**Assessment Requirements for MSS407010
Improve visual management in the
workplace**

Release: 1

Assessment Requirements for MSS407010 Improve visual management in the workplace

Modification History

Release 1. Supersedes and is equivalent to MSS407010A Improve visual management in the workplace

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy the requirements of the elements and performance criteria and include the ability, for one (1) or more production/support areas, to:

- assess current visual management displays, strategies and effectiveness
- determine visual management improvement strategy
- undertake visual management improvement
- implement (or initiate and follow through on the implementation of) the actions which flow from the visual management project
- examine the outcomes and identify improvements.

Knowledge Evidence

Must provide evidence that demonstrates sufficient knowledge to interact with relevant personnel and be able to improve an organisation's visual management, including knowledge of:

- concept of value and value-add in terms of the customer
- understanding of the organisation's operations and processes subject to visual management
- visual management techniques
- visual management strategies to provide information to employees
- the application of visual management as part of the overall competitive improvement approach of the organisation.

Assessment Conditions

- The unit should be assessed holistically and the judgement of competence shall be based on a holistic assessment of the evidence.
- The collection of performance evidence is best done from a report and/or folio of evidence drawn from:
 - a single project which provides sufficient evidence of the requirements of all the elements and performance criteria
 - multiple smaller projects which together provide sufficient evidence of the requirements of all the elements and performance criteria.

- A third-party report, or similar, may be needed to testify to the work done by the individual, particularly when the project has been done as part of a project team.
- Assessment should use a real project where an operational workplace is examined to determine the effectiveness of the current visual management strategies and tools and determination made regarding integration of additional/alternative visual management strategies and tools.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept).
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Conditions for assessment must include access to all tools, equipment, materials and documentation required, including relevant workplace procedures, product and manufacturing specifications associated with this unit.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with an organisation providing relevant environmental monitoring, management or technology services about performing the competency being assessed within the last twelve months.
