe use, maintenance and limitations of tools and equipment for:
    - finish sanding
    - edge sanding
    - fine sanding
  - techniques for machine use, the types of problems that may occur and how to avoid and respond
- procedures and protocols for the recording, reporting and maintenance of workplace records and information.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - parquet floors requiring filling and sanding
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.

## MSFFL3099 Apply finishes to cork flooring

### Modification History

Release 1. Supersedes and is equivalent to MSFFL3046 Apply finishes to cork flooring.

### Application

This unit describes the skills and knowledge required to select coating systems appropriate for the job, prepare for the work and apply the selected finishes to cork flooring.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

# Assessment Requirements for MSFFL3100 Apply densifiers and sealers to concrete surfaces

## Modification History

Release 1. Supersedes and is equivalent to MSFFL3049 Apply densifiers and sealers to concrete surfaces.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- applied densifying, sealing and grouting products to achieve the required finish in accordance with job requirements to both 1 new and 1 existing concrete surface.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- densifying and sealing of concrete:
  - Australian Standards requirements
  - workplace safety systems
  - environmental protection and sustainability requirements
  - work flow
  - types, characteristics, safe use, maintenance and limitations of preparation and application tools and equipment
  - methods of concrete floor preparation and requirements prior to application in relation to:
    - contaminants
    - debris
    - dust
    - moisture content level and stability
  - characteristics of densifier and sealer products in relation to ventilation and reaction to change of temperature and relative humidity
  - type, characteristics, uses and limitation of materials, including manufacturer recommendations for:
    - reactive concrete densifiers using colloidal silica to harden and densify new or older concrete surfaces

- densifiers and sealers to protect concrete from stains, dust production and wear, and supports polishing
- application methods and techniques, the types of problems that may occur and how to avoid and respond, including for:
  - pour and brush spreading
  - low-pressure, airless spraying
- quality indicators for finished surfaces
- procedures and protocols for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - concrete surfaces to be finished
  - equipment, tools and materials for application of products
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFFL3101 Install bamboo flooring

### Modification History

Release 1. Supersedes and is not equivalent to MSFFL2023 Install laminate timber and bamboo flooring.

### Application

This unit describes the skills and knowledge required to set out, cut, lay and fix bamboo flooring.

This unit applies to flooring technicians working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking flooring work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Flooring technology

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Identify and follow work health and safety, legislative and organisational requirements 1.2 Correctly identify work requirements and process from review of documentation 1.3 Confirm subfloor suitability for installation consistent with Australian Standards and manufacturer recommendations

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Select underlays adhesives, trims and accessories based on job requirements</p> <p>1.5 Select and check tools and equipment prior to use to ensure that they are appropriate for the work, serviceable and in a safe condition</p> <p>1.6 Plan sequence of work, and starting point, to ensure efficiency and quality of installation</p>
2. Set out materials for installation	<p>2.1 Check flooring against work order and acclimatise in accordance with manufacturer recommendations</p> <p>2.2 Organise and use flooring for fixing in accordance with relevant safety management requirements</p> <p>2.3 Remove or undercut skirting boards or cover trims, and store for re-fitting or send for machining in accordance with work requirements</p> <p>2.4 Prepare required adhesives and accessories for use</p> <p>2.5 Establish working lines and starting point</p>
3. Prepare and cut flooring	<p>3.1 Follow instructions and sequence for laying and fixing</p> <p>3.2 Lay appropriate underlay in accordance with manufacturer recommendations</p> <p>3.3 Lay out flooring to meet directional sequence, pattern match, specification requirements, and to minimise waste and joins</p> <p>3.4 Maximise the aesthetics of the materials, where appropriate, matching grains and colours</p> <p>3.5 Accurately and clearly mark flooring for cutting</p> <p>3.6 Cut flooring to length and size for final laying ensuring minimum waste</p>
4. Lay flooring	<p>3.1 Follow instructions and sequence for laying and fixing</p> <p>3.2 Lay appropriate underlay in accordance with manufacturer recommendations</p> <p>3.3 Lay out flooring to meet directional sequence, pattern match, specification requirements, and to minimise waste and joins</p> <p>3.4 Maximise the aesthetics of the materials, where appropriate, matching grains and colours</p> <p>3.5 Accurately and clearly mark flooring for cutting</p> <p>3.6 Cut flooring to length and size for final laying ensuring minimum</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	waste
5. Complete housekeeping	5.1 Store and recycle unused materials in accordance with workplace procedures 5.2 Check, clean and store tools and equipment in accordance with workplace procedures 5.3 Clean work area and dispose of rubbish safely 5.4 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

# Assessment Requirements for MSFFL3101 Install bamboo flooring

## Modification History

Release 1. Supersedes and is not equivalent to MSFFL2023 Install laminate timber and bamboo flooring.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- installed bamboo flooring to 3 complete rooms in accordance with job requirements making specific allowances for lateral expansion and contraction of the flooring product.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- bamboo timber flooring:
  - Australian Standards requirements
  - workplace safety system requirements
  - work flow
  - environmental protection and sustainability requirements
  - how to access manufacturer instructions
  - types, characteristics, uses and limitations of
    - bamboo flooring products
    - installation adhesives, including polyvinyl alcohol (PVA), epoxies, polyurethane elastomeric
  - characteristics and requirements of subfloor preparation
  - types, characteristics, safe use, maintenance and limitations of tools, equipment and materials
  - techniques for set out, laying, cutting and fixing, the types of problems that may occur and how to avoid and respond, including basic wood working techniques
  - quality indicators for completed work
- procedures and protocols for the recording, reporting and maintenance of workplace records and information.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies.

The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - location requiring bamboo installation
  - bamboo flooring
  - equipment, tools and materials to complete tasks in the Performance Evidence, including safety and personal protective equipment
  - work orders
  - workplace procedures.
  -

# MSFFM2010 Set up and operate basic static machines

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers operating and maintaining basic static machines used for sawing, planing, sanding and drilling in the production of furniture.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furniture Making

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |                  |     |   |
|---|------------------|-----|---|
| 1 | Prepare for work | 1.1 | Work instructions are used to determine job requirements, including design, quality, materials, equipment, and quantities                     |
|   |                  | 1.2 | Cutting list and job specifications are read and interpreted  |
|   |                  | 1.3 | Work health and safety (WHS) requirements, including ventilation requirements and personal protection needs, are observed throughout the work |
|   |                  | 1.4 | Material for machining is selected and inspected for quality  |
|   |                  | 1.5 | Machines, cutting tools and jigs are identified and checked for safe and effective operation  |
|   |                  | 1.6 | Procedures are determined for minimising waste material   |

- 1.7 Procedures are identified for maximising energy efficiency while completing the job
- 2 Set up machines
  - 2.1 Safety equipment, including emergency stops, gauges, guards and controls are checked
  - 2.2 Machine settings and adjustments are made in accordance with job requirements and machine and tool manufacturer instructions
  - 2.3 Trial runs are conducted to check machine operation, accuracy and quality of finished work
  - 2.4 Necessary adjustments are made to machine settings
- 3 Operate machines
  - 3.1 Machine start-up procedure is carried out in accordance with manufacturer instructions
  - 3.2 Material is fed into machine in accordance with manufacturer instructions, safe handling procedures and standard workplace operating procedures
  - 3.3 Machine is operated in accordance with its designed capacity and purpose, tooling requirements and to manufacturer recommendations
  - 3.4 Machine operation is monitored to ensure product quality and output
  - 3.5 Waste quantities are checked and minimised
  - 3.6 Items that do not meet quality requirements are repaired, recycled or discarded according to workplace procedures
  - 3.7 Problems with the required work and/or the operation of the machine are identified and reported to appropriate persons
- 4 Finalise operation and maintain equipment
  - 4.1 Work area is cleaned, hand and/or power tools and equipment are cleaned, maintained and stored in accordance with workplace procedures
  - 4.2 Machinery is cleaned and left in a safe mode
  - 4.3 Faulty and/or defective equipment is tagged and reported in accordance with workplace practices
  - 4.4 Unused hardware is collected and stored for re-use or disposal following workplace procedures

- 4.5 Waste and scrap materials are dealt with following workplace procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

### Basic static machines include:

- cross-cut saw
- rip saw
- panel saw
- surface planer (buzzer/jointer)
- disc sander
- belt sander, including finisher, edge sander and stroke (Lacey) sander
- vertical drill press
- horizontal borer (single bit)
- band saw
- panel planer (thicknesser)
- bobbin sander

### Tasks include:

- docking, including:
  - (oversize + 20 mm)
  - (accurate to +/- 0.25 mm)
  - square (no tolerance)
- parallel rip (oversize by 5 mm+)
- setting up scribe saw
- setting up riving knife to AS 1473-1991 Guarding and safe use of woodworking machinery
- cutting flat panel board (off rip fence using scribe saw)
- cutting flat panel board (off cross-cut fence using scribe saw)

- machining face
- machining edge
- machining chamfer or bevel
- sanding straight surface
- sanding convex surface
- sanding end grain
- removing/replacing belts
- sanding veneer face of flat panel board
- sanding solid timber face
- sanding solid timber edges (remove arris/shape)
- selecting and replacing drill bits
- drilling holes to pre-determined depths vertically
- drilling holes to pre-determined depths horizontally
- hinge boring
- removing/replacing saw blade
- folding, unfolding, reversing saw blade
- blade identification/selection
- off fence ripping
- freehand ripping
- freehand curve cutting
- parallel plane width
- parallel plane thickness
- sand concave surface
- machine fault-finding

**Unit context includes:**

- WHS requirements, including legislation, building codes, material safety management systems, hazardous substances and dangerous goods code, and local safe operating procedures
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving in the set up, operation and maintenance of machines
- competency may be demonstrated in workplaces involved in the manufacture of solid timber furniture, domestic furniture, commercial furniture, kitchen and bathroom cabinets and/or furniture components

**Materials to be machined include:**

- solid timber
- manufactured board
- metal
- uPVC

**Personal protective equipment includes:**

- that prescribed under legislation, regulations and enterprise policies and practices

**Information and procedures include:**

- workplace procedures relating to the use of tools and equipment
- work instructions, including job sheets, cutting lists, plans, drawings and designs
- workplace procedures relating to reporting and communication
- manufacturer specifications and operational procedures

## Unit Mapping Information

Supersedes and is equivalent to LMFFM2010B Set up, operate and maintain basic static machines.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFM2010 Set up and operate basic static machines

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Read and interpret cutting lists and job specifications to prepare for work
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection processes to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
- Identify, set up, operate and monitor the machines and complete the tasks identified in the Range of Conditions
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Minimise wastage of resources, including materials, time and money
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Range, characteristics, uses and limitations of basic static machines
- Characteristics of materials and uses of products produced
- Workplace:
  - quality standards and procedures
  - guidelines regarding acceptable tolerance levels
  - safety policies and procedures
- Procedures for reporting machinery faults and material defects

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

- have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
- be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to basic static machinery, standard operating procedures and unprocessed materials.

# MSFFM3010 Prepare cutting list from plans and job specifications

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers reading plans and job specifications to prepare cutting lists and providing data for subsequent processing operations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furniture Making

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |                                   |     |   |
|---|-----------------------------------|-----|---|
| 1 | Read plans and job specifications | 1.1 | Job specifications, set-out rods and plans are used to determine the job requirements, including cutting list, dimension, design, quality materials and processes |
|   |                                   | 1.2 | Job components are established according to job specification and workplace procedures  |
|   |                                   | 1.3 | Geometry of components are established according to specifications  |
| 2 | Prepare cutting lists             | 2.1 | Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work  |
|   |                                   | 2.2 | Cutting list is checked and set out in accordance with  |

- workplace procedures, plans and specifications
- 2.3 Components are identified and described using common workplace terminology
  - 2.4 Sizes and tolerance of components are established and documented in accordance with workplace procedures
  - 2.5 Processing requirements are identified and documented
  - 2.6 Dimensional allowances for further processing are identified and documented
- 3 Read and interpret cutting lists
- 3.1 Cutting list is read and interpreted in accordance with the job requirements
  - 3.2 Quantities and dimensions are interpreted
  - 3.3 Quality standards and waste factors are considered
  - 3.4 Processing methods are established
  - 3.5 Processing time is identified

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

### Unit scope includes:

- reading of plans and specifications and the preparation of cutting lists for the production of furniture components
- preparation of cutting lists may be completed by both manual and computer assisted/generated means

### Unit context includes:

- WHS requirements, including legislation, building codes, material safety management systems, hazardous substances

and dangerous goods codes, and local safe operating procedures

- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving in the reading of plans and specifications and the preparation of cutting lists
- competency may be determined in workplaces involved in the manufacture of solid timber furniture, domestic furniture, commercial furniture, kitchen and bathroom cabinets and/or furniture components

**Materials to be considered include:**

- solid timber
- manufactured board
- metal
- plastics
- glass

**Personal protective equipment includes:**

- that prescribed under legislation, regulations and enterprise policies and practices

**Information and procedures include:**

- workplace procedures relating to the use of tools and equipment
- work instructions, including job sheets, cutting lists, plans, drawings and designs
- workplace procedures relating to reporting and communication
- manufacturer specifications and operational procedures

## Unit Mapping Information

Supersedes and is equivalent to LMFFM3012B Prepare cutting list from plans and job specifications.

# Assessment Requirements for MSFFM3010 Prepare cutting list from plans and job specifications

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Locate, interpret and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials and tools used in the work process
- Follow work instructions, operating procedures and manufacturers' instructions to:
  - minimise the risk of injury to self and others
  - prevent damage to goods, equipment and products
  - maintain optimum production output and product quality
- Interpret production plans and prepare cutting lists on a minimum of four (4) occasions with lists each having at least ten (10) different components and, overall, the lists incorporating four (4) different types of material
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Minimise wastage of resources, including materials, time and money
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Characteristics of materials and tooling used and use of products programmed
- Identification of equipment, processes and procedures
- Pattern techniques for optimising materials

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification

- be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to plans and specifications, standard cutting list formats and workplace standard processing procedures.

# MSFFM3011 Measure and draw site layout for manufactured furniture products

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers measuring and recording site layout details to provide an accurate basis for both manufacture and installation of furniture products.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furniture Making

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |                     |     |  |
|---|---------------------|-----|--|
| 1 | Obtain measurements | 1.1 | The purpose of obtaining measurements is clarified and confirmed   |
|   |                     | 1.2 | The most appropriate method of obtaining the measurement is selected and applied   |
|   |                     | 1.3 | Accurate measurements are obtained, confirmed and recorded   |
|   |                     | 1.4 | Calculations required for the measurement or validation are selected and correctly applied                                   |
|   |                     | 1.5 | Quality assurance requirements, standards and tolerances associated with enterprise operations are recognised and adhered to |

- |   |                  |     |   |
|---|------------------|-----|---|
| 2 | Draw site layout | 2.1 | Intended use of the site is clarified and confirmed   |
|   |                  | 2.2 | A site plan is prepared showing all features and measurements   |
|   |                  | 2.3 | A site elevation is completed showing all features and measurements   |
|   |                  | 2.4 | Unique and non-complying features which may impact on manufacture and/or installation are highlighted and referred to the appropriate party |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

- |   |  |
|---|--|
| <b>Unit scope includes:</b>                   | <ul style="list-style-type: none"> <li>• measurement and drawing of site layout related to the manufacture and installation of furniture, cabinets, glass, soft furnishings, upholstery, picture framing and floor covering products</li> </ul>  |
| <b>Drawing include:</b>                       | <ul style="list-style-type: none"> <li>• manual or computer-aided</li> </ul>   |
| <b>Measurements:</b>                          | <ul style="list-style-type: none"> <li>• are to be in metric scale, cover all dimensions of the site and furnishings and involve the use of:             <ul style="list-style-type: none"> <li>• rulers</li> <li>• tape measures</li> <li>• squares</li> <li>• service detectors</li> <li>• laser or equivalent technology</li> </ul> </li> </ul> |
| <b>Critical dimensions that may impact on</b> | <ul style="list-style-type: none"> <li>• the square of the structure</li> <li>• angles of floor to walls</li> </ul>  |

**manufacture and installation include:**

- walls to ceiling
- vertical walls
- horizontal floor and ceiling
- service locations and critical structural criteria

**Calculations include:**

- area
- perimeter
- volume
- mass
- scales and ratios (ingredients/elements and triangulation) and require the application of addition
- subtraction
- multiplication and division processes
- calculations are to be performed both manually and with the aid of a calculator

**Unit context includes:**

- work health and safety (WHS) requirements, including legislation, building codes, material safety management systems, hazardous substances and dangerous goods codes and local safe operating procedures
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements

**Personal protective equipment includes:**

- that prescribed under legislation, regulations and enterprise policies and practices

**Information and procedures include:**

- workplace procedures relating to the use of tools and equipment
- work instructions, including job sheets, cutting lists, plans, drawings and designs
- workplace procedures relating to reporting and communication
- manufacturer specifications and operational procedures

## Unit Mapping Information

Supersedes and is equivalent to LMFFM3013B Measure and draw site layout for manufactured furniture products.

## Links

# Assessment Requirements for MSFFM3011 Measure and draw site layout for manufactured furniture products

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Identify the factors relevant to the measurements and drawings
- Communicate effectively to enable accurate calculations, measurements and drawings
- Accurately measure and record particulars for required sector sites and materials
- Draw accurate, scaled plans and elevations relevant to the site using manual or computer-aided methods
- Identify and communicate on measurements and dimensions which may impact on manufacture and/or installation
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Minimise wastage of resources, including materials, time and money

## Knowledge Evidence

- Furniture design and planning criteria
- Drawing techniques, technologies and processes
- Furniture installation methods, criteria and techniques
- Measurement techniques and equipment/tools
- Theory and practice of calculations (addition, subtraction, multiplication and division)
- Conventional signs and markings for plans and drawings

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.

- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to information on the site and products for measurement and calculation, suitable work area appropriate to the activity, suitable site plans/drawings and/or specifications, and measuring, calculating and recording devices.

# MSFFM3021 Set up, operate and maintain computer numerically controlled (CNC) sizing machines

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers setting up, operating and maintaining CNC sizing machines to produce furniture or components.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furniture Making

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |                  |     |  |
|---|------------------|-----|--|
| 1 | Prepare for work | 1.1 | Work instructions are used to determine job requirements, including design, quality, materials, equipment and quantities |
|   |                  | 1.2 | Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work         |
|   |                  | 1.3 | Material for machining is selected and inspected for appropriate quality   |
|   |                  | 1.4 | Procedures are determined for minimising waste material  |
|   |                  | 1.5 | Procedures are identified for maximising energy efficiency while completing the job                                      |

- 2 Set up machines
  - 2.1 CNC program is set to job requirements
  - 2.2 Safety equipment, including emergency stops, gauges, guards and controls are checked
  - 2.3 Machine settings and adjustments are made in accordance with job requirements and machine and tool manufacturer instructions
  - 2.4 Machines, cutting tools and jigs are checked for safe and effective operation
  - 2.5 Trial runs are conducted to check machine operation and quality of finished work
  - 2.6 Final adjustments are made to CNC programs and equipment according to workplace procedures
- 3 Operate machines
  - 3.1 Machines are operated and monitored to ensure product quality and output
  - 3.2 Waste quantities are checked and minimised
  - 3.3 Problems with the required work are identified and reported to appropriate persons
  - 3.4 Items that do not meet quality requirements are repaired, recycled or discarded according to workplace procedures
  - 3.5 Any authorised changes in working procedures are followed
- 4 Finalise operation and maintain equipment
  - 4.1 Work area is cleaned, hand and/or power tools and equipment are cleaned, maintained and stored in accordance with workplace procedures
  - 4.2 Machinery is cleaned and left in a safe mode
  - 4.3 Faulty and/or defective equipment is tagged and reported in accordance with workplace practices
  - 4.4 Unused hardware is collected and stored for re-use or disposal following workplace procedures
  - 4.5 Waste and scrap materials are dealt with following workplace procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

**CNC sizing machines include:**

- CNC beam saws
- double end profiling machines

**Unit scope includes:**

- computer programming skills
- reading and interpreting drawings
- stock control
- setting cutting speeds
- computer-aided machining operations
- saw and tool maintenance

**Materials to be sized include:**

- solid timber
- manufactured board
- laminate
- solid synthetic materials and plastics

**Unit context includes:**

- WHS requirements, including legislation, building codes, material safety management systems, hazardous substances and dangerous goods code, and local safe operating procedures
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving in the set up and operation of machines
- competency may be demonstrated in workplaces involved in the manufacture of solid timber furniture, domestic furniture, commercial furniture, kitchen and bathroom cabinets and/or furniture components

- Tools include:**
- machine-specific tools
  - screwdrivers
  - hammers
  - spanners
- Personal protective equipment includes:**
- that prescribed under legislation, regulations and enterprise policies and practices
- Information and procedures include:**
- workplace procedures relating to the use of tools and equipment
  - work instructions, including job sheets, cutting lists, plans, drawings and designs
  - workplace procedures relating to reporting and communication
  - manufacturer specifications and operational procedures

## Unit Mapping Information

Supersedes and is equivalent to LMFFM3030B Set up, operate and maintain CNC sizing machines.

# Assessment Requirements for MSFFM3021 Set up, operate and maintain computer numerically controlled (CNC) sizing machines

## Modification History

Release 1 - New unit of competency

## Performance Evidence

- Locate, interpret and apply relevant information
- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Identify materials used in the work process
- Follow work instructions, operating procedures and inspection practices to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment or products
  - maintain required production output and product quality
- Identify, set up and operate CNC sizing equipment, including the use of safety cut-outs and guards, to produce a range of complex cutting patterns
- Conduct operator maintenance on the machine and related equipment
- Use mathematical ideas and techniques to correctly complete measurements, calculate area and estimate material requirements
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems, interpret basic plans and follow safety procedures
- Minimise wastage of resources, including materials, time and money
- Work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

- Types, characteristics, uses and limitations of CNC sizing machines
- CNC theory, practices and techniques
- Characteristics of materials used and uses of products produced
- Work flow processes
- Procedures for reporting materials, product or equipment faults

## Assessment Conditions

- Assessors must:
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors

- have vocational competency in the furnishing industry at least to the level being assessed with broad industry knowledge and experience, usually combined with a relevant industry qualification
- be familiar with the current skills and knowledge used and have relevant, current experience in the furnishing industry.
- Assessment methods must confirm consistency of performance over time rather than a single assessment event and in a range of workplace relevant contexts.
- Assessment must be by observation of relevant tasks with questioning on underpinning knowledge and, where applicable, multimedia evidence, supervisor's reports, projects and work samples.
- Assessment is to be conducted on single units of competency or in conjunction with other related units of competency. Foundation skills are integral to competent performance in the unit and should not be assessed separately.
- Assessment must occur on the job or in a workplace simulated facility with relevant process, equipment, materials, work instructions and deadlines.
- Access is required to CNC controlled equipment, standard operating procedures and unprocessed materials.

# MSFFM3022 Set up, operate and maintain computer numerically controlled (CNC) machining and processing centres

## Modification History

Release 1 - New unit of competency

## Application

This unit of competency covers setting up, operating and maintaining CNC machining and processing centres to produce furniture or components.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

## Unit Sector

Furniture Making

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |                  |     |  |
|---|------------------|-----|--|
| 1 | Prepare for work | 1.1 | Work instructions are used to determine job requirements, including design, quality, materials, equipment and quantities |
|   |                  | 1.2 | Work health and safety (WHS) requirements, including personal protection needs, are observed throughout the work         |
|   |                  | 1.3 | Material for machining is selected and inspected for appropriate quality   |
|   |                  | 1.4 | Procedures are determined for minimising waste material  |
|   |                  | 1.5 | Procedures are identified for maximising energy efficiency while completing the job                                      |

- 2 Set up for machining and processing
  - 2.1 CNC program is set to job requirements
  - 2.2 Safety equipment, including emergency stops, gauges, guards and controls are checked
  - 2.3 Machining and processing settings and adjustments are made in accordance with job requirements and machining and processing and tool manufacturer instructions
  - 2.4 Machining and processing, cutting tools and jigs are checked for safe and effective operation
  - 2.5 Trial runs are conducted to check machining and processing operation and quality of finished work
  - 2.6 Final adjustments are made to CNC programs and equipment according to workplace procedures
- 3 Operate machining and processing centres
  - 3.1 Machining and processing centres are operated and monitored to ensure product quality and output
  - 3.2 Waste quantities are checked and minimised
  - 3.3 Problems with the required work are identified and reported to appropriate persons
  - 3.4 Items that do not meet quality requirements are repaired, recycled or discarded according to workplace procedures
  - 3.5 Any authorised changes in working procedures are followed
- 4 Finalise operation and maintain equipment
  - 4.1 Work area is cleaned, hand and/or power tools and equipment are cleaned, maintained and stored in accordance with workplace procedures
  - 4.2 Machinery is cleaned and left in a safe mode
  - 4.3 Faulty and/or defective equipment is tagged and reported in accordance with workplace practices
  - 4.4 Unused hardware is collected and stored for re-use or disposal following workplace procedures
  - 4.5 Waste and scrap materials are dealt with following workplace procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency. Detail on appropriate performance levels for each furnishing unit of competency in reading, writing, oral communication and numeracy utilising the Australian Core Skills Framework (ACSF) are provided in the Furnishing Training Package Implementation Guide.

## Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Range is restricted to essential operating conditions and any other variables essential to the work environment.

### **CNC machining and processing centres include**

- a three axis machining centre
- multi-tasking machining centres
- flat-bed routers and mortise

### **Materials to be machined and processed include:**

- solid timber
- manufactured board

### **Unit scope includes:**

- reading and interpreting drawings
- selecting and installing tooling
- setting jigs and fixtures
- programming (sub-programs and parametrics)
- performance of computer-aided design (CAD)/computer-aided manufacture (CAM) functions
- downloading and storage of data to complete detailed profiling
- other specified operations

### **Unit context includes:**

- WHS requirements, including legislation, building codes, material safety management systems, hazardous substances and dangerous goods code, and local safe operating procedures
- work is carried out in accordance with legislative obligations, environmental legislation, relevant health regulations, manual handling procedures and organisation insurance requirements
- work requires individuals to demonstrate some discretion, judgement and problem solving in the set up and operation of machining and processing centres
- competency may be demonstrated in workplaces involved in the manufacture of solid timber furniture, domestic

- Tools and equipment include:**
- furniture, commercial furniture, kitchen and bathroom cabinets and/or furniture components
  - stand-alone or integral computing systems
  - machine-specific tools
- Personal protective equipment includes:**
- that prescribed under legislation, regulations and enterprise policies and practices
- Information and procedures include:**
- workplace procedures relating to the use of tools and equipment
  - work instructions, including job sheets, cutting lists, plans, drawings and designs
  - workplace procedures relating to reporting and communication
  - manufacturer specifications and operational procedures

## Unit Mapping Information

Supersedes and is equivalent to LMFFM3031B Set up, operate and maintain CNC machining and processing centres.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFFM3022 Set up, operate and maintain computer numerically controlled (CNC) machining and processing centres

# MSFGG2011 Glaze and reglaze residential windows and doors

## Modification History

Release 1. Supersedes and is equivalent to MSFGG2008 Glaze and re-glaze residential windows and doors.

## Application

This unit describes the skills and knowledge required to install glass to metal or timber doors, windows and other frames. It includes residential glazing and reglazing confined to simple windows such as fixed, sliding, casement, awning and double hung or louvres and doors such as sliding, hinged, pivot and bi-fold. Work may involve removal and installation of designed glass panels.

This unit applies to glaziers working in accordance with pre-determine work orders.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Glass and Glazing

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify work requirements	1.1 Identify requirements for glass type and fixing method from review of documentation and communication with the customer 1.2 Identify and follow work health and safety requirements 1.3 Plan a logical work sequence suited to the job and workplace procedures
2. Prepare for work	2.1 Take accurate site measurements and establish clearance and wedge requirements

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>2.2 Select glass and frames, and check for type, size and imperfections against job requirements</p> <p>2.3 Select glass type and fixing method in accordance with Australian Standards and advise customer if requirements impact on glass ordered</p> <p>2.4 Select and check tools and equipment for suitability, serviceability and safety prior to use</p> <p>2.5 Prepare fixing and sealing materials by mixing or cutting to length, in accordance with job requirements</p>
3. Identify site conditions and constraints	<p>3.1 Recognise on-site hazards and constraints and take corrective action in accordance with regulations and workplace requirements</p> <p>3.2 Apply covering material to protect existing fixtures and fittings in accordance with workplace procedures</p> <p>3.3 Identify characteristics of the window or door which may affect the finished job and take corrective action</p>
4. Perform glazing	<p>4.1 Safely remove and dispose of glass from existing frame in accordance with workplace procedures</p> <p>4.2 Prepare frame to receive glass through check of size against specifications, removal of sealant remains, and surface preparation</p> <p>4.3 Cut glass to size in accordance with work requirements</p> <p>4.4 Fix glass to the frame using the selected method and in accordance with established industry procedures and Australian Standards</p> <p>4.5 Use solvents and sealants in accordance with manufacturer recommendations and Australian Standards</p> <p>4.6 Remove excess sealing material and clean glass and frame with suitable cleaning agents after fixing</p>
5. Complete work	<p>5.1 Check completed installation for compliance with specifications and rectify any deficiencies</p> <p>5.2 Clean and store tools, equipment and materials in accordance with workplace procedures</p> <p>5.3 Clean work area and leave in a safe condition, and dispose of or recycle waste in accordance with workplace protocols</p> <p>5.4 Accurately complete required workplace documentation</p>

## **Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Unit Mapping Information**

Supersedes and is equivalent to MSFGG2008 Glaze and re-glaze residential windows and doors.

## **Links**

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFGG2011 Glaze and reglaze residential windows and doors

## Modification History

Release 1. Supersedes and is equivalent to MSFGG2008 Glaze and re-glaze residential windows and doors.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- performed each of the following tasks at least once:
  - cut glass in accordance with Australian Standard AS1288
  - calculated glazing clearance and cutting size
  - hacked out and/or removed beads and glass safely from timber windows and doors
  - prepared glazing rebates and channels prior to installation
  - removed and disassembled aluminium window sashes and doors and removed glass safely
  - installed and/or adjusted unique, spiral or spring balances on double hung windows
  - taken template and glazed irregular shaped openings
- glazed or reglazed each of the following at least once in accordance with AS1288:
  - timber putty faced window sashes or door panel
  - timber beaded:
    - sidelight
    - fixed panel
    - pivot or hinged or bi-fold doors
  - aluminium framed channel glazed door or window
  - aluminium framed beaded door or window with wedge rubbers
  - louvre blades.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- relevant Australian Standards, their purpose and key provisions:
  - AS 1288: Glass in buildings - Selection and installation
  - AS/NZS 2208: Safety glazing materials in buildings
  - AS/NZS 4667: Quality requirements for cut-to-size and processed glass
- organisational customer communication standards and protocols

- workplace safety system requirements related to the glazing of window and doorframes
- work flow requirements in relation to fitting glass
- qualities and characteristics of glass, including hazards and handling requirements for:
  - annealed glass
  - coated glass and insulated glass units
  - laminated glass patterned glass
  - tinted and heat reflective glass
  - toughened glass
  - wired glass
- qualities and characteristics of different frame types and how this impacts the glazing process, including:
  - plastic
  - aluminium
  - steel
  - solid timber
- factors that affect the fixing of glass and how this impacts on work, including:
  - compliance
  - specification
  - type of glass and frame
  - security requirements for specific locations
  - sealing methods
- types, characteristics, safe use, maintenance and limitations of tools, equipment and materials, including:
  - glass handling and lifting equipment
  - hack-out knives
  - nail punches
  - pop rivet guns
  - pry bars
  - putty knives
  - rubber mallets
  - sealant guns
  - spiral balancer
  - sprig and/or diamond guns
  - tape measures
  - tungsten wheel glass cutters
  - vinyl cutters and rollers
- types, characteristics, safe use and limitations of other materials, including:
  - adhesives
  - gaskets
  - glazing tapes

- sealants
- setting blocks
- factors for consideration for products that include sash cords
- glazing techniques for window and door frames, the types of problems that may occur and how to avoid and respond, including:
  - channel glazing
  - beaded glazing
  - double glazing
  - heel and toe glazing
- quality indicators for glazed windows and doors
- documentation requirements for completed glazing work.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations and/or frames requiring glazing and reglazing
  - frames and glass as specified in the Performance Evidence
  - equipment, tools and materials to perform tasks specified in Performance Evidence
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGG2012 Operate glass freefall rack and table

### Modification History

Release 1. Supersedes and is equivalent to MSFGG2003 Operate glass freefall rack and table.

### Application

This unit describes the skills and knowledge required to use freefall racks and tables in handling glass.

This unit applies to glass processing workers and some glaziers working in accordance with established procedures.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Identify and follow work health and safety requirements, using all required personal protective equipment 1.2 Identify work requirements and plan work sequence and method in a logical order to suit the job 1.3 Select and check tools and equipment for suitability, serviceability and safety prior to use 1.4 Clear work area of unauthorised personnel prior to and during freefall operations in accordance with workplace procedures 1.5 Check freefall rack for correct operation, make table level, and clear of any foreign material

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Freefall glass	<p>2.1 Inspect glass for faults prior to freefalling and take action in accordance with workplace procedures</p> <p>2.2 Conduct freefall in accordance with industry standards and safety requirements</p> <p>2.3 Identify and report problems occurring during operation to appropriate persons in accordance with workplace procedures</p> <p>2.4 Follow authorised changes in working procedures and/or requirements</p> <p>2.5 Move glass to required location for cutting or processing</p>
3. Complete work	<p>3.1 Label glass in accordance with workplace procedures ensuring there are no projections</p> <p>3.2 Clean work area, dispose of rubbish safely and identify items for recycling in accordance with workplace procedures</p> <p>3.3 Remove tools, equipment and unused materials and store in accordance with workplace procedures</p> <p>3.4 Shut down freefall table and inspect in accordance with manufacturer instructions</p> <p>3.5 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG2003 Operate glass freefall rack and table.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFGG2012 Operate glass freefall rack and table

## Modification History

Release 1. Supersedes and is equivalent to MSFGG2003 Operate glass freefall rack and table.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- followed all pre-freefall inspections and safety procedures to freefall any glass on at least 2 occasions with glass size to be at least 1830mm x 2440mm.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- freefalling of glass:
  - workplace safety system requirements, including personal protective equipment (gloves, gauntlets, hard hat, bolero)
  - work flow requirements
  - qualities and characteristics of annealed and laminated glass, including hazards and handling requirements
  - types, characteristics, safe use, maintenance and limitations of tools and equipment used in freefalling glass:
    - glass handling equipment and hand tools (knuckle saver, suckers, cutters, pliers)
  - principles, techniques and different methods of freefalling glass from a rack to a table (above or to the side), the types of problems that can occur and how to avoid and respond
  - when teamwork is required for large factory run sizes
- procedures for the recording and reporting of damaged and/or broken glass or equipment during freefalling.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

- freefall rack and table
- glass product for freefalling
- glass handling equipment and hand tools
- safety and personal protective equipment
- work orders
- workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGG2013 Move single glass sheets by mechanical means

### Modification History

Release 1. Supersedes and is equivalent to MSFGG2006 Move single glass sheets by mechanical means.

### Application

This unit describes the skills and knowledge required to plan for, and move sheet glass by mechanical means individually and as part of a team.

This unit applies to glass processing workers and glaziers working in accordance with established procedures.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for glass moving	1.1 Read work instructions and identify type and quantity of glass to be relocated 1.2 Identify and follow work health and safety requirements, using all required personal protective equipment 1.3 Identify glass sheets to be moved and estimate or calculate weight using appropriate method 1.4 Identify risks to self, others, material and equipment arising from the required lifting, load carrying, set down or movement of glass 1.5 Correctly identify mechanical handling equipment and teamwork

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	requirements based on the size, weight and type of glass
2. Plan glass movement	2.1 Identify destination for glass and determine routes to be followed 2.2 Compare required clearances to available space and make adjustments 2.3 Plan process for relocating glass in accordance with workplace procedures, and include contingency measures for potential difficulties 2.4 Check proposed process against advisory standards and workplace procedures for compliance
3. Relocate glass	3.1 Set and test equipment settings and safety controls in accordance with workplace procedures with faulty equipment tagged and alternative arrangements made 3.2 Check glass for imperfections and damage prior to movement 3.3 Operate equipment in accordance with approved advisory standards, manufacturer instructions, workplace procedures and safety requirements 3.4 Follow planned process and route and relocate glass without damage to material, personnel or equipment 3.5 Attach required labels and store glass in accordance with workplace procedures ensuring there are no projections 3.6 Check relocation to see that it meets work requirements, and report any differences
4. Complete work	4.1 Clean, maintain and store handling equipment in accordance with workplace procedures 4.2 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG2006 Move single glass sheets by mechanical means.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFGG2013 Move single glass sheets by mechanical means

## Modification History

Release 1. Supersedes and is equivalent to MSFGG2006 Move single glass sheets by mechanical means.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- relocated glass sheets of different types, thicknesses and weights in accordance with safety requirements and all relevant regulations and standards:
  - laminated and/or tempered and annealed float
  - 3 different weights and sizes, with 2 measuring at least 4.0m<sup>2</sup> and weighing at least 100 kg
- used 3 of the following types of equipment:
  - gantry or mobile crane up to 4.9 SWL
  - glass dolly
  - mini crane with vacuum sucker
  - portable lifter
  - scissor grab
  - vacuum rig
- moved sheet glass as part of a team on at least 1 occasion.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for calculation of glass weight
- glass sheet movement by mechanical means:
  - quality, characteristics and behaviour of glass sheet when lifted and moved
  - risks and hazards
  - workplace safety system requirements
  - work flow requirements
  - principles and techniques, the types of problems that may occur and how to avoid and respond
- capabilities, operating processes and procedures for mechanical handling equipment:
  - weight load limits (WWL) and how to determine

- safe working load (SWL) tables and how to use
- gantry cranes up to 4.9 safe working load (SWL)
- scissor grabs
- vacuum rigs
- portable lifter
- features of glass sheet storage systems
  - documentation requirements for glass movement.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - glass sheets to be moved
  - equipment, tools and materials to complete tasks specified in the Performance Evidence
  - safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGG2014 Cut thin glass by hand

### Modification History

Release 1. Supersedes and is not equivalent to MSFGG2004 Process thin glass by hand.

### Application

This unit describes the skills and knowledge required to cut, shape and apply finishing techniques to annealed glass up to 8 mm thick, and laminated glass up to 8.38 mm thick. This may include mirrors, and work may be for residential or commercial purposes.

This unit applies to glass processing workers and glaziers cutting glass in accordance with pre-determined work orders.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify work requirements	1.1 Read work instructions and identify cutting requirements 1.2 Identify and follow work health and safety requirements, using all required personal protective equipment 1.3 Select and check required tools, equipment and materials for suitability, serviceability and safety prior to use 1.4 Plan sequence of work to ensure processing is conducted in a logical order

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Prepare for work	2.1 Select glass cutting table and clear work surface of debris and dust 2.2 Clear work area of obstructions and potential hazards with cullet bins located close to work area 2.3 Check glass for imperfections and damage prior to handling 2.4 Safely place glass to be cut in the required work area using correct manual handling procedures 2.5 Accurately measure glass to minimise waste in accordance with workplace standards 2.6 Set and test equipment and safety controls in accordance with workplace standards
3. Cut glass	3.1 Operate and monitor tools and equipment in accordance with manufacturer instructions and workplace procedures to achieve required cuts within specified tolerances 3.2 Make routine equipment, tool lubrication and adjustments in accordance with manufacturer instructions 3.3 Identify and report problems to appropriate persons, and follow any authorised changes in working procedures 3.4 Inspect completed product for compliance with quality and work order requirements, and repair, reprocess or discard in accordance with workplace procedures
4. Complete work	4.1 Label and store cut glass in accordance with workplace procedures ensuring there are no projections 4.2 Clean work area, safely dispose of rubbish and identify items for recycling in accordance with workplace procedures 4.3 Remove and store tools, equipment and unused materials in accordance with workplace procedures 4.4 Accurately complete required workplace documentation

## **Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Unit Mapping Information**

No equivalent unit.

## **Links**

# Assessment Requirements for MSFGG2014 Cut thin glass by hand

## Modification History

Release 1. Supersedes and is not equivalent to MSFGG2004 Process thin glass by hand.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- undertaken the following in accordance with all safety requirements and Australian Standard AS/NZS 4667:
- for annealed glass, up to 8mm in thickness and up to 1.0 m<sup>2</sup> in size, cut all of the following both in a thickness up to 6mm and in a thickness 6mm or above:
  - freehand cuts using templates for simple shapes other than square
  - straight cuts by hand and speed cutter
  - truncated and radius corners
  - circles
  - fan holes
  - freehand pay holes
- for laminated glass, up to 8.38 mm in thickness and up to 1.0 m<sup>2</sup> in size, cut all of the following at least once:
  - simple shapes other than a square
  - truncated corners
  - ovals
- made straight cuts in laminated glass up to 8.38mm by hand and speed cutter.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- purpose and key provision of Australian Standard AS/NZS 4667 – all sections
- work flow requirements in relation to glass cutting
- mathematical procedures for estimation and measurement, including calculation of area and estimation of glass requirements
- thin glass:
  - qualities and characteristics, including hazards and handling requirements
  - workplace safety system requirements
  - work flow requirements

- common work requirements, including:
  - cut types
  - shaping
  - holes
  - edges
  - how to create a template for cutting
- types, characteristics, safe use, maintenance and limitations of glass cutting tools and equipment, including:
  - cutters, including circle, speed, tungsten wheel
  - cutting tables
  - templates
- cutting and processing techniques, the types of problems that may occur and how to avoid and respond
- quality assurance
- workplace documentation requirements.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - equipment, tools and materials required to complete tasks specified in the Performance Evidence
  - glass product to be cut
  - safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGG2015 Process glass by basic machines

### Modification History

Release 1. Supersedes and is not equivalent to MSFGG2007 Process glass by basic machines.

### Application

This unit describes the skills and knowledge required to shape, drill and edge annealed glass using basic machines involving hand-held and static processes.

This unit applies to glass processing workers and glaziers.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify work requirements	1.1 Read work instructions and identify job requirements 1.2 Identify and follow work health and safety requirements, using all required personal protective equipment 1.3 Select and check required tools, equipment and materials for serviceability and safety prior to use 1.4 Plan sequence of work to ensure processing is conducted in a logical order
2. Prepare for work	2.1 Select glass processing table and clear work surface of debris and dust 2.2 Clear work area of obstructions and potential hazards

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>2.3 Check glass for imperfections and damage prior to handling</p> <p>2.4 Relocate glass to be processed in the work area using appropriate handling techniques</p> <p>2.5 Accurately measure glass to minimise waste in accordance with workplace standards</p> <p>2.6 Identify and test components and controls of machines, including emergency stops and guards and take appropriate action if not in working order</p>
3. Conduct processing operations	<p>3.1 Operate and monitor tools and equipment in accordance with manufacturer instructions and workplace procedures to achieve correct product quality and output within specified tolerances</p> <p>3.2 Make routine equipment, tool lubrication and adjustments in accordance with manufacturer instructions</p> <p>3.3 Identify and report problems to appropriate persons, and follow any authorised changes in working procedures</p> <p>3.4 Inspect completed product for compliance with quality and work requirements and repair, reprocess or discard in accordance with workplace procedures</p>
4. Complete work	<p>4.1 Label and store processed glass in accordance with workplace procedures ensuring there are no projections</p> <p>4.2 Clean work area, safely dispose of rubbish and identify items for recycling in accordance with workplace procedures</p> <p>4.3 Remove and store tools, equipment and unused materials in accordance with workplace procedures</p> <p>4.4 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFGG2015 Process glass by basic machines

## Modification History

Release 1. Supersedes and is not equivalent to MSFGG2007 Process glass by basic machines.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- undertaken the following processes in accordance with all safety requirements and Australian Standard AS/NZS 4667: Quality requirements for cut-to-size and processed glass using basic machines (hand-held and static operation):
  - for annealed glass up to 8mm, and for laminated glass up to 8.38mm:
    - arris
    - flat polish
    - flat grind
    - round and polish
    - mitre edge
    - holes with tungsten drill bits
    - holes with diamond drill bits.
    -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- purpose and key provisions of Australian Standard AS/NZS 4667: (all sections)
- workplace safety system requirements related to glass processing by basic machines
- work flow requirements in relation to glass processing
- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- qualities and characteristics of annealed and laminated glass, including hazards and handling requirements
- common work requirements for work requiring basic machine processing, including: drilling and edging – arising, flat finish, round and mitre bevelling, grinding, polishing
- types, characteristics, safe use, maintenance and limitations of glass cutting tools and equipment, including defect reporting for:
  - diamond drills and/or presses – freestanding, portable, wall-mounted
  - edging machines:
    - diamond or pencil edgers

- finger slotters
- finishing or belt machines,
- hand tools
- pumice or cork polishers
- lubricants
- marking tools
- measuring tools, including tape measures, L-squares and straight edges
- templates
- procedures for basic machine processing, the types of problems that may occur and how to avoid and respond
- quality indicators for processed glass
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - glass product to be processed
  - safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGG2016 Assemble glazing products

### Modification History

Release 1. Supersedes and is not equivalent to MSFGG2009 Fabricate and assemble frames.

### Application

This unit describes the skills and knowledge required to identify work requirements, prepare for work and assemble components for glazing products. Glazing products may be made from aluminium, steel, timber or unplasticised polyvinyl chloride (uPVC).

This unit applies to individuals assembling products in accordance with pre-determined work orders and plans.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

### Unit Sector

Glass and glazing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify work requirements and components	1.1 Read work documentation and identify assembly requirements 1.2 Identify and follow work health and safety requirements 1.3 Plan a logical work sequence suited to the job and workplace procedures
2. Prepare for assembly	2.1 Select and check tools and equipment for suitability, serviceability and safety prior to use 2.2 Select and confirm component parts against specifications 2.3 Check measurements for accuracy, legibility and tolerance, and note and position mating or directional marks 2.4 Set up assembly tools and equipment in accordance with production objectives, manufacturer instructions and workplace

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	procedures
3. Assemble components	3.1 Lay out and assemble components ensuring conformity to specifications, alignment and appropriate fastening 3.2 Attach hardware and fixings in accordance with specifications 3.3 Reveal product once assembled in accordance with job requirements 3.4 Inspect completed product for compliance with specifications and quality requirements, and repair, reprocess or discard in accordance with workplace procedures
4. Complete work	4.1 Label and store completed products in accordance with workplace procedures and Australian Standards 4.2 Clean work area and safely dispose of waste 4.3 Remove and store tools, equipment and unused materials in accordance with workplace procedures 4.4 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFGG2016 Assemble glazing products

## Modification History

Release 1. Supersedes and is not equivalent to MSFGG2009 Fabricate and assemble frames.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- assembled 3 of the following types of glazing products with relevant hardware in accordance with job requirements:
  - double hung
  - casement
  - sashless sliding pack
  - showerscreen framed or semi-frameless
  - sliding
  - wardrobe
- installed all of the following component hardware to products (this may require product in addition to those above):
  - weather seals
  - wheels
  - stays
  - hinges
  - guides
  - locks.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of

- Australian Standards AS 2047: (Sections 6, 7 and 8)
- glazing product assembly:
  - workplace safety system requirements
  - work flow
  - characteristics, uses and limitations of different products
  - how to interpret processing requirements from different types of work documentation
  - types, characteristics, safe use, maintenance and limitations of fabrication tools and equipment:

- assembly benches
- copy routers
- electric and pneumatic powered drills and screwdrivers
- end millers
- frame and sash tooling
- hand tools
- hydraulic and manual presses
- pleuws guns
- pneumatic
- pop rivet guns
- saws, including drop and upcut
- type, characteristics, uses and limitations of other materials used in assembly:
  - fasteners (screws and pop rivets)
  - gaskets
  - hardware
  - plastics
  - sealants
  - tapes
  - timber reveals
  - vinyl
- techniques for product assembly, the types of problems that may occur and how to avoid and respond
- quality indicators for assembled products
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - product materials and components
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFGG3022 Construct and repair leadlight panels

## Modification History

Release 1. Supersedes and is equivalent to MSFGG3014 Construct and repair leadlight panels.

## Application

This unit describes the skills and knowledge required to construct and repair leadlight panels and may involve restoration and conservation of historically important lead lighting works. It includes measuring, design and selection of materials and tools, and disassembly and assembly, weatherproofing and polishing of leadlight panels.

This unit applies to individuals working with designed glass.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Glass and glazing

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify work requirements	1.1 Establish safety, quality and functional performance requirements of the panel 1.2 Recognise and respond to the need for research on the historical importance of the panel 1.3 Inspect leadlight panel to be repaired to identify faults and compare any faults found with customer requirements and any previously identified faults
2. Plan leadlight panel	2.1 Analyse plan or design of leadlight panel to identify work

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
construction/repair	requirements, methods and specifications 2.2 Identify and follow work health and safety requirements 2.3 Plan steps or stages in construction and/or repair, noting check points for required measurements and tests 2.4 Obtain approval of work construction plan in accordance with workplace procedures
3. Identify suitable materials and equipment	3.1 Select and check tools and equipment for suitability, serviceability and safety prior to use 3.2 Select leadlight construction materials according to specification, matching the original texture, colour, thickness and opacity of the stained glass
4. Construct/repair the leadlight panel	4.1 Follow plan to construct and/or repair the leadlight panel 4.2 Conduct checks at the identified points 4.3 Identify and recommend modifications within workplace procedures 4.4 Document modifications to the plan and seek appropriate approvals in accordance with workplace procedures
5. Complete work	5.1 Inspect leadlight panel for quality of work and repair or reconstruct in accordance with workplace procedures 5.2 Clean and store tools, equipment and materials in accordance with workplace procedures 5.3 Clean work area and leave in a safe condition, and dispose or recycle waste in accordance with workplace protocols 5.4 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG3014 Construct and repair leadlight panels.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFGG3022 Construct and repair leadlight panels

## Modification History

Release 1. Supersedes and is equivalent to MSFGG3014 Construct and repair leadlight panels.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- constructed and/or repaired 3 different leadlight panels.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- end use of leadlight panels and required safety, quality and structural standards
- characteristics, including hazards and workplace safety system requirements, associated with the materials used in leadlight panel construction
- operation of tools and equipment used in constructing and/or repairing leadlight panels
- research techniques to establish the historical importance of lead lighting works
- processes and procedures involved in the construction and/or repair process of leadlight panels, including historically important works
- impact of design features of the leadlight panel on purpose, materials and construction
- relevant Australian Standards.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - leadlight panels for repair or plans for new panels
  - glass handling equipment and hand tools
  - safety and personal protective equipment
  - work orders.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGG3023 Apply and handle films

### Modification History

Release 1. Supersedes and is not equivalent to MSFGG3007 Apply and handle films.

### Application

This unit describes the skills and knowledge required to prepare glass surfaces and apply window film. Work may be completed in domestic or commercial environments, including automotive enterprises.

This unit applies to glass processing workers.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking application of window film and coating work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify work requirements	1.1 Read work instructions and identify job requirements 1.2 Identify and follow work health and safety requirements, using all required personal protective equipment 1.3 Identify tools, equipment, accessories and materials for the application of coating and/or film in accordance with workplace procedures 1.4 Read materials safety data sheets (MSDS) and/or product application and safety information, and use to guide work practices

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Note processes, time and safety requirements and use to plan work in a logical sequence
2. Prepare for work	<p>2.1 Select and check required tools, equipment and materials for serviceability and safety prior to use</p> <p>2.2 Check film for application for defects or damage</p> <p>2.3 Measure surfaces and cut materials and templates without causing damage according to accepted industry methods, materials and procedures</p> <p>2.4 Check glass for damage and suitability, and prepare using methods, materials and equipment in accordance with manufacturer instructions and workplace practices</p> <p>2.5 Identify and report any faults and/or flaws in accordance with workplace procedures</p> <p>2.6 Complete required workplace documentation and handle by measuring, cutting and surface preparation outcomes</p>
3. Apply film	<p>3.1 Use equipment and accessories to handle the film in accordance with manufacturer and workplace instructions</p> <p>3.2 Keep surfaces clean and free of contamination in accordance with specifications and procedures</p> <p>3.3 Identify problems and report to appropriate persons in accordance with workplace procedures, and follow authorised changes to work process</p>
4. Inspect tinted product and refurbish work area	<p>4.1 Inspect glass and rectify any film faults in accordance with workplace procedures</p> <p>4.2 Apply Australian Standard sticker in accordance with job requirements</p> <p>4.3 Remove products for storage or further processing as required by workplace procedures</p>
5. Complete work	<p>5.1 Clean work area, dispose of rubbish safely and identify items for recycling in accordance with workplace procedures</p> <p>5.2 Remove tools, equipment and unused materials and store in accordance with workplace procedures</p> <p>5.3 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFGG3023 Apply and handle films

## Modification History

Release 1. Supersedes and is not equivalent to MSFGG3007 Apply and handle films.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed the following in accordance with all safety requirements and job instructions on 2 occasions:
  - accurately cut film from patterns
  - trimmed film on glass
  - followed manufacturer guidelines for the application of films.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- different contexts for the use of coatings and films and the instructions and specifications and requirements that apply in those contexts -
  - Australian Standards
  - statutory requirements, including Australian Design Rules (ADRs)
  - manufacturers (including vehicle manufacturers)
  - insurers
- workplace safety system requirements and relevant technical information for applying film to glass
- work flow requirements in relation to the application of film to glass
- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- qualities and characteristics of glass, including hazards and handling requirements, for the different types of filmed glass
- content of typical work instructions for application of film, including:
  - application techniques
  - colour
  - quantity
  - type
- types, characteristics, uses and limitations of different films, including:
  - decorative film

- reflective
- safety
- security
- solar
- tinted
- types, characteristics, safe use, maintenance and limitations of tools, equipment and materials using in application and handling of films:
- techniques for measuring, cutting, surface preparation and application, the types of problems that may occur and how to avoid and respond
- quality indicators for applied films and coatings

procedures for the recording, reporting and maintenance of workplace records and information.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - area equipped with required safety and personal protective equipment
  - equipment, tools and materials to complete tasks specified in the Performance Evidence
  - glass sheet or product for processing
  - work orders
  - workplace procedures.

## MSFGG3024 Form glass

### Modification History

Release 1. Supersedes and is equivalent to MSFGG3008 Form glass.

### Application

This unit describes the skills and knowledge required to form glass in kilns for manufacture of customised formed glass products. Patterns may be existing moulds or improvised designs.

This unit applies to glass processing workers forming product in accordance with pre-determined work orders.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify work requirements	1.1 Read work instructions and identify job and quality requirements 1.2 Identify and follow work health and safety requirements, using all required personal protective equipment 1.3 Identify the process for obtaining materials and moving completed work to the next process and plan work sequence in a logical order to suit the job 1.4 Establish and maintain communication with others involved with the work
2. Prepare for work	2.1 Select and check required kiln tools, equipment and materials for suitability, serviceability and safety prior to use

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	2.2 Identify and check kiln components and safety controls for correct operation
3. Conduct glass forming operations	3.1 Operate, adjust and monitor kiln and forming equipment in accordance with workplace procedures to ensure correct product quality and output 3.2 Identify and report problems occurring during work operations to appropriate personnel in accordance with workplace procedures 3.3 Follow authorised changes in working procedures and/or requirements 3.4 Inspect product for quality against work instructions, and rework or discard items that do not meet requirements
4. Complete work	4.1 Clean work area, safely dispose of rubbish and identify items for recycling in accordance with workplace procedures 4.2 Remove and store tools, equipment and unused materials in accordance with workplace procedures 4.3 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG3008 Form glass.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFGG3024 Form glass

## Modification History

Release 1. Supersedes and is equivalent to MSFGG3008 Form glass.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- formed glass of 4 differing patterns in accordance with all job and safety requirements using slumping techniques to the capacity of the kiln being used.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace safety system requirements related to the forming of glass, including personal protective equipment
- work flow requirements in relation to forming of glass
- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- qualities and characteristics of glass to be formed, including hazards and handling requirements:
  - float glass
  - patterned glass
  - sheet glass
- content of typical work instructions for glass forming, including:
  - materials to be used
  - pattern or mould to be used
  - process required to complete work tasks
  - number of sheets to be formed and holding area for completed items
  - the correct kiln settings for the glass being formed
- types, characteristics, safe use, maintenance and limitations of glass forming tools, equipment and materials:
  - dowel
  - kilns
  - moulds and items for background patterns
  - sand and patterning material
  - sea shells

- trowels
- wire
- techniques for forming glass, the types of problems that may occur and how to avoid and respond
- quality indicators for formed glass
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - glass processing work area equipped with required safety and personal protective equipment
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - unprocessed product to be formed
  - work orders
  - workplace procedures.
  -

## MSFGG3025 Apply patterns and designs to glass

### Modification History

Release 1. Supersedes and is equivalent to MSFGG3009 Apply patterns and designs to glass.

### Application

This unit describes the skills and knowledge required to apply patterns and/or designs to glass surfaces to manufacture decorative glass products.

This unit applies to glass processing workers.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify work requirements	1.1 Read work instructions and identify job requirements 1.2 Identify and follow work health and safety requirements, using all required personal protective equipment 1.3 Select and check required tools, equipment and materials for serviceability and safety prior to use 1.4 Plan sequence of work to ensure processing is conducted in a logical order
2. Apply pattern or design	2.1 Produce required template from plan or design using software in accordance with workplace practices 2.2 Apply pattern or design template or mask glass surface with appropriate materials in accordance with job requirements

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>2.3 Apply pattern or design to glass surface in accordance with workplace procedures or industry practice</p> <p>2.4 Identify and report problems to appropriate persons, and follow any authorised changes in working procedures</p> <p>2.5 Inspect product for quality of work and repair or discard in accordance with workplace procedures</p>
3. Complete work	<p>3.1 Label processed glass and store in accordance with workplace procedures ensuring there are no projections</p> <p>3.2 Clean work area, safely dispose of rubbish and identify items for recycling in accordance with workplace procedures</p> <p>3.3 Remove and store tools, equipment and unused materials in accordance with workplace procedures</p> <p>3.4 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG3009 Apply patterns and designs to glass.

## Links

# Assessment Requirements for MSFGG3025 Apply patterns and designs to glass

## Modification History

Release 1. Supersedes and is equivalent to MSFGG3009 Apply patterns and designs to glass.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed the following in accordance with all job and safety requirements:
  - set up, processed, uploaded, cut and applied designs from computerised software programs on 2 occasions
  - applied patterns and designs to glass using 2 different methods.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- workplace safety system requirements related to the application of patterns and designs to glass surfaces
- work flow requirements in relation to other stages of the work process
- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- content of typical work instructions for applying patterns and designs, including:
  - material to be used for application of design or pattern
  - material curing time pattern or plan to be followed
  - process required to complete work tasks
  - items to which pattern or design is to be applied
  - holding area for completed items
- qualities and characteristics of glass and materials, including hazards and handling requirements for:
  - annealed glass
  - laminated glass
  - toughened glass
  - mirrors
- types, characteristics, safe use, maintenance and limitations of tools, equipment and materials:
  - digital printing equipment

- etching chemicals
- masking materials
- sandblasting equipment
- screen printing equipment
- templates
- techniques for applying patterns and designs to glass, the types of problems that may occur and how to avoid and respond
- quality indicators for designed glass
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - glass processing work area
  - safety and personal protective equipment
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - glass product
  - work orders
  - workplace procedures.

## MSFGG3026 Laminate glass

### Modification History

Release 1. Supersedes and is equivalent to MSFGG3010 Set up and operate glass laminating equipment.

### Application

This unit describes the skills and knowledge required to set up, operate, monitor and maintain glass laminating equipment.

This unit applies to glass processing workers producing laminated glass in accordance with pre-determined work orders.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Read work instructions and identify work and quality requirements 1.2 Identify and follow work health and safety requirements, using all required personal protective equipment 1.3 Identify quality procedures for each stage of the process 1.4 Plan work sequence in a logical order to suit the job and workplace procedures 1.5 Establish and maintain communication with others involved with the work to ensure efficient work flow coordination, personnel cooperation and safety

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Set up equipment	<p>2.1 Complete pre-operational equipment checks in accordance with workplace procedures</p> <p>2.2 Confirm machine operation through quality checks on first production of finished items</p> <p>2.3 Make adjustments to settings and parameters based on initial quality checks.</p>
3. Conduct glass laminating operations	<p>3.1 Prepare glass to be laminated for the process in accordance with workplace procedures or industry practice</p> <p>3.2 Complete startup and shutdown procedures for equipment in accordance with manufacturer instructions or workplace procedures</p> <p>3.3 Conduct glass delivery and washing procedures in accordance with manufacturer instructions or workplace procedures</p> <p>3.4 Monitor white room conditions and conduct procedures in accordance with manufacturer instructions or workplace procedures</p> <p>3.5 Operate white room hoist in accordance with manufacturer instructions or workplace procedures</p> <p>3.6 Accurately apply interlayer in accordance with work instructions</p> <p>3.7 Operate pre-press oven and glass stacker in accordance with manufacturer instructions or workplace procedures and accurately document required information</p> <p>3.8 Operate air lifter in accordance with manufacturer instructions or workplace procedures</p> <p>3.9 Load, operate and unload autoclave in accordance with manufacturer instructions or workplace procedures</p>
4. Complete work and maintain equipment	<p>4.1 Inspect completed product for compliance with quality and work order requirements and reprocess or discard in accordance with workplace procedures</p> <p>4.2 Test, classify and mark laminated glass in accordance with Australian Standards, and store in designated holding area</p> <p>4.3 Clean work area and safely dispose of rubbish in accordance with workplace procedures</p> <p>4.4 Inspect, maintain and tag equipment in accordance with workplace procedures</p> <p>4.5 Remove and store tools, equipment and unused materials in accordance with workplace procedures</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.6 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG3010 Set up and operate glass laminating equipment.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFGG3026 Laminate glass

## Modification History

Release 1. Supersedes and is equivalent to MSFGG3010 Set up and operate glass laminating equipment.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed the laminating process using 3 different glass types and interlayer thicknesses.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- purpose and key provisions of Australian Standard AS/NZS 2208 – testing requirements
- workplace safety system requirements related to the operation of glass laminating equipment
- work flow requirements relating to the operation of glass laminating equipment, including how the process fits into the overall glass processing system
- the role and importance of communication with others in relation to quality and safety
- mathematical procedures for effective equipment operation and fault investigation
- common items found in work instructions for glass laminating, including:
  - material to be used
  - number of sheets to be laminated and holding area for completed items
  - process required to complete work tasks
  - type, thickness and colour of the interlayer
  - correct machine heat and pressure settings for the materials being used
- qualities, characteristics and uses of different types of laminated glass, including:
  - annealed float glass
  - automotive glass
  - bullet and bandit resistant glass
  - heat-strengthened glass
  - insulated glass
  - patterned laminated glass
  - safety glass
  - toughened glass
- glass and window rating systems for:

- fade control
- noise
- security applications
- characteristics of materials used, and uses of products produced in the glass laminating process
- types, characteristics, safe use, maintenance and limitations of glass laminating equipment:
  - autoclave
  - washing machines
  - hoist
  - pre-press oven
  - standards stamping equipment, including stamp
  - vacuum lifter
  - white room
- procedures for each step of the lamination process, the types of problems that may occur and how to avoid and respond
- quality indicators for laminated glass
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - glass product to be laminated
  - safety and personal protective equipment
  - work orders
  - workplace procedures.
  - Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGG3027 Toughen glass

### Modification History

Release 1. Supersedes and is equivalent to MSFGG3011 Set up and operate glass toughening equipment.

### Application

This unit describes the skills and knowledge required to set up, operate, monitor and maintain glass toughening equipment.

This unit applies to glass processing workers toughening glass in accordance with pre-determined work orders.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Read work instructions and identify job and quality requirements 1.2 Identify and follow work health and safety requirements, using all required personal protective equipment 1.3 Identify quality procedures for each stage of the process 1.4 Plan work sequence in a logical order to suit the job and workplace procedures 1.5 Establish and maintain communication with others involved with the work to ensure efficient work flow coordination, personnel cooperation and safety

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Set up equipment	<p>2.1 Complete pre-operational equipment checks in accordance with workplace procedures</p> <p>2.2 Confirm machine operation through quality checks on first production of finished items</p> <p>2.3 Make adjustments to settings and parameters based on initial quality checks</p>
3. Conduct glass toughening operations	<p>3.1 Prepare glass to be toughened for process in accordance with workplace procedures</p> <p>3.2 Position glass to be toughened on furnace load table and stamp with product identification in accordance with workplace procedures</p> <p>3.3 Load glass into furnace in accordance with manufacturer instructions and workplace procedures</p> <p>3.4 Monitor furnace operation and make adjustments, as required, in accordance with manufacturer instructions or workplace procedures</p> <p>3.5 Identify and report problems occurring during work operations to appropriate persons</p> <p>3.6 Follow correct furnace shutdown and end of shift procedures in accordance with manufacturer instructions and workplace procedures</p>
4. Complete work and maintain equipment	<p>4.1 Inspect completed product for compliance with quality and work order requirements and accept or reject in accordance with workplace procedures</p> <p>4.2 Place completed work in holding area in accordance with workplace procedures</p> <p>4.3 Unload glass from furnace in accordance with manufacturer instructions and workplace procedures</p> <p>4.4 Clean work area and safely dispose of rubbish</p> <p>4.5 Inspect, maintain and tag equipment in accordance with workplace procedures</p> <p>4.6 Remove and store tools, equipment and unused materials in accordance with workplace procedures</p> <p>4.7 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG3011 Set up and operate glass toughening equipment.

## Links

# Assessment Requirements for MSFGG3027 Toughen glass

## Modification History

Release 1. Supersedes and is equivalent to MSFGG3011 Set up and operate glass toughening equipment.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed processing for all of the following at least once:
  - laminated glass
  - multiple thicknesses of annealed glass
  - heat-strengthened glass.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- purpose and key provisions of Australian Standard AS/NZS 2208 – testing requirements
- workplace safety system requirements for the operation of glass toughening equipment
- work flow requirements for the operation of glass toughening equipment, including how the process fits into the overall glass processing system
- the role and importance of communication with others in relation to quality and safety
- mathematical procedures for measurement and fault investigation
- common items found in work instructions for glass toughening:
  - material to be used
  - number of sheets to be toughened and holding area for completed items
  - process required to complete work tasks
  - required machine settings and adjustments
- characteristics of materials used and uses of products produced in the glass toughening process:
  - clear glass
  - coated glass
  - low E glass
  - tinted and patterned annealed glass
- features of the glass toughening process, including the principles, purpose and properties of toughened glass
- types, characteristics, safe use, maintenance and limitations of glass toughening equipment

- toughening furnaces and their component parts
- procedures for each step of the toughening process, the types of problems that may occur and how to avoid and respond
- quality indicators for toughened glass
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - glass product to be toughened
  - safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFGG3028 Select, cut and process materials for glazing products

## Modification History

Release 1. Supersedes and is not equivalent to MSFGG2009 Fabricate and assemble frames, and, MSFGG3020 Use static machines for aluminium and unplasticised polyvinyl chloride (uPVC) fabrication.

## Application

This unit describes the skills and knowledge required to identify work requirements, prepare tools and materials, and cut and process materials for glazing products. Materials may be aluminium, steel, timber or unplasticised polyvinyl chloride (uPVC).

This unit applies to individuals cutting and processing materials in accordance with pre-determined work orders and plans.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking glass and glazing work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Glass and Glazing

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify work requirements	1.1 Read work documentation and identify cutting and processing requirements 1.2 Identify and follow work health and safety requirements 1.3 Plan a logical work sequence suited to the job and workplace

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	procedures
2. Prepare for work	<p>2.1 Select and check tools and equipment for suitability, serviceability and safety prior to use</p> <p>2.2 Identify and match samples signed off by the customer</p> <p>2.3 Check required components against specifications and select from available products</p> <p>2.4 Set and test cutting equipment settings and safety controls in accordance with workplace procedures and manufacturer instructions</p> <p>2.5 Accurately measure materials, and mark to cutting list requirements with most economical use of materials</p>
3. Cut materials	<p>3.1 Reconfirm machine settings through trial cutting on test materials prior to commencement of full cutting process</p> <p>3.2 Cut materials to list requirements in accordance with workplace procedures</p> <p>3.2 Identify problems with the cutting process and make required adjustments to process or equipment</p> <p>3.3 Check and confirm that materials have been correctly and accurately cut to size based on job specifications and repair, reprocess or discard in accordance with workplace procedures</p>
4. Fabricate parts	<p>4.1 Set and test equipment settings and safety controls in accordance with workplace procedures and manufacturer instructions</p> <p>4.2 Position and secure materials in jig to prevent movement</p> <p>4.3 Process materials in accordance with specification</p> <p>4.4 Identify processing problems and make required adjustments to process or equipment</p> <p>4.5 Inspect completed product for compliance with quality and work order requirements and repair, reprocess or discard in accordance with workplace procedures</p>
5. Complete work	<p>5.1 Process and store completed product in accordance with workplace procedures</p> <p>5.2 Remove excess materials for disposal or recycling in accordance with workplace procedures</p> <p>5.3 Clean work area and safely dispose of rubbish</p> <p>5.4 Remove and store tools, equipment and unused materials in</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	accordance with workplace procedures 5.5 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFGG3028 Select, cut and process materials for glazing products

## Modification History

Release 1. Supersedes and is not equivalent to MSFGG2009 Fabricate and assemble frames, and, MSFGG3020 Use static machines for aluminium and unplasticised polyvinyl chloride (uPVC) fabrication.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed all of the following in accordance with work, safety and Australian Standards requirements:
  - produced a cutting list by hand and through use of software
  - identified, selected and checked 3 different extrusion profiles against customer requirements
  - cut:
    - 3 different profiles
    - 3 different lengths to allow 3 different set up and checks of the saw
  - processed materials for 2 different product types by hand:
    - using a jig
    - using hand tools including punches and files
  - processed materials for 2 different product types by machine (must be different to those products processed by hand)
  - demonstrated skills in:
    - identifying the correct processing type
    - identifying the correct die
    - changing the die in the press
    - drilling or crimping
    - precision measurement
    - safe use of a die punch press.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- Australian Standards/New Zealand Standards AS/NZS 4667 and AS1288: their key purpose and how they impact fabrication work

- mathematical procedures for estimation, optimisation and precision measurement
- glazing product cutting and processing:
  - workplace safety system requirements
  - work flow requirements
  - qualities and characteristics of materials used in different glazing products
  - how to interpret cutting and processing requirements from different types of work documentation
  - cutting and processing techniques, the types of problems that may occur and how to avoid and respond:
    - identifying the correct processing type
    - identifying the correct die
    - changing the die in the press
    - drilling or crimping
    - precision measurement
    - safe use of a die punch press
  - installation considerations for different products and how this impacts cutting and processing
  - types, characteristics, safe use, maintenance and limitations of cutting tools and equipment:
    - hack saw
    - drop saw
    - rip saw
    - up cut saw
  - techniques and requirements for calibrating and adjusting cutting equipment
  - types, characteristics, safe use, maintenance and limitations of different jigs and fixtures and die punch presses
  - quality indicators for cut and processed components
- documentation requirements for fabrication work.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGG3029 Assess glass and glazing requirements

### Modification History

Release 1. Supersedes and is equivalent to MSFGG3002 Assess glass and glazing requirements.

### Application

This unit describes the skills and knowledge required to determine and evaluate residential glass and glazing requirements against the requirements of relevant Australian Standards.

This unit applies to glaziers, who apply specialised knowledge in determining compliance requirements for glass and glazing products.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for assessment	1.1 Review work documentation and identify customer requirements and expectations regarding glass and glazing work 1.2 Identify and follow work health and safety requirements 1.3 Accurately record requirements in accordance with workplace procedures and requirements 1.4 Access and review research materials relevant to the assessment
2. Conduct assessment	2.1 Identify influencing factors and their significance, and determine impact on the end product 2.2 Identify products and/or types of glass and determine their

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	application 2.3 Identify optimal solution and confirm specifications
3. Document outcomes	3.1 Accurately document outcomes of assessment in accordance with workplace procedures 3.2 Use outcomes to plan and complete work that meets all compliance requirements

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG3002 Assess glass and glazing requirements.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFGG3029 Assess glass and glazing requirements

## Modification History

Release 1. Supersedes and is equivalent to MSFGG3002 Assess glass and glazing requirements.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- assessed glazing requirements and developed solutions that meet the requirements of Australian Standards AS 1288, AS 2208 and AS/NZS 4668 where requirements individually or cumulatively present situations that involve:
  - at least 4 different types of glazing
  - safety glazing requirements, including thickness and materials limitations
  - impacts of human activity
  - wind loading requirements
  - installation parameters.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- Australian Standards, their purpose and key provisions:
  - AS 1288 (sections 1, 4, 5 and 8 plus overview of 6,7 and 9)
  - AS/NZS 2208 (overview all sections)
  - AS/NZS 4667 (overview all sections)
- mathematical procedures for estimation and measurement
- the assessment process and factors that influence assessment, including impacts of:
  - wind
  - humans
- formats and required inclusions for glass and glazing work orders.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - product information
  - AS/NZS documentation as detailed in the Knowledge Evidence
  - customer requirements
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGG3030 Process glass by automatic machines

### Modification History

Release 1. Supersedes and is equivalent to MSFGG3006 Process glass by automatic machines.

### Application

This unit describes the skills and knowledge required create jobs and to program and operate automatic glass processing equipment for cutting, drilling, shaping and edging of glass.

This unit applies to glass processing workers.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Create job	1.1 Read work instructions and identify design requirements 1.2 Select and use software features to create job that meets requirements 1.3 Transfer file to machine in required format
2. Program machine	2.1 Check readiness of machine for operation in accordance with workplace procedures 2.2 Accurately calculate and enter information required by machine in accordance with processing requirements
3. Operate and monitor	3.1 Use system controls correctly to start required process

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
machine	3.2 Communicate with other team members in accordance with workplace procedures 3.3 Monitor and respond to system alerts in accordance with machine operating procedures
4. Complete work	4.1 Unload glass from machine in accordance with safety procedures and check against job and quality requirements 4.2 Label and store processed glass in accordance with workplace procedures ensuring there are no projections 4.3 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG3006 Process glass by automatic machines.

## Links

# Assessment Requirements for MSFGG3030 Process glass by automatic machines

## Modification History

Release 1. Supersedes and is equivalent to MSFGG3006 Process glass by automatic machines.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- used automatic glass processing equipment for all of the following:
  - cutting from optimisation data
  - drilling
  - edging.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- purpose and key provisions of Australian Standard AS/NZS 4667:2000 Quality requirements for cut-to-size and processed glass
- workplace safety system requirements related to glass processing by automatic machine
- work flow requirements in relation to glass processing
- mathematical procedures for machine programming
- qualities and characteristics of different types of glass, including hazards and handling requirements
- features of software used in automatic processing in relation to design and file transfer
- types, characteristics, safe use, maintenance and capabilities of computer-navigated and Computer Numerical Control (CNC) machines:
  - bevellers and brilliant cutter
  - diamond saws
  - edgers
  - laser glass cutters
  - straight line and shape annealed and laminated glass cutters
  - water jet machines
  - marking tools
  - measuring tools, including tape measures, L-squares and straight edges
  - templates

- types of information that needs to be entered into automatic machines:
  - glass thickness
  - size
  - type
  - stock sheet size
  - off-cut sizes
- procedures for automatic machine processing, the types of problems that may occur and how to avoid and respond
- quality indicators for processed glass
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - glass product to be processed
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGG3031 Cut thick glass

### Modification History

Release 1. Supersedes and is not equivalent to MSFGG3004 Process thick glass.

### Application

This unit describes the skills and knowledge required create jobs and to program and operate automatic glass processing equipment for cutting, drilling, shaping and edging of glass.

This unit applies to glass processing workers.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify work requirements	1.1 Read work instructions and identify cutting requirements 1.2 Identify and follow work health and safety requirements, using all required personal protective equipment 1.3 Select and check required tools, equipment and materials for serviceability and safety prior to use 1.4 Plan sequence of work to ensure cutting is conducted in a logical order
2. Prepare for cutting	2.1 Select glass cutting table and clear work surface of debris and dust 2.2 Clear work area of obstructions and potential hazards and locate cullet bins close to work area

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>2.3 Check glass for imperfections and damage prior to handling</p> <p>2.4 Relocate glass to be cut to the work area using correct manual handling procedures</p> <p>2.5 Accurately measure glass to minimise waste within specified tolerances in accordance with workplace standards</p> <p>2.6 Set and test equipment settings and safety controls in accordance with workplace standards</p>
3. Cut glass	<p>3.1 Operate and monitor tools and in accordance with manufacturer instructions and workplace procedures to achieve required cuts within specified tolerances</p> <p>3.2 Make routine equipment, tool lubrication and adjustments in accordance with manufacturer instructions</p> <p>3.3 Identify and report problems to appropriate persons, and follow any authorised changes in working procedures</p> <p>3.4 Inspect completed product for compliance with quality and work order requirements and repair, reprocess or discard in accordance with workplace procedures</p>
4. Complete work	<p>4.1 Label and store processed glass in accordance with workplace procedures ensuring there are no projections</p> <p>4.2 Clean work area, safely dispose of rubbish and identify items for recycling in accordance with workplace procedures</p> <p>4.3 Remove and store tools, equipment and unused materials in accordance with workplace procedures</p> <p>4.4 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for MSFGG3031 Cut thick glass

## Modification History

Release 1. Supersedes and is not equivalent to MSFGG3004 Process thick glass.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- undertaken the following in accordance with all safety and AS/NZS 4667 requirements:
  - cut at least 3 different thicknesses of annealed glass (between 8mm and 25mm thick)
  - cut at least 2 different thicknesses of laminated glass (between 8.38mm and 25mm thick)
  - completed all of the following on both annealed and laminated glass:
    - straight cuts by hand and diamond saws
    - simple shapes
    - truncated and radius corners
    - circles and ovals.
    -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- purpose and key provisions of Australian Standard AS/NZS 4667
- mathematical procedures for optimisation
- types of information commonly found in work instructions and how to interpret
- thick glass:
  - qualities and characteristics, including hazards and handling requirements
  - workplace safety system requirements
  - work flow requirements
  - cutting techniques, the types of problems that may occur and how to avoid and respond
  - laminate requirements as glass thickness increases
  - quality assurance
  - workplace documentation requirements
- types, characteristics, safe use, maintenance and limitations of glass cutting tools and equipment:
  - circle
  - speed

- tungsten wheel.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - glass sheet and/or product greater than 8mm to be cut
  - equipment, tools and materials to complete tasks specified in the Performance Evidence
  - safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGG3033 Install shower screens

### Modification History

Release 1. Supersedes and is not equivalent to MSFGG3015 Fabricate and install shower screens and wardrobe doors.

### Application

This unit describes the skills and knowledge required to identify work requirements, prepare tools and materials, and install shower screens.

This unit applies to glaziers installing products in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking glass and glazing work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify work requirements	1.1 Read work documentation and identify installation requirements 1.2 Identify and follow work health and safety requirements 1.3 Determine required installation methods and materials, and estimate quantities 1.4 Plan a logical work sequence suited to the job and workplace procedures

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Prepare for installation	<p>2.1 Select and check tools and equipment for suitability, serviceability and safety prior to use</p> <p>2.2 Select and confirm type and quantity of components and materials against specifications</p> <p>2.3 Measure and prepare components and materials using required tools in accordance with specifications</p>
3. Identify site conditions and constraints	<p>3.1 Consult customer and obtain permission prior to site inspection</p> <p>3.2 Identify site safety hazards and take corrective action to reduce injury to self and others</p> <p>3.3 Identify other on-site characteristics for their impact on the installation process</p> <p>3.4 Take accurate site measurements and confirm against job specification</p> <p>3.5 Protect existing fixtures and fittings through the application of suitable coverings</p>
4. Install products	<p>4.1 Prepare location for shower screen in accordance with job requirements</p> <p>4.2 Move product into place in accordance with safety requirements</p> <p>4.3 Prepare product for installation and make adjustments to ensure correct fit</p> <p>4.4 Fix product using the selected method and in accordance with recognised Australian standards</p> <p>4.5 Use solvents and sealants in accordance with manufacturer recommendations and Australian Standards</p> <p>4.6 Remove excess sealing material and clean product after fixing</p> <p>4.7 Inspect completed installation against specifications and quality requirements, and rectify any defects</p>
5. Complete work	<p>5.1 Obtain and document customer approval of the completed installation in accordance with workplace procedures</p> <p>5.2 Remove scraps and off-cuts for disposal or recycling in accordance with workplace procedures</p> <p>5.3 Clean work area and safely dispose of rubbish</p> <p>5.4 Remove tools, equipment and unused materials in accordance with</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	workplace procedures 5.5 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for MSFGG3033 Install shower screens

## Modification History

Release 1. Supersedes and is not equivalent to MSFGG3015 Fabricate and install shower screens and wardrobe doors.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- installed the following in accordance with work, safety and Australian Standards requirements:
  - 1 frameless shower screen
  - 1 framed or semi-frameless shower screen.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- Australian Standards, purpose and key provisions of AS 3740
- mathematical procedures for estimation and measurement
- organisational customer communication standards and protocols
- types, characteristics and uses of different shower screen products, including:
  - sliding shower door
  - pivot shower door
  - semi-frameless
  - frameless
  - framed
- shower screen installation:
  - workplace safety system requirements
  - work flow requirements
  - qualities and characteristics of glass and framing materials
  - site characteristics that may impact installation and how to respond
  - considerations for selection of fixing methods
  - installation techniques, the types of problems that may occur and how to avoid and respond
  - fabrication methods for different products and how this impacts installation
  - basic fabrication techniques for on-site product adjustments
  - quality assurance
  - types, characteristics, safe use, maintenance and limitations of tools and equipment

- uses and limitations of adhesives and sealants
- documentation requirements for installation work.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGG3034 Install residential windows and doors

### Modification History

Release 1. Supersedes and is not equivalent to MFGG3016 Fabricate and install residential windows and doors.

### Application

This unit describes the skills and knowledge required to identify work requirements, prepare tools and materials, and install window and door products in residential environments. This may include wardrobe doors.

This unit applies to glaziers installing products in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking glass and glazing work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing

### Elements and Performance Criteria

Elements	Performance Criteria

# Assessment Requirements for MSFGG3034 Install residential windows and doors

## Modification History

Release 1. Supersedes and is not equivalent to MFGG3016 Fabricate and install residential windows and doors.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- installed the following in accordance with work, safety and Australian Standards requirements
  - 1 residential window with hardware
  - 1 residential door with hardware.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- Australian Standards, their purpose and key provisions:
  - AS1288
  - AS 2047: sections 6 and 8
  - AS/NZS 4667
- mathematical procedures for estimation and measurement
- organisational customer communication standards and protocols
- types, characteristics and uses of residential window and door products and associated hardware:
  - materials
  - door styles:
    - bi-fold
    - sliding
    - timber framed
    - hinged
  - window styles:
    - awning
    - casement
    - double glazed
    - double hung

- louvre
- sliding
- framed, including timber and other materials
- residential window and door installation:
  - workplace safety system requirements
  - work flow requirements
  - site characteristics that may impact installation and how to respond
  - considerations for selection of fixing methods
  - installation techniques, the types of problems that may occur and how to avoid and respond:
    - preparing the opening
    - installing and fixing the product
    - adding hardware
  - fabrication methods for different products and how this impacts the installation process
  - basic window and door fabrication techniques for on-site product adjustments
  - quality assurance
  - types, characteristics, safe use, maintenance and limitations of installation tools and equipment
  - uses and limitations of adhesives and sealants for different products and installation contexts
  - documentation requirements for installation work.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# Assessment Requirements for MSFGG3035 Install mirrors and glass splashbacks

## Modification History

Release 1. Supersedes and is not equivalent to MSFGG3021 Prepare and install mirrors.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- installed the following in accordance with work, safety and Australian Standards requirements where installations either individually or cumulatively require both adhesive and mechanical fixing:
  - 1 framed mirror
  - 1 frameless mirror
  - 1 glass splashback with at least 1 power outlet
  - 1 mirror wardrobe
  - 1 mirror or glass splashback return.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- Australian Standards, their purpose and key provisions:
  - AS/NZS 4667
- regulation relating to proximity of glass products to kitchen appliances
- mathematical procedures for estimation and measurement
- organisational customer communication standards and protocols
- types, characteristics and uses of mirror and glass splashback products and associated hardware:
  - framed
  - frameless
  - return
  - wall
  - safety and security (mirrors)
  - tinted (mirrors)
- mirror and glass splashback installation:
  - workplace safety system requirements
  - work flow requirements
  - site characteristics that may impact installation and how to respond

- installation techniques, the types of problems that may occur and how to avoid and respond
- fabrication methods for different products and how this impacts installation
- considerations for selection of fixing methods
- basic fabrication techniques for on-site product adjustments
- quality assurance
- types, characteristics, safe use, maintenance and limitations of installation tools and equipment
- uses and limitations of adhesives and sealants
- documentation requirements for installation work.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFGG3036 Install commercial glazing products

## Modification History

Release 1. Supersedes and is not equivalent to MSFGG3017 Fabricate and install commercial glazing.

## Application

This unit describes the skills and knowledge required to identify work requirements, prepare tools and materials, and install flat and curved glazing products in commercial environments such as shopfronts, doors and windows.

This unit applies to individuals installing products. They may or may not also fabricate the products.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking glass and glazing work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Glass and Glazing

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify work requirements	1.1 Read work documentation and identify installation requirements 1.2 Identify and follow work health and safety requirements 1.3 Determine required installation methods and materials, and estimate quantities 1.5 Plan a logical work sequence suited to the job and workplace procedures

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Prepare for installation	<p>2.1 Select and check tools and equipment for suitability, serviceability and safety prior to use</p> <p>2.2 Select and confirm type and quantity of components and materials against specifications</p> <p>2.3 Measure and prepare components and materials using required tools in accordance with specifications</p>
3. Identify site conditions and constraints	<p>3.1 Consult customer and obtain permission prior to site inspection</p> <p>3.2 Identify site safety hazards and take corrective action to reduce injury to self and others</p> <p>3.3 Identify other on-site characteristics for their impact on the installation process</p> <p>3.4 Take accurate measurements and confirm against job specification</p> <p>3.5 Apply covering material to protect existing fixtures and fittings in accordance with workplace procedures</p>
4. Prepare frame/opening and materials	<p>4.1 Remove glass in accordance with safety and work requirements</p> <p>4.2 Assess frame and/or opening to ensure suitability for re-glazing in accordance with customer requirements and Australian Standards</p> <p>4.3 Report defective frames for repair or replacement in accordance with workplace procedures</p> <p>4.4 Prepare frame and/or opening to receive glass through check of size against specifications, removal of sealant remains and surface preparation</p> <p>4.5 Prepare fixing and sealing materials by mixing or cutting to length in accordance with job requirements</p>
5. Fit glass	<p>5.1 Fix glass to the frame using the selected method and in accordance with recognised industry procedures and Australian Standards</p> <p>5.2 Use solvents and sealants in accordance with manufacturer recommendations and Australian Standards</p> <p>5.3 Remove excess sealing material and clean glass and frame after fixing</p>
6. Complete work	<p>6.1 Check completed installation for compliance with customer requirements, specifications and Australian Standards</p> <p>6.2 Clean and store tools, equipment and materials in accordance with</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	workplace procedures 6.3 Clean work area, leave in a safe condition and dispose of waste or recycle in accordance with workplace protocols 6.4 Accurately complete required workplace documentation

# Assessment Requirements for MSFGG3036 Install commercial glazing products

## Modification History

Release 1. Supersedes and is not equivalent to MSFGG3017 Fabricate and install commercial glazing.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed 2 commercial project installations in accordance with work, safety and Australian Standards requirements, to include at least 2 of the following:
  - combined window and door project
  - frameless commercial windows
  - shopfront and door
  - shopfront and door using sub-head and sub-sill.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- Australian Standards, their purpose and key provisions:
  - AS/NZS 4667
  - AS 1288
- mathematical procedures for estimation and measurement
- types, characteristics and uses of commercial glazing products
- commercial glazing product installation:
  - workplace safety system requirements
  - work flow requirements
  - qualities and characteristics of glass and framing materials, including curved glass
  - qualities, characteristics, uses and limitations of component hardware:
    - concealed overhead closer
    - guides
    - hinges
    - locks
    - pivots
    - weather seals
    - wheels

- stays
- site characteristics that may impact installation and how to respond
- installation techniques, the types of problems that may occur and how to avoid and respond
- fabrication methods for different products and how this impacts installation
- basic fabrication techniques for on-site product adjustments
- quality assurance
- types, characteristics, safe use, maintenance and limitations of installation tools and equipment
- uses and limitations of adhesives and sealants in glazing installations
- documentation requirements for installation work.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# Assessment Requirements for MSFGG3037 Install structural glazing products

## Modification History

Release 1. Supersedes and is not equivalent to MSFGG3018 Prepare and install architectural engineered glazing.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed 3 of the following structural glazing installations in accordance with work, safety and Australian Standards requirements:
  - balustrade
  - curtain walls
  - glass floor glazing
  - overhead glazing
  - suspended or spider assembly
  - toughened assembly.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- Australian Standards, their purpose and key provisions:
  - AS/NZ1288
  - AS/NZS 4667
  - AS 1288
  - AS4285
- mathematical procedures for estimation and measurement
- organisational customer communication standards and protocols
- types, characteristics, uses and limitations of structural glazing products, including:
  - aluminium glazing systems, including planar assemblies
  - balustrading
  - curtain wall systems
  - glass floor glazing
  - panel wall systems (hung and stacked)
  - overhead glazing
  - spider assemblies

- toughened assemblies
- structural glazing product installation:
  - workplace safety system requirements
  - work flow requirements
  - qualities and characteristics of structural glass, acrylic and framing materials
  - qualities, characteristics, uses and limitations of component hardware:
    - concealed overhead closer
    - guides
    - hinges
    - locks
    - pivots
    - weather seals
    - wheels
    - stays
  - site characteristics that may impact installation and how to respond
  - installation techniques, the types of problems that may occur and how to avoid and respond
  - fabrication methods for different products and how this impacts installation
  - basic fabrication techniques for on-site product adjustments
  - quality assurance
- types, characteristics, safe use, maintenance and limitations of installation tools and equipment
- uses and limitations of adhesives and sealants in structural glazing installations
- role of engineering consultancy in structural glazing and how this impacts the installation role
- documentation requirements for installation work.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFGG3038 Conduct commercial and structural reglazing

## Modification History

Release 1. Supersedes and is equivalent to MSFGG3019 Conduct commercial and structural re-glazing.

## Application

This unit describes the skills and knowledge required to replace glass in commercial and structural applications.

This unit applies to glaziers working in accordance with pre-determined work orders.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking glass and glazing work. Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Glass and Glazing

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify work requirements	1.1 Identify work requirements for the type of glass to be used and the method of fixing from work documentation and communication with the customer 1.2 Identify and follow work health and safety requirements for commercial reglazing 1.3 Plan a logical work sequence suited to the job and workplace procedures

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Prepare for work	<p>2.1 Take accurate site measurements and establish clearance and wedge requirements</p> <p>2.2 Select glass and frames to match job requirements and check for type, size and imperfections against job requirements and relevant Australian Standards</p> <p>2.3 Select glass fixing method to meet specifications</p> <p>2.4 Select and check tools and equipment for suitability, serviceability and safety prior to use</p>
3. Identify site conditions and constraints	<p>3.1 Consult customer and obtain permission prior to site inspection</p> <p>3.2 Identify site safety hazards and take corrective action to reduce injury to self and others</p> <p>3.3 Identify other on-site characteristics for their impact on the installation process</p> <p>3.4 Take accurate site measurements and confirm against job specification</p> <p>3.5 Protect existing fixtures and fittings through the application of suitable coverings</p>
4. Prepare frame and materials	<p>4.1 Remove glass in accordance with safety requirements</p> <p>4.2 Assess frame condition to ensure suitability for reglazing in accordance with Australian Standards</p> <p>4.3 Report defective frames for repair or replacement in accordance with workplace procedures</p> <p>4.4 Prepare frame to receive glass in accordance with specifications</p> <p>4.5 Prepare fixing and sealing materials by mixing or cutting to length, in accordance with job requirements</p>
5. Cut and fit glass	<p>5.1 Safely cut glass using appropriate equipment in accordance with specific job requirements</p> <p>5.2 Fix glass to the frame using the selected method in accordance with workplace procedures and Australian Standards</p> <p>5.3 Use solvents and sealants in accordance with manufacturer recommendations and Australian Standards</p> <p>5.4 Remove excess sealing material and clean glass and frame with suitable cleaning agents after fixing</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
6. Complete work	<p>6.1 Check completed installation for compliance with customer requirements, specifications and Australian Standards</p> <p>6.2 Clean and store tools, equipment and materials in accordance with workplace procedures</p> <p>6.3 Clean work area and leave in a safe condition and dispose of waste or recycle in accordance with workplace protocols</p> <p>6.4 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG3019 Conduct commercial and structural re-glazing.

## Links

# Assessment Requirements for MSFGG3038 Conduct commercial and structural reglazing

## Modification History

Release 1. Supersedes and is equivalent to MSFGG3019 Conduct commercial and structural re-glazing.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- accurately measured glass in accordance with job specifications for all of the following:
  - curved glass
  - doors
  - sliding tracks
  - shopfronts and returns
  - curtain wall
  - structural and/or overhead glazing
- used 3 different commercial products, one of which must be curved glass
- used the following glazing methods:
  - pocket
  - flush
  - channel glazing
  - structural and double glazing.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- Australian Standards, their purpose and key provisions:
  - AS 1288
  - AS/NZS 466
- regulations and standards for safe working at heights and on scaffolding
- mathematical procedures for estimation and measurement
- organisational customer communication standards and protocols
- types, characteristics and uses of commercial and structural glazing products
- commercial and structural reglazing:
  - workplace safety system requirements
  - work flow requirements for fitting glass

- qualities and characteristics of glass, including hazards and handling requirements
- qualities and characteristics of different frame types and how this impacts the glazing process, including:
  - plastic
  - aluminium
  - steel
  - solid timber
- considerations for selection of fixing methods
- techniques, methods, materials and processes for glazing and reglazing, the types of problems that may occur and how to avoid and respond
- types of silicone products and their use, including structural silicone
- fabrication methods for different products and how this impacts installation
- basic fabrication techniques for on-site product adjustments
- quality assurance
- types, characteristics, safe use, maintenance and limitations of installation tools and equipment.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a commercial site for glazing and reglazing
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGG3039 Manually move glass

### Modification History

Release 1. Supersedes and is not equivalent to MSFGG2005 Apply basic glass handling, and, MSFGG3001 Store and handle glass.

### Application

This unit describes the skills and knowledge required to plan for and move sheets of glass by hand, both individually and as part of a team. Movement of glass may be within a glass workplace or between the workplace and another site.

This unit applies to glass processing workers and glaziers working in accordance with established procedures.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for glass handling	1.1 Read instructions and identify the type and quantity of glass to be relocated 1.2 Identify and follow work health and safety requirements using all required personal protective equipment throughout the work 1.3 Identify sheet glass to be moved and estimate or calculate weight, shape, points of balance, and dimensions 1.4 Identify risks to self, others, material and equipment arising from required lifting, load carrying, set down or movement of glass 1.5 Identify the need for equipment or team lifting based on nature of

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	glass and level of risk
2. Plan glass movement	2.1 Identify destination for glass and determine routes to be followed 2.2 Compare required clearances to available space and make any required adjustments 2.3 Plan process for relocating glass, and include contingency measures for potential difficulties 2.4 Check proposed process against advisory standards and workplace procedures for compliance
3. Relocate glass	3.1 Check glass for imperfections and damage prior to movement 3.2 Lift, lower and carry glass, in accordance with approved local work health and safety codes and workplace procedures 3.3 Coordinate team lifting tasks in accordance with approved local work health and safety codes and workplace procedures 3.4 Follow planned process and route and relocate glass without damage to material, personnel or equipment 3.5 Attach required labels and store glass in accordance with workplace procedures ensuring there are no projections 3.6 Check relocation against work requirements, and report any differences
4. Complete work	4.1 Clean, maintain and store handling equipment in accordance with workplace procedures 4.2 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFGG3039 Manually move glass

## Modification History

Release 1. Supersedes and is not equivalent to MSFGG2005 Apply basic glass handling, and, MSFGG3001 Store and handle glass.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed each of the following in accordance with all safety and manual handling procedures on at least 1 occasion:
  - individual movement of annealed equal to or above 1.2 m<sup>2</sup>
  - individual movement of laminated glass equal to or above 1.2 m<sup>2</sup>
  - team movement of annealed glass equal to or above 4.5 m<sup>2</sup>
  - team movement of laminated glass equal to or above 4.5 m<sup>2</sup>
- moved glass in the following contexts:
  - loading and unloading of trucks
  - between trolleys and work benches.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- key information from work health and safety regulations relating to manual tasks and national code of practice:
  - role and responsibilities of the employer and employees in relation to manual handling safety
  - manual handling techniques that support safe work practice:
    - preparing the load
    - preparing the environment
    - using the stronger muscles in the legs where possible, rather than spinal muscles
    - maintaining a neutral spine when lifting and carrying
    - using two hands to lift or carry
    - keeping the load close to the body and centre of gravity
    - avoiding lifting objects above shoulder height
    - minimising repetitive movements
    - positions not held for long periods of time
    - avoiding twisting by repositioning feet while turning

- mathematical procedures for calculation of glass weight
- glass manual handling:
  - quality, characteristics and behaviour of glass sheet when lifted and moved
  - risks and hazards
  - workplace safety system requirements
  - work flow requirements
  - principles and techniques of freefalling glass
  - the types of problems that may occur and how to avoid and respond
  - specific considerations when:
    - loading and unloading trucks
    - moving between trolleys and/or stillages, work benches and racks
- types, uses and limitations of tools and equipment used to support manual handling of glass
- features of glass sheet storage systems
- processes and communication protocols for team lifting
- workplace documentation requirements for glass movement.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources:
  - glass storage and handling area
  - trolleys and/or stillages
  - work benches
  - racks
  - glass sheet to be relocated
  - safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFGG3040 Move block and bulk glass sheet by mechanical means

## Modification History

Release 1. Supersedes and is equivalent to MSFGG3003 Move block and bulk glass sheet by mechanical means.

## Application

This unit describes the skills and knowledge required to plan for and move block and bulk flat glass by mechanical means in workplaces which are involved in the manufacture, processing and/or installation of sheet glass.

This unit applies to glass processing workers.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Glass and Glazing

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for the task	1.1 Read work instructions and identify type and quantity of glass to be relocated 1.2 Identify and follow work health and safety requirements, using all required personal protective equipment 1.3 Identify blocks of glass sheet to be moved and estimate or calculate weight using appropriate method 1.4 Identify risks to self, others, material and equipment arising from the required lifting, load carrying, set down or movement of glass 1.5 Correctly identify mechanical handling equipment based on the

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	size, weight and type of glass
2. Plan glass movement	<p>2.1 Identify destination for glass and routes to be followed based on work order or storage procedures</p> <p>2.2 Compare required clearances to available space and make required adjustments</p> <p>2.3 Plan process for relocating glass in accordance with workplace procedures, and include contingency measures for potential difficulties</p> <p>2.4 Check proposed process against advisory standards and workplace procedures for compliance</p>
3. Relocate glass	<p>3.1 Set and test equipment settings and safety controls in accordance with workplace procedures with faulty equipment tagged and alternative arrangements made</p> <p>3.2 Check glass for imperfections and damage prior to movement</p> <p>3.3 Operate equipment in accordance with approved advisory standards, manufacturer instructions, workplace procedures and safety requirements</p> <p>3.4 Follow planned process and route and relocate glass without injury or damage to material and equipment</p> <p>3.5 Label glass in accordance with workplace procedures, ensuring there are no projections</p> <p>3.6 Check relocation against work requirements, and report any differences to relevant personnel</p>
4. Complete work	<p>4.1 Clean, maintain and store handling equipment in accordance with workplace procedures</p> <p>4.2 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG3003 Move block and bulk glass sheet by mechanical means.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFGG3040 Move block and bulk glass sheet by mechanical means

## Modification History

Release 1. Supersedes and is equivalent to MSFGG3003 Move block and bulk glass sheet by mechanical means.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- relocated mid-range (at least 2440x3660mm) block glass in accordance with safety requirements and all relevant regulations and Australian Standards:
  - on 3 different occasions
  - used block lifters in conjunction with gantry cranes
  - completed relocations that involve at least 2 of the following:
    - trucks
    - containers
    - freefall or fixed racks or frame trolley
- relocated end caps and/or cases using chains and/or slings in conjunction with gantry cranes at least once.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for calculation of glass weight
- block and bulk glass movement by mechanical means:
  - quality, characteristics and behaviour of block glass sheet when lifted and moved
  - risks and hazards
  - workplace safety system requirements
  - work flow requirements
  - principles and techniques, the types of problems that may occur and how to avoid and respond
- capabilities, operating processes and procedures for mechanical handling equipment:
  - gantry cranes
  - block lifters
  - slings and chains (Australian Standards AS 1418 and licensing requirements)
- specific issues associated with the loading and unloading of containers

- features of block and bulk glass storage systems
- documentation requirements for glass movement.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - glass storage and handling area
  - equipment, tools and materials as specified in the Performance Evidence
  - block and bulk glass sheet to be relocated
  - safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGG3041 Manufacture insulated glass units

### Modification History

Release 1. Supersedes and is equivalent to MSFGG3013 Set up and operate insulated glass unit manufacturing equipment.

### Application

This unit describes the skills and knowledge required to set up and operate insulated glass unit (IGU) manufacturing equipment to process two sheets of glass that are separated by a spacer and sealed to form an airtight unit and conducting associated quality testing.

This unit applies to glass processing workers producing insulated glass units (IGUs) in accordance with pre-determined work orders.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Read work instructions and identify job and quality requirements 1.2 Identify and follow work health and safety requirements, using all required personal protective equipment 1.3 Identify quality procedures for each stage of the process 1.4 Plan work sequence in a logical order to suit the job and workplace procedures 1.5 Establish and maintain communication with others involved with the work to ensure efficient work flow coordination, personnel

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	cooperation and safety
2. Set up equipment	<p>2.1 Complete pre-operational equipment checks in accordance with workplace procedures</p> <p>2.2 Confirm machine operation through quality checks on first production of finished items</p> <p>2.3 Make adjustments to settings and parameters based on initial quality checks</p>
3. Conduct IGU manufacturing operations	<p>3.1 Load and orient glass sheets into IGU machine using the appropriate mechanical and automated handling equipment</p> <p>3.2 Assemble IGU spacers in accordance with specification and workplace procedures</p> <p>3.3 Operate IGU machine to wash and dry glass and to press the unit using any required additives</p> <p>3.4 Operate primary and secondary seal equipment in accordance with workplace procedures</p> <p>3.5 Conduct testing for water vapour (dewpoint) and integrity of sealing (moisture) in accordance with workplace procedures</p>
4. Complete work and maintain equipment	<p>4.1 Inspect completed product for compliance with quality and work order requirements and reprocess or discard in accordance with workplace procedures</p> <p>4.2 Quarantine, label and store serviceable units in accordance with industry standards and workplace procedures</p> <p>4.3 Clean work area and safely dispose of rubbish</p> <p>4.4 Clean and inspect IGU machine for serviceability in accordance with workplace procedures</p> <p>4.5 Inspect, maintain and tag equipment in accordance with workplace procedures</p> <p>4.6 Remove and store tools, equipment and unused materials in accordance with workplace procedures</p> <p>4.7 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG3013 Set up and operate insulated glass unit manufacturing equipment.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFGG3041 Manufacture insulated glass units

## Modification History

Release 1. Supersedes and is equivalent to MSFGG3013 Set up and operate insulated glass unit manufacturing equipment.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit and:

- prepared, set up and manufactured units of 2 different thicknesses and conducted the appropriate quality testing of 2 differing insulated glass unit (IGU) configurations to the capacity of the IGU machine in accordance with all safety and Australian Standards requirements.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- purpose and key provisions of Australian Standards – glass and window rating systems for insulation applications and when IGUs are appropriate:
  - AS/NZS 2208
  - AS/NZS 4666
- workplace safety system requirements related to the operation of IGU manufacturing equipment
- work flow requirements relating to the operation of IGU manufacturing equipment, including how the process fits into the overall glass processing system
- the role and importance of communication with others in relation to quality and safety
- mathematical procedures for calculation of IGU weight
- common items found in work instructions for IGU operations, including:
  - material to be used
  - process required to complete work tasks
  - the required size of the units
  - number of IGUs required and holding area for completed items
- characteristics of materials used and uses of products produced in the IGU manufacturing process
- glass and window rating systems for insulation applications
- types, characteristics, safe use, maintenance and limitations of tools and equipment
- characteristics and uses of other material used, including:

- procedures for each step of the IGU process, the types of problems that may occur and how to avoid and respond
- quality indicators for finished products
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - glass product to be processes
  - safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGG3042 Process glass by semi-automatic machines

### Modification History

Release 1. Supersedes and is equivalent to MSFGG3005 Process glass by semi-automatic machines.

### Application

This unit describes the skills and knowledge required to cut, drill, shape and edge glass using semi-automatic glass processing equipment.

This unit applies to glass processing workers.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify work requirements	1.1 Read work instructions and identify job requirements 1.2 Identify and follow work health and safety requirements, using all required personal protective equipment 1.3 Determine quality standards and identify procedures in accordance with workplace requirements and industry standards 1.4 Plan sequence of work to ensure processing is conducted in a logical order
2. Prepare for work	2.1 Identify components and controls of machines, including emergency stops and guards, and take appropriate action if not in working order in accordance with workplace procedures

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>2.2 Accurately calculate and enter information required by machine for required process</p> <p>2.3 Clear work area of obstructions and potential hazards</p> <p>2.4 Identify and locate glass to be processed and check for imperfections and damage using appropriate handling techniques</p>
3. Conduct processing operations	<p>3.1 Operate and monitor machines in accordance with manufacturer instructions and workplace procedures to ensure correct product quality and output</p> <p>3.2 Make required routine lubrication and adjustments of machines and/or equipment</p> <p>3.3 Identify problems occurring during work operations and report to appropriate persons in accordance with workplace procedures, and follow any authorised changes in working procedures</p> <p>3.4 Inspect completed product for quality of work and repair, reprocess or discard in accordance with workplace procedures.</p>
4. Complete work	<p>4.1 Label processed glass and store in accordance with workplace procedures ensuring there are no projections</p> <p>4.2 Clean work area, safely dispose of rubbish and identify items for recycling in accordance with workplace procedures</p> <p>4.3 Remove and store tools, equipment and unused materials in accordance with workplace procedures</p> <p>4.4 Accurately complete required workplace documentation</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG3005 Process glass by semi-automatic machines.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFGG3042 Process glass by semi-automatic machines

## Modification History

Release 1. Supersedes and is equivalent to MSFGG3005 Process glass by semi-automatic machines.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- set up and used semi-automatic glass processing equipment in accordance with all safety and Australian Standards requirements as follows:
  - 3 of the following machines:
    - straight line edger
    - straight line beveller
    - single and/or double head glass drill
    - glass washer and dryer
    - shaped beveller
    - glass cutting table
  - 3 of the following processes:
    - cutting
    - drilling
    - edging
    - washing and drying
    -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- purpose and key provisions of Australian Standard AS/NZS 4667
- workplace safety system requirements related to glass processing by semi-automatic machine
- work flow requirements in relation to glass processing
- mathematical procedures for estimation and measurement, including calculation of area and estimation of material requirements
- qualities and characteristics of float and laminate glass, including hazards and handling requirements
- types, characteristics, safe use, maintenance and limitations of semi-automatic machines:

- cutting tables
- milling machines
- shape cutters
- single and double head diamond drill machine
- straight line and variable angle edgers
- straight line annealed and laminated glass cutters
- washing machines
- types, characteristics, safe use, maintenance and limitations of other tools and equipment used:
  - lubricants
  - marking tools
  - measuring tools, including tape measures, L-squares and straight edges
  - templates
- procedures for semi-automatic machine processing, the types of problems that may occur and how to avoid and respond
- quality indicators for processed glass
- procedures for the recording, reporting and maintenance of workplace records and information.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - equipment, tools and materials to complete tasks in the Performance Evidence
  - glass product to be processed
  - safety and personal protective equipment
  - work orders
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGG4011 Manage glass industry production scheduling

### Modification History

Release 1. Supersedes and is equivalent to MSFGG4003 Manage glass industry production scheduling.

### Application

This unit describes the skills and knowledge required to plan, monitor and adjust schedules to meet operational requirements in a glass industry production operation using planning and systems control software. It involves communication of production scheduling plans and issues with key personnel. Production schedules may relate to daily, weekly and/or monthly production.

This unit applies to senior production personnel who use complex, interrelated production information to optimise operations.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Glass and Glazing.

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify production requirements	1.1 Accurately identify production requirements from analysis of sales forecasts, stock holding and other relevant information 1.2 Identify and confirm production priorities through evaluation of documentation and consultation with key stakeholders
2. Confirm resource requirements	2.1 Confirm stock levels of raw materials, packaging components and consumables against production requirements 2.2 Determine equipment capacity and human resources to meet

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	production requirements
3. Develop production schedule	<p>3.1 Develop production schedule to meet demand and delivery timelines within production capacity and budget</p> <p>3.2 Establish production schedule that minimises stock and product holdings and maximises production efficiency</p> <p>3.3 Establish and maintain communication with other key production personnel</p> <p>3.4 Document production schedule and make available to relevant personnel in a timely manner and in format suited to the audience</p>
4. Monitor production	<p>4.1 Identify actual or potential barriers through regular production monitoring</p> <p>4.2 Monitor resource usage rates and identify potential shortages</p> <p>4.3 Identify and assess unplanned events that could affect the schedule and put appropriate action plans put in place</p>
5. Adjust production schedule	<p>5.1 Assess production schedule adjustments to take account of changed conditions and negotiate and communicate changes to relevant production personnel in a timely manner</p> <p>5.2 Identify resource implications of amended schedule and assess resources to meet requirements</p> <p>5.3 Identify and communicate potential failure to meet delivery deadlines to relevant personnel in a timely manner</p> <p>5.4 Accurately amend schedule documentation in accordance workplace procedures</p>
6. Review production schedule	<p>6.1 Identify, investigate and report variances in production against schedule in accordance with workplace procedures</p> <p>6.2 Seek feedback and input from personnel responsible for implementing the schedule</p> <p>6.3 Identify improvement opportunities from research and consultation</p> <p>6.4 Revise scheduling process to reflect identified opportunities and communicate to relevant personnel</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFGG4003 Manage glass industry production scheduling.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFGG4011 Manage glass industry production scheduling

## Modification History

Release 1. Supersedes and is equivalent to MSFGG4003 Manage glass industry production scheduling.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- used planning and systems control software to manage production scheduling over a complete production scheduling period.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- the role and scope of the scheduling function, including:
  - different stakeholders
  - information required for the scheduling process
  - communication methods and channels
  - flow of information to and from the scheduling process
  - impact of scheduling for related planning, purchasing, production and despatch processes
  - consequences of failing to meet delivery timelines
- principles of operation of glass processing plant and/or equipment
- interactions and communications systems between plant units within the entire plant and the architecture and location of the glass process and/or production equipment
- characteristics of the following and production process to determine the most efficient plan to meet production requirements
  - glass raw materials and/or ingredients
  - packaging components
  - consumables
- methods used to monitor actual to planned production, including systems software and key performance indicators, where these are collected on a real-time basis
- factors to be taken into account in planning the schedule, including interrelationships between:
  - customer requirements
  - equipment uses and maintenance

- stock levels and supply options
- glass product specifications, tolerances and applicable Australian Standards
- glass plant capacity to ensure that production quantities and timelines are achievable
- competencies required by the work process and competencies held by the work team
- product compatibility
- specific glass plant process operations and interactions between glass plant items and/or processes
- transport capacity
- hierarchy of control and basis of control for glass plants
- supplier capacity and timeframes
- conditions that can affect achievement of a production schedule, including conditions that are unusual or unplanned, and related options for response
- stakeholders to be consulted and/or notified of production schedule and related amendments, including the information relevant to each group or person and recording systems and requirements
- options for maximising resource utilisation and minimising waste, including options for alternate resource allocation in response to unplanned events
- quality assurance and process improvement procedures
- procedures for the recording, reporting and maintenance of workplace records and information.

## Assessment Conditions

Skills must have been demonstrated in a glass and glazing production workplace.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFGN2001 Make measurements and calculations

### Modification History

Release 2. Supersedes and is equivalent to MSFGN2001 Make measurements and calculations, (Release 1).

Release 1. New unit of competency

### Application

This unit of competency describes the skills and knowledge required to identify the measuring equipment required in work task, and make and record accurate measurements and calculations. It includes identifying and responding to routine and non-routine problems with the process.

The unit applies to any individual taking measurements and making calculations as part of their job role.

**No licensing, legislative or certification requirements apply to this unit at the time of publication.**

### Pre-requisite Unit

Not applicable.

### Unit Sector

Generic

### Elements and Performance Criteria

Elements Elements describe the essential outcomes.	Performance Criteria Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Identify required measurements and equipment	1.1	Select measuring equipment suited to the task
	1.2	Identify measuring units to be used, and the level of detail required, from work documents
	1.3	Check condition and calibration of measuring equipment and confirm it is fit for purpose
2. Take measurements	2.1	Make justified estimate of range of results that may be

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
		obtained
	2.2	Identify and take account of external factors affecting measurement accuracy
	2.3	Take measurements using mathematical techniques suited to task
	2.4	Compare measurements against range of expected results
	2.5	Check accuracy and correctness of numerical information
	2.6	Record results to required level of detail
3. Carry out calculations	3.1	Identify measurement data to be used for calculations from work instructions
	3.2	Determine calculation methods and techniques suited to task
	3.3	Make justified estimate of range of quantities that may be obtained
	3.4	Carry out calculations and check accuracy of results
	3.5	Record results to required level of detail
4. Address routine and non-routine problems	4.1	Identify known faults that can occur during measurement activity
	4.2	Identify and take necessary action on causes of routine faults
	4.3	Log problems according to workplace procedures
	4.4	Identify and report non-routine problems to designated personnel

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

Oral communication skills to:	<ul style="list-style-type: none"> <li>• communicate ideas and information, and report problems</li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret familiar workplace documentation, including:</li> <li>• work instructions: job sheets, cutting lists, plans, drawings and designs</li> <li>• project plans and briefs</li> <li>• product and material specifications</li> </ul>

## Unit Mapping Information

Release 2. Supersedes and is equivalent to MSFGN2001 Make measurements and calculations (Release 1).

Release 1. New unit of competency.

# Assessment Requirements for MSFGN2001 Make measurements and calculations

## Modification History

Release 2. Supersedes and is equivalent to MSFGN2001 Make measurements and calculations (Release 1).

Release 1. New unit of competency

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- work from specific project plans or briefs to accurately determine and cost the quantities of materials or products for a minimum of three different projects.

In the course of determining and costing the above projects, the person must:

- record estimation of results that may be obtained
- use measuring, calculating, and recording devices
- check and record results.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- purpose for measuring and calculating in workplace context
- mathematical principles and problem-solving strategies to make basic measurements and calculations
- uses and limitations of the following measuring equipment:
  - calculators
  - calipers
  - computers
  - laser or equivalent technology
  - rulers
  - squares
  - tapes measures
  - weighing scales
- workplace procedures and protocols relating to:
  - handling materials and products while undertaking measurement to minimise damage
  - recording and reporting outcomes of measurement and calculation
  - reporting non-routine problems
  - quality standards

- requirements of working with others in a team

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to:

- project plans and briefs
- measuring and calculating equipment specified in the knowledge evidence
- recording equipment required to demonstrate the performance evidence
- quality standards and enterprise procedures.

**Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.**

## MSFGN2002 Move and store materials and products

### Modification History

Release 2. Supersedes and is equivalent MSFGN2002 Move and store materials and products (Release 1).

Release 1. New unit of competency. Supersedes and is equivalent to LMFGN2002B Move and store materials and products.

### Application

This unit of competency describes the skills and knowledge required to move, store and record stocks of materials and products. It involves establishing suitable areas for the required storage, as well as suitable methods for stacking and storing. The unit requires the use of workplace technology to record stock movement in workplace inventory or records systems.

The unit applies to any individual moving and storing materials and products as part of their job role.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Unit Sector

Generic

### Elements and Performance Criteria

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare to store materials and products	1.1	Identify materials and products to be stored according to work instructions
	1.2	Identify potential uses of materials and products, and frequency of use or of required access
	1.3	Determine size and shape of materials and products, and

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
		special storage requirements
	1.4	Locate required instructions, care labels, and stock identification information
	1.5	Forward product re-order documentation to required personnel in a timely manner when it is required and according to workplace procedures
2. Establish storage areas	2.1	Select storage area suitable for type and quantity of materials and products
	2.2	Obtain required workplace clearances for use of storage area
	2.3	Clear storage area of waste and contaminants and install, or have installed, required safety equipment
	2.4	Plan storage area to safely and effectively position goods in line with workplace handling and storing procedures and requirements
	2.5	Organise access and working space to enable safe lifting and use of required manual handling equipment and forklifts
3. Move materials and products	3.1	Select and access any assistance and equipment required for lifting and handling activity according to workplace procedures
	3.2	Complete movement activities using required handling equipment and according to work instructions, work health and safety (WHS) requirements, and workplace procedures
	3.3	Forward safe storage materials and products to required personnel in line with established work practices
	3.4	Observe condition of materials and products on arrival at storage area and return items below specification according to workplace procedures
4. Store materials and products and finalise activity	4.1	Stack materials and products appropriately for weight loading, size and crushability and observe any requirements for separation of particular types of hazardous or incompatible materials and products
	4.2	Store materials and products according to WHS requirements,

Elements	Performance Criteria	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
		material and product specifications and workplace procedures
	4.3	Locate materials and products in a manner that enables access to frequently required items
	4.4	Record stock movement and storage details in inventory or records system according to established workplace protocols
	4.5	Seek and respond to feedback from others to continuously improve work performance

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

Numeracy skills to:	<ul style="list-style-type: none"> <li>• identify and interpret familiar and simple mathematical information relating to:               <ul style="list-style-type: none"> <li>• material and product identification information</li> <li>• length, mass, volume/capacity, and temperature measures</li> <li>• weight load capacity of storage shelves</li> </ul> </li> <li>• order and group materials and products based on their shape, measurement, and weight in order to correctly stack and store them</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• communicate information and report non-routine problems:               <ul style="list-style-type: none"> <li>• speaking clearly</li> <li>• asking questions to gain information</li> </ul> </li> </ul>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret routine workplace documentation, including work instructions and WHS requirements</li> </ul>
Technology skills to:	<ul style="list-style-type: none"> <li>• use workplace technology when moving and storing materials and products, including inventory systems, equipment, and measuring and recording devices</li> </ul>

## Unit Mapping Information

Release 2. Supersedes and is equivalent MSFGN2002 Move and store materials and products, (Release 1).

Release 1. New unit of competency. Supersedes and is equivalent to LMFGN2002B Move and store materials and products.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFGN2002 Move and store materials and products

## Modification History

Release 2. Supersedes and is equivalent MSFGN2002 Move and store materials and products, (Release 1).

Release 1 - New unit of competency. Supersedes and is equivalent to LMFGN2002B Move and store materials and products.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit on at least one occasion. It must include the ability to:

- Apply safe handling requirements for equipment, products and materials, including use of personal protective equipment
- Plan and organise activities, including the preparation and layout of the storage site to avoid any backtracking or work flow interruptions
- Communicate ideas and information to enable confirmation of work requirements and specifications and the reporting of work outcomes and problems
- Follow work instructions, operating procedures and inspection practices to:
  - minimise the risk of injury to self or others
  - prevent damage to goods, equipment and products
  - maintain required production output and product quality
  - Establish and maintain storage areas for:
    - Use a range of non-regulated materials handling devices
- Collect, organise and understand information related to the movement and storage of materials and products, work orders, plans and safety procedures
- Use checking and inspection techniques to anticipate movement and storage problems, avoid re-working and avoid wastage
- Use workplace technology related to movement and storage, including inventory systems, tools, equipment, and measuring and recording devices

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work health and safety (WHS) procedures, practices, and regulations specific to moving and storing materials and products:
  - controlling hazards and risks
  - using firefighting equipment, first aid equipment
  - operating non-regulated material-handling machines and appliances

- using required PPE and clothing
- workplace procedures and protocols relating to:
  - safe handling, lifting, and storing of materials and products
  - obtaining workplace clearances for use of storage area
  - stacking and storing according to:
    - work flow requirements of materials and products
    - product dimensions and specifications
  - selecting and using controls and safety equipment to manage risk when moving and storing items
  - returning received materials and products that are below specification
  - reporting non-routine problems
  - recording and reporting in system of stock inventory and/or records
  - disposing of waste safely and sustainably
  - cleaning and storing equipment used in moving and storage process
- potential hazards associated with moving and storing materials and products:
  - fire and explosion
  - security issues
  - operator safety in handling and lifting items
  - hazardous materials and dangerous goods
- special storage requirements:
  - maintaining contaminant-free materials and products
  - safe storage arrangements
- impact of material and product characteristics and specifications on storing process:
  - stacking according to weight loading, size and crushability of materials and products
  - storage of perishable and non-perishable inventory
  - separation of hazardous or incompatible materials and products
- factors affecting storage arrangements:
  - potential damage to materials and products from other stored items
  - potential damage to stored items, including crushing, scratching, and contamination
  - frequency of required access and use
  - height, weight, and size of items
- types, characteristics, uses, and limitations of the following items required for moving and storing the items described in performance evidence:
  - tools and equipment:
    - manual materials handling equipment
    - non-motorised lifting and movement aids
    - open and enclosed pallets
    - pre-fabricated and fixed shelving
  - non-regulated material-handling machines and appliances
- weight loading capacity of storage shelves used in performance evidence

- requirements of working with others in a team

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to tools, materials, equipment and specifications for the work described in the performance evidence above, including:

- products and materials and storage facilities required to demonstrate the performance evidence
- tools and equipment specified in the knowledge evidence, including non-regulated material-handling machines and appliances
- workplace documentation specified in knowledge evidence:
  - work instructions
  - WHS procedures, regulations, and workplace procedures.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## MSFGN3001 Read and interpret work documents

### Modification History

Release 2. Supersedes and is equivalent MSFGN3001 Read and interpret work documents, (Release 1).

Release 1. New unit of competency. Supersedes and is equivalent to LMFGN3001B - Read and interpret work documents.

### Application

This unit of competency describes the skills and knowledge required to identify type and purpose of work document, read and interpret the document, and plan work in response. It also includes the handling and management of documentation.

The unit applies to any individual reading and interpreting work documents as part of their job role.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Unit Sector

Generic

### Elements and Performance Criteria

Elements	Performance Criteria	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Identify type and purpose of work document	1.1	Identify key information relevant to own work in documentation
	1.2	Locate and evaluate explanatory and additional information needed to interpret document
	1.3	Seek clarification to confirm the intention of information where necessary

<b>Elements</b>	<b>Performance Criteria</b>	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
2. Interpret document	2.1	Identify and interpret information required for job planning
	2.2	Identify and interpret design and style features identified by industry-recognised terms in documentation
	2.3	Compare document design and style features with other sources, based on job needs
3. Plan own work sequence	3.1	Identify work sequence, tasks, and required tools and equipment, from documentation
	3.2	Identify stages of work and where checks against specifications must be made
	3.3	Check work plan specifications for accuracy against drawings and original documentation and identify and rectify errors
4. Maintain documentation	4.1	Handle plans and documents according to workplace procedures
	4.2	Keep supplementary explanatory documentation and modification information according to workplace procedures
	4.3	File and store all documentation for easy retrieval and according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

Numeracy skills to:

- use mathematical ideas and techniques to correctly interpret content of workplace documents

Technology skills to:

- use workplace technology to access, file and store workplace documentation

## Unit Mapping Information

Release 2. Supersedes and is equivalent MSFGN3001 Read and interpret work documents, (Release 1).

Release 1. New unit of competency Supersedes and is equivalent to LMFGN3001B - Read and interpret work documents.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFGN3001 Read and interpret work documents

## Modification History

Release 2. Supersedes and is equivalent MSFGN3001 Read and interpret work documents, (Release 1).

Release 1. New unit of competency Supersedes and is equivalent to LMFGN3001B - Read and interpret work documents.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- locate, read, and interpret at least ten different work documents, which must include at least one of each of the following:
  - Australian Standards relevant to sector
  - manufacturer technical instructions and specifications
  - real or simulated local work documents, including:
    - building codes required for a project
    - job procedures
    - safe work instructions or equivalent
    - safety data sheets (SDS)
    - visual material and/or photographs
    - work plans
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise information management

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- different types of workplace documentation, both hard copy and digital, their key features and formats:
  - Australian Standards
  - building codes
  - job procedures
  - manufacturer technical instructions and specifications
  - SDS
  - work plans
- conventions and symbols of plans, drawings, and specifications
- workplace procedures for filing and storing documentation

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to:

- suitable facilities, equipment and resources, including all documentation specified in the Performance Evidence
- modelling of industry operating conditions, including time constraints for document review.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

## MSFGN3002 Estimate and cost job

### Modification History

Release 3. Supersedes and is equivalent to MSFGN3002 Estimate and cost job (Release 2).

Release 2. Assessment Requirements amended. Supersedes and is equivalent to MSFGN3002 Estimate and cost job (Release 1).

Release 1. New unit of competency. Supersedes and is equivalent to LMFGN3002B - Estimate and cost job.

### Application

This unit of competency describes the skills and knowledge required to obtain job information, estimate the net cost of providing products and services, and calculate the final cost to the customer. It includes developing customer quotations.

The unit applies to workers who cost jobs for individual customers in line with established costing procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Unit Sector

Generic

### Elements and Performance Criteria

<b>Elements</b> Elements describe the essential outcomes.	<b>Performance Criteria</b> Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Gather job information	1.1	Obtain details of customer requirements in line with job and workplace requirements
	1.2	Record job specifications based on information gathered
	1.3	Source and develop details relating to delivery points and methods of transportation

<b>Elements</b>	<b>Performance Criteria</b>	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
2. Estimate time and labour	2.1	Estimate required material types and quantities or service type based on specifications
	2.2	Estimate labour requirements based on specifications
	2.3	Identify time requirements to manufacture and/or install product(s), or perform service(s) and estimate other costs that may be incurred based on specifications
3 Calculate costs	3.1	Calculate and document total cost of providing product or service based on estimates
	3.2	Determine and document allowances for overheads and mark-up percentages according to workplace procedures
	3.3	Calculate and document final cost to customer according to workplace procedures
4. Complete final documentation	4.1	Check and verify costing details according to workplace procedures
	4.2	Identify and resolve costing errors or anomalies
	4.3	Prepare accurate customer quotation according to workplace formats
	4.4	File and store costing and quotation documentation for future reference according to workplace procedures

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria of this unit of competency.

Technology skills to:

- use calculators and computer software for costings and preparing quotations

## Unit Mapping Information

Release 3. Supersedes and is equivalent to MSFGN3002 Estimate and cost job (Release 2).

Release 2. Assessment Requirements amended. Supersedes and is equivalent to MSFGN3002 Estimate and cost job (Release 1).

Release 1. New unit of competency. Supersedes and is equivalent to LMFGN3002B - Estimate and cost job.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFGN3002 Estimate and cost job

## Modification History

Release 3. Supersedes and is equivalent to MSFGN3002 Estimate and cost job (Release 2).

Release 2. Text missing from Assessment Requirements reinstated

Release 1. New unit of competency. Supersedes and is equivalent to LMFGN3002B - Estimate and cost job.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements, performance criteria, and foundation skills of this unit, which must include the ability to:

- estimate and cost three different jobs that each have different requirements in terms of:
  - scope and nature of product and/or service
  - labour costs
  - material costs
  - quantities of material required
  - overheads associated with the job
- use the following mathematical processes correctly in estimating and costing the above three jobs:
  - estimation
  - calculation of percentage mark-ups
  - calculation of GST
- use workplace technology related to the estimation and validation of job costs
- work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- ways in which job information may be gathered, including:
  - on-site inspection and measurement
  - customer discussion
  - review of documentation
- products and/or services for which costings are being prepared, including:
  - sources of information
  - features, options and suitability for different customer requirements
  - legal and ethical considerations

- costs involved in providing products/services:
  - materials
  - labour rates and their components
  - production time and cost
  - transport and delivery
  - overhead components
- industry sector and enterprise costing and quoting procedures:
  - mark-up percentages
  - application of GST
  - documentation formats and inclusions for quotations
  - terms and conditions included in quotations
  - checking and approval processes
- workplace procedures and protocols for:
  - establishing information on customer requirements
  - recording job specifications
  - checking and verifying costing details
  - filing and storing costing and quotation documentation
- mathematical processes used to estimate and cost jobs:
  - estimation
  - the four basic mathematical operations: addition, subtraction, multiplication, and division
  - calculation of percentage mark-ups
  - calculation of GST

## Assessment Conditions

Assessment must occur in the workplace, or in a simulated environment that reflects workplace conditions and contingencies.

Access is required to:

- use of suitable facilities, equipment and resources, including:
  - product/service information
  - costing and quotation procedures and documentation
  - technology for calculation of costs
- modelling of industry operating conditions, including time constraints for preparation of costings and quotations.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards

# MSFGN4001 Research and meet ethical and compliance requirements

## Modification History

Release 1. Supersedes and is not equivalent to MSFFDT2015 Investigate legal requirements for design, and, MSFID4011 Determine work health and safety (WHS) implications of interior effects.

## Application

This unit describes the skills and knowledge required to research and use information that supports ethical and compliant work practice or product specification in the relevant industry. It includes the requirement to be able to maintain currency of knowledge.

This unit applies to any individual whose work involves taking responsibility for determining and following the compliance regimes and ethical frameworks that apply to an area of work. This may include work in design, manufacture and service and/or product provision.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

	<p>unethical approaches</p> <p>1.5 Organise and store gathered information in a format that allows for ongoing use</p>
2. Use information in work practice	<p>2.1 Recognise work situations where ethical and compliance requirements must be considered</p> <p>2.2 Apply and adapt specific and relevant information to the work situation and maintain accurate work records</p> <p>2.3 Communicate and promote ethical and compliance considerations to clients and colleagues based on the work situation</p> <p>2.4 Recognise actual or potential non-compliance or unethical practice and use effective problem-solving to develop response</p> <p>2.5 Recognise situations requiring specialist expert advice and assess and obtain credible sources of assistance</p>
3. Maintain currency of knowledge	<p>3.1 Identify and use opportunities to maintain knowledge of current compliance requirements and ethical frameworks</p> <p>3.2 Share updated knowledge with colleagues and clients and support improved practice through discussion</p> <p>3.3 Identify situations where work practices could be improved to meet compliance and ethical responsibilities</p> <p>3.4 Support improved practice through proactive engagement in review and adjustment of processes and protocols</p>

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to research information using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFGN4001 Research and meet ethical and compliance requirements

## Modification History

Release 1. Supersedes and is not equivalent to MSFFDT2015 Investigate legal requirements for design, and, MSFID4011 Determine work health and safety (WHS) implications of interior effects.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- researched, interpreted and used ethical and compliance information to address 3 different work situations or product specifications:
  - used digital research methodologies
  - navigated 3 different information sources, 1 of which must be a government website
- developed compliant and cost-effective responses to 2 different issues of non-compliance and 1 ethical issue.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- sources of information and advice on compliance and ethical practice:
  - local, state, territory or commonwealth government departments or regulatory agencies
  - industry associations
  - Internet
  - legal professionals
  - media
  - unions
- online research methodologies and how to assess the credibility of online sources
- objectives and primary components of laws, codes, standards and licensing requirements that impact on businesses in the furnishing industry, relevant to the individual sector:
  - Australian Consumer Law
  - Australian Standards
  - duty of care imposed by the Law of Torts
  - fundamentals of contract law
  - import / export regulations
  - intellectual property and copyright

- National Construction Code
- sustainability – sourcing and use of materials
- work health and safety
- the following aspects of the above laws, regulations, codes and standards:
  - auditing and inspection regimes
  - key business insurances
  - key practices that are prohibited
  - main consequences of non-compliance
  - need to apply for and maintain business or occupational licensing
  - requirements for record keeping and acceptable record keeping mechanisms
  - requirements to develop and implement plans, policies and procedures
  - rights and responsibilities of employees and employers
  - statutory reporting requirements
- ethical issues of specific relevance to the furnishing sector, and strategies that support ethical practice, including in the area of sustainability
- the relationship between compliance and ethics
- workplace policies, procedures and protocols:
  - how they are/should be developed
  - processes for review, including consultation and mechanisms for input.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - information technology for research.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

## MSFID4012 Decorate residential interiors

### Modification History

Release 1. Supersedes and is equivalent to MSFID4002 Decorate residential interiors.

### Application

This unit describes the skills and knowledge required to analyse the design brief, conduct research and generate and refine decoration concepts for existing residential interior spaces. It includes selecting materials and finishes for surface decoration and arranging the objects and elements within the space.

This unit applies to interior decorators who research, analyse and evaluate information from a wide range of different sources to develop decoration solutions.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking interior decoration and design work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Interior Design

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse the project brief	1.1 Evaluate project specifications, parameters and constraints, and confirm with client 1.2 Select work resources based on the needs of the project 1.3 Establish communication with other people involved in the project
2. Conduct research for the design	2.1 Identify and assess aspects of the space that impact on potential solutions through site analysis and measurement

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>2.2 Identify and assess information for relevance to the project brief</p> <p>2.3 Determine functional and planning issues specific to the site and client requirements</p> <p>2.4 Clearly document research outcomes</p> <p>2.5 Develop a project plan that identifies key steps and responsibilities</p>
3. Generate decoration concepts	<p>3.1 Use creative methodologies to generate decoration concepts and themes</p> <p>3.2 Assess concepts against the project brief to select most viable solution</p> <p>3.3 Present concept to client using support documentation suited to the scope of the project</p> <p>3.4 Discuss ideas with client and modify concept according to feedback</p>
4. Design the space	<p>4.1 Generate decoration ideas from the concept</p> <p>4.2 Explore and assess surface materials, finishes and colours for their ability to express the concept</p> <p>4.3 Explore and assess furniture, fixtures, fittings and accessories for their ability to express the concept</p> <p>4.4 Explore and assess the allocation and arrangement of objects within the space</p> <p>4.5 Develop sketches that clearly document the space</p> <p>4.6 Seek client feedback, agree to and record amendments, and revise and refine ideas</p>
5. Revise and refine solution	<p>5.1 Revise and refine planning through a process of reflection and testing</p> <p>5.2 Select finishes, fittings, fixtures, furniture, materials and accessories appropriate to the concept and brief parameters</p> <p>5.3 Select colour scheme that complements the space and creates the required visual experience</p> <p>5.4 Examine environmental aspects of decoration solution, identify areas for improved sustainability and incorporate in line with brief and client requirements</p>
6. Present decoration	6.1 Prepare final presentation for the client choosing presentation

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
solution	<p>method, techniques and media suited to the decoration solution</p> <p>6.2 Clearly explain key features and benefits of the solution</p> <p>6.3 Engage client to gain feedback on decoration solution</p> <p>6.4 Analyse client feedback and response to determine success in achieving client satisfaction</p> <p>6.5 Evaluate work through feedback and own reflection, and identify potential improvements for use in future projects</p>

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to research and present design information using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFID4002 Decorate residential interiors.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFID4012 Decorate residential interiors

## Modification History

Release 1. Supersedes and is equivalent to MSFID4002 Decorate residential interiors.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- developed and presented decoration proposals that meet the requirements of the project brief for 3 interior residential spaces, one of which must comprise multiple rooms.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- key purpose and relevance of Australian Standards and the National Construction Code (NCC) to interior decoration work
- mathematical procedures for estimation and measurement
- type and scope of client and/or project brief that informs interior decoration:
  - budget
  - client preferences
  - aesthetic and functional requirements
  - site characteristics
  - timeline
- types and features of resources that support the provision of design advice, and how they are used, including:
  - research tools and techniques
  - product tools
  - communication tools
- elements and principles of design, their interrelationships, and how they are used in interior decoration
- potential areas for research in an interior decoration project, sources of information and key aspects that impact solutions, including:
  - ergonomics, anthropometrics and proxemics
  - environmental considerations
  - product information:
    - accessories
    - floor finishes

- furniture
- lighting
- soft furnishings
- wall finishes
- window treatments
- design process, key stages and associated planning techniques
- creative design methodologies and how they can be used
- types and features of drawings and other visual presentation techniques used to present interior decoration solutions
- sketching techniques sufficient to represent key elements of interior space.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - spaces for decoration
  - measuring equipment
  - information technology for research and design presentation.

## MSFID4013 Design residential interior lighting

### Modification History

Release 1. Supersedes and is not equivalent to MSFID4008 Assess interior light and recommend light fittings.

### Application

This unit describes the skills and knowledge required to assess natural light and determine supplementary lighting requirements in an existing residential interior space and design lighting for that space.

This unit applies to interior decorators and designers. They analyse and compare information from diverse sources to inform a design solution.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking interior decoration and design work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Interior Decoration and Design

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Interpret lighting requirements	1.1 Evaluate project specifications, parameters and constraints, and confirm with client 1.2 Determine intended space functions and associated activities and desired effects 1.3 Select work resources based on the needs of the project 1.4 Identify key project stakeholders and establish required

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	communication protocols
2. Assess existing orientation and natural light	2.1 Determine natural light and ultraviolet (UV) penetration from site analysis 2.2 Determine aspect and orientation from project brief and building plans 2.3 Examine window treatments and placement for their efficiency in controlling light 2.4 Review selection of colours for walls, ceilings, furnishings and wall hangings for their effect on raising or lowering the effect of light into the space 2.5 Assess methods of site light control and light control devices for their effect on natural light.
3. Determine supplementary lighting requirements	3.1 Identify and assess supplementary lighting sources and their potential to achieve the desired lighting effects 3.2 Research and assess the ongoing maintenance and environmental impact of potential supplementary lighting 3.3 Identify actual and potential location for supplementary lighting and determine required changes to achieve desired outcomes 3.4 Analyse effect of supplementary lighting on the existing or proposed colour spectrum
4. Generate lighting concepts	4.1 Use creative methodologies to generate lighting concepts and themes 4.2 Assess concepts against the project brief to select most viable solution 4.3 Present concept to client using support documentation suited to the scope of the project 4.4 Discuss ideas with client and modify concept according to feedback 4.5 Select lighting options that meet industry standards and accurately document specifications
5. Revise and refine solution	5.1 Revise and refine lighting concepts through a process of reflection and testing 5.2 Examine environmental aspects of lighting solution and identify and integrate options for improved sustainability

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	5.3 Research and select appropriate lighting options that meet industry standards 5.4 Select the final lighting design that best meets the requirements of the brief
6. Present lighting solution	6.1 Document lighting solution using industry symbols and conventions for all fittings and components 6.2 Relate selection of light fittings to layout, including furniture, ceiling forms and natural light 6.3 Develop and document comprehensive schedule for lighting design 6.4 Present lighting solution and clearly explain key features and benefits 6.5 Analyse client feedback and response to determine success in achieving client satisfaction 6.6 Evaluate work through feedback and own reflection, and identify potential improvements for use in future projects

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to research lighting information and document the lighting solution using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for MSFID4013 Design residential interior lighting

## Modification History

Release 1. Supersedes and is not equivalent to MSFID4008 Assess interior light and recommend light fittings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and:

- designed and documented lighting solutions for residential spaces in response to 3 project briefs with varying parameters in terms of:
  - space aspect and orientation
  - type of space
  - different moods or atmospheres to be achieved
  - different activities to be addressed
  - budget.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- type and scope of client and/or project brief information needed to inform research and recommendation:
  - budget
  - client preferences
  - aesthetic and functional requirements
  - site characteristics – size, shape, services, structural considerations
  - timeline
- types and features of resources that support the provision of design advice, and how they are used, including:
  - research tools and techniques
  - product tools
  - communication tools
- mathematical procedures for estimation, measurement and calculation of costings
- basic light characteristics:
  - natural
  - UV
  - interaction between colour and light

- how aspect and orientation impact light and lighting selection
- supplementary lighting:
  - effects on the colour spectrum
  - special effects that can be achieved
  - technical terminology
- sources of information on lighting products and devices
- types, characteristics, uses and limitations of different lighting products and devices in different spaces
- switching options and requirements
- features and effects of different lighting devices:
  - bulb types
  - ceiling lights
  - flood lights
  - lamps
  - spot lights
  - wall lights
- methods of light control and their uses in different situations
- how furnishing selections impact light in an interior space
- the relationship between lighting and key parameters for:
  - atmosphere and mood
  - activities undertaken in the space
- how to identify basic aspects of electricity board that may impact lighting choices:
  - age of board
  - number of circuits
  - safety switches
  - signs of rewiring
- Australian lighting standards and drawing conventions for lighting formats.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - sites for lighting
  - measuring equipment
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFID4014 Produce digital models and documentation for interior design projects

## Modification History

Release 1. Supersedes and is equivalent to MSFID5014 Use CAD applications to complete models and documentation for interior design projects.

## Application

This unit describes the skills and knowledge required to review information about the design brief and proposed solution, and then use the features of computer-aided design (CAD) applications to produce models and extract two dimensional (2D) and three dimensional (3D) drawings and documentation in accordance with all standard practice notations and drawing protocols.

This unit applies to interior designers, including kitchen and bathroom designers.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine project requirements	1.1 Review and confirm project brief and its parameters 1.2 Identify drawing and documentation requirements based on examination of design concepts and proposed solutions 1.3 Confirm and check calculations and measurements for accuracy and cohesion 1.4 Select and prepare computing equipment and suitable software for use based on the project needs

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Create customised template in accordance with individual workplace requirements
2. Produce 3D model and documentation	<p>2.1 Design, create and apply layering strategy for project</p> <p>2.2 Develop architectural library for relevant design components</p> <p>2.3 Create custom designed library parts in accordance with operating system</p> <p>2.4 Apply text, line, font and dimension styles</p> <p>2.5 Use pan, zoom and orbit tools to navigate in the 2D and 3D windows within the model</p> <p>2.6 Add text and notations to the drawing in accordance with drawing protocols</p> <p>2.7 Add dimensions to the drawing in accordance with drawing protocols</p> <p>2.8 Produce 3D detailed suite of rooms, complete with fenestration and doors on appropriate layers</p> <p>2.9 Use advanced features of drawing tools to generate 3D form</p>
3. Create 2D drawings and edit components	<p>3.1 Create drawings from the model created</p> <p>3.2 Use editing tools correctly to modify drawing elements and text</p> <p>3.3 Modify, change or transfer object properties to a different layer</p>
4. Render surfaces	<p>4.1 Use CAD library to assign materials to surfaces and objects of the model</p> <p>4.2 Explore and create new material surfaces that supplement library of materials</p> <p>4.3 Edit texture, transparency, luminescence and patterns to achieve desired surface effects using shade settings</p> <p>4.4 Include light fixtures in model and adjust parameters to achieve desired effects</p>
5. Create and edit 3D views of the model	<p>5.1 Create isometric, two and three point perspective views using a range of camera settings and rendering techniques</p> <p>5.2 Reposition camera or target to provide alternate views using a variety of camera techniques</p> <p>5.3 Create effect of natural and artificial lighting in 3D space to achieve photo realistic awareness of the 3D model and the effect of</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	light on surfaces 5.4 Examine rendering time considerations to achieve specific output.
6. Plot and print for final presentations	6.1 Save perspective views and make appropriate for final media presentation 6.2 Save appropriate views to meet requirements of brief 6.3 Create page layout for plotting and printing 6.4 Prepare page layout using saved views and documentation 6.5 Plot 2D documentation with appropriate line weights 6.6 Prepare slide show presentation using saved views and documentation
7. Save and back up files	7.1 Create folders and files in logical structure to store drawing projects 7.2 Save and file drawings to allow easy access according to workplace documentation system 7.3 Identify and compare appropriate techniques for reducing file size 7.4 Back-up copies of files in accordance with organisation procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFID5014 Use CAD applications to complete models and documentation for interior design projects.

## Links

# Assessment Requirements for MSFID4014 Produce digital models and documentation for interior design projects

## Modification History

Release 1. Supersedes and is equivalent to MSFID5014 Use CAD applications to complete models and documentation for interior design projects.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- designed and produced the following in accordance with the design concept and/or solution and the drafting and drawing protocols required by Australian Standards and the National Construction Code (NCC)
  - 2 sets of orthographic drawings comprising:
    - plans
    - elevations
    - sections
    - services
  - 2 3D perspective drawings.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for working with scale
- types of CAD equipment and procedures for their safe use, operation and maintenance
- CAD applications and their features, uses and limitations including those related to:
  - different views
  - layering
  - editing
  - rendering
- drafting and drawing codes and practices relevant to interiors including those for abbreviations
- 2D and 3D drawing techniques
- documentation control procedures
- types of challenges that occur using CAD, and how to avoid and respond.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design information for documentation
  - information technology hardware
  - CAD software.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFID4015 Prepare materials and finishes boards for client presentation

## Modification History

Release 1. Supersedes and is equivalent to MSFID4003 Prepare a materials board for client presentation.

## Application

This unit describes the skills and knowledge required to identify presentation requirements and prepare materials or sample board for client presentation for interior decoration and design projects. The materials board includes visual demonstration of colour, materials, samples, finishes and textiles used in the decoration and design project.

This unit applies to interior decorators and designers.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify presentation requirements from project brief	1.1 Review project brief to determine presentation requirements 1.2 Confirm parameters for the project with client 1.3 Select work resources based on project requirements 1.4 Assess and interpret all required information to inform the presentation process
2. Prepare boards	2.1 Obtain substrate in the selected colour and cut to the desired size 2.2 Gather and prepare visual information in accordance with the design theme and project brief 2.3 Gather products, materials and accessories and prepare selected

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	items 2.4 Compose and arrange material and sample board components 2.5 Label fixtures or compile a legend that translates the parts and colours
3. Prepare for client presentation	3.1 Develop and prepare presentation methodology suited to the audience 3.2 Make board presentation to the client to sell the attributes of the design solution 3.3 Support presentation of materials board information with multimedia and computer-based strategies

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFID4003 Prepare a materials board for client presentation.

## Links

# Assessment Requirements for MSFID4015 Prepare materials and finishes boards for client presentation

## Modification History

Release 1. Supersedes and is equivalent to MSFID4003 Prepare a materials board for client presentation.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- prepared materials and finishes boards for 3 different decoration or design solutions.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- elements and principles of design, their interrelationships, and how they are used in interior decoration
- purpose and typical components of a materials and finishes board
- how to construct a materials board:
  - types of materials available for substrate
  - ways of organising the board for maximum effect
  - fixing methods for different components
- visual presentation methods and tools for supporting a materials board, including digital options
- psychology of colours.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - physical materials and samples for boards.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFID4016 Design colour schemes for interior and exterior spaces

## Modification History

Release 1. Supersedes and is not equivalent to MSFID4001 Research, analyse and apply colour for interior spaces.

## Application

This unit describes the skills and knowledge required to assess colour requirements, research and experiment with different colour options and create preferred colour schemes for presentation to the client.

This unit applies to interior decorators and designers.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess colour requirements for the project	1.1 Evaluate project specifications, parameters and constraints, and confirm with client 1.2 Select work resources based on the needs of the project 1.3 Identify and assess the space, its light and continuing colours for impact on potential solutions 1.4 Identify key project stakeholders and establish required communication protocols
2. Research colour schemes for interiors	2.1 Research and analyse colour psychology in accordance with the needs of the project

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>2.2 Research and analyse cultural and historical influences on colour to inform the needs of the project</p> <p>2.3 Research and compile information on the impact of specific colours on the interior space</p>
3. Explore colour schemes	<p>3.1 Use colour wheels to mix and match alternative colour schemes to determine suitability of colours to a space</p> <p>3.2 Explore the use of additive and subtractive colour mixing to inform colour selections</p> <p>3.3 Explore and test colour systems and colour combinations and/or juxtapositions against the brief</p> <p>3.4 Assess effect of light against the impact of colours being proposed for use</p> <p>3.5 Assess visual perception of colours in accordance with the project brief</p> <p>3.6 Match samples using colour mixing techniques</p> <p>3.7 Evaluate colour effect perceptions by use of light to mix and throw coloured light onto surfaces</p> <p>3.8 Ascertain contrast and harmony of colours through selection of colours in accordance with the project brief</p>
4. Finalise and present colour scheme	<p>4.1 Choose final selection of colours based on exploration and key objectives of the project brief</p> <p>4.2 Prepare a visual representation that communicates the key aspects of the preferred solution using rendering media suited to the project</p> <p>4.3 Present recommendations in a format and level of detail suited to the client and scope of the project</p> <p>4.4 Seek client feedback on the proposed solution</p> <p>4.5 Make adjustments to the final design solution based on feedback</p> <p>4.6 Accurately document selection specifications</p>

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to research colour information using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for MSFID4016 Design colour schemes for interior and exterior spaces

## Modification History

Release 1. Supersedes and is not equivalent to MSFID4001 Research, analyse and apply colour for interior spaces.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- developed and presented colour schemes in response to 3 different design briefs that individually or cumulatively involve both interiors and exteriors:
  - developed samples to represent colour mixing, matching, combinations and effects
  - visually presented colour schemes using rendering and other techniques to illustrate how ideas meet overall project requirements.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- research sources for information about colour, including current trends
- elements and principles of design
- design process and how ideas progress
- terminology of colour
- colour wheels and how they are used in interior decoration and design
- cultural and historical influences of colour
- colour systems and theories
- colour psychology influences
- use of colour in different types of interior spaces
- processes for additive and subtractive colour mixing
- effects of natural and artificial light on colour and finish types
- types of rendering media and how they are used.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs

- information technology for research
- colour wheels.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFID4017 Research and recommend furniture and accessories

## Modification History

Release 1. Supersedes and is equivalent to MSFID4004 Research and recommend furniture and accessories.

## Application

This unit describes the skills and knowledge required to determine decoration requirements, research product options and make recommendations for loose furniture and accessories.

This unit applies to individuals providing advice in a retail, consulting or design studio environment. They analyse and compare product information from a wide range of sources to develop a design solution.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine project requirements	1.1 Evaluate project specifications, parameters and constraints, and confirm with client 1.2 Identify and assess aspects of the space that impact on potential solutions 1.3 Identify key project stakeholders and establish required communication protocols
2. Research furniture and accessories options	2.1 Source and assess style options that match the brief 2.2 Analyse and review intended use against functional features of different products

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>2.3 Consider and investigate new technologies for manufacturing and maintaining furniture and accessories</p> <p>2.4 Consider and investigate relevant anthropometrics, ergonomics and spatial relationships</p> <p>2.5 Analyse and evaluate product properties for their suitability and sustainability</p> <p>2.6 Source and compare information about costs and availability against the project brief</p>
3. Refine ideas and select preferred solution	<p>3.1 Explore, integrate and refine different options through a process of reflection and testing</p> <p>3.2 Choose a preferred solution based on research findings and the key objectives of the project brief</p> <p>3.3 Prepare a visual representation that communicates the key aspects of the preferred solution</p>
4. Make recommendations to client	<p>4.1 Present recommendations in a format and level of detail suited to the client and scope of the project</p> <p>4.2 Clearly articulate rationale for the chosen solution and present to the client</p> <p>4.3 Provide cost estimates associated with purchasing and obtaining the furniture and accessories to the client</p> <p>4.4 Seek client feedback on the proposed solution</p> <p>4.5 Base adjustments made to the final design solution on feedback</p>

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to research product options and present recommendations using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFID4004 Research and recommend furniture and accessories.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFID4017 Research and recommend furniture and accessories

## Modification History

Release 1. Supersedes and is equivalent to MSFID4004 Research and recommend furniture and accessories.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- researched and presented furniture and accessories solutions in response to different project briefs that individually or cumulatively require solutions for:
  - 3 different rooms
  - differing client requirements in terms of:
    - budget
    - style
    - product sustainability.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legal and ethical considerations for the provision of product advice, including:
  - individual worker responsibilities under Australian consumer law
  - environmental impact of product lifecycle
  - social responsibility of product
  - universally accessible design considerations
- type and scope of client and/or project brief information needed to inform research and recommendation:
  - budget
  - client preferences
  - aesthetic and functional requirements:
  - site characteristics
  - timeline
- mathematical procedures for estimation and measurement
- how different aspects of space impact on potential solutions, including:
  - colour
  - size
  - shape

- level of light
- structural features
- environmental conditions (humidity)
- types and features of resources that support the provision of design advice, and how they are used, including:
  - research tools
  - product tools
  - communication tools
- sources of information on furniture and accessories, including:
  - how to access information
  - ways to interrogate and distil information
- features of different furniture and accessory types and styles, used in different spaces, including:
  - bathrooms
  - bedrooms
  - kitchens
  - laundries
  - living and entertainment areas
  - offices
  - reception areas and/or hallways
- current and emerging manufacturing technologies for furniture and accessories
- properties of furniture and accessories and how these inform recommendations:
  - construction, composition and materials, including tactile nature of products
  - finishes
  - maintenance requirements
  - quality
  - safety – flammability, fixing requirements
  - sustainability – sourcing, production, longevity, recycling or end of life disposal
- basic aspects of ergonomics, anthropometric and proxemic values
- elements and principles of design, their interrelationships, and how they are used in interior decoration
- different ways of creating visual representations for design solutions.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFID4018 Research and recommend hard materials and finishes for interiors

## Modification History

Release 1. Supersedes and is equivalent to MSFID4006 Research and recommend hard materials and finishes for interiors.

## Application

This unit describes the skills and knowledge required to determine design and decoration requirements, research product options and make recommendations for hard materials and finishes.

This unit applies to individuals providing advice in a retail, consulting or design studio environment. They analyse and compare product information from a wide range of sources to develop a design solution.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine project requirements	1.1 Review and clarify project brief with client 1.2 Confirm and evaluate parameters and constraints 1.3 Select work resources based on the needs of the project 1.4 Identify and assess aspects of the space that impact on potential solutions 1.5 Identify key project stakeholders and establish required communication protocols

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Research material and finish options	2.1 Select materials and finishes that match the brief and are suited to aesthetic nature of the space 2.2 Analyse and review intended use against functional features of different products 2.3 Consider and investigate new hard materials and finish technologies 2.4 Analyse and evaluate product properties for their safety, suitability and sustainability 2.5 Identify application issues in terms of available expertise 2.6 Source and compare information about costs and availability against the project brief
3. Refine ideas and select preferred solution	3.1 Explore, integrate and refine different options through a process of reflection and testing 3.2 Choose a preferred solution based on research findings and the key objectives of the project brief 3.3 Prepare a visual representation that communicates the key aspects of the preferred solution
4. Make recommendations to client	4.1 Present recommendations in a format and level of detail suited to the client and scope of the project 4.2 Clearly articulate rationale for the chosen solution and present to the client 4.3 Provide realistic cost estimates associated with recommendations 4.4 Seek client feedback on the proposed solution 4.5 Base adjustments made to the final design solution on feedback

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to research product options and present recommendations using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFID4006 Research and recommend hard materials and finishes for interiors.

## MSFID4019 Research interior decoration and design influences

### Modification History

Release 1. Supersedes and is not equivalent to MSFID4009 Research architectural styles and movements, and, MSFID4010 Research interior decoration and design influences.

### Application

This unit describes the skills and knowledge required to research and analyse significant influences on contemporary and historical interior decoration and design movements to inform current and future work. It includes the requirement to maintain currency of knowledge around emerging trends.

This unit applies to interior decorators and designers. They analyse and compare information from diverse sources to inform work practice.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Interior Design.

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan research	1.1 Clearly define research objectives based on work needs 1.2 Evaluate and select formal and informal research methods based on their potential to meet the research objective 1.3 Identify and locate relevant and credible sources of information on interior decoration and design influences
2. Gather and analyse information on interior decoration and design	2.1 Identify and investigate information on key influences on the development of design movements, styles and practices

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
influences	2.2 Gather information using a systematic approach 2.3 Establish relevance of information according to research objectives 2.4 Compare and contrast different information sources and extract key information 2.5 Organise and compile research materials and results of the research in a manner that facilitates future use and reference
3. Maintain currency with design and decoration movements and styles	3.1 Regularly check research sources and compiled information for usefulness in informing decoration and design projects 3.2 Analyse current and emerging cultural, economic and environmental influences on architecture for impact and usefulness in future projects 3.3 Identify and pursue opportunities to update and expand own knowledge 3.4 Incorporate findings from research into design projects based on project needs

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to use digital research and compile and maintain research findings.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFID4019 Research interior decoration and design influences

## Modification History

Release 1. Supersedes and is not equivalent to MSFID4009 Research architectural styles and movements, and, MSFID4010 Research interior decoration and design influences.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- researched and collated or documented key aspects of information on all of the following:
  - significant historical influences on interior decoration and design, including different architectural movements and styles, and significant individuals
  - changes in decoration and design trends and philosophy over time
  - current and emerging decoration and design trends that impact design practice.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- credible sources of information on interior decoration and design, and the type of information they can provide
- types of research techniques, both formal and informal used to research a range of design and decoration movements and styles that assist with informing current design practices
- how to effectively analyse design elements and principles
- ways to assess the validity and credibility of information sources
- accurate referencing of information sources
- significant impacts on the historical and contemporary development of interior design and decoration, including:
  - individuals
  - architectural movements and relationship between architecture and interior decoration and design
  - how architecture uses space, light and material to affect mood
  - environmental
  - social and cultural
  - economic
- processes that support the analysis of information and how to use them, including:
  - comparing
  - contrasting
  - reflecting

- distinguishing relevant from irrelevant
- ways to collate and/or document research information to facilitate future use.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - information technology for research.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFID4020 Research and integrate embedded technologies in interior designs

## Modification History

Release 1. New unit.

## Application

This unit describes the skills and knowledge required to determine technology requirements, research products, make recommendations and present requirements appropriately on design documentation.

This unit applies to interior designers, including kitchen and bathroom designers. They analyse and compare product information from a wide range of different sources to develop a design solution.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine project requirements	1.1 Evaluate project specifications, parameters and constraints, and confirm with client 1.2 Select work resources based on the needs of the project 1.3 Identify key project stakeholders and establish required communication protocols
2. Research options for embedded technologies	2.1 Identify credible sources of information on proposed technologies 2.2 Analyse intended use and review against functional features of different products

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>2.3 Analyse and evaluate product properties for their suitability and compliance with Australian Standards</p> <p>2.4 Source information about costs and availability and compare against the project brief</p> <p>2.5 Identify and integrate potential sustainability features or issues into the research process</p>
3. Refine ideas and select preferred solution	<p>3.1 Explore and refine different options for integrating technology into the space through a process of reflection and testing</p> <p>3.2 Choose a preferred solution based on research findings and the key objectives of the project brief</p> <p>3.3 Present recommendations in a format and level of detail that suits the client and scope of the project</p> <p>3.4 Clearly articulate and present rationale for the chosen solution to the client</p> <p>3.5 Seek client feedback on the proposed solution and make adjustments accordingly</p>
4. Develop design specifications	<p>4.1 Develop documentation detailing information about embedded technologies required for installation using appropriate drawing protocols</p> <p>4.2 Provide an evidence-based estimate for embedded technologies purchase and installation</p> <p>4.3 Present the completed design documentation and costing in a professional format.</p>

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to use digital research and create documents.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFID4020 Research and integrate embedded technologies in interior designs

## Modification History

Release 1. New unit.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- researched and integrated embedded technologies in response to 3 different project briefs that individually or cumulatively require solutions for:
  - automation
  - appliance integration.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legal and ethical considerations for the provision of design advice on embedded technologies, including:
  - individual worker responsibilities under Australian consumer law
  - compliance requirements for products recommended
  - installation requirements as per National Construction Code (NCC) and relevant licensing regimes
- type and scope of client / project brief information needed to inform research and recommendation:
  - budget
  - aesthetic and functional client preferences
  - site characteristics
  - timeline
- types and features of resources that support the provision of design advice, and how they are used, including:
  - research tools
  - product tools
  - communication tools
- sources of credible information on embedded technologies, including:
  - how to access
  - ways to interrogate and identify and distil information
  - how to distinguish reputable products

- availability and features of current and emerging embedded technologies used in different interior spaces, including those related to:
  - appliances
  - automated drawers and doors
  - counter tops
  - computer screens
  - lifting systems
  - lighting systems
  - sound systems
  - switch glass
  - window furnishings
- factors for consideration in selecting embedded technologies:
  - accessibility
  - compatibilities from safety perspective
  - compliance with Australian Standards
  - privacy
  - security
  - service requirements and availability of servicing
- considerations and limitations for embedding technologies in different cabinetry and interior spaces
- installation requirements for different types of embedded technologies, including who is able to install different types of technologies
- how to specify embedded technologies on design documentation.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFID4021 Design soft furnishing solutions for interior spaces

## Modification History

Release 1. Supersedes and is not equivalent to MSFID4005 Research and recommend soft furnishings for interiors, and, MSFID5011 Specify soft furnishings for complete interior solution.

## Application

This unit describes the skills and knowledge required to determine soft furnishing requirements, research and refine options and present a design solution to the client.

This unit applies to individuals providing advice in a retail, consulting or design studio environment. They analyse and compare product information from a wide range of different sources to develop a design solution.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine project requirements	1.1 Evaluate project specifications, parameters and constraints, and confirm with client 1.2 Select work resources based on the needs of the project 1.3 Identify and assess aspects of the space that impact on potential solutions 1.4 Take and document accurate measurements of floors, furniture, and window openings 1.5 Collect and develop visual aids of all existing and continuing

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	structures, furniture and furnishings that inform the project 1.6 Establish communication with other people involved in the project
2. Research soft furnishing options	2.1 Source and assess style designs that match the brief in regards to form and function 2.2 Source and assess fabrics, trims and/or componentry options that match the brief 2.3 Research, assess and consider visual and tactile characteristics of different products 2.4 Analyse and review intended use against functional and technical features of different products 2.5 Consider and investigate new technologies and innovations for their application to the brief 2.6 Analyse and evaluate product properties for their suitability 2.7 Identify and consider installation constraints 2.8 Source and compare information about costs and availability against the project brief 2.9 Identify and integrate potential sustainability features or issues into the research process
3. Refine ideas and select preferred solution	3.1 Explore, integrate and refine different options through a process of reflection and testing 3.2 Choose a preferred solution that includes fabrics, furnishings and fixing technologies based on research findings and the key objectives of the project brief 3.3 Prepare a visual representation that communicates the key aspects of the preferred solution
4. Make recommendation to client	4.1 Present recommendations in a format and level of detail suited to the client and scope of the project 4.2 Clearly articulate rationale for the chosen solution and present to the client 4.3 Provide documented product specifications and cost estimates associated with sourcing, manufacturing and installation of the soft furnishings to the client 4.4 Seek client feedback on the proposed solution 4.5 Make adjustments to the final design solution based on feedback

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	4.6 Evaluate work through feedback and own reflection, and identify potential improvements for use in future projects

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to research and present design information using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFID4021 Design soft furnishing solutions for interior spaces

## Modification History

Release 1. Supersedes and is not equivalent to MSFID4005 Research and recommend soft furnishings for interiors, and, MSFID5011 Specify soft furnishings for complete interior solution.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- designed and presented soft furnishing solutions in response to 3 different project briefs that individually or cumulatively require solutions for the following, with at least 1 project requiring the integration of all three:
  - soft furnishings
  - soft floor coverings
  - decorative solutions for windows and openings
- designed solutions for different client requirements in terms of:
  - budget
  - style.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legal and ethical considerations for the provision of product advice, including:
  - individual worker responsibilities under Australian consumer law
  - environmental impact of product lifecycle
  - social responsibility of product lifecycle
  - universally accessible design considerations
- type and scope of client and/or project brief information needed to inform research and recommendation:
  - budget
  - client preferences
  - aesthetic and functional requirements
  - site characteristics
  - timeline
- mathematical procedures for estimation and measurement

- how different aspects of space impact on potential solutions, including:
  - colour
  - level of light
  - positioning
  - size
  - shape
  - structural features
- types and features of resources that support the provision of design advice, and how they are used, including:
  - research tools
  - product tools
  - communication tools
- sources of information on soft furnishings, including:
  - how to access
  - ways to identify, interrogate and distil information
- features of different soft furnishing types and styles, used in different spaces, and properties of materials, including how pattern repeats affect material use, trimmings and componentry used, including those for:
  - bedding treatments
  - cushions
  - floor coverings –carpet, hard finishes, rugs
  - lampshades
  - trimmings
  - upholstery
  - walls
  - window coverings, including how pattern repeats affect material use
- current and emerging manufacturing technologies for soft furnishings
- factors about the properties of soft furnishings and how these inform recommendations:
  - level of insulation and/or acoustic properties
  - level of light control
  - construction, composition and materials, including tactile nature of products
  - fibre composition and attributes of fabrics, linings and fills
  - installation considerations and availability of expertise
  - quality
  - safety – flammability, fixing requirements
  - sustainability
  - textile use – standards and testing methods/scores
  - maintenance and/or cleaning requirements
  - useable width of fabric, including pattern repeats, wide width, continuous, multi directional, railroaded

- human interaction and/or use of soft furnishings
- current and emerging trends in window treatments and options:
  - fabric requirements
  - fixing technologies
  - types of openings
- basic aspects of ergonomics, anthropometric and proxemic values
- elements and principles of design, their interrelationships, and how they are used in interior decoration
- different ways of creating visual representations for design solutions.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - spaces for decoration
  - measuring equipment
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFID4022 Prepare quotation and contract documentation for design projects

## Modification History

Release 1. Supersedes and is not equivalent to MSFID4006 Prepare quotation and contract documentation for design projects.

## Application

This unit describes the skills and knowledge required to identify design costs and prepare quotation and contract documentation for client agreement. It does not include costings related to the realisation of the design.

This unit applies to designers.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine design costs	1.1 Assess design outcomes from review of design brief 1.2 Explore requirements with client using open questioning and discussion 1.3 Identify factors and complexities that affect the scope of design services 1.4 Identify and obtain information needed from others involved in the project 1.5 Accurately calculate design costs based on current rates and outcomes of brief review and customer discussions

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Prepare and present quotation	2.1 Itemise and accurately detail inclusions on documentation 2.2 Identify and include information to support quotation 2.3 Present quote to the client and discuss to confirm agreement on inclusions 2.4 Modify and finalise quote based on client response 2.5 Obtain and document client agreement to the quote
3. Prepare and present contract documentation	3.1 Select contract format based on the scope of the design project, business protocols and legal requirements 3.2 Identify and action the need for specialist legal expertise based on the project nature and scope 3.3 Note inclusions, costs and parameters of design services in the contract documents 3.4 Develop and accurately document terms and conditions

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to prepare and present quotations and associated documentation using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for MSFID4022 Prepare quotation and contract documentation for design projects

## Modification History

Release 1. Supersedes and is not equivalent to MSFID4006 Prepare quotation and contract documentation for design projects.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- prepared quotations and contract documentation for 3 different design projects.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- key components of contract law at an overview level:
  - terms and obligations of contract
  - methods of contractual agreement
  - exclusion clauses
  - dispute resolution clause
  - termination of contracts
- how to determine scope of design services required from a project brief and client information, and how different factors typically impact costs:
  - design complexity
  - level of customer certainty about preferences
  - desired number and nature of concepts for development
  - amount of consultation required with client and other suppliers
- ways that design services are costed
- design quotation presentation and inclusions
- types of additional information that may be included in quotations:
  - quotes from suppliers
  - promotional information
- features and inclusions of design contracts
- legal obligations of designers
- mathematical procedures for estimation and costing, including application of goods and services tax (GST).

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - information technology for document creation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFID5016 Develop decoration proposals for complex sites

## Modification History

Release 1. Supersedes and is equivalent to MSFID5002 Develop a decoration proposal for a complex site.

## Application

This unit describes the skills and knowledge required to analyse the project brief, research options, and develop decoration proposals for high-end residential or commercial interior spaces, that include multiple usage areas and require multiple interrelated decoration themes.

This unit applies to interior decorators. They analyse and compare information from a wide range of different sources to develop and plan integrated decoration solutions.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking interior decoration and design work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse the project brief	1.1 Evaluate project specifications, parameters and constraints, and confirm with client 1.2 Select work resources based on project needs 1.3 Identify key project stakeholders and establish required communication protocols
2. Conduct project	2.1 Identify and assess aspects of the space that impact on potential

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
research	<p>solutions through site analysis and measurement</p> <p>2.2 Identify, assess and analyse information for relevance to the project brief</p> <p>2.3 Determine functional and planning issues specific to the site and client requirements</p> <p>2.4 Clearly document research outcomes</p> <p>2.5 Develop a project plan that identifies key steps and responsibilities</p>
3 Generate decorative themes and concepts	<p>3.1 Generate multiple ideas that are sympathetic to the project brief</p> <p>3.2 Explore, integrate and refine different options through a process of reflection and testing</p> <p>3.3 Translate ideas into two and three dimensional (2D and 3D) space resolution using a range of techniques and media</p> <p>3.4 Test viability of interrelated ideas in a holistic way</p> <p>3.5 Present themes and concepts to the client using support documentation suited to the scope of the project</p> <p>3.6 Obtain client feedback and revise and refine ideas without loss of design integrity</p>
4 Select and specify solutions	<p>4.1 Develop and document specifications based on preferred themes and concepts</p> <p>4.2 Develop materials and finishes board based on specifications</p> <p>4.3 Prepare rendered digital 2D and 3D drawing of the scheme represent the desired effect</p>
5 Present fully resolved scheme	<p>5.1 Present final decoration solution to the client and clearly explain key features and benefits</p> <p>5.2 Seek and analyse client feedback to determine success in achieving client satisfaction</p> <p>5.4 Evaluate work through feedback and own reflection, and identify potential improvements for use in future projects</p>

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to research and present design information using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFID5002 Develop a decoration proposal for a complex site.

# Assessment Requirements for MSFID5016 Develop decoration proposals for complex sites

## Modification History

Release 1. Supersedes and is equivalent to MSFID5002 Develop a decoration proposal for a complex site.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- developed and presented integrated interior decoration proposals that meet the requirements of the project brief for 3 complex sites that:
  - are either high-end residential or commercial
  - require multiple decoration themes across different areas
  - individually or cumulatively include specifications for all of the following:
    - wall finishes
    - floor finishes
    - lighting
    - furniture
    - window treatments
    - accessories
    - artwork.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- key purpose and relevance of Australian Standards and the National Construction Code (NCC) to interior decoration work
- mathematical procedures for estimation and measurement
- how different aspects of space impact on potential solutions, including:
  - elements and principles of design, their interrelationships, and how they are used in interior decoration
  - level of light
  - structural features
- type and scope of client / project brief that informs proposals:
  - budget
  - client preferences
  - requirements:

- aesthetic
- functional
- site characteristics
- timeline
- types and features of resources that support the provision of design advice, and how they are used, including:
  - research tools
  - product tools
  - communication tools
- potential areas for research in an interior decoration project, sources of information and key aspects that impact solutions:
  - ergonomics, anthropometrics and proxemics
  - environmental considerations
  - product information
    - accessories
    - floor finishes
    - furniture
    - lighting
    - soft furnishings
    - wall finishes
    - window treatments
- design process, key stages and associated planning techniques
- creative design methodologies and how they can be used
- types and features of drawings and other visual presentation techniques used to present interior decoration solutions
- features and capabilities of computer programs used for drawings and preparation of decoration documentation
- different ways of creating visual representations for design solutions.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - decoration briefs
  - spaces for decoration
  - measuring equipment
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFID5017 Develop event decoration proposals

## Modification History

Release 1. Supersedes and is equivalent to MSFID5007 Decorate for events.

## Application

This unit describes the skills and knowledge required to analyse the project brief and event information, develop and refine decoration ideas and present those ideas as fully specified proposals.

This unit applies to interior decorators and designers. They analyse and compare information from a wide range of different sources to develop and plan decoration solutions for a specific event.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking interior decoration and design work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse the project brief	1.1 Evaluate project specifications, parameters and constraints, and confirm with client 1.2 Select work resources based on the needs of the project 1.3 Identify key project stakeholders and establish required communication protocols
2. Analyse event	2.1 Determine size of space and identify and assess aspects of the

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
information	<p>event space that impact on potential solutions</p> <p>2.2 Analyse event theme and marketing strategy for impact on decoration</p> <p>2.3 Assess proposed number and movement of people at the event for its impact on decoration solutions</p> <p>2.4 Identify event cultural considerations for impact on decoration</p>
3. Develop decoration ideas	<p>3.1 Research products, materials, finishes and colours based on event requirements</p> <p>3.2 Assess and review performance and characteristics of products against event requirements</p> <p>3.3 Generate ideas that are sympathetic to the event theme and concept</p> <p>3.4 Present ideas to the client using support documentation suited to the nature of the project</p> <p>3.5 Obtain client feedback and revise and refine ideas accordingly</p>
4. Develop decoration proposal	<p>4.1 Determine format and inclusions for proposal based on the project brief and communicate ideas</p> <p>4.2 Develop and document detailed product and service specifications</p> <p>4.3 Source, cost and document products and services in accordance with budget requirements</p> <p>4.4 Develop and document schedule of work with allocation of responsibilities based on ideas being proposed</p> <p>4.5 Check proposal information for cohesion and accuracy</p> <p>4.6 Present final proposal to the client in a manner suited to the scope and nature of the project</p> <p>4.7 Evaluate work through client feedback and identify own reflection and potential improvements for use in future work</p>

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to research and present design information using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency

## **Unit Mapping Information**

Supersedes and is equivalent to MSFID5007 Decorate for events.

## **Links**

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFID5017 Develop event decoration proposals

## Modification History

Release 1. Supersedes and is equivalent to MSFID5007 Decorate for events.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- developed decoration proposals for 3 events that respond to the project brief.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation, measurement and calculation of costs
- elements and principles of design, their interrelationships, and how they are used in interior decoration
- ergonomics, anthropometrics, proxemics and aesthetic values
- different types of events and how decoration is used for different purposes and contexts
- potential event parameters, constraints and compliance requirements and how they impact on decoration
- types and features of resources that support the provision of design advice, and how they are used, including:
  - research tools
  - product tools
  - communication tools
- how different aspects of space impact on potential solutions, including:
  - access and egress
  - colour
  - size
  - shape
  - level of light
  - site location, capacity and orientation
  - structural features
- event characteristics and their impact on decoration:
  - concept and theme
  - target market

- scale
- location (indoor and/or outdoor)
- different products and services for event decoration and how they are used:
  - decoration products:
    - accessories
    - finishes
    - furniture
    - lighting
    - materials
    - perishable items
  - contractors and consultants
- different ways of creating visual representations for design solutions
- formats and inclusions for event decoration proposals
- event display techniques.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - event briefs
  - spaces for decoration
  - measuring equipment
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFID5018 Provide interior styling service

### Modification History

Release 1. Supersedes and is equivalent to MSFID5010 Provide interior styling service.

### Application

This unit describes the skills and knowledge required to determine requirements, develop the styling approach and manage the styling process through the selection, sourcing and placing of objects and accessories for visual effect. Styling may be for permanent or temporary application.

This unit applies to stylists working in residential, retail or commercial environments. They analyse and compare information from a wide range of different sources and both plan and manage the operational aspects of the styling process.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Interior Decoration and Design

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm services with client	1.1 Provide clear information to client about the range of services offered as an interior stylist 1.2 Negotiate and confirm in writing the styling service to be provided with client
2. Determine project requirements	2.1 Evaluate project specifications, parameters and constraints, and confirm with client 2.2 Select work resources based on the needs of the project

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	2.3 Establish communication with other people involved in the project 2.4 Develop and document project schedule identifying key steps and responsibilities
3. Develop ideas and select preferred solutions	3.1 Identify, research and evaluate style options against the key objectives of the brief and desired effect on end users 3.2 Accurately measure and prepare sketches and drawings of space dimensions and identify aspects of the space that impact on potential solutions 3.3 Integrate cultural and historical considerations into style considerations 3.4 Identify suppliers appropriate to client target market and confirm availability of products and materials 3.5 Present themes and concepts of the finished space to the client using support documentation suited to the scope of the project 3.6 Obtain client feedback and revise and refine ideas accordingly
4. Specify confirmed style	4.1 Prepare accurate plan and/or specifications, including layout, for the confirmed interior styling service 4.2 Prepare and confirm detailed quotation and timeline with client 4.3 Create schedule and plan for sourcing and obtaining products and services
5. Style the space	5.1 Procure items in the schedule to achieve design outcome 5.2 Create visual impact by strategically curating objects into the styled space according to layout, taking into account design elements and principles 5.3 Seek client feedback on arrangement and make adjustments accordingly without loss of design integrity

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to research and present design information using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Unit Mapping Information**

Supersedes and is equivalent to MSFID5010 Provide interior styling service.

## **Links**

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFID5018 Provide interior styling service

## Modification History

Release 1. Supersedes and is equivalent to MSFID5010 Provide interior styling service.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and

- created detailed interior styling schemes with visual representations that support the project brief for 3 interior projects with differing client requirements in terms of:
  - budget
  - style.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement
- ergonomics, anthropometrics, proxemics and aesthetic values
- scope and nature of styling and the stylist role in different contexts, including:
  - commercial interiors
  - magazines and television
  - real estate sales
  - residential interiors
- factors that influence client choices for style
- key steps in the styling process and how these are planned and implemented for both permanent and temporary styling
- elements and principles of design, their interrelationships, and how they are used in interior decoration
- sources of product information and types, characteristics, and uses for:
  - accessories
  - floor finishes
  - furniture
  - lighting
  - soft furnishings
  - wall finishes
  - window treatments

- sketching and drawing techniques
- different ways of creating visual representations for design solutions
- formats and required inclusions for:
  - design specifications
  - styling budgets.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - project briefs
  - spaces for styling
  - measuring equipment
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFID5019 Decorate interiors for restoration projects

### Modification History

Release 1. Supersedes and is equivalent to MSFID5015 Decorate interiors for restoration projects.

### Application

This unit describes the skills and knowledge required to analyse the project brief, research options and develop interior decoration solutions for restoration projects that meet the conservation and heritage requirements of the building style and era.

This unit applies to interior decorators. They analyse and compare information from a wide range of different sources to develop and plan decoration solutions.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking interior decoration and design work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Interior Decoration and Design

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse the project brief	1.1 Evaluate project specifications, parameters and constraints, and confirm with client 1.2 Select work resources based on project needs 1.3 Identify key project stakeholders and establish required communication protocols
2. Research decoration	2.1 Conduct site analysis to assess the requirements of the spaces

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
requirements	<p>requiring decoration</p> <p>2.3 Identify style, era, theme and features of the site</p> <p>2.4 Identify issues relating to the conservation and heritage environment and determine their implications for the project</p> <p>2.5 Identify and analyse impacting environmental issues</p> <p>2.6 Identify and research sources to inform the decoration process based on analysis</p> <p>2.7 Clearly document research outcomes</p> <p>2.8 Develop a project plan that identifies key steps and responsibilities</p>
3. Generate decoration solution	<p>3.1 Assess regulatory requirements relating to decoration to determine compliance</p> <p>3.2 Generate decoration concepts and assess against restoration requirements and the restoration style and era</p> <p>3.3 Examine environmental aspects of decoration solution and identify areas for improved sustainability and incorporate where possible within the parameters of the brief</p> <p>3.4 Develop and clearly define conceptual approach</p> <p>3.5 Develop preliminary drawings with decoration treatment inclusions and positioning</p> <p>3.6 Discuss preliminary concept ideas with client and receive and analyse feedback</p> <p>3.7 Modify concept according to feedback and seek client agreement</p>
4. Prepare client presentation	<p>4.1 Present concept to client in a format and level of detail suited to the client and scope of the project</p> <p>4.2 Clearly articulate and present rationale for the chosen solution to the client</p> <p>4.3 Seek and analyse client feedback and response to determine success in achieving client satisfaction</p> <p>4.4 Evaluate work through feedback and own reflection, and identify potential improvements for use in future projects</p>

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to research and present design information using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for MSFID5019 Decorate interiors for restoration projects

## Modification History

Release 1. Supersedes and is equivalent to MSFID5015 Decorate interiors for restoration projects.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- analysed, researched and developed integrated decoration solutions that meet the design brief for 3 different restoration projects
- visually presented solutions using both manual and computer-based drawing techniques and at least 1 other presentation technique.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- local, state or territory or national legislation, regulations or codes of practice relevant to heritage conservation of sites
- Australian Standards and the National Construction Code (NCC)
- key aspects of The Burra Charter, the Australia ICOMOS charter for places of cultural significance
- mathematical procedures for estimation and measurement
- elements and principles of design, their interrelationships, and how they are used in interior decoration
- ergonomics, anthropometrics, proxemics and aesthetic values
- types and features of resources that support the provision of design and decoration advice, and how they are used, including:
  - research tools
  - product tools
  - communication tools
  - other experts
- sources of information and expertise on interior restorations
- features of the following in Australia:
  - key architectural styles and eras
  - historical design styles and movements

- issues that typically impact decoration solutions for restoration projects, and how these can be addressed, including:
  - building condition
  - compatibility and matching of new and old materials, methods of manufacture and finishing
  - frameworks that control activity in the building:
    - building standards
    - decision-making processes
    - conservation orders and conditions
    - safety standards
    - occupancy and use guidelines
    - services availability
  - protection and conservation of features
  - specialist artisan skills and techniques available to replicate era decoration styles
- sustainability considerations in restoration projects
- different ways of creating visual representations for design solutions
- features and capabilities of computer programs used for drawings and preparation of decoration documentation.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - restoration spaces for decoration
  - measuring equipment
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFID5020 Design residential interiors

### Modification History

Release 1. Supersedes and is equivalent to MSFID5001 Design residential interiors.

### Application

This unit of competency describes the skills and knowledge required to formulate creative design solutions for residential interior design projects, satisfying the physiological, psycho-logical, social, cultural and environmental requirements of the client brief. Designs include the manipulation of interior elements such as walls, floors, ceilings and staircases.

This unit applies to interior designers.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking interior decoration and design work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Interior Decoration and Design

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse the project brief	1.1 Evaluate project specifications, parameters and constraints, and confirm with client 1.2 Select resources appropriate to work requirements 1.3 Identify key project stakeholders and establish required communication protocols
2. Conduct project	2.1 Identify and assess aspects of the space that impact on potential

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
research	<p>solutions through site analysis and measurement</p> <p>2.2 Clarify intended function and desired effects and explore with the client</p> <p>2.3 Research and evaluate contextual information relating to the brief</p> <p>2.4 Determine functional, access and planning issues specific to the site and client requirements</p> <p>2.5 Identify and liaise with key consultants to determine structural, electrical, mechanical and environmental elements of the building that impact design</p> <p>2.6 Develop and document project plan identifying key steps and responsibilities</p>
3. Develop design concepts	<p>3.1 Generate multiple ideas that are sympathetic to the project brief</p> <p>3.2 Explore, integrate and refine different options through a process of reflection and testing</p> <p>3.3 Assess environmental implications of the project and review design concepts to ensure maximum energy efficiency is achieved in solution</p> <p>3.4 Test viability of interrelated ideas in an holistic way</p> <p>3.5 Present concepts to the client using support documentation and tools suited to the scope of the project</p>
4. Design the space	<p>4.1 Translate ideas into three dimensional (3D) space satisfying functional criteria</p> <p>4.2 Explore evidence of 3D notions through modelling</p> <p>4.3 Present the idea with the greatest potential for success to promote the design's acceptance using both 2D and 3D representations</p> <p>4.4 Select a materials palette to enhance spatial ideas</p> <p>4.5 Seek client feedback, agree to and record amendments and revise and refine ideas</p> <p>4.6 Modify design in response to critical feedback without losing integrity of the design intention</p>
5. Revise and refine solution	<p>5.1 Further review and resolve spatial planning and resolve in response to client feedback</p> <p>5.2 Select materials, colours, finishes, fixtures and fittings that are appropriate for the concept and brief parameters</p> <p>5.3 Seek feedback through consultation with the client and incorporate</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	into design solution.
6. Prepare client presentation	<p>6.1 Choose presentation method, techniques and media based on suitability for the design solution</p> <p>6.2 Prepare documentation, drawings and material selections that are consistent with the design intent</p> <p>6.3 Complete work to plan and within brief constraints</p> <p>6.4 Analyse client feedback and response to determine success in achieving client satisfaction</p> <p>6.5 Evaluate work through feedback and own reflection, and identify potential improvements for use in future projects</p>

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to research and present design information using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFID5001 Design residential interiors.

# Assessment Requirements for MSFID5020 Design residential interiors

## Modification History

Release 1. Supersedes and is equivalent to MSFID5001 Design residential interiors.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- developed and presented interior designs that meet the requirements of the project brief for 3 residential interiors that individually or cumulatively involve:
  - multiple spaces and residential functions
  - spatial planning
  - changes to room layouts
  - building services requirements
  - structural aspects requirements
  - multiple levels.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- the scope of interior design, and when an architect or structural engineer needs to be involved
- Australian Standards, National Construction Code (NCC) and statutory planning regulations affecting interior design for single occupancy detached or attached dwellings , and individual sole occupancy units within a class 2 building, including:
  - minimum room sizes
  - minimum ceiling heights
  - habitable and non-habitable rooms
  - natural light and ventilation
  - stairs and ramps
  - mechanical ventilation of non-habitable rooms
  - ergonomics, anthropometrics, proxemics and aesthetic values
  - design process, key stages and associated planning techniques
  - types of creative methodologies used in the design process
- mathematical procedures for working in scale
- types of information that may inform the design process:
  - cultural

- environmental
- historical
- technological
- type and scope of client and/or project brief that informs work in a residential context:
  - budget
  - client preferences
  - aesthetic and functional requirements
  - site characteristics
  - timeline
- how different aspects of space impact on potential solutions, including:
  - design elements and principles
  - colour
  - light
  - materiality
  - fenestrations
- types and features of resources that support the provision of design advice, and how they are used, including:
  - research tools
  - product tools
  - communication tools
- basic residential building construction and how the existing structure may be impacted by interior design through:
  - penetrations to interior floor and ceiling
  - changes to interior load bearing elements
  - structural integration of new interior elements with existing structure
- basic construction of built interior elements, load bearing and non-load bearing, and how they are designed and represented through drawings:
  - internal walls
  - internal floors
  - ceiling components
  - internal columns
  - internal doors
  - interior beams
  - interior stairs
  - interior custom joinery
- types of services in residential buildings, their features, and how they are designed:
  - hydraulic
  - electrical
  - information and communication technology (ICT)
  - environmental controls

- lighting
- types and features of drawings and other visual presentation techniques used to present design solutions
- digital and non-digital sketching and drawing techniques to architectural drawing standards.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - spaces for design
  - measuring equipment
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFID5021 Evaluate site structure and services for interior design briefs

## Modification History

Release 1. Supersedes and is equivalent to MSFID5003 Evaluate site for interior design brief.

## Application

This unit describes the skills and knowledge required to assess structural components and services in a residential building to determine their impact on the interior design brief.

This unit applies to interior designers, including kitchen and bathroom designers. They analyse and integrate information from site inspection, documentation and consultation to inform the design process.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking interior decoration and design work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for site evaluation	1.1 Review project brief and clarify with client 1.2 Confirm and evaluate parameters and constraints 1.3 Select work resources based on the needs of the design brief 1.4 Determine scope of site evaluation from information and arrange a site visit with client 1.5 Identify and follow work health and safety requirements for

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	specific site
2. Assess structural elements	<p>2.1 Identify and inspect key structural elements of the space for their impact on the design brief</p> <p>2.2 Identify changes required to structural elements to meet design brief and examine implications</p> <p>2.3 Assess materials and finishes used in structural aspects for their implications for the design brief</p> <p>2.4 Identify the need for specialist assessment of structural implications, communicate to the client and organise within the scope of the design brief</p> <p>2.5 Measure space accurately and document results to inform design project and documentation</p>
3. Assess services	<p>3.1 Identify and assess plumbing, water and drainage features for impact on design brief</p> <p>3.2 Assess features of electrical service to determine suitability for design requirements</p> <p>3.3 Assess other services to determine suitability for design requirements</p>
4. Conduct additional research to support site evaluation	<p>4.1 Confirm outcomes of site evaluation through consultation with specialist professionals based on the design brief</p> <p>4.2 Accurately interpret building documentation for additional information</p> <p>4.3 Review information gathered against compliance requirements and identify further work needs</p> <p>4.4 Accurately document site evaluation information and research outcomes</p>

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to research information using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Unit Mapping Information**

Supersedes and is equivalent to MSFID5003 Evaluate site for interior design brief.

## **Links**

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFID5021 Evaluate site structure and services for interior design briefs

## Modification History

Release 1. Supersedes and is equivalent to MSFID5003 Evaluate site for interior design brief.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- conducted a site evaluation and documented the outcomes for 3 different sites in response to 3 different design briefs.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- state or territory work health and safety legislation, regulations, standards and codes of practice
- role of Australian Standards and the National Construction Code (NCC)
- state and local planning regulations affecting interior design
- type and scope of client and/or project brief that informs site analysis:
  - budget
  - client preferences
  - aesthetic and functional requirements
  - site characteristics
  - timeline
- types and features of resources that support the provision of design advice, and how they are used, including:
  - research tools
  - product tools
  - communication tools
- mathematical procedures for estimation and measurement
- specialist professionals that may need to be involved and their respective roles and interrelationships, including:
  - architects
  - electricians
  - engineers
  - licensed builders

- plumbers
- basic building and architectural terminology
- types, features, uses and limitations of different construction methods and materials used in structural elements, including those for:
  - floors
  - roofs
  - walls
- key aspects of services requiring assessment, including what is within the scope of the designer role and what requires specialist assessment:
  - air conditioning and/or extraction
  - communication
  - gas
  - electrical
  - plumbing
- methods and formats for documenting site evaluation findings.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - sites for evaluation
  - building documentation
  - measuring equipment
  - information technology for research.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFID5022 Explore and apply creative design methodology to interior space

## Modification History

Release 1. Supersedes and is equivalent to MSFID5005 Explore and apply creative design methodology to interior space.

## Application

This unit describes the skills and knowledge required to apply the elements and principles of design to manipulate three dimensional (3D) interior space and form in response to a design brief. It involves the observation and analysis of a range of complex spatial typologies and a process of exploration and refinement to develop a design solution.

This unit applies to individuals who design any type of interior space.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Evaluate interior spaces	1.1 Observe and evaluate existing spatial relationships of objects against the design brief 1.2 Observe and compare existing spatial typologies against the design brief 1.3 Observe and evaluate existing spatial arrangements and organising systems against the design brief.
2. Manipulate 3D space	2.1 Use the elements and principles of design to organise elements in

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
and form	3D interior space based on the requirements of the brief 2.2 Manipulate 3D space using principles related to colour, texture and light 2.3 Explore spatial arrangements to satisfy brief requirements 2.4 Explore scale, volume and proportion for 3D space and form to satisfy brief requirements
3. Resolve interior design problems	3.1 Resolve interior space and interrelated design issues through the application of the elements and principles of design 3.3 Evaluate design solution and further refine to satisfy brief requirements 3.4 Communicate interior design solution using media that best suits the solution 3.5 Explore and qualify feasibility of solution 3.6 Review design solution and processes used to assess own skill and identify areas for improvement or modification

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFID5005 Explore and apply creative design methodology to interior space.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFID5022 Explore and apply creative design methodology to interior space

## Modification History

Release 1. Supersedes and is equivalent to MSFID5005 Explore and apply creative design methodology to interior space.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- applied a creative design methodology that involves exploration, evaluation and refinement of a solution to 3 different interior spaces
- used conceptual models, 3D and other spatial visualisation techniques to explore evaluate and resolve interior spaces.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- concept of space, and how the following impact the design process:
  - different spatial concepts
  - relationship of objects
  - relationship of forms
  - spatial interpretation methods
  - human behaviour and physiology
- spatial typology and how these impact on the design of interior space:
  - apertures
  - atriums
  - ceiling planes
  - mezzanines
  - multi-level spaces
  - public spaces
  - staircases
  - thresholds
  - transitional spaces
  - vertical and horizontal circulation systems
  - voids
- different spatial arrangements and organising systems, including:

- axis
- grids
- lineal arrangements
- centralised arrangements
- nested spaces
- modular systems
- hierarchical systems
- repetition structures
- elements and principles of design, their interrelationships, and how they are used in interior design
- key steps in the design process and how ideas progress
- design communication techniques.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - spaces for design.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFID5023 Design for all ages and abilities

### Modification History

Release 1. Supersedes and is equivalent to MSFID5008 Design for people with disabilities and the elderly.

### Application

This unit describes the skills and knowledge required to analyse the project brief and client requirements, generate design options and finalise the design of interior spaces using the principles of universal design to respond to the needs of people of all ages and abilities. This may include people with a disability and the elderly.

This unit applies to interior designers, including kitchen and bathroom designers.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking interior decoration and design work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Interior Decoration and Design

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse the project brief	1.1 Evaluate project specifications, parameters and constraints, and confirm with client 1.2 Select work resources based on project requirements 1.3 Identify key project stakeholders and establish required communication protocols
2. Conduct project	2.1 Identify and assess aspects of the space that impact on potential

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
research	<p>solutions through site analysis and measurement</p> <p>2.2 Explore intended function of the space taking into account the position of doors and windows and any physical requirements for access and egress</p> <p>2.3 Identify details of specific access issues through liaison with the client</p> <p>2.4 Investigate and assess the impact of Australian Standards requirements</p>
3. Generate design ideas	<p>3.1 Generate multiple ideas that are sympathetic to the project brief, individual client needs and Australian Standards requirements</p> <p>3.2 Explore, integrate and refine different options through a process of reflection and testing</p> <p>3.3 Assess and review performance and characteristics of products in accordance with client requirements</p> <p>3.4 Assess ergonomic, anthropometric and proxemic principles in respect of the space, the intended products and universal access</p> <p>3.5 Analyse sustainability and cultural considerations in respect of the space</p> <p>3.6 Present and discuss products, materials and finish options with the client</p> <p>3.7 Obtain client feedback and revise and refine ideas accordingly</p>
4. Finalise design	<p>4.1 Develop accurate drawings detailing all required measurements, dimensions and features</p> <p>4.2 Develop and document detailed specifications based on client preferences</p> <p>4.3 Estimate and document costs associated with purchasing and obtaining the products</p>
5. Present design solution	<p>5.1 Present final design solution and costing to the client or nominated person in a format suited to the nature of the project</p> <p>5.2 Seek feedback, and agree to and record adjustments</p> <p>5.3 Base adjustments to the final design solution on feedback without loss of design integrity and functionality</p>

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance.

- technology skills to research and present design information and drawings using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFID5008 Design for people with disabilities and the elderly.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFID5023 Design for all ages and abilities

## Modification History

Release 1. Supersedes and is equivalent to MSFID5008 Design for people with disabilities and the elderly.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- designed 3 spaces in accordance with the principles of universal design and Australian Standard AS1428.1 in response to project briefs that have explicit access requirements, 1 of which must relate to physical disability that requires client(s) to move around the space in a wheelchair.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- state or territory legislation, regulations, standards and codes of practice relevant to universal access / universal design
- purpose and key provisions of AS1428.1 – Design for access and mobility general requirements for access: all sections
- mathematical procedures for estimation and measurement
- sources of credible information on products and how they can be used or adapted for universal access
- elements and principles of design, their interrelationships, and how they are used in interior design
- ergonomics, anthropometrics, proxemics and aesthetic values
- sustainability considerations for design
- universal design guidelines in relation to:
  - interiors generally
  - kitchens
  - bathrooms
  - laundries
- types of access issues experienced in the general population and the impact on how individuals use and engage with interior space
  - access – space requirements, circulation space, height, door widths, ramps
  - acoustic

- aids – handgrips, rails
- lighting
- materials and finishes – tactility, non-slip
- interior space solutions that respond to different access issues
- types and features of drawings and other visual presentation techniques used to present design solutions
- digital and non-digital sketching and drawing techniques to architectural drawing standards
- formats and required inclusions for design specifications.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - spaces for design
  - measuring equipment
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFID5024 Design workplace interiors

### Modification History

Release 1. Supersedes and is equivalent to MSFID5013 Design for small to medium scale commercial or institutional interiors.

### Application

This unit describes the skills and knowledge required to use the design process for the formulation of creative interior design solutions for potentially complex workplace interiors, satisfying the physiological, psychological, social, cultural and environmental requirements of the brief.

This unit applies to interior designers.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking interior decoration and design work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Interior Decoration and Design

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse the project brief	1.1 Evaluate project specifications, parameters and constraints, and confirm with client 1.2 Select resources appropriate to work requirements 1.3 Establish and maintain communication with others involved in the project
2. Conduct project	2.1 Identify and assess aspects of the space that impact on potential

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
research	<p>solutions through site analysis and measurement</p> <p>2.2 Clarify intended function and desired effects and explore with the client</p> <p>2.3 Research and evaluate contextual information relating to the brief</p> <p>2.4 Determine functional, access and planning issues specific to the site and client requirements</p> <p>2.5 Develop and document project plan identifying key steps and responsibilities</p>
3. Develop design concepts	<p>3.1 Generate multiple ideas that are sympathetic to the project brief</p> <p>3.2 Explore, integrate and refine different options through a process of reflection and testing</p> <p>3.3 Assess environmental implications of the project and review design concepts to ensure maximum energy efficiency is achieved in solution</p> <p>3.4 Test viability of interrelated ideas in an holistic way</p> <p>3.5 Present concepts to the client using support documentation and tools suited to the scope of the project</p>
4. Design the space	<p>4.1 Translate ideas into three dimensional (3D) space satisfying functional criteria</p> <p>4.2 Explore evidence of 3D notions through modelling</p> <p>4.3 Present the idea with the greatest potential for success to promote the design's acceptance using both 2D and 3D representations</p> <p>4.4 Select a materials palette to enhance spatial ideas</p> <p>4.5 Seek client feedback, agree to and record amendments and revise and refine ideas</p> <p>4.6 Modify design in response to critical feedback without losing integrity of the design intention</p>
5. Revise and refine solution	<p>5.1 Further review and resolve spatial planning and resolve in response to client feedback</p> <p>5.2 Select materials, colours, finishes, fixtures and fittings that are appropriate for the concept and brief parameters</p> <p>5.3 Seek feedback through consultation with the client and incorporate into design solution</p>
6. Prepare a fully	6.1 Choose presentation method, techniques and media based on

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
rendered client presentation	suitability for the design solution 6.2 Prepare documentation, drawings and material selections that are consistent with the design intent 6.3 Complete work to plan and within brief constraints 6.4 Analyse client feedback and response to determine success in achieving client satisfaction 6.5 Evaluate work through feedback and own reflection, and identify potential improvements for use in future projects

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance.

- technology skills to research and present design information and drawings using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFID5013 Design for small to medium scale commercial or institutional interiors.

## Links

# Assessment Requirements for MSFID5024 Design workplace interiors

## Modification History

Release 1. Supersedes and is equivalent to MSFID5013 Design for small to medium scale commercial or institutional interiors.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- developed and presented designs that meet the requirements of the brief for 3 workplace interiors.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- Australian Standards and the National Construction Code (NCC) aligned to the building classification
- mathematical procedures for estimation and measurement
- current and emerging trends that influence workplace design, including changing nature of work and employee interactions with the workplace
- different types of workplaces and impacts on the design process
- type and scope of client and/or project brief that informs work in a workplace context:
  - budget
  - client preferences
  - requirements:
    - aesthetic
    - functional
  - site characteristics
  - timeline
- how different aspects of space impact on potential solutions, including:
  - colour
  - size
  - shape
  - level of light
  - structural features

- types and features of resources that support the provision of design advice, and how they are used, including:
  - research tools
  - product tools
  - communication tools
- elements and principles of design, their interrelationships, and how they are used in interior design
- ergonomics, anthropometrics, proxemics and aesthetic values
- design process, key stages and associated planning techniques
- types of information that may inform the design process:
  - commercial
  - cultural
  - environmental
  - historical
  - political
  - technological
- types of creative methodologies used in the design process
- types and features of drawings and other visual presentation techniques used to present design solutions -
- digital and non-digital sketching and drawing techniques to architectural drawing standards
- regulations, conditions and variables relating to the specific workplace context:
  - access
  - building conditions
  - building standards
  - decision making processes
  - electricity supply
  - flexibility of structural changes
  - guidelines for traffic flow
  - guidelines relating to the specific use such as health standards
  - lease conditions
  - occupancy rates
  - other occupancy
  - public use patterns
  - safety standards
  - services available
  - size
  - workforce planning.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - workplace sites for design
  - measuring equipment
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFID5025 Develop residential interior design project documentation

## Modification History

Release 1. Supersedes and is not equivalent to MSFID4007 Identify materials, construction techniques and methods used in building interiors.

## Application

This unit describes the skills and knowledge required to produce residential interior design project documentation using computer-aided design (CAD) programs. Documentation includes researching, detailing and specifying the materials, construction techniques and methods associated with residential interior design fit-outs for new or existing buildings.

This unit applies to interior designers.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking interior decoration and design work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Interior design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm detailed design requirements	1.1 Analyse site measurements and design drawings to confirm information on structures and services 1.2 Identify structural and service impacts of proposed design 1.3 Review regulatory implications of proposed design 1.4 Identify and respond to the need for professional advice on design

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	viability 1.5 Identify and plan appropriate digital drawing schedule based on review of required project trades, construction and requirements 1.6 Identify and accurately document areas for demolition
2. Prepare digital design documentation	2.1 Research methods of construction and assembly for the proposed interior elements 2.2 Research materials, hardware and fixtures appropriate for the scope of the project 2.3 Develop accurate scale drawings of all built elements with required dimensions and annotations 2.4 Include all required information related to substrate, finish, junctions and fixings 2.5 Develop associated accurate, itemised specification notes and schedules in accordance with job requirements 2.6 Seek and incorporate client feedback on any design changes and on detail design development
3. Manage documentation package	3.1 Maintain current and accurate drawing register 3.2 Develop and implement coding and numbering system for drawings 3.3 Manage drawing amendments in accordance with agreed processes and procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFID5025 Develop residential interior design project documentation

## Modification History

Release 1. Supersedes and is not equivalent to MSFID4007 Identify materials, construction techniques and methods used in building interiors.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- developed digital drawings, specifications and schedules for 3 residential interior designs that individually or cumulatively include:
  - detailing of kitchen and bathrooms
  - spaces with multiple levels
  - designs with structural implications such as changes to load bearing elements or floor penetrations
  - detailing of custom joinery and furniture
  - detailing of wet areas.
  -

## Knowledge Evidence

- role of Australian Standards and the National Construction Code (NCC) statutory planning regulations affecting residential interior design for:
  - single occupancy detached and/or attached dwellings
  - multi-residential projects
  - individual sole occupancy units within a class 2 building
- mathematical procedures for estimation, measurement and use of computer aided drawing technology
- computer aided drawing techniques
- basic building and architectural terminology and architectural drawings conventions
  - line weights
  - symbols
  - coding
  - scale
  - annotations
- scope of commercial interior design projects, and when an architect or structural engineer needs to be involved
- structural implications and limitations for interior design in residential buildings:

- impact of interior floor and ceiling penetrations
- impact of changes to interior load bearing elements
- structural integration of new interior elements with existing (or proposed) structure
- sources of professional advice on building and construction
- break-down of the design project and its components for construction, the different trades involved, and the type of drawings and documentation required
- residential building classes and a basic knowledge of how they are constructed:
  - beams and/or trusses
  - concrete
  - floor slabs
  - foundations
  - glass
  - masonry
  - steel
  - timber
  - windows
- construction of built interior elements, load bearing and non-load bearing, and how they are represented on drawings and specifications:
  - ceiling components
  - interior beams
  - interior stairs
  - internal columns
  - internal doors
  - internal floors
  - internal wall assemblies
- custom joinery for residential interior design, the fundamental techniques of how they are assembled, constructed and detailed through drawing:
  - architectural hardware
  - balustrades
  - built in furniture
  - built storage
  - carcasses and substrates
  - ceiling features
  - concealed lighting
  - feature walls and panelling
  - kitchen and bathroom cabinetry and details
  - pelmets
  - stairs, platforms, and/or raised floors
  - window seats

- materials used in residential interior design the fundamental techniques of how they are researched, fixed, and detailed and specified through drawings and schedules:
  - claddings
  - floor materials
  - formats and required inclusions for furnishing, fixtures and equipment schedules
  - formats and required inclusions for design specifications.
  - formats and required inclusions for door and furniture hardware
  - formats and required inclusions for door and window schedules
  - formats and required inclusions for materials schedules
  - glazing
  - linings
  - stone
  - wall materials
  - wet areas- fixtures, fittings and surface treatments
- building services in residential design, their features, regulatory requirements and structural implications and how they are represented on detailed design drawings:
  - hydraulics
  - electrical
  - information and communications technology
- conventions for document and drawing management and control:
  - title blocks
  - amendments
  - cross referencing
  - coding
  - review processes.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design information for documentation
  - information technology hardware
  - CAD software.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFID5027 Research and recommend colour applications and finishes

## Modification History

Release 1. Supersedes and is equivalent to MSFID5009 Research and recommend colour and applied finishes.

## Application

This unit describes the skills and knowledge required to assess colour requirements, research colour applications and finishes for diverse spaces and surfaces and make recommendations to the client.

This unit applies to interior decorators and designers.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse project requirements	1.1 Evaluate project specifications, parameters and constraints, and confirm with client 1.2 Select work resources based on the needs of the project 1.3 Identify key project stakeholders and establish required communication protocols
2. Research and colour applications and finishes	2.1 Assess the style, size lighting and intended use of the space as the basis for colour research 2.2 Assess the nature of surfaces and determine the impacts of different colour applications and finishes 2.3 Identify and research new technologies for relevance to the project

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	2.4 Assess potential application methods and techniques and available expertise for the desired effect 2.5 Analyse and compare options for their sustainability and safety
3. Refine ideas and select preferred solution	3.1 Explore, integrate and refine different options through a process of reflection and testing 3.2 Choose a preferred selection of colour applications and finishes based on research findings and the key objectives of the project brief
4. Finalise and present colour solution	4.1 Prepare a visual representation that communicates the key aspects of the preferred solution 4.2 Present recommendations in a format and level of detail suited to the client and scope of the project 4.3 Clearly articulate rationale for the chosen solution and present to the client 4.4 Provide cost estimates associated with the chosen solution to the client 4.5 Seek client feedback on the proposed solution 4.6 Make adjustments to the final design solution based on feedback

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to digitally research product options and present recommendations.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFID5009 Research and recommend colour and applied finishes.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFID5027 Research and recommend colour applications and finishes

## Modification History

Release 1. Supersedes and is equivalent to MSFID5009 Research and recommend colour and applied finishes.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- researched and presented solutions for colour applications and finishes in response to 3 different design briefs that individually or cumulatively require solutions for spaces that include:
  - cabinetry
  - ceilings
  - floors
  - walls.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- colour:
  - terminology
  - systems and theories
  - psychology
- research sources for information about colour, including current trends
- social, psychological, cultural and historical relationships and influences of colour
- current and emerging manufacturing technologies
- use of colour on different surfaces and the factors for consideration for all ages and abilities
- features of different types of finishes and applications available to achieve different effects on:
  - cabinetry
  - furniture
  - ceilings
  - floors
  - walls
- properties of colour applications and finishes, and how these inform recommendations:

- construction, composition and materials, including tactile nature of products
- maintenance requirements
- quality
- safety – flammability, product fixing requirements
- sustainability – sourcing, production, longevity
- methods of application
- building standards in relation to colour contrasts for commercial premises
- effects of natural and artificial light on colour
- light reflective values (LVR) of colours and finishes
- elements and principles of design, their interrelationships, and how they are used in interior decoration or design
- design process and how ideas progress
- different ways of creating visual representations for design solutions.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - spaces for which applications and finishes are recommended
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# MSFID5028 Research and recommend artwork

## Modification History

Release 1. Supersedes and is equivalent to MSFID5012 Research and recommend artwork.

## Application

This unit describes the skills and knowledge required to determine decoration requirements, research product options and make recommendations for specifying artwork within a project.

This unit applies to individuals providing advice in a retail, consulting or design studio environment. They analyse and compare product information from a wide range of different sources to develop a design solution.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine project requirements	1.1 Evaluate project specifications, parameters and constraints, and confirm with client 1.2 Select work resources based on the needs of the project 1.3 Identify and assess aspects of the space that impact on potential solutions 1.4 Analyse and review intended application for the artwork in the available space 1.5 Identify and investigate the most appropriate method of display in artwork within the existing space 1.6 Identify key project stakeholders and establish required communication protocols

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Research artwork options	<p>2.1 Source and analyse relevant information about potential artwork and artists</p> <p>2.2 Assess and compare aesthetic requirements of the artwork with surrounding site and design elements</p> <p>2.3 Analyse and evaluate properties of the materials used in the production of artwork</p> <p>2.4 Assess elements and principles of design used in the creation of the artwork in relation to the available site</p> <p>2.5 Source and compare information about costs and availability against the project brief</p> <p>2.6 Identify and integrate potential sustainability features or issues into the research process</p>
3. Refine ideas and select preferred solution	<p>3.1 Explore, integrate and refine different options through a process of reflection and testing</p> <p>3.2 Choose a preferred solution based on research findings and the key objectives of the project brief</p>
4. Recommend artwork	<p>4.1 Prepare a visual representation that communicates the key aspects of the preferred solution</p> <p>4.2 Present recommendations in a format and level of detail suited to the client and scope of the project</p> <p>4.3 Clearly articulate and present rationale for the chosen solution to the client</p> <p>4.4 Provide client with realistic cost estimates for purchasing or hiring and/or exhibiting the artwork within the site</p> <p>4.5 Seek client feedback on the proposed solution</p> <p>4.6 Make adjustments to the final design solution based on feedback</p> <p>4.7 Evaluate work through feedback and own reflection and identify potential improvements for use in future projects.</p>

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to research artwork options and present recommendations using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Unit Mapping Information**

Supersedes and is equivalent to MSFID5012 Research and recommend artwork.

## **Links**

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFID5028 Research and recommend artwork

## Modification History

Release 1. Supersedes and is equivalent to MSFID5012 Research and recommend artwork.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- researched and presented artwork recommendations in response to different project briefs that individually or cumulatively require solutions for the following:
  - two dimensional (2D) artwork
  - 3D artwork
  - artwork for different interior design applications
  - artwork as a style guide for an interior scheme and/or design project.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- legal and ethical considerations for the provision of product advice, including:
  - individual worker responsibilities under Australian consumer law
  - Australian copyright issues surrounding use of artwork and original images in interior design applications
- type and scope of client and/or project brief information needed to inform research and recommendation:
  - budget
  - client preferences
  - aesthetic and functional requirements
  - site characteristics
  - timeline
- mathematical procedures for estimation and measurement
- how different aspects of space impact on potential solutions, including:
  - colour
  - size
  - shape
  - level of light
  - structural features

- types and features of resources that support the provision of design advice, and how they are used, including:
  - research tools
  - product tools
  - communication tools
- sources of information on 2D and 3D artworks, including:
  - how to access
  - ways to identify, interrogate and distil information
- elements and principles of design, their interrelationships, and how they are used in interior decoration
- ways to integrate art images and objects into an interior design scheme
- nature of artworks and their characteristics for consideration:
  - art movements
  - artist
  - concept
  - materials/medium
  - origin / source
  - uniqueness (original, limited edition, print)
  - whether the art 2D or 3D requires specific lighting and/or electrical connections or plumbing
- types and characteristics of different types of frames, framing materials and methods of display:
  - commercial hanging systems / gallery track
  - invisible installation methods
  - picture rails
  - plinths
- art printed interior design materials
- different ways of creating visual representations for design solutions that incorporate two dimensional and/or three dimensional artworks.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -

## MSFID6010 Design commercial interior lighting

### Modification History

Release 1. Supersedes and is not equivalent to MSFID5006 Design interior lighting.

### Application

This unit describes the skills and knowledge required to assess natural light and determine supplementary lighting requirements in both existing and potential commercial interior spaces, and design lighting as part of an integrated interior solution.

This unit applies to interior decorators and designers. They analyse and compare information from diverse sources to inform a design solution.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking interior decoration and design work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Interior Decoration and Design

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Interpret lighting requirements	1.1 Evaluate project specifications, parameters and constraints, and confirm with client 1.2 Determine intended facility and space functions and the associated tasks and processes 1.3 Select work resources based on the needs of the project 1.4 Identify key project stakeholders and establish required communication protocols

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Assess existing orientation and natural light	<p>2.1 Determine natural light and ultraviolet (UV) penetration from site analysis</p> <p>2.2 Determine aspect and orientation from project brief and building plans</p> <p>2.3 Examine window treatments and placement for their efficiency in controlling light</p> <p>2.4 Review selection of colours for walls, ceilings, furnishings and fittings for their effect on raising or lowering the effect of light into the space</p> <p>2.5 Assess methods of site light control and light control devices for their effect on natural light</p>
3. Determine supplementary lighting requirements	<p>3.1 Identify and assess supplementary lighting sources and their potential to achieve the desired lighting effects</p> <p>3.2 Assess the practicality and safety requirements for supplementary lighting in the facility</p> <p>3.3 Research and assess the ongoing maintenance and environmental impact and energy efficiency of potential supplementary lighting</p> <p>3.4 Identify actual and potential location for supplementary lighting and determine required changes to achieve desired outcomes</p> <p>3.5 Analyse effect of supplementary lighting on the existing or proposed colour spectrum</p>
4. Generate lighting concepts	<p>4.1 Use creative methodologies to generate lighting concepts and themes</p> <p>4.2 Assess concepts against the project brief to select most viable solution</p> <p>4.3 Present concept to client using support documentation suited to the scope of the project</p> <p>4.4 Discuss ideas with client and modify concept according to feedback</p> <p>4.5 Select lighting options that meet industry standards and accurately document specifications</p>
5. Revise and refine solution	<p>5.1 Revise and refine lighting concepts through a process of reflection and testing</p> <p>5.2 Examine environmental aspects of lighting solution and identify</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	and integrate options for improved sustainability 5.3 Research and select appropriate lighting options that meet industry standards 5.4 Select the final lighting design that best meets the requirements of the brief
6. Present lighting solution	6.1 Document lighting solution using industry symbols and conventions for all fittings and components 6.2 Create three dimensional (3D) visualisations of lighting effects using appropriate software 6.3 Develop and document comprehensive schedule for lighting design 6.4 Present lighting solution and clearly explain key features and benefits 6.5 Analyse client feedback and response to determine success in achieving client satisfaction 6.6 Evaluate work through feedback and own reflection, and identify potential improvements for use in future projects

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to research and present design information and drawings using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for MSFID6010 Design commercial interior lighting

## Modification History

Release 1. Supersedes and is not equivalent to MSFID5006 Design interior lighting.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and:

- designed and documented lighting solutions with 3D visualisations for 3 different commercial spaces:
  - each space must be different in terms of activities, tasks and processes undertaken in the space
  - 1 must be an existing space requiring a new lighting design
  - 1 must be a potential space, yet to be constructed.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- type and scope of client and/or project brief information needed to inform research and recommendation:
  - budget
  - client preferences
  - aesthetic and functional requirements
  - site characteristics – size, shape, services, structural considerations
  - timeline
- types and features of resources that support the provision of design advice, and how they are used, including:
  - research tools and techniques
  - product tools
  - communication tools
- mathematical procedures for estimation, measurement and calculation of costings
- basic light characteristics:
  - natural
  - UV
  - interaction between colour and light
- how aspect and orientation impact light and lighting selection
- artificial light:

- effects on the colour spectrum
- energy efficiency
- special effects that can be achieved
- technical terminology
- lighting design options and trends in the context of commercial spaces:
  - hospitality
  - multi-residential
  - retail
  - workplace
- sources of information on commercial lighting products and devices
- features and effects of different types of commercial lighting products
- methods of light control and their uses in different situations
- how furnishing selections impact light in an interior space
- the relationship between lighting and key parameters for:
  - atmosphere and mood
  - activities undertaken in the space
- Australian Standard AS1680 – its purpose and key provisions
- drawing conventions for lighting formats.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - sites for lighting
  - measuring equipment
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

# MSFID6011 Resolve complex spatial design problems through modelling

## Modification History

Release 1. Supersedes and is equivalent to MSFID6001 Resolve complex spatial design problems through modelling.

## Application

This unit describes the skills and knowledge required to develop and refine conceptual models to inform design work through experimentation with a range of spatial modelling techniques. It includes managing and organising resource requirements for new work and realising a fully resolved interior scheme.

This unit applies to interior designers.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Adapt and develop concepts as a result of design research	1.1 Establish criteria that are most likely to facilitate the achievement of the conceptual vision 1.2 Collaborate with colleagues to develop conceptual thinking approaches 1.3 Examine a range of spatial problems to determine suitable approaches 1.4 Research, adapt and incorporate relevant ideas and approaches from other practitioners

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Visualise design concepts using modelling techniques	<p>2.1 Extend capabilities of a range of two dimensional (2D) conceptual notions through 3D modelling</p> <p>2.2 Refine the conceptual vision based on ongoing experimentation using sophisticated modelling techniques</p> <p>2.3 Present to the client a sophisticated concept model appropriate to the brief and evaluate feedback</p>
3. Manage and organise resource requirements for new work	<p>3.1 Research materials, tools, equipment and computer-aided design (CAD) applications for the achievement of different 3D effects</p> <p>3.2 Determine and organise resource requirements that arise from the use of techniques and experimental approaches for new work</p> <p>3.3 Determine critical path, projecting completion dates of each stage of the project</p>
4. Develop extend and resolve spatial ideas through modelling	<p>4.1 Experiment with a range of modelling techniques to explore and develop complex 3D notions</p> <p>4.2 Apply and manipulate design elements and principles to assist in design development</p> <p>4.3 Explore and manipulate scale, volume and proportion as part of a design development process</p> <p>4.4 Develop a range of models by hand or using CAD applications to revise and refine spatial ideas</p> <p>4.5 Use collaboration as an integral part of the process</p>
5. Present a fully resolved interior space	<p>5.1 Select modelling technique to meet the established criteria</p> <p>5.2 Select appropriate scale to meet brief criteria</p> <p>5.3 Accurately represent resolved spatial ideas to scale</p> <p>5.4 Accurately represent materials and textures to scale</p> <p>5.5 Resolve and demonstrate construction, detailing and finishes through sophisticated modelling</p> <p>5.6 Present detailed model to client and evaluate feedback</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFID6001 Resolve complex spatial design problems through modelling.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFID6011 Resolve complex spatial design problems through modelling

## Modification History

Release 1. Supersedes and is equivalent to MSFID6001 Resolve complex spatial design problems through modelling.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- fully resolved a final design solution for 3 complex spatial design problems through manual or computer-based modelling, demonstrating skills in:
  - collaboration
  - critical thinking
  - creativity and innovation.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- elements and principles of design, their interrelationships, and how they are used in interior design
- design process and progression of ideas
- design communication techniques
- types and nature of complex spatial challenges, and how modelling can be used to resolve:
  - apertures
  - atriums
  - ceiling planes
  - mezzanines
  - multi-level spaces
  - public spaces
  - staircases
  - thresholds
  - transitional spaces
  - vertical and horizontal circulation systems
  - voids
- different modelling and/or 3D visualisation techniques:
  - concept modelling

- mass modelling
- detailed modelling
- 3D printing
- CAD models
- features and uses of White models
- features and uses of Maquettes
- structures in design contexts
- modular systems and repeats
- advanced 3D geometry.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs involving complex spatial challenges
  - manual or computer aided modelling materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# MSFID6012 Design for large scale commercial or institutional interiors

## Modification History

Release 1. Supersedes and is equivalent to MSFID6003 Design for large scale commercial or institutional interiors.

## Application

This unit of competency describes the skills required to follow a design process for the formulation of creative and complex design solutions to large scale commercial or institutional interior design situations satisfying the physiological, psychological, social, cultural, technical and environmental requirements of the brief.

This unit applies to interior designers.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking interior decoration and design work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse the project brief	1.1 Evaluate project specifications, parameters and constraints, and confirm with client 1.2 Select resources appropriate to work requirements and check for operational effectiveness 1.3 Establish and maintain communication with others in the design

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	project.
2. Conduct project research	<p>2.1 Identify and assess aspects of the space that impact on potential solutions through site analysis and measurement</p> <p>2.2 Clarify the intended function of the space and explore with client</p> <p>2.3 Research and evaluate contextual information relating to the brief</p> <p>2.4 Determine functional and planning issues specific to the site and client requirements</p> <p>2.5 Identify issues relating to the commercial environment and determine their implications for the design project</p> <p>2.6 Organise and present research material in a format suited to the project</p> <p>2.7 Develop and document project plan identifying key steps and responsibilities</p>
3. Develop design concepts	<p>3.1 Generate multiple ideas and concepts that are sympathetic to the design brief</p> <p>3.2 Explore, integrate and refine different options through a process of reflection and testing</p> <p>3.3 Identify and address access issues relating the project in design solution</p> <p>3.4 Assess environmental implications of the project and review design concepts to ensure maximum energy efficiency is achieved in solution</p> <p>3.5 Test viability of interrelated ideas in a holistic way</p> <p>3.6 Present concepts to the client using support documentation and tools suited to the scope of the project</p>
4. Design the space	<p>4.1 Translate ideas into three dimensional (3D) space satisfying functional criteria</p> <p>4.2 Explore evidence of 3D notions through modelling</p> <p>4.3 Present idea with the greatest potential for success to promote the design's acceptance using both 2D and 3D representations</p> <p>4.4 Seek client feedback, agree to and record amendments, and revise and refine ideas</p> <p>4.5 Select a materials palette to enhance spatial ideas</p> <p>4.6 Modify design in response to critical feedback without losing</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	integrity of the design intention
5. Revise and refine solution	5.1 Assess ergonomic and anthropometric principles in respect to the space and the intended products 5.2 Further review and resolve spatial planning in response to client feedback 5.3 Select materials, colours, finishes, fixtures and fittings appropriate to the concept and brief parameters 5.4 Receive feedback through consultation with the client and incorporate into design solution
6. Prepare a fully rendered client presentation	6.1 Choose presentation method, techniques and media based on suitability for the design solution 6.2 Prepare documentation, drawings and material selections that are consistent with the design intent 6.3 Complete work to plan and within brief constraints 6.4 Analyse client feedback and response to determine success in achieving client satisfaction 6.5 Evaluate work through feedback and own reflection, and identify potential improvements for use in future projects

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to research and present design information and drawings using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFID6003 Design for large scale commercial or institutional interiors.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFID6012 Design for large scale commercial or institutional interiors

## Modification History

Release 1. Supersedes and is equivalent to MSFID6003 Design for large scale commercial or institutional interiors.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- developed and presented designs that meet the requirements of the brief for 3 large scale commercial or institutional interiors.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- Australian Standards and the National Construction Code (NCC)
- mathematical procedures for estimation and measurement
- type and scope of client / project brief that informs work in a hospitality context:
  - budget
  - client preferences
  - aesthetic and functional requirements
  - site characteristics
  - timeline
- how different aspects of space impact on potential solutions, including:
  - colour
  - size
  - shape
  - level of light
  - structural features
- types and features of resources that support the provision of design advice, and how they are used, including:
  - research tools
  - product tools
  - communication tools
  - elements and principles of design, their interrelationships, and how they are used in interior design

- ergonomics, anthropometrics, proxemics and aesthetic values
- design process, key stages and associated planning techniques
- types of information that may inform the design process:
  - commercial
  - cultural
  - environmental
  - historical
  - political
  - technological
- types of creative methodologies used in the design process
- types and features of drawings and other visual presentation techniques used to present design solutions
- digital and non-digital sketching and drawing techniques to architectural drawing standards
- regulations, conditions and variables relating to the specific commercial or institutional context:
  - access
  - building conditions
  - building standards
  - decision making processes
  - electricity supply
  - flexibility of structural changes
  - guidelines for traffic flow
  - guidelines relating to the specific use such as health standards
  - lease conditions
  - occupancy rates
  - other occupancy
  - public use patterns
  - safety standards
  - services available
  - size.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - commercial environments for design

- measuring equipment
- information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFID6013 Design interiors for hospitality environments

## Modification History

Release 1. Supersedes and is equivalent to MSFID6004 Design interiors for hospitality environments.

## Application

This unit describes the skills and knowledge required to follow a design process for the formulation of creative interior design solutions to potentially complex requirements in hospitality environments such as bars, restaurants, hotels and function centres.

This unit applies to interior designers.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking interior decoration and design work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse the project brief	1.1 Evaluate project specifications, parameters and constraints, and confirm with client 1.2 Select work resources based on project requirements 1.3 Identify key project stakeholders and establish required communication protocols
2. Conduct project	2.1 Identify and assess aspects of the space that impact on potential

solution	space and the intended products 5.2 Further review and resolve spatial planning in response to client feedback 5.3 Select materials, colours, finishes, fixtures and fittings appropriate to the concept and brief parameters 5.4 Receive feedback through consultation with the client and incorporate into design solution.
6. Prepare a fully rendered client presentation	6.1 Choose presentation method, techniques and media based on suitability for the design solution 6.2 Prepare documentation, drawings and material selections that are consistent with the design intent 6.3 Complete work to plan and within brief constraints 6.4 Analyse client feedback and response to determine success in achieving client satisfaction 6.5 Evaluate work through feedback and own reflection, and identify potential improvements for use in future projects

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to research and present design information and drawings using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFID6004 Design interiors for hospitality environments

# Assessment Requirements for MSFID6013 Design interiors for hospitality environments

## Modification History

Release 1. Supersedes and is equivalent to MSFID6004 Design interiors for hospitality environments.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- developed and presented designs that meet the requirements of the brief for 3 interiors in hospitality environments.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- Australian Standards and the National Construction Code (NCC)
- mathematical procedures for estimation and measurement
- type and scope of client / project brief that informs work in a hospitality context:
  - budget
  - client preferences
  - aesthetic and functional requirements
  - site characteristics
  - timeline
- how different aspects of space impact on potential solutions, including:
  - colour
  - size
  - shape
  - level of light
  - structural features
- types and features of resources that support the provision of design advice, and how they are used, including:
  - research tools
  - product tools
  - communication tools
- elements and principles of design, their interrelationships, and how they are used in interior design

- ergonomics, anthropometrics, proxemics and aesthetic values
- design process, key stages and associated planning techniques
- types of information that may inform the design process:
  - commercial
  - cultural
  - environmental
  - historical
  - political
  - technological
- types of creative methodologies used in the design process
- types and features of drawings and other visual presentation techniques used to present design solutions
- digital and non-digital sketching and drawing techniques to architectural drawing standards
- regulations, conditions and variables relating to the specific hospitality context:
  - access
  - building conditions
  - building standards
  - decision making processes
  - electricity supply
  - flexibility of structural changes
  - guidelines for traffic flow
  - guidelines relating to the specific use such as health standards
  - lease conditions
  - occupancy rates
  - other occupancy
  - public use patterns
  - safety standards
  - services available
  - size.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - hospitality environments for design
  - measuring equipment
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFID6014 Design for retail interiors

### Modification History

Release 1. Supersedes and is equivalent to MSFID6005 Design for retail interiors.

### Application

This unit describes the skills and knowledge required to design retail environments for the effective selling of products and services. Retail design covers the application of branding, marketing and consumer research to satisfy the commercial, physiological, psychological, social, cultural and environmental requirements of the interior design brief. Retail environments may be for an entire building or for retail tenancies within larger building complexes.

This unit applies to interior designers.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking interior decoration and design work. Access to construction sites require certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Interior Decoration and Design

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse the project brief	1.1 Evaluate project specifications, parameters and constraints, and confirm with client 1.2 Select resources appropriate to work requirements 1.3 Identify key project stakeholders and establish required communication protocols

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Conduct brand analysis and project research	2.1 Identify and assess aspects of the space that impact on potential solutions through site analysis and measurement 2.2 Clarify the intended function of the space and explore with client 2.3 Research and evaluate the features of the brand and target market relating to the brief 2.4 Determine functional and planning issues specific to the site and client requirements 2.5 Identify issues relating to the retail environment and determine their implications for the design project 2.6 Organise and collate research material that informs response to the brief using relevant software 2.7 Develop and document project plan identifying key steps and responsibilities
3. Develop design concepts	3.1 Generate multiple ideas and concepts that are sympathetic to the design brief and brand values 3.2 Explore, integrate and refine different options through a process of reflection and testing 3.3 Identify and address access issues relating the project in design solution 3.4 Assess environmental implications of the project and review design concepts to ensure maximum energy efficiency is achieved in solution 3.5 Test viability of interrelated ideas in an holistic way 3.6 Present concepts to the client using support documentation and tools suited to the scope of the project
4. Design the space	4.1 Translate ideas into three dimensional (3D) space satisfying functional criteria 4.2 Explore evidence of 3D notions through modelling 4.3 Present idea with the greatest potential for success to promote the design's acceptance using both 2D and 3D representations 4.4 Seek client feedback, agree to and record amendments, and revise and refine ideas 4.5 Select a materials palette to enhance spatial ideas 4.6 Modify design in response to critical feedback without losing integrity of the design intention

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
5. Revise and refine solution	5.1 Assess ergonomic and anthropometric principles in respect to the space and the intended products 5.2 Further revise spatial planning and resolve in response to client feedback 5.3 Select and design materials, colours, finishes, fixtures and fittings appropriate to the concept and brief parameters 5.4 Receive feedback through consultation with the client and incorporate into design solution
6. Prepare a fully rendered client presentation	6.1 Choose presentation method, techniques and media based on suitability for the design solution 6.2 Prepare documentation, drawings and material selections that are consistent with the design intent 6.3 Complete work to plan and within brief constraints 6.4 Analyse client feedback and response to determine success in achieving client satisfaction 6.5 Evaluate work through feedback and own reflection, and identify potential improvements for use in future projects

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to research and present design information and drawings using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFID6005 Design for retail interiors.

# Assessment Requirements for MSFID6014 Design for retail interiors

## Modification History

Not applicable.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- developed and presented designs that meet the requirements of the brief for 3 retail interiors that individually or cumulatively include:
  - analysis of brand, client profiles and marketing
  - custom joinery or display designs.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- regulations, conditions and variables relating to the specific retail context:
  - access and accessibility
  - building conditions
  - building standards
  - decision making processes
  - electricity supply
  - egress
  - flexibility of structural changes
  - Fire Resistant Level (FRL) of materials
  - guidelines for traffic flow
  - guidelines relating to the specific use such as health standards
  - lease conditions
  - occupancy rates
  - other occupancy
  - public use patterns
  - safety standards
  - services available
  - size
- Australian Standards, regulatory requirements and the National Construction Code (NCC) affecting the design of retail tenancies within Class 6 buildings:

- accessibility
- egress
- FRL of materials
- mathematical procedures for estimation and measurement
- branding and marketing, including:
  - brand and brand values
  - brand image
  - client base
  - visual identity
- type and scope of client and/or project brief that informs work in a retail context:
  - budget
  - target market
  - commercial requirements
  - brand analysis
  - point of sale requirements
  - consumer research
  - functional requirements
  - commercial requirements
  - product stock and range
  - retail display requirements
  - lighting
  - signage
  - visual identity
  - way finding
  - shop fronts
  - consumer and user centered processes for design
- how different aspects of space impact on potential solutions, including:
  - colour
  - size
  - shape
  - level of light
  - structural features
- types and features of resources that support the provision of design advice, and how they are used, including:
  - research tools
  - product tools
  - communication tools
- elements and principles of design, their interrelationships, and how they are used in interior design
- ergonomics, anthropometrics, proxemics and aesthetic values

- design process, key stages and associated planning techniques
- types of information that may inform the design process:
  - commercial
  - cultural
  - environmental
  - historical
  - political
  - technological
- types of creative methodologies used in the design process
- types and features of drawings and other visual presentation techniques used to present design solutions
- digital and non-digital sketching and drawing techniques to architectural drawing standards.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - retail environments for design
  - measuring equipment
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFID6015 Design for conservation and restoration projects

## Modification History

Release 1. Supersedes and is equivalent to MSFID6006 Design for conservation and restoration projects.

## Application

This unit describes the skills and knowledge required to follow a design process for the formulation of creative interior design solutions to potentially complex conservation and restoration projects. It includes the need for design solutions to satisfy the physiological, psychological, social, cultural and environmental requirements of the brief and heritage style and conservation conditions.

This unit applies to interior designers.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking interior decoration and design work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## MSFID6016 Select and monitor contractors

### Modification History

Release 1. Supersedes and is equivalent to MSFID6007 Select and instruct consultants and contractors.

### Application

This unit describes the skills and knowledge required to analyse requirements and select and monitor contractors for an interior decoration or design project. Engagement of contractors may be direct or on behalf of the client.

This unit applies to interior decorators and designers who coordinate the services of multiple contractors to achieve the design solution for the client.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Interior Decoration and Design

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse project requirements	1.1 Determine contractor requirements from detailed review of proposed design 1.2 Identify and document key project activities, interrelationships and timelines 1.3 Develop quality and cost criteria based on the project brief and proposed design 1.4 Incorporate regulatory, safety, risk and sustainability issues into contractor engagement processes 1.5 Develop accurate and comprehensive contractor specifications

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Source and select contractors	2.1 Research current and relevant information on potential contractors 2.2 Collate accurate specifications, technical data and other requested information for potential contractors 2.3 Obtain and evaluate contractor qualifications against specifications and nominated quality criteria 2.4 Create contractor agreements in writing detailing all costs and product and/or service details 2.5 Identify insurances necessary for the engagement of contractors for the specific project
3. Monitor contractors	3.1 Create documentation for contractors that provides accurate information about project requirements and timelines 3.2 Establish communication protocols that facilitate efficient exchange of information and expertise 3.3 Evaluate contractor performance against agreements and timelines and take action accordingly to support project quality and integrity 3.4 Evaluate information from contractor performance for its application to future work

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to use digital research and create and present project documentation.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFID6007 Select and instruct consultants and contractors.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFID6016 Select and monitor contractors

## Modification History

Release 1. Supersedes and is equivalent to MSFID6007 Select and instruct consultants and contractors.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- selected and scheduled contractors for 3 different interior design or decoration projects that individually or cumulatively require 3 different services.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- types of contractors used in interior decoration and design projects, and the interrelationships between them
- mathematical procedures for estimation, measurement and quotation evaluation
- considerations for the engagement and management of contractors:
  - regulatory:
    - Australian Standards and the National Construction Code
    - local government planning approval
    - work site entry legislation
    - licensing
    - heritage regulations
  - sustainability
- sources of information on interior design related services and products
- product and service terminology, features and options, current technology and risk considerations in these key service areas:
  - building and construction
  - cabinetmakers
  - design
  - electrical
  - floor installation and finishing
  - painting
  - picture framing

- plastering
- plumbing
- soft furnishing
- tiling
- requirements for contractor briefing and specification documents
- formats and inclusions for written agreements in interior design and decoration projects
- insurance implications of engaging contractors
- project management techniques, including planning and implementation.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - proposed designs
  - information technology for research and document creation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFID6017 Evaluate design project outcomes

### Modification History

Release 1. Supersedes and is equivalent to MSFID6008 Evaluate design project outcomes.

### Application

This unit describes the skills and knowledge required to identify evaluation criteria and engage in a structured process of critical evaluation to make a judgement about the success of the design outcome. It also includes making suggestions for design improvements based on the evaluation.

This unit applies to designers.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Interior Decoration and Design

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify evaluation criteria	1.1 Analyse project brief to determine key design requirements 1.2 Verify problems or underlying factors to be addressed in the project brief 1.3 Identify communication requirements for the project 1.4 Research and identify current industry design trends relating to project brief 1.5 Research and identify workplace and industry standards in relation to design presentation 1.6 Research and verify quality and evaluation criteria that apply to design processes

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Apply evaluation criteria	<p>2.1 Examine design drawings, and all associated documentation to identify all features of the finished design against the original design concept</p> <p>2.2 Evaluate the design and all specifications against project brief to check consistency</p> <p>2.3 Evaluate the design and use critical reflection to determine how well elements and principles of design have been applied</p> <p>2.4 Evaluate the design for consistency with current industry trends and influences</p> <p>2.5 Evaluate the design against client requirements, including adherence to time and budget</p> <p>2.6 Evaluate the design for quality and innovation</p> <p>2.7 Evaluate processes engaged to develop finished design for effectiveness in achieving final design outcomes</p>
3. Suggest design improvements	<p>3.1 Examine and document factors affecting the outcome of the project</p> <p>3.2 Use collaboration and critical thinking to inform suggestions for improving that design and how it meets the established design criteria</p> <p>3.3 Use technical design skills to reflect evaluation outcomes and communicate improvements</p> <p>3.4 Identify and test potential design improvements for viability</p> <p>3.5 Achieve design improvements through selection, adaptation and introduction of materials, tools, technology and design processes</p> <p>3.6 Respect intellectual and copyright requirements when incorporating ideas from others</p> <p>3.7 Compile and produce evaluation report that addresses key criteria</p>

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills use digital research and create evaluation reports.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## **Unit Mapping Information**

Supersedes and is equivalent to MSFID6008 Evaluate design project outcomes.

# Assessment Requirements for MSFID6017 Evaluate design project outcomes

## Modification History

Release 1. Supersedes and is equivalent to MSFID6008 Evaluate design project outcomes.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- evaluated the outcomes of 3 interior design projects, including 1 residential and 1 commercial design
- demonstrated skills in:
  - collaboration
  - using critical thinking processes
  - reflective practice.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- Australian Standards and National Construction Code (NCC) relevant to interior design
- elements and principles of design, including liveability and accessibility
- ergonomics, anthropometrics, proxemics and aesthetic values
- sustainability considerations for interior design
- how to determine evaluation criteria for interior design projects, and how these may vary
- how to establish evaluation criteria for interior design projects and key considerations:
  - the design process and its application
  - application of elements and principles of design
  - consistency with project brief – client needs, budget, timeline
  - adherence to compliance requirements
  - sustainability outcomes
  - suitability for current interior design trends and expectations
  - compliance with building standards
- models and processes for collaboration, evaluation and reflective practice, including:
  - how to establish a personal work methodology
  - how to work with others and in a team by recognising dependencies and using cooperative approaches to optimise work flow and productivity
  - ways of communicating and presenting ideas and critiques
  - how to initiate new ideas and work techniques

- how to experiment in both the planning of projects and methods of execution
- types and features of drawings and other visual presentation techniques used to present interior design solutions - digital and non-digital.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - completed designs and supporting design documentation
  - information technology for research and document creation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFID6018 Apply 3D digital visualisation techniques to represent interior designs

## Modification History

Release 1. Supersedes and is equivalent to MSFID6002 Apply 3-D visualisation techniques to represent interior designs.

## Application

This unit describes the skills and knowledge required to select and apply digital rendering techniques to three dimensional (3D) computer aided design (CAD) models and create realistic visualisations of interior design projects for the purpose of design development and presentation.

This unit applies to interior designers.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse project	1.1 Review, confirm and clarify project brief 1.2 Assess and confirm parameters for the project 1.3 Select resources appropriate to work requirements and check for operational effectiveness 1.4 Establish and maintain communication with relevant personnel in accordance with project requirements and/or workplace practices
2. Select rendering	2.1 Determine rendering requirements for project presentation

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
techniques	requirements 2.2 Select rendering software with capability to achieve desired effects within the project timeframe and budget 2.3 Assess equipment suitability for rendering software and achieving desired effects 2.4 Plan rendering tasks in accordance with project requirements
3. Apply rendering functions	3.1 Select and apply image resolutions to meet project requirements 3.2 Select and apply ratios to meet project requirements 3.3 Adjust renderer attributes to obtain desired visual effects
4. Check render integrity and quality	4.1 Test and refine render integrity through critical evaluation 4.2 Identify and re-link missing images and textures to obtain required quality 4.3 Test render duration for optimising process 4.4 Test alpha channels and opacity matts 4.5 Test render layers and passes
5. Optimise images for render processes	5.1 Identify and complete relevant pre-rendering optimisations tasks 5.2 Adjust and refine renderer attributes to optimise render duration 5.3 Select appropriate file output format, file names and output destinations 5.4 Select appropriate file names and output destinations
6. Render model and extract selected views	6.1 Complete final rendering processes and review to ensure compliance with system and client requirements 6.2 Correctly format files for required print and digital presentation outputs 6.3 Store in accordance with system requirements

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFID6002 Apply 3-D visualisation techniques to represent interior designs.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFID6018 Apply 3D digital visualisation techniques to represent interior designs

## Modification History

Release 1. Supersedes and is equivalent to MSFID6002 Apply 3-D visualisation techniques to represent interior designs.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- used creative and critical thinking processes to render digital models for representation of interior design project intentions using digital software applications, and created rendered perspective views, including the creation of the following effects:
  - lighting
  - shading
  - rendering
  - furniture and fittings
  - reflections and translucency
  - foreground objects
  - integrating realistic background and views
  - accurate representation of materiality and texture
  - mood and atmosphere
  - simulated day and night-time effects
  - texturing.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- elements and principles of design
- ergonomics, anthropometrics, proxemics and aesthetic values
- mathematical procedures for estimation and measurement
- standards, requirements, policies and procedures for producing digital rendering
- types of digital rendering software packages, their features and capabilities, and how they are manipulated to achieve desired outcomes
- the digital rendering process and how it can be optimized
- equipment requirements and procedures for their safe use, operation and maintenance
- types of problems with digital rendering and how they can be resolved

- methods of storage for rendered components
- procedures for the recording, reporting and maintenance of digital rendering records and information
- applying rendering tasks using and refining render components for best performance
- techniques for visualising 2D notions into 3D space.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - completed designs in modelling software for extraction
  - digital hardware and software.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFID6019 Produce digital presentations for commercial projects

## Modification History

Release 1. Supersedes and is equivalent to MSFID6009 Produce digital presentations for commercial projects.

## Application

This unit of competency describes the skills and knowledge required to prepare, produce and present digital presentations for interior design projects in accordance with project briefs.

This unit applies to interior designers.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assess project presentation requirements	1.1 Review and clarify brief to determine presentation requirements 1.2 Assess and confirm parameters for the project 1.3 Select resources appropriate to work requirements and check for operational effectiveness 1.4 Establish and maintain communication with others
2. Prepare for digital presentation	2.1 Measure space to obtain all dimensions and specifications 2.2 Examine and plan placement of products and accessories as well as application of finishes 2.3 Assess and plan the spatial organisation of the area in accordance

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>with its intended use</p> <p>2.4 Explore options and potential innovative approaches for digital presentation solutions</p> <p>2.5 Prepare initial presentation and discuss and negotiate ideas and concepts with client and other stakeholders</p>
3. Produce digital presentation	<p>3.1 Critically evaluate and compare digital presentation options</p> <p>3.2 Develop project-specific digital methodologies based on evaluation of options</p> <p>3.3 Manage and use electronic business files and financial tools to assist in the development of the presentation</p> <p>3.4 Produce and check final digital presentation for client communication</p>
4. Present digital presentation	<p>4.1 Present to the client, selling the attributes of the design solution</p> <p>4.3 Produce and include materials and product schedules in the final digital presentation</p> <p>4.4 Produce floor plan(s) and elevations to portray placement of products and specify finishes using rendering techniques and portray digitally</p> <p>4.5 Support digital presentation with colour boards and detailed drawings in accordance with project requirements</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFID6009 Produce digital presentations for commercial projects.

# Assessment Requirements for MSFID6019 Produce digital presentations for commercial projects

## Modification History

Release 1. Supersedes and is equivalent to MSFID6009 Produce digital presentations for commercial projects.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- used creative and critical thinking processes to produce a digital presentation for an interior design commercial project consisting of plans, elevations and/or sections and three dimensional (3D) views for 3 different spaces.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement
- elements and principles of design
- ergonomics, anthropometrics, proxemics and aesthetic values
- types of digital presentation methods for different contexts
- types of digital software packages for presentation of interior designs, their features and capabilities and how they are used to achieve desired outcomes
- techniques for interpreting 2D notions into 3D space
- digital presentation development and use
- standards, requirements, policies and procedures for producing digital presentations
- equipment and procedures for their safe use, operation and maintenance
- procedures for the recording, reporting and maintenance of digital records and information
- types of problems with digital presentations and how they can be resolved.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs and associated concepts and design solutions for representation that need to be digitally presented
  - digital hardware and software.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -

# MSFID6020 Develop commercial interior design project documentation

## Modification History

Release 1. Supersedes and is not equivalent to MSFID5004 Specify structural elements, systems and services for interior spaces.

## Application

This unit describes the skills and knowledge required to produce commercial interior design project documentation using computer-aided design (CAD) programs. Project documentation covers researching, resolving and detailing through drawings, the materials, construction methods and building services associated with retail, hospitality, and workplace interior design projects. Designs may be for the fit-out of entire buildings or for tenancies within larger buildings, new or existing.

This unit applies to interior designers.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking interior decoration and design work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Interior design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm detailed design requirements	1.1 Confirm documentation requirements through analysis of the design proposal 1.2 Analyse the site and building construction to identify structural and

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	service implications of proposed design 1.3 Identify building classification and review regulatory implications of proposed design 1.4 Identify building services, and implications of proposed design 1.5 Identify and respond to the need for professional advice on design viability 1.6 Identify and plan appropriate digital drawing schedule based on review of required project trades, construction and requirements
2. Research and resolve interior details	2.1 Research methods of construction and assembly for the proposed interior elements 2.2 Research materials, hardware and fixtures appropriate for the scope of the project 2.3 Modify and resolve details to meet requirements and prepare detailed development drawings 2.4 Seek client feedback and agree on any modifications
3. Prepare digital construction documentation	3.1 Develop accurate and fully dimensioned plans, sections and reflected ceiling plans with required annotations 3.2 Develop fully dimensioned and annotated details for material junctions, wall construction, ceiling elements 3.3 Identify services requirements and accurately integrate into documentation 3.4 Include all required information related to substrate, finish, junctions and fixings 3.5 Develop associated accurate, itemised specification notes and schedules in accordance with job requirements 3.6 Seek and incorporate client feedback on any design changes and on detail design development
4. Manage documentation package and quality control	4.1 Maintain current and accurate drawing register 4.2 Develop and implement coding and numbering system for drawings 4.3 Manage drawing amendments in accordance with agreed processes and procedures 4.4 Produce document package in required formats

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for MSFID6020 Develop commercial interior design project documentation

## Modification History

Release 1. Supersedes and is not equivalent to MSFID5004 Specify structural elements, systems and services for interior spaces.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- developed digital drawings, specifications and schedules for 3 commercial interior designs that individually or cumulatively include:
  - class 5 or above buildings or projects with multi-classification
  - spaces with multiple levels
  - designs with structural requirements
  - service requirements
  - detailing of custom joinery
- produced complete documentation package in 2 different formats.
- 

## Knowledge Evidence

- role of Australian Standards and the National Construction Code (NCC) and statutory planning regulations affecting commercial interior design in class 5 or above buildings or multi-classification buildings for:
  - aged care facilities
  - bar and/or restaurant projects
  - hotels
  - retail projects
  - workplaces
- commercial building classes, their features, regulatory framework and impact on interior fit-out requirements:
  - accessibility
  - acoustic controls
  - energy ratings
  - fire egress and exit pathways
  - floorplate densities
  - fire rating level (FRL) requirements of materials

- natural and artificial light
- natural and mechanical ventilation
- sustainability score systems and/or indexes
- toilets and/or sanitary provisions
- sources of professional advice on building and construction
- mathematical procedures for estimation, measurement and use of computer aided drawing technology
- computer aided drawing techniques, building and architectural terminology and architectural drawings conventions:
  - coding
  - cross referencing
  - line weights
  - scale
  - symbols
- scope of commercial interior design projects, and when an architect or structural engineer needs to be involved
- break-down of projects into logical parts based on the construction process and the type of drawings and documentation required for different trades
- construction of built interior elements, load bearing and non-load bearing, and how they are represented on drawings and specifications:
  - beams and columns
  - ceilings, ceiling components, and integrated services
  - doors and assemblies
  - floors and flooring systems and integrated services
  - stairs and balustrades
  - walls, partitions, glazing and components
- materials used in commercial interior design fit-outs, the fundamental techniques of how they are applied, fixed and detailed through drawing and schedules:
  - floor materials, junctions and offsets
  - formats and required inclusions for design specifications
  - FRL requirements
  - glazing and doors
  - interior claddings
  - wall linings
- architectural elements in commercial interiors, their features, regulatory requirements structural implications, and how they are represented on architectural drawings:
  - building cores
  - lifts and lift lobbies
  - service and utility spaces
  - stairs and fire stairs
  - tenancy separations and fire separation

- toilets
- voids and atrium
- custom joinery for commercial interior design, the fundamental techniques of how they are assembled, constructed and detailed through drawing:
  - architectural hardware
  - bars
  - built-in furniture and seating
  - ceiling features
  - concealed lighting
  - display systems
  - integrated technology
  - platforms and/or raised floors
  - point of sale display systems
  - reception desks
  - storage
  - substrates and finish material
  - workstations
- commercial building construction and how to interpret architectural and engineering drawings:
  - beams and/or trusses
  - concrete
  - curtain walls and external glazing
  - glass
  - masonry
  - steel
  - structural grids
- structural implications and limitations for interior design in commercial buildings:
  - impact of interior floor and ceiling penetrations
  - impact of changes to interior load bearing elements
  - structural integration of new interior elements with existing (or proposed) building
- commercial kitchen documentation requirements and associated regulations
- types of services in commercial and multi-residential buildings, their features, regulatory requirements and how they are represented on detailed design drawings:
  - acoustics
  - electrical
  - environmental controls
  - hydraulics
  - information and communications technology (ICT)
  - lighting
  - mechanical ventilation.

- documentation management and controls:
  - amendments and multi-access drawing protocols
  - drawings codes and cross-referencing
  - drawings schedules
  - file management – cloud, print and digital
  - quality control
- formats and required inclusions for schedules and design specifications:
  - door schedules
  - fixtures, furniture and equipment schedules
  - materials schedules.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design information for documentation
  - information technology hardware
  - CAD software.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFKB3009 Provide advice on modular kitchens

### Modification History

Release 1. Supersedes and not equivalent to MSFKB3007 Provide advice on cabinet design features.

### Application

This unit describes the skills and knowledge required to provide clients with information relating to the features and benefits of modular kitchen products and components, and to advise on best fit to meet client needs.

This unit applies to individuals providing advice in a kitchen showroom or similar environment where a set range of designs and components are available and basic technical and design information relevant to cabinets is used.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

N/A

### Unit Sector

Kitchens and Bathrooms

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify client requirements	1.1 Obtain client requirements for kitchen components through questioning or review of documentation 1.2 Access and interpret plans, drawings and any design details relevant to the client enquiry 1.3 Identify and confirm services available appropriate to the client's needs and confirm with client
2. Provide information	2.1 Access and research information on all product options and to

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
on materials, hardware and accessories	ensure advice to clients is fully informed 2.2 Explain product options to the client noting specific features and benefits 2.3 Clearly explain construction, installation and ordering details
3. Provide layout options	3.1 Prepare layout options using modular cabinets based on client information 3.2 Assess advantages and disadvantages of options
4. Suggest best solution to meet client needs	4.1 Discuss options with the client to ascertain responses and preferences 4.2 Provide advice on best options to meet client requirements and confirm preferences
5. Complete costing and ordering documentation	5.1 Record client details and confirm for accuracy 5.2 Determine required quantities based on manufacturer specifications, plans and client needs 5.3 Prepare and present accurate costing to the client 5.4 Place formal order and provide clear and accurate documentation to the client

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for MSFKB3009 Provide advice on modular kitchens

## Modification History

Release 1. Supersedes and not equivalent to MSFKB3007 Provide advice on cabinet design features.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- advised 3 different clients on options for modular kitchen products to suit their needs, with each kitchen to comprise:
  - appliances
  - benchtops
  - cabinetry
  - hardware and accessories
  - splashback.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- how different client requirements impact advice provided:
  - brand preferences
  - budget
  - function
  - timelines
- how to interpret symbols and terminology on plans and drawings
- types and characteristics of different products:
  - appliances
  - benchtops
  - cabinetry
  - hardware
  - other surfaces
- types of product technical information and how to access and interpret this information
  - aspect and orientation
  - care and maintenance requirements
  - characteristics and qualities

- colour range
- modular cabinet construction
- dimensions
- environmental specifications
- finishes
- installation requirements
- price
- quality and performance
- warranties
- mathematical procedures for estimation and measurement
- documentation procedures for placing cabinet orders.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - client requirements
  - technical and design information on kitchen products
  - workplace procedures and documentation for placing orders.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFKB3010 Detail cabinet construction requirements

### Modification History

Release 1. Supersedes and is not equivalent to MSFKB3008 Identify cabinet construction and installation methods.

### Application

This unit describes the skills and knowledge to provide detailed specifications and design drawings for cabinetry commonly used in kitchens, bathrooms and laundries.

This unit applies to kitchen and bathroom designers.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Kitchens and Bathrooms

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish cabinet design requirements	1.1 Confirm cabinetry requirements through review of documentation or discussion with the client 1.2 Determine design parameters and constraints based on client requirements and review of the site 1.3 Take and record accurate site measurements 1.4 Accurately document project requirements
2. Design cabinet	2.1 Develop cabinet design ideas and options based on project requirements and available products and services 2.2 Complete drawings that visually represent cabinet design ideas

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	2.3 Refine options through experimentation and discussion with client 2.4 Confirm and accurately document client preferences
3. Produce construction documentation	3.1 Develop accurate drawing, detailing all required measurements, dimensions and features 3.2 Identify structural features and components that impact the design on documentation using appropriate drawing protocols 3.3 Identify information to inform construction and installation and accurately document

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for MSFKB3010 Detail cabinet construction requirements

## Modification History

Release 1. Supersedes and is not equivalent to MSFKB3008 Identify cabinet construction and installation methods.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- created detailed custom designed cabinet solutions and associated drawings for 3 different sites with varying conditions.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement
- compliance requirements for cabinetry in relation to:
  - safety
  - sustainability
- sources of information on cabinetry products, their features and costs
- drawing techniques, including protocols and symbols for detailing of cabinet requirements
- features of cabinets and components used in kitchen and bathroom projects
- current and emerging cabinet construction techniques, their features and limitations, and how these may affect cabinetry design, including:
  - computer numerical control systems (CNC)
  - computer-aided manufacturing (CAM)
  - custom manufacture principles and processes
- factors that affect cabinet design and installation, including:
  - different methods of installation
  - installation requirements of appliances
  - moisture and humidity considerations
  - waterproofing considerations
  - sequence of installation
  - design modifications
  - services location
  - availability of installation expertise

- site constraints
- supply chains for kitchen and bathroom components and materials:
  - ordering
  - delivery.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - measuring equipment
  - drawing materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFKB3011 Plan kitchen and bathroom projects

### Modification History

Release 1. Supersedes and is not equivalent to MSFKB3001 Identify processed in kitchen and bathroom projects.

### Application

This unit describes the skills and knowledge required to plan key stages of kitchen and bathroom projects, both renovations and new builds.

This unit applies to kitchen and bathroom designers, sales advisors and tradespeople involved in kitchen and bathroom construction at different stages of the process.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Kitchens and Bathrooms

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine project scope	1.1 Seek information about the project through direct client communication or review of documentation 1.2 Establish scope and complexity of project from information provided 1.3 Establish key people and organisations to be involved in the project and their respective roles and responsibilities
2. Assess individual work requirements	2.1 Determine own work responsibilities from review of project information 2.2 Agree communication lines and protocols with individuals whose role intersects with, and impacts on, own responsibilities

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	2.3 Confirm and document detailed sequencing details with others involved in the project
3. Plan work	3.1 Develop and document a project schedule that reflects work requirements 3.2 Address the contingencies involved in project sequencing in consultation with others 3.3 Confirm and communicate work schedule to others involved in the project in a timely manner

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to document project schedules.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFKB3011 Plan kitchen and bathroom projects

## Modification History

Release 1. Supersedes and is not equivalent to MSFKB3001 Identify processed in kitchen and bathroom projects.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- planned and documented the work process for 3 different projects, 1 of which must be a kitchen and 1 of which must be a bathroom.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- typical client requirements and/or potential components of a project brief
- roles and responsibilities of all those involved in kitchen and bathroom projects, how these interrelate and the impact on project planning and sequencing:
  - architects
  - colour consultants
  - designers
  - material and component suppliers
  - tradespeople:
    - builders
    - cabinetmakers
    - electricians
    - flooring specialists
    - glaziers
    - painters
    - plumbers / gas fitters
    - stonemasons
    - tilers
    - waterproofers
- the overall planning process, potential key stages and sequencing of kitchen and bathroom projects and what each stage involves:
  - concept design
  - design specification

- planning approval
- technical site assessment/site measure
- demolition
- construction:
  - services
  - waterproofing
  - installation
- differences between renovation and new build projects
- project planning techniques and required plan inclusions:
  - sequence of operations
  - budget
  - timelines
  - allocation and delivery of resources
  - contingencies
- features of cabinets and components used in kitchen and bathroom projects, including manufacturing methodologies
- supply chains for kitchen and bathroom components and materials.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - project briefs.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFKB4009 Determine spatial planning considerations for kitchen design

## Modification History

Release 1. Supersedes and is equivalent to MSFKB4001 Determine spatial planning considerations for kitchen design.

## Application

This unit describes the skills and knowledge required to examine the various space requirements and options for kitchen designs. It includes the need to determine the planning and contractual issues arising from work subject to compliance requirements.

This unit applies to kitchen designers who use discretion, judgement and problem solving in the analysis of design requirements.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking kitchen and bathroom work.

Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Kitchens and Bathrooms

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine project requirements	1.1 Establish communication with the client and obtain information regarding the client needs and expectations 1.2 Determine design parameters and constraints based on client requirements and review of the site

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.3 Take accurate site measurements and record and identify location of current services for impact on design</p> <p>1.4 Accurately document project requirements</p>
2. Examine layout options	<p>2.1 Identify key work zones and determine prime activities and associated appliances in the context of the brief</p> <p>2.2 Identify traffic flow patterns and considerations for kitchen space based on client requirements</p> <p>2.3 Consider how the principles of proximity should be used to maximise the practicality of the kitchen layout</p> <p>2.4 Identify location of services and determine implications for relocation</p> <p>2.5 Identify the need or potential for structural change based on scope of the brief</p> <p>2.6 Analyse suitability of layout options for kitchen space and determine limitations and benefits based on information gathered</p>
3. Determine storage options	<p>3.1 Identify storage requirements of kitchen work zones from brief and client information</p> <p>3.2 Examine storage options for suitability and determine implications for design</p> <p>3.3 Identify dimensions and space requirements of standard and potential customised storage options for design</p>
4. Assess kitchen ergonomic considerations	<p>4.1 Use basic principles of ergonomics to determine space planning implications</p> <p>4.2 Identify requirements for working height based on specific client needs</p> <p>4.3 Identify manual handling considerations for kitchen design tailored to client needs</p> <p>4.4 Consider storage principles and determine implications for design</p> <p>4.5 Take into account special considerations for children, older people and/or disabled people in accordance with brief or client needs</p>
5. Examine appliance requirements	<p>5.1 Identify required appliances and determine standard dimensions, clearances and required services</p> <p>5.2 Identify manufacturer guidelines and statutory regulations regarding the placement and installation of appliances and examine</p>

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	implications for design 5.3 Analyse work space implications for appliances and determine implications for design
6. Determine planning and contractual considerations	6.1 Recognise the need for work or change that is subject to compliance requirements based on outcomes of assessment 6.2 Determine and integrate implications of structural work and relocation or change to service requirements into the design process 6.3 Identify and organise the need for specialist expertise and advice
7. Collate and document information	7.1 Analyse, collate and combine information gathered based on the needs of the project 7.2 Document information from assessment in a format that allows for easy reference as the design project progresses

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance.

- technology skills to document information to inform design using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFKB4001 Determine spatial planning considerations for kitchen design.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFKB4009 Determine spatial planning considerations for kitchen design

## Modification History

Release 1. Supersedes and is equivalent to MSFKB4001 Determine spatial planning considerations for kitchen design.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- determined and documented spatial planning considerations for 3 different kitchens, 1 of which must be a renovation, and 1 of which must be a new build.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- liveable housing design – current and emerging thinking and trends
- principles of ergonomics and their application to kitchen design:
  - clearance (minimum spatial tolerances for access)
  - reach (maximum spatial tolerances and workspace envelope)
- factors for consideration in planning kitchen spaces:
  - clearances – floor, traffic
  - space requirements for reaching, bending and crouching
  - eating space requirements
  - additional space requirements for areas such as computers, entertaining and laundry
  - number and types of users of kitchen
  - installation requirements
- ways of collating and documenting information to inform the design process and how to develop itemised schedules
- aspects of kitchen design:
  - layout options:
    - island
    - single wall set out
    - galley
    - L-shape
    - U-shape
    - work zones.
  - storage - common requirements, options and storage principles for:

- food
- food preparation items
- food service items
- cleaning
- composting, recycling and rubbish
- food storage zone
- food preparation zone
- clean-up zone
- bench top clearances
- landing space
- triangle concepts
- types, characteristics, uses and spatial requirements for different built-in and small appliances
  - coffee machine
  - cook tops of all types
  - dishwasher
  - exhaust systems
  - ovens of all types
  - refrigerator
  - sink
  - small appliances
  - water filtration systems
- types, characteristics and use of different lighting options, both natural and artificial
- types of work impacted by planning and building regulations, and the requirements and regulations that apply, including licensing requirements for
  - electrical, including lighting
  - glazing
  - plumbing
  - structural changes (movement of walls, installation of new flooring).
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - sites for kitchen designs
  - measuring equipment
  - information technology for document creation.

---

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors

# MSFKB4010 Determine spatial planning considerations for bathroom design

## Modification History

Release 1. Supersedes and is equivalent to MSFKB4004 Determine spatial planning considerations for bathroom design.

## Application

This unit describes the skills and knowledge required to examine the various space requirements and options for bathroom designs. It includes the need to determine the planning and contractual issues arising from work subject to compliance requirements.

This unit applies to bathroom designers who use discretion, judgement and problem solving in the analysis of design requirements.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking kitchen and bathroom work.

Industry standards and codes of practice within Australia must also be applied. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

# Assessment Requirements for MSFKB4010 Determine spatial planning considerations for bathroom design

## Modification History

Release 1. Supersedes and is equivalent to MSFKB4004 Determine spatial planning considerations for bathroom design.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- determined and documented spatial planning considerations for 3 different bathrooms, 1 of which must be a renovation, and 1 of which must be a new build.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- liveable housing design – current and emerging thinking and trends
- principles of ergonomics and their application to bathroom design:
  - clearance (minimum spatial tolerances for access)
  - reach (maximum spatial tolerances and workspace envelope)
- factors for consideration in planning bathroom spaces:
  - additional space requirements often incorporated into bathrooms for functions such as dressing, ironing, make-up areas
  - installation requirements
  - clearances – floor, traffic
  - space requirements for reaching, bending and crouching
- ways of collating and documenting information to inform the design process and how to develop itemised schedules
- aspects of bathroom design:
  - layout options, including placement of:
    - basins
    - baths and/or spas
    - lighting
    - power
    - showers and shower screens
    - toilets and bidets
    - vanities

- ventilation
- use zones:
  - bathing and/or showering
  - drying
  - other ancillary uses
- storage - common requirements, options and storage principles
- types, characteristics, uses and spatial requirements for different appliances, fixtures and fittings, including:
  - shower, shower screen and shower head
  - toilet and bidet
  - bath and spa
  - laundry related items
  - vanities, taps and sinks
  - cabinets
  - towel racks
- types, characteristics and use of different lighting and ventilation options, both natural and artificial
- types of work impacted by planning and building regulations, and the requirements and regulations that apply, including licensing requirements for:
  - electrical (power and lighting)
  - glazing (shower doors, shower screens, bath enclosures, windows, mirrors)
  - painting
  - plumbing
  - structural changes
  - structural changes (movement of walls, installation of new flooring)
  - tiling
  - waterproofing.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - sites for bathroom designs
  - measuring equipment
  - information technology for document creation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFKB4011 Design ancillary residential cabinetry

## Modification History

Release 1. Supersedes and is equivalent to MSFKB4007 Design ancillary residential cabinetry.

## Application

This unit describes the skills and knowledge required to determine cabinetry requirements, develop custom design options and specify requirements to inform production and installation. Ancillary cabinetry is cabinetry outside of kitchen, bathroom and laundry applications.

This unit applies to interior designers, including kitchen and bathroom designers. They analyse varied information to develop design solutions.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking kitchen and bathroom work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

## Pre-requisite Unit

N/A

## Unit Sector

Kitchens and Bathrooms

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine project requirements	1.1 Confirm cabinetry requirements through review of documentation or discussion with the client 1.2 Determine design parameters and constraints based on client requirements and review of the site 1.3 Take and record accurate site measurements

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Accurately document project requirements
2. Develop design options	2.1 Develop cabinet design ideas and options based on project requirements and available products and services 2.2 Complete drawings that visually represent cabinet design ideas 2.3 Refine options through experimentation and discussion with client 2.4 Confirm and accurately document client preferences
3. Develop design specifications	3.1 Develop accurate drawing detailing all required measurements, dimensions and features 3.2 Identify structural features and components that impact the design on documentation using appropriate drawing protocols 3.3 Identify information to inform construction and installation and accurately document on specification 3.4 Identify and estimate costs associated with all aspects of design, construction and installation 3.5 Present complete design documentation and cost estimate to client in professional format suited to the scope and nature of the project

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to create digital documents and drawings.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFKB4007 Design ancillary residential cabinetry.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFKB4011 Design ancillary residential cabinetry

## Modification History

Release 1. Supersedes and is equivalent to MSFKB4007 Design ancillary residential cabinetry.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- designed, documented and presented 3 of the following ancillary cabinetry solutions with cost estimates:
  - dressing rooms
  - entertainment units
  - home offices
  - shelving units and/or cupboards
  - wine cellars
  - work rooms.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement
- compliance requirements for cabinetry in relation to:
  - safety
  - sustainability
- sources of information on cabinetry products, their features and costs
- types, characteristics, uses and limitations of different types of cabinets:
  - dressing rooms
  - entertainment units
  - home offices
  - shelving units and/or cupboards
  - wine cellars
  - work rooms
- different client requirements and design parameters and how these impact cabinet design
  - budget
  - colour, style and tone

- embedded technology
- quality of finish
- relationship with other features of the room
- structural and functional requirements
- timeline
- options for cabinetry structure, materials and components and their suitability for different applications
- cabinet construction and installation methods and considerations and how these impact the design selection
- sketching and drawing techniques, protocols and symbols
- formats and required inclusions for design specifications
- processes for calculating and documenting cabinetry costs.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - spaces for cabinetry
  - measuring equipment
  - information technology for document creation
  - manual and computer aided drawing materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFKB4012 Determine layout for laundry components

### Modification History

Release 1. Supersedes and is equivalent to MSFKB4008 Determine layout for laundry components.

### Application

This unit describes the skills and knowledge required to use design principles to design and document the layout for a laundry, including placement of components, such as cabinets, appliances and required laundry facilities. It does not include designing any changes to plumbing, electrical or waterproofing, other than the location of required service.

This unit applies to interior designers, including kitchen and bathroom designers. They use specialised knowledge and analyse varied information to develop design solutions.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking kitchen and bathroom work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Kitchens and Bathrooms

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine project requirements	1.1 Establish communication with the client and obtain information regarding the client needs and expectations 1.2 Determine design parameters and constraints based on client requirements and review of the site 1.3 Identify location of current services for impact on design

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Take and record accurate site measurements 1.5 Accurately document project requirements
2. Examine layout options	2.1 Examine layout options, access and traffic flow implications 2.2 Assess environmental implications of the layout and review options for achieving maximum energy efficiency 2.3 Develop ideas and options for layouts and components based on project requirements and available products and services 2.4 Complete drawings that visually represent cabinet design ideas 2.5 Refine options through experimentation and discussion with client 2.6 Confirm and accurately document client preferences
3. Develop design specifications	3.1 Develop accurate drawings, detailing all required measurements, dimensions and features 3.2 Identify required changes to service outlets and waterproofing for preferred design and accurately document 3.3 Check compliance of the design with regulatory requirements 3.4 Develop and accurately document specifications for all products and services 3.5 Identify and estimate costs associated with all aspects of design, construction and installation 3.6 Present complete design documentation and estimate to client in professional format suited to the scope and nature of the project

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to create digital documents and drawings.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFKB4008 Determine layout for laundry components.

# Assessment Requirements for MSFKB4012 Determine layout for laundry components

## Modification History

Release 1. Supersedes and is equivalent to MSFKB4008 Determine layout for laundry components.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- designed, documented and presented laundry layouts in response to 3 different design briefs.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- mathematical procedures for estimation and measurement
- compliance requirements for laundry designs
- information to be gathered from site analysis:
  - observing current inclusions and appliances
  - identifying current laundry features and services
  - measuring laundry dimensions and features
  - identifying structural conditions and features of current laundry layout or which require building or engineering advice in a new laundry design
  - observing general house style
- sources of information on laundry components
- features of laundry designs and types, characteristics, uses and limitations of laundry components, including:
  - washing machine, dryer, ironing facilities, laundry sink and hanging facilities
  - storage areas, cabinets and shelving
  - tiling, fixtures and fittings
  - shower, shower screen, toilet and basin
- spatial planning considerations for laundry designs, including:
  - access issues, including for people with disabilities
  - location and capacity of services
  - requirements of laundry appliances
  - usage and traffic flows typical to a laundry

- laundry storage requirements
- formats and required inclusions for laundry design specifications, including:
  - measurements and dimensions
  - fixtures and fittings
  - product codes
  - materials
- sketching and drawing techniques, protocols and symbols
- processes for calculating and documenting costs.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - spaces for laundry design
  - measuring equipment
  - information technology for document creation
  - manual and computer aided drawing materials.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFKB4013 Document residential building services

### Modification History

Release 1. Supersedes and is equivalent to MSFKB4003 Identify and document services required to support fitted furniture designs.

### Application

This unit describes the skills and knowledge required to identify and document existing services, examine the implications for new interior space design and develop layout documentation showing details of proposed new service locations. It does not include layout of service pipes, wiring, conduits or installation of services.

This unit applies to interior designers, including kitchen and bathroom designers who use discretion, judgement and problem solving in the determination of service requirements.

Licensing, legislative or certification requirements may apply to this unit and relevant state/territory and local government agencies should be consulted to determine any necessary certification or licensing for undertaking kitchen and bathroom work. Access to construction sites requires certification of general induction training specified by the National Code of Practice for Induction for Construction Work (ASCC 2007).

### Pre-requisite Unit

N/A

### Unit Sector

Kitchens and Bathrooms

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify and document available services	1.1 Arrange access to work area with client in accordance with project requirements 1.2 Identify and follow on-site work health and safety procedures 1.3 Locate and accurately document existing services on site diagrams or plans using correct industry symbols and protocols

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>1.4 Identify type and capacity of services and accurately document using correct industry symbols and protocols</p> <p>1.5 Take accurate site measurements to inform layout documentation</p>
2. Examine implications of services on design	<p>2.1 Determine intentions or options for services from design brief, drawings and plans</p> <p>2.2 Assess details obtained from site against design requirements</p> <p>2.3 Identify appliances in the design brief and examine implications on services</p> <p>2.4 Identify compliance issues relating to the location of services</p> <p>2.5 Determine implications of current services on design</p>
3. Determine new service system layout	<p>3.1 Determine details of potential new service layout requirements from the design brief</p> <p>3.2 Assess required and desirable performance characteristics and sustainability of service products</p> <p>3.3 Assess ergonomic, anthropometric and proxemic principles in respect of the intended products</p> <p>3.4 Obtain costing details and confirm suitability against the design brief</p> <p>3.5 Identify the need for specialist contractor advice about design implications and organise in accordance with the scope of work</p> <p>3.6 Confirm and agree service system layouts that meet design brief requirements with client</p>
4. Complete digital layout documentation	<p>4.1 Create detailed digital service layout documentation showing location of all required services using correct industry symbols and protocols</p> <p>4.2 Accurately document associated product specifications in accordance with industry standards</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFKB4003 Identify and document services required to support fitted furniture designs.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFKB4013 Document residential building services

## Modification History

Release 1. Supersedes and is equivalent to MSFKB4003 Identify and document services required to support fitted furniture designs.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- conducted a site survey and documented services information for 3 different sites
- developed digital service layout documentation that complies with industry standards and protocols for 3 different designs (to include 1 renovation and 1 new build), which individually or cumulatively include documentation of the following services:
  - electrical:
    - power points
    - data outlets
    - lighting
  - gas
  - plumbing:
    - water outlets
    - drainage features.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- state or territory work health and safety legislation, regulations, standards and codes of practice
- purpose and key provisions of Australian Standard AS1100 and its impact on documentation requirements
- statutory planning regulations affecting services in interior spaces, including kitchens and bathrooms
- mathematical procedures for estimation and measurement
- basic building and architectural terminology
- basic features of the following building services and their layout:
  - electricity – outlets, controls, switches
  - lighting
  - plumbing

- gas
- air-conditioning and/or ventilation
- sketching and drawing techniques
- industry symbols and protocols for the documentation of building services
- cost implications of existing services on design – relocation, capacity, fixtures and fittings
- local planning processes
- sustainability considerations for service layouts
- sources of information on cabinetry products
- different products, their characteristics, performance and service requirement:
  - appliances
  - lighting
- formats and required inclusions for design specifications.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - sites to be assessed
  - measuring equipment
  - information technology hardware
  - CAD software.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFKB4015 Research and recommend materials, components and finishes for kitchen designs

## Modification History

Release 1. Supersedes and is equivalent to MSFKB4002 Research and recommend materials, components and finishes for kitchen designs.

## Application

This unit describes the skills and knowledge required to determine requirements of the kitchen design brief, research options, and make recommendations for materials, components and finishes.

This unit applies to individuals working in kitchen design roles. They analyse and compare product information from a wide range of different sources to inform a design solution.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Interior Decoration and Design

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify requirements of kitchen designs brief	1.1 Evaluate project specifications, parameters and constraints, and confirm with client 1.2 Select work resources based on the needs of the project 1.3 Identify and assess aspects of the space that impact on potential solutions 1.4 Identify key project stakeholders and establish required communication protocols
2. Research options for	2.1 Examine products used in kitchen applications and determine

<b>Elements</b>	<b>Performance Criteria</b>

kitchen materials, components and finishes	<p>suitability to meet design brief</p> <p>2.2 Research new material technologies and determine suitability to meet design brief</p> <p>2.3 Select options for further analysis and design development</p>
3. Evaluate functional and aesthetic characteristics	<p>3.1 Use elements and principles of design to examine the appropriateness of materials, components and finishes for client requirements</p> <p>3.2 Assess aesthetic qualities with regard to desired effect</p> <p>3.3 Assess application methods and available expertise for the desired effect</p> <p>3.4 Assess and compare costs and quality of materials, components and finishes</p> <p>3.5 Examine sustainability considerations for materials, components and finishes</p> <p>3.6 Research hazards associated with the use and application of materials, components and finishes</p>
4. Refine ideas and select preferred solution	<p>4.1 Explore, integrate and refine different options through a process of reflection and testing</p> <p>4.2 Choose a preferred solution based on research findings and the key objectives of the project brief</p> <p>4.3 Prepare a visual representation that communicates the key aspects of the preferred solution</p>
5. Make recommendations	<p>5.1 Present recommendations in a format and level of detail suited to the client and scope of the project</p> <p>5.2 Clearly articulate rationale for the chosen solution and present to the client</p> <p>5.3 Seek client feedback on the proposed solution</p> <p>5.4 Base adjustments to the final design solution on feedback</p> <p>5.5 Accurately document specifications of selection and prepare for integration into design drawings and plans</p>

## Foundation Skills

The Foundation Skills describe those required skills (such as, language, literacy, numeracy and employment skills) that are essential to performance:

- technology skills to research product options and present recommendations using digital media.

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFKB4002 Research and recommend materials, components and finishes for kitchen designs.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFKB4015 Research and recommend materials, components and finishes for kitchen designs

## Modification History

Release 1. Supersedes and is equivalent to MSFKB4002 Research and recommend materials, components and finishes for kitchen designs.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- researched and presented recommendations for materials, components and finishes for 3 kitchen designs, 1 of which must be a renovation, and 1 of which must be a new build.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- liveable housing design – current and emerging thinking and trends
- type and scope of client / project brief information needed to inform research and recommendation:
  - budget
  - client preferences
  - aesthetic and functional requirements
  - site characteristics – size, shape, services, structural considerations
  - timeline
- mathematical procedures for estimation and measurement
- sources of information on kitchen products:
  - how to access
  - ways to interrogate and identify and distil information
- how different aspects of space impact on potential solutions, including:
  - colour
  - size
  - shape
  - level of light
  - structural features
- types and features of resources that support the provision of kitchen design advice, and how they are used, including:
  - research tools

- product information tools
- communication tools
- elements and principles of design, their interrelationships, and how they are used in kitchen design
- current and emerging technologies for kitchen products, including construction and installation techniques and their impact on design
- types, characteristics, uses and limitations of different kitchen products, including:
  - materials:
    - glass
    - laminate – low pressure, high pressure
    - particleboard
    - plywood
    - resin-based solid surfaces
    - stainless steel
    - stone – reconstituted, solid
    - tiles
    - timber and timber veneer
    - vinyl and/or foil wrap
  - components:
    - accessories – handles, hinges, runners, taps
    - cabinetry
    - benchtops
    - splashbacks
    - kickboards/plinths/legs
  - finishes:
    - edging and edge profiles
    - paints
    - waxes
    - lacquers
    - stains
    - pigments
    - oils
    - plastic coatings
    - ceramics
- different ways of creating visual representations for design solutions.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - design briefs
  - information technology for research and design presentation.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFPF2009 Cut mouldings to length

### Modification History

Release 1. Supersedes and is equivalent to MSFPF2002 Cut mouldings to length.

### Application

This unit describes the skills and knowledge required to prepare and use equipment to cut frame mouldings to the required length. Frames may be for artworks, documents, textiles or three dimensional (3D) items.

This unit applies to picture framers and others preparing mouldings in accordance with pre-determined frame designs.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Competency Field

Picture framing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Read work order and identify cutting requirements 1.2 Identify and follow work health and safety requirements throughout the work 1.3 Identify and obtain required materials and components 1.4 Select and check tools and equipment for suitability, quality, serviceability and safety prior to use 1.5 Plan the work sequence suited to the job

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Cut mouldings	<p>2.1 Check and set cutting equipment safety controls and measurement stops</p> <p>2.2 Accurately measure and cut moulding, and check length for correct sizing.</p> <p>2.3 Inspect cut mouldings for compliance with quality and work order requirements and rectify any deficiencies</p> <p>2.4 Achieve required cut quality, output and wastage within allowable limits through correct operation of cutting equipment</p> <p>2.5 Identify and report problems with the cutting process to appropriate persons</p>
3. Complete work	<p>3.1 Mark completed work for identification and store in accordance with workplace procedures</p> <p>3.2 Identify and store scraps and off-cuts for recycling in accordance with workplace procedures</p> <p>3.3 Clean work area and safely dispose of rubbish</p> <p>3.4 Accurately complete required workplace documentation</p> <p>3.5 Check, clean and store tools and equipment in accordance with workplace procedures</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFPP2002 Cut mouldings to length.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFPF2009 Cut mouldings to length

## Modification History

Release 1. Supersedes and is equivalent to MSFPF2002 Cut mouldings to length.

## Performance Evidence

- There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:
- cut frame mouldings (with at least 1 moulding to be more than 90 mm wide) to meet specified work order requirements:
  - in each of the following materials:
    - synthetic (45 degrees)
    - timber (1 x multi-angle and 45 degrees)
  - using the following cutting tools safely to achieve quality cuts:
    - guillotines
    - saws.
    -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work flow process for cutting of frame mouldings
- safety considerations and requirements when cutting mouldings, including personal protective equipment
- types of information relevant to cutting of mouldings found in work orders and how to interpret this information:
  - type of moulding to be cut
  - pattern or plan to be followed
  - drawings
  - cutting lists
  - number of items to be cut and holding area for completed items
  - equipment settings for the materials that are being cut
  - required cutting fluids
- characteristics, uses and limitations of mouldings made from the following materials:
  - aluminium
  - synthetics
  - timber

- mathematical procedures for estimation, angles and measurement
- functions, features and safe use of cutting machines and devices, including specific workplace procedures and manufacturer specifications for:
  - guillotines
  - saws
- techniques for cutting frame mouldings, the types of problems that can occur and how to respond
- items for recycling and importance of using materials sustainably
- documentation requirements for identifying and recording work.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workspace equipped with:
    - cutting tools and equipment as specified in Performance Evidence
    - consumables
    - mouldings
    - personal protective equipment
  - work orders.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFPP2010 Join mouldings

### Modification History

Release 1. Supersedes and is equivalent to MSFPP2003 Join mouldings.

### Application

This unit describes the skills and knowledge required to join mouldings to form artwork frames. Frames may be for artworks, documents, textiles or three dimensional (3D) items.

This unit applies to picture framers and others completing work in accordance with pre-determined frame designs.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Competency Field

Picture framing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Read work order and identify joining requirements 1.2 Identify and follow work health safety requirements throughout the work 1.3 Obtain and check frame components against work instructions for size, number, pattern and finish profile 1.4 Identify and report shortages and defective items in accordance with workplace practice 1.5 Select fixing and joining devices in accordance with work

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>instructions and type of moulding to be joined</p> <p>1.6 Select and check tools and equipment for suitability, quality, serviceability and safety prior to use</p> <p>1.7 Plan the work sequence to suit the job</p>
2. Assemble frames	<p>2.1 Lay out components and join using selected equipment, fastenings and appropriate adhesives</p> <p>2.2 Check assembled frame for alignment, required pattern matching and correct fasteners and attachments</p> <p>2.3 Finish corners in accordance with workplace requirements</p> <p>2.4 Inspect completed frames for compliance with quality and work order requirements, and rectify any deficiencies</p> <p>2.5 Store joined frames in accordance with workplace requirements</p>
3. Complete work	<p>3.1 Mark completed work for identification and store in accordance with workplace procedures</p> <p>3.2 Identify and store items for recycling in accordance with workplace procedures</p> <p>3.3 Clean work area and safely dispose of rubbish</p> <p>3.4 Accurately complete required workplace documentation</p> <p>3.5 Check, clean and store tools and equipment in accordance with workplace procedures</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFPF2003 Join mouldings.

# Assessment Requirements for MSFPF2010 Join mouldings

## Modification History

Release 1. Supersedes and is equivalent to MSFPF2003 Join mouldings.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- assembled frames of each of the following types (at least one of them being a multi-angle frame) up to a width of 100mm:
  - synthetic
  - timber
  - aluminium
- with each frame type to include all of the following the following profiles:
  - flat
  - traditional
  - ornate
  - floater frame
  - reverse
- safely used the following techniques to achieve quality joins:
  - drill and nail
  - underpinning
  - screwing corner stakes (for aluminium).
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work flow process for frame assembly
- safety considerations and requirements for joining mouldings, including personal protective equipment
- types of information relevant to joining of mouldings found in work orders and how to interpret this information:
  - frame size
  - types of attachments
  - required materials and tools
  - quality requirements
- characteristics of the following moulding materials that impact frame assembly:

- synthetic
- timber
- aluminium
- mathematical procedures for estimation and measurement
- functions, features and safe use of tools and equipment used in the assembly process:
  - drill
  - nails
  - underpinners
- techniques for joining mouldings, the types of problems that can occur and how to respond
- items for recycling and importance of using materials sustainably
- documentation requirements for identifying and recording work.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workspace equipped with:
    - joining tools, equipment and consumables to complete tasks in the Performance Evidence
    - personal protective equipment
  - moulding components for assembly
  - work orders.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFPPF2011 Mount artwork

### Modification History

Release 1. Supersedes and is equivalent to MSFPPF2004 Mount artwork.

### Application

This unit describes the skills and knowledge required to mount artwork to substrates prior to framing. It includes dry and wet mounting, pressure rolling, laminating and hinging of artwork. Frames may be for artworks, documents, textiles or three dimensional (3D) items.

This unit applies to picture framers completing work according to a pre-determined frame design.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Picture Framing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Read work order and identify mounting requirements 1.2 Assess artwork to determine the most appropriate mounting process, including the composition of substrate and fixing materials 1.3 Identify and observe quality assurance requirements are identified and observed throughout the process in accordance with industry standards and workplace practices 1.4 Identify and follow work health and safety requirements

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	<p>throughout the work</p> <p>1.5 Select tools and equipment suited to the type of mounting and check for quality, serviceability and safety prior to use</p> <p>1.6 Accurately measure and cut materials to size, and assemble in accordance with industry standards and workplace procedures</p> <p>1.7 Position fixing agents in accordance with workplace procedures</p>
2. Mount artwork to substrate	<p>2.1 Set up mounting equipment in accordance with manufacturer instructions and workplace practices</p> <p>2.2 Position artwork in accordance with job requirements</p> <p>2.3 Prepare and apply required adhesives based on type and composition of artwork</p> <p>2.4 Operate mounting equipment safely and in accordance with manufacturer instructions</p> <p>2.5 Inspect mounted artwork for compliance with quality and work order requirements and rectify any deficiencies</p>
3. Complete work	<p>3.1 Mark completed work for identification and store in accordance with workplace procedures</p> <p>3.2 Identify and store items for recycling in accordance with workplace procedures</p> <p>3.3 Clean work area and safely dispose of rubbish</p> <p>3.4 Accurately complete required workplace documentation</p> <p>3.5 Check, clean and store tools and equipment in accordance with workplace procedures</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFPF2004 Mount artwork.

## Links

Companion Volume implementation guides are found in VETNet. -

# Assessment Requirements for MSFPF2011 Mount artwork

## Modification History

Release 1. Supersedes and is equivalent to MSFPF2004 Mount artwork.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- mounted artwork to specification using each of the following forms of mounting on at least 1 item:
  - wet
  - dry
  - laminating
  - pressure roller
  - hinging.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- characteristics, uses and limitations of the various methods of mounting artwork, and interactions between materials used in:
  - dry mounting paper-based artwork using heat press and cold press
  - wet mounting paper and canvas-based artwork using adhesives and vacuum press
  - laminating paper-based artwork using pressure roller or laminating equipment
  - hinging, prefabricated or custom made
- work flow process for different mounting processes
- safety considerations and requirements when mounting artwork, including personal protective equipment
- mathematical procedures for estimation and measurement
- functions, features and safe use of tools and equipment used for different types of mounting:
  - general tools:
    - cutting blades
    - measuring tapes and marking out tools
  - for dry mounting:
    - heat presses (hard and soft bed)
    - tacking iron
    - piercing tool

- overlay effect sheets
- silicone release paper
- Teflon and foam plastic blankets
- for wet mounting:
  - vacuum press
  - scrapers
  - glue/adhesive applicators (rollers and spray guns)
- for pressure mounting:
  - pressure rolling equipment
  - cold film
- for laminating:
  - cold roller laminator
  - laminating equipment
- for hinging:
  - straight edge
  - thin brush
  - weight bags
  - mixing vessel and swizzle
  - steam generator
  - microwave oven
- materials and consumables used for different types of mounting:
  - for dry and wet mounting
    - medium density fibreboard (MDF)
    - foam core
    - screen board
    - mat board
    - heat and pressure sensitive films and tissues
    - adhesives (ethyl vinyl adhesive (EVA), poly vinyl adhesive (PVA), heat and pressure sensitive tissues and films)
  - for laminating
    - plastic film
  - for hinging
    - hinging paper (mulberry paper and rice paper)
    - pre-made hinging tape
    - wheat starch
    - distilled water and methyl cellulose
- types of problems that can occur in mounting and how to respond:
  - lumps and bumps
  - adhesive migration
  - misalignment and use of incorrect adhesive

- quality and aesthetic requirements in mounting artwork
- the effect of the mounting process on the artwork
- documentation requirements for identifying and recording work.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workspace equipped with:
    - mounting tools, equipment and consumables for all required types of mounting as specified in the Performance Evidence
    - personal protective equipment
  - work orders
  - artwork for mounting.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFPF2012 Cut mat boards

### Modification History

Release 1. Supersedes and is equivalent to MSFPF2005 Cut mat boards

### Application

This unit describes the skills and knowledge required to cut simple mat boards by hand and machine for the mounting of artwork.

This unit applies to picture framers cutting mat board in accordance with pre-determined frame designs.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Picture Framing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for cutting	1.1 Read work order and identify cutting requirements 1.2 Identify and follow work health and safety requirements throughout the work 1.3 Select and check tools and equipment for suitability, quality, serviceability and safety prior to use 1.4 Select mat cutting machines and blades suited to the required cut and adjust for angled, circular or oval cuts 1.5 Set cutting equipment components, controls and clamping systems 1.6 Select, accurately measure and lay out board material in accordance with work requirements and to minimise waste

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.7 Plan the work sequence suited to the job
2. Conduct cutting operation	2.1 Place and clamp mat board on machine 2.2 Inspect cut board for compliance with quality and work order requirements and rectify any deficiencies 2.3 Achieve required cut quality, output and wastage within allowable limits through correct operation of cutting equipment 2.4 Identify and report problems occurring during work operations to appropriate persons 2.5 Make routine equipment adjustments to achieve required output
3. Complete work	3.1 Mark completed work for identification and store in accordance with workplace procedures 3.2 Identify and store items for recycling in accordance with workplace procedures 3.3 Clean work area and safely dispose of rubbish 3.4 Accurately complete required workplace documentation 3.5 Check, clean and store tools and equipment in accordance with workplace procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFPF2005 Cut mat boards.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFPP2012 Cut mat boards

## Modification History

Release 1. Supersedes and is equivalent to MSFPP2005 Cut mat boards.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- cut 4 ply mat boards, both single and double, by hand:
  - bevel cut
  - reverse cut
  - multi-window
- cut 8 ply mat boards by hand:
  - single-hole bevel cut
  - multi-hole bevel cut.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work flow process for cutting of mat boards
- safety considerations and requirements when cutting mat boards, including personal protective equipment
- characteristics, uses and limitations of mat board materials and finishes, including handling and storage requirements:
  - paper pulp
  - rag and/or cotton pulp
  - alpha cellulose pulp board
  - finishes – plain, metallic, suede
- mathematical procedures for estimation and measurement
- functions, features and safe use of both manual and computerised mat cutting machines
  - straight line
  - circle and/or oval
  - machines with interchangeable cutting heads
- functions, features and safe use of hand-operated tools:
  - cutting blades
  - clamps
  - marking out tools

- techniques for cutting mat boards, the types of problems that can occur and how to respond
- documentation requirements for identifying and recording work.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workspace equipped with:
    - manual cutting tools, equipment and consumables to complete tasks in the Performance Evidence
    - personal protective equipment
    - work orders
    - mat boards for cutting.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFPPF2013 Cut and handle glazing materials for framing

### Modification History

Release 1. Supersedes and is equivalent to MSFPPF2006 Cut and handle glazing materials for framing.

### Application

This unit describes the skills and knowledge required to cut and handle glazing materials, including acrylic sheet, for picture and mirror frames.

This unit applies to picture framers cutting glazing materials in accordance with pre-determined frame designs.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Picture Framing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Read work order and identify glazing requirements 1.2 Identify and follow work health safety requirements throughout the work 1.3 Select and check tools and equipment for quality, serviceability and safety prior to use 1.4 Locate required glazing material and check for imperfections and damage prior to handling 1.5 Handle glazing material in accordance with safety requirements and any labelling instructions

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.6 Select and clear work area of obstructions and potential hazards 1.7 Plan sequence of work to ensure cutting is conducted in a logical order
2. Cut glazing materials	2.1 Accurately measure glazing material to minimise waste and ensure specified tolerances in accordance with workplace standards 2.2 Achieve required product quality and output through correct operation and monitoring of glazing equipment and tools 2.3 Complete routine machine lubrication and adjustments in accordance with manufacturer instructions 2.4 Identify and report problems occurring during work operations to appropriate persons 2.5 Inspect completed work for compliance with quality and work order requirements and rectify any deficiencies
3. Complete work	3.1 Mark completed work for identification and store in accordance with workplace procedures 3.2 Identify and store items for recycling in accordance with workplace procedures 3.3 Clean work area and safely dispose of rubbish 3.4 Accurately complete required workplace documentation 3.5 Check, clean and store tools and equipment in accordance with workplace procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFPP2006 Cut and handle glazing materials for framing.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFPF2013 Cut and handle glazing materials for framing

## Modification History

Release 1. Supersedes and is equivalent to MSFPF2006 Cut and handle glazing materials for framing.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- set up, prepared for and cut glazing materials:
  - cut 3 pieces of glass of varying size to within 0.5 mm tolerance (including at least 1 piece of conservation grade glass)
  - cut 3 pieces of acrylic of varying size to within 0.5 mm tolerance
  - cut 2 pieces of oval glass of varying size to within 1.5 mm tolerance
- safely used the following tools and equipment:
  - saws
  - scoring tools
  - speed cutters
  - tungsten wheel glass cutters
  - wall-mounted glass cutters.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work flow process for the cutting of glazing materials
- safety considerations and requirements for handling and cutting glazing materials, including personal protective equipment
- potential variations in work order requirements for glazing in relation to glass:
  - type
  - thickness
  - colour
- qualities and characteristics of glazing materials, including the hazards and handling requirements for:
  - float glass
  - conservation and museum glass
  - specialty glass
  - anti-reflective and non-reflective glass

- sheet acrylic
- conservation acrylic
- mirrors
- mathematical procedures for estimation and measurement
- functions, features and safe use of cutting tools and equipment, including specific workplace procedures, manufacturer specifications and defect reporting procedures for:
  - flat felt-covered cutting tables
  - lubricants
  - marking pens or chinagraph pencils
  - saws
  - scoring tools
  - speed cutters
  - T-squares or L-squares
  - tape measures
  - templates
  - tungsten wheel glass cutters
  - wall-mounted glass cutters
- techniques for cutting glazing materials, the types of problems that can occur, and how to respond
- documentation requirements for identifying and recording work.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workspace equipped with:
    - cutting table, tools and equipment as specified in Performance Evidence
    - personal protective equipment
    - glazing materials
  - work orders.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFPPF2014 Assemble basic artwork packages

### Modification History

Release 1. Supersedes and is equivalent to MSFPPF2007 Assemble a basic artwork package.

### Application

This unit describes the skills and knowledge required to identify, gather and assemble all picture frame components.

This unit applies to picture framers and others completing work in accordance with pre-determined frame designs. Designs involve basic framing for two dimensional (2D), flat artworks requiring a simple, single frame.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Picture Framing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for assembly	1.1 Read work order and identify assembly requirements 1.2 Identify and follow work health and safety requirements throughout the work 1.3 Select a safe and suitable work areas to assemble package 1.4 Identify and obtain components, fittings and attachments required for the package 1.5 Select and check tools and equipment for quality, serviceability and safety prior to use 1.6 Plan the work sequence suited to the job

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Assemble components	2.1 Select and inspect package components for faults and repair or return in accordance with workplace procedures 2.2 Clean and lay out components in accordance with workplace procedures 2.3 Mount artwork using the specified method 2.4 Assemble frame components, adjust to fit and fix in place 2.5 Fit frame over package and fix backing in accordance with workplace procedures 2.6 Attach fittings, attachments and hanging aids in accordance with workplace procedures 2.7 Inspect package for quality, address defects or label and store in accordance with workplace procedures
3. Complete work	3.1 Mark completed work for identification and store in accordance with workplace procedures 3.2 Identify and store items for recycling in accordance with workplace procedures 3.3 Clean work area and safely dispose of rubbish 3.4 Accurately complete required workplace documentation 3.5 Check, clean and store tools and equipment in accordance with workplace procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFPF2007 Assemble a basic artwork package.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFPF2014 Assemble basic artwork packages

## Modification History

Release 1. Supersedes and is equivalent to MSFPF2007 Assemble a basic artwork package.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- assembled 3 artwork packages to the required job specification, with at least 1 to be a matted artwork.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work flow process for the assembly of artwork packages
- safety considerations and requirements when assembling artworks, including personal protective equipment
- features and functions of the components of an artwork package and how they are assembled and/or constructed:
  - artwork
  - backing
  - fittings and attachments (including hanging attachments)
  - frame
  - glass and/or acrylic
  - mat board
  - mount
- mathematical procedures for estimation and measurement
- functions, features and safe use of tools and equipment used to assemble artwork packages:
  - air blower
  - screwdrivers
  - staple guns
  - staple lifter
- features, uses and limitations of materials used to assemble artwork packages:
  - adhesives
  - cardboard
  - cleaning agents

- composites
- laminates
- metal/alloys
- nails
- paper
- tacks
- tapes
- timber
- techniques for assembling artwork packages, the types of problems that can occur and how to respond
- documentation requirements for identifying and recording work.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workspace equipped with:
    - assembly tools, equipment and consumables to complete tasks in the Performance Evidence
    - personal protective equipment
  - work orders
  - components of artwork packages for assembly.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFPPF2015 Repair framing material finishes

### Modification History

Release 1. Supersedes and is equivalent to MSFPPF2008 Recognise and repair finishes of framing materials.

### Application

This unit describes the skills and knowledge required to prepare and use materials and equipment to repair damaged framing materials.

This unit applies to picture framers and others completing work in accordance with a pre-determined work orders.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Picture Framing

### Elements and Performance Criteria

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.	
1	Prepare for work	1.1	Read work order and identify repair requirements
		1.2	Inspect frame composition and finish of frame, determine the feasibility of effecting the repair and advise the relevant person
		1.3	Identify and follow work health and safety requirements throughout the work
		1.4	Plan the work sequence suited to the job
		1.5	Select and check tools and equipment for quality, serviceability and safety prior to use

2	Repair framing materials	2.1	Measure, mix and use fillers and abrasive agents safely and effectively to remove or fill holes and other blemishes in materials
		2.2	Repair other defects in accordance with workplace procedures
		2.3	Match colours to suit existing finish of materials
		2.4	Apply finishes to materials in accordance with workplace procedures
		2.5	Problems occurring during repairs are identified and reported to appropriate persons
		2.6	Inspect repaired material to ensure best possible match to existing finish and store, return for further repair or scrap in accordance with workplace procedures
3	Complete work	3.1	Mark completed work for identification and store in accordance with workplace procedures
		3.2	Identify and store items for recycling in accordance with workplace procedures
		3.3	Clean work area and safely dispose of rubbish
		3.4	Accurately complete required workplace documentation
		3.5	Check, clean and store tools and equipment in accordance with workplace procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFPF2008 Recognise and repair finishes of framing materials.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFPF2015 Repair framing material finishes

## Modification History

Release 1. Supersedes and is equivalent to MSFPF2008 Recognise and repair finishes of framing materials.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- repaired 5 different damaged items of picture framing materials.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work flow process for repair of framing material finishes
- safety considerations and requirements for repairing finishes to framing materials
- types, characteristics, uses and limitations of different framing materials:
  - mouldings of various materials
  - mat boards
  - perspex
  - glass
- types of defects in the finish of framing materials and their method of repair for:
  - nail and/or pin holes
  - splits and cracks
  - worn finishes and dents and bruises
- mathematical procedures for estimation, measurement and use of ratios for mixing
- functions, features and safe use of repair tools and equipment
- types of finishes to framing materials and how to colour matching and repair:
  - painted surfaces
  - schalag metal
  - gesso
  - shellac and stained finish
- documentation requirements for identifying and recording work.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workspace equipped with framing repair tools, equipment and consumables to complete tasks in the Performance Evidence
  - work orders
  - frames for repair.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFPPF3011 Decorate mat boards

### Modification History

Release 1. Supersedes and is equivalent to MSFPPF3002 Decorate mat boards.

### Application

This unit describes the skills and knowledge required to decorate mat boards by hand and machine, including use of specialty cutting, line inking, colour washing and marble papers.

This unit applies to picture framers decorating boards in accordance with pre-determined frame designs. They use discretion, judgement and specialised knowledge to select and use different techniques and materials.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Picture Framing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Read work order and identify decorative requirements 1.2 Identify and follow work health and safety requirements throughout the work 1.3 Select and check tools and equipment for quality, serviceability and safety prior to use 1.4 Select mat cutting machines that meet requirements for specialty decorative cutting 1.5 Select decorative inks, paints and application equipment to match work order

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.6 Select and prepare a safe and suitable work area 1.7 Select and lay out board material in accordance with work requirements and to minimise waste 1.8 Plan the work sequence suited to the job
2. Create decoration	2.1 Decorate the mat board through correct use of machine capabilities to maximise the presentation of the artwork 2.2 Use decoration hand tools to achieve desired effects 2.3 Inspect decoration for compliance with quality and work order requirements and rectify any deficiencies
3. Complete work	3.1 Mark completed work for identification and store in accordance with workplace procedures 3.2 Identify and store items for recycling in accordance with workplace procedures 3.3 Clean work area and safely dispose of rubbish 3.4 Accurately complete required workplace documentation 3.5 Check, clean and store tools and equipment in accordance with workplace procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFPF3002 Decorate mat boards.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=0601ab95-583a-4e93-b2d4-cfb27b03ed73>

# Assessment Requirements for MSFPF3011 Decorate mat boards

## Modification History

Release 1. Supersedes and is equivalent to MSFPF3002 Decorate mat boards.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed the following decoration on any size mat boards:
  - cut V groove
  - cut mat with decorative corners
  - applied wash panels and/or lines
  - applied decorative transfers
- used hand techniques and machines to achieve decorative effects.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work flow process for decoration of mat boards
- safety considerations and requirements when cutting mat boards, including personal protective equipment
- characteristics, uses and limitations of different types of mat boards, including handling and storage requirements
- mathematical procedures for estimation and measurement
- functions, features and safe use of tools and equipment, including:
  - hand-operated tools:
    - cutting blades
    - hand cutters
    - marking out tools
    - application equipment (pens and brushes)
  - manual and computerised mat cutters
  - lettering and line drawing guides
  - colouring applications
- mat board decorating techniques, including use of different inks and paints, the types of problems that can occur and how to respond
- documentation requirements for identifying and recording work.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workspace equipped with:
    - mat cutting tools, equipment and consumables to complete tasks in the Performance Evidence
    - inks, paints and application equipment
    - personal protective equipment
  - mat boards for decoration
  - work orders.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFPPF3013 Prepare textiles for framing

## Modification History

Release 1. Supersedes and is equivalent to MSFPPF3004 Prepare textiles for framing.

## Application

This unit describes the skills and knowledge required to prepare and mount textiles for framing, including lacing, couching, blocking, stretching and straining of textiles and stitching to backing of textiles.

This unit applies to picture framers completing work in accordance with pre-determined frame designs. They use discretion, judgement and specialised knowledge to select and adapt different techniques and materials.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Picture Framing

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Read work order, identify proposed mounting requirements and confirm workplace capability 1.2 Identify and follow work health and safety requirements throughout the work 1.3 Analyse textile and its compatibility with the mounting process, including the type of mounting and the composition of the substrate material 1.4 Select tools and equipment suited to the type of mounting and check for quality, serviceability and safety prior to use

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.5 Identify and select required materials in the appropriate size quantity
2. Manipulate textiles	2.1 Prepare materials in accordance with the type of mounting 2.2 Place textile into position using the selected method 2.3 Manipulate textile to ensure the item is free of creases and overstretching marks and shows correct proportioning of images 2.4 Inspect textile for compliance with quality and work order requirements and rectify any deficiencies using techniques suited to the mounting method
3. Complete work	3.1 Mark completed work for identification and store in accordance with workplace procedures 3.2 Identify and store items for recycling in accordance with workplace procedures 3.3 Clean work area and safely dispose of rubbish 3.4 Accurately complete required workplace documentation 3.5 Check, clean and store tools and equipment in accordance with workplace procedures

## Foundation Skills

Supersedes and is equivalent to MSFPP008 Prepare textiles for framing.

## Unit Mapping Information

Supersedes and is equivalent to MSFPP3004 Prepare textiles for framing

## Links

# Assessment Requirements for MSFPF3013 Prepare textiles for framing

## Modification History

Release 1. Supersedes and is equivalent to MSFPF3004 Prepare textiles for framing

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- prepared textiles for framing that include canvas works, needle art and clothing items:
  - using each of the following preparation techniques on at least one textile:
    - lacing
    - couching
    - stretching and/or straining
    - stitching
    - blocking.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work flow process in relation to preparing textiles for framing
- safety considerations and requirements when preparing textiles, including personal protective equipment
- types of textiles presented for framing and their features:
  - painted canvas
  - weavings
  - tapestries
  - cross-stitch
  - applique
  - silk work
  - clothing items
- type, characteristics, uses and limitations of the various methods of preparing textiles for framing, and the materials used for:
  - lacing
  - couching
  - stretching and/or straining
  - stitching
  - blocking

- mathematical procedures for estimation and measurement
- functions, features and safe use of tools and equipment used to prepare textiles for framing:
  - needles
  - stretching pliers
  - stapler
- techniques for preparing textiles, the types of problems that can occur and how to respond
- quality and aesthetic requirements in preparing textiles for framing
- the potential impacts of mounting on textiles and how to avoid damage
- documentation requirements for identifying and recording.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workspace equipped with:
    - tools, equipment and consumables for all required types of textile preparation as specified in the Performance Evidence
    - personal protective equipment
  - work orders
  - textiles for framing.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFPP3014 Assess and prepare framing design requirements

## Modification History

Release 1. Supersedes and is not equivalent to MSFPP3005 Recognise and handle artwork for framing, and, MSFPP3006 Prepare design requirements for framing.

## Application

This unit describes the skills and knowledge required to assess design requirements from both a conservation and aesthetic perspective, and develop a frame design that maintains and enhances the historic, sentimental or monetary value of the item to be framed.

This unit applies to picture framers who prepare designs for a wide range of framed items in different media. They apply discretion and judgment when selecting framing options for different artworks.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

## Unit Sector

Picture Framing

## Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for design assessment	1.1 Clear and prepare work area for inspection of artwork in accordance with workplace standards 1.2 Receive and handle artwork in accordance with industry recognised handling methods and workplace procedures 1.3 Obtain initial information about historic, monetary or sentimental value from the customer 1.4 Seek information from customer in relation to expectations and parameters of framing

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Assess restoration and conservation requirements	<p>2.1 Establish the period and quality of artwork, and its historic or monetary value through examination</p> <p>2.2 Identify and document artwork composition and production techniques and associated restoration or conservation requirements</p> <p>2.3 Determine limitations and options for mounting and framing</p> <p>2.4 Identify the need for any specialised expertise in assessing, restoring or framing the artwork</p>
3. Assess aesthetic requirements	<p>3.1 Assess artwork against the elements and principles of design and their impact on framing selection</p> <p>3.2 Seek and use information about customer preferences and where the item will be placed for any impact on design requirements</p>
4. Develop frame design	<p>4.1 Confirm compatibility of framing materials from manufacturer and industry information</p> <p>4.2 Select framing materials that complement artwork based on the elements and principles of design and conservation needs</p> <p>4.3 Present design options to the customer and make informed recommendations base on customer and artwork needs</p>
5. Confirm final design	<p>5.1 Agree and accurately document customer requirements for final design on a work order in accordance with workplace practice</p> <p>5.2 Determine costing from pricing schedule, advise customer, and include accurate cost details on work order</p> <p>5.3 Provide invoice that includes advice on terms and conditions for framing and obtain written customer approval</p> <p>5.4 Store artwork ready for framing to prevent loss or damage in accordance with workplace procedures</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFPP3014 Assess and prepare framing design requirements

## Modification History

Release 1. Supersedes and is not equivalent to MSFPP3005 Recognise and handle artwork for framing, and, MSFPP3006 Prepare design requirements for framing.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- prepared design requirements, work orders and condition reports for framing designs for all of the following:
  - an object
  - a textile
  - a work on paper
  - a canvas
  - an item that requires conservation framing.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- major categories of art media and items typically presented for framing
- current and emerging trends in framing design
- influences on frame design:
  - frame package design to suit required level of conservation
  - framing style to match image quality and aesthetic value
  - customer preferences and home decor
  - mouldings, fittings and attachments to suit framing and hanging requirements
- handling requirements when inspecting items presented for framing
- conservation considerations when assessing items presented for framing:
  - monetary or sentimental value of the item
  - customers preferences
  - factors and characteristics that contribute to the need for specialist expertise
- restoration and/or preservation techniques for artwork and frames
- factors that can cause damage to artworks and how to reduce risk
  - light
  - temperature

- humidity
- physical damage
- insects
- pollution
- elements and principles of design, their interrelationships and how these impact on framing design
  - elements:
    - line
    - direction
    - shape
    - size
    - texture
    - value
    - colour
  - principles:
    - repetition
    - alteration
    - harmony
    - graduation
    - contrast (or opposition or conflict)
    - dominance
    - unity
    - balance
- framing materials and their suitability for different items:
  - acrylic and glass
  - backing materials
  - composite construction and other framing material, such as paper/cardboard/fabric mat board
  - metal and/or alloy extrusion
  - timber
- mounting methods and their suitability for different items:
  - hinging
  - supports
  - lacing
  - stretching and direct mounting
- available products, their suitability for different 'levels' of framing (decoration, conservation, museum) and impacts on artwork
  - backing
  - mat board
  - glazing

- hinging
- legal and ethical liabilities and obligations for framing
- documentation requirements for presenting framing designs
- mathematical procedures for estimation, measurement, and calculations of costs
- pricing processes and systems used in picture framing businesses.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workspace equipped with:
    - a layout table
    - frame component samples and manufacturer information, including mouldings and mat boards
    - colour wheel
  - items requiring framing design.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFPPF3015 Apply frame finishes

### Modification History

Release 1. Supersedes and is equivalent to MSFPPF3007 Apply frame finishes.

### Application

This unit describes the skills and knowledge required to covers applying surface coatings to picture frames. Frames may be for artworks, documents, textiles or three dimensional (3D) items.

This unit applies to picture framers completing work in accordance with pre-determined frame designs. They use discretion, judgement and specialised knowledge to use and adapt techniques and finishing materials.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Picture Framing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for work	1.1 Read work order and identify job requirements 1.2 Identify and follow work health and safety requirements throughout the work 1.3 Select and check tools, equipment and materials for quality, serviceability and safety prior to use 1.4 Prepare an appropriately ventilated area for use 1.5 Plan the work sequence based on processing and application techniques, time and safety requirements

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Apply surface finishes	2.1 Check frame surfaces for contamination and faults prior to finish application 2.2 Repair or report faults in accordance with workplace procedures 2.3 Test colour matches and trial applications of finish to check equipment operation and required materials consistency 2.4 Apply complete surface finish in accordance job instructions and workplace procedures 2.5 Check surface finish against job requirements and rectify any faults to achieve required result
3. Complete work	3.1 Mark completed work for identification and store in accordance with workplace procedures 3.2 Identify and store items for recycling in accordance with workplace procedures 3.3 Clean work area and safely dispose of rubbish 3.4 Accurately complete required workplace documentation

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFPP3007 Apply frame finishes.

## Links

# Assessment Requirements for MSFPF3015 Apply frame finishes

## Modification History

Release 1. Supersedes and is equivalent to MSFPF3007 Apply frame finishes.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- applied the following finishing techniques to frames:
  - hand staining
  - hand finishing
  - washed finishing
  - mechanical finishing
  - faux finishing.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work flow process for frame finishing, including spraying operations
- safety considerations and requirements for frame finishing, including personal protective equipment
- types and features of different picture frames to which finishes may be applied:
  - timber
  - metal and/or alloy
  - synthetic material
- mathematical procedures for estimation, measurement and use of ratios for mixing
- types and features of different natural and synthetic picture frame finishes including safety requirements for use of:
  - faux
  - foil
  - lacquer
  - oil
  - paint
  - polishes
  - powder
  - stain
  - varnishes
  - wax

- acrylics
- enamels
- polyurethane
- finishing techniques, how they are achieved and typical application problems:
  - hand staining
  - hand finishing
  - washed finishing
  - mechanical finishing
  - faux finishing
- features, functions and safe use of tools and equipment used in frame finishing:
  - air spray gun
  - airless spray gun
  - air compressor and hoses
  - paint and brushes
  - finish containers
  - scrapers
  - spray booth
  - fume extraction/ventilation system
- materials used in frame finishing for:
  - cleaning – cutting compounds, methylated spirits, rags
  - surface preparation – abrasive papers, steel wool, sandpaper, rubbers
  - surface repair – fillers
- documentation requirements for identifying and recording work.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workspace equipped with:
    - tools, equipment and consumables to complete frame finishing tasks in the Performance Evidence
    - personal protective equipment
    - finishing materials
  - work orders
  - frames to be finished.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSFPP3016 Assemble complex artwork packages

## Modification History

Release 1. Supersedes and is equivalent to MSFPP3008 Assemble a complex artwork package.

## Application

This unit describes the skills and knowledge required to identify, gather and assemble all picture frame components required to complete complex, custom framing of artwork that includes three dimensional (3D) items, use of mat boards, spacers and fillets and items requiring conservation framing or specialist handling.

This unit applies to picture framers completing work in accordance with pre-determined frame designs. They use discretion, judgement and specialised knowledge to select and adapt different techniques.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

N/A

# Assessment Requirements for MSFPF3016 Assemble complex artwork packages

## Modification History

Release 1. Supersedes and is equivalent to MSFPF3008 Assemble a complex artwork package.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- assembled each of the following to the required job specification:
  - a matted artwork with fillet
  - a multi-frame item of artwork
  - a memorabilia box frame at least 50 mm deep
  - a textile
  - a full conservation framed artwork.
  -

## Knowledge Evidence

- There must be evidence the candidate has knowledge of:
- work flow process for assembly of complex artwork packages
- features and functions of the components of complex artwork packages and how they are assembled:
  - artwork
  - backing
  - fittings and attachments (including hanging attachments)
  - frame
  - glass and/or acrylic
  - mat board
  - mount
- functions, features and safe use of tools and equipment used to assemble artwork packages:
  - clamps
  - cutting blades
  - drills
  - flexi-point gun
  - hammers

- marking out tools
- screwdrivers
- staplers
- tacker
- materials, and how they are used to assemble artwork packages:
  - adhesives
  - cardboard
  - cleaning agents
  - composites
  - laminates
  - metal/alloy
  - nails
  - paper
  - tacks
  - tapes
  - timber
- techniques for assembling artwork packages, the types of problems that can occur and how to respond
  - scope of liabilities and obligations relating to framing artwork
  - conservation techniques for artwork and frames
  - potential impacts of the assembly process on the artwork and techniques to avoid damage.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workspace equipped with:
    - assembly tools, equipment and consumables to complete tasks in the Performance Evidence
    - personal protective equipment
  - work orders
  - components of artwork packages for assembly.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSFPPF3017 Install artwork

### Modification History

Release 1. Supersedes and is equivalent to MSFPPF3009 Install artwork.

### Application

This unit describes the skills and knowledge required to install framed artwork in domestic or commercial situations, positioned singly or grouped in conjunction with other pieces of artwork, or in an adjustable gallery system. It includes the requirement to install heavy items as part of a team.

This unit applies to any individual installing artwork. Individuals use discretion, judgement and specialised knowledge to determine hanging constraints and select appropriate tools and equipment.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

N/A

### Unit Sector

Picture Framing

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm installation requirements	1.1 Read work order and identify installation requirements 1.2 Identify and follow work health and safety requirements throughout the work 1.3 Weigh and view artwork to be installed to determine design characteristics and physical dimensions and shape 1.4 Develop and action an installation plan suited to the scope of the job and gain approvals from customer and relevant authorities

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Prepare for installation	<p>2.1 Specifications and/or plans are read and interpreted</p> <p>2.2 Identify and order attachments, fittings, hanging/fixing devices and display features</p> <p>2.3 Select and check tools and equipment for quality, serviceability and safety prior to use</p> <p>2.4 Prepare artwork to be installed for safe and secure transit to worksite</p> <p>2.5 Plan the installation sequence suited to the job and identify the need for team installation</p>
3. Hang artwork	<p>3.1 Identify and follow safe manual handling requirements</p> <p>3.2 Follow agreed installation plan and task sequence</p> <p>3.3 Take accurate measurements to ensure correct placement of artwork</p> <p>3.4 Install attachments, fittings, hanging and/or fixing devices and display features in accordance with identified requirements and constraints</p> <p>3.5 Position artwork in accordance with work requirement</p> <p>3.6 Check completed installation for security and against required specifications</p>
4. Finalise installation	<p>4.1 Obtain and customer approval for installation in accordance with workplace procedures</p> <p>4.2 Clean work area and safely dispose of rubbish</p> <p>4.3 Accurately complete other required workplace documentation</p> <p>4.4 Clean, store and recycle tools, equipment and unused materials in accordance with workplace procedures</p>

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Supersedes and is equivalent to MSFPP3009 Install artwork.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSFPF3017 Install artwork

## Modification History

Release 1. Supersedes and is equivalent to MSFPF3009 Install artwork.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- installed 3 items of artwork, of which one must weigh more than 16kg and be installed as a member of a team
- installed 1 item on each of the following types of walls:
  - brick
  - plaster sheet
  - lath and plaster
- installed 1 grouped set of artworks.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- work flow process for the installation of artwork
- safety considerations and requirements when installing artwork, including manual handling techniques
- types and features of framed artwork and the composition and characteristics of frames
- composition, different load bearing ability and methods of construction of walls and ceilings
- functions, features and safe use of tools and equipment used for artwork installation:
  - caulking gun
  - hammer
  - ladders
  - pliers
  - plumb bob
  - power drill and fittings
  - screwdrivers
  - spirit level
  - square
  - tape measure
  - work platform/trestles

- functions, features and safe use of fixing devices and materials
  - attachments
  - fittings
  - hanging and/or fixing devices and display features
  - nails
  - tacks
  - screws
  - staples
  - filler
  - adhesive tapes
- design factors that influence the placement of artwork in relation to furniture, room design and existing artwork
- potential impacts of the installation process on artwork, and how to avoid damage
- legal liability when installing artwork
- documentation requirements for completing on-site installations.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - locations / walls for installation
  - installation tools, equipment and materials to complete tasks in the Performance Evidence
  - work orders
  - framed artwork and attachments, fittings and hanging and/or fixing devices as specified in performance evidence.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSMENV272 Participate in environmentally sustainable work practices

## Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAENV272B Participate in environmentally sustainable work practices.

## Application

This unit describes the skills and knowledge required to comply with environmental regulations, identify environment issues and minimise the risks of negative impact on work and carry out improvements in own work area.

This unit applies to operators and team members who are required to follow procedures to work in an environmentally sustainable manner.

This unit applies to all sectors of the manufacturing industry and members of its value chain. It may also be applied to all sections of an organisation, including office and warehouse. This unit will need to be contextualised for the industry sector, organisation and section.

This unit applies to an individual working alone or as part of a team and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

## Pre-requisite Unit

# Assessment Requirements for MSMENV272 Participate in environmentally sustainable work practices

## Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAENV272B Participate in environmentally sustainable work practices.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- followed environmental policies and identified potential breaches of environmental regulations and suggested improvements within the limit of own authority.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- environmental sustainability issues relevant to organisation
- resource use and impact of inefficiencies associated with own work role
- environmental and resource efficiency policies and procedures for own work role
- environmental regulations and guidelines and their impact on own work role
- the environmental issues, hazards and risks associated with own work role
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - environmental regulations, guidelines and procedures
  - workplace incident reporting procedures and forms.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# **MSMENV472 Implement and monitor environmentally sustainable work practices**

## **Modification History**

Release 1. Supersedes and is equivalent to MSAENV472B Implement and monitor environmentally sustainable work practices

## **Application**

This unit of competency covers the skills and knowledge required to effectively analyse the workplace in relation to environmentally sustainable work practices, and to implement improvements and monitor their effectiveness.

This unit of competency applies to those who have responsibility for a specific area of work or who lead a work group or team. It addresses the knowledge, processes and techniques necessary to implement and monitor environmentally sustainable work practices, including the development of processes and tools.

It includes identifying areas for improvement, developing plans to make improvements, and implementing and monitoring improvements in environmental performance.

This unit of competency applies to all sectors of the manufacturing industry and members of its value chain. It may also be applied to all sections of an organisation, including office and warehouse. This unit will need to be appropriately contextualised as it is applied across an organisation and across different industry sectors.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## **Pre-requisite Unit**

Nil

## Competency Field

HSE

## Unit Sector

## Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

<b>1 Investigate current practices in relation to resource usage</b>	1.1	Identify environmental regulations applying to the enterprise
	1.2	Assess procedures for assessing compliance with environmental regulations
	1.3	Collect information on environmental and resource efficiency systems and procedures and provide to the work group, as required
	1.4	Measure and record current resource usage by members of the work group
	1.5	Analyse and record current purchasing strategies
	1.6	Analyse current work processes to access information and data, and assist in identifying areas for improvement
<b>2 Set targets for improvements</b>	2.1	Seek input from stakeholders, key personnel and specialists
	2.2	Access external sources of information and data as required
	2.3	Evaluate alternative solutions to workplace environmental issues
	2.4	Set efficiency targets
<b>3 Implement performance</b>	3.1	Source and use techniques/tools to assist in achieving targets

- |                               |     |  |
|-------------------------------|-----|--|
| <b>improvement strategies</b> | 3.2 | Apply continuous improvement strategies to own work area of responsibility, and communicate ideas and possible solutions to the work group and management  |
|                               | 3.3 | Integrate environmental and resource efficiency improvement plans for own work group with other operational activities and implement them  |
|                               | 3.4 | Seek suggestions and ideas about environmental and resource efficiency management from stakeholders and act upon them where appropriate  |
|                               | 3.5 | Implement costing strategies to fully value environmental assets   |
| <b>4 Monitor performance</b>  | 4.1 | Document outcomes and communicate reports on targets to key personnel and stakeholders   |
|                               | 4.2 | Evaluate strategies and environmental performance, including breaches or potential breaches of regulations and occurrences outside of standard procedure which may lead to lower environmental performance |
|                               | 4.3 | Set new targets and investigate and apply new tools and strategies   |
|                               | 4.4 | Promote successful strategies and reward participants where possible   |

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

## **Regulatory framework**

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements
- *ISO 14001:2015 Environmental management systems*

## **Procedures**

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

## **Unit Mapping Information**

### **Links**

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027>

# Assessment Requirements for MSMENV472 Implement and monitor environmentally sustainable work practices

## Modification History

Release 1. Supersedes and is equivalent to MSAENV472B Implement and monitor environmentally sustainable work practices

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- investigate/analyse resource usage
- evaluate improvement alternatives and set targets
- implement improvements within the limit of own authority
- monitor the performance of improvements.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- relevant environmental and resource efficiency issues, specific to industry practices, including:
  - contribution to climate change and other macro threats that can arise from materials and work processes used
  - regulated environmental issues
  - issues relevant to licencing conditions
- best practice environmental approaches relevant to own area of responsibility
- methods for measuring and calculating resource usage.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations
  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - will typically include the use of appropriate tools, equipment and documents

- may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

## **MSMENV672 Develop workplace policy and procedures for environmental sustainability**

### **Modification History**

Release 1. Supersedes and is equivalent to MSAENV672B Develop workplace policy and procedures for environmental sustainability

### **Application**

This unit of competency covers the skills and knowledge required to develop and implement a workplace sustainability policy, including the modification of the policy to suit changed circumstances.

This unit of competency applies to team leaders/supervisors/managers who are required to develop approaches to environmental sustainability within workplaces, including the development and implementation of policy.

It includes communicating with relevant stakeholders, developing and monitoring sustainability policies and reviewing and improving sustainability policies.

This unit of competency applies to all sectors of the manufacturing industry. It may also be applied to all sections of an organisation, including the office and warehouse. This unit will need to be appropriately contextualised as it is applied across an organisation and across different industry sectors.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of

### **Pre-requisite Unit**

Nil

### **Competency Field**

HSE

## Unit Sector

### Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Develop workplace sustainability policy	1.1	Define the scope of sustainability policy
		1.2	Identify and consult with stakeholders during the policy development process
		1.3	Review the environmental sustainability strategies relevant to all stages of work covered by the policy
		1.4	Make recommendations for policy options based on likely effectiveness, timeframes and cost
		1.5	Develop policy that reflects the organisation's commitment to sustainability as an integral part of the business planning, and as a business opportunity
		1.6	Agree upon appropriate methods of implementation
2	Communicate the policy	2.1	Promote the policy, including its expected outcome to key stakeholders
		2.2	Inform those involved in implementing the policy as to outcomes expected, activities to be undertaken and responsibilities assigned
3	Implement the policy	3.1	Develop and communicate procedures to help implement the policy
		3.2	Employ strategies for implementation of policy in resource efficiency
		3.3	Establish recording systems for tracking changes in sustainability approaches and assign responsibilities
4	Review policy	4.1	Record outcomes and provide feedback to key personnel

implementation

and stakeholders

- 4.2 Investigate success or otherwise of policy
- 4.3 Monitor records to identify trends that may require remedial action to implemented policy and procedures
- 4.4 Modify policy and or procedures as required to ensure improvements are made

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

### **Regulatory framework**

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements
- *ISO 14001:2015 Environmental management systems*

### **Procedures**

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- work instructions
- standard operating procedures (SOPs)

- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAENV672B Develop workplace policy and procedures for environmental sustainability

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027>

# Assessment Requirements for MSMENV672 Develop workplace policy and procedures for environmental sustainability

## Modification History

Release 1. Supersedes and is equivalent to MSAENV672B Develop workplace policy and procedures for environmental sustainability

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- scope and develop an integrated sustainability policy and procedure within an enterprise
- raise awareness among stakeholders and those involved in implementing the policy of expected outcomes
- develop a workable implementation strategy
- ensure policy implementation is monitored, reviewed and modified where

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- relevant policy development and implementation processes and practices
- principles, practices and available tools and techniques of sustainability management relevant to the particular industry context.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

## MSMOPS101 Make measurements

### Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMOPS101A Make measurements

### Application

This unit describes the skills and knowledge required to use physical and/or chemical measuring equipment to make or take routine measurements and keep records related to the measurements.

This unit applies to an individual working alone or as part of a team and working in liaison with other shift team members and the control room operator, as appropriate.

This unit applies to all routine measurements within manufacturing and similar environments.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

### Pre-requisite Unit

Nil

### Unit Sector

Operations

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify appropriate measurements	1.1 Select appropriate measuring equipment 1.2 Identify units of measurement to be used and the detail required 1.3 Check measuring equipment is in calibration
2. Perform and record	2.1 Identify and take account of relevant external factors

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
measurements	2.2 Perform measurements using appropriate techniques 2.3 Compare measurements against the range of expected results 2.4 Self-check numerical information for accuracy and correctness 2.5 Record the result accurately in the appropriate format and level of detail
3. Respond to routine problems in accordance with procedures	3.1 Identify known problems that occur during the measurement 3.2 Identify and act on causes of routine problems 3.3 Log problems 3.4 Identify non-routine problems and report to appropriate personnel

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Release 2. Supersedes and is equivalent to MSAPMOPS101A Make measurements.

## Links

# Assessment Requirements for MSMOPS101 Make measurements

## Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMOPS101A Make measurements.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- performed and recorded at least 1 of the following workplace measurements:
  - extent
  - dimension
  - quantity
  - mass
  - capacity
  - capability
- responded to routine and non-routine measuring problems in accordance with organisation procedures
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- basic units of measurement, including
  - kilogram
  - metre
  - second
- types of measuring devices, including how, when and why they are used
- purpose of equipment calibration and methods of checking equipment is within calibration
- routine problems that may arise in the work environment and corrective action and reporting procedures appropriate to the problem cause.
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - measuring devices and equipment
  - calibration procedures

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSMOPS363 Organise on-site work

## Modification History

Release 1. Supersedes and is equivalent to MSAPMOPS363A Organise on site work

## Application

This unit of competency covers the skills and knowledge required to organise and prepare for on-site work in a field situation, such as a remote mine site or large industrial complex where extensive permit or clearance systems exist.

The operator will be required to plan the work, ensure permits and other arrangements are in place to allow the on-site work to proceed safely, and set-up the tools, equipment and materials at the site.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Operations

## Unit Sector

## Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Plan the work	1.1	Review the requirements of the work
---	---------------	-----	-------------------------------------

- 1.2 Arrange all necessary permits and permissions for site inspections and work
  - 1.3 Examine the site where the work will take place
  - 1.4 Identify plant and equipment isolations
  - 1.5 Identify hazards and risk controls
  - 1.6 Plan to minimise downtime, economically use materials and meet quality specifications
  - 1.7 Plan work, including sequences, times, process stages, engineering controls and personal protective equipment (PPE) requirements
  - 1.8 Prepare all necessary documentation and finalise the permissions and approvals for conducting the work
- 
- 2 Prepare equipment, tools and materials
    - 2.1 Identify equipment, tools and materials required
    - 2.2 Arrange for supply of all tools, equipment and materials
    - 2.3 Arrange for transport to site of all equipment, tools and materials
- 
- 3 Set up work location
    - 3.1 Assemble and check materials and tools for suitability for purpose
    - 3.2 Establish required communication with site personnel
    - 3.3 Establish a safe work area
    - 3.4 Establish isolations and tag/lock out as required
    - 3.5 Check tools, equipment and materials against site situation and conditions

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

### **Regulatory framework**

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

### **Procedures**

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- work permits
- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

### **Work requirements**

Work requirements are determined from one or more of the following:

- work orders
- specifications
- job descriptions
- designs

- other documents

**On-site work** On-site work is done in situ, not in a factory or workshop, and includes one or more of the following:

- conveyor belt splicing and repairs
- rubber lagging of conveyor drums
- rubber lining of tanks
- polymer piping systems installation or repairs
- polymer constructions (e.g. fume cupboards or signs)
- refractory lining
- concrete casting

**Isolations** Isolations include one or more of the following:

- power supply
- tag locations
- process materials
- energy sources and
- equipment isolation system

**Safe work area** Safe work area includes areas for one or more of the following:

- scaffolding
- lifting gear
- lay down area
- work area
- other equipment in appropriate locations

**Tools and equipment** Tools and equipment include one or more of the following:

- manual handling aids
- hand winches
- portable power generators and vulcanising equipment
- knives and other cutting instruments
- portable hoists/lifting equipment not requiring any special permits or licences
- spanners, wrenches and hammers
- power operated hand tools, such as drills, cutting disks and sanders
- specialised tools for the job
- relevant PPE

**Hazards**

Hazards include one or more of the following:

- manual handling hazards
- hand tools and handheld power tools (e.g. knife, cutting and grinding disk hazards)
- smoke, darkness and heat
- heat, smoke, dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- structural hazards
- structural collapse
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- limited head spaces or overhangs
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- fire and explosion
- flammability and explosivity
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

**Non-routine problems**

Routine problems must be resolved by applying known solutions.

Non-routine problems must be resolved by applying operational knowledge to develop new solutions, either individually or in collaboration with relevant experts, to:

- determine problems needing action
- determine possible fault causes
- develop solutions to problems which do not have a known solution
- follow through items initiated until final resolution has occurred
- report problems outside area of responsibility to designated person

Non-routine problems are unexpected problems, or variations of previous problems and include one or more of:

- lack of accessibility
- equipment isolations
- logistics of materials and equipment to work site
- variations in materials and/or contamination of materials

Operational knowledge includes one or more of:

- procedures
- training
- technical information such as journals, engineering specifications
- remembered experience
- relevant knowledge obtained from appropriate people

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMOPS363A Organise on site work

## Links

Companion Volume implementation guides are found in VETNet -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027>

# Assessment Requirements for MSMOPS363 Organise on-site work

## Modification History

Release 1. Supersedes and is equivalent to MSAPMOPS363A Organise on site work

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- identify job requirements and site conditions and plan the work
- sequence and schedule work tasks and stages to maximise efficiency and meet quality specifications
- select and arrange all equipment and materials for the site and set up tools, equipment and materials on site
- identify hazards and apply relevant hazard controls
- read and interpret work specifications, work orders, job sheets and material labels
- communicate effectively with team/work group and other personnel at the site
- apply operational knowledge to non-routine problems.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisational procedures, including:
  - work permit systems
  - safety, emergency and hazard control
  - relevant organisation standard operating procedures (SOPs)
- hazards that may arise in the job/work environment, including:
  - their possible causes
  - potential consequences
  - appropriate risk controls
- hierarchy of controls
- work flow sequences and materials demand
- factors and potential effects of variations in raw materials and equipment operation in relation to quality of product
- planning process, including breaking the work down into steps and stages
- products, materials and material characteristics.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
  - The collection of performance evidence:
    - should occur over a range of situations which include typical disruptions to normal, smooth operations
    - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
    - must include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems
    - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
  - Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
  - Assessment in a simulated environment should use evidence collected from one or more of:
    - walk-throughs
    - pilot plant operation
    - demonstration of skills
    - industry based case studies/scenarios
    - ‘what ifs’.
  - Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
  - Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
  - Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
  - The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
  - Foundation skills are integral to competent performance of the unit and should not be assessed separately.
  - As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

# MSMPCI101 Adapt to work in industry

## Modification History

Release 1. Supersedes and is equivalent to MSAPCI101A Adapt to work in industry

## Application

This unit covers the fundamental knowledge and skills needed to adapt to the workplace when taking up employment within the manufacturing industry. It includes following industry and workplace guidelines and procedures in a day-to-day work context, as well as appropriate work behaviour.

This unit applies to learners seeking practical skills that are relevant and useful to the area in which the learner hopes to gain employment, is currently working, and/or as a pathway to further study.

This unit applies to a learning and assessment environment where access to normal production operations is not available. Typically this will be a VET in Schools delivery environment but it may be another simulated or trial manufacturing environment where a high degree of supervision exists. Students may be on work placement.

The unit has application in qualifications for all occupations in the manufacturing industry and it should be regarded as an integrating unit. When delivered/assessed as part of a qualification, this unit must be customised to ensure its relevance to the real or simulated work activities and related workplaces.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Manufacturing pathways

## Unit Sector

### Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Manage own learning	1.1	Consider and articulate own personal goals or vision
		1.2	Identify opportunities for learning new ideas and techniques in relation to personal goals
		1.3	Recognise personal learning needs and skill gaps
		1.4	Identify opportunities for skills development activities in liaison with relevant personnel
		1.5	Access and apply learning tools and practices to the job
		1.6	Take advantage of on-the-job and off-the-job learning opportunities
2	Adapt to and demonstrate appropriate work practice	2.1	Identify and interpret work requirements with advice from appropriate persons
		2.2	Use appropriate dress and behaviour in the workplace
		2.3	Identify and balance work and personal priorities
		2.4	Apply time management strategies to work duties
		2.5	Tailor interactions with others to take into account different backgrounds, cultures and languages
3	Work within organisational requirements	3.1	Identify organisational requirements and key activities of the workplace
		3.2	Identify and apply relevant workplace policies and guidelines to work undertaken, including work health and safety (WHS) requirements
		3.3	Interpret the range of organisational values and cultural norms

- |   |  |     |   |
|---|--|-----|---|
|   |  | 3.4 | Discuss and clarify any uncertainties with key personnel  |
| 4 | Identify the sectors of the industry           | 4.1 | Identify the main sectors of the manufacturing industry, their key activities and the way in which they interrelate |
|   |  | 4.2 | Clarify the roles and responsibilities of the manufacturing industry  |
|   |  | 4.3 | Identify key industry representatives and their roles   |
|   |  | 4.4 | Identify current issues or events impacting on the industry   |
| 5 | Identify industry sector products and services | 5.1 | Identify the products provided by the industry sector   |
|   |  | 5.2 | Identify the services provided by the industry sector   |
|   |  | 5.3 | Identify appropriate standards of service across the industry sector  |
|   |  | 5.4 | Clarify quality standards for products and services as identified by the industry                                   |

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

### Skill gaps

Skills gaps relevant to work place requirements include one or more of the following:

- physical capacity skills

- workplace technology skills, such as business equipment, computer technology, machinery, hand tools, and security systems
- numeracy and literacy skills
- customer service skills
- communication skills, such as listening and understanding, speaking clearly/directly, reading and writing
- technical skills

**Skill development activities**

Skill development activities include one or more of the following:

- information technology (IT) courses
- human resources programs
- coaching and mentoring programs
- having the chance to learn a new task or to operate a new piece of equipment or workplace technology
- participating in external or internal training programs
- guided workplace experience

**Learning tools and practices**

Learning tools and practices include one or more of the following:

- note taking
- reviewing manuals and training guides
- discussion
- practice
- observation
- trial and error
- a combination of any of these

**On-the-job opportunities**

On-the-job opportunities include one or more of the following:

- filling in for a co-worker in a new area
- attending talks or seminars arranged by the workplace
- shadowing another co-worker in a different area
- receiving on-the-job training and supervised practice

**Off-the-job opportunities**

Off-the-job opportunities include one or more of the following:

- taking a course with a training provider
- attending conferences or seminars

- attending site visits with a supervisor
- participating in workplace social events
- participating in community events

**Appropriate dress and behaviour**

Appropriate dress and behaviour includes:

- personal dress and presentation
- demeanour and attitude displayed to customers and fellow employees

**Time management strategies**

Time management strategies include one or more of the following:

- being punctual
- goal setting
- balancing work and personal priorities or agendas
- prioritisation of required tasks or activities
- planning daily or weekly work
- overcoming procrastination
- dealing with interruptions (contingency planning)
- organising own work environment

**Organisational requirements**

Organisational requirements include:

- organisational policies and guidelines
- common organisational practices
- performance plans
- WHS policies, procedures and programs

**Workplace policies and guidelines**

Workplace policies and guidelines include, but are not limited to:

- attendance
- punctuality
- standards for health and fitness
- obeying orders
- confidentiality
- dress codes
- alcohol and drug restrictions
- personal safety and duty of care related to WHS
- terms and conditions of employment

<b>Organisational values</b>	Organisational values include one or more of the following: <ul style="list-style-type: none"><li>• innovation</li><li>• community responsibility</li><li>• environment responsibility</li></ul>
<b>Cultural norms</b>	Cultural norms include: <ul style="list-style-type: none"><li>• manners</li><li>• meanings specific to the language of the workplace</li><li>• history</li><li>• workplace etiquette</li></ul>
<b>Main sectors of the industry</b>	Main sectors of industry include: <ul style="list-style-type: none"><li>• textiles, clothing and footwear</li><li>• furniture</li><li>• chemical manufacturing</li><li>• plastics and rubber products manufacturing</li><li>• maintenance and engineering</li><li>• manufacture of glass or concrete products</li></ul>
<b>Roles and responsibilities of the industry</b>	The roles and responsibilities of the industry include: <ul style="list-style-type: none"><li>• providing quality products and services</li><li>• providing quality customer service</li><li>• providing proper training to those in the industry</li></ul>
<b>Key industry representatives</b>	Key industry representatives include: <ul style="list-style-type: none"><li>• industry associations</li><li>• enterprises</li><li>• unions</li><li>• legislative bodies</li></ul>
<b>Current issues or events include</b>	Current issues or events include: <ul style="list-style-type: none"><li>• economic</li><li>• environmental</li><li>• political</li></ul>

- technological
- supply and demand

**Industry products**

Industry products are the outcomes of manufacturing processes and include one or more of the following:

- clothing and footwear
- concrete and glass products
- tyres and plastic car components
- electronic components
- metal products

**Industry services**

Industry services include one or more of:

- customer support
- product advice
- health and diet advice
- delivery services
- consulting services
- warranties and/or guarantees

**Service standards**

Service standards include one or more of the following:

- developing and maintaining product and service knowledge
- identifying customer needs and expectations correctly
- meeting reasonable needs and request of customers within acceptable time frames
- taking opportunities to enhance the quality of products and services
- dealing with conflict situations
- responding to customer complaints
- maintaining a positive and cooperative manner
- establishing relationships with customers
- following appropriate hygiene and safety procedures
- referring difficult complaints to appropriate persons

**Quality standards**

Quality standards include one or more of the following:

- consistency standards
- quality specifications
- time requirements
- meeting customer requirements

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPCI101A Adapt to work in industry

# Assessment Requirements for MSMPCI101 Adapt to work in industry

## Modification History

Release 1. Supersedes and is equivalent to MSAPCI101A Adapt to work in industry

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and demonstrate the ability to:

- consistently apply required knowledge and skills when adapting to different workplace requirements, contexts and environments
- follow workplace work health and safety (WHS) and environmental protection procedures and responsibilities
- consistently follow relevant workplace procedures, policies, instructions and regulations, including relevant manufacturer's guidelines relating to the operation and use of equipment
- complete work systematically with required time management and attention to detail without damage to goods, equipment or personnel
- recognise limitations, ask for help and seek clarification or information about work requirements and procedures
- take prompt action to report and/or rectify any workplace problems in accordance with workplace procedures
- recognise and adapt appropriately to cultural differences in the workplace, including modes of behaviour and interactions among staff and others
- identify and interpret information on sectors in the manufacturing industries
- articulate own goals and vision and identify skills gaps and ways they may be addressed
- identify and interpret information on the range of products and services produced by manufacturing industries
- identify and take advantage of learning opportunities in the workplace
- use literacy skills in regard to written and verbal communication in the workplace
- use basic interpersonal and communication skills, including listening and questioning and receiving feedback
- use workplace technology skills where appropriate or required.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- current events, activities, products and services of the manufacturing industry
- workplace policies, procedures and guidelines
- time management strategies and appropriate workplace etiquette

- workplace equipment, tools and other technologies used in the manufacturing industry and where and how to obtain information and instructions on their safe use and basic care and servicing
- sources of information on the industry sector and skills development activities.

## Assessment Conditions

- Assessment must occur in a simulated environment or a workplace.
- This unit must always be assessed in holistically in conjunction with other units of competency that form part of a specified job function.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Performance must be demonstrated consistently over a period of time and for a range of manufacturing contexts.
- Assessors must:
  - satisfy the Standards for Registered Training Organisations 2015 assessor requirements
  - have vocational competency in the manufacturing industry at least to the level being assessed, with broad industry knowledge and experience, usually combined with a relevant industry qualification
  - be familiar with the current skills and knowledge used and have relevant, current experience in the manufacturing industry.

# MSMPCI103 Demonstrate care and apply safe practices at work

## Modification History

Release 1. Supersedes and is equivalent to MSAPCI103A Demonstrate care and apply safe practices at work

## Application

This unit of competency covers the knowledge and skills needed to understand, apply and satisfy safe work practices in an industry. It includes identifying and following work procedures for hazards and risks, monitoring and maintaining cleanliness and tidiness at work, and reporting hazards and risks in appropriate ways. It applies to work health and safety (WHS) requirements and internal workplace policies and procedures.

This unit applies to learners seeking practical skills that are relevant and useful to the area in which the learner hopes to gain employment, is currently working, and/or as a pathway to further study.

This unit applies to a learning and assessment environment where access to normal production operations is not available. Typically this will be a VET in Schools delivery environment but it may be another simulated or trial manufacturing environment where a high degree of supervision exists. Students may be on work placement.

The unit has application in qualifications for all occupations in the manufacturing industry and it should be regarded as an integrating unit. When delivered/assessed as part of a qualification, the unit must be customised to ensure its relevance to real or simulated work activities and related workplaces.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Manufacturing pathways

## Unit Sector

### Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Follow workplace OHS procedures	1.1	Identify, interpret and apply relevant WHS, workplace hazard control procedures and safe work practices
		1.2	Identify and adhere to workplace procedures for reporting hazards promptly and efficiently
		1.3	Undertake all work activities in a safe manner according to WHS guidelines, enterprise policies and procedures
		1.4	Assess the work area regularly and follow procedures to report, remove or minimise potential hazards
		1.5	Use personal protective equipment (PPE) correctly in accordance with established safety and workplace procedures
2	Maintain personal wellbeing in the workplace	2.1	Identify risks to personal wellbeing which may affect safe performance in the workplace and use strategies to prevent and manage them
		2.2	Identify, interpret and follow procedures for maintaining a tidy and clean personal work area
3	Identify and report on safety of self and others	3.1	Identify and correct or report situations which may endanger self or other workers
		3.2	Report incidents and injuries to self or others on the job to appropriate persons and deal with them in a timely manner
		3.3	Contribute to participative arrangements to foster safe working practices, as appropriate
4	Take action in	4.1	Recognise emergency situations and take action within

emergency situations	scope of individual responsibility
	4.2 Follow emergency procedures in accordance with organisational procedures
	4.3 Seek assistance from colleagues and/or other authorities, where appropriate

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

### Hazard control procedures

Hazard control procedures include one or more of the following:

- emergency, fire and accident procedures
- hazard identification and removal or, if this is not possible, establish a hazard control
- use of PPE
- relevant manufacturer guidelines relating to the operation and use of equipment
- WHS regulations
- safe use of mechanical, pneumatic, hydraulic and/or electrical equipment
- safe use of chemicals and toxic substances

### Workplace hazards

Workplace hazards include, but are not limited to, one or more of the following:

- untidy work conditions, including poor and unnecessary obstacles and equipment in work areas
- sharp instruments or equipment
- excessive noise
- hot substances and equipment

- electricity and water
- electrical equipment
- being careless when using cutting equipment or dealing with heat or hot surfaces
- damaged equipment
- moving machinery
- materials handling
- gases and liquids under pressure
- working at heights
- confined spaces
- inappropriate lifting practices
- dangerous floor surfaces
- movements of equipment, goods and vehicles
- chemicals and other harmful substances, including fumes and dust
- toxic substances
- damaged packing material and containers
- inflammable materials and fire hazards
- unavailable waste management and disposal procedures
- extremes in weather conditions
- unsuitable lighting levels
- water hazards
- dangerous storage areas

**Safe work practices**

Safe work practices include, but are not limited to, one or more of the following:

- manual handling procedures
- correct posture
- safe lifting and bending
- using appropriate PPE

**Risks to personal wellbeing**

Risk to personal wellbeing include, but are not limited to, one or more of the following:

- smoking, alcohol and drug use
- lack of sleep
- poor diet
- lack of exercise
- stress
- not using appropriate methods when lifting or moving heavy objects

- not wearing proper PPE

**PPE**

PPE includes, but is not limited to, one or more of the following:

- gloves
- masks
- uniform
- safety headwear and footwear
- safety glasses
- two-way radios
- high visibility clothing

**Appropriate persons**

Appropriate persons include one or more of the following:

- workplace personnel
- supervisors
- team leaders
- management
- WHS personnel
- other persons authorised or nominated by the organisation

**Emergency situations**

Emergency situations include, but are not limited to, one or more of the following:

- accidents
- overheating equipment
- injuries, such as cuts, scalds and burns
- health conditions, such as fainting, asthma attacks and allergic reactions
- spills and leakages of harmful gas and liquids
- structural failures and breakages
- robbery
- fire
- flooding
- power failures or shorts

**Participative arrangements**

Participative arrangements include one or more of the following:

- workplace meetings
- suggestion schemes
- regular communications with team leaders
- information sessions

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPCI103A Demonstrate care and apply safe practices at work

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSMPCI103 Demonstrate care and apply safe practices at work

## Modification History

Release 1. Supersedes and is equivalent to MSAPCI103A Demonstrate care and apply safe practices at work

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and demonstrate the ability to:

- follow relevant workplace procedures, policies, instructions and regulations, including work health and safety (WHS) regulations and hazard prevention policies and procedures, environment protection, and manufacturer guidelines relating to the operation and use of equipment
- follow workplace procedures for hazard identification and risk control
- use relevant personal protective equipment (PPE)
- complete work systematically with required attention to detail without damage to goods, equipment or personnel
- use appropriate written and verbal communication in the workplace
- use basic interpersonal and communication skills, including listening and questioning, and receiving feedback
- promptly report workplace hazards and WHS incidents and take appropriate action
- solve or report problems identified when dealing with safety hazards and applying appropriate hazard control procedures
- recognise limitations, ask for help and seek clarification or information about work requirements and procedures.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- procedures related to WHS to be followed in the work area concerned
- workplace hazards and ways to minimise or remove them
- workplace equipment, materials, housekeeping equipment and the processes and precautions for their use
- PPE relevant to the job and job context
- appropriate hygiene and safety standards.

## Assessment Conditions

- Assessment must occur in a simulated environment or a workplace.

- This unit must always be assessed in holistically in conjunction with other units of competency that form part of a specified job function.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Performance must be demonstrated consistently over a period of time.
- Assessors must:
  - as a minimum, satisfy the Standards for Registered Training Organisations 2015 assessor requirements
  - hold training and assessment competencies as determined by the National Skills Standards Council (NSSC) or its successors
  - have vocational competency in the manufacturing industry at least to the level being assessed, with broad industry knowledge and experience, usually combined with a relevant industry qualification
- Be familiar with the current skills and knowledge used and have relevant, current experience in the manufacturing industry.

## **MSMPER200 Work in accordance with an issued permit**

### **Modification History**

Release 1. Supersedes and is equivalent to MSAPMPER200C Work in accordance with an issued permit

### **Application**

This unit of competency covers the skills and knowledge required to work in accordance with an issued permit. It aims to ensure that people working under a permit to work understand the system, know the limitations of the permit under which they are working and comply with all the requirements of the permit. The people to whom this unit applies may be called 'permit recipients' or 'permit holders' by some organisations. Some organisations call 'permits' 'clearances'.

This unit of competency applies to persons who are required to conduct work activities under the authority of an issued permit to work and within the context and requirements of that permit. This typically applies to all work done by maintenance staff and contractors and also to any other non-process work performed on the plant.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other team members, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

### **Competency Field**

Work Control Systems

### **Unit Sector**

### **Elements and Performance Criteria**

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

- 1 **Apply for permit**
  - 1.1 Confirm the scope and location of the work to be done
  - 1.2 Identify the need for a work permit for the work to be carried out
  - 1.3 Identify the type of work permit required
  - 1.4 Collate information required for the issue of the permit
  - 1.5 Apply for the permit following the organisation's requirements
  
- 2 **Identify the scope of the permit**
  - 2.1 Check that work to be done complies with the permit type
  - 2.2 Check that the scope and location of work comply with the permit issued
  - 2.3 Identify hazards and check that the hazard controls specified on the permit are consistent with the hazard analysis
  - 2.4 Check that preparations specified on the permit have been completed
  - 2.5 Sign onto/receive the permit
  
- 3 **Prepare for permitted work**
  - 3.1 Maintain safe working conditions and environment by using available isolation procedures and safety equipment
  - 3.2 Monitor plant conditions and hazards to ensure work under the permit remains safe
  - 3.3 Ensure that appropriate personal protective equipment (PPE) is selected and worn, and emergency equipment is available, as required by the permit and relevant procedures
  - 3.4 Inspect work area to ensure safety and compliance with permit requirements and procedures

- |   |   |   |
|---|---|---|
| 4 | <b>Work in accordance with an issued permit</b> | 4.1 Use required hazard reduction/control measures  |
|   |   | 4.2 Comply with requirements of the permit, including safety observer if required   |
|   |   | 4.3 Display issued permit on work site as required  |
|   |   | 4.4 Ensure compliance with scope, location and timeframe specified in the permit.   |
|   |   | 4.5 Seek variation to permit/new permit if job or work environment vary from that specified in the permit                     |
|   |   | 4.6 Suspend job and make worksite safe before leaving job   |
|   |   | 4.7 Formally seek and receive authorised extensions to the permit when required   |
|   |   | 4.8 Give end-of-day status report to permit issuer  |
| 5 | <b>Complete permit to work</b>                  | 5.1 Obtain new permit or have existing permit revalidated before work is recommenced  |
|   |   | 5.2 Check the work conducted against the issued permit to ensure that all the nominated work requirements have been satisfied |
|   |   | 5.3 Monitor general housekeeping to ensure that the site has been left in a clean and safe condition                          |
|   |   | 5.4 Ensure personal lock outs/tag outs/isolations are removed in accordance with procedures                                   |
|   |   | 5.5 Communicate status of the work conducted and the results of the permit to relevant personnel                              |
|   |   | 5.6 Complete documentation as required and have permit signed off when job is completed                                       |

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

### Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

### Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- temporary instructions
- any similar instructions provided

### Work permits

Work permits include one or more of the following:

- cold work/general permit to work
- excavation
- hot work
- vehicle entry
- minor repairs
- working at heights
- confined space entry
- other special permits where there is an appropriate sign-off as required

### Information required for

Information required for the issue of the permit includes one or more of

- permit** the following:
- work description
  - tools to be used
  - process/methods of work/SOPs

Where hazardous materials are being used relevant material safety data sheets (MSDS) will also be required.

- Hazards** Hazards include one or more of the following:
- slips and trips
  - emergency equipment is unavailable
  - smoke, darkness and heat
  - heat, smoke, dust or other atmospheric hazards
  - electricity
  - gas
  - gases and liquids under pressure
  - structural hazards
  - structural collapse
  - industrial (machinery, equipment and product)
  - equipment or product mass
  - noise, rotational equipment or vibration
  - limited head spaces or overhangs
  - work where a fall by a person from one level to another is reasonably likely to cause injury
  - working in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
  - flammability and explosivity
  - hazardous products and materials
  - unauthorised personnel
  - sharp edges, protrusions or obstructions, swarf and scrap
  - spills or leaks
  - extreme weather
  - other hazards that might arise
  - unsafe conditions developing through failure to conform with the provisions of a work permit
  - hazards created by the nature or location of the work
  - hazards created by the proximity of the work to other work or normal operations

**Display issued** The permit holder must keep the issued permit with them on site. It must

**permit**

be displayed or ready to be shown as required by the site/job requirements, including one or more of the following:

- displayed in a mounting provided by the site
- accessible in a folder which is on the worksite
- carried in overall pockets in a manner which allows it to be readily shown on request

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMPER200C Work in accordance with an issued permit

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027>

# Assessment Requirements for MSMPER200 Work in accordance with an issued permit

## Modification History

Release 1. Supersedes and is equivalent to MSAPMPER200C Work in accordance with an issued permit

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, and demonstrate the ability to:

- identify type and scope of permit relevant to the job
- interpret and implement permit conditions
- identify changes to conditions which may lead to the permit being revoked before the job is completed
- monitor hazards and hazard controls.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- different types of permits and the work they cover, including three (3) or more of:
  - cold work/general permit to work
  - excavation
  - hot work
  - vehicle entry
  - minor repairs
  - working at heights
  - confined space entry
  - other permit types as used on site
- the impact of the regulatory framework and organisation procedures under which the permit operates upon the particular job requiring the permit
- hazards associated with tasks covered by the permit and related hazard controls
- types of tests/inspections required for the issue of work permits including one (1) or more of:
  - atmospheric, oxygen/breathability
  - temperature
  - humidity
  - combustibles, oxygen, enriched or reduced
  - electricity
  - stored pressure/energy

- flammability/explosivity
- toxicity
- electricity
- stored energy/pressure.

## Assessment Conditions

- Competency must be achieved before performing this work unsupervised. Therefore this unit will typically be assessed off the job. Where assessment is undertaken on the job, appropriate supervision and safety precautions must be provided.
- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should provide evidence of the ability to perform over the range of situations which might be expected to be encountered, including typical disruptions to normal, smooth work conditions
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems
  - may use industry-based simulation particularly where safety, lack of opportunity or significant cost is an issue.
- Off-the-job assessment must sufficiently reflect realistic operational workplace conditions that cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

## MSMSUP102 Communicate in the workplace

### Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP102A Communicate in the workplace.

### Application

This unit describes the skills and knowledge required to receive, relay and record written and oral messages and to provide relevant information in response to requests within timelines.

This unit applies to personnel who are required to communicate clearly and accurately to record messages, seek clarification, access needed information, relay information to other people and complete workplace documentation.

This unit applies to all work environments.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

### Pre-requisite Unit

Nil

### Unit Sector

Support

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Receive and relay messages	1.1 Receive message and confirm understanding 1.2 Accurately record the message 1.3 Relay message accurately to appropriate person or section within designated timelines

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Interpret messages	2.1 Clarify message if necessary 2.2 Take appropriate action 2.3 Respond to communication problems
3. Respond to request for information	3.1 Acknowledge the request for information and clarify understanding 3.2 Access information from appropriate sources 3.3 Relay information to appropriate person or section in a manner appropriate for the receiver
4. Complete workplace forms	4.1 Select appropriate form 4.2 Assemble information required for form 4.3 Complete workplace form 4.4 Submit workplace form

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Release 2. Supersedes and is equivalent to MSAPMSUP102A Communicate in the workplace.

## Links

# Assessment Requirements for MSMSUP102 Communicate in the workplace

## Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP102A Communicate in the workplace.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- received, recorded and relayed messages, including:
  - listening attentively and asking questions to confirm understanding
- responded to at least one request for information in accordance with procedures, including:
  - using clear and concise language in both verbal and written communication
- completed workplace forms legibly and accurately

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- sources of information
- communication equipment
- organisation procedures, including:
  - telephone and communications protocols and/or procedures
  - documentation and record keeping
- types and meaning of workplace codes, numbers, symbols, signs and colours typically used in the work environment
- types, purpose and importance of workplace documentation
- workplace expectations for acceptable language and tone, including swearing, level of formality, courteousness and respect for diversity
- challenges in communicating with people from culturally and linguistically diverse (CALD) backgrounds in the workplace and possible strategies
- communication problems and corrective actions relevant to own role
-

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - workplace documentation and/or information
  - workplace forms.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSMSUP106 Work in a team

### Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP106A Work in a team.

### Application

This unit describes the skills and knowledge required to organise own activities within a team to fit with work schedules and to meet operational guidelines.

This unit applies to team members who are required to use interpersonal and communication skills to plan, organise and complete their work activities according to instructions and with limited discretionary powers.

This unit applies to all work environments.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

### Pre-requisite Unit

Nil

### Unit Sector

# Assessment Requirements for MSMSUP106 Work in a team

## Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP106A Work in a team.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- participated in at least 1 work team to achieve allocated tasks
- used communication and interpersonal skills with:
  - team members
  - team leaders
  - supervisors.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- organisation procedures, including:
  - record keeping requirements
- own role in team and meeting team requirements and the role of other team members, team leaders and supervisors
- organisation work standards and how the team contributes to them
- interpersonal and communication techniques that promote effective teamwork including:
  - listening
  - questioning
  - paraphrasing
  - non-verbal communication
  - giving and receiving feedback.
  -

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# Assessment Requirements for MSMSUP240 Undertake minor maintenance

## Modification History

Release 2. Equivalent. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMSUP240A Undertake minor maintenance.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- undertaken at least 1 minor maintenance activity, including:
  - using available data and records to recognise fault and no-fault conditions in standard and non-standard situations
  - applying operational guidelines and known solutions to correct variations and/or irregularities
  - applying approved hazard control, work permit and safety procedures.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- principles of operation of the equipment to be maintained
- function and troubleshooting of major internal components and their problems
- appropriate testing procedures and use of equipment for a range of equipment faults
- typical causes of equipment failures and the service conditions which may increase maintenance
- types and nature of maintenance (preventative, predictive, corrective) uses, benefits and limitations
- factors that may affect product quality or production output and appropriate remedies.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:

- maintenance documentation, guidelines, procedures and schedules, including data and plant records
- maintenance tools and equipment, including personal protective equipment (PPE).

## **MSMSUP273 Handle goods**

### **Modification History**

Release 1. Supersedes and is equivalent to MSAPMSUP273A Handle goods

### **Application**

This unit of competency covers the skills and knowledge required to receive and despatch products and/or materials from either internal or external sources as an adjunct to the job of making product.

It applies to operators who are required to receive and process orders, maintain records, identify and select goods to be despatched and ensure they are despatched to the correct location.

This unit of competency applies to an individual working alone or as part of a team/work group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency focuses on processing goods to be despatched and/or received. The person undertaking this role may require additional competencies to cover the operation of forklift trucks or other regulated load shifting devices.

This competency is NOT intended for people who, as a major function, operate a store or warehouse. For these people warehousing units of competency should be used.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

### **Competency Field**

Support

## Unit Sector

### Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	<b>Identify work requirements</b>	<ul style="list-style-type: none"> <li>1.1 Read and interpret documentation</li> <li>1.2 Identify required schedules for receipt or despatch</li> <li>1.3 Identify correct product/material</li> <li>1.4 Identify potential problems and required action/solution</li> <li>1.5 Plan work sequence using workplace and product knowledge</li> <li>1.6 Select appropriate materials handling equipment as required</li> <li>1.7 Identify work health and safety (WHS) requirements</li> </ul>
2	<b>Prepare for receiving or despatching goods</b>	<ul style="list-style-type: none"> <li>2.1 Select and check goods for receiving/despatch against product/material knowledge, labels and other identification systems</li> <li>2.2 Sort, assemble and consolidate products as necessary</li> <li>2.3 Secure order and place in storage areas in accordance with schedule</li> <li>2.4 Check order against receiving/despatch schedule and order form</li> </ul>
3	<b>Move materials into/out of storage or to/from production</b>	<ul style="list-style-type: none"> <li>3.1 Check paperwork and identity of materials</li> <li>3.2 Check for completeness and/or damage</li> <li>3.3 Take action on non-conforming products/materials</li> <li>3.4 Move products/materials safely</li> <li>3.5 Store materials safely as required</li> </ul>

		3.6	Resolve routine problems that arise in accordance with procedures
4	<b>Complete materials movement records</b>	4.1	Complete materials movement records (in or out)
		4.2	Update records as required
		4.3	Complete other paperwork and records as required

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

### Regulatory framework

The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

### Procedures

All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

**Documentation and records**

Documentation and records include:

- any information and data in relation to despatch, receipt, movement and storage of goods whether it is manual, paper-based, electronic or verbal, either in person or by phone/radio, and includes one or more of the following:
  - order requests
  - invoices
  - picking slips
  - labels
  - transportation requirements
  - bills of materials
  - inventory lists
  - databases

**Tools and equipment**

Tools and equipment include one or more of the following:

- mobile plant/fork lifts
- manual handling equipment
- hand tools
- shrink wrappers
- tape machine labellers
- loose bulk packing equipment
- computers and bar code readers
- bag filling equipment
- pallets
- wrapping machines
- personal protective equipment (PPE)
- distribution equipment, such as A-frames, stillages, containers, elevated platforms and communication equipment

**Hazards**

Hazards include one or more of the following:

- inappropriate movements and postures
- manual handling hazards
- heat, smoke, dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- equipment failures
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- hazardous products and materials
- unauthorised personnel
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- extreme weather
- other hazards that might arise

**Routine problems** Routine problems must be resolved by applying known solutions.

Routine problems are predictable and include one or more of the following:

- special storage requirements, including moisture and contamination control
- compatibility of goods in loads and in storage
- handling of incomplete loads (either in or out)
- handling of materials which do not meet specifications
- conflicting priorities
- incomplete or incorrect paperwork
- product requirements
- job priority
- product/material variations

Known solutions are drawn from one or more of the following:

- procedures
- training
- remembered experience

Non-routine problems must be reported according to according to relevant procedures.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMSUP273A Handle goods

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027>

# Assessment Requirements for MSMSUP273 Handle goods

## Modification History

Release 1. Supersedes and is equivalent to MSAPMSUP273A Handle goods

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and must include the ability to:

- identify and select goods to be moved in accordance with documentation
- apply known solutions to routine problems
- prepare and organise goods to be moved to fit with schedules
- select and use handling equipment
- read and interpret product specifications, job sheets, procedures, material labels and safety information
- complete documentation and records
- apply appropriate safety precautions and procedures.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- organisation procedures, including:
  - safety, emergency and hazard control
  - inventory and ordering systems
- types and application of handling equipment and any licensing requirements
- manual handling techniques and ergonomics
- safe storage of dangerous goods and hazardous materials
- transport requirements and restrictions for products/materials
- production workflow requirements.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operations

- will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
- must include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems
- may use industry-based simulation for part but not all of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

## MSMSUP390 Use structured problem-solving tools

### Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed.

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem-solving tools.

### Application

This unit describes the skills and knowledge required to use structured process improvement tools to solve process and other problems. It describes the broad application of in-depth and rigorous structured problem-solving techniques to identify opportunities for improvement.

This unit applies to experienced operators, team leaders, supervisors or people in similar roles who are required to identify improvements and/or solve problems beyond those associated directly with the process unit and/or equipment.

This unit applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

This unit of competency applies to all work environments.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Unit Sector

Support

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify the problem	1.1 Identify variances from desired operating and/or output parameters and quality 1.2 Define the extent, cause and nature of the problem by observation

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	and investigation 1.3 State and specify the problem clearly
2. Determine fundamental cause of problem	2.1 Select problem-solving tool appropriate to the problem and the context 2.2 Identify possible causes based on experience and the use of problem-solving tools and analytical techniques 2.3 Develop possible cause statements 2.4 Determine fundamental cause
3. Determine corrective action	3.1 Determine all possible options for resolution of the problem 3.2 Identify strengths and weaknesses of possible options 3.3 Determine corrective action to remove the problem and possible future causes 3.4 Develop implementation plans identifying measurable objectives, resource needs and timelines in accordance with safety and operating procedures 3.5 Develop recommendations for ongoing monitoring and testing
4. Communicate recommendations	4.1 Prepare report on recommendations 4.2 Present recommendations to appropriate personnel 4.3 Follow up recommendations

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Release 2. Supersedes and is equivalent to MSAPMSUP390A Use structured problem-solving tools

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027>

# Assessment Requirements for MSMSUP390 Use structured problem-solving tools

## Modification History

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed.

Release 1. Supersedes and is equivalent to MSAPMSUP390A Use structured problem-solving tools.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified at least 1 problem
- analysed problem using at least 1 analysis tool drawn from each of 2 different groups of tools (basic, visual, process, business and organisation specific)
- selected the preferred solution
- developed and used an implementation plan, that includes:
  - specific, measurable, achievable, relevant, timed (SMART) objectives
  - resource requirements
  - methods for reaching objectives
  - timelines
  - methods of checking and adjusting adherence to plan
- communicated effectively with other personnel.
- 

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- relevant organisation procedures
- risks, risk assessment and controls relevant to problem being analysed
- targets and measures for output and quality
- types and application of problem-solving tools and analytical techniques
- relevant equipment and operational processes.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027>

# MSMWHS100 Follow WHS procedures

## Modification History

Release 1. Supersedes and is equivalent to MSAPMOHS100A Follow OHS procedures

## Application

This unit of competency covers the skills and knowledge required to recognise hazards commonly occurring at the workplace and follow work health and safety (WHS) instructions and procedures.

It covers recognising known hazards, such as those identified in procedures or training, and identifying the underlying causes of these identified hazards.

This unit of competency applies to people on-site who are required to follow WHS instructions and procedures relating to the activity being undertaken. They will be aware of the importance of maintaining their own health and safety and the health and safety of others in the workplace and will also be capable of dealing with incidents and emergencies within their own scope of responsibility and under the direction of their supervisor for the site activity.

While the instructions and procedures must be derived from the relevant organisation WHS policies, the person is not required to understand or interpret these policies. This interpretation should be undertaken by their supervisor for the site activity when informing them of the WHS requirements.

This unit of competency applies to an individual who will be accompanied or directly supervised while on-site.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Work health and safety

## Unit Sector

### Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Recognise hazards	1.1	Identify hazards commonly found in the workplace
		1.2	Check work area routinely before and during work
		1.3	Describe causes of identified hazards
2	Follow procedures for hazard control	2.1	Follow procedures to remove or minimise hazards, within the scope of responsibilities and competencies
		2.2	Use required personal protective and other safety equipment (PPE)
		2.3	Describe the potential consequences of failing to follow these procedures and instructions
3	Follow emergency procedures	3.1	Recognise emergency/emergency alarm
		3.2	Go to muster point following procedure
		3.3	Follow instructions related to the emergency
4	Report problems	4.1	Report to appropriate people in accordance with workplace procedures when hazards or other problems arise

### Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Regulatory framework** The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

**Procedures** All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- temporary instructions
- any similar instructions provided for the smooth running of the plant

**Hazards** Hazards include one or more of the following:

- slip/trip hazards
- PPE not available or not functional
- heat, smoke, dust or other atmospheric hazards
- electricity
- gas
- gases and liquids under pressure
- equipment in unsafe condition with hazard controls not functional
- noise, rotational equipment or vibration
- fire and explosion

- flammability and explosivity
- hazardous products and materials
- sharp edges, protrusions or obstructions, swarf and scrap
- extreme weather
- other hazards that might arise

**Problems** Problems must be reported and corrective action taken according to relevant procedures.

Problems include one or more of the following:

- recognition of hazards
- problems encountered in controlling risks associated with hazards
- observation of an injury and/or incident which occurred in the workplace
- clarification of understanding of WHS policies and procedures

**Appropriate personnel** Appropriate personnel include one or more of the following:

- employer
- supervisor
- employees elected as WHS representatives
- other personnel with WHS responsibilities

**Reporting methods** Reporting methods include one or more of the following:

- verbal
- written

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSAPMOHS100A Follow OHS procedures

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSMWHS100 Follow WHS procedures

## Modification History

Release 1. Supersedes and is equivalent to MSAPMOHS100A Follow OHS procedures

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and demonstrate the ability to:

- recognise hazards
- use required personal protective equipment (PPE)
- take the action specified in the procedures
- report the situation as specified in the procedures

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- the rights and responsibilities of personnel under the WHS legislation
- hazard and emergency signs, labels and alarms
- hazards that may arise in the job/work environment, including:
  - their possible causes
  - potential consequences
  - appropriate risk controls
- types and application of PPE
- procedures for reporting WSE problems and taking action
- emergency procedures.

## Assessment Conditions

- Competency must be achieved before performing this activity. Therefore this unit will typically be assessed off the job. Where assessment is undertaken on the job, appropriate supervision and safety precautions must be provided.
- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should provide evidence of the ability to perform over the range of situations which might be expected to be encountered, including typical disruptions to normal, smooth work conditions
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems

- may use industry-based simulation particularly where safety, lack of opportunity or significant cost is an issue.
- Off-the-job assessment must sufficiently reflect realistic operational workplace conditions that cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The regulatory framework will be reflected in workplace policies and procedures and is not required to be independently assessed.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

## MSMWHS200 Work safely

### Modification History

Release 3. Equivalent. Mapping information updated.

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMOHS200A Work safely.

### Application

This unit describes the skills and knowledge required to apply workplace policies and procedures to maintain a safe work environment for self and others. This includes identifying work health and safety (WHS) hazards, assessing risk and following safety procedures in the workplace with minimal supervision.

This unit applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must also be applied.

### Pre-requisite Unit

Nil

### Unit Sector

Work health and safety

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify hazards and assess risk	1.1 Identify hazards in the work area before and during work 1.2 Access and apply relevant safety data sheets (SDS) 1.3 Assess risks for the identified hazards

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.4 Identify controls for these hazards from procedures 1.5 Review effectiveness of controls within the scope of authority 1.6 Identify and report remaining risk
2. Follow procedures for risk control	2.1 Control risks when working under minimal supervision by following workplace procedures 2.2 Follow safety signs and other safety indicators and zones 2.3 Select, use and maintain relevant personal protective equipment (PPE) 2.4 Handle and store items and materials relevant to job safely
3. Follow emergency procedures	3.1 Recognise emergency situations 3.2 Take appropriate initial emergency action 3.3 Follow procedures for dealing with a range of site or plant emergencies
4. Participate in the enhancement of safety	4.1 Raise WHS issues with designated personnel in accordance with workplace procedures and relevant requirements of WHS legislation 4.2 Contribute to participative arrangements for WHS management in the workplace within organisation procedures and the scope of responsibilities and competencies 4.3 Provide input to minimise hazards in work area in line with organisation WHS procedures 4.4 Provide input to opportunities for development of work group's competencies in relation to WHS 4.5 Support the implementation of procedures to control risks using the hierarchy of control and in accordance with organisation procedures 4.6 Report to appropriate people in accordance with workplace procedures when non-routine hazards arise
5. Work in accordance with WHS policies and procedures	5.1 Follow workplace procedures to achieve a safe working environment in accordance with all relevant WHS legislation, including codes of practice relating to hazards within the workplace or industry 5.2 Identify the duties, rights and obligations of employees and employers under the relevant WHS legislation 5.3 Complete hazard, accident or incident reports as required by workplace procedures

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	5.4 Seek assistance with documentation and processes when needed

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Release 2. Supersedes and is equivalent to MSAPMOHS200A Work safely

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSMWHS200 Work safely

## Modification History

Release 3. Equivalent. Mapping information updated.

Release 2. Equivalent. Minor edits for improved clarity. Range of conditions removed. Duplication between Performance Evidence and Performance Criteria removed. Assessment conditions updated.

Release 1. Supersedes and is equivalent to MSAPMOHS200A Work safely.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified hazards relevant to work area and followed procedures to:
  - assess risks associated with the hazards
  - identify and apply standard controls
  - check that controls are in place and operational.
  -

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- organisational work health and safety (WHS) procedures, including procedures for reporting WHS problems and corrective actions
- duties, rights and obligations of employees and employers under the relevant WHS legislation as they relate to the job role
- hazards that may arise in the work environment, including:
  - their possible causes
  - potential consequences
  - appropriate risk controls
- hierarchy of control
- types and application of personal protective equipment (PPE)
- hazard and emergency signs, labels and alarms
- appropriate responses to non-standard situations.
- 

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - WHS procedures, incident reporting documentation and safety data sheets (SDS).
  - personal protective equipment (PPE)

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSMWHS300 Facilitate the implementation of WHS for a work group

## Modification History

Release 1. Supersedes and is equivalent to MSAPMOHS300A Facilitate the implementation of OHS for a work group

## Application

This unit of competency covers the skills and knowledge required to implement and monitor defined work health and safety (WHS) policies and procedures for a work group or area.

This unit of competency applies to people in a team leader or similar role and to people who are on a WHS committee.

It covers the ability to provide clear directions, information, instruction, training and appropriate supervision regarding the relevant state/territory WHS legislation, codes of practice, industry standards, workplace procedures and work instructions. It also covers the ability to coach team members to participate and contribute to WHS management issues.

This unit of competency applies to an individual working alone or as part of a team or group and working in liaison with other shift team members and the control room operator, as appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

MSMWHS200 Work safely

## Competency Field

HSE

## Unit Sector

### Elements and Performance Criteria

Elements describe the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element

1	Communicate WHS information for co-workers in team	1.1	Accurately and clearly explain to the work group basic WHS rights, responsibilities and requirements
		1.2	Provide, in a readily accessible manner, information on the relevant organisation WHS policies, procedures and programs, and accurately and clearly explain them to the work group
		1.3	Regularly provide relevant information about identified hazards and the outcomes of risk assessment and risk control procedures, and accurately and clearly explain them to the work group
2	Coach co-workers in team	2.1	Establish mutual support groups, e.g. buddy system, to encourage effective development of individual and group competencies in WHS
		2.2	Provide personal encouragement and assistance to team members to contribute to the management of WHS at the workplace
3	Facilitate the consultative process	3.1	Deal with, and promptly resolve, issues raised through consultation or refer to the appropriate personnel for resolution in accordance with workplace procedures
		3.2	Seek input from work group on WHS issues and proposed changes to process, procedures or work place
		3.3	Encourage and use feedback from individuals and teams to identify and initiate improvements in the management of WHS
		3.4	Promptly inform the work group of the outcomes of consultation over WHS issues

- |   |   |     |   |
|---|---|-----|---|
| 4 | Implement and monitor organisation procedures for identifying hazards, and assessing and controlling risk | 4.1 | Implement and monitor WHS policies and procedures as defined by organisation  |
|   |   | 4.2 | Monitor existing risk control measures and report results regularly   |
|   |   | 4.3 | Access internal and external sources of relevant WHS information  |
|   |   | 4.4 | Evaluate and identify inadequacies in existing risk control measures in accordance with the hierarchy of control, and report to designated personnel  |
|   |   | 4.5 | Identify inadequacies in resource allocation for implementation of risk control measures and report to designated personnel   |
|   |   | 4.6 | Identify actual/potential inadequacies in procedures and report to designated personnel   |
|   |   | 4.7 | Identify actual/potential inadequacies in individual or team competency and report to designated personnel  |
| 5 | Maintain and use WHS records  | 5.1 | Accurately and legibly complete WHS records for work area, in accordance with workplace requirements for WHS records and legal requirements for the maintenance of records of workplace injury and disease  |
|   |   | 5.2 | Use aggregated information from the area WHS records to identify hazards and monitor risk control procedures within work area according to procedures and within scope of responsibilities and competencies |

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Regulatory framework** The latest version of all legislation, regulations, industry codes of practice and Australian/international standards, or the version specified by the local regulatory authority, must be used, and include one or more of the following:

- legislative requirements, including work health and safety (WHS)
- industry codes of practice and guidelines
- environmental regulations and guidelines
- Australian and other standards
- licence and certification requirements

All operations to which this unit applies are subject to stringent health, safety and environment (HSE) requirements, which may be imposed through state/territory or federal legislation, and these must not be compromised at any time. Where there is an apparent conflict between performance criteria and HSE requirements, the HSE requirements take precedence.

**Procedures** All operations must be performed in accordance with relevant procedures.

Procedures are written, verbal, visual, computer-based or in some other form, and include one or more of the following:

- emergency procedures
- work instructions
- standard operating procedures (SOPs)
- safe work method statements (SWMS)
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant

**Hazards** Hazards include one or more of the following:

- smoke, darkness and heat
- electricity
- gas and
- gases and liquids under pressure
- structural hazards

- structural collapse
- industrial (machinery, equipment and product)
- equipment or product mass
- noise, rotational equipment or vibration
- working at heights, in restricted or confined spaces, or in environments subjected to heat, noise, dusts or vapours
- flammability and explosivity
- hazardous products and materials
- sharp edges, protrusions or obstructions
- slippery surfaces, spills or leaks
- limited head spaces or overhangs
- unauthorised personnel
- other hazards that might arise

**Appropriate personnel**

Appropriate personnel include one or more of the following:

- employer
- supervisor
- employees elected as WHS representatives
- other personnel with WHS responsibilities

**WHS records**

WHS records include one or more of the following:

- hazard and incident reports
- logs/logs sheets
- inspection/start up/shut down checklists
- injury reports
- maintenance records

**WHS information sources**

WHS information sources include one or more of the following:

- WHS legislation, codes of practice and Australian and International standards
- WHS regulators
- WorkSafe Australia Guides
- industry bodies
- internet sites, journals and newsletters
- manufacturer manuals
- material safety data sheets (MSDS) and registers
- organisation WHS policies and procedures
- internal risk assessments, job safety analyses (JSAs) and workplace inspections

- internal hazard and incident reports

## **Unit Mapping Information**

Release 1. Supersedes and is equivalent to MSAPMOHS300A Facilitate the implementation of OHS for a work group

## **Links**

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=d1287d36-dff4-4e9f-ad2c-9d6270054027>

# Assessment Requirements for MSMWHS300 Facilitate the implementation of WHS for a work group

## Modification History

Release 1. Supersedes and is equivalent to MSAPMOHS300A Facilitate the implementation of OHS for a work group

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include the ability to:

- communicate using appropriate style and format for a range of stakeholders to:
  - promote and facilitate consultation and participation in the WHS processes
  - provide WHS information to work group
  - explain WHS procedures to work team members
  - report to designated personnel
  - seek input and feedback on WHS issues
  - undertake WHS issue resolution
- implement and monitor defined WHS activities for a work group or area
- encourage and assist the development of work group members
- evaluate and report on WHS procedures and practices
- participate in decisions which impact on WHS for the workgroup
- recognise a situation requiring action, including hazards, and take specified action to rectify or seek assistance as appropriate.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job sufficient to operate independently and to solve routine and non-routine problems, including:

- assessment of risk and implementation of risk control measures
- rights and responsibilities of employees under WHS legislation
- obligations of employers under the WHS legislation, including duty of care
- regulatory requirements for WHS information and consultation and processes and arrangements to meet these obligations
- regulatory requirements for WHS record keeping and reporting
- regulatory requirements for training and licensing relevant to WHS
- the hierarchy of control
- counselling, disciplinary and issue resolution processes.

## Assessment Conditions

- Where the candidate does not currently possess evidence of competency in MSMWHS200 Work safely, it may be co-assessed with this unit.
- The unit should be assessed holistically and the judgement of competence based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should provide evidence of the ability to perform over the range of situations which might be expected to be encountered, including typical disruptions to normal, smooth work conditions
  - will typically include a supervisor/third-party report focusing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include a demonstration of communication of WHS information to a group and the use of appropriate consultation and participation from within that group
  - may use industry-based simulation for all or part of the unit particularly where safety, lack of opportunity or significant cost is an issue.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment in a simulated environment should use evidence collected from one or more of:
  - walk-throughs
  - pilot plant operation
  - demonstration of skills
  - industry-based case studies/scenarios
  - ‘what ifs’.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- As a minimum, assessors must satisfy the Standards for Registered Training Organisations 2015 assessor requirements.

# MSS015022 Develop strategies for more sustainable use of resources

## Modification History

Release 1. Updated unit code. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Application

This unit describes the skills and knowledge to identify strategies for more sustainable uses of resources. The unit includes the identification of waste (muda) as part of a strategy for achieving better sustainability outcomes in a process as well as quantifying theoretical and actual resource (including energy) consumption.

This unit applies inside organisations and their value chains and specifically applies to the use of resources as part of an overall response to improving sustainability.

Where the carbon footprint (or water footprint or similar) of an organisation or value chain is known, the unit can be applied to developing strategies for the reduction of that footprint. A manager or technical specialist who has a major responsibility for sustainability as part of a broader work role would typically undertake this, or sustainability may be their primary work responsibility.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

Nil

## Competency Field

Sustainable operations

## Unit Sector

Not applicable

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	<b>Quantify</b>	1.1	Identify all significant resources used by process
---	-----------------	-----	--

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
	<b>resource consumption</b>	1.2 Identify consumption measurements available for each resource
		1.3 Quantify consumption for each resource
2	<b>Quantify resource loss</b>	2.1 Determine theoretical consumption of each resource
		2.2 Compare theoretical consumption with actual consumption
		2.3 Quantify loss (emission) for each resource
3	<b>Recommend strategies for reducing muda (waste)</b>	3.1 Short-list high emission process steps
		3.2 Analyse process to identify emission steps or locations
		3.3 Determine root cause of emission
		3.4 Investigate methods for reducing emission
		3.5 Develop strategies and recommendations for improvement
4	<b>Prepare resources use audit report</b>	4.1 Identify purpose of report and key stakeholders
		4.2 Compile data, implications and recommendations
		4.3 Consult with stakeholders
		4.4 Write and present report

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS015002 Develop strategies for more sustainable use of resources.

## Links

The MSS Sustainability Companion Volume implementation Guides are available from VETNet: -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5b04f318-804f-4dc0-9463-c3fb9a3fe998>

# Assessment Requirements for MSS015022 Develop strategies for more sustainable use of resources

## Modification History

Release 1. Updated unit code. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- quantified significant resource consumption and emission using materials balancing for at least 1 organisation or value chain, including developing strategies for reducing emissions and preparing and presenting a resources use audit report.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- the concept of muda (waste) and muda categories
- muda reduction methods and strategies
- methods and uses of material balancing
- methods and uses of energy balancing
- methods of comparing theoretical with actual resource consumption
- methods for mapping processes and resources consumed
- methods of measuring actual resource usage
- AS/NZS ISO 14001 Environmental Management Systems or its authorised replacement.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

The MSS Sustainability Companion Volume implementation Guides are available from VETNet: -

## MSS015023 Design sustainable product or process

### Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

### Application

This unit describes the skills and knowledge to redesign an existing, or design a new, product or process to achieve optimal sustainability outcomes.

This unit applies inside organisations and their value chains. A manager or technical specialist who has a major responsibility for sustainability as part of a broader work role would typically undertake this unit, or sustainability may be their primary work responsibility. The manager or technical specialist may undertake this alone or as part of a team.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

Nil

### Competency Field

Sustainable operations

### Unit Sector

Not applicable

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	<b>Define parameters of new or improved product</b>	1.1	Consult with stakeholders to determine required function, performance and aesthetics of new product
		1.2	Identify market, expected time to market and cost constraints of product and production process
		1.3	Identify requirements with possible high sustainability impacts

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	1.4 Negotiate requirements to achieve desired sustainability impacts
	1.5 Develop agreed definition of product requirements
<b>2 Develop alternative product and process designs</b>	2.1 Identify alternative resource requirements
	2.2 Identify alternative processes
	2.3 Determine the possible sustainability impacts of different combinations of resources and processes
	2.4 Test alternative product and process designs against original product requirement definitions
	2.5 Identify product requirements which may be causing significant sustainability impacts
	2.6 Renegotiate product requirements to lessen sustainability impacts
	2.7 Short-list preferred resources and processes
<b>3 Evaluate life cycle impacts</b>	3.1 Estimate life cycle sustainability impacts for each short-listed alternative
	3.2 Identify process steps with greatest sustainability impact
	3.3 Evaluate process steps for alternatives and modifications with lower impact
	3.4 Select alternative which best meets requirements and has the lowest sustainability impact
<b>4 Confirm design</b>	4.1 Develop selected design
	4.2 Confirm life cycle sustainability impacts
	4.3 Review design against product requirements
	4.4 Obtain required authorisations

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
	4.5 Document design in the required form
<b>5 Prepare for implementation</b>	5.1 Consult with key stakeholders
	5.2 Identify key measures for monitoring implementation of design
	5.3 Identify data sources required by key measures
	5.4 Organise for data to be captured and manipulated

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS015004 Design sustainable product or process.

## Links

The MSS Sustainability Companion Volume implementation Guides are available from VETNet: -

# Assessment Requirements for MSS015023 Design sustainable product or process

## Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- redesigned an existing, or designed a new, product or process for optimal sustainability outcomes.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- sustainability impacts from using different materials and different processes and to produce products of different specifications and life cycle outcomes
- alternative sources of materials and components and the sustainability differences of each
- alternative processes and the sustainability differences of each, including expression in terms of carbon equivalence
- product and process design
- new product parameters
- design documentation
- methods of monitoring of product development and manufacture.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSS402001 Apply competitive systems and practices

## Modification History

Release 1 - Supersedes and is equivalent to MSS402001A Apply competitive systems and practices

## Application

This unit of competency covers the skills and knowledge required to implement basic improvement practices within an organisation using competitive systems and practices. The unit focuses on bringing together the basic concepts and the holistic application of these basic concepts and processes to operations. It would typically be carried out working as part of a team.

This unit applies to an individual in an organisation that has embarked on competitive systems and practices. The unit covers the skills and knowledge required to contribute to the competitive systems and practices processes and assumes that they are to be used within the scope of the individual's job and authority.

This unit requires the application of skills associated with planning and organising an individual's own role within the competitive systems and practices framework.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Competitive systems and practices

## Unit Sector

Not applicable

## Elements and Performance Criteria

Elements describe the      Performance criteria describe the performance needed to

essential outcomes.	demonstrate achievement of the element.
<b>1 Identify own place in the value chain</b>	<p>1.1 Identify customers relevant to own work and their needs/requirements.</p> <p>1.2 Identify suppliers for own work.</p> <p>1.3 Identify value contributions along the chain.</p> <p>1.4 Identify and recommend methods of increasing own contribution to the value chain.</p>
<b>2 Improve the product and process value</b>	<p>2.1 Identify customer features/benefits in the product and process.</p> <p>2.2 Identify aspects of product and process which contribute to customer features/benefits.</p> <p>2.3 Identify aspects of product and process which do not contribute to customer benefits/features.</p> <p>2.4 Recommend methods of reducing waste and increasing features/benefits.</p>
<b>3 Use competitive systems and practices</b>	<p>3.1 Identify competitive systems and practices used in organisation and own work area.</p> <p>3.2 Apply practices appropriate for the job or process.</p> <p>3.3 Monitor the job/process and make adjustments to improve it in accordance with procedures.</p> <p>3.4 Identify own skill requirements and seek skill development, if required.</p>

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Competitive systems and practices include one or more of:**

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

**Customers include one or more of:**

- internal or external customers and should be sufficiently close to the individual's work as to be easily identifiable
- final customers used as the basis for the identification of value and waste.

**Suppliers include one or more of:**

- internal suppliers
- external suppliers sufficiently close to the individual's work as to be easily identifiable.

**Procedures (written, verbal, visual, computer based, etc.) include one or more of:**

- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions

- any similar instructions provided for the smooth running of the plant.

## **Unit Mapping Information**

Release 1. Supersedes and is equivalent to MSS402001A Apply competitive systems and practices

## **Links**

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSS402001 Apply competitive systems and practices

## Modification History

Release 1 - Supersedes and is equivalent to MSS402001A Apply competitive systems and practices

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to always apply competitive systems and practices to their own job to:

- identify own place in the value chain relevant to their job
- use competitive systems and practices tools and thinking
- recommend improvements in product and/or process.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- customer requirements and their role in fulfilling them
- the value chain for products they make and their place in it
- identification of muda (waste) and its reduction.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the application of competitive systems and practice in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.

- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# MSS402002 Sustain process improvements

## Modification History

Release 1. Supersedes and is equivalent to MSS402002A Sustain process improvements

## Application

This unit of competency covers the skills and knowledge required by an individual to prevent process improvements in their own work from slipping back to former practices or digressing to less efficient practices.

This unit applies to organisations implementing competitive systems and practices and continuous improvement. It covers the skills needed to ensure that process improvements are sustained and opportunities taken to suggest further improvements.

Improvement initiatives can be made by any of a number of methods and by teams or individuals. The unit assumes that desired levels of performance or quality are known to employees.

The unit can be applied to all areas of an organisation, including production, maintenance, logistics and office functions.

This unit requires the application of skills associated with problem solving, initiative and enterprise and self-management in order to understand implement and monitor improvement practices. It also requires the ability to identify and address personal skill gaps in order to manage own ability to implement change.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Competitive systems and practices

## Unit Sector

Not applicable

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	<b>Examine previous improvements</b>	1.1	Identify impact of previous process improvements to equipment, operations, services or products in own work area.
		1.2	Identify improvements where objectives have not been met.
2	<b>Implement corrective actions</b>	2.1	Identify corrective actions that can be taken by self on process improvements that have not met objectives.
		2.2	Obtain any required approvals.
		2.3	Identify any additional, personal skill gaps and seek skill development.
		2.4	Adopt improved processes.
3	<b>Check changes</b>	3.1	Identify claimed improvements.
		3.2	Identify methods of observing and measuring claimed improvements in own work area.
		3.3	Check if claimed improvements are occurring and report problems in accordance with procedures.
4	<b>Check for further improvements</b>	4.1	Look for areas of possible further improvement.
		4.2	Discuss further improvements with peers and supervisors.
		4.3	Take action to implement improvements in accordance with procedures.

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Competitive systems and practices include one or more of:**
- lean operations
  - agile operations
  - preventative and predictive maintenance approaches
  - statistical process control systems, including six sigma and three sigma
  - Just in Time (JIT), kanban and other pull-related operations control systems
  - supply, value, and demand chain monitoring and analysis
  - 5S
  - continuous improvement (kaizen)
  - breakthrough improvement (kaizen blitz)
  - cause/effect diagrams
  - overall equipment effectiveness (OEE)
  - takt time
  - process mapping
  - problem solving
  - run charts
  - standard procedures
  - current reality tree.

- Customers include one or more of:**
- internal customers
  - external customers sufficiently close to the individual's work as to be easily identifiable
  - final customers used as the basis for the identification of value and waste.

- Suppliers include**
- internal suppliers

**one or more of:**

- external suppliers sufficiently close to the individual's work as to be easily identifiable.

**Measuring improvements includes one or more of:**

- personally taking measurements
- arranging for measurements to be taken/made by appropriate personnel.

**Procedures (written, verbal, visual, computer based, etc.) include one or any combination of:**

- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

**Corrective actions to sustain improvements include one or more of:**

- techniques for preventing mistakes by designing the operations process, equipment and tools so that an operation literally cannot be performed incorrectly (e.g. baka-yoke)
- techniques that generate warning signals where a mistake is about to be performed (poka-yoke)
- administrative techniques, such as procedure/work instruction changes
- skilling techniques, such as training, mentoring, demonstration
- process techniques, such as changing the process/conditions/variables.

## Unit Mapping Information

# Assessment Requirements for MSS402002 Sustain process improvements

## Modification History

Release 1. Supersedes and is equivalent to MSS402002A Sustain process improvements

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to examine three (3) or more previous improvements, including one (1) or more where improvement objectives have not been met, and to:

- identify corrective actions that can be taken by self
- implement those corrective actions
- check whether the claimed improvements have occurred
- check for further improvements.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- muda (waste)
- indicators of processes not delivering claimed improvements
- baka-yoke and poka-yoke techniques.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include actions to sustain process improvements in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.

- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# MSS402020 Apply quick changeover procedures

## Modification History

Release 1. Supersedes and is equivalent to MSS402020A Apply quick changeover procedures

## Application

This unit of competency covers the skills and knowledge required to apply quick changeover procedures in an organisation implementing competitive systems and practices.

This unit applies to individuals in an organisation which is implementing competitive systems and practices and is pursuing quick changeover as one of its competitive operations tools. The unit can apply to quick changeovers of equipment, processes, batches or product type. It requires the application of skills associated with applying quick changeover procedures, including the planning and organising of own work, identifying problems and making suggestions for improvement of procedures.

Particular technical skills may also be required in some operations sectors and for some jobs. These skills should be gained from the Training Package relevant to the individual's industry and occupation.

This unit may not be applicable to a totally continuous operation producing only the one product, or simultaneous range of products. The unit is also not applicable to a maintenance/PVI shutdown as experienced by continuous process manufacturers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Competitive systems and practices

## Unit Sector

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |  |
|---|--|
| <b>1 Prepare for changeover</b>               | <ul style="list-style-type: none"><li>1.1 Determine when changeover will be required.</li><li>1.2 Review plans and instructions for quick changeover.</li><li>1.3 Identify role of others in quick changeover.</li><li>1.4 Obtain all required tools/parts/materials for changeover.</li><li>1.5 Organise process and tools/parts/materials ready for changeover.</li></ul>  |
| <b>2 Make quick changeover</b>                | <ul style="list-style-type: none"><li>2.1 Plan changeover according to quick changeover principles.</li><li>2.2 Liaise and work with relevant people in quick changeover.</li><li>2.3 Complete changeover according to procedures.</li><li>2.4 Check output meets specification.</li><li>2.5 Debrief with all relevant stakeholders.</li><li>2.6 Note any steps which cause a problem.</li><li>2.7 Recommend changes to problematic steps.</li></ul> |
| <b>3 Improve work health and safety (WHS)</b> | <ul style="list-style-type: none"><li>3.1 Identify hazards to self or others in all steps/actions.</li><li>3.2 Determine risks from each hazard.</li><li>3.3 Identify actions which may be performed in a more ergonomic manner.</li><li>3.4 Recommend changes to improve WHS.</li></ul>   |

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Competitive systems and practices include one or more of:**
- lean operations
  - agile operations
  - preventative and predictive maintenance approaches
  - monitoring and data gathering systems, such as Systems Control and Data Acquisition (SCADA) software, Enterprise Resource Planning (ERP) systems, Materials Resource Planning (MRP) and proprietary systems
  - statistical process control systems, including six sigma and three sigma
  - Just in Time (JIT), kanban and other pull-related operations control systems
  - supply, value, and demand chain monitoring and analysis
  - 5S
  - continuous improvement (kaizen)
  - breakthrough improvement (kaizen blitz)
  - cause/effect diagrams
  - overall equipment effectiveness (OEE)
  - takt time
  - process mapping
  - problem solving
  - run charts
  - standard procedures
  - current reality tree.

- Changeover may include one or more of:**
- an exchange of equipment (often dies or tools (traditional))
  - a change between products/batches or between campaigns or processes. It may be any quantum change to produce a different product or undertake a different process.

**Set-up can be divided into two types:**

- internal set-up (requires work to stop, work that can be done only when the machine or process is not actively engaged in production, computers etc. need to be reset and restarted)
- external set-up (work can continue during the changeover, work can be done concurrently with the machine or process performing production duties).

**Set-up time includes:**

- the work time required to change over a machine or process from one item or operation to the next item or operation.

**Procedures (written, verbal, visual, computer based, etc.) include one or more of:**

- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS402020A Apply quick changeover procedures

## Links

# Assessment Requirements for MSS402020 Apply quick changeover procedures

## Modification History

Release 1. Supersedes and is equivalent to MSS402020A Apply quick changeover procedures

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for three (3) or more quick changeovers, to:

- identify the scope and equipment to be used in a quick changeover implemented in their own workplace
- plan and complete changeover
- identify problems in quick changeovers
- contribute suggestions for improvement.

## Knowledge Evidence

- Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision and to solve routine problems, including knowledge of:
- principles of quick changeover, including:
  - setting of target time for changeover
  - conversion of internal set-up time to external set-up time, where appropriate
  - simplification of changeover steps
  - monitoring and continuous improvement of changeovers
- purpose and requirements of changeover
- minimisation of changeover waste (e.g. scrap and energy)
- quality requirements for products and purposes
- relevant operational procedures
- health, safety and environment (HSE) principles relevant to own job.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace

- will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
- must include actual quick changeovers, the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations. Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# MSS402031 Interpret product costs in terms of customer requirements

## Modification History

Release 1. Supersedes and is equivalent to MSS402031A Interpret product costs in terms of customer requirements.

Release 2. Unit code in Application updated. Equivalent outcome.

## Application

This unit of competency covers the skills and knowledge required by an individual to be able to identify the major cost components of either products or processes, the basic relationship of these to customer benefit, and use this to help minimise waste (defined as anything not delivering value as defined by the customer). It has a different focus to *MSS402082 Apply cost factors to work practices*, which focuses on costs in isolation, whereas this unit regards all costs not directly leading to customer benefit as waste.

This unit applies to an individual who uses their understanding of the customer's requirements of the product or process being undertaken as the basis for investigating work processes to identify waste sources and then takes action relevant to their level of competency and authority to reduce this waste. It requires an understanding of both the cost factors in the products they make and also the benefits which the customer derives from the product.

This competency may be performed individually or in a team-based environment.

This unit requires the application of skills associated with analysis and problem solving to identify waste and determine ways to minimise waste. This unit requires initiative and enterprise and application of learning in concepts of waste and waste minimisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Competitive systems and practices

## Unit Sector

Not applicable

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	<b>Identify cost components deriving from customer benefit and other costs</b>	1.1	Identify customer features/benefits in product or process being undertaken.
		1.2	Identify cost components which deliver customer features/benefits and those which do not.
2	<b>Compare required performance of product or process steps with actual performance</b>	2.1	Identify performance required to meet customer needs in own work and that of team.
		2.2	Identify actual performance.
		2.3	Compare cost components of products or process with current customer-related targets.
		2.4	Separate costs components into those that contribute to customer features/benefits and those that do not.
		2.5	Determine non-contributing cost components which are under control of the individual or team.
3	<b>Minimise waste</b>	3.1	Recommend changes to eliminate or reduce waste.
		3.2	Adopt changes which minimises waste.
		3.3	Monitor effect of changes to ensure gains are made against customer features/benefits.

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect

performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Competitive systems and practices include one or more of:**
- lean operations
  - agile operations
  - preventative and predictive maintenance approaches
  - statistical process control systems, including six sigma and three sigma
  - Just In Time (JIT), kanban and other pull-related operations control systems
  - supply, value, and demand chain monitoring and analysis
  - 5S
  - continuous improvement (kaizen)
  - breakthrough improvement (kaizen blitz)
  - cause/effect diagrams
  - overall equipment effectiveness (OEE)
  - takt time
  - process mapping
  - problem solving
  - run charts
  - standard procedures
  - current reality tree.

- Customer features/benefits include all of:**
- characteristics of the product or service which the customer perceives as meeting their need
  - characteristics of the product or service which the customer perceives as adding value
  - financial or features items which the customer perceives and a benefit.

- Performance includes all of:**
- takt - the allowable time to produce one product at the rate and quality customers are demanding it
  - the rate of output of the plant compared to the takt time.

- Customer-related targets includes all of:**
- internally set financial targets that contribute to meeting customer features/benefits
  - operational targets that contribute to meeting customer features/benefits
  - other targets that contribute to meeting customer features/benefits.

- Contributing cost components include all of:**
- costs that make a direct contribution to customer features/benefits.
  - costs that need to be incurred (although they may be minimised) in order to gain the customer feature/benefit.
- Non-contributing cost components include all of:**
- costs that do not contribute to customer features/benefits
  - costs that must be maintained, such as regulatory compliance costs which do not contribute to customer features and so should be minimised
  - costs that neither contribute to customer features/benefits nor must be maintained (muda) and so should be eliminated if possible.
- Muda (waste) includes all of:**
- any activity which does not contribute to customer or organisation benefit/features in the product
  - activities which do not yield any benefit to the organisation or any benefit to the organisation's customers
  - excess production and early production
  - delays
  - movement and transport
  - poor process design
  - inventory
  - inefficient performance of a process
  - making defective items.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS402031A Interpret product costs in terms of customer requirements

## Links

The MSS Sustainability Companion Volume implementation Guides are available from VETNet: -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5b04f318-804f-4dc0-9463-c3fb9a3fe998>

## Assessment Requirements for MSS402031 Interpret product costs in terms of customer requirements

### Modification History

Release 1. Supersedes and is equivalent to MSS402031A Interpret product costs in terms of customer requirements.

Release 2. Unit code in Application updated. Equivalent outcome.

### Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, on **one (1)** or more occasions to recommend muda reduction related to their workplace, and to:

- identify and distinguish between cost components leading to customer benefit or otherwise
- take steps to minimise muda in their workplace.

### Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- contributions towards customer perceived benefit
- concepts of expense, income and capital
- fixed and variable cost components relevant to own work:
  - power/energy
  - materials, plant and equipment
  - production or process time, including impact of salary and wages
  - office expenses
  - government taxes and charges
- relative impact of each of these
- financial and non-financial impacts of cost reductions
- the difference between internally and externally controlled costs
- difference between overhead, labour and consumables.

### Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:

- a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
- multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

## MSS402051 Apply quality standards

### Modification History

Release 2. Mapping updated to include superseded unit (not equivalent to LMTGN2002B Apply quality standards)

Release 1. Supersedes and is equivalent to MSS402051A Apply quality standards

### Application

This unit of competency covers the skills and knowledge required to apply quality standards to work operations in an organisation. The unit is designed to complement competitive systems and practices units.

This unit applies to an individual who is expected to take responsibility for the quality of their own work, and to take actions specified in the procedures and within the scope of their job and authority to ensure that quality standards are met.

This unit requires the application of skills associated with interpreting and applying workplace standards and identifying and addressing problems that interfere with quality outcomes. The unit requires initiative, enterprise and self-management to ensure quality standards are achieved.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Competitive systems and practices

### Unit Sector

Not applicable

### Elements and Performance Criteria

Elements describe the      Performance criteria describe the performance needed to

essential outcomes.	demonstrate achievement of the element.
<b>1 Assess own work</b>	<p>1.1 Continuously check completed work against workplace standards relevant to the operation being undertaken.</p> <p>1.2 Demonstrate an understanding of how the work activities and completed work relate to the next production process or processes and to the final products or services concerned.</p> <p>1.3 Identify and isolate faulty components, products or processes.</p> <p>1.4 Record and/or report faults and any identified causes to the supervisor concerned, where required, in accordance with workplace procedures.</p>
<b>2 Assess quality of received components, parts or materials</b>	<p>2.1 Continuously measure/check received components, parts, materials, information, service or final products against workplace standards and specifications for conformance.</p> <p>2.2 Demonstrate an understanding of how the received components, parts or materials, information or service relate to the current operation and how they contribute to the final quality of the product or service.</p> <p>2.3 Identify and isolate faulty components, parts, materials or information that relate to the operator's work.</p> <p>2.4 Record and/or report faults and any identified causes in accordance with workplace procedures.</p> <p>2.5 Identify causes of any identified faults and take corrective action as specified in workplace procedures.</p>
<b>3 Investigate causes of quality deviations</b>	<p>3.1 Record information on quality and other indicators of process performance.</p> <p>3.2 Investigate and report causes of deviations from specified quality standards for components.</p> <p>3.3 Recommend suitable preventative action based on workplace quality standards and the identified causes of deviations from specified quality standards of materials.</p>

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Competitive systems and practices include one or more of:**

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

**Quality parameters include one or more of:**

- finish
- size
- durability
- product or process variations
- materials

- alignment
- colour
- damage and imperfections
- time
- is complete/contains all required information/data
- complies to template
- uses the correct styles and formats.

**Quality checks include one or more of:**

- visual inspection
- physical measurements
- chemical tests
- checks against patterns, templates, styles, formats and guides
- processing time.

**Materials include one or more of:**

- physical raw materials
- orders, forms and other documentation
- services required for undertaking an operation (e.g. power, water, compressed air and fuel).

**Procedures (written, verbal, visual, computer based, etc) include one or more of:**

- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions
- any similar instructions provided for the smooth running of the plant.

**Indicators of production performance include one or more of:**

- number of items/production rate
- delays and causes of delays (where known)
- other information as specified in the procedures.

**Data entry/recording includes one or more of:**

- keyboard
- written (including ticks or signs)
- verbal.

**Sources of information/documents include one**

- quality and Australian Standards and procedures
- work instructions, patterns, designs and recipes

- or more of:**
- organisation work procedures
  - manufacturer instructions for materials and equipment
  - organisational or external personnel
  - customer requirements.
- Investigate and report requires following set procedures which include one or more of:**
- verbal instructions
  - documented procedures
  - other quality procedures as implemented within an organisation or work environment.
- Workplace context includes one or more of:**
- work organisation procedures and practices relating to the manufacture and quality outcomes for products
  - conditions of service, legislation and industrial agreements, including:
    - workplace agreements and awards
    - federal or state/territory legislation
    - standard work practice.
- Reporting/communication includes one or more of:**
- verbal and written communication in accordance with organisational policies and procedures
  - oral, written or visual communication, including simple data.
- Being responsible for the maintenance of own work quality includes one or more of**
- contributing to the quality improvement of team or section output, where necessary, in accordance with workplace procedures
  - following safety, environmental, housekeeping and quality procedures as specified by materials/machine/equipment manufacturers, regulatory authorities and the organisation.
- Applicable regulations and legislation include one or more of**
- work health and safety (WHS) legislation relevant to workplace activities
  - workers compensation legislation.

## Unit Mapping Information

Release 2. Mapping updated to include supersedes and not equivalent to LMTGN2002B  
Apply quality standards

# Assessment Requirements for MSS402051 Apply quality standards

## Modification History

Release 2. Mapping updated to include superseded unit (not equivalent to LMTGN2002B Apply quality standards)

Release 1. Supersedes and is equivalent to MSS402051A Apply quality standards

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more products/processes, to:

- check and measure relevant quality parameters
- interpret results of quality checks in terms of specifications, patterns and work standards
- take required action where standards of materials, component parts, final product or work processes are found to be unacceptable
- maintain accurate records.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- relevant quality standards, policies and procedures
- relevant production processes, materials and products
- relevant measurement techniques and quality checking procedures
- reporting procedures.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the application of quality standards to own workplace

- will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations. Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# **MSS402052 Implement continuous improvements based on standardised work practices**

## **Modification History**

Release 1. Supersedes and is equivalent to MSS402052A Implement continuous improvements based on standardised work practices

## **Application**

This unit of competency covers the basic skills and knowledge required for individuals to apply standardised work practices as part of implementing continuous improvement in an organisation.

The implementation of standardised work may apply in a manufacturing, office, logistics or other service environment along any part of the value stream. It applies to the person's own job at whatever organisational level they are employed. The standard work procedures may apply to every step of the job or it may apply to procedures which allow discretion in the application.

The person will typically be working closely with others, as part of a formal team, an ad hoc team or otherwise. They will liaise and communicate with these others as required by the job and standard procedures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## **Pre-requisite Unit**

|--|---|
| <b>1 Identify standardised procedures applicable to work</b> | <ul style="list-style-type: none"><li>1.1 Identify current operation and tasks in own work.</li><li>1.2 Check each operation and task to ensure it is required to meet customer need.</li><li>1.3 Select relevant procedures applicable to operations and tasks to meet customer, regulatory and other required needs.</li><li>1.4 Obtain takt time required for each selected operational step and task and compare with available time.</li><li>1.5 Incorporate takt time and selected operational step and task in daily work plan, as appropriate.</li><li>1.6 Take required action when time to complete operational steps and tasks exceeds takt time.</li><li>1.7 Liaise with relevant people regarding need to undertake any operations and tasks not directly related to customer benefit.</li></ul> |
| <b>2 Follow standardised practices</b>                       | <ul style="list-style-type: none"><li>2.1 Complete own required operations following standardised procedures and practices.</li><li>2.2 Note factors preventing the full application of standardised procedures and practices.</li><li>2.3 Identify variability in actual processes and products.</li><li>2.4 Identify waste which arises from following standard procedures and practices.</li></ul>   |
| <b>3 Make improvements</b>                                   | <ul style="list-style-type: none"><li>3.1 Suggest possible improvements for identified problems in accordance with continuous improvement procedures.</li><li>3.2 Check suggested improvement in accordance with continuous improvement procedures.</li><li>3.3 Examine outcome of checking process and standardise improvement, if appropriate.</li></ul>  |

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Competitive systems and practices include one or more of:**
- lean operations
  - agile operations
  - preventative and predictive maintenance approaches
  - statistical process control systems, including six sigma and three sigma
  - Just in Time (JIT), kanban and other pull-related operations control systems
  - supply, value, and demand chain monitoring and analysis
  - 5S
  - continuous improvement (kaizen)
  - breakthrough improvement (kaizen blitz)
  - cause/effect diagrams
  - overall equipment effectiveness (OEE)
  - takt time
  - process mapping
  - problem solving
  - run charts
  - standard procedures
  - current reality tree.

- Customer includes one or more of:**
- internal customers
  - external customers
  - the final customer.

- Procedures (written, verbal, visual, computer based, etc.) include one or any combination of:**
- work instructions
  - standard operating procedures (SOPs)
  - safe work method statements
  - formulas/recipes
  - batch sheets
  - temporary instructions
  - any similar instructions provided for the smooth running of the plant.
- Takt time (the time required to complete one job cycle if the customer's time and volume expectations are to be met) includes one or more of:**
- time per piece where applied to piece work
  - time per tonne or litre when applied to bulk product
  - time per work item when applied to an office or service environment
  - deadlines required to meet delivery dates when applied to project work
  - target cycle time for sporadic processes or processes not linked to a customer requirement (e.g. a regulatory requirement)
  - other measures appropriate to the process.
- Required action includes one or more of:**
- reporting to appropriate person
  - prioritising work according to standardised procedures
  - acquiring/allocating additional resources according to standardised procedures
  - other actions specified in the procedures.
- Causes of time to complete exceeding takt time include one or more of:**
- cycle time (mean time taken to actually do the job) is longer than takt time
  - multiple jobs required in the same timeframe (i.e. priority conflict)
  - takt time cannot be met with resources available
  - takt time is longer than available time.
- Variability includes one or more of:**
- different times taken to do the same thing
  - different effort taken to do the same thing
  - different results from applying the same effort (i.e. variation in quality)
  - amount of rework required.
- Muda (waste)**
- activity that does not contribute to value as perceived by the customer

- includes all of:**
- overproduction
  - waiting
  - transporting
  - inappropriate processing
  - unnecessary inventory
  - excess motion
  - defects
  - underutilised employees.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS402052A Implement continuous improvements based on standardised work practices

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5b04f318-804f-4dc0-9463-c3fb9a3fe998>

# Assessment Requirements for MSS402052 Implement continuous improvements based on standardised work practices

## Modification History

Release 1. Supersedes and is equivalent to MSS402052A Implement continuous improvements based on standardised work practices

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to suggest two (2) or more improvements and to:

- use standardised procedures
- identify variability and muda
- develop a daily plan using takt time and available time.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- determination and use of takt time
- determination and use of available time
- identification of variability and muda
- approaches to continuous improvement.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include suggesting continuous improvements in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.
- Assessment should occur in operational workplace situations.

- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# **MSS402081 Contribute to the application of a proactive maintenance strategy**

## **Modification History**

Release 1. Supersedes and is equivalent to MSS402081A Contribute to the application of a proactive maintenance strategy

## **Application**

This unit of competency covers the skills and knowledge required by an individual to make a positive contribution to proactive maintenance strategies, including actions that contribute to equipment uptime and overall equipment effectiveness (OEE). This unit applies in an organisation which is following a predictive, preventative or reliability-centred maintenance strategy and which requires commitment from all employees. The employee should 'own' their equipment/plant and take an active part in the implementation of the strategy within the scope of their authority.

This unit requires the application of skills associated with accessing and maintaining equipment/plant documentation. It also requires problem solving, initiative and enterprise to continually monitor and maintain operational performance of equipment/plant used in work role.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## **Pre-requisite Unit**

Nil

## **Competency Field**

Competitive systems and practices

## **Unit Sector**

Not applicable

## **Elements and Performance Criteria**

Elements describe the      Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

- |   |   |   |
|---|---|---|
| 1 | <b>Maintain equipment/plant</b>   | <p>1.1 Keep equipment/plant within area of responsibility clean.</p> <p>1.2 Ensure equipment/plant is serviced and adjusted, as required, in accordance with procedures and own level of responsibility.</p> <p>1.3 Access manufacturer manuals and specifications, where required, to expand knowledge on the maintenance of equipment/plant.</p> <p>1.4 Access and update documentation on equipment/plant operation and maintenance in accordance with workplace procedures.</p> |
| 2 | <b>Monitor operation of equipment/plant</b>                             | <p>2.1 Regularly check key conditions of the equipment/plant as defined in workplace procedures.</p> <p>2.2 Regularly check equipment/plant OEE.</p> <p>2.3 Note any deviation from conditions specified in procedures.</p>   |
| 3 | <b>Identify deviations and patterns</b>                                 | <p>3.1 Identify any previous occurrences of a deviation.</p> <p>3.2 Identify any related deviations which have occurred.</p> <p>3.3 Identify any unusual occurrence which may be related to a deviation.</p>  |
| 4 | <b>Take action appropriate to competency and authority on deviation</b> | <p>4.1 Liaise with relevant people regarding the deviation and the solution.</p> <p>4.2 Implement solution and/or assist with the implementation of the solution, as appropriate.</p>   |

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Competitive systems and practices include one or more of:**

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- OEE
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

**Uptime includes one or more of:**

- the overall availability of the plant
- the inverse of downtime or the unavailability of the plant
- the fraction, percentage or time the plant is available for production.

**Procedures (written, verbal, visual, computer based, etc.) include one or any combination of:**

- work instructions
- standard operating procedures (SOPs)
- safe work method statements
- formulas/recipes
- batch sheets
- temporary instructions

- any similar instructions provided for the smooth running of the plant.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS402081A Contribute to the application of a proactive maintenance strategy

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSS402081 Contribute to the application of a proactive maintenance strategy

## Modification History

Release 1. Supersedes and is equivalent to MSS402081A Contribute to the application of a proactive maintenance strategy

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include the ability to monitor equipment/plant in one (1) or more areas, and to:

- maintain the equipment/plant to the required standard
- identify deviations in OEE requiring action
- take the action required by the procedures.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role under routine only supervision, including:

- interpretation of trends or other non-random variation
- determining OEE (availability x performance x quality rate) and uptime metrics
- principles of operation of plant/equipment and factors likely to cause deviations in performance
- identifying deviations requiring action
- appropriate actions for dealing with deviations.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include the application of proactive maintenance in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.

- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# MSS402082 Apply cost factors to work practices

## Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Application

This unit describes the skills and knowledge to identify cost components in work practices and determine, in general terms, the cost impacts of alternative actions.

The unit applies to assessing the relative costs of the alternatives and using this as one of the key factors in making decisions. Decisions are made within the scope of the employee's authority and according to procedures. Typical decisions include those that contribute to the efficient organisation of own work and the improvement of production time and cycle times.

Employees are required to use problem solving to identify cost factors and cost implications of own work and self-management to apply cost-effective practices.

This unit applies to an individual who is required to contribute to, and be involved in, the assessment of cost factors in their work. This may be done individually or in a team environment.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

Nil

## Competency Field

Competitive systems and practices

## Unit Sector

Not applicable

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 **Identify the major cost**

1.1 Identify cost components in the product or process in own work area

<p>Elements describe the essential outcomes.</p> <p><b>components of product or process in own work area</b></p>	<p>Performance criteria describe the performance needed to demonstrate achievement of the element.</p>
<p>2 <b>Identify constraints to cost-efficiency</b></p>	<p>1.2 Recognise the impact of current or alternative actions on costs</p> <p>2.1 Identify required production or process rate and major costs</p> <p>2.2 Identify costs factors under individual or team control</p> <p>2.3 Relate identified costs factors to impact on overall cost of production or process</p> <p>2.4 Identify cost factors that are a constraint to cost-efficiency in own work area</p>
<p>3 <b>Apply cost-efficient work practices</b></p>	<p>3.1 Identify and explain to relevant people the implications of actions and changes to improve cost-efficiency in simple financial terms</p> <p>3.2 Identify non-financial implications of proposed changes in discussion with relevant people</p> <p>3.3 Select actions which minimise overall costs</p> <p>3.4 Monitor actions to ensure cost-efficiency in own work area is maintained</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS402030 Apply cost factors to work practices.

# Assessment Requirements for MSS402082 Apply cost factors to work practices

## Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- identified cost factors and cost implications of at least 1 product or process in own work and applied cost-effective practices.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- concepts of expense, income and capital
- relative impact of fixed and variable cost components relevant to own work, including:
  - power and energy
  - materials, plant and equipment
  - production or process time, including impact of salary and wages
  - office expenses
  - government taxes and charges
- financial and non-financial impacts of cost reductions
- the difference between internally and externally controlled costs
- difference between overhead, labour and consumables.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## **MSS403021 Facilitate a Just in Time system**

### **Modification History**

Release 1. Supersedes and is equivalent to MSS403021A Facilitate a Just in Time system

### **Application**

This unit of competency covers the skills and knowledge required to facilitate the implementation/operation of a Just in Time (JIT)/kanban system in a team or work area.

This unit applies to a person who needs to monitor the operation of a JIT system and facilitate its working in a team or work area. This will involve liaison with stakeholders as well as examining the data generated and being alert to potential problems and areas for improvement.

This unit requires the application of skills associated with gathering, analysing and communicating information to facilitate implementation of the JIT system. It requires planning and organising skills and has a strong emphasis on communication and teamwork skills to ensure the JIT system is being effectively implemented. This unit also requires the ability to problem solve and take the initiative to consider performance issues and learn from experience to improve future performance.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

### **Competency Field**

### **Elements and Performance Criteria**

Elements describe the      Performance criteria describe the performance needed to

essential outcomes.	demonstrate achievement of the element.
1 <b>Monitor the operation of the JIT system</b>	1.1     Track value of key measures.
	1.2     Recognise indicators of poor performance.
	1.3     Take appropriate quick fix action.
2 <b>Liaise with relevant stakeholders</b>	2.1     Regularly communicate with team or work group members regarding the operation of the JIT system.
	2.2     Review JIT key performance indicators (KPIs) with team or work group members.
	2.3     Communicate with relevant personnel up and down the value stream regarding the operation of the JIT system.
	2.4     Identify issues with stakeholders and take appropriate quick fix action.
3 <b>Improve the JIT system</b>	3.1     Identify areas requiring improvement in the JIT system.
	3.2     Identify root cause of JIT-related problems.
	3.3     Review value of key measures.
	3.4     Recognise skill gaps in team members and other stakeholders.
	3.5     Determine any other issues in team or work group, other stakeholders and JIT system leading to poor performance indicators.
	3.6     Develop appropriate improvement solutions.
	3.7     Liaise with relevant people regarding improvement solutions.
	3.8     Implement and/or assist with the implementation of the solutions.

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Competitive systems and practices include one or more of:**
- lean operations
  - agile operations
  - preventative and predictive maintenance approaches
  - statistical process control systems, including six sigma and three sigma
  - Just in Time (JIT), kanban and other pull-related operations control systems
  - supply, value, and demand chain monitoring and analysis
  - 5S
  - continuous improvement (kaizen)
  - breakthrough improvement (kaizen blitz)
  - cause/effect diagrams
  - overall equipment effectiveness (OEE)
  - takt time
  - process mapping
  - problem solving
  - run charts
  - standard procedures
  - current reality tree.

- Key measures include one or more of:**
- inventory levels
  - lead time
  - In Full, On Time and In Specification (IFOTIS) delivery
  - productivity/production rate
  - other measures of pull through the value stream
  - quality.

- Stages where value stream actions can occur include one or more of**
- sales outlet/representative
  - information gathering, data analysis and research
  - product design
  - raw material sourcing
  - intermediate processing
  - final assembler/collation/preparation
  - support services (e.g. accounting, finance and legal)
  - storage and delivery to customer
  - after market support.

## Unit Mapping Information

# Assessment Requirements for MSS403021 Facilitate a Just in Time system

## Modification History

Release 1. Supersedes and is equivalent to MSS403021A Facilitate a Just in Time system

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for three (3) or more JIT related improvements, to:

- identify the JIT system and practices used in own work area
- identify and monitor JIT key measures
- solve JIT-related problems to root cause
- communicate effectively with stakeholders
- facilitate and monitor JIT-related changes to operations and practices.

## Knowledge Evidence

Must provide evidence that demonstrates knowledge relevant to their job role sufficient to fulfil their job role independently, including:

- JIT methods relevant to own work area
- production data generated by the process and its application to JIT
- methods of gathering data against key performance indicators (KPIs)
- facilitation techniques to encourage work group development and improvement.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence:
  - should occur over a range of situations which include typical disruptions to normal, smooth operation of the workplace
  - will typically include a supervisor/third-party report focussing on consistent performance and problem recognition and solving. A supervisor/third-party report must be prepared by someone who has a direct, relevant, current relationship with the person being assessed and who is in a position to form a judgement on workplace performance relevant to the unit of competency
  - must include facilitating the implementation of a Just in Time (JIT) system in own workplace
  - will typically include the use of appropriate tools, equipment and safety gear requiring demonstration of preparation, operation, completion and responding to problems.

- Assessment should occur in operational workplace situations.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

# MSS403087 Mistake proof an operational process

## Modification History

Release 1. Updated unit code. Changes to elements and performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Application

This unit describes the skills and knowledge to analyse a process that a team is responsible for and determine methods of mistake proofing it. This includes determining, implementing and sustaining improvement activities.

The person will typically be a technical expert, team leader or be in a role where they have sufficient technical understanding of processes in their own work and that of others to be able to mistake proof the production process in their area.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

Nil

## Competency Field

Competitive systems and practices

## Unit Sector

Not applicable

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |                        |     |  |
|---|------------------------|-----|--|
| 1 | <b>Analyse process</b> | 1.1 | Identify sources of variability and non-conformance in the process |
|   |                        | 1.2 | Identify critical control points in process                        |
|   |                        | 1.3 | Analyse causes of variability and non-conformance                  |

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
2 <b>Develop preventative options</b>	2.1    Liaise with team members and other people to develop mistake proof options for performing operation 2.2    Test and validate mistake proofing options
3 <b>Implement permanent fix</b>	3.1    Liaise with relevant people to have systems and procedures changed to implement solution 3.2    Liaise with relevant people to implement the solution 3.3    Liaise with relevant people to ensure self and others in the team or work area have appropriate skills 3.4    Follow through to ensure implementation occurs
4 <b>Monitor implementation</b>	4.1    Critically observe the implementation 4.2    Compare the results of the implementation against the expected outcomes 4.3    Modify solution to improve outcomes 4.4    Confirm procedures reflect change 4.5    Confirm training and assessment reflects change 4.6    Audit change at agreed period or cycle 4.7    Address any observed deviation
5 <b>Seek improvements</b>	5.1    Observe and monitor changes 5.2    Analyse process again to ensure improvements are sustained

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

# Assessment Requirements for MSS403087 Mistake proof an operational process

## Modification History

Release 1. Updated unit code. Changes to elements and performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- mistake proofed (applied baka yoke or poka yoke) to at least 1 operational process.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- baka yoke and poka yoke approaches
- factors causing variability in the process and methods of controlling it
- error causes and control options
- cost benefit analysis, feasibility, regulatory compliance and perceived value to the customer
- validation of baka yoke and poka yoke proposals.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## MSS404054 Apply statistics to operational processes

### Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS404052 Apply statistics to operational processes.

### Application

This unit describes the skills and knowledge required to gather and analyse process data to support the control of processes and operations. It includes interpretation of sampling procedures, frequency distributions, random and non-random variations in data/control charts; use of control limits to determine whether monitored processes are in control; and communicating this information to others.

This unit applies to a person working in an organisation applying statistical process control on processes or operations. The statistical process control will usually be used to monitor the processes or operations and determine when action needs to be taken. The appropriate action will then be taken in accordance with standard procedures.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

Nil.

### Competency Field

Competitive systems and practices

### Unit Sector

### Elements and Performance Criteria

Elements	Performance Criteria	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Collect process data	1.1	Read and interpret sampling scheme
	1.2	Obtain measurements in accordance with standard sampling procedures

	1.3	Handle data in accordance with procedures
2. Interpret data	2.1	Plot data on control chart
	2.2	Identify random and non-random patterns of results
	2.3	Identify results outside the control limits
	2.4	Identify situations requiring action
	2.5	Take action in accordance with procedures
	2.6	Calculate cost of non-conformance
3. Calculate control limits	3.1	Consult stakeholders to determine appropriate limits
	3.2	Calculate and revise control limits
	3.3	Plot limits on control chart and complete all records in accordance with procedures
	3.4	Explain impact of limit to stakeholders

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

## Unit Mapping Information

Supersedes and is equivalent to MSS404052 Apply statistics to operational processes.

## Links

# Assessment Requirements for MSS404054 Apply statistics to operational processes

## Modification History

Release 1. Unit code changed. Application changed. Performance criteria changed. Range of conditions removed. Assessment requirements changed. Supersedes and is equivalent to MSS404052 Apply statistics to operational processes.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- gathered, analysed and interpreted process data to monitor and control at least 2 operational processes.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- purpose of sampling and measurement
- sampling methods to be used
- methods of calculating mean and standard deviation and their purpose in statistical control
- concept of limits, including 1, 2, 3 and 6 sigma limits
- types of control charts and their applications to different types of process and product and for different purposes
- process causes of variation and typical cause types of non-random variation
- non-process causes of variation
- stable and unstable processes
- causes of stability and instability in the process
- calculation of control limits and process capability and the applications of different control limits
- standard distribution curve and confidence limits.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSS404084 Undertake process capability improvements

## Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Application

This unit describes the skills and knowledge required to make process capability improvements, including analysing data from the process, developing improvements to eliminate variation due to assignable causes and then implementing actions.

This unit applies to a person who reviews a range of process capability data and information and makes (or arranges for) changes to be made to procedures, equipment or process and then recalculates the process capability and monitors resulting improvement actions. The person will typically be a technical expert, team leader or be in a role where they have sufficient technical understanding of processes in their own work and that of others to be able to suggest and justify process capability improvements.

Process capability may have been determined using either a six sigma or three sigma processes. This unit applies to the application of statistical methods and the determination of capability based on those methods.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

## Pre-requisite Unit

Nil

## Competency Field

Competitive systems and practices

## Unit Sector

Not applicable

## Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1	<b>Obtain required</b>	1.1	Identify process for study
---	------------------------	-----	----------------------------

Elements describe the essential outcomes.		Performance criteria describe the performance needed to demonstrate achievement of the element.
<b>data</b>		1.2 Obtain or organise process to obtain required data and information
<b>2 Analyse information</b>	2.1	Read and interpret data and determine assignable causes
	2.2	Develop possible improvements to eliminate assignable causes
	2.3	Develop process improvement proposals
<b>3 Improve process capability</b>	3.1	Obtain required authorisations to implement improvements
	3.2	Liaise with relevant people to implement improvements
	3.3	Obtain or organise required data for improved process
	3.4	Recalculate process capability
	3.5	Implement revised data collection and processing and new capability information
	3.6	Monitor improvement actions and adjust

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS404050 Undertake process capability improvements.

## Links

The MSS Sustainability Companion Volume implementation Guides are available from VETNet: -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5b04f318-804f-4dc0-9463-c3fb9a3fe998>

# Assessment Requirements for MSS404084 Undertake process capability improvements

## Modification History

Release 1. Updated unit code. Changes to performance criteria. Range of conditions removed. Assessment requirements amended. Equivalent outcome.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- planned and implemented at least 1 process capability improvement.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- data collection and manipulation techniques
- variability, normal distribution and three and six sigma limits
- type of variations:
  - random variation (no assignable cause)
  - non-random variation (which has an assignable cause).
- causes of non-random variation in the process
- approaches to reducing variability.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions, contingencies, facilities, equipment and resources.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## Links

The MSS Sustainability Companion Volume implementation Guides are available from VETNet: -

# MSS405022 Design a process layout

## Modification History

Release 1. Supersedes and is equivalent to MSS405022A Design a process layout

## Application

This unit of competency covers the skills and knowledge required to design a process layout, typically a cellular flow, for either a jobbing shop or a continuous process manufacturer. This unit provides the skill for a technical expert to apply the principles of competitive systems and practices to process design layout as distinct from volume production layout. While the application of the unit may be for an initial layout, in many cases it is likely to be for the redesign of an existing layout.

The unit is written on the assumption that there is an existing process. Where this is not the case, then additional competency in equipment/process design and selection will also be required through units from an appropriate technical qualification or Training Package.

This unit requires the application of skills associated with problem solving, initiative, enterprise, planning and organising in order to design a process for the manufacture of enterprise products that incorporates team operations, product flow, infrastructure and the layout of the physical environment and related technology. This unit has a strong emphasis on gathering, analysing and applying information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Competitive systems and practices

## Unit Sector

Not applicable

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |   |
|---|---|
| <b>1 Identify the products and processes used in the organisation</b> | 1.1 Obtain or develop a process map of the existing process.  |
|   | 1.2 Identify all/main products/classes of products.   |
|   | 1.3 Obtain forecast sales and sales pattern of products/classes.  |
|   | 1.4 Obtain profiles of products/classes.  |
|   | 1.5 Group the products/classes into compatible families.  |
| <b>2 Engineer the process</b>   | 2.1 Make a preliminary selection of required equipment/technology/ process for each process or product family.                                      |
|   | 2.2 Estimate required resource times for each family.   |
|   | 2.3 Calculate total resourcing required for each family.  |
|   | 2.4 Estimate appropriate lot size.  |
|   | 2.5 Determine viability of proposed families.   |
|   | 2.6 Examine draft proposal for possible improvements in process consistent with the competitive systems and practices strategy of the organisation. |
| <b>3 Design the infrastructure</b>                                    | 3.1 Consult on layout needs with all stakeholders.  |
|   | 3.2 Identify physical infrastructure required by system.  |
|   | 3.3 Identify information and control infrastructure required.   |
|   | 3.4 Identify work organisation required.  |
|   | 3.5 Identify work health and safety (WHS) and other regulatory requirements to be taken into account.   |
|   | 3.6 Identify workforce development and training requirements.   |

- 3.7 Check the availability of required infrastructure and compatibility with requirements.
- 4 **Lay out the process**
  - 4.1 Draft proposed process flow map.
  - 4.2 Draft proposed configuration diagram.
  - 4.3 Draft proposed space plan/layout.
  - 4.4 Check availability of services/structural suitability, as appropriate.
  - 4.5 Validate proposed layout with all relevant stakeholders.
  - 4.6 Layout the process/work cell.
  - 4.7 Develop implementation plan in liaison with relevant stakeholders.
  - 4.8 Review layout after implementation.

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Competitive systems and practices include one or more of:**

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations

- control systems
  - supply, value, and demand chain monitoring and analysis
  - 5S
  - continuous improvement (kaizen)
  - breakthrough improvement (kaizen blitz)
  - cause/effect diagrams
  - overall equipment effectiveness (OEE)
  - takt time
  - process mapping
  - problem solving
  - run charts
  - standard procedures
  - current reality tree.
- Profiles of products include consideration of all of:**
- components/materials needed to manufacture
  - equipment/technology/processes required to manufacture
  - volume of activity to manufacture forecast amount
  - required operations equipment/technology/processes.
- Required resource times include consideration of all of:**
- set-up time
  - equipment time
  - person time
  - process time.
- Lot size includes one or more of:**
- external lot size
  - internal lot size
  - transfer batch size
  - kanban size.
- Viability includes consideration of all of:**
- appropriate calculated processing times
  - adequacy of equipment utilisation
  - acceptable maintenance implications
  - ability to meet WHS requirements
  - ability to meet environmental requirements
  - compliance with any legislative and regulatory requirements
  - acceptable to stakeholders.
- Stakeholders include one or more**
- customers
  - employees

- of:**
- equipment suppliers and contractors (especially if new equipment required)
  - regulatory authorities
  - local community representatives
  - utilities (e.g. water and power).

- Physical infrastructure includes one or more of:**
- containers/packaging
  - material handling equipment (e.g. pipes, tanks, conveyors and hoppers)
  - utilities supply (e.g. steam, air, gas, electricity and water).

- Information and control infrastructure includes one or more of:**
- quality assurance
  - statistical process control (SPC)/six sigma
  - planning systems/software
  - data collection and control systems/software.

- Work organisation includes all of:**
- number of personnel
  - skills/capability mix of workforce.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSS405022A Design a process layout

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=5b04f318-804f-4dc0-9463-c3fb9a3fe998>

# Assessment Requirements for MSS405022 Design a process layout

## Modification History

Release 1. Supersedes and is equivalent to MSS405022A Design a process layout

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to design a layout for one (1) or more processes and to:

- identify products and processes
- engineer the process
- design the infrastructure
- lay out the process.

## Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to design a process layout, including knowledge of:

- customer requirements in terms of order size and order pattern
- processing requirements for products
- equipment capabilities and reliability
- workforce capabilities and reliability
- business requirements from layout
- work health and safety (WHS) and other regulatory requirements
- principles of process layout.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
  - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real process layout project for an operational workplace.

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

## MSS405075 Facilitate the development of a new product

### Modification History

Release 2. Updated pre-requisite code

Release 1. Supersedes and is equivalent to MSS405075A Facilitate the development of a new product

### Application

This unit of competency covers the skills and knowledge required to facilitate the development of a new or evolutionary product within an existing range of products and encompasses design for manufacture, determining the process capability and the facilitation of its initial production.

This unit applies to an individual responsible for the development of a new product. The unit assumes an initial product design has been prepared by a designer and also assumes a working knowledge of all main processes and materials so that an informed choice can be made between them. The person will normally be a manager or technical expert and be required to work closely with a range of other management and operations personnel.

The unit requires balancing the business and technical sides of the new product and would typically be done as part of a cross-functional team. This unit primarily requires the application of skills associated with communication in gathering, analysing and applying information and consulting with stakeholders. Teamwork, problem solving, initiative and enterprise, and planning and organising are required to facilitate the development of a new product. This unit also requires aspects of self-management and learning to ensure feedback and new learning is integrated into competitive systems and practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

MSS404054            Apply statistics to operational processes

### Competency Field

Competitive systems and practices

## Unit Sector

Not applicable

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |   |   |
|---|---|---|
| 1 | <b>Confirm design brief of new product in consultation with relevant people</b> | <p>1.1 Review product design with customer and other key stakeholders and agree on technical specification, aesthetic requirements, timelines, cost and other market requirements.</p> <p>1.2 Determine any regulatory, industry code/intellectual property (IP) requirements for product.</p> <p>1.3 Identify any required tooling, process or equipment needs.</p> <p>1.4 Confirm design brief, including relevant drawings, to meet needs.</p> <p>1.5 Determine design brief conforms to organisation objectives and capability.</p> <p>1.6 Obtain approval on total design brief from all relevant personnel.</p> |
| 2 | <b>Determine material requirements for product</b>                              | <p>2.1 Select appropriate materials or combination of materials/components in liaison with key stakeholders.</p> <p>2.2 Determine material/component testing and evaluation regime required to meet product end use requirements, including regulatory/industry code requirements.</p> <p>2.3 Arrange for testing and evaluation of trial materials/components.</p> <p>2.4 Guide material trial process and interpret material trial results.</p> <p>2.5 Determine final materials/components specifications and details of value chain.</p>  |

- |   |   |     |  |
|---|---|-----|--|
| 3 | <b>Determine process requirements for product</b>         | 3.1 | Select appropriate process to make product in liaison with key stakeholders and based on relevant factors. |
|   |   | 3.2 | Determine any special process/equipment requirements for this product.                                     |
|   |   | 3.3 | Communicate with production personnel to determine any concerns and/or training or other needs.            |
|   |   | 3.4 | Adjust the design, as required, to satisfy customer and production needs.                                  |
|   |   |     |  |
| 4 | <b>Ensure process needs for new product have been met</b> | 4.1 | Liaise with equipment design/procurement personnel.  |
|   |   | 4.2 | Interpret hardware specifications and ensure they are appropriate for the job required.                    |
|   |   | 4.3 | Liaise with process personnel to ensure appropriate draft procedures for new product have been developed.  |
|   |   | 4.4 | Validate product cost and design meets organisation requirements and capability.                           |
|   |   |     |  |
| 5 | <b>Trial new product through the process</b>              | 5.1 | Design trialling procedure to deliver required information.  |
|   |   | 5.2 | Liaise with relevant stakeholders.   |
|   |   | 5.3 | Ensure health, safety and environment (HSE) requirements are observed.                                     |
|   |   | 5.4 | Coordinate the trialling of the new product.   |
|   |   | 5.5 | Interpret product trial results and guide product trial process.   |
|   |   | 5.6 | Tune process to optimise production of new product.  |
|   |   |     |  |
| 6 | <b>Determine process capability</b>                       | 6.1 | Plot appropriate statistical process control charts.   |
|   |   | 6.2 | Determine confidence limits.   |
|   |   | 6.3 | Compare confidence limits with product specification.  |

- |   |  |  |
|---|--|--|
| 7 | <b>Coordinate product trials</b>                     | 7.1 Determine product testing and evaluation regime required to meet end use requirements, including regulatory/industry code requirements.  |
|   |  | 7.2 Arrange for testing and evaluation of trial product/prototype.   |
|   |  | 7.3 Interpret product trial results and guide product trial process.   |
|   |  | 7.4 Determine final product specification in liaison with key stakeholders.  |
|   |  | 7.5 Make required changes to materials, process and equipment.   |
| 8 | <b>Implement standard procedures for new product</b> | 8.1 Monitor initial production and, in liaison with appropriate team members, adjust process, conditions and materials to ensure the product and process outcomes conform to customer, regulatory and organisation requirements. |
|   |  | 8.2 Ensure process specifications are updated and reflect the optimised operation developed.   |
|   |  | 8.3 Ensure standard operating procedures (SOPs) are correct for the new product.   |
|   |  | 8.4 Ensure equipment and other hardware records are updated to reflect additions/changes.  |
|   |  | 8.5 Ensure project records are complete and all required reports have been completed and submitted.  |
|   |  | 8.6 Archive records according to company procedure.  |

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Competitive systems and practices include one or more of:**

- lean operations
- agile operations
- preventative and predictive maintenance approaches
- statistical process control systems, including six sigma and three sigma
- Just in Time (JIT), kanban and other pull-related operations control systems
- supply, value, and demand chain monitoring and analysis
- 5S
- continuous improvement (kaizen)
- breakthrough improvement (kaizen blitz)
- cause/effect diagrams
- overall equipment effectiveness (OEE)
- takt time
- process mapping
- problem solving
- run charts
- standard procedures
- current reality tree.

**Organisation objectives and requirements include one or more of:**

- cost/profit requirements for new products (e.g. minimum return and capital expenditure limits)
- encouragement/discouragement of different types of products (e.g. on sustainability, ethical or other non-individual customer-related criteria)
- potential or actual capacity conflicts with other customers or product/process activities
- activities that require/may require community consultation (e.g. on noise or other environmental grounds).

**Typical regulatory requirements include one or more**

- work health and safety (WHS)
- environmental regulations
- structural codes

**of:**

- product/industry-specific requirements.

**Typical problems include one or more of:**

- defining product end-use requirements in terms meaningful to the product design and manufacture
- matching suitable materials and processes to the product needs and company expertise and facilities
- matching (and improving) process capability to product tolerances.

**Relevant factors include one or more of**

- type of material
- dimensional precision of product
- length of run/number of products
- required aesthetics
- size and complexity of product
- available capital funding
- process equipment available
- HSE factors.

## Unit Mapping Information

Release 2. Equivalent to Release 1

Release 1. Supersedes and is equivalent to MSS405075A Facilitate the development of a new product

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSS405075 Facilitate the development of a new product

## Modification History

Release 2. Updated pre-requisite code

Release 1. Supersedes and is equivalent to MSS405075A Facilitate the development of a new product

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability to facilitate the development of one (1) or more new/modified products and to:

- confirm the design brief
- determine material and process requirements
- ensure process needs have been met
- trial the new product and determine process capability
- conduct product trials
- standardise the new product.

## Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to facilitate the development of a new product, including knowledge of:

- appropriate types of materials/components and criteria for choosing between them
- alternative processes/plant/equipment for making the new product and criteria for choosing between them
- determination of process capability
- appropriate sampling and testing for materials/components and products
- determination of processing time, product cost, benefit cost of the new product
- interpretation of trial/field test results.

## Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
  - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria

- multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.
- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real new/modified product development project in an operational workplace.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
  - relevant VET or other qualification/Statement of Attainment AND/OR
  - relevant workplace experience
- Currency can be demonstrated through:
  - performing the competency being assessed as part of current employment OR
  - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.

## **MSTGN2005 Perform minor maintenance**

### **Modification History**

Release 1. Supersedes and is equivalent to LMTGN2005B Perform minor maintenance

### **Application**

This unit of competency covers skills and knowledge to provide minor maintenance of production machines.

The unit of competency applies to checking machine performance and undertaking minor adjustments to production machines.

Work involves limited discretion, initiative and judgement on the job in own work, including liaison with specialist mechanics and technicians.

Work may be conducted in a variety of environments, such as operational workplace activities, restricted space and hazardous, controlled or exposed conditions.

Work may be undertaken on a range of machines that may include microprocessor or computer controls.

This unit of competency is applicable to all sectors of the textiles, clothing and footwear (TCF) industry.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

### **Competency Field**

Generic

## Unit Sector

Not applicable

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	<b>Determine job requirements</b>	<p>1.1 Follow standard operating procedures (SOPs)</p> <p>1.2 Comply with work health and safety (WHS) requirements at all times</p> <p>1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs</p> <p>1.4 Identify job requirements from specifications, drawings, job sheets or work instructions</p>
2	<b>Operate machine and assess performance</b>	<p>2.1 Start and stop machine according to manufacturer requirements</p> <p>2.2 Monitor machine operation and production readings to ensure correct procedures are assessed and product meets quality standards</p> <p>2.3 Identify and report problem with machine</p>
3	<b>Rectify minor machine fault</b>	<p>3.1 Identify, address and report minor tool faults in machine and associated equipment, where necessary, to meet specified requirements</p> <p>3.2 Identify, document and report major machine or product faults and inform appropriate personnel</p> <p>3.3 Complete machine maintenance records and other documentation accurately</p>
4	<b>Maintain effective machine operation</b>	<p>4.1 Clean machine according to WHS practices and schedules, workplace procedures and manufacturer cleaning instructions</p>

- 4.2 Lubricate machine according to workplace requirements and schedules, workplace procedures and manufacturer lubricating instructions
- 4.3 Check machine to ensure correct operation

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Workplace procedures include one or more of the following:**

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

**Australian Standards include:**

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

## Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTGN2005B Perform minor maintenance

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for MSTGN2005 Perform minor maintenance

## Modification History

Release 1. Supersedes and is equivalent to LMTGN2005B Perform minor maintenance

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- starting and stopping machines and undertaking machine maintenance according to specifications, on at least two (2) occasions
- recognising fault conditions
- monitoring operating performance of machine, including machine production readings, against machine specifications
- making minor adjustments to rectify minor machine faults or problems
- completing all required tasks within job role for maintaining machine operations
- applying workplace procedures
- recording and reporting machine or product faults.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- procedures and guidelines for safe operation and maintenance of machines
- typical fault conditions and related fault-finding procedures
- basic machine maintenance and repair techniques
- cleaning and lubricating techniques
- technical specifications manuals
- quality standards and practices
- workplace procedures
- recording and reporting practices.

## Assessment Conditions

- Assessors must:

- satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
- have vocational competency in performing minor machine maintenance, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- The unit is applicable to all TCF sectors and assessment must ensure it is delivered to suit the industry it is being applied to.

## MSTGN3016 Plan tasks to assist production operations

### Modification History

Release 1. Supersedes **and is equivalent to** MSTGN3005 Plan tasks to assist production operations.

### Application

This unit of competency describes the skills and knowledge required to assist in production planning by performing specific planning tasks. Tasks may include the development of rosters, work health and safety practices, workplace procedures, documentation practices and organisational systems.

This unit applies to all sectors of the textiles, clothing and footwear (TCF) industry.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

Nil

### Competency Field

Generic

### Elements and Performance Criteria

<b>Elements</b> <i>Elements describe the essential outcomes.</i>	<b>Performance Criteria</b> <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to plan tasks	1.1 Determine job and safe work requirements from work information 1.2 Discuss planning requirements with supervisor and confirm work brief 1.3 Confirm timeline, jobs and work priorities associated with planning tasks with supervisor or manager 1.4 Check workplace procedures and documentation relating to planning tasks and identify key personnel

<b>Elements</b> <i>Elements describe the essential outcomes.</i>	<b>Performance Criteria</b> <i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Conduct planning task	<p>2.1 Communicate with team, section or individuals and key personnel to seek support for planning task requirements</p> <p>2.2 Assess and apply relevant criteria from previous and current work practices, organisational guidelines, documentation systems and quality standards to planning task</p> <p>2.3 Use planning tools and techniques to coordinate and sequence tasks and integrate work health and safety practices to develop plan that meets workplace requirements</p> <p>2.4 Test plan with key personnel and adjust based on feedback</p>
3. Implement plan	<p>3.1 Communicate all plan information in an effective way to work team, section and individuals</p> <p>3.2 Seek feedback from team, section members and individuals to support effective operation of team or section</p> <p>3.3 Monitor implementation of plan, and identify and apply required changes to improve outcomes</p> <p>3.4 Document plan and implementation practices in accordance with workplace procedures</p>

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Reading skills to interpret work instructions, standard operating procedures (SOPs), specifications and key requirements of industry standards
- Initiative and enterprise skills to organise the work of others to meet customer deadlines and quality requirements.

Other foundation skills essential to performance are explicit in the performance criteria of this unit.

## Unit Mapping Information

Release 1. Supersedes **and is equivalent to** MSTGN3005 Plan tasks to assist production operations.

# Assessment Requirements for MSTGN3016 Plan tasks to assist production operations

## Modification History

Release 1. Supersedes **and is equivalent to** MSTGN3005 Plan tasks to assist production operations.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- planned 2 tasks to assist production operations, covering at least 1 of the following:
  - work rosters
  - work health and safety practices
  - workplace procedures
- communicated effectively about the development of the plan to work team, section and individuals
- monitored the plan and made changes to improve outcomes
- documented the plan.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- Australian Standards, industry regulations and codes of practice that govern the control of chemicals, relevant to the workplace (such as *Australian/New Zealand Standard™ AS/NZS 4146:2000 Laundry practice*, applicable to a laundry workplace)
- production and work flow system in the workplace
- factors and constraints that negatively impact on effective work flow and how they can be controlled
- effective work methods to achieve production objectives and timelines
- effective communication strategies
- planning tools and techniques
- quality standards and procedures relevant to enterprise
- scheduling techniques
- resourcing policies, relevant to enterprise
- general staffing levels, capabilities and application of standard times
- workplace recording and reporting practices.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - a TCF production environment set up with relevant standard operating procedures (SOPs), safety information and equipment
  - access to team members.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

# MSTTF2002 Cut, bend and shape metal

## Modification History

Release 1. Supersedes and is equivalent to LMTTF2017A Cut, bend and shape metal

## Application

This unit of competency covers the skills and knowledge required to cut prescribed lengths of metal bar stock and to bend the lengths into various shapes by hand or with the aid of formers.

Work may involve interaction with other people in the workplace, including supervisors and production personnel. Work may be conducted in a variety of environments, such as operational indoor or outdoor workplaces and hazardous or exposed conditions

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Textile fabrication

## Unit Sector

Not applicable

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |                                   |     |   |
|---|-----------------------------------|-----|---|
| 1 | <b>Determine job requirements</b> | 1.1 | Follow standard operating procedures (SOPs) |
|   |                                   | 1.2 | Comply with work health and safety (WHS)    |

- requirements at all times
- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
  - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Prepare for cutting, bending and shaping metal**
- 2.1 Read and interpret workplace procedures and instructions
  - 2.2 Establish safe working environment
  - 2.3 Obtain specifications of material to be used and shape to be formed
  - 2.4 Plan sequence of task operations and calculate required length of material
  - 2.5 Select appropriate section material to meet specification, and choose suitable length of material stock for cutting to minimise waste
  - 2.6 Move material to be cut to work area
  - 2.7 Prepare appropriate hand and power tools
- 3 **Prepare for cutting process**
- 3.1 Mark out cutting points on material and select appropriate cutting equipment
  - 3.2 Check area to ensure equipment doesn't become entangled or damaged during operation
  - 3.3 Secure material to prevent movement
- 4 **Cut material and informally check product**
- 4.1 Use safety equipment in accordance with WHS requirements when using cutting equipment
  - 4.2 Select and install appropriate consumables as to manufacturers requirements
  - 4.3 Set and operate equipment in accordance with accepted industry and WHS practices

- 4.4 Cut material to correct length and remove burrs or rough edges by brushing, grinding or filing
    - 4.5 Inspect cut sections to verify that their size and condition meets specifications and relevant workplace and industry quality standards
- 5 **Prepare for forming process**
  - 5.1 Plan sequence of forming operations and select appropriate forming equipment
  - 5.2 Check forming equipment for damage or operating defects
  - 5.3 Select and set appropriate formers
- 6 **Form material and informally check product**
  - 6.1 Place metal section in former and secure, as necessary
  - 6.2 Heat metal section to facilitate bending, as necessary
  - 6.3 Hot or cold bend the metal section around formers or hand form to required specification
  - 6.4 Descale or otherwise finish formed product after forming
  - 6.5 Inspect formed product to verify that it meets specifications and relevant workplace and industry quality standards
- 7 **Maintain work area and equipment**
  - 7.1 Clean work area and stow tools and electrical equipment away safely
  - 7.2 Comply with environmental regulations to reuse, recycle or dispose of materials as required
  - 7.3 Clean and maintain cutting and forming equipment in accordance with workplace requirements and manufacturer specifications
  - 7.4 Perform programmed maintenance which is within the operator's area of responsibility
  - 7.5 Inform supervisor of any abnormal conditions needing maintenance or repair

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Workplace procedures include one or more of the following:**

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

**Australian Standards include:**

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

**Hand tools include one or more of the following:**

- hammers
- punches
- vices
- clamps
- jigs
- formers
- hand drills
- hacksaws
- files
- tongs

- wire brushes plus gloves
- goggles and other safety equipment

**Power tools include one or more of the following:**

- power hacksaws
- portable electric drills
- portable sanders and wire brushes
- guillotine
- abrasive disk cutting equipment
- gas cutting equipment

**WHS practices**

WHS practices include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the following:

- manual handling techniques
- SOPs
- PPE
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- environmental practices

## Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTTF2017A Cut, bend and shape metal

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

# Assessment Requirements for MSTTF2002 Cut, bend and shape metal

## Modification History

Release 1. Supersedes and is equivalent to LMTTF2017A Cut, bend and shape metal

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- complying with all relevant safety requirements applicable to the safe use of cutting and bending equipment
- interpreting work orders
- interpreting equipment and materials specifications and instructions needed for the cutting and forming processes
- setting up cutting and forming equipment
- performing cutting process using at least three (3) different tools or equipment according to workplace procedures, on at least three (3) different products
- performing forming processes according to workplace procedures on at least three (3) products
- inspecting completed work to assess quality
- performing normal operator maintenance of work area to enable work to be conducted safely and efficiently
- documenting and communicating work related information including reporting faults and other problems
- applying workplace procedures.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- specific work health and safety (WHS) requirements associated with cutting and heating equipment
- common metals and basic sections used in fabrication work
- metal cutting processes
- metal grinding and dressing processes
- metal forming processes

- the range of cutting and forming equipment, hand tools and power tools used in cutting and forming processes and their appropriateness for particular applications
- power sources, such as single phase, three phase and weather-protected outlets
- operating principles of tools and equipment used in cutting, dressing and forming metals, including abrasive cutting wheels, gas equipment, grinding wheels, guillotines and power hacksaws
- hazards associated with powered machinery and gas equipment
- materials and equipment specifications
- environmental requirements of relevant industry and workplace procedures
- general housekeeping policies and procedures
- WHS practices, including hazard identification and control measures
- quality practices
- workplace procedures
- recording and reporting practices.

## Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in cutting, bending and shaping metal, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

# **MSTTF2005 Translate information into measurements or diagrams**

## **Modification History**

Release 1. Supersedes and is equivalent to LMTTF2005A Translate information into measurements or diagrams

## **Application**

This unit of competency covers the skills and knowledge required to translate information received orally and by other means on customer requirements into hard copy form for costing and production purposes.

Work may include interaction with enterprise clients either individually or in collaboration with other personnel from the operator's enterprise.

Work may be conducted in operational indoor or outdoor workplaces

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## **Pre-requisite Unit**

Nil

## **Competency Field**

Textile fabrication

## **Unit Sector**

Not applicable

## **Elements and Performance Criteria**

Elements describe the      Performance criteria describe the performance needed to

essential outcomes.	demonstrate achievement of the element.
<b>1 Prepare to translate information into measurements or diagrams</b>	1.1 Identify customer requirements from customer information
	1.2 Review customer information to ensure all required data is available
	1.3 Seek additional information, as needed
	1.4 Locate and interpret technical information about products, materials, equipment and operating procedures, as required, for processing customer request
	1.5 Follow workplace procedures and instructions
<b>2 Identify components, products and services</b>	2.1 Develop concept of completed product or service
	2.2 Determine required accessories, attachments and other components
	2.3 Determine anchor points, and types and sizes of openings
	2.4 Identify potential difficulties or hazards associated with manufacture of the product or provision of the service
	2.5 Identify environmental features, regulations, insurance requirements, legal requirements and other factors which may affect the product or service to be provided
<b>3 Develop graphical information to help define customer requirements</b>	3.1 Apply knowledge of customer requirements to produce freehand sketches or diagrams illustrating the customer's requirements
	3.2 Transfer dimensions and angles on to the sketch or diagram accurately
	3.3 Mark out positions of attachments, openings, fittings or inserts accurately and clearly
	3.4 Show positions of ropes, struts, retractors or supports clearly
	3.5 Develop and incorporate details of gussets, pockets, hips and other features in the sketches, diagrams or drawings

- 3.6 Calculate dimensional allowances for cutting, rolled edges, joins and reinforcements, and incorporate in the sketches, diagrams or drawings
  - 3.7 Make provision for seams, joins and overlaps and check all dimensions and angles are accurate
  - 3.8 Use tools, equipment and resources to WHS practices
  - 3.9
- 4 **Finalise information**
- 4.1 Prepare final sketches, diagrams and drawings manually or using computer-aided design (CAD) system to confirm customer requirements and provide feedback to customer
  - 4.2 Store information, sketches, diagrams and drawings according to workplace procedures
  - 4.3 Pass on graphical information to personnel within the organisation responsible for further action

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Workplace procedures include one or more of the following:**

- requirements prescribed by legislation, awards, agreements and conditions of employment
- standard operating procedures (SOPs)
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of

own work quality and contribution to quality improvement of team or section output

- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

**Australian Standards include:**

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

**Tools, equipment and resources include one or more of the following:**

- measuring equipment
- rules
- squares
- protractors
- calculators
- computers and software ,including computer applications involving geometric constructions and surface area calculations

**WHS practices:**

WHS practices include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the following:

- manual handling techniques
- SOPs
- personal protective equipment (PPE)
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- environmental practices

# Assessment Requirements for MSTTF2005 Translate information into measurements or diagrams

## Modification History

Release 1. Supersedes and is equivalent to LMTTF2005A Translate information into measurements or diagrams

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- applying relevant standards
- locating and interpreting technical information about products, materials, equipment and operating procedures
- complying with all relevant safety requirements, including safe use of measuring tools (including laser devices) and other equipment
- conceptualising customer needs from customer information
- interpreting specifications and instructions for products and materials offered to customers, and translating ideas into basic 3-D sketches and drawings for at least three (3) products
- clarifying customer instructions and providing feedback to customer
- making calculations and allowances as required to create accurate final drawings and diagrams for at least two (2) products, using manual or computer-aided design (CAD) programs to produce drawings, where possible
- documenting and communicating work related information
- applying workplace procedures.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- a range of common products and services offered by the workplace
- general operating principles of common products and equipment on offer
- common types of materials used in the industry and their applications
- limitations of canvas and other materials used
- common types of strengthening and fastenings
- measuring instruments and techniques
- mathematical processes

- plane geometry and plane geometrical shapes
- mathematical formulae (e.g. areas and volumes)
- engineering drawing principles and practices
- environmental requirements of relevant industry and workplace procedures
- general industry housekeeping policies and procedures
- work health and safety (WHS) practices, including hazard identification and control measures
- quality practices
- workplace procedures
- recording and reporting practices.

## Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in translating information into measurements or diagrams, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

## MSTTF2009 Identify and select canvas and sail materials

### Modification History

Release 1. Supersedes and is equivalent to LMTTF2009A Identify and select canvas and sail materials

### Application

This unit of competency covers the skills and knowledge required to identify and select appropriate materials to use in the manufacture of canvas or sail products.

This unit of competency applies to identifying, selecting and handling materials, and checking stock availability. Work may involve interaction with other people in the workplace including supervisors and production personnel. Work may be conducted in operational indoor or outdoor workplaces

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Textile fabrication

### Unit Sector

Not applicable

### Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	<b>Determine job</b>	1.1	Follow standard operating procedures (SOPs)
---	----------------------	-----	---

- requirements**
- 1.2 Comply with work health and safety (WHS) requirements at all times
  - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
  - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Identify materials**
- 2.1 Identify materials by appearance, texture, density, stock labels and product codes
  - 2.2 Check stock labels or tags against product codes and manufacturer specifications to confirm correct identification
  - 2.3 Read and apply workplace procedures and instructions
- 3 **Select materials**
- 3.1 Select materials in accordance with job specifications, fitness for purpose and work order instructions
  - 3.2 Check materials stocks to ensure sufficient quantities of materials are available to meet job requirements
  - 3.3 Check materials to ensure they conform to specifications, descriptions and relevant quality standards
- 4 **Handle and store materials**
- 4.1 Follow appropriate WHS practices and work procedures when examining stock in racks or shelves
  - 4.2 Follow safe working practices when handling or moving stock
  - 4.3 Use appropriate lifting equipment to lift heavy or awkward loads
  - 4.4 Use appropriate posture and lifting techniques for manual handling of materials
  - 4.5 Seek assistance in handling materials when necessary
  - 4.6 Store materials in accordance with workplace procedures and manufacturer recommendations

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Workplace procedures include one or more of the following:**

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

**Australian Standards include:**

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

**Materials include the following:**

- fibres and yarns used in canvas and sail making
- ropes
- dacron, nylon and composite sail cloths
- attachments (metal and non-metal)
- adhesives

**WHS practices**

WHS practices include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the

following:

- manual handling techniques
- SOPs
- PPE
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- environmental practices

# Assessment Requirements for MSTTF2009 Identify and select canvas and sail materials

## Modification History

Release 1. Supersedes and is equivalent to LMTTF2009A Identify and select canvas and sail materials

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- locating and interpreting technical information about materials used in the canvas and sail making industry
- identifying at least five (5) examples of materials by appearance, texture, density and other relevant characteristics
- interpreting and applying work orders, materials specifications and instructions for storage, handling and use
- correctly identifying and handling at least five (5) textile materials used in the canvas and sail making industry
- selecting appropriate materials to meet specified job requirements
- complying with all relevant safety requirements including safe handling and storage of materials
- storing materials according to product requirements and workplace procedures.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- product construction principles and methods
- characteristics of a wide range of materials used in the canvas and sail industry
- industry applications of various materials
- relative advantages and disadvantages of various materials for particular applications
- joining characteristics of various materials
- materials labelling principles and practices, including 'care' labelling
- standard industry practices for storage and handling of materials
- relevant materials quality standards

- work health and safety (WHS) and environmental requirements of relevant industry and workplace procedures
- general housekeeping policies and procedures
- quality practices
- workplace procedures.

## Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in identifying and selecting canvas and sail materials, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

# MSTTF2014 Weld plastic materials

## Modification History

Release 1. Supersedes and is equivalent to LMTTF2014A Weld plastic materials

## Application

This unit of competency covers the skills and knowledge required to weld plastic materials within the safe operating parameters of the equipment used.

The unit of competency applies to hot air and hot wedge welding of plastic in the textile fabrication industry. Work may be conducted in a variety of environments, such as operational indoor or outdoor workplaces, and in hazardous or exposed conditions.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Textile fabrication

## Unit Sector

Not applicable

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	<b>Determine job requirements</b>	1.1	Follow standard operating procedures (SOPs)
		1.2	Comply with work health and safety (WHS)

- requirements at all times
- 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
  - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
- 2 **Select welding process and plan the work**
- 2.1 Read and interpret workplace procedures and instructions
  - 2.2 Determine nature of material to be welded and select an appropriate welding process
  - 2.3 Establish a safe working environment, identify suitable electrical power outlets and plan work to maximise safety and productivity
  - 2.4 Select appropriate hand-held or stationary manual welding equipment, check serviceability and follow correct 'on' procedures
  - 2.5 Select and prepare appropriate supplementary hand and power tools for the job
- 3 **Perform welding**
- 3.1 Prepare surfaces of material for welding
  - 3.2 Lay out material on working table or other suitable surface and anchor material to prevent movement
  - 3.3 Adjust equipment temperature to prescribed settings
  - 3.4 Lower screens or barriers, where fitted, prior to welding process
  - 3.5 Operate welding equipment in accordance with workplace procedures
  - 3.6 Examine weld area or test for correct fusion of materials, and remove work piece
- 4 **Check quality of weld and finalise**
- 4.1 Inspect completed weld to verify that it meets the required standard

**work**

- 4.2 Label or tag completed product and complete any necessary documentation in accordance with workplace procedures
- 4.3 Clean work area, clean and return tools and equipment to safe storage, and perform normal basic maintenance, in accordance with workplace requirements and manufacturer specifications

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Workplace procedures include one or more of the following:**

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

**Australian Standards include:**

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

**Materials include one or more of the**

- PVC
- vinyls

**following:**

- clear plastics

**Welding equipment includes two or more of the following:**

- foot controlled welder
- hand welder
- hot air welder
- hot wedge welder

**Hand and power tools include one or more of the following:**

- hammers
- rasps
- files
- portable sanders

**WHS practices**

WHS practices include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the following:

- manual handling techniques
- SOPs
- PPE
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- environmental practices

## Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTTF2014A Weld plastic materials

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

# Assessment Requirements for MSTTF2014 Weld plastic materials

## Modification History

Release 1. Supersedes and is equivalent to LMTTF2014A Weld plastic materials

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- complying with all relevant safety requirements, including safe use of plastic welding equipment, hand and power tools and electrical equipment
- following work orders
- interpreting equipment and materials specifications and instructions needed for the plastic welding process
- preparing material to be welded and setting up welding equipment
- performing at least two (2) forms of welding of plastic materials to industry standards, quality and consistency, and testing for correct fusion of materials, on at least five (5) occasions
- performing normal operator maintenance of work area to enable work to be conducted safely and efficiently
- labelling or tagging materials, and documenting and communicating work-related information, including reporting of faults and other problems, according to workplace procedures

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- specific work health and safety (WHS) requirements associated with hot air and hot wedge welding
- hazards associated with heated plastics
- plastic welding principles and techniques
- general operating principles of plastic welding equipment
- a range of plastic welding equipment, hand tools and power tools commonly used in the plastic welding process and their appropriateness for particular applications
- power sources, such as single phase, three phase and weather-protected outlets
- materials and equipment specifications
- relevant quality standards for plastic welds

- WHS and environmental requirements of relevant industry and workplace procedures
- general housekeeping policies and procedures
- WHS practices, including hazard identification and control measures
- quality practices
- workplace procedures
- recording and reporting practices.

## Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in welding plastic materials, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

## **MSTTF2015 Install products on and off site**

### **Modification History**

Release 1. Supersedes and is equivalent to LMTTF2016A Install products on and off site

### **Application**

This unit of competency covers the skills and knowledge required to install canvas and sail products both on site and off site.

The unit of competency applies to the installation, operation and maintenance of canvas and sail products and equipment both on and off site. Work may be conducted in a variety of environments, such as operational indoor, outdoor workplaces or on site

Work may require independence, discretion, judgement and acceptance of responsibility for overall work outcomes. Work may involve planning and coordination of tasks and processes, interaction with other enterprise personnel, enterprise clients, manufacturer representatives and other external personnel.

Work may be conducted in small to large scale enterprises and may involve individual and team activities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

### **Competency Field**

Textile fabrication

### **Unit Sector**

Not applicable

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |                                     |     |   |
|---|-------------------------------------|-----|---|
| 1 | <b>Determine job requirements</b>   | 1.1 | Follow standard operating procedures (SOPs)   |
|   |                                     | 1.2 | Comply with work health and safety (WHS) requirements at all times  |
|   |                                     | 1.3 | Use appropriate personal protective equipment (PPE) in accordance with SOPs   |
|   |                                     | 1.4 | Identify job requirements from specifications, drawings, job sheets or work instructions  |
| 2 | <b>Prepare for installation</b>     | 2.1 | Read and interpret workplace procedures and instructions, including interpreting drawings and technical information to guide installation |
|   |                                     | 2.2 | Plan task operation sequence, identify suitable electrical power outlets and equipment to work above ground, as required                  |
|   |                                     | 2.3 | Arrange additional assistance, if required  |
|   |                                     | 2.4 | Select and prepare appropriate tools and prepare site   |
| 3 | <b>Prepare to work above ground</b> | 3.1 | Select, secure and adequately support ladders or other devices, such as steps or bosun's chair, as required for the tasks                 |
|   |                                     | 3.2 | Erect appropriate barriers and signs when working overhead  |
|   |                                     | 3.3 | Obtain assistance, as necessary, when working above the ground or deck  |
| 4 | <b>Fit products</b>                 | 4.1 | Use appropriate marking tools and measuring equipment to mark out fitting positions   |
|   |                                     | 4.2 | Check products to be installed to ensure they meet specifications and are fit for their intended purpose                                  |

- 4.3 Use appropriate ladders or other devices to gain height advantage
  - 4.4 Sequence all operations according to specifications and workplace procedures ,as required, to complete a normal installation
  - 4.5 Apply appropriate WHS precautions and environmental practices during all phases of the installation
  - 4.6 Work in cooperation with other team members, as required, to fit products
- 5 **Inspect and check quality**
- 5.1 Inspect completed work to verify that the products and installation work meet job specifications and relevant workplace and industry quality standards
  - 5.2 Check that installation is correct, and that products fit and operate correctly
  - 5.3 Determine if any re-work or rectification is required, undertake re-work or take other appropriate action
- 6 **Provide customer information and finalise work**
- 6.1 Supply customer with information on how to use product, as required
  - 6.2 Demonstrate product to customer and answer questions within scope of own responsibility
  - 6.3 Clean work area, clean and return tools to safe storage, and perform normal basic maintenance, in accordance with workplace procedures
  - 6.4 Clean and stow away ladders, bosun's chair or other equipment
  - 6.5 Complete project documentation and obtain customer signature, if required

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Workplace procedures include one or more of the following:**

- requirements prescribed by legislation, awards, agreements and conditions of employment
- SOPs
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

**Australian Standards include:**

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

**Products include one or more of the following:**

- blinds
- awnings
- annexes
- sails

**Tools include one or more of the following:**

- hand tools:
  - hammers
  - punches
  - hand drills
  - saws
  - hacksaws
  - rasps
  - wire brushes
  - pop-rivets
  - expanding bolts

- power tools:
- portable electric drills
- routers
- portable sanders
- abrasive disk cutting equipment
- electric punches

- Normal installation includes one or more of the following**
- using appropriate tools to drill and prepare locating holes
  - safely lifting or lowering products into position
  - using appropriate fastenings to attach or anchor product
  - fitting pulleys or sheave blocks
  - threading or attaching ropes or cables, as necessary
  - fitting stays or other fastenings
  - cleaning up work area after fitting

**WHS practices** WHS practices include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the following:

- manual handling techniques
- SOPs
- PPE
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- environmental practices

## Unit Mapping Information

# Assessment Requirements for MSTTF2015 Install products on and off site

## Modification History

Release 1. Supersedes and is equivalent to LMTTF2016A Install products on and off site

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- complying with all relevant safety requirements, including safe use of ladders, bosun's chair, load hoisting equipment and electrical equipment
- interpreting work orders, drawings and installation instructions
- complying with product and equipment specifications during installation
- performing normal installation and setting of products and equipment on at least two (2) occasions
- using relevant hand and power tools safely
- inspecting and testing operation of installed products and equipment
- specifying any rectification necessary
- performing normal operator maintenance of work area to enable work to be conducted safely and efficiently
- communicating effectively with client on installation process and product operation
- demonstrating products to customer, answering questions, completing project documentation and obtaining customer signature, if required, according to workplace procedures.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- electrical and general workplace hazards and means of identifying them
- operating principles of products and associated equipment to be installed
- the range of hand tools, power tools, measuring devices and other equipment used in the installation process, and their operating principles and appropriateness for particular applications
- power sources, such as single phase, three phase and weather-protected outlets
- format of product and equipment specifications

- setting and adjustment principles and processes for products and equipment being installed
- typical problems of products and associated equipment and their rectification procedures
- relevant product quality standards for products and equipment installed
- work health and safety (WHS) and environmental requirements of relevant industry and workplace procedures, including use of equipment for working aloft
- general housekeeping policies and procedures
- mathematical processes used in the installation and checking processes
- WHS practices, including hazard identification and control measures
- quality practices
- workplace procedures
- recording and reporting practices.

## Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in installing products on and off site, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

# MSTTF3001 Identify client and site requirements for installation of fabricated textile products

## Modification History

Release 1. Supersedes and is equivalent to LMTTF3001A Identify client requirements (on site)

## Application

This unit of competency covers the skills and knowledge required to establish and document client and site requirements for the installation of fabricated textile products.

The unit includes identifying client requirements and WHS and environmental issues from site inspection, using discretion, initiative and judgement on the job. Work may be conducted in a variety of environments, such as large to small scale enterprises, including indoor or outdoor operations.

All elements of this unit of competency are performed under the general guidance and review of a supervisor.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Textile fabrication

## Unit Sector

Not applicable

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 
- |   |  |  |
|---|--|--|
| 1 | <b>Prepare to identify client's requirements on site</b> | 1.1 Prepare inspection tools and equipment and arrange for visit on site   |
|   |  | 1.2 Establish contact and apply communication skills to develop rapport with the client  |
|   |  | 1.3 Provide personal identification and confirm purpose of visit   |
|   |  | 1.4 Explain process for determining client's needs   |
|   |  | 1.5 Obtain permission to inspect location, take measurements and gather relevant information   |
| 2 | <b>Obtain detailed information from client</b>           | 2.1 Use appropriate questioning techniques to identify client requirements and gather detailed information   |
|   |  | 2.2 Present preliminary product information and discuss options with client  |
|   |  | 2.3 Document client requirements   |
| 3 | <b>Conduct site inspection</b>                           | 3.1 Arrange and adapt to work area, so that inspection can be conducted safely and efficiently   |
|   |  | 3.2 Select ladders, steps or bosun's chair, as appropriate, to inspect site and take measurements, and use in accordance with work health and safety (WHS) practices |
|   |  | 3.3 Secure and adequately support ladder or other device   |
|   |  | 3.4 Erect appropriate barriers and signs when operator is overhead   |
|   |  | 3.5 Seek assistance, as necessary, when working above ground or deck   |
|   |  | 3.6 Identify safe anchor points for products or other relevant architectural or marine structural equipment  |
|   |  | 3.7 Take measurements and note special features likely to affect installation of products or their performance in service  |
|   |  | 3.8 Take account of labour rates and costs of materials and equipment to estimate costs, and record results of   |

inspection

- |   |                                    |     |   |
|---|------------------------------------|-----|---|
| 4 | <b>Conclude inspection on site</b> | 4.1 | Replace items shifted or removed during the information gathering process |
|   |                                    | 4.2 | Return client equipment used in the inspection process                    |
|   |                                    | 4.3 | Notify client when operator is leaving the site                           |

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Workplace procedures include one or more of the following:**

- requirements prescribed by legislation, awards, agreements and conditions of employment
- standard operating procedures (SOPs)
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- WHS practices

**Australian Standards include:**

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

**Client's requirements**

- types of materials

**include one or more of the following:**

- types of products and equipment
- operating principles and mechanisms
- costs
- timelines
- colours
- size, dimensions and shape
- delivery and installation dates
- installation procedure to be followed
- crowd barriers or fencing

**WHS practices include one or more of the following:**

WHS practices include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the following:

- manual handling techniques
- SOPs
- personal protective equipment (PPE)
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- additional licensing or permits
- environmental practices

## Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTTF3001A Identify client requirements (on site)

## Links

# Assessment Requirements for MSTTF3001 Identify client and site requirements for installation of fabricated textile products

## Modification History

Release 1. Supersedes and is equivalent to LMTTF3001A Identify client requirements (on site)

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria, and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- preparing tools and equipment for inspection, arranging visit on site, and conducting at least two (2) on-site inspections safely and efficiently to determine work requirements
- greeting client in an appropriate manner, identifying and confirming client needs, and demonstrating product knowledge
- taking measurements and noting site requirements likely to affect installation of products or their performance in service
- asking appropriate questions, clarifying information and providing feedback to client
- documenting and communicating work-related information including costs, measurements, specifications, client details and requirements
- complying with all relevant safety requirements, including safe use of ladders, steps, measuring tools (including laser devices), and other equipment
- concluding inspection on site according to workplace procedures.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- hazards associated with working at heights
- range of products and services offered by the workplace
- principles of operating products and equipment
- types of materials and their applications
- limitations of canvas and other materials used
- types of strengthening and fastenings
- the service life of different materials
- instruments and techniques for measuring
- mathematical processes

- mathematical formulae for areas and volumes
- labour rates and approximate costs of products and materials
- power sources, such as single phase, three phase and weather-protected outlets
- work health and safety (WHS) and environmental requirements of relevant industry and workplace procedures
- general industry housekeeping policies and procedures
- WHS practices, including hazard identification and control measures
- client communication
- quality practices
- workplace practices
- practices for recording and reporting.

## Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in identifying client requirements on site, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

# MSTTF3002 Gain customer acceptance of service proposal

## Modification History

Release 1. Supersedes and is equivalent to LMTTF3002A Gain customer acceptance of service proposal

## Application

This unit of competency covers the skills and knowledge required to gain customer acceptance of a proposal to provide a product and service.

The unit of competency applies to establishing and documenting a proposal to meet customer requirements and obtaining agreement for work to proceed. Interaction with the customer is usually performed individually but may involve collaborative approach with other personnel from the operator's workplace.

Work may be conducted in a variety of environments, such as operational indoor, outdoor workplaces or on site.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Textile fabrication

## Unit Sector

Not applicable

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |   |                                       |   |
|---|---------------------------------------|---|
| 1 | <b>Develop customer proposal</b>      | <p>1.1 Review documentation to confirm all required information is available</p> <p>1.2 Establish customer requirements and determine products, processes and service for customer</p> <p>1.3 Identify alternatives and determine material and production costs</p> <p>1.4 Calculate costs for proposed service</p> <p>1.5 Assess timing, costs and service against customer requirements</p> <p>1.6 Develop proposal and document for customer</p> |
| 2 | <b>Present proposal to customer</b>   | <p>2.1 Contact customer and present proposal in person, or by using digital technology or by other arranged means</p> <p>2.2 Provide customer with detailed information regarding products, processes and alternative solutions, which could satisfy customer requirements</p> <p>2.3 Discuss features and benefits of proposal with the customer</p>   |
| 3 | <b>Seek customer acceptance</b>       | <p>3.1 Respond to any customer concerns, seek customer approval and acceptance, and confirm agreement</p> <p>3.2 Identify any required changes to the proposal and modify proposal accordingly</p> <p>3.3 Obtain customer acceptance</p>  |
| 4 | <b>Confirm service to be provided</b> | <p>4.1 Confirm customer address and contact details</p> <p>4.2 Establish agreement with the customer and obtain signature</p>   |

- 4.3 Confirm time, product and service to be provided and arrange delivery
- 4.4 Provide duplicate of proposal and agreement to customer for future reference
- 4.5 Obtain deposit, where applicable, or arrange other payment from customer
- 4.6 Provide customer receipt and record form of payment

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

**Workplace procedures include one or more of the following:**

- requirements prescribed by legislation, awards, agreements and conditions of employment
- standard operating procedures (SOPs)
- work instructions
- oral, written and visual communication
- quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
- housekeeping
- tasks related to environmental protection, waste disposal, pollution control and recycling
- work health and safety (WHS) practices

**Australian Standards include:**

- the relevant industry or Australian Standards that are current at the time this unit is being undertaken

**Documentation includes one or more of the following:**

- sketches, diagrams and maps
- dimensions and measurements
- documentation on customer requirements

**Customer requirements include one or more of the following:**

- types of materials
- types of products and equipment
- operating principles and mechanisms
- costs
- timelines
- colours
- size, dimensions and shape
- delivery and installation dates
- installation procedure to be followed

**WHS practices** WHS practices include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the following:

- manual handling techniques
- SOPs
- personal protective equipment (PPE)
- safe materials handling
- taking of rest breaks
- ergonomic arrangement of workplaces
- following marked walkways
- safe storage of equipment
- housekeeping
- reporting accidents and incidents
- environmental practices

## Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTTF3002A Gain customer acceptance of service proposal

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

# Assessment Requirements for MSTTF3002 Gain customer acceptance of service proposal

## Modification History

Release 1. Supersedes and is equivalent to LMTTF3002A Gain customer acceptance of service proposal

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria on at least three occasions and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices
- applying relevant standards
- establishing customer requirements and determining products, processes and services for customer, on at least three (3) occasions
- calculating costs and identifying details of proposed products and services
- providing customer with detailed proposal in person, or electronically or other appropriate method
- answering customer queries to clarify or amend proposal if required
- developing written proposal for customer approval, incorporating all required details, including costs, products and services and timeframe
- establishing agreement with the customer and obtaining signature and deposit or arranging other payment
- completing required documentation for customer and own workplace according workplace procedures.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- workplace documentation and procedures for establishing agreements to provide services
- hazards associated with working at heights
- range of products and services offered by the enterprise
- principles of operating products and equipment
- types of materials and their applications
- limitations of canvas and other materials used
- types of strengthening and fastenings
- service life of different materials
- instruments and techniques for measuring

- mathematical processes
- mathematical formulas for area and volume
- labour rates and approximate costs of products and materials
- power sources such as single phase, three phase, and weather protected outlets
- work health and safety (WHS) and environmental requirements of relevant industry and workplace procedures
- general industry housekeeping policies and procedures
- WHS practices, including hazard identification and control measures
- quality practices
- workplace procedures
- practices for documenting agreements and recording and reporting provision of products and services.

## Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in gaining customer acceptance of service proposal, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

# MSTTF3004 Perform advanced welding of plastic materials

## Modification History

Release 1. Supersedes and is equivalent to LMTTF3004A Perform advanced welding of plastic materials

## Application

This unit of competency covers the skills and knowledge required to perform high frequency welding of plastic materials using equipment within the safe operating parameters of the equipment used.

The unit of competency applies to the welding of plastic in the textile fabrication industry. Work may be conducted in a variety of environments, such as operational indoor or outdoor workplaces, and hazardous or exposed conditions.

Work may be conducted in small to large scale enterprises and may involve individual and team activities. Work is performed within defined procedures under direct supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

MSTTF2014 Weld plastic materials

## Competency Field

Textile fabrication

## Unit Sector

Not applicable

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 **Determine job requirements**
  - 1.1 Follow standard operating procedures (SOPs)
  - 1.2 Comply with work health and safety (WHS) requirements at all times
  - 1.3 Use appropriate personal protective equipment (PPE) in accordance with SOPs
  - 1.4 Identify job requirements from specifications, drawings, job sheets or work instructions
  
- 2 **Prepare for welding**
  - 2.1 Read and interpret workplace procedures and instructions
  - 2.2 Determine nature of material to be welded and select an appropriate welding process
  - 2.3 Establish a safe working environment, identify suitable electrical power outlets and plan work to maximise safety and productivity
  - 2.4 Select appropriate hand-held or stationary manual welding equipment, check serviceability and follow correct 'on' procedures
  - 2.5 Select and prepare appropriate supplementary hand and power tools for the job
  
- 3 **Perform high frequency welding**
  - 3.1 Prepare surfaces of material for welding
  - 3.2 Lay out material on working table or other suitable surface and anchor material to prevent movement
  - 3.3 Adjust equipment temperature or operating frequency to prescribed settings
  - 3.4 Lower screens or barriers, where fitted, prior to welding process
  - 3.5 Keep operator and bystanders at an appropriate distance or suitably protected when high frequency welding is being undertaken
  - 3.6 Operate welding equipment in accordance with WHS and workplace procedures

- 3.7 Examine weld area or test for correct fusion of materials, and remove work piece
  - 3.8 Identify and address problems or faults
- 4 **Check quality of weld and finalise work**
- 4.1 Inspect completed weld to verify that it meets the required standard
  - 4.2 Label or tag completed product and complete any necessary documentation in accordance with workplace procedures
  - 4.3 Clean work area, clean and return tools and equipment to safe storage, and perform normal basic maintenance, in accordance with workplace requirements and manufacturer specifications

## Foundation Skills

This section describes those required skills (language, literacy and numeracy) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

- Workplace procedures include one or more of the following:**
- requirements prescribed by legislation, awards, agreements and conditions of employment
  - SOPs
  - work instructions
  - oral, written and visual communication
  - quality practices, including responsibility for maintenance of own work quality and contribution to quality improvement of team or section output
  - housekeeping
  - tasks related to environmental protection, waste disposal, pollution control and recycling

- WHS practices
- Australian Standards include:**
- the relevant industry or Australian Standards that are current at the time this unit is being undertaken
- Materials include the following:**
- PVC
  - vinyls
  - clear plastics
- Hand and power tools include the following:**
- hammers
  - rasps
  - files
  - portable sanders
  - high frequency welder
- WHS practices**
- WHS practices include hazard identification and control, risk assessment and implementation of risk reduction measures specific to the tasks described by this unit, and include one or more of the following:
- manual handling techniques
  - SOPs
  - PPE
  - safe materials handling
  - taking of rest breaks
  - ergonomic arrangement of workplaces
  - following marked walkways
  - safe storage of equipment
  - housekeeping
  - reporting accidents and incidents
  - environmental practices

## Unit Mapping Information

Release 1. Supersedes and is equivalent to LMTTF3004A Perform advanced welding of plastic materials

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

# Assessment Requirements for MSTTF3004 Perform advanced welding of plastic materials

## Modification History

Release 1. Supersedes and is equivalent to LMTTF3004A Perform advanced welding of plastic materials

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include:

- reading and following work instructions, standard operating procedures (SOPs), safe work practices and other reference material
- applying relevant standards
- complying with all relevant safety requirements, including safe use of plastic welding equipment, hand and power tools and electrical equipment
- following work orders
- interpreting equipment and materials specifications and instructions needed for the plastic welding process
- preparing material to be welded and setting up welding equipment
- using high frequency welder on at least five (5) products and performing welds, according to workplace requirements, with a satisfactory degree of quality consistency
- performing normal operator maintenance of work area to enable work to be conducted safely and efficiently
- documenting and communicating work-related information including reporting of faults and other problems
- labelling or tagging completed product and completing any necessary documentation in accordance with workplace procedures.

## Knowledge Evidence

Evidence must be provided that demonstrates knowledge of:

- safe work practices and procedures and use of personal protective equipment (PPE)
- relevant Australian Standards
- specific work health and safety (WHS) requirements associated with hot air and hot wedge welding
- hazards associated with heated plastics
- plastic welding principles and techniques
- operations of a high frequency welder
- general operating principles of plastic welding equipment

- a range of plastic welding equipment, hand tools and power tools commonly used in the plastic welding process, and their appropriateness for particular applications
- operations of a high frequency welder
- power sources, such as single phase, three phase and weather-protected outlets
- materials and equipment specifications
- relevant quality standards for plastic welds
- WHS and environmental requirements of relevant industry and workplace procedures
- general housekeeping policies and procedures
- WHS practices, including hazard identification and control measures
- quality practices
- workplace procedures
- recording and reporting practices.

## Assessment Conditions

- Assessors must:
  - satisfy the assessor competency requirements that are in place at the time of the assessment, as set by the VET regulator
  - have vocational competency in performing advanced welding of plastic materials, at least to the level being assessed, with relevant industry knowledge and experience.
- Assessment should occur in operational workplace situations. Where this is not possible, or where personal safety or environmental damage are limiting factors, assessment must occur in a sufficiently rigorous simulated environment reflecting realistic operational workplace conditions. This must cover all aspects of workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.

## MSTTX2014 Perform industrial sewing on textile products

### Modification History

Release 1. Supersedes and is equivalent to MSTTX2009 Perform industrial sewing on textile products.

### Application

This unit of competency describes the skills and knowledge required to identify work requirements and sew textile products to specifications using industrial sewing machines.

This unit applies to operators working in accordance with defined procedures in any textile manufacturing context. Machines and tasks are preset.

Areas of work may include automotive trimming, blinds and awnings, clothing manufacture, leatherwork, marine trimming, sailmaking, upholstery or specialised textile manufacture.

No licensing or certification requirements exist at the time of publication. Relevant legislation, industry standards and codes of practice within Australia must be applied.

### Pre-requisite Unit

Nil.

### Competency Field

Textile production.

### Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to perform industrial sewing	1.1 Identify job requirements from work documentation 1.2 Identify and comply with work health and safety requirements in accordance with workplace procedures 1.3 Receive and check work and determine any follow-up action 1.4 Lay out work in sequence 1.5 Prepare and check workstation and machine in accordance with workplace procedures 1.6 Follow procedures for minimising waste

<b>Elements</b>	<b>Performance Criteria</b>
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
2. Sew textile product	2.1 Sew products to meet specifications, quality standards and speed of operations 2.2 Control machine speed and work handling according to the type of operations, fabrics and product type 2.3 Check machine performance regularly and inspect finished work for signs of faulty operation 2.4 Take required action to rectify faults during the sewing process in accordance with workplace procedures
3. Complete work	3.1 Inspect completed sewn components against quality standards, identify any faults and take appropriate action 3.2 Accurately record results of inspection and any action to correct or reject faulty work 3.3 Take and keep a record of preventative action to avoid recurrence of defective work 3.4 Complete production records in accordance with workplace procedures 3.5 Direct completed work to the next operation or packing section

## Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

- Numeracy skills to:
  - interpret numerical information on machines and in job requirements
  - measure and compare work against production and quality requirements
- Oral communication skills to share and report job information to colleagues and supervisors
- Reading skills to interpret job requirements and workplace procedures
- Writing skills to complete quality forms and production records

Other foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

Release 1. Supersedes and is equivalent to MSTTX2009 Perform industrial sewing on textile products.

## Links

Companion Volume Implementation Guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=a203ec5c-de7d-406b-b3e1-8f1a9b76e92e>

# Assessment Requirements for MSTTX2014 Perform industrial sewing on textile products

## Modification History

Release 1. Supersedes and is equivalent to MSTTX2009 Perform industrial sewing on textile products.

## Performance Evidence

There must be evidence the candidate has completed the tasks outlined in the elements and performance criteria of this unit, and:

- completed sewing to required specifications on 5 different jobs, with all of the following to be included in any combination:
  - operation of 2 different industrial sewing machines
  - positioning, feeding and handling of work pieces with some discretionary changes, contouring or critical stopping points
  - gathering
  - easing
  - tucking
  - stitching curves
- responded appropriately to 2 different sewing problems.

## Knowledge Evidence

There must be evidence the candidate has knowledge of:

- existence of any Australian Standards requirements for materials or products being sewn
- techniques for use and basic maintenance of two types of industrial sewing machine
- main types and sizes of needles and their applications
- basic characteristics of fabrics and threads used in different types of textile products, including how they perform and required tensions
- workplace practices and procedures for:
  - quality assurance
  - recording and reporting of information
  - identification and rectification of problems
  - safety and hazard control, including use of product-specific personal protective equipment (PPE) and manual handling
  - waste management and sustainability.

## Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions and contingencies. The following conditions must be met for this unit:

- use of suitable facilities, equipment and resources, including:
  - industrial sewing machines (minimum 2 types)
  - textile products to be sewn
  - work specifications
  - workplace procedures.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

## SIRRV002 Control stock

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to process stock orders, maintain stock levels, minimise stock losses, manage stocktakes and maintain all documents that relate to the administration of any type of stock.

This unit applies to individuals responsible for stock control. They work within organisational systems and procedures, but make decisions about stock administration and may have responsibility for others.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Inventory

### Unit Sector

Retail

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

1. Monitor stock receipt and dispatch.

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1. Implement organisational policies and procedures for receipt, dispatch and secure storage of stock.  
1.2. Allocate tasks and monitor staff to ensure organisational procedures are followed, and documentation is completed

- correctly.
- 1.3. Confirm that stock quantity and quality inspections on receipt meet organisational standards.
  - 1.4. Act on variations to quantity and quality of delivered stock.
  - 1.5. Supervise safe stock handling and storage.
2. Maintain stock records.
    - 2.1. Monitor stock and maintain stock at required levels.
    - 2.2. Maintain, monitor and adjust stock reorder cycles as required.
    - 2.3. Provide clear information to team members about individual stock recording responsibilities.
    - 2.4. Maintain stock storage and movement records.
    - 2.5. Record and report stock discrepancies.
    - 2.6. Monitor stock performance and identify and report fast and slow-selling items.
3. Process and follow up orders.
    - 3.1. Process and raise stock orders according to organisational procedures.
    - 3.2. Monitor delivery of stock to ensure agreed deadlines and inventory requirements are met.
    - 3.3. Liaise with suppliers to ensure continuity of supply.
    - 3.4. Resolve routine supply problems or refer to appropriate personnel for action.
    - 3.5. Distribute stock within the organisation according to required allocations.
    - 3.6. Handle routine supply problems or refer to management as required by store policy.
4. Minimise stock losses.
    - 4.1. Regularly check storage of stock and ensure its protection.
    - 4.2. Identify, record and report stock losses.
    - 4.3. Identify avoidable losses and establish reasons for them.
    - 4.4. Recommend solutions and implement procedures to prevent future losses.
5. Coordinate stocktake or cyclical count.
    - 5.1. Explain procedures for stocktake and cyclical counts to team members.
    - 5.2. Allocate stocktaking tasks to individual team members ensuring effective use of staff resources to complete task.
    - 5.3. Provide team members with clear directions for performance of each task.
    - 5.4. Produce accurate reports for management on stocktake data, including discrepancies.

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"><li>interpret supplier purchasing agreements, purchase orders, records of incoming stock and organisational policies and procedures for stock control.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>calculate:<ul style="list-style-type: none"><li>supplier costs and complex order costs</li><li>complex details of stock on hand and stock losses and produce complex numerically-based reports</li></ul></li><li>reconcile incoming stock and invoices against purchase orders.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>use business technology for inventory management.</li></ul>

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ca051b1b-5101-4ec2-ac1c-49699303188d>

# Assessment Requirements for SIRRINV002 Control stock

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain and order stock across one stock cycle according to organisational procedures using all of the following stock processes:
  - receipt
  - dispatch
  - ordering
  - stock level monitoring
  - records maintenance
- produce three different stock control reports
- organise and coordinate one stocktake or cyclical count
- provide clear and correct information to team members involved in stock control processes.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
  - receipt and dispatch of goods, including inspection for quantity and quality
  - stock ordering and reordering
  - stock replenishment
  - stock rotation
  - reporting of stock discrepancies, damage and loss
  - safe transport, handling and storage of goods
  - stock control
  - stocktaking and cyclical counts
  - pricing, labelling and packaging
  - stock security
- key aspects of legislation and codes of practice relevant to stock control:
  - Australian Consumer Law
  - Work Health and Safety (WHS)

- manual handling
- licensing for mechanical movement of stock
- principles of stock control:
  - rotation and replenishment
  - product life cycle
- impact of business planning and sales forecasts on stock control
- types of stock control systems used in the sector
- reasons for stock loss and damage and methods to control these and protect stock.

## Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- current plain English regulatory documents distributed by government regulators outlining key aspects of legislation and codes of practice relevant to stock control as listed in Knowledge Evidence
- a computerised stock control system
- stock for use in stock control activities
- organisational policies and procedures for stock control
- team members; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ca051b1b-5101-4ec2-ac1c-49699303188d>

# SIRRMER004 Develop visual merchandising creative concepts

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to develop visual merchandising concepts in response to a design brief or organisational strategy. It requires the ability to generate a range of creative ideas and present these ideas to stakeholders for feedback and approval.

This unit applies to visual merchandisers and stylists working in a diverse range of sectors and business contexts. They operate with independence, under limited supervision of others, and within established organisational policies and procedures. They may have responsibility for making a range of creative and operational decisions within the scope of their job role.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Merchandising

## Unit Sector

Retail

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

1. Determine visual merchandising

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1. Access and interpret a visual merchandising design brief.  
1.2. Identify and confirm visual merchandising objectives,

- requirements. specifications and constraints.
- 1.3. Clarify budgetary and time requirements with relevant personnel.
  - 1.4. Review existing visual merchandising activity and performance results to identify strengths and weaknesses.
  - 1.5. Research local and global visual merchandising trends and draw inspiration to inform concept development.
  - 1.6. Review competitor and market activity to identify trends and creative opportunities.
2. Generate options for visual merchandising concept.
- 2.1. Apply principles and elements of design to generate creative concept options that meet design brief or reflect organisational merchandise strategy.
  - 2.2. Ensure concept options reflect visual merchandising objectives, specifications and constraints.
  - 2.3. Challenge assumptions and traditional ways of working to generate concept options that promote diverse and innovative approaches to visual merchandising.
  - 2.4. Consider the need for scalability and generate concept options accordingly.
  - 2.5. Consider the need for consistency across channels and locations and generate concept options accordingly.
  - 2.6. Assess commercial and creative feasibility of concept options and make any required adjustments.
  - 2.7. Document visual and written representations of concept options.
3. Present creative options.
- 3.1. Prepare materials and documentation that support the presentation of concept options and aid audience visualisation.
  - 3.2. Use visual and verbal communication techniques to present creative options to relevant stakeholders.
  - 3.3. Promote preferred concept option demonstrating alignment to design brief or organisational merchandise strategy.
  - 3.4. Seek feedback from stakeholders and make any required adjustments to creative options.
  - 3.5. Agree on preferred concept options and ensure consistent understanding and expectations of all relevant stakeholders.
4. Finalise the visual merchandising concept.
- 4.1. Document detailed visual and written representations of the finalised and agreed visual merchandising concept.
  - 4.2. Seek final approval.
  - 4.3. Communicate finalised visual merchandising concept to

relevant personnel for implementation.

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria, are listed here, along with a brief context statement.

<b>SKILLS</b>	<b>DESCRIPTION</b>
Oral communication skills to:	<ul style="list-style-type: none"><li>• adapt communication techniques and styles to meet the needs of a target stakeholder audience when presenting visual merchandising concept options.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• determine financial feasibility of visual merchandising design options in line with budgetary requirements.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>• access, document and communicate information using digital technologies.</li></ul>

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for SIRRMER004 Develop visual merchandising creative concepts

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- review a visual merchandising design brief and develop two different visual merchandising concept options that reflect:
  - target audience
  - brand and product objectives
  - commercial objectives
  - resourcing specifications and constraints
  - implementation specifications and constraints
  - use elements and principles of design
- research local and global visual merchandising trends and use findings to inform concept development
- present one of the above concept options using:
  - visual and verbal communication techniques
  - digital and non-digital representations of concept option
- document one finalised visual merchandise creative concept.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- key aspects of legal and ethical considerations as they relate to visual merchandising concept development:
  - copyright
  - intellectual property
- role of a design brief in visual merchandising concept development
- role of an organisational merchandise strategy in visual merchandising concept development
- principles of visual merchandising and their application in visual merchandising concept development
- current visual merchandising trends
- sources of creative influence

- key considerations made in visual merchandising concept development and common types of:
  - objectives
  - specifications
  - constraints
- creative concept development and application of:
  - design processes
  - creative thinking techniques
  - innovative approaches
- scalability and its role in visual merchandising concept development
- techniques to determine commercial and creative feasibility of visual merchandising concepts
- elements and principles of design and their application in visual merchandising:
  - elements of design:
    - texture
    - form
    - colour
    - space
    - line
  - principles of design:
    - harmony
    - rhythm
    - balance
    - dominance
    - scale
    - proportion
    - light
    - contrast
- visual and written techniques for representing visual merchandising creative concepts
- digital and non-digital methods for creating visual representations of design ideas
- presentation techniques for:
  - story-telling
  - increased sensory engagement
  - aiding visualisation
  - communicating concept options:
    - visual
    - verbal
  - communicating to a range of audiences
  - managing feedback and critiquing
  - gaining agreement.

## Assessment Conditions

Skills must be demonstrated in a service industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- visual merchandising design briefs
- sources of information on current local and global visual merchandising trends
- digital and non-digital tools for creating visual representation of design ideas
- stakeholders with whom the individual can interact. These can be:
  - stakeholders in an industry workplace, or
  - stakeholders who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors, and:

- have worked in a job role for at least two years where they have applied the skills and knowledge within this unit of competency.

# SIRRMER005 Implement visual merchandising concepts

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to plan the implementation of a visual merchandising concept. It requires the ability to accurately interpret a concept, arrange resourcing, monitor concept implementation and determine the effectiveness of the concept.

This unit applies to visual merchandisers and stylists working in a diverse range of sectors and business contexts. They operate with independence, under limited supervision of others, and within established organisational policies and procedures. They may have responsibility for making a range of creative and operational decisions within the scope of their job role.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Merchandising

## Unit Sector

Retail

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

1. Develop concept implementation plan.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1. Access and review visual merchandising concept and determine implementation requirements and constraints.

- 1.2. Determine internal and external resource requirements including available budget.
  - 1.3. Access and review organisational visual merchandising guidelines and standards to inform implementation plan development.
  - 1.4. Identify opportunities to create cost-efficiencies and maximise use of resources.
  - 1.5. Identify potential risks to be managed throughout the implementation process and develop contingency plans.
  - 1.6. Identify key activities and plan the allocation of roles, responsibilities and timelines.
  - 1.7. Plan product selection and inventory management.
  - 1.8. Plan internal and external communication strategies for communicating implementation roles, responsibilities and timelines.
  - 1.9. Develop performance criteria to evaluate the effectiveness of the concept.
  - 1.10. Document an implementation plan and seek any required approval.
2. Implement the concept.
- 2.1. Communicate concept implementation plan to relevant personnel.
  - 2.2. Monitor the implementation of visual merchandising concept and respond to issues as they arise.
  - 2.3. Provide support and coaching to team members throughout the implementation process.
  - 2.4. Photograph and document concept implementation.
  - 2.5. Finalise concept according to implementation plan.
3. Review concept.
- 3.1. Seek feedback from stakeholders about concept effectiveness.
  - 3.2. Evaluate concept implementation against predetermined performance criteria.
  - 3.3. Review and assess effectiveness of concepts in achieving desired performance outcomes.
  - 3.4. Use findings to make suggestions for future improvements.

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria, are listed here, along with a brief context statement.

### SKILLS

### DESCRIPTION

Numeracy skills to:

- interpret diverse components of budgets and develop resource specifications within budgetary parameters.

Technology skills to:

- access, document and communicate information using digital technologies.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume Implementation Guides -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ca051b1b-5101-4ec2-ac1c-49699303188d>

# Assessment Requirements for SIRRMER005 Implement visual merchandising concepts

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop a visual merchandising implementation plan for one visual merchandising concept, detailing:
  - objectives
  - resource requirements
  - budgeting
  - product selection
  - inventory management
  - key activities and timelines
  - allocation of roles and responsibilities
  - risk considerations and contingency plans
  - communication strategy
  - performance criteria
  - exit strategy
- oversee the implementation of one concept, by:
  - communicating implementation plan to others
  - ensuring objectives and standards are met
  - managing risks and issues
- review visual merchandising concept performance against performance criteria to determine effectiveness and make recommendations for future improvements.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- key aspects of visual merchandising implementation planning:
  - steps in the planning process
  - technologies that support effective implementation planning
  - stakeholder involvement
  - managing implementation and consistency across multiple channels and locations

- alignment to organisational visual merchandising guidelines and standards
- implementation plan formats and key considerations:
  - objectives
  - resource requirements
  - budgeting
  - product selection and availability
  - inventory management
  - key activities and timelines
  - allocation of roles and responsibilities
  - risk considerations and contingency plans
  - communication strategy
  - performance criteria
  - exit strategy
- internal and external factors impacting on the successful implementation of visual merchandising concepts and strategies to minimise impacts:
  - availability of resources and product
  - scalability
  - communication issues
  - budget overruns
  - feedback
  - consistency and quality across multiple channels and locations
- techniques to evaluate and determine the effectiveness of a visual merchandising campaign:
  - profitability
  - operational efficiency
  - success in meeting objectives.

## Assessment Conditions

Skills must be demonstrated in a service industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- visual merchandising concept
- visual merchandising concept performance data.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors, and:

- have worked in a job role for at least two years where they have applied the skills and knowledge within this unit of competency.

# SIRRMER007 Design and install visual merchandising displays

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to design and create visual merchandising displays for promotional purposes. It requires the ability to review a visual merchandising concept to identify display objectives, and to build displays using a range of construction methods and materials.

This unit applies to visual merchandisers and stylists working in a diverse range of sectors and business contexts. They operate with independence, under limited supervision of others, and within established organisational policies and procedures. They may have responsibility for making a range of creative and operational decisions within the scope of their job role.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Merchandising

## Unit Sector

Retail

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

1. Determine display requirements.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1. Access and review a visual merchandising concept to determine display requirements.

- 1.2. Determine display purpose and desired messaging.
  - 1.3. Identify scaling and spatial specifications and constraints that will impact display design.
  - 1.4. Access creative sources of information and research display trends to draw inspiration to inform display design.
2. Design displays.
- 2.1. Design displays that reflect organisational merchandise strategy, style guidelines and standards.
  - 2.2. Plan display structure and positioning that reflects customer traffic flow and visual paths.
  - 2.3. Incorporate multi-sensory elements into display design to enhance customer engagement and interaction with product.
  - 2.4. Design displays that promote cross-selling and generate commercial benefit.
  - 2.5. Design displays that are structurally sound and meet work, health and safety requirements.
  - 2.6. Apply principles and elements of design to display designs.
  - 2.7. Identify resources, materials and construction techniques required to build displays.
  - 2.8. Identify opportunities to create cost-efficiencies and maximise use of resources.
  - 2.9. Produce visual representations of display designs.
  - 2.10. Seek approval for display designs and make any required adjustments.
3. Install displays.
- 3.1. Source materials and resources required to create displays.
  - 3.2. Select appropriate time to build displays that minimises disruption to customers.
  - 3.3. Apply construction techniques and use power tools to build displays.
  - 3.4. Ensure product availability at primary location.
  - 3.5. Consider product grouping based on key features, price, size and type.
  - 3.6. Handle stock and equipment according to safe manual handling and work health and safety requirements to prevent injury to self.
  - 3.7. Finalise displays and adjust as required to ensure visual appeal is maximised.
  - 3.8. Ensure finalised displays meet display design and work, health and safety requirements.

3.9. Clean and tidy work area and remove excess materials and stock.

3.10. Dispose of waste to minimise environmental impacts.

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria, are listed here, along with a brief context statement.

### SKILLS

### DESCRIPTION

Numeracy skills to:

- perform accurate measurements for use in the design and installation of visual merchandising displays.

Initiative and enterprise skills to:

- ensure product selection and placement is managed according to the commercial needs of the business.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SIRRMER007 Design and install visual merchandising displays

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- review a visual merchandising concept to design and create three of the following visual merchandising displays:
  - window display
  - lifestyle display
  - bulk stack display
  - event installation
  - promotional display
  - pop-up shop display
  - exhibition display
  - food display
- create visual representations of the above display designs using digital software on at least one occasion
- use common construction techniques and power tools to work with materials to create visual merchandising displays
- create the above displays:
  - applying the elements and principles of design
  - following work, health and safety requirements
  - within typical workplace time constraints
  - that align with visual merchandising style guidelines and standards
- incorporate the following sensory elements, on at least one occasion, in the above displays:
  - sound
  - smell
  - touch
  - sight.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- types of visual merchandising displays:
  - purpose
  - benefits
  - limitations
- key aspects and considerations of visual merchandising display design:
  - creating alignment with organisational merchandise strategy
  - display purpose and desired messaging
  - scaling
  - spatial specifications
  - product styling
  - customer traffic flow
  - customer visual paths
  - materials
  - construction methods
- current visual merchandising display trends
- sources of creative influence
- tools used creating visual representation of displays
- techniques to achieve the following through visual merchandising displays:
  - increased customer engagement
  - sales generation
  - cross-selling
  - cost-efficiencies
- common types of material and construction methods used in visual merchandising displays:
  - benefits
  - limitations
- elements and principles of design and their application in visual merchandising display design:
  - elements of design:
    - texture
    - form
    - colour
    - space
    - line
  - principles of design:
    - harmony
    - rhythm
    - balance
    - dominance
    - scale

- proportion
- light
- contrast
- use of multi-sensory elements in visual merchandising displays:
  - sound
  - smell
  - touch
  - sight
- key aspects of work, health and safety as it relates to visual merchandising displays.

## Assessment Conditions

Skills must be demonstrated in a service industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- visual merchandising style guidelines and standards
- visual merchandising concept
- display space
- display supplies:
  - materials
  - power tools
  - product
  - display equipment
  - equipment
  - fixtures.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors, and:

- have worked in a job role for at least two years where they have applied the skills and knowledge within this unit of competency.

# SIRRMER009 Plan and organise display lighting

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to plan and organise lighting for visual merchandising installations. It requires the ability to determine lighting requirements, assess suitable lighting options that enhance visual merchandising, and ensure lighting use is sustainable and efficient.

This unit applies to visual merchandisers and stylists working in a diverse range of sectors and business contexts. They operate with independence, under limited supervision of others, and within established organisational policies and procedures. They may have responsibility for making a range of creative and operational decisions within the scope of their job role.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Merchandising

## Unit Sector

Retail

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

1. Determine lighting requirements.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1. Access and review visual merchandising concept and plans to determine functional and ambient lighting requirements.

- 1.2. Identify lighting specifications, budget and constraints.
  - 1.3. Evaluate suitability of existing lighting and identify required changes.
  - 1.4. Review existing site layout to determine feasible lighting options.
  - 1.5. Access creative sources of information and research lighting trends to draw inspiration for display lighting.
  - 1.6. Research and compare the features, costs and benefits of lighting options.
2. Develop lighting plans.
- 2.1. Select lighting solutions that best meet lighting requirements.
  - 2.2. Take opportunities to create cost-efficiencies and maximise use of resources.
  - 2.3. Identify the need for professional contractors to carry out lighting installation work.
  - 2.4. Document lighting costings and ensure plan meets budgeting requirements.
  - 2.5. Incorporate safety and environmental sustainability considerations into the planning process.
  - 2.6. Document lighting plan lighting plan and seek any required approval.
3. Organise lighting installation.
- 3.1. Communicate lighting plan and desired outcomes to relevant personnel.
  - 3.2. Source materials and resources required for lighting installation.
  - 3.3. Select appropriate time to install lighting that minimises disruption to customers.
  - 3.4. Install lighting according to work, health and safety requirements and manufacturer's instructions.
  - 3.5. Monitor the work of contractors as required to ensure lighting plan requirements are met.
  - 3.6. Finalise lighting installation and adjust to ensure visual appeal is maximised and lighting objectives are met.
  - 3.7. Clean and tidy work area and remove excess materials.

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria, are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"><li>interpret documentation and terminology used to describe lighting features and functionality.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>communicate lighting requirements to external personnel and ensure agreed understanding.</li></ul>

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SIRRMER009 Plan and organise display lighting

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- review a visual merchandising concept to develop a lighting plan to achieve three of the following:
  - creation of ambience
  - gain attention and recognition
  - product enhancement
  - influence perception of space
  - emotional engagement
  - decorative purpose
- document the above lighting plan specifying:
  - objectives
  - costings
  - lighting equipment and resource requirements
  - energy usage
  - lighting placement
- monitor the installation of one lighting plan by:
  - communicating key responsibilities
  - evaluating lighting installation against lighting plan.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role of lighting in visual merchandising:
  - creation of ambience
  - gain attention and recognition
  - product enhancement
  - influence perception of space
  - emotional engagement
  - decorative purpose

- common lighting systems and solutions:
  - purpose
  - benefits
  - limitations
  - installation requirements
  - functionality
- key aspects and considerations of lighting planning:
  - objectives
  - budgets and costings
  - lighting equipment and resource requirements
  - energy usage
  - lighting placement
  - store layout and design
  - use of external contractors
  - access to power supply
  - interrelationship with other sensory devices
- colour of light, effects and common uses:
  - warm white
  - cool white
  - daylight
- typical running of lighting:
  - costs
  - energy usage
- key bulb types:
  - efficiency
  - light distribution
  - lifetime
  - colour rendering
  - quantity of light
- key aspects of work, health and safety as it relates to installation of lighting
- environmental sustainability considerations that impact lighting planning.

## Assessment Conditions

Skills must be demonstrated in a service industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- visual merchandising concept

- space to install lighting
- lighting equipment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors, and:

- have worked in a job role for at least two years where they have applied the skills and knowledge within this unit of competency.

# SIRRMER011 Design and install merchandise signage

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to prepare signage for use in the display of merchandise and promotional activity. It requires the ability to determine signage requirements, design suitable signage options and arrange production.

This unit applies to visual merchandisers and stylists working in a diverse range of sectors and business contexts. They operate with independence, under limited supervision of others, and within established organisational policies and procedures. They may have responsibility for making a range of creative and operational decisions within the scope of their job role.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Merchandising

## Unit Sector

Retail

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Determine signage requirements.
  - 1.1. Determine signage purpose and desired messaging and seek any required clarification.
  - 1.2. Identify and confirm signage specifications, budget and constraints.
  - 1.3. Access and review organisational style guidelines and standards to inform signage design.
2. Design signage.
  - 2.1. Access creative sources of information and identify signage trends to draw inspiration to inform design.
  - 2.2. Test and experiment with forms of imagery, typography and language that meet purpose, desired messaging and organisational styling requirements.
  - 2.3. Determine the relevance and use of digital and non-digital signage types.
  - 2.4. Identify resources required to produce signage and confirm feasibility and alignment with budget.
  - 2.5. Determine internal and external resourcing and production requirements.
  - 2.6. Identify opportunities to create cost-efficiencies and maximise use of resources.
  - 2.7. Identify and action measures for achieving resourcing efficiencies in signage production.
  - 2.8. Develop a production brief to provide external parties with clear and detailed signage brief.
3. Produce signage.
  - 3.1. Provide a signage production brief to internal and external signage producers.
  - 3.2. Review signage samples and provide feedback for improvements.
  - 3.3. Produce signage using digital and non-digital signage production techniques.
  - 3.4. Monitor signage production to ensure timelines are met.
  - 3.5. Ensure finalised signage meets signage design.
4. Install signage.
  - 4.1. Install signage and adjust as required to ensure visual appeal is maximised.
  - 4.2. Monitor signage to ensure currency and accuracy of information.
  - 4.3. Dispose of unwanted signage, minimising environmental impacts.
  - 4.4. Correctly store unused signage to prevent damage.

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria, are listed here, along with a brief context statement.

<b>SKILLS</b>	<b>DESCRIPTION</b>
Oral communication skills to:	<ul style="list-style-type: none"><li>• communicate signage requirements to external personnel and ensure agreed understanding.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>• prepare signage designs and produce signage using digital technologies.</li></ul>

# Assessment Requirements for SIRRMER011 Design and install merchandise signage

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- design three of the following types of signage:
  - price signage
  - promotional signage
  - decal signage
  - production information signage
  - directory signage
- design the above signage using the following on at least one occasion:
  - hand drawing
  - digital design software
- prepare a design brief and arrange the external production of one of the above signage types
- use digital and non-digital techniques for the production of one of the above signage types
- install signage on one occasion.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role of signage in merchandising:
  - promotional
  - pricing
  - information and communication
- common signage types and formats of signage, both digital and non-digital:
  - purpose
  - benefits
  - limitations
- common signage materials and production methods
- key aspects and considerations of signage design and planning:
  - budget

- materials
- sizing
- time-frame
- imagery
- quantity
- finishing
- typography and its role in signage:
  - digital typography
  - font styles
  - font sourcing
  - use and applicability of various fonts
- imagery and its role in signage
- digital design and its application in signage production
- print production processes as related to the production of signage:
  - print sizes and formats
  - techniques to achieve efficiencies
  - printing methods
  - print finishes.

## Assessment Conditions

Skills must be demonstrated in a service industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational style guidelines and standards
- space for signage installation
- signage production supplies:
  - materials
  - design tools:
    - digital
    - non-digital.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors, and:

- have worked in a job role for at least two years where they have applied the skills and knowledge within this unit of competency.

# SIRXCEG001 Engage the customer

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to interact and communicate with a diverse range of customers to assist with basic enquiries and contribute to a service culture.

It applies to individuals working in frontline customer service roles in a diverse range of industry sectors and business contexts. They operate with some independence under general supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Customer Engagement

## Unit Sector

Cross-Sector

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

1. Engage customers.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1. Greet customers in a polite and friendly manner within designated response times and make them a priority over other workplace duties.

- 1.2. Clearly communicate with customers using appropriate verbal and non-verbal communication.
- 1.3. Adapt communication style to appropriately communicate with customers from diverse backgrounds.
2. Assist customers.
  - 2.1. Identify and act on opportunities to assist customers and be available to assist customers when needed.
  - 2.2. Question and actively listen to customers to determine their needs.
  - 2.3. Resolve routine customer problems according to individual responsibility level and organisational policies and procedures.
  - 2.4. Address general customer enquiries and provide accurate information in a clear and courteous manner.
3. Contribute to a service culture.
  - 3.1. Act in line with organisational service standards to ensure quality customer service.
  - 3.2. Show interest in customer's needs and maintain a welcoming customer environment free of complacency.
  - 3.3. Seek assistance from relevant personnel when customer's needs are beyond scope of own responsibility.
  - 3.4. Identify and take opportunities to improve customer service standards.
  - 3.5. Refer customer service issues and feedback to relevant personnel for action.

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for SIRXCEG001 Engage the customer

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- contribute to a customer service culture by providing customer service, in line with organisational service standards, across four different customer interactions
- for the above four customer interactions, individually or cumulatively involve:
  - customers from diverse backgrounds
  - resolution of two routine customer problems
  - provision of accurate information to address two general customer enquiries
  - referral of unresolved customer enquiry
  - use of effective communication techniques and positive body language.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational service standards and procedures for:
  - designated customer service response times
  - interacting with customers
  - solving routine customer problems
  - providing information to customers
- basic principles for achieving positive customer service
- verbal and non-verbal communication
- techniques for effective communication:
  - open and closed questioning
  - paraphrasing
  - effective listening
  - voice tonality and volume
- body language and its role in customer service
- effective communication strategies for interacting with customers of diverse backgrounds
- commercial impact of:
  - positive customer service
  - poor customer service

- organisational information and sources of information to assist customer with customer enquiries.

## Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
  - organisational service standards and procedures for:
    - designated customer service response times
    - interacting with customers
    - solving routine customer problems
    - providing information to customers
- customers from a diverse range of backgrounds; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

# SIRXOSM005 Develop a basic website for customer engagement

## Modification History

- Release 2. Supersedes and is equivalent to Release 1. SIRXOSM005 Develop a basic website for customer engagement. Minor changes. Correction to PC numbering.
- Release 1. New unit. No equivalent unit.

## Application

This unit describes the performance outcomes, skills and knowledge required to plan and build a basic website suited to organisation purposes and customer requirements. It requires the ability to plan and develop both the structure and content for the site, and to test and evaluate the site before it goes live.

It covers those skills needed by an organisation that chooses to develop its own site, using website building platforms, rather than using the services of information technology specialists.

It applies to individuals who work independently or with limited guidance from others, including senior operational personnel, business unit managers and, particularly to small business owner operators.

This unit applies to self-employed individuals, and owners and employees of any type of organisation including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Online and Social Media

## Unit Sector

Cross-Sector

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Plan website structure.

2. Develop website content.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1.1. Determine website purpose, structure and style to suit target customer audience requirements.

1.2. Identify required functions, capabilities and security requirements which meet website purpose.

1.3. Determine need for interactive forms and functions to capture customer information and maximise customer interaction.

1.4. Plan layout and navigation flow for appearance, readability, links and ease of use.

1.5. Document structure to facilitate efficient development.

1.6. Research and select website building software applications and hosting services based on website requirements.

1.7. Identify current and future website functionality, and compatibility of software applications to ensure add-ons can be achieved.

2.1. Select and evaluate information to create relevant website content consistent with organisational policy for information that can be publicly shared

2.2. Design interactive forms and user functionality to capture required information.

2.3. Create and utilise a list of key words to promote and ensure search engine optimisation.

2.4. Use language, style and tone suited to organisational brand, image and target audience.

2.5. Select non-text content features to complement website text.

2.6. Check content for accuracy, currency and relevance.

3. Create website pages.
  - 3.1. Utilise functions and templates provided by website building software to create pages and effective navigation.
  - 3.2. Select page titles and key words that reflect purpose and can be easily understood by audience.
  - 3.3. Utilise key words throughout site to maximise traffic to website and targeted content.
  - 3.4. Incorporate non-text content features to enhance page presentation.
  - 3.5. Create interactive forms and functions to capture customer information and maximise interaction.
  - 3.6. Develop linked webpages and ensure links are clearly named and unambiguous.
  - 3.7. Use consistent design features across all pages for ease of readability and navigation.
  - 3.8. Upload files to web hosting service according to technical requirements.
4. Test and critically evaluate website before site goes live.
  - 4.1. Test all website functions and navigation to confirm operational status and ease of use.
  - 4.2. Test useability of interactive forms and functions.
  - 4.3. Check accuracy of content and evaluate design for appeal and match to organisation image.
  - 4.4. Run test searches to ensure key words are driving traffic to the site and targeted content.
  - 4.5. Adjust content, design, key words and navigation flow to ensure website is fit for purpose and meets organisation image requirements.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

- Reading skills to:
- interpret unfamiliar jargon and directions of different

- complexity found website platform building software
- Writing skills to:
- interpret the intent of and extract relevant content from organisational documents.
  - produce cohesive website content using clear and detailed language suitable for purpose and audience
  - create content of online forms to elicit the required information using relevant headings and questions in a logical sequence.
- Planning and organising skills to:
- coordinate multiple elements involved in developing a website in a logical and time efficient sequence.
- Self-management skills to:
- critically evaluate own work to improve website content and functionality
  - take responsibility for development of website from information collection through to evaluation before site goes live.

## Unit Mapping Information

Release 2. Supersedes and is equivalent to Release 1. SIRXOSM005 Develop a basic website for customer engagement. Minor changes. Correction to PC numbering.

Release 1. New unit. No equivalent unit.

# Assessment Requirements for SIRXOSM005 Develop a basic website for customer engagement

## Modification History

- Release 2. Supersedes and is equivalent to Release 1. SIRXOSM005 Develop a basic website for customer engagement. Minor changes. Correction to PC numbering.
- Release 1. New unit. No equivalent unit.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan for and build one basic website, to the point of publication, suited to identified purpose and customer requirements
- integrate at least three of the following functions into the website structure:
  - search facility
  - interactive fillable forms
  - uploading and downloading information
  - active links to other sites
  - links to drive navigation to featured content
  - chat facilities for provision of information
  - facilities for customer feedback, testimonials and commentary on content
  - security of customer and organisational information
- utilise at least four of the following design features into the website to create appeal and ease of readability and access:
  - coloured frames and banners
  - different fonts and colours for headings and text
  - lists using numbers and bullet points
  - images
  - videos
  - animations
  - sound files
  - tables, graphs or charts
- test all functions and links built into the website on two different devices before the site goes live

- evaluate content, design and useability, for two different devices, and identify three areas of potential change to be considered before the site goes live.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role of a website in the communications or marketing mix for particular types of organisations
- common functions provided by basic websites and how these can be effectively used for different organisational purposes:
  - search facility
  - interactive fillable forms
  - uploading and downloading information
  - active links to other sites including social media pages
  - chat facilities for provision of information
  - facilities for customer feedback, testimonials and commentary on content
  - security of:
    - customer private and financial information including through password protection
    - images and information owned by website operator
  - collection of data on traffic and user interaction with site
- a range of website building software providers including website functionality provided, advantages and disadvantages, and associated costs
- compatibility issues that can occur between different types of website building software applications
- types of available templates including how to access and build into a website
- how interactive fillable forms work and how information collected is provided to the website operator
- features of effective website layout and navigation flow
- functions that can be used to drive navigation to featured content and external web pages:
  - highlighted, coloured and underlined words
  - pop up messages
  - hyperlink text and tags in hypertext markup language (HTML)
- general principles for effective website design and how the following design features can be used to create appeal, ease of readability and access:
  - consistency across pages
  - coloured frames and banners
  - headings
  - different fonts and colours
  - lists using numbers and bullet points
  - images, videos, animations and sound files
  - tables, graphs and charts

- navigation tabs with simple directive language relevant to purpose
- how to make web content more accessible to people with disability and they key content of published accessibility guidelines
- techniques for manipulating digital images and graphics, and their insertion into a website
- principles of search engine optimisation (SEO) and how traffic is driven to websites through use of:
  - key words and density on the page
  - organic searches
- features of browsers, search engines and web crawlers, and how they impact on website design, decisions and meta-tags
- how web hosting services operate, a range of services offered by providers and associated costs
- how to obtain and register a domain name and what services are generally included as part of registration
- methods used to test newly developed websites, prior to site going live, and logical sequence of testing.

## Assessment Conditions

This unit and Assessment Requirements references customers as a generic term throughout. However, because different industries and organisations use different terms to describe their stakeholders, learners should use terms appropriate for their industry during assessment.

Learners can develop a website for actual organisational use or one for the purposes of assessment.

Assessment must ensure use of:

- computers and mobile devices for the development and testing of website
- website building software applications.

Assessors must satisfy the assessor requirements nominated in the Standards for Registered Training Organisations, or their successor, and must have workplace experience where they have applied the skills and knowledge covered in this unit of competency.

# SIRXSL001 Sell to the retail customer

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to deliver quality customer service and sell to retail customers. It requires the ability to determine customer needs, match products and services to their needs, and facilitate a sale.

This unit applies to all retail sectors and business sizes from large format stores to small independents. It applies to retail personnel at all levels who play a role in engaging with customers with the purpose of selling.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Sales

## Unit Sector

Cross-Sector

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

1. Establish customer needs.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Connect with the customer within designated response times and establish rapport.
- 1.2. Use questioning and active listening to facilitate effective two-way communication.

- 1.3. Observe and determine appropriate level of interaction based on customer verbal and non-verbal cues.
- 1.4. Determine and clarify customer preferences, needs and expectations.
2. Provide advice on products and services.
  - 2.1. Use product and service knowledge to tailor options to specific customer needs, and offer alternatives when product is unavailable.
  - 2.2. Clearly explain and promote product and service features and benefits where relevant.
  - 2.3. Advise on promotional events where relevant.
  - 2.4. Provide additional information to address customer questions and objections.
  - 2.5. Offer comparisons to competitor product or service range as required.
  - 2.6. Collaborate with the customer to determine product or service option most suited to their needs.
  - 2.7. Take opportunities to upsell and cross sell products and services that enhance customer request and maximise profitability of sale.
3. Facilitate the sale of products and services.
  - 3.1. Select and use appropriate techniques to close sale.
  - 3.2. Direct the customer to designated point-of-sale and process sale, as required, according to organisational procedures.
  - 3.3. Farewell customer on leaving, and invite to return.
  - 3.4. Provide any required after sales service according to organisational procedures.

## Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

- Reading skills to:
- interpret:
    - detailed in-house and supplier product information documents
    - plain English documents that outline organisational customer service policy and procedures.
- Numeracy skills to:
- interpret basic fee information from in-house documents and complete basic pricing calculations.
- Problem-solving skills to:
- respond to customer objections and provide appropriate solutions to satisfy customer needs.
- Technology skills to:
- use technologies equipped with search functionality and information systems to source product and service information.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=ca051b1b-5101-4ec2-ac1c-49699303188d>

# Assessment Requirements for SIRXSL001 Sell to the retail customer

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- interact with four different retail customers to initiate and close the sale of different retail products or services
- demonstrate the following during the above customer interactions:
  - appropriate communication
  - establishment and clarification of customer needs, wants and expectations
  - product and/or service knowledge
  - appropriate sales approach to sell benefits and features of products and/or services
  - overcome objections and close sales
  - upsell and/or cross sell additional products and/or services that complement the sale
  - promotion of customer loyalty and repeat sales.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- appropriate body language for customer service
- basic principles of positive customer service and sales
- open and closed questioning techniques related to the sale of product and services
- verbal and non-verbal cues indicating customer understanding of information
- techniques for effective communication with customers of diverse backgrounds:
  - cultural diversity
  - special needs
- sales techniques:
  - opening techniques
  - recognising buying signals
  - strategies to focus customer on specific products and services
  - selling add-ons and complementary products
  - overcoming customer objections
  - closing techniques

- primary components of consumer protection laws that relate to selling products and services, especially organisational responsibility for supplying products and services as described or substituting suitable products and services when unable
- primary components of privacy law, and actions that retail business must take to protect privacy of customer information
- for the specific retail sector:
  - professional service standards and protocols for retail industry personnel
  - attitudes and attributes expected by the retail industry to work with customers
  - different customer service needs and expectations
- for the particular retail organisation:
  - product and service knowledge:
    - product and service range offering
    - product specifications, features and benefits
  - designated response times for providing customer service
  - customer service procedures including recording of and storing customer details.

## Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
  - organisational policies and procedures for:
    - customer service
    - sale of products and services
    - resolving customer complaints
    - collection and storage of customer details
  - organisational product information and price lists
  - supplier brochures, information sheets and price lists
  - promotional activity information
  - current plain English regulatory documents distributed by government regulators for:
    - consumer protection law
    - privacy law
- customers with whom the individual can interact to sell products and services; these can be:
  - individuals in an industry workplace, or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation

- assessment activities that allow the individual to:
  - work within commercial speed, timing and productivity
  - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

## SITXMPR011 Plan and implement sales activities

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to plan and implement sales activities. It requires the ability to identify and analyse market and customer needs, proactively target current and new customers, plan the operation of sales calls, make calls and prepare sales reports.

The unit applies to all industry sectors, and to those responsible for coordinating sales activities within the parameters of an established sales strategy. Individuals working independently with limited supervision undertake this role. This could include sales and marketing personnel or managers and owner-operators of small businesses.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Marketing and Public Relations

### Unit Sector

Cross-Sector

### Elements and Performance Criteria

#### ELEMENTS

*Elements describe the essential outcomes*

1. Plan sales activities.

#### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1.1. Plan sales activities for existing and potential customers according to marketing plan or other organisational systems.  
1.2. Identify, analyse and incorporate organisation, customer

- and market information into sales planning process.
- 1.3. Source prospects and create profiles.
  - 1.4. Proactively seek and evaluate innovative sales opportunities and take advantage of new technologies and media.
  - 1.5. Estimate potential revenue, based on analysis of information and in consultation with appropriate colleagues.
  - 1.6. Plan activities and practical sales call patterns that maximise opportunities to meet individual and team targets and are consistent with legal, ethical and sustainability requirements.
2. Prepare for sales calls.
    - 2.1. Make sales call appointments in advance where appropriate.
    - 2.2. Develop sales call strategies and tactics based on market knowledge, current sales focus and consultation with colleagues.
    - 2.3. Gather information and support materials to support sales calls.
3. Make sales calls.
    - 3.1. Make sales calls according to agreed call patterns.
    - 3.2. Build relationships with customers through use of effective interpersonal communication styles.
    - 3.3. Develop customer trust and confidence through demonstration of personal and professional integrity.
    - 3.4. Proactively identify and resolve customer issues and problems.
    - 3.5. Use selling techniques to maximise opportunities to meet or exceed sales targets.
    - 3.6. Provide current, accurate and relevant information on product features and benefits according to current marketing focus.
    - 3.7. Encourage feedback from customers and proactively seek market intelligence.
4. Review and report on sales activities.
    - 4.1. Review activities according to agreed evaluation methods and incorporate results into future sales planning.
    - 4.2. Prepare sales reports according to organisational policy and required timeframes.
    - 4.3. Present current and clear market intelligence to those responsible for sales and marketing planning.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Oral communication skills to:	<ul style="list-style-type: none"><li>• establish and conduct positive business relationships.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• calculate potential sales revenues</li><li>• create and interpret sales statistics.</li></ul>
Initiative and enterprise skills to:	<ul style="list-style-type: none"><li>• proactively identify and respond to operational or more systemic customer problems.</li></ul>

## Unit Mapping Information

Supersedes and is equivalent to SITXMPR003 Plan and implement sales activities.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for SITXMPR011 Plan and implement sales activities

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and implement sales activities according to organisational requirements for at least two different operations, products or services, including conducting at least one sales call as part of the activities for each operation, product or service
- use effective communication techniques during sales calls that are part of above sales activities
- prepare a report on each of the above sales activities.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- principles of selling, sales communication and relationship building
- industry structures and interrelationships, industry networks and information sources
- industry and market knowledge appropriate to the sector and organisation:
  - distribution and marketing networks, including those that support the product or service being promoted
  - commission structures
  - current customer and market trends
  - links between sales and other areas of organisational operations
- structure and content of marketing plans and the role of sales in the overall marketing mix
- information inputs into sales planning process:
  - competitive activity
  - current sales figures for nominated periods
  - financial statistics
  - market trends
  - sales and marketing reports
- sales call strategies and tactics:
  - focus on specific products or offers
  - response to competitive activity
  - use of individual customer history

- legal issues that impact on sales activities and sales personnel:
  - Australian consumer law
  - work health and safety obligations
- ethical considerations for sales personnel:
  - honesty in sales
  - targeting particular groups in the community
- evaluation methods to review sales activities
- sustainability considerations for sales activities:
  - reducing waste of printed materials
  - sustainability as a sales tool.

## Assessment Conditions

Skills must be demonstrated in an operational business environment. This can be:

- an industry workplace; or
- a simulated industry environment set up for the purposes of assessment.

Assessment must ensure access to:

- current information and communications technology used by industry to manage sales activities
- marketing plans, operational sales documents, sales reports and sales support materials
- other people with whom the individual can interact. These can be:
  - those in an industry workplace who are assisted by the individual during the assessment process; or
  - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

## TAEDEL301 Provide work skill instruction

### Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

### Application

This unit describes the skills and knowledge required to conduct individual and group instruction, demonstrate work skills and assess the success of training and one's own training performance, using existing learning resources in a safe and comfortable learning environment.

It emphasises the training as being driven by the work process and context, and applies to a person working under supervision as a work skill instructor in a wide range of settings not restricted to training organisations,

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Delivery and facilitation

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise instruction and demonstration	1.1 Gather information about learner characteristics and learning needs 1.2 Confirm a safe learning environment 1.3 Gather and check instruction, demonstration objectives, and seek assistance if required 1.4 Access and review relevant learning resources and learning

ELEMENT	PERFORMANCE CRITERIA
	<p>materials for suitability and relevance, and seek assistance to interpret the contextual application</p> <p>1.5 Organise access to necessary equipment or physical resources required for instruction and demonstration</p> <p>1.6 Notify learners of details regarding the implementation of the learning program and/or delivery plan</p>
2. Conduct instruction and demonstration	<p>2.1 Use interpersonal skills with learners to establish a safe and comfortable learning environment</p> <p>2.2 Follow the learning program and/or delivery plan to cover all learning objectives</p> <p>2.3 Brief learners on any workplace health and safety (WHS) procedures and requirements prior to, and during, training</p> <p>2.4 Use delivery techniques to structure, pace and enhance learning</p> <p>2.5 Apply coaching techniques to assist learning</p> <p>2.6 Use communication skills to provide information, instruct learners and demonstrate relevant work skills</p> <p>2.7 Provide opportunities for practice during instruction and through work activities</p> <p>2.8 Provide and discuss feedback on learner performance to support learning</p>
3. Check training performance	<p>3.1 Use measures to ensure learners are acquiring, and can use, new technical and generic skills and knowledge</p> <p>3.2 Monitor learner progress and outcomes in consultation with the learner</p> <p>3.3 Review relationship between the trainer/coach and the learner, and adjust to suit learner needs</p>
4. Review personal training performance	<p>4.1 Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement</p> <p>4.2 Maintain, store and secure learner records, according to organisational and legal requirements</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Learning	4.1	<ul style="list-style-type: none"> <li>Reflects on practice to improve</li> </ul>
Reading	1.1, 1.3, 1.4, 2.2	<ul style="list-style-type: none"> <li>Sources and interprets processes and procedures, learning resources and information relevant to providing a work instruction and delivery</li> </ul>
Writing	1.4, 1.6, 2.3, 2.6, 2.8, 3.2, 4.1, 4.2	<ul style="list-style-type: none"> <li>Accurately maintains learner records and documentation appropriate to the learning context and audience</li> </ul>
Oral Communication	1.1, 1.6, 2.3, 2.4, 2.6	<ul style="list-style-type: none"> <li>Uses appropriate communication strategies to engage, build rapport, provide instruction, monitor progress and provide feedback to individuals or groups</li> </ul>
Interact with others	1.2, 1.3, 2.1, 2.5, 2.8, 3.2	<ul style="list-style-type: none"> <li>Recognises the importance of consultation and negotiation while collaborating to confirm strategy and achieve required outcomes</li> <li>Asks questions in order to clarify understanding, and to provide and seek feedback</li> <li>Builds rapport to establish effective working relationships and to achieve effective outcomes</li> </ul>
Get the work done	1.1-1.6, 2.1-2.8, 3.1-3.3, 4.1, 4.2	<ul style="list-style-type: none"> <li>Organises and completes work according to defined requirements, taking responsibility for some decisions and sequencing tasks to achieve efficient outcomes</li> <li>Identifies and responds to potential risks, problems and opportunities for improvement and considers options for different approaches</li> </ul>

# Assessment Requirements for TAEDEL301 Provide work skill instruction

## Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- carrying out a minimum of three training sessions, involving demonstrating and instructing particular work skills for at least two different individuals or small groups, with each session addressing:
  - different learning objectives
  - a range of delivery techniques and effective communication skills appropriate to the audience.

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learner characteristics and needs
- the content and requirements of the relevant learning program, and/or the delivery plan
- the sources and availability of relevant learning resources and learning materials
- the content of relevant learning resources and learning materials
- training techniques that enhance learning, and when to use them
- introductory knowledge of learning principles and learning styles
- key workplace health and safety (WHS) issues in the learning environment, including:
  - roles and responsibilities of key personnel
  - responsibilities of learners
  - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
  - risk controls for the specific learning environment.

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to any necessary workplace documents.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## Links

# TAEDEL402 Plan, organise and facilitate learning in the workplace

## Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

## Application

This unit describes skills and knowledge required to plan, organise and facilitate learning for individuals in a workplace, using real work activities as the basis for learning.

It applies to a person working as an entry-level trainer, teacher or facilitator or an employee, team leader or workplace supervisor responsible for guiding learning through work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Unit Sector

Delivery and facilitation

## Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish effective work environment for learning	1.1 Establish, and agree upon, the objectives and scope of the work-based learning 1.2 Analyse work practices and routines to determine their effectiveness in meeting established learning objectives

ELEMENT	PERFORMANCE CRITERIA
	1.3 Identify, and address any workplace health and safety (WHS) implications of using work as the basis for learning
2. Develop a work-based learning pathway	2.1 Address contractual requirements and responsibilities for learning at work 2.2 Arrange for the integration and monitoring of external learning activities with the work-based learning pathway 2.3 Obtain agreement from relevant personnel to implement the work-based learning pathway
3. Establish the learning-facilitation relationship	3.1 Identify the context for learning and the individual's learning style 3.2 Select an appropriate technique or process to facilitate learning, and explain the basis of the technique to the learner 3.3 Develop, document and discuss an individualised learning plan with the learner 3.4 Access, read and interpret documentation outlining the WHS responsibilities of the various parties in the learning environment 3.5 Monitor supervisory arrangements appropriate to learner's levels of knowledge, skill and experience to provide support and encouragement and ensure learner's health and safety
4. Implement the work-based learning pathway	4.1 Explain the objectives of work-based learning, and the processes involved, to the learner 4.2 Sequence the introduction of workplace tasks, activities and processes to reflect the agreed work-based learning pathway 4.3 Encourage learner to take responsibility for learning and to self-reflect 4.4 Develop techniques that facilitate the learner's transfer of skills and knowledge
5. Maintain and develop the learning-facilitation relationship	5.1 Prepare for each session 5.2 Structure learning activities to support and reinforce new learning, build on strengths, and identify areas for further development 5.3 Observe learner cues, and change approaches where necessary, in order to maintain momentum 5.4 Practise ethical behaviour at all times 5.5 Monitor the effectiveness of the learning/facilitation relationship through regular meetings between the parties

ELEMENT	PERFORMANCE CRITERIA
6. Close and evaluate the learning-facilitation relationship	<p>6.1 Carry out the closure smoothly, using appropriate interpersonal and communication skills</p> <p>6.2 Seek feedback from the learner on the outcomes achieved, and the value of the relationship</p> <p>6.3 Evaluate effectiveness of the work-based pathway against the objectives, processes and techniques used</p> <p>6.4 Recommend improvements to work-based practice in light of the review process</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.1, 3.1, 3.4, 3.5, 6.3	<ul style="list-style-type: none"> <li>Accesses and interprets compliance information, contractual information, WHS information, and documents relevant to learning in the workplace, in the context of consultation and continuous improvement, to apply relevance to requirements</li> </ul>
Writing	1.1, 2.3, 3.3, 4.1, 6.3	<ul style="list-style-type: none"> <li>Develops and maintains documentation relevant to workplace learning, including learning plans and evaluations, in accordance with organisational and workplace requirements</li> </ul>
Oral Communication	2.2, 3.3, 4.2, 5.5, 6.1	<ul style="list-style-type: none"> <li>Uses oral communication techniques to identify needs, build rapport, agree on learning plans, facilitate effective learning and monitor practice</li> <li>Selects appropriate vocabulary adjusting language, tone and pace to maintain effective interactions, and to build and maintain engagement with individuals or groups</li> </ul>
Navigate the world of work	1.3, 2.1, 5.4	<ul style="list-style-type: none"> <li>Follows organisational protocols, policies and procedures in the management of records</li> <li>Recognises and responds to contractual and ethical requirements associated with own role</li> </ul>
Interact with others	1.1, 2.3, 3.5, 4.3, 6.2	<ul style="list-style-type: none"> <li>Asks questions to clarify understanding, and seeks feedback and further information</li> <li>Cooperates and collaborates with others as part of</li> </ul>

		routine activities to achieve team results, and to confirm outcomes meet requirements
Get the work done	1.1-1.3, 2.1-2.3, 3.1-3.5, 4.1-4.4, 5.1-5.3, 5.5, 6.1-6.3	<ul style="list-style-type: none"> <li>Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes</li> <li>Uses systematic, analytical processes in complex, routine and non-routine situations, gathering information, and identifying and evaluating options based on organisational needs</li> <li>Identifies and responds to problems and opportunities for improvement, considering options for different approaches</li> <li>Uses information and communications technology (ICT) based tools to design work processes and to complete work tasks</li> </ul>

## Assessment Requirements for TAEDEL402 Plan, organise and facilitate learning in the workplace

### Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

### Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- preparing and facilitating work-based learning
- providing a minimum of two examples of developing work-based learning pathways, that include:
  - identifying needs for learning
  - analysing work practices, work environment and work activities
  - organising and allocating work in a way that reflects learning needs, and provides effective learning opportunities through work processes
- conducting a learning facilitation relationship:
  - with at least two individuals
  - demonstrating communication skills and flexibility
  - demonstrating one or more of the processes, or techniques, identified.

### Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- systems, processes and practices within the organisation where work-based learning is taking place
- systems for identifying skill needs within the workplace
- different learning styles, and how to encourage learning for those who learn in different ways

- workplace health and safety (WHS) relating to the work role, including:
  - hazards relating to the industry and specific workplace
  - reporting requirements for hazards and incidents
  - specific procedures for work tasks
  - safe use and maintenance of relevant equipment
  - emergency procedures
  - sources of WHS information.
  -

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to any documentation relating to workplace procedures required by the candidate.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## TAEDEL404 Mentor in the workplace

### Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

### Application

This unit describes the skills and knowledge required to establish and develop a professional mentoring relationship with an individual in a workplace.

It applies to workplace supervisors or other work colleagues who work under limited supervision and who have responsibility for mentoring one or more individuals in the workplace. This may include, but is not limited to, those who mentor an apprentice or trainee employed by, or undertaking a work placement within, an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Unit Sector

Delivery and facilitation

### Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop a mentoring plan	1.1 Identify scope and boundaries of the mentoring relationship according to organisational procedures 1.2 Document mentoring plan in accordance with organisational requirements 1.3 Establish ground rules and negotiate realistic expectations 1.4 Establish and maintain confidentiality of the relationship in

ELEMENT	PERFORMANCE CRITERIA
	accordance with legislation, policy and procedures
2. Facilitate mentoring relationship	<p>2.1 Develop learner's confidence, self-esteem, respect and trust in the mentoring relationship</p> <p>2.2 Share personal experiences and knowledge with the person being mentored according to agreed objectives</p> <p>2.3 Support the person being mentored to develop and use skills in problem solving and decision making</p> <p>2.4 Use personal and professional networks to assist the person being mentored</p> <p>2.5 Provide information, and guidance to enhance engagement in the workplace</p> <p>2.6 Use techniques for resolving differences without damaging the relationship, and obtain assistance according to organisational policy and procedures</p>
3. Monitor mentoring relationship	<p>3.1 Provide planning assistance and guidance as requested by the person being mentored in a form and style to suit their requirements</p> <p>3.2 Provide feedback to the person being mentored on progress towards achieving the expectations and goals of the mentoring process</p> <p>3.3 Recognise and discuss changes in the mentoring relationship with appropriate stakeholders</p> <p>3.4 Negotiate and manage closure of the mentoring arrangement once objectives have been met</p>
4. Evaluate effectiveness of mentoring	<p>4.1 Establish and discuss benefits gained from the mentoring process</p> <p>4.2 Reflect on and articulate the personal benefits gained from providing mentoring</p> <p>4.3 Identify and report the outcomes of the mentoring arrangement and the benefits to the organisation according to organisational policy and procedures to improve the mentoring system or program</p>

## Foundation Skills

*This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.*

Skill	Performance Criteria	Description
Reading	1.1, 1.4	<ul style="list-style-type: none"> <li>Sources and interprets texts relevant to mentoring context, including organisational policies and learner information</li> </ul>
Writing	1.1, 1.3, 2.5, 3.1, 3.2, 4.3	<ul style="list-style-type: none"> <li>Develops content and documents information relevant to mentoring plan</li> </ul>
Oral Communication	2.4, 3.3, 4.1, 4.2, 4.3	<ul style="list-style-type: none"> <li>Uses appropriate communication techniques to build rapport, trust, engagement and provide guidance and feedback</li> </ul>
Navigate the world of work	1.1, 1.4, 2.6, 4.3	<ul style="list-style-type: none"> <li>Follows legislative requirements, organisational protocols, policies and procedures in workplace mentoring</li> </ul>
Interact with others	1.2, 2.1-2.3, 2.5, 2.6, 3.1, 3.2, 3.4	<ul style="list-style-type: none"> <li>Builds rapport using collaboration with others to achieve joint outcomes and effective interaction</li> <li>Provides mentoring and role modelling to achieve agreed outcomes</li> <li>Cooperates and consults with others to clarify understanding and seek feedback</li> </ul>
Get the work done	1.1-1.4, 2.1-2.6, 3.1-3.4, 4.1-4.3	<ul style="list-style-type: none"> <li>Plans, organises and completes work according to defined requirements taking responsibility for decisions and sequencing tasks to achieve efficient outcomes</li> <li>Identifies and responds to problems, considering options for different approaches</li> </ul>

# Assessment Requirements for TAEDEL404 Mentor in the workplace

## Modification History

Release	Comments
Release1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

## Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, including:

- preparing a mentoring plan between the mentor and mentee that sets out clear objectives for a mentoring relationship that will last at least one year
- facilitating at least three mentoring sessions
- documenting information on sessions, including comments and notes from both mentor and mentee.
- 

## Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- relevant policy, legislation, codes of practice and national standards likely to impact on the provision of workplace mentoring, including training contracts and responsibilities of employer, registered training organisation (RTO) and funding body where they exist
- mentoring methodologies and strategies
- learning theories in relation to mentoring
- strategies for working with a mentee including encouraging self reflection, confidence and the building of rapport
- acceptable behaviour in the mentoring relationship
- equal employment opportunity, equity and diversity principles
- how a mentor can support the mentee's employer to meet its WHS obligations for the mentee.
-

## Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to:

- documentation of any existing training plan or contract if applicable to the mentoring relationship.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

## TLIA0019 Despatch stock

### Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

### Application

This unit involves the skills and knowledge required to despatch stock.

It includes analysing orders to identify work requirements, following workplace processes to prepare goods for despatch, and completing despatch tasks in accordance with workplace procedures and schedules.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Competency Field

A – Handling Cargo/Stock

### Unit Sector

Not applicable.

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

#### 1 Review order to identify work requirements

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |            |   |
|------------|---|
| <b>1.1</b> | Order request, pick request and consignment note are reviewed for completion and despatch instruction |
| <b>1.2</b> | Required schedules for despatch are identified  |

- |          |   |  |
|----------|---|--|
|          | <b>1.3</b>  | Products ordered are located and verified  |
|          | <b>1.4</b>  | Despatch schedule, storage location and product knowledge are used to plan sequence of work  |
|          | <b>1.5</b>  | Appropriate material handling equipment is selected within required work health and safety (WHS)/occupational health and safety (OHS) regulations and timeframe for the despatch |
| <b>2</b> | <b>Follow workplace processes to prepare goods for despatch</b>       |  |
|          | <b>2.1</b>  | Goods for despatch are selected and checked against labels and other identification systems  |
|          | <b>2.2</b>  | Products are sorted, assembled and consolidated  |
|          | <b>2.3</b>  | Orders are secured and placed in storage or despatch zones in accordance with schedule   |
| <b>3</b> | <b>Complete despatch following workplace procedures and schedules</b> |  |
|          | <b>3.1</b>  | Records are completed, and labels and appropriate documentation are attached   |
|          | <b>3.2</b>  | Load labels and documentation are checked and loading is organised in accordance with workplace procedures and dangerous goods codes as required                                 |
|          | <b>3.3</b>  | Final check of load labels and despatch and transfer documentation is completed in accordance with workplace procedures and statutory requirements                               |
|          | <b>3.4</b>  | Goods are confirmed as available for despatch and appropriate reporting is undertaken  |

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to TLIA2021 Despatch stock.

## Links

Companion Volume Implementation Guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

# Assessment Requirements for TLIA0019 Despatch stock

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating and working effectively with others when organising despatch operations
- completing documentation related to organising despatch operations
- completing tasks within work health and safety (WHS)/occupational health and safety (OHS) guidelines and workplace procedures
- modifying activities depending on operational contingencies, risk situations and environments
- interpreting and following instructions, procedures and labels relevant to organising despatch operations
- selecting and using relevant equipment and communications technology when organising despatch operations
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS/OHS standards.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- documentation and recording requirements for despatch operations
- equipment used during despatch operations and the precautions and procedures that should be followed in its use
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for despatching goods
- potential problems and possible solutions relating to despatching goods
- relevant legislation, regulations, codes of practice and industry guidelines for despatching operations
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout, obstacles and specialised zones
- workplace procedures and policies for organising despatch operations.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

## TLIA0020 Package goods

### Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

### Application

This unit involves the skills and knowledge required to package goods.

It includes selecting materials, packing, and labelling packaged goods to the required labelling standards and regulatory requirements.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Competency Field

A – Handling Cargo/Stock

### Unit Sector

Not applicable.

### Elements and Performance Criteria

#### ELEMENTS

#### PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

**1 Select materials and pack goods**

**1.1**

Packaging specifications and order packaging documentation are obtained and interpreted

**1.2**

Packaging equipment suitable for the goods to be packed is selected and checked for safe operational use

		<b>1.3</b>	Packaging materials are identified and matched to specifications
		<b>1.4</b>	Work plan is followed, materials are used economically, and appropriate packaging is used and secured to minimise loss and damage in transit or storage
		<b>1.5</b>	Work is conducted in accordance with work health and safety (WHS)/occupational health and safety (OHS) requirements
		<b>1.6</b>	Completed packed goods are stacked to minimise damage in accordance with workplace procedures
		<b>1.7</b>	Hazards and control measures are identified and implemented prior to commencing work
<b>2</b>	<b>Label packaged goods</b>	<b>2.1</b>	Workplace labelling standards are identified and followed
		<b>2.2</b>	Appropriate goods handling, labelling and other identification symbols are used
		<b>2.3</b>	Relevant documentation is attached in accordance with workplace procedures
		<b>2.4</b>	Workplace documentation is completed according to workplace procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to TLIA2011 Package goods.

# Assessment Requirements for TLIA0020 Package goods

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, and performance criteria on at least one occasion and include:

- applying safety precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- attaching and completing relevant documentation to goods
- checking and monitoring equipment performance
- checking operation of packaging equipment in terms of service schedule and standard operating procedures
- communicating and working effectively with others when conducting work
- completing documentation related to work activities when packaging goods
- following work activities in terms of planned schedule
- reading and interpreting instructions, procedures and labels
- selecting and using relevant materials
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- differences in equipment
- documentation requirements for packaging goods such as a workplan
- housekeeping standards and procedures
- operational work systems and equipment for packaging goods problems associated with packaging goods and appropriate action to resolve these problems
- potential problems and possible solutions relating to packaging goods
- relevant legislation, regulations, codes of practice, industry guidelines and workplace policies and procedures for packaging goods
- relevant WHS/OHS and environmental protection procedures and guidelines

- site layout and obstacles
- size, shape and special requirements estimations of goods.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- relevant and appropriate materials, tools, equipment and PPE currently used in industry
- applicable documentation including legislation, regulations, codes of practice, workplace procedures and operation manuals.

## TLIA0023 Receive goods

### Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

### Application

This unit involves the skills and knowledge required to receive goods.

It includes identifying workplace procedures and documentation requirements for receiving goods; checking and inspecting goods on arrival and completing workplace documentation; and unloading, unpacking and storing stock.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Competency Field

A – Handling Cargo/Stock

### Unit Sector

Not applicable.

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

**1 Identify workplace procedures and documentation requirements for receiving goods**

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

**1.1** Workplace procedures for receiving goods are identified

**1.2** Purpose of documents associated with receiving goods is interpreted

		<b>1.3</b>	Workplace documentation requirements for receiving goods, including dangerous goods, are identified
		<b>1.4</b>	Hazards are identified, risks are assessed and control measures implemented in accordance with workplace procedures
<b>2</b>	<b>Check and inspect goods on arrival and complete workplace documentation</b>	<b>2.1</b>	Procedures for checking goods against orders or manifests are identified and followed
		<b>2.2</b>	Discrepancies and damaged goods are reported to relevant personnel
		<b>2.3</b>	Non-conforming goods are appropriately documented and despatched or stored in accordance with workplace procedures
<b>3</b>	<b>Unload, unpack and store stock</b>	<b>3.1</b>	Appropriate manual handling techniques and equipment are identified and used
		<b>3.2</b>	Safe work procedures and relevant personal protective equipment (PPE) are used when unloading, unpacking and storing stock
		<b>3.3</b>	Appropriate storage locations and requirements for products with specific attributes are identified
		<b>3.4</b>	Goods are unloaded and unpacked in accordance with workplace procedures
		<b>3.5</b>	Assistance is sought from relevant personnel to maintain safe and effective work
		<b>3.6</b>	Directions are followed to store stock in appropriate areas

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to TLIA2013 Receive goods.

# TLIA0025 Assess and monitor optimum stock levels

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Application

This unit involves the skills and knowledge required to assess and monitor optimum stock levels. It includes assessing projected demand, assessing variables impacting on optimum stock levels, and determining and monitoring optimum inventory levels.

Work is performed in accordance with workplace requirements and relevant regulations. There is the need to exercise discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

A – Handling Cargo/Stock.

## Unit Sector

Not applicable.

## Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- |                                  |   |
|----------------------------------|---|
| <b>1 Assess projected demand</b> | <b>1.1</b> Current inventory levels are monitored and recorded following workplace procedures and regulatory requirements |
|                                  | <b>1.2</b> Immediate inbound and outbound inventory levels are considered in analysis                                     |

- 1.3 Information and data from sales plan and stock movement history are analysed, as required
  - 1.4 Projected high and low volume periods are determined from the analysis of sales plan and historical stock movement data, as required
  - 1.5 Seasonal nature of stock demand is determined from the analysis of sales plan and stock movement data
  - 1.6 Required inventory levels are determined from the analysis of production and vendor supply cycle stages
- 2 Assess variables that impact on optimum stock levels**
- 2.1 Stock supply and consignment delivery lead times are determined
  - 2.2 Internal processing and distribution times are determined
  - 2.3 Spoilage, obsolescence times and shelf life are calculated, as required
  - 2.4 Maximum stock carrying capacity is assessed
  - 2.5 Physical and human resources are assessed in relation to projected stock requirements
  - 2.6 Contingencies are developed for abnormal distribution disruptions to supply chain
- 3 Determine optimum inventory levels**
- 3.1 Supply and distribution lead times are considered
  - 3.2 Optimum stock levels are calculated, and risk assessed against business activities
  - 3.3 Optimum inventory levels are confirmed with appropriate personnel and outcomes of previous analysis
- 4 Monitor optimum inventory levels**
- 4.1 Inventory benchmarks are continually compared to current and future sales and turnover requirements
  - 4.2 Adjustments to inventory levels are undertaken in consultation with relevant personnel, workplace processes and within scope of authority
  - 4.3 Changes and requests for adjustments to inventory levels are documented in accordance with workplace procedures
  - 4.4 Physical and human resources are identified and used to maintain and monitor optimum inventory levels

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to TLIA4028 Assess and monitor optimum stock levels.

## Links

Companion Volume Implementation Guides are found in VETNet -

# Assessment Requirements for TLIA0025 Assess and monitor optimum stock levels

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- assessing and modifying activities depending on operational contingencies, risk situations and environments
- communicating and working effectively with others
- completing relevant documentation utilising workplace systems and procedures
- considering projected demand, contingencies and stock level variables, including:
  - cultural
  - external storage capacity
  - seasonal
  - supplier activity
- determining and monitoring optimum inventory levels and adjustments
- interpreting and following relevant instructions, procedures and policies
- planning and organising resource availability, including the competencies of individuals in a team or group
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- selecting and applying relevant data analysis using available technology
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- data and documentation requirements when assessing and monitoring optimum stock levels
- impact of failing to maintain optimum stock levels on the business
- national codes and regulations, business policies, plans and workplace procedures for maintaining stock levels
- problems when assessing and monitoring optimum stock levels and appropriate solutions
- purpose and use of key information required when optimising stock levels
- supply arrangements, resources, management and workplace operating systems to optimise stock levels
- worksite layout and organisational structure.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently (PPE) used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

# TLIA0031 Organise transport of freight or goods

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Application

This unit involves the skills and knowledge required to organise the transport of freight or goods.

It includes planning transport operations, organising freight transport, completing the required documentation, finalising organisational processes in compliance with relevant codes of practice and regulations, and applying policies and procedures to organise the transport of freight or goods.

It is performed under general supervision, with some accountability and responsibility for self and others in achieving prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

A – Handling Cargo/Stock.

## Unit Sector

Not applicable.

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### 1 Plan transport operations

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

**1.1** Product knowledge of goods and workplace procedures are applied to the transportation analysis process

**1.2** Domestic and international regulations, codes and procedures for

transporting freight are identified

**1.3** Hazards are identified, risks are assessed and control measures are implemented

**1.4** Resources are identified to match the task

**1.5** Work processes are planned to meet agreed timelines

**1.6** Types of transportation required for the freight or goods are identified to match customer requirements, freight type and delivery time

**1.7** Goods transfer methods between modes of transport are selected, as required

## **2 Organise freight transport**

**2.1** Personnel are informed of work requirements and timelines

**2.2** Handling methods suitable to the goods and transport method are selected

**2.3** Personnel, equipment, temporary storage areas and contingencies, are allocated and supervised, as required

**2.4** Discrepancies in freight are noted and appropriate action is undertaken in accordance with workplace procedures

**2.5** Freight is secured to minimise damage to contents

**2.6** Work processes are monitored to ensure human resources and equipment are maintained at productive levels in accordance with workplace and work health and safety (WHS)/occupational health and safety (OHS) requirements

## **3 Complete organisational processes**

**3.1** Monitoring processes to track freight movement are implemented

**3.2** Reporting requirements are communicated to appropriate personnel

**3.3** Workplace documents and records are checked for completion and stored in accordance with workplace procedures

## **Foundation Skills**

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to TLIA4032 Organise transport of freight or goods.

## Links

Companion Volume Implementation Guides are found in VETNet -

# Assessment Requirements for TLIA0031 Organise transport of freight or goods

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying, monitoring and managing resources for transport of freight or goods
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- planning own work, prioritising work activities, predicting consequences and identifying improvements
- planning transport operations of freight or goods
- reading, interpreting and following relevant instructions, procedures and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with regulatory requirements and workplace procedures
- securing freight in accordance with regulations
- selecting and using required communication systems
- using suitable handling methods
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- possible problems and appropriate solutions
- procedures for assessing storage and transport requirements and options
- procedures for calculating/estimating weight, volumes and dimensions
- procedures for coordinating the transfer and storage of goods, including multi-modal transport
- procedures for identifying and evaluating information needed to facilitate the transport of freight
- procedures for organising required permits and for completing transport documentation
- procedures for selecting transport/storage equipment and systems
- relevant legislative requirements and codes of practice
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- sources of information and documentation for organising the transport of freight and goods.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation, including legislation, regulations, codes of practice, workplace procedures and operation manuals.

# TLIA3016 Use inventory systems to organise stock control

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Application

This unit involves the skills and knowledge required to use inventory systems to organise stock control in accordance with relevant regulations and workplace requirements, as part of work activities in the transport and logistics industry.

It includes identifying inventory and stock control systems in use in the workplace, using re-order procedures to maintain stock levels, organising cyclical stock counts and reporting discrepancies or variances.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

A – Handling Cargo/Stock

## Unit Sector

Not applicable.

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

#### 1 Identify inventory

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Workplace inventory and stock control equipment, software

<b>and stock control systems in use in the workplace</b>		and systems are identified
	1.2	Reasons for common database approach to inventory records and documentation in the warehouse are explained
	1.3	Procedures for identifying and reporting discrepancies or variances are identified
<b>2 Use re-order procedures to maintain stock levels</b>	2.1	Stock level maintenance checking is conducted
	2.2	Stock is re-ordered to meet stock level maintenance requirements in accordance with workplace policies and procedures
	2.3	Data is accurately entered and extracted from the inventory/records system using appropriate workplace procedures
<b>3 Organise cyclical stock counts and report discrepancies or variances</b>	3.1	Process for cyclical stock count is planned and work is allocated to team members
	3.2	Clear directions on tasks to be performed are given
	3.3	Stocktake activities are conducted in accordance with workplace procedures
	3.4	Types and causes of record discrepancies are identified
	3.5	Procedures for noting and correcting minor discrepancies are used
	3.6	Major discrepancies are reported in accordance with workplace procedures
	3.7	Workplace documentation is completed
<b>4 Produce reports on record keeping and inventory functions</b>	4.1	Types of reports to be produced from inventory records systems are identified
	4.2	Reports are produced in accordance with workplace procedures and relevant regulatory requirements

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to TLIA3016A Use inventory systems to organise stock control.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

# Assessment Requirements for TLIA3016 Use inventory systems to organise stock control

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with workplace procedures
- selecting and using relevant communications, computing and office equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applications of different types of inventory systems and stock management approaches
- Australian codes and regulations relevant for organising stock control
- computer records and documentation requirements for stock control, including forms, checklists and inventory reports
- housekeeping standards and procedures
- operational inventory systems, equipment, management and site operating systems for controlling stock
- principles of operation and functions of inventory systems
- workplace procedures and policies for using inventory systems to organise stock control
- workplace processes for records management and producing inventory reports.

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in *the Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

## TLID0011 Use bulk transfer equipment (dry)

### Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

### Application

This unit involves the skills and knowledge required to use bulk transfer equipment for dry products in accordance with relevant state/territory regulations.

It includes planning work, transferring product, monitoring and operating controls, and completing all operations, as required.

Work is performed under general supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Not applicable.

### Competency Field

D – Load Handling

### Unit Sector

Not applicable.

### Elements and Performance Criteria

#### ELEMENTS

Elements describe the essential outcomes.

#### 1 Plan bulk product transfer work

#### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

**1.1** Hazards are identified, risks assessed and control measures implemented

**1.2** Dangerous or hazardous products requiring handling are identified in accordance with workplace procedures

- 1.3 Traffic flow and work area conditions are assessed to ensure safe operation
  - 1.4 Product characteristics are taken into account when selecting method, equipment and specialised attachments to transfer product
  - 1.5 Bulk transfer of dry products is planned, taking into account load requirements, transfer method, storage facility and transport mode, load weight, dimensions and equipment capacity
  - 1.6 Personal protective equipment (PPE), safety equipment, signage, barriers and precautions are identified
  - 1.7 Procedures to deal with spills, leakages and ruptures are identified
  - 1.8 Customer requests for variation to agreed operations are referred to relevant personnel
- 2 Transfer bulk product**
- 2.1 Bulk transfer equipment is inspected and prepared in accordance with manufacturer specifications
  - 2.2 Dry product handling procedures are implemented in accordance with product guidelines and workplace procedures
  - 2.3 Instruments and gauges are monitored during bulk transfer to ensure operation is consistent with safety requirements, workplace procedures and manufacturer specifications
  - 2.4 Operation is monitored for safety and efficiency
  - 2.5 Faults or damage to equipment are identified and reported in accordance with workplace procedures
  - 2.6 Bulk transfer equipment controls are monitored and operated in accordance with manufacturer specifications and workplace procedures
- 3 Complete bulk transfer operations**
- 3.1 Bulk transfer equipment is shut down in accordance with manufacturer specifications and workplace procedures
  - 3.2 Housekeeping of work area is undertaken in accordance with workplace procedures

- 3.3 Bulk transfer equipment is cleaned and stored in accordance with workplace procedures
- 3.4 Documentation is completed in accordance with workplace procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

## Unit Mapping Information

This unit replaces and is equivalent to TLID2021 Use specialised bulk transfer equipment (dry).

## Links

Companion Volume Implementation Guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

# Assessment Requirements for TLID0011 Use bulk transfer equipment (dry)

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying workplace procedures
- communicating and working effectively with others
- estimating mass, volume and special requirements of dry bulk products
- identifying and using equipment required to transfer dry bulk product
- identifying goods coding, Australian Dangerous Goods (ADG) Code markings and emergency information panels
- interpreting and following relevant instructions, procedures and information
- monitoring equipment performance
- monitoring work activities
- operating and adapting to differences in specialised equipment in accordance with workplace procedures
- reporting faults and damage in accordance with workplace procedures
- selecting and using required personal protective equipment (PPE).

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- current ADG Code
- housekeeping standards and procedures
- relevant work health and safety (WHS)/occupational health and safety (OHS) procedures and guidelines for using bulk transfer equipment
- risks when transferring dry bulk product and related precautions to control the risk
- workplace procedures for the use of equipment to transfer dry bulk products.

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training

Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- relevant materials, tools, equipment and PPE
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals.

# TLID0021 Store and handle dangerous goods and hazardous substances

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Application

This unit involves the skills and knowledge required to store and handle dangerous goods and hazardous substances.

It includes identifying requirements for working with dangerous goods and/or hazardous substances, confirming site incident procedures and selecting handling techniques in accordance with relevant work health safety (WHS)/occupational health and safety (OHS) regulations concerning the safe handling of dangerous goods and hazardous substances, within the transport and logistics industry.

Work is performed under general supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Not applicable.

## Competency Field

D – Load Handling

## Unit Sector

Not applicable.

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Identify requirements for working with dangerous goods and/or hazardous substances**
  - 1.1 Dangerous goods and/or hazardous substances are identified from information, including class labels, manifests and other documentation
  - 1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
  - 1.3 Storage requirements for dangerous goods and/or hazardous substances are identified and applied
  - 1.4 Legislative requirements for dangerous goods and/or hazardous substances are used to plan work activities
  - 1.5 Handling procedures for different classes and characteristics of goods are identified
  - 1.6 Confirmation is sought from relevant personnel where dangerous goods and/or hazardous materials do not appear to be appropriately marked
- 2 Confirm site incident procedures**
  - 2.1 Incident reporting processes are identified
  - 2.2 Emergency equipment is identified and checked in accordance with workplace procedures and statutory regulations
  - 2.3 Emergency procedures are identified and confirmed
- 3 Select handling techniques**
  - 3.1 Load handling and shifting techniques are identified in accordance with particular goods and workplace procedures
  - 3.2 Handling equipment is checked for conformity with workplace requirements and manufacturer guidelines
  - 3.3 Suitable signage or placards are checked for compliance with workplace procedures, as required

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the TLI Transport and Logistics Training Package Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to TLID2003 Handle dangerous goods/hazardous substances.

# Assessment Requirements for TLID0021 Store and handle dangerous goods and hazardous substances

## Modification History

**Release 1.** This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- completing relevant documentation
- estimating weights and dimensions of loads and any special requirements
- identifying and assessing handling and storage precautions and requirements for dangerous goods and/or hazardous substances
- identifying and selecting safety requirements for handling dangerous goods and/or hazardous substances
- identifying containers and goods coding, markings and emergency information panels for mode of transport and/or for storage selected, as required
- identifying dangerous goods/hazardous substances using labels, Globally Harmonized System of Classification and Labelling of Chemicals (GHS), International Maritime Dangerous Goods (IMDG) Code markings, HAZCHEM signs and other relevant identification criteria
- identifying job and site hazards, and planning work to minimise risks
- maintaining workplace records and documentation
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, regulations, information and signs
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and include knowledge of:

- housekeeping standards and workplace procedures
- problems that may arise when handling of dangerous goods and hazardous substances and actions that should be taken to prevent or solve these problems
- recognising hazards and applying precautions and required action to minimise, control or

- eliminate recognised hazards
- relevant regulations, codes and signage concerning handling dangerous goods and hazardous substances including:
  - Australian Dangerous Goods (ADG) Code
  - Australian Standards
  - GHS
  - HAZCHEM signs
  - IMDG Code
- risks when handling dangerous goods and hazardous substances and related precautions to control risk
- workplace procedures for handling and storing dangerous goods and hazardous substances

## Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations

# Assessment Requirements for TLID2003 Handle dangerous goods/hazardous substances

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating and working effectively with others
- completing relevant documentation
- determining required permits
- estimating weight and dimensions of load and any special requirements
- identifying and assessing handling and storage precautions and requirements for dangerous goods/hazardous substances
- identifying and selecting safety requirements for handling dangerous goods/hazardous substances
- identifying containers and goods coding, markings and emergency information panels for mode of transport storage selected
- identifying dangerous goods/hazardous substances using labels, International Maritime Dangerous Goods (IMDG) Code markings, HAZCHEM signs and other relevant identification criteria
- identifying job and site hazards, and planning work to minimise risks
- implementing contingency plans
- maintaining workplace records and documentation
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule, predicting consequences and identifying improvements
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, regulations, information and signs
- recognising hazards and applying precautions and required action to minimise, control or eliminate recognised hazards
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures

- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- selecting appropriate equipment and work systems including PPE
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- equipment applications, capacities, configurations, safety hazards and control mechanisms
- housekeeping standards and procedures
- permit and licence requirements
- problems that may arise when handling of dangerous goods and hazardous substances and actions that should be taken to prevent or solve these problems
- relevant aspects of current Australian Dangerous Goods (ADG) Code and relevant Australian Standards
- relevant regulations and codes concerning handling dangerous goods/hazardous substances
- risks when handling dangerous goods/hazardous substances and related precautions to control risk
- workplace procedures for handling and storing dangerous goods/hazardous substances.

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy

requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, current ADG Code, codes of practice and operation manuals
- relevant materials, tools, equipment, and personal protective equipment currently used in industry.

# TLILIC0003 Licence to operate a forklift truck

## Modification History

Release 1. This is a release of this unit of competency in the TLI Transport and Logistics Training Package.

## Application

This unit specifies the skills and knowledge required to operate a forklift truck safely in accordance with all relevant legislative requirements. Competence in this unit, does not in itself result in a HRWL licence to operate this plant.

Forklift truck means a powered industrial truck equipped with lifting media made up of a mast and an elevating load carriage to which is attached a pair of fork arms or other attachments that can be raised 900 mm or more above the ground, but does not include a pedestrian-operated truck or a pallet truck.

A person performing this work is required to hold a forklift truck High Risk Work Licence (HRWL).

This unit requires a person operating a forklift truck to:

- plan for the work/task
- prepare for the work/task
- perform work/task
- pack up

## Licensing/Regulatory Information

Legislative and regulatory requirements are applicable to this unit of competency.

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations and meets Commonwealth, State and Territory HRWL requirements.

The National Assessment Instrument (NAI) is the mandated assessment for the HRWL to operate the relevant licencing class as detailed in this unit.

## Pre-requisite Unit

Not applicable

## Competency Field

LIC - Licencing Units

## Unit Sector

Not applicable

## Elements and Performance Criteria

### ELEMENTS

Elements describe the essential outcomes.

### PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

#### 1 Plan work/task

- 1.1 Task requirements are identified from work orders or equivalent and confirmed with relevant people and site inspection is conducted in accordance with workplace procedures
- 1.2 Work area operating surface is assessed to determine suitability for operational use of forklift truck in accordance with workplace procedures
- 1.3 Suitability of forklift truck and attachment working load limit (WLL) is determined for the load/s and work/task requirements in accordance with manufacturer requirements and workplace procedures
- 1.4 Working area is inspected and appropriate paths for operating the forklift truck and moving and placing load/s in work area are assessed and managed in accordance with workplace procedures
- 1.5 Hazard and risk control measures are identified and reported to relevant person/s in accordance with workplace procedures
- 1.6 Traffic management plan implementation is confirmed in accordance with workplace procedures
- 1.7 Appropriate communication procedures are identified with relevant people in accordance with workplace procedures
- 1.8 All work is confirmed to ensure coverage of work/task requirements for the relevant work area is in accordance with workplace procedures

- 2 Prepare for work/task**
- 2.1** Consultation with workplace person/s is maintained to ensure workplan is clear and consistent with site requirements in accordance with safe work procedures
  - 2.2** Weather and work environmental conditions are assessed to determine any impact on forklift truck operations in accordance with manufacturer requirements and safe work procedures
  - 2.3** Risk control measures for hazards identified are checked for implementation in accordance with safe work procedures
  - 2.4** Forklift truck is accessed in a safe manner in accordance with manufacturer requirements and workplace procedures
  - 2.5** Forklift truck logbook is checked in accordance with manufacturer, regulatory requirements and safe work procedures
  - 2.6** Pre-start checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with safe work procedures and manufacturer requirements
  - 2.7** Forklift truck is set up correctly with any relevant attachments as per work plan in accordance with relevant manufacturer requirements including data plate and safe work procedures
  - 2.8** Operational checks are carried out and any damage and defects are reported, recorded and appropriate action is taken in accordance with manufacturer requirements and safe work procedures
  - 2.9** Hazard and risk control measures are checked for implementation and communicated to people in the work area in accordance with safe work procedures
- 3 Perform work/task**
- 3.1** Weight and positioning of load is assessed to ensure compliance with forklift truck data plate requirements and in accordance with safe work procedures

- 3.2 Forklift truck is operated safely in accordance with manufacturer requirements and safe work procedures
  - 3.3 Loads are monitored constantly when lifting, moving, lowering and placing to ensure stability of load and avoidance of hazards in accordance with safe work procedures
  - 3.4 Unplanned and unsafe situations are responded to in accordance with safe work procedures
  - 3.5 Loads are picked up, transported and placed using all forklift truck movements in accordance with safe work procedures
  - 3.6 Forklift truck is parked, switched off and isolated appropriately in accordance with manufacturer requirements and safe work procedures
- 4 Pack Up**
- 4.1 Forklift truck shutdown procedures are carried out in accordance with manufacturer requirements and safe work procedures
  - 4.2 Forklift truck is secured to prevent unauthorised access/use in accordance with safe work procedures

## Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency

## Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

## Unit Mapping Information

This unit replaces and is equivalent to TLILIC2001 Licence to operate a forklift truck

# Assessment Requirements for TLILIC0003 Licence to operate a forklift truck

## Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

## Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and include:

- applying safe operating procedures for a forklift truck including:
  - maintaining safe operating speed
  - travelling with load lowered to an appropriate height for the terrain, operating surface and visibility in relation to direction of travel
- applying relevant forklift truck manufacturer requirements and data plate information and approved modifications to attachments fitted are in accordance with manufacturer requirements
- carrying out pre-start checks, including visual inspection which must include:
  - battery charge as required by manufacturer requirements
  - checking and interpreting data plate/s are relevant to the attachment and the forklift truck
  - checking for signs of paint separation and stressed welds indicating potential structural weakness
  - document evidence of damage
  - engine / mechanical fluid level checks including fuel as required by manufacturer requirements
  - ensuring availability of correct forklift truck logbook and updating records as required
  - ensuring forklift truck tyres or other attachment/s are securely fitted
  - ensuring seat and mirrors are adjusted appropriately and seat belt is functional
  - fluid leaks
  - lights are working effectively
  - safety equipment checks
  - signage and labels to ensure they are visible and legible
  - wheels and tyres for damage/correct inflation if applicable
- conducting and applying risk and hazard assessment strategies including:
  - insufficient lighting
  - other specific hazards including dangerous goods
  - overhead hazards and fixed structures, roof beams and doorways
  - restricted and poorly ventilated areas

- surface suitability based on forklift truck and task requirements
- the risk of collision with people, moving plant and fixed structures
- weather conditions
- complying with Commonwealth, State and Territory Work Health and Safety (WHS)/Occupational Health and Safety (OHS)/Occupational Safety and Health (OSH) legislation, regulations safe work and workplace procedures
- conducting operational checks, which must ensure:
  - all controls are located, identified and tested for functionality
  - all hydraulic functions operated to maximum extension and ensuring attachment (if fitted) movements and control functions are smooth and comply with operating requirements
  - hazard warning systems (e.g. reversing beepers, lights and horns) are functional
  - recording and maintaining accurate information relating to forklift truck operations
  - safety devices as fitted
  - start-up is in accordance with manufacturer requirements
  - steering, transmission and brake functions comply with operating requirements
  - there are no unusual noises
- confirming and following traffic management plan procedures relevant to their role in the work area
- conducting relevant procedures for refuelling and isolating fuel/power source as per manufacturer requirements using appropriate PPE
- determining relevant lifting attachment to perform work/task
- determining lift requirements including:
  - positioning of unusually balanced/shaped loads
  - centre of gravity
  - dynamic nature of load
  - tyre/attachment positioning
  - weight
- ensuring risk control measures within the work area are effective as per workplace procedures
- identifying, isolating and tagging out defective equipment and reporting to authorised person/s
- interpreting and confirming relevant documentation, workplace instructions, safety information, emergency procedures for the work task and relevant area
- interpreting workplace procedures in relation to various environmental conditions
- maintaining communication with other workplace personnel through using worksite procedures including:
  - audible and visual warning devices
  - signage
  - two-way radio
  - verbal instructions
  - written instructions
- maintaining three points of contact whilst accessing and egressing forklift truck and ensuring

- rungs / steps are free of hazards
- operating and monitoring safe forklift truck operations using minimum 250kg dynamic and non-dynamic loads that include:
    - aligning tynes/attachment to load
    - carrying out a lift to 75% of the maximum height
    - conducting trial lift to ensure forklift truck and load are stable, and load is safe to move
    - correctly using horns and mirrors in workplace
    - correctly positioning and using an observer to assist when operating with a load that may restrict vision or be placed out of vision of the operator
    - driving applicable to conditions and moving loads safely
    - driving a forklift truck safely with load in forward and reverse, while maintaining visibility through an obstacle course including:
      - an 'S' bend with a minimum 90 degrees left and right turn
      - ensuring load/s remains stable through pick up, transport and placement
      - forklift truck speed is appropriate to load and surroundings
      - lowering dynamic and non-dynamic loads to appropriate height for travel in forward and reverse
    - picking up, driving, manoeuvring and placing dynamic and non-dynamic loads safely at various heights within a compliant racking system
    - picking up, driving, manoeuvring and placing dynamic and non-dynamic loads safely into/onto an elevated, flat, stable area
    - tilting mast (or forks if applicable) to ensure balance of load
    - using gluts/dunnage appropriately and lowering load safely
    - using tilt and side shift (where fitted) safely to manoeuvre dynamic and non-dynamic loads into allocated space
  - reporting to relevant person/s on site risk control measures that are not in place or are deficient
  - setting up an exclusion zone
  - securely parking forklift truck and isolating in appropriate position including:
    - minimising possible access by unauthorised person/s
    - tynes/attachment lowered to required position in accordance with manufacturer requirements
    - park brake applied
    - switching off, isolating fuel/power source and removing key according to workplace procedures
  - shutting down a forklift truck in accordance with manufacturer requirements and workplace procedures

## Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and industry standards, codes of practice and guidelines to safely operate a forklift truck
- communication procedures including:
  - audible and visual warning devices
  - hand signals
  - questioning techniques
  - signage
  - traffic warning systems
  - two-way radio
  - written instructions
- forklift truck characteristics and capabilities, manufacturer requirements and instructions for any attachments
- impact of the following on the operation of the forklift truck including:
  - failure/loss of control including brakes and steering
  - failure of equipment during forklift truck operations
  - forklift truck instability causes including:
    - deterioration of ground condition
    - overloading
    - pick up and placement of load
    - irregular loads
  - operating on ramps and uneven surfaces and in restricted spaces
  - use of forklift truck data plate and attachment data plate and appropriate methodology to determine weight of a load is appropriate for forklift truck and any attachment if fitted including the estimation or determination from:
    - labels on the actual load
    - markings on the actual load
    - paperwork such as consignment notes, running sheets and weighbridge dockets
    - weighing a carton and calculating load
- manufacturer requirements, instructions and operator's manual
- problems, and appropriate response procedures to unplanned and/or unsafe environmental conditions including:
  - wind
  - lightning
  - water/ice impacted surface/ground
  - rain
  - extreme heat
  - Ultra violet (UV) exposure
- problems and equipment faults, and implementing appropriate response procedures to unplanned and/or unsafe situations including:
  - lock out and tag out procedures
- relevant procedures for refuelling and recharging forklift truck using appropriate PPE

including:

- gas bottle
- connecting battery to charger and disconnecting battery from charger and reconnecting to forklift truck
- refuelling
- procedures for recording, reporting and maintaining workplace records and information
- risk assessment process including hierarchy of control:
  - elimination
  - substitution
  - isolation
  - engineering controls
  - administrative controls
  - personal protective equipment (PPE)
- safe use and compliance of different types of attachments including:
  - bale clamps
  - carpet spike for carpet rolls
  - drum carrier
  - jib attachment
  - paper roll clamps
  - personnel work platforms
  - rotators
  - slippers/fork extensions on tynes
- suitability and lifting capability of the attachment to be used
- shut down procedures for a forklift truck in accordance with manufacturer requirements
- traffic management plan procedures and requirements
- typical routine problems encountered operating a forklift truck and associated equipment, and adjustments required for correction
- workplace procedures including work plan which may be verbal, documented/written, or electronically generated
- work area operating surface suitability including issues with:
  - backfilled ground
  - bitumen (damaged, cracked)
  - concrete (damaged, cracked)
  - hard compacted soil
  - potholes
  - railway tracks
  - rough uneven or difficult terrain including sloping surfaces, uneven surfaces, steel decks and grates
  - soft soils
  - trench covers
- Work Health and Safety (WHS)/Occupational Health and Safety (OHS)/Occupational Safety

and Health (OSH) requirements, safe work and workplace procedures

## Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

- Simulators must not be used in the assessment of this unit of competency.

Resources for assessment must include access to:

- a suitable forklift truck that complies with AS 2359 Powered industrial trucks and is in a safe/serviceable condition in accordance with manufacturer requirements
- associated equipment for forklift truck operations
- suitable dynamic and non-dynamic loads
- suitable compliant racking system
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including:
  - approved codes of practice and relevant guidance material
  - relevant Australian technical standards
  - manufacturer guidelines (instructions, requirements or checklists), relevant industry standards and operating procedures (where applicable)

## MSF Furnishing Training Package

### Modification History

Release	Release date	Comment
Release 7.0		<p>Furnishing Release 7.0, contains:</p> <ul style="list-style-type: none"> <li>• Five (5) updated equivalent qualifications: <ul style="list-style-type: none"> <li>• MSF10122 Certificate I in Furnishing</li> <li>• MSF20322 Certificate II in Cabinet Making and Timber Technology</li> <li>• MSF20522 Certificate II in Furniture Making Pathways</li> <li>• MSF30122 Certificate III in Furniture Finishing</li> <li>• MSF30722 Certificate III in Upholstery</li> </ul> </li> <li>• Three (3) updated non-equivalent qualifications: <ul style="list-style-type: none"> <li>• MSF20122 Certificate II in Furnishing</li> <li>• MSF30322 Certificate III in Cabinet Making and Timber Technology</li> <li>• MSF40522 Certificate IV in Piano Technology</li> </ul> </li> <li>• Three qualifications update core BSB and CUA units: <ul style="list-style-type: none"> <li>• MSF40122 Certificate IV in Interior Decoration</li> <li>• MSF50222 Diploma of Interior Design</li> <li>• MSF60122 Advanced Diploma of Interior Design</li> </ul> </li> <li>• One new unit of competency: <ul style="list-style-type: none"> <li>• MSFGN2004 Produce simple scale drawings by hand</li> </ul> </li> <li>• 89 revised equivalent units of competency</li> <li>• 24 revised non-equivalent units of competency</li> <li>• 55 deleted units of competency</li> <li>• Five (5) Skill Sets</li> </ul>

Release 6.0	03 June 2022	<p>Furnishing Release 6.0, contains:</p> <ul style="list-style-type: none"> <li>• Two (2) revised non-equivalent qualifications: <ul style="list-style-type: none"> <li>• MSF40222 Certificate IV in Furniture Design and Manufacturing</li> <li>• MSF50322 Diploma of Furniture Design and Manufacturing</li> </ul> </li> <li>• One (1) revised equivalent qualifications: <ul style="list-style-type: none"> <li>• MSF30422 Certificate III in Glass and Glazing</li> </ul> </li> <li>• Thirty seven 37 units of competency: <ul style="list-style-type: none"> <li>• 35 upgraded units of competency</li> <li>• 2 new unit of competency <ul style="list-style-type: none"> <li>• MSFFDM4019 Research and select manufacturing technologies</li> <li>• MSFGG2017 Fabricate and install insect and security screens</li> </ul> </li> <li>• 25 deleted units</li> </ul> </li> <li>• three skill sets with updated codes resulting from unit code updates</li> <li>• imported elective units updated across the training package</li> <li>• Minor updates to first aid units in qualifications: <ul style="list-style-type: none"> <li>• MSF20113 Certificate II in Furnishing</li> <li>• MSF20413 Certificate II in Glass and Glazing</li> <li>• MSF30418 Certificate III in Glass and Glazing</li> </ul> </li> <li>• One qualification deleted: <ul style="list-style-type: none"> <li>• MSF50118 Diploma of Stained Glass and Leadlighting</li> </ul> </li> <li>• 13 units deleted.</li> </ul>
-------------	--------------	---

Release 5.0	07 May 2020	<p>Furnishing Release 5.0, contains:</p> <ul style="list-style-type: none"> <li>• One (1) revised non-equivalent qualification: <ul style="list-style-type: none"> <li>• MSF30919 Certificate III in Blinds, Awnings, Security Screens and Grilles</li> </ul> </li> <li>• Five (5) new units of competency: <ul style="list-style-type: none"> <li>• MSFBA3011 Assemble awnings</li> <li>• MSFBA3012 Assemble interior blinds</li> <li>• MSFBA3019 Assemble roller shutters</li> <li>• MSFBA3020 Install roller shutters</li> <li>• MMSFFDT3001 Install low-voltage technology, automation, and intelligent management systems in furnishing</li> </ul> </li> <li>• Fourteen (14) revised and superseded units of competency: <ul style="list-style-type: none"> <li>• Five (5) revised equivalent units of competency: <ul style="list-style-type: none"> <li>• MSFBA2011 Select and apply hardware and fixings for blinds, awnings, screens and grilles</li> <li>• MSFBA3014 Assemble pelmets</li> <li>• MSFBA3017 Install interior blinds</li> <li>• MSFGN3004 Resolve quality and compliance issues</li> <li>• MSFSF2015 Cut single layer fabrics</li> </ul> </li> <li>• Nine (9) revised non-equivalent units of competency: <ul style="list-style-type: none"> <li>• MSFBA3015 Install louvre shutters</li> <li>• MSFBA3016 Install awnings</li> <li>• MSFBA3018 Assess suitability of blinds and awnings</li> <li>• MSFBA3021 Assemble louvre shutters</li> <li>• MSFGN2003 Organise Australian Standards testing of products, materials, and their design</li> <li>• MSFGN3003 Advise customers on products and services</li> <li>• MSFSF3014 Construct Roman-style blinds</li> <li>• MSFSS3004 Install non-security and security screens and grilles</li> <li>• MSFSS3005 Assemble non-security and security screens and grilles</li> </ul> </li> </ul> </li> </ul>
-------------	-------------	--

Release 4.0	3 December 2018	<p>Furnishing Release 4.0, contains:</p> <ul style="list-style-type: none"><li>• 9 revised qualifications:<ul style="list-style-type: none"><li>• MSF30418 Certificate III in Glass and Glazing</li><li>• MSF30818 Certificate III in Flooring Technology</li><li>• MSF40418 Certificate IV in Glass and Glazing</li><li>• MSF31018 Certificate III Interior Decoration Retail Services</li><li>• MSF40118 Certificate IV in Interior Decoration</li><li>• MSF40318 Certificate IV in Kitchen and Bathroom Design</li><li>• MSF50218 Diploma of Interior Design</li><li>• MSF60118 Advanced Diploma of Interior Design</li><li>• MSF30518 Certificate III in Picture Framing</li></ul></li><li>• 176 units of competency:<ul style="list-style-type: none"><li>• 168 revised units</li><li>• 8 new units.</li></ul></li></ul>
-------------	-----------------	---

Release 3.1	9 December, 2016	<p><b>Industry Reference Committee upgrade:</b></p> <ul style="list-style-type: none"><li>• MSF20313 Qualification Descriptor adjusted to reflect target group – no change to qualification.</li><li>• Missing content for MSFFDT5004 replaced on TGA – no change to endorsed unit.</li><li>• Replacement of superseded imported units in MSF20113, MSF20313, MSF30413 and MSF30913.</li><li>• Listing of imported units corrected in MSF50313.</li></ul> <p>Refer to MSF Furnishing Training Package Companion Volume Implementation Guide for further information.</p>
-------------	------------------	--

Release 3	12 July, 2016	<p><b>SF Release 3.0</b></p> <p>Addition of one new pathways qualification and 10 new pathways units of competency.</p> <p><b>Industry Reference Committee upgrades</b></p> <ul style="list-style-type: none"><li>• Replacement of superseded imported units – all qualifications.</li><li>• Inclusion of 3 new furniture fitting Skill Sets</li><li>• Clarification/correction of packaging rules re WHS units of competency and additional information included in Application re licensing and workplace requirements: MSF20313, MSF30413, MSF30813, MSF30913, MSF31013, MSF31112, MSF31313, MSF50213 and MSF60113.</li></ul>
-----------	---------------	--

Release 2	4 March, 2016	<p>Endorsement of four (4) new units of competency:</p> <ul style="list-style-type: none"><li>• MSFFL3051 Install timber flooring to joists</li><li>• MSFSL3006 Assemble copper foil glass components</li><li>• MSFSL3007 Fuse glass</li><li>• MSFSL3008 Process coloured and textured glass by hand</li></ul> <p><b>ISC upgrade:</b></p> <ul style="list-style-type: none"><li>• MSF30413 -Three (3) new units included in Group D</li><li>• MSF30813 - One (1) new unit included in Group A, Timber electives</li><li>• 26 qualifications updated to reflect current release of 94 imported units.</li></ul> <p>For full details of changes refer to MSF Furnishing Training Package Implementation Guide.</p>
-----------	---------------	--

Release 1.3	10 September 2015	<p><b>ISC upgrade</b></p> <ul style="list-style-type: none"> <li>• MSF31113 - Packaging for pathways clarified and choice for Group A corrected. No changes to packaging rules.</li> <li>• New Skill Set - MSFSS00004 Kitchen and Bathroom Installer License</li> <li>• MSFSGG3009 - minor additions to Range of Conditions and Performance Evidence</li> </ul> <p><b>Update of Australian Standards codes:</b></p> <ul style="list-style-type: none"> <li>• MSFSGG2008 Glaze and re-glaze residential windows and doors</li> <li>• MSFSGG2009 Fabricate and assemble frames</li> <li>• MSFSGG3013 Set up and operate insulated glass unit (IGU) manufacturing equipment</li> <li>• MSFSGG3016 Fabricate and install residential windows and doors</li> <li>• MSFSGG3017 Fabricate and install commercial glazing</li> <li>• MSFSGG3018 Prepare and install architectural engineered glazing</li> <li>• MSFSGG4001 Apply standards and codes of practice for the glass industry</li> <li>• MSFSGG4004 Perform laser measurement and levelling for glass windows and doors in buildings</li> </ul> <p>For full details of changes refer to MSF Furnishing Training Package Implementation Guide.</p>
-------------	-------------------	---

Release 1.2	17 March 2014	<p><b>ISC Upgrades</b></p> <ul style="list-style-type: none"> <li>• Data transfer corrections for: <ul style="list-style-type: none"> <li>• MSFGN3002 - Assessment Requirements reinstated</li> <li>• MSFFF2005 - Performance Evidence reinstated</li> <li>• MSFID6009 - Prerequisite unit reinstated</li> </ul> </li> <li>• Data transfer corrections to unit mapping for: <ul style="list-style-type: none"> <li>• MSFFT4009</li> <li>• MSFFM3013</li> </ul> </li> <li>• Correction to unit title for: <ul style="list-style-type: none"> <li>• MSFGG3020</li> </ul> </li> <li>• Eight qualifications amended: <ul style="list-style-type: none"> <li>• MSF20113 - two (2) unit titles corrected</li> <li>• MSF20313 - one (1) unit title corrected</li> <li>• MSF20413 - one (1) unit title corrected</li> <li>• MSF30413 - two (2) unit codes and two (2) unit titles corrected</li> <li>• MSF30813 - two (2) unit titles corrected</li> <li>• MSF31113 - one (1) unit title corrected</li> <li>• MSF40413 - one (1) unit title corrected and prerequisite unit reinstated in elective group</li> <li>• MSF60113 - one (1) unit title corrected</li> </ul> </li> </ul> <p>For full details of changes refer to mapping information in the MSF Furnishing Training Package Implementation Guide</p> <p><a href="http://www.mskills.com.au/training-packages/furnishing">http://www.mskills.com.au/training-packages/furnishing</a></p>

# MSFSS00009 Insulating Glass Unit Manufacturing

## Modification History

Release 1. Supersedes and is not equivalent to MSFSS00002 Insulating Glass Unit Manufacturing.

## Description

This Skill Set has been developed for the upskilling of existing glaziers in the requirements for the manufacturing of insulated glass units (IGU's) so as to conform to the new standards of a growing market.

## Pathways Information

This Skill Set can only be achieved after completion of MSF30413 Certificate III in Glass and Glazing, or equivalent qualification at a similar qualification level.

## Licensing/Regulatory Information

No licensing, legislative or certification requirements apply directly to this Skill Set at the time of publication. However, in some jurisdictions licensing or regulatory requirements may apply. Users are required to check local requirements.

## Skill Set Requirements

- MSMWHS300 Facilitate the implementation of WHS for a work group
- MSFGG3039 Manually move glass
- MSFGG3042 Process glass by semi-automatic machines
- MSFGG3030 Process glass by automatic machines
- MSFGG3041 Set up and operate insulated glass unit (IGU) manufacturing equipment
- MSS402051 Apply quality standards

## Target Group

People currently employed, or future employees, engaged in the manufacture of insulating glazing units (also known as double glazing units).

## **Suggested words for Statement of Attainment**

These competencies from the MSF30413 Certificate III in Glass and Glazing meet the minimum industry requirements for the manufacture of insulating glazing units as defined in AS/NZS4666.

## **Custom Content Section**

Not applicable.

# MSFSS00010 Insulating Glass Unit Fabricator/Installer

## Modification History

Release 1. Supersedes and is not equivalent to MSFSS00003 Insulating Glass Unit Fabricator/Installer.

## Description

This Skill Set has been developed for the upskilling of existing glaziers in the requirements for the fabrication and installation of insulated glass units (IGU's) so as to conform to the new standards of a growing market.

## Pathways Information

This Skill Set can only be achieved after completion of MSF30413 Certificate III in Glass and Glazing.

## Licensing/Regulatory Information

No licensing, legislative or certification requirements apply directly to this Skill Set at the time of publication. However, in some jurisdictions licensing or regulatory requirements may apply. Users are required to check local requirements.

## Skill Set Requirements

MSFGG2016 Assemble glazing products

MSFGG3028 Select, cut and process materials for glazing products

MSFGG3039 Manually move glass

MSFGG3034 Install residential windows and doors

MSFGG3036 Install commercial glazing products

MSS402051 Apply quality standards

## Target Group

People currently employed, or future employees, engaged in the fabrication and installation of insulating glazing units (commonly known as double glazing units).

## **Suggested words for Statement of Attainment**

These competencies from the MSF30413 Certificate III in Glass and Glazing meet the minimum industry requirements for the fabrication and installation of insulating glazing units as defined in AS/NZS4666.

## **Custom Content Section**

Not applicable.

# MSFSS00013 Furnishing Industry Compliance

## Modification History

Release 1. Supersedes and is equivalent to MSFSS00008 Furnishing Industry Compliance.

## Description

This Skill Set has been developed by industry to develop and upskill workers with an understanding of Australian Standards and compliance requirements for the manufacture, distribution, and repair (after care) of fitted and free standing furnishing products.

## Pathways Information

These units provide credit towards relevant Certificate IV qualifications from the MSF Furnishing Training Package.

## Licensing/Regulatory Information

Not applicable.

## Skill Set Requirements

- MSFFDM4018 Research and organise product inspection and testing
- MSFGN4001 Research and meet ethical and compliance requirements
- MSFGN3004 Resolve quality and compliance issues
- MSS402051 Apply quality standards

## Target Group

This skill sets is for individuals who have completed any Certificate III from the MSF Furnishing Training Package or other aligned industry training packages or who have documented relevant industry experience, and are now required to upskill and to ensure compliance requirements are maintained and monitored to meet Australian standards and client needs.

## **Suggested words for Statement of Attainment**

These competencies from the MSF Furnishing Training Package meet the minimum industry requirements for the ensuring compliance of fitted furniture to Australian and industry standards.

## **Custom Content Section**

Not applicable.
